Agriculture and Grazing

Project Description: (please use a separate page if necessary)

DWR and USFS propose to 1) restore Thompson Meadow using a variety of techniques, including partial channel fill and widening; complete channel fill; rock sleeper weirs; a meadow cut; fill material from upland borrow sites; rock raised riffle structures; a rock grade control structure; and headcut treatments including raised riffle structures, a rock apron, and an earthen plug; 2) improve and widen existing road; 3) revegetate and stabilize newly constructed restoration areas and borrow areas; 4) install wildlife-friendly fencing around a portion of the restoration area for grazing management; and 5) maintain the constructed project based on post-project performance monitoring results.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
