

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Cosumnes River College - Phase 2.1 Instructional Building Project

Lead Agency: Los Rios Community College District

Contact Name: Dan McKechnie

Email: McKechnieD@losrios.edu Phone Number: 916-856-3409

Project Location: Sacramento Sacramento  
*City* *County*

**Project Description (Proposed actions, location, and/or consequences).**

The Los Rios Community College District is proposing to construct a new instructional building (Phase 2 of Master Plan) to accommodate growing student demands, in the southwest portion of the CRC Elk Grove Center campus, located at 10051 Big Horn Blvd., Elk Grove, Sacramento County. The area proposed for the new instructional building currently consists of vacant land and is adjacent to southwest of the existing (Phase I of the Master Plan) instructional building. The proposed construction, which is still in the design phase, currently includes the construction of one two-story building with instructional, laboratory, office, and support spaces for chemistry and biology departments with ADA access

The Project is located at the Cosumnes River College campus Elk Grove Center, in Sacramento County, at the intersection of Big Horn Blvd. and Whitelock Parkway. The Elk Grove Center address is 10051 Big Horn Blvd, Elk Grove, California, and consists of approximately 13 acres of land (APN: 132-2140-002).

**Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.**

The Project does not have the potential to substantially reduce habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory. Mitigation Measures included to address potential impacts to Swainson's hawk, nesting migratory birds, and potential impacts to cultural resources are reduced to less than significant levels.

With mitigation measures incorporated, the project would not be expected to result in any new environmental effects, such as significant increases in GHG emissions, exposure to hazards or hazardous materials, or exposure to excessive noise levels, which would cause adverse effects on human beings. Because adverse effects on human beings, either directly or indirectly, would not occur as a result of implementation of the proposed project, less-than-significant impacts with mitigations incorporated would result.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not Applicable

Provide a list of the responsible or trustee agencies for the project.
