Reclamation District No. 3 plans to repair approximately 1,700 feet of levee to address critical erosion, bank loss, and waterside instability by placing rock, while restoring riparian habitat by establishing a waterside berm planted with native species. The Project will include placing rock on the waterside levee slope and reconstructing a section of the bank with a soil planting berm and rock containment berm. The Project will reestablish the authorized waterside levee slope geometry by replacing the bank and associated function that was part of the original federal levee.

## Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".  
If you have already sent your document to the agency please denote that with an "S".
