Project Description (Proposed actions, location, and/or consequences).

Reclamation District No. 3 plans to repair approximately 1,700 feet of levee to address critical erosion, bank loss, and waterside instability by placing rock, while restoring riparian habitat by establishing a waterside berm planted with native species. The Project will include placing rock on the waterside levee slope and reconstructing a section of the bank with a soil planting berm and rock containment berm. The Project will reestablish the authorized waterside levee slope geometry by replacing the bank and associated function that was part of the original federal levee.

Location: Southern end of Reclamation District No. 3, Grand Island, Sacramento County

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on the Initial Study, RD 3 has determined that the Project will not have any significant impacts on the environment once mitigation measures included in the Project design are implemented.

Proposed Mitigation Measures: Mitigation measures included in the Project to avoid or minimize potential environmental impacts are included in the attached Initial Study, which is hereby incorporated and fully made part of this Mitigated Negative Declaration. Implementation of these mitigation measures will reduce the potential environmental impacts of the Project to a less-than-significant level. Reclamation District No. 3 has agreed to implement each of the identified mitigation measures, which were adopted as part of the Mitigation Monitoring and Reporting Program.
