Delivery Truck info provided by Blake Tremblay emails on 6/15/20 and 6/16/20

Deliveries: 365 days per year, 24 hrs/day

East Side of LSTE-E Building
12 trucks per day
North Side of Residential Building
12 trucks per day
Food and Kitchen Hub in Residential Building
15 trucks per day

Yearly # Trips by Loading Area	
East Side of LSTE-E	4380
North Side of Res	4380
Food and Kitchen Hub	5475
Total	14235

For running, truck trips per year * AERMOD source length * grams/mile

For idling, we should use 5 minutes per state law. So it would be truck trips per year * 5 minutes per trip.

ICF Biological Surveys Conducted for the UC Davis 2020 LRDP Update and Aggie Square Phase I Draft Supplemental EIR

Appendix F

ICF Biological Surveys Conducted for the UC Davis 2020 LRDP Update and Aggie Square Phase I Draft Supplemental EIR

On March 3, 2020, ICF biologists Lisa Webber and Angela Alcala conducted field surveys for the UC Davis 2020 LRDP Update and Aggie Square Phase I Draft Supplemental EIR. The surveys included a windshield survey conducted within the 2020 LRDP boundary to assess existing conditions. During the windshield survey, the biologists drove existing roads and stopped in parking areas to document trees species and to assess existing habitat conditions relative to conditions described in the 2010 LRDP (Figure F-1). More detailed field surveys were conducted for the Aggie Square and the Hospital Tower project areas. Within these areas, undeveloped portions of the project areas were walked to document vegetation characteristics, tree species, and potential wildlife habitat. Within areas where existing vegtetated areas (including landscaped areas) would be converted to developed areas (buildings, parking structures, etc.), the botanist characterized the vegetation and identified native trees. Within the Central Campus Open Space area, elderberry shrubs were mapped and inspected for exit holes to assess potential occupancy by the federally listed valley elderberry longhorn beetle. Existing structures within the Hospital Tower project limits were assessed for their potential to support roosting bats.

The location of areas that were surveyed on foot are shown below in Figures F-1 and F-2.

Information on trees species and the location of native trees was collected, specifically within areas where vegetation removal is proposed (e.g., existing parking area within Aggie Square project limits and trees within the Hospital Tower project area).

MAP LEGEND

- Blue line indicates the LRDP boundary
- Red line indicates Aggie Square project limits
- Yellow line indicates Aggie Square staging areas
- Dotted line indicates vehicle route to taken for windshield survey

Traffic Modeling Results

2020 LRDP Update - Transit Ridership Demand Estimate Calculation

Category	Value	Source/Notes
Number of Employees Commuting by Transit to UC Davis Sacramento Campus (estimated based on LEHD)	234	U.S. Census Bureau, OnTheMap Application and LEHD Origin-Destination Employment Statistics (Beginning of Quarter Employment, 2nd Quarter of 2002-2017)
Percent of Employees Commuting by Transit to UC Davis Sacramento Campus (estimated based on LEHD)	3.16%	U.S. Census Bureau, OnTheMap Application and LEHD Origin-Destination Employment Statistics (Beginning of Quarter Employment, 2nd Quarter of 2002-2017)
Transit Mode Split for Analysis	5%	Rounded up for conservative estimate

Employee Transit Ridership Demand Estimate

New UC Davis Sacramento Campus employee/ student commuters with 2020 LRDP Update (excludes students expected to live on-campus)	5,478	ICF estimate
Additional transit passengers (employees/student commuters)	274	= 5% * 5,478

Residential Transit Ridership Demand Estimate

Transit Mode Split of 95817	4.60%	
ICF's estimate for projected increase of residents with 2020 LRDP Update	611	
Additional transit passengers (residents)	28	= 4.60% * 611

Total Employee & Resident Transit Ridership Demand Estimate

Additional transit passengers (employee/student commuters & residents; excludes patients/visitors)	302	= 274+28
