Notice of Preparation

PUBLIC NOTICE

Notice of Preparation of an Environmental Impact Report University of California, Davis Sacramento Campus 2020 Long Range Development Plan Update

In accordance with the provisions of the California Environmental Quality Act (CEQA), the University of California, Davis (UC Davis) has released for public review a Notice of Preparation (NOP) to solicit comments on the scope of a Supplemental Environmental Impact Report (SEIR) for the 2020 Long Range Development Plan (LRDP) Update, which will propose general types of campus development and land uses to support projected on-campus population growth and enable expanded and new program initiatives. The NOP is intended to satisfy the requirements of CEQA (Public Resources Code [PRC], Division 13, Sections 21000–21177) and the CEQA Guidelines (California Code of Regulations, Title 14, Sections 15000–15387).

Project Location: The UC Davis Sacramento Campus is located off U.S. 50 near the Highway 99/Business 80 interchange in the city of Sacramento. The Sacramento Campus consists of approximately 150 acres and houses UC Davis Health (UCDH), which includes the UC Davis Medical Center, UC Davis School of Medicine, extensive research facilities, outpatient clinics, support facilities, and the Betty Irene Moore School of Nursing, as well as the UC Davis Graduate School of Management's Sacramento Master in Business Administration program. UCDH includes a 625-bed teaching hospital, a National Cancer Institute-designated Comprehensive Cancer Center, and a nationally ranked children's hospital. In 2018–2019, UC Davis Medical Center had over 34,000 inpatient admissions, over 80,000 emergency room visits, and over 900,000 clinic/office visits.

Project Overview: The UC Davis 2020 LRDP Update will propose a land use plan to support projected growth predominantly through redevelopment of existing facilities and construction on previously developed land. UC Davis anticipates that, under the 2020 LRDP Update, the on-campus population could grow to include approximately 19,700 people and 6.5 million square feet of building space. To accommodate the increased population, the 2020 LRDP Update will propose facility renewal; improved seismic safety, including demolition of certain existing hospital facilities; and construction of new additional building space. The 2020 LRDP Update will not include planning or growth for UC Davis facilities outside of the UC Davis Sacramento Campus, such as the UC Davis Main Campus, the Tahoe Environmental Research Center, or the Bodega Marine Laboratory. The 2020 LRDP Update will propose to place approximately 600 people in new housing. In addition to analyzing the potential programmatic impacts of campus growth under the 2020 LRDP Update, the 2020 LRDP Update SEIR will address the project-specific environmental effects associated with constructing the proposed Aggie Square Phase 1 project and a seismic safety project to construct a Replacement Hospital Tower.

Environmental Effects: The University of California will be the lead agency under CEQA (PRC Section 21000 et seq.) and will prepare an SEIR for the 2020 LRDP Update as required by PRC Sections 21080.09 and 21116. The SEIR will function as a program EIR (pursuant to CEQA Guidelines Section 15168) that can be used in the environmental review of subsequent campus development projects during implementation of the 2020 LRDP Update. In addition to analyzing the potential impacts of incremental campus growth under the 2020 LRDP Update, the SEIR will also provide a project-specific analysis of the potential environmental effects associated with the Aggie Square Phase 1 project and the Replacement Hospital Tower project. UC Davis has determined that an SEIR will be required for the 2020 LRDP Update, and when the decision to prepare an EIR has already been made, CEQA states that an initial study is not required. As such, an initial study has not been prepared. This NOP has been prepared pursuant to Sections 15082 and 15083 of the CEQA Guidelines.

UC Davis requests input regarding the scope and content for the draft SEIR that is relevant to your agency's statutory/regulatory responsibilities or is of interest to individuals to ascertain potential environmental impacts of the project. The NOP comment period extends from February 7, 2020 to March 10, 2020.

Where to Review the NOP: The NOP is available for review at the following locations.

Online: https://environmentalplanning.ucdavis.edu/uc-davis-sacramento-campus-2020-lrdp-update

Public Review Copies:

- UC Davis Health Center, Facilities Design and Construction, 4800 Second Avenue, Suite 3010, Sacramento, CA 958178.
- Sacramento Colonial Heights Library, 4799 Stockton Boulevard, Sacramento, CA 95820.
- UC Davis Office of Environmental Stewardship and Sustainability in 436 Mrak Hall on the UC Davis campus, Davis, CA 95616.
- Reserves at Shields Library on the UC Davis campus, Davis, CA 95616.

Comment Opportunities: Formal comments regarding the NOP may be submitted in writing via mail or email during the NOP comment period. Written comments regarding the scope and content of information in the NOP and the scope and content of the upcoming draft SEIR should be submitted no later than **March 10, 2020 at 5:00 pm**. Comments should be submitted to:

Matt Dulcich, AICP
Director of Environmental Planning
Campus Planning and Environmental Stewardship
University of California, One Shields Avenue
Davis, CA 95616
environreview@ucdavis.edu

Open House: UC Davis will also conduct a scoping session during the NOP review period. The objective of the session is to brief interested parties on the scope of the 2020 LRDP and obtain the views of agency representatives and the public on the scope and content of the SEIR and potentially significant environmental impacts related to the project. The open house session will be held Wednesday, February 26 from 4:30 to 6:30 pm at Aggie Square Headquarters at 2270 Stockton Boulevard, Sacramento, California 95817. At the scoping session, project information can be discussed with UC Davis staff, and written NOP comments will also be accepted.

Re: Comments on the Notice of Preparation for the UC Davis Sacramento Campus 2020 LRDP Update

Dear Mr. Dulcich,

WALKSacramento has reviewed the Notice of Preparation for the Environmental Impact Report for the UC Davis Sacramento Campus 2020 LRDP Update and would like to provide comments regarding evaluation questions and mitigation measures that emphasize reducing displacement and improving quality of life for current residents living within the Aggie Square impact area.

WALKSacramento is a nonprofit planning and advocacy organization that improves quality of life and health equity through community-centered policy and systems change in land use, transportation, and community development. Our work partnering and engaging with community members in Oak Park, Fruitridge, Lemon Hill, and other neighborhoods located in South Sacramento has helped us develop a strong understanding of community needs, concerns, and priorities for built environment change.

The Population & Housing issue area includes evaluation of whether the project will "displace a substantial number of existing people or housing, necessitating the construction of replacement housing elsewhere". As written, this question implies the direct destruction and demolition of property. However, displacement may also occur in the form of increased housing costs that price residents out of their homes. We recommend incorporating current homeownership rates, housing cost forecasts, and other indicators for displacement vulnerability into the impact analysis. Replacement of housing elsewhere should be avoided as much as possible, with a focus on mitigation measures that allow residents to remain in their communities. Such measures may include a percentage of on-site housing dedicated as low-income affordable housing and implementation of rent stabilization policies.

Vehicle Miles Traveled (VMT) is not explicitly identified in either the Greenhouse Gas Emissions or Transportation, Circulation, & Parking issue areas. Because the project will likely result in an increase in jobs and student population, there may be increases in VMT that impact air quality, greenhouse gas emissions, and congestion. Mitigation measures to reduce VMT may include on-site housing, active transportation infrastructure to provide connections to the surrounding neighborhoods, and transportation demand management programs.

In particular, improving pedestrian access across Stockton Boulevard should be a priority mitigation. Wide intersections and long crossing distances along Stockton Boulevard contribute to an unsafe pedestrian environment that discourages active travel and limits access to community destinations. Additionally, the neighborhoods west of Aggie Square, including Oak Park and South Oak Park, currently have limited access to community-serving destinations and health-supportive services as a result of

historic disinvestment. Improving connectivity across Stockton Boulevard will allow these neighborhoods to benefit from access to jobs, medical services, higher education, and other opportunities that Aggie Square will offer, all of which can support improved economic and health outcomes for current residents.

Aggie Square has the potential to serve as a substantial asset to the neighboring communities. However, there are also concerns that this project will result in gentrification and displacement of current residents. As such, a strong focus on displacement vulnerability and anti-displacement metrics is critical to the impact analysis of the environmental review process.

Thank you for the opportunity to provide comments and for consideration of our recommendations.

Sincerely,

Alicia Brown, CPTED CPD

UC Davis Sacramento Campus 2020 Long Range Development Plan Update, NOP/EIR

Dear Mr. Dulcich:

Thank you for including California Department of Transportation (Caltrans) in the application review for the project referenced above. Caltrans' new mission, vision, and goals signal a modernization of our approach to California's transportation system. We review this local development for impacts to the State Highway System (SHS) in keeping with our mission, vision and goals for sustainability/livability/economy, and safety/heath. We provide these comments consistent with the state's mobility goals that support a vibrant economy and build communities.

The UC Davis Sacramento Campus 2020 Long Range Development Plan Update (Project) proposes general types of campus development and land use to support projected campus population growth. The proposed Aggie Square Phase 1 project consists of approximately 1,150,000 square feet of building space for education, research, residential and commercial uses and parking structure space. The Replacement Hospital Tower includes demolition of the existing tower and construction of approximately 600,000 to 800,000 gross square feet (gsf) east of the Main Hospital complex's Surgery and Emergency Services Pavilion, plus approximately 100,000 gsf of renovation.

The Project is primarily located along the east side of Stockton Boulevard, south of V Street and north of Broadway. The Project is also within close proximity to US Route 50 (US-50), being located approximately 2,000 feet from the Stockton Boulevard/US-50 interchange. Primary access points to the Project are located along Stockton Boulevard and Broadway. Additional access points are located on V Street by way of 45th Street, and 48th Street. Based on the information provided, Caltrans provides the following comments:

Traffic Forecasting and Modeling

Based on the net new population, housing units, building square feet shown in Table 1, on page A-7 of the NOP, and the Project's proximity to US-50, a transportation impact analysis (TIS) report is needed to assess impacts to the state highway system. The analysis should include:

- A Vehicle Miles Travelled (VMT) analysis which includes VMT per capita, and the average VMT per capita for the surrounding area.
- Trip generation table for all land uses in this project.
- Trip distribution percentages.
- How many phases the project will be built and completion year of each phase.
- Existing traffic volumes.
- Project only traffic volumes.
- If the project is going to be built in phases, the existing traffic volume (during completion year of that phase) with and without the project volume for that phase.
- Existing traffic volume (in full build out year) with and without the full build out project volume.
- Cumulative traffic volumes with and without project.
- VMT per capita and project VMT.
- The interchanges to include in the analysis are: (include ramps in both directions)
    - US-50/Stockton Boulevard.
    - US-50/59th Street.
    - US-50/65th Street.

Caltrans would also like a construction traffic management plan (TMP) to be implemented. The TMP should include the duration of construction, daily hours of operations, number of and types of vehicles used, number of construction employees, and truck routes. The segment of US-50 near the Stockton Boulevard/US-50 interchange currently operates at or near capacity. Caltrans would additionally like to know when construction trucks will use mainline US-50, the US-50/Stockton Blvd interchange, the US-50/59th street interchange, and US-50/65th street interchange, and or any other State Highway System (SHS) that might be used during the construction of this project.

Encroachment Permit

An encroachment permit will be required from Caltrans before any work performed on the State ROW if not previously obtained. To apply, a completed encroachment permit application, environmental documentation, and five sets of plans clearly indicating State ROW must be submitted to:

Hikmat Bsaibess
California Department of Transportation
District 3, Office of Permits
703 B Street
Marysville, CA 95901

Please provide our office with copies of any further actions regarding this project. We would appreciate the opportunity to review and comment on any changes related to this development.

If you have questions regarding these comments or require additional information, please contact Todd Rogers, Yolo County Intergovernmental Review Coordinator, by phone (530) 741-4507 or via email to todd.rogers@dot.ca.gov.

Sincerely,

David Smith, Acting Branch Chief
Office of Transportation Planning
Regional Planning Branch – South

Re: Input regarding scope & content of the draft supplemental environmental impact report (SEIR) for the UC Davis Sacramento Campus 2020 long range development plan update.

Date: March 9, 2020

Thank you for the opportunity to comment. Please review the following points for evaluation in the SEIR that is the subject of the Notice of Preparation Environmental Impact Report submitted to the Office of Planning and Research dated February 7, 2020.

Proposed parking structures – aesthetic and traffic impacts:

The proposed parking structures that I wish to focus on are the three abutting V Street in the Elmhurst neighborhood, i.e., the two straddling 48th Street and one closer to 39th Street.

As discussed by several neighbors at the February 26th scoping meeting, having the garages stepped-back and set-back from V Street with adequate buffer landscaping is a main concern. Design consideration should be given to having a lower building profile closest to the street with gradual height increases further from the street in a neighborhood friendly design that doesn't over power/over shadow the nearby homes. Keeping as many established large trees in area of the proposed garages is encouraged. Aesthetic treatments should be considered that reduce light and glare intrusion into the surrounding homes including utilization of exterior surfaces that fit with the adjacent older residential neighborhood. For example take a look at the state garage between 13th - 14th and P Streets in Sacramento and notice how the exterior stone, stucco and decorative finishes blend nicely with the townhomes across the street. I'm not suggesting this style is a fit for Elmhurst but, we welcome thoughtful consideration and collaboration with neighbors regarding styles and finishes that best fit with our neighborhood.

Foot traffic is welcome through the neighborhood; cut through vehicle traffic is definitely not. It is very important that vehicles not enter or exit the proposed garages from V Street; access points should be focused on Stockton Boulevard and Broadway and away from neighborhood streets. As you know the City of Sacramento (City) is studying traffic patterns on Stockton Boulevard near the UCD Medical Center (UCDMC) which can be a gridlock nightmare from X Street to the various highway access points near T and 35th Streets. It appears the Stockton Boulevard gridlock in this area is largely attributable to UCDMC employees, students, visitors and patients given the vast difference in traffic volume during the work week vs. holidays and weekends. It is critical to coordinate with the City and that traffic patterns be analyzed to minimize exacerbating the gridlock and cut through neighborhood traffic; especially with the location of the proposed garage closest to 39th Street as Stockton Boulevard gridlock seeking freeway access is particularly bad in this area.

Building expansion projects (Aggie Square & the Replacement Hospital Tower) – traffic and other impacts:

As building at the UCDMC increases, so does traffic in our neighborhood. Now, more than ever, it is time to realistically evaluate alternative transportation modes and public transportation incentives. Over the years, UCDMC campus facilities have generally moved more to the east and south…more towards X Street, 2nd Avenue and Stockton Boulevard, this continues to be the case with the proposed Aggie Square development. Evaluation should be made into shuttling public transportation commuters from the 65th Street Regional Transit hub as well as incentivized access to regional commuter buses from suburban areas such as Folsom, Rocklin and Elk Grove. These commuter buses are very popular with State of California employees in the downtown Sacramento; it is unclear why UCDMC has not had similar success. Additionally, signage to eastbound Highway 50 via Broadway to the 65th Street on ramp may aid some of the Stockton Boulevard gridlock. These are just a few suggestions that may help alleviate traffic congestion on Stockton Boulevard and cut through traffic in Elmhurst.

The current shuttle to the 39th Street light rail station is a failure and has been for years; it does not effectively address patient or employee local public transportation needs. The shuttle is not a "clean" vehicle yet it runs up and down 39th Street at least five-six times an hour and is largely devoid of passengers (often empty) even during peak commute times and bad weather. This shuttle started as a traffic mitigation measure for either the Davis Tower and/or Surgical Pavilion projects when light rail was just being implemented in Sacramento, it sounded good at the time but the benefits never materialized. There are several other nearby light rail stations to the UCDMC that may offer increased ridership (e.g., 29th Street and 65th Street) as they connect with other public transit routes; the 39th Street station connects to no other transit routes. Please analyze the operation of this shuttle, use of other shuttle routes and changing to electric or natural gas shuttles.

During construction, neighborhood traffic impacts may be curtailed by including and enforcing path of travel instructions for consultants/contractors in their contract terms and conditions. Replacing the useless flaccid orange traffic barriers at 45th & V Streets, the Path building and the Ellison building parking structure with effective bollards and clear signage would also greatly help steer vehicles out of Elmhurst.

In the design of the projects attention should be given to safe pedestrian and bicycle passage through the campus and adjacent neighborhoods. Adequate non-intrusive lighting, tree shade, public art and increased garbage receptacles outside all UCDMC buildings and along walkways are key to enhancing the walkability of the Sacramento campus for patients, students and neighbors. There is a lot of opportunity to enhance pedestrian safety with better crosswalk markings at key frequented intersections and round-abouts.

A great feature for the hospital replacement tower project, or campus improvement in general, would be a collaborative effort with the City and local artists to beautify the drab and gloomy 45th street City water facility; there is so much potential there for improvement!

As part of the hospital replacement project, the corner of 45th and V Streets must be improved; it is an eye sore. The chain link fencing and construction trailers were never supposed to remain, nor was the little parking strip along V Street. Per the plans for the Pavilion project and representations made to Elmhurst, this corner area was supposed to be landscaped, contain a small parking lot and, as I recall, picnic tables and/or a seating area. This broken promise to Elmhurst needs to be remedied.

UC Davis Sacramento Campus

2020 Long Range Development Plan (LRDP) Update/Aggie Square/Replacement Hospital Tower Project

Comment Card

The public scoping period is February 7, 2020 through March 10, 2020 at 5:00 pm.

City _____ State _____ Zip _____

1) publicize these open houses/communicated events throughout Elmhurst - putty yard signs on the T St. parkway - not all neighbors are part of ENA & this is easier than flyers at each house.

2) Please check the construction schedule for CalTrans HOV lane that is imminent. It includes a soundwall on south side of Hwy 50 + the HOV lane.

3) Lighting is important - ask a colleague at UCD about the history behind the horrid blue lighted sign years ago that was eventually replaced. due to invasiveness in community.

4) undergrads from Davis should be able to take the electric transportation back to UCD - it is unnecessary to have them on the campus for quarter long internships. They can learn how to commute like adults - kids can give up

UCDAVIS

their Davis lease for one quarter & find something when they return to Davis. And we can't expect them to pay 2 rents. Med Students, Fellows, residents etc. can use that housing more appropriately. They should be big users of the transportation hub.

NOTICE OF PREPARATION OF AN ENVIRONMENTAL IMPACT REPORT FOR THE UNIVERSITY OF CALIFORNIA – UC DAVIS SACRAMENTO CAMPUS 2020 LONG RANGE DEVELOPMENT PLAN UPDATE, X STREET AND 48TH STREET, SACRAMENTO, SACRAMENTO COUNTY, CALIFORNIA (SCH #2020020161)

Dear Mr. Dulcich:

The Northern California Schools Unit of the Department of Toxic Substances Control (DTSC) has received the Notice of Preparation (NOP) for an Environmental Impact Report (EIR) for the UC Davis Sacramento Campus 2020 Long Range Development Plan Update (LRDP Update) proposed by the University of California (UC). The due date to submit comments is March 10, 2020.

As reported in the NOP, the 2020 LRDP Update will propose general types of campus development and land uses to support projected campus population growth and to enable new and expanded program initiatives at the existing UC Davis Sacramento Campus located off of U.S. 50 near the Highway 99/Business 80 interchange in the city of Sacramento (Site). The proposed Aggie Square Phase 1 project consists of approximately 1,150,000 square-feet (sf) of building space for education, research, residential and commercial uses and parking structure space. The Replacement Hospital Tower (RHT) project includes both demolition of the existing tower and construction of the approximately 600,000 to 800,000 sf RHT east of the Main Hospital complex's Surgery and Emergency Services Pavilion and approximately 100,000 sf of renovation.

Printed on Recycled Paper

Based on a review of the NOP, DTSC would like to provide the following comments:

1. Because the project is school site related, DTSC recommends that an environmental review, such as a Phase I Environmental Site Assessment and/or Preliminary Environmental Assessment, be conducted to determine whether there has been or may have been a release or threatened release of a hazardous material, or whether a naturally occurring hazardous material is present based on reasonably available information about the property and the areas in its vicinity. Such an environmental review should generally be conducted as part of the California Environmental Quality Act (CEQA) process. If the UC elects to proceed and conduct an environmental assessment at the Site under DTSC oversight, it should enter into a Voluntary Cleanup Agreement with DTSC to oversee the preparation of the environmental assessment.

2. The presence of existing, older or former structures at the Site may result in potential environmental concerns due to lead from lead-based paint and/or organochlorine pesticides from termiticide applications and polychlorinated biphenyls from electrical transformers, light ballast, window caulking or glazing. DTSC recommends that these environmental concerns be investigated and possibly mitigated, in accordance with DTSC's *Interim Guidance, Evaluation of School Sites with Potential Soil Contamination as a Result of Lead from Lead-Based Paint, Organochlorine Pesticides from Termiticides, and Polychlorinated Biphenyls from Electrical Transformers,* dated June 9, 2006 (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/Guidance_Lead_Contamination_050118.pdf), and in accordance with the recommendations provided in the United States Environmental Protection Agency's website "Polychlorinated Biphenyls (PCBs) in Building Materials" (https://www.epa.gov/pcbs/polychlorinated-biphenyls-pcbs-building-materials).

3. If the Site is, or was previously, used for agricultural purposes, pesticides (such as Dichlorodiphenyltrichloroethane [DDT], Dichlorodiphenyldichloroethylene [DDE], and toxaphene) and fertilizers (usually containing heavy metals) commonly used as part of agricultural operations are likely to be present. These agricultural chemicals are persistent and bio-accumulative toxic substances. DTSC recommends that these environmental concerns be investigated and possibly mitigated, in accordance with the *Interim Guidance for Sampling Agricultural Soils (Third Revision)* (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/Ag-Guidance-Rev-3-August-7-2008-2.pdf) dated August 2008. This guidance should be followed to sample agricultural properties where development is anticipated.

4. If fill material exists on the Site, DTSC recommends these areas be investigated and possibly mitigated in accordance with DTSC's *Information Advisory, Clean Imported Fill* (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/SMP_FS_Cleanfill-Schools.pdf), dated October 2001.

5. If a response action is required based on the results of the above investigations, and/or other information, the EIR will require an analysis of the potential public health and environmental impacts associated with any proposed response action, pursuant to requirements of the California Environmental Quality Act (CEQA - Pub. Resources Code, Division 13, section 21000 et seq.), and its implementing Guidelines (California Code of Regulations, Title 14, section 15000 et seq.), prior to approval or adoption of an EIR for the Project. A discussion of the mitigation and/or removal actions, if necessary, and associated cumulative impacts to the Project properties and the surrounding environment, should be included in the EIR. If enough information to discuss the proposed mitigation and/or removal actions, and their associated impacts to the Project properties and the surrounding environment, are not available for inclusion in the EIR, then an Addendum or Supplement to the final EIR may be required.

DTSC is also administering the Revolving Loan Fund (RLF) Program which provides revolving loans to investigate and clean up hazardous materials at properties where redevelopment is likely to have a beneficial impact to a community. These loans are available to developers, businesses, schools, and local governments.

For additional information on DTSC's Schools process or RLF Program, please visit DTSC's web site at www.dtsc.ca.gov. If you would like to discuss this matter further, please contact me at (916) 255-3695 or via email at Bud.Duke@dtsc.ca.gov.

Sincerely,

Harold (Bud) Duke, PG

Need enough parking for tenants — students, workers Aggie Square what will be ratio tenants → parking [I know some are expecting a carless world but we're not there ***

There will not only be population on site but people using expanded facilities (patient care hospital etc.) that are trasient occupancy — will need planning for traffic flow, parking, effect on nearby streets and neighborhoods; ingress and egress.

** Re assumption of less cars — all the nursing & med students in my neighborhood Have cars. They may walk or bicycle to Med School and Nursing school but drive for errands, entertainment, travel etc.

I welcome development & improvements @ UC but am concerned about impacts on our environment — traffic, lights, noise.

~~Traffic~~ Traffic flow needs to be on major thoroughfares and not through neighborhoods.

~~Traffic~~ Parking structure — setbacks for neighbors across street, landscaping & design elements that would keep lights w/in and outside of structure, and cars inside structure, from impacting neighbors w/ intrusive noise and light.

UCDAVIS

Comments on Notice of Preparation (NOP) regarding scope and content of SEIR for the 2020 LRDP Update/Aggie Square/Replacement Hospital Tower Project

Francesca Reitano (freitano@gmail.com) 2500 54th Street, Sacramento, CA 95817-1633
Member of Elmhurst Neighborhood Association

Note: Some of these comments were discussed informally with UCD Staff at the open house scoping session on February 26, 2020 and I turned in some handwritten comments.

Parking garages on V Street opposite 48th Street (was told some of this is in the plan).
No access (in or out of the garages) from V Street.
Setbacks to keep the homes across the street from being overshadowed.
Design features and landscaping to keep light from the garage itself as well as lights from cars in the garage from impacting adjacent neighbors.

Parking considerations (if people have nowhere to park, they will park in the neighborhood), traffic flow impacts on neighborhoods, ingress/egress from hospital and campus. Sufficient consideration for:

- Tenants in on-site housing, who will be living there. They may not drive to work, but will need to get to places off campus for their daily lives/needs. There is an assumption in urban planning that people will not need as many cars in the future. So far, that has not proven to square with current limits on parking spaces, and Uber and Lyft are killing public transit. Medical students and workers in my neighborhood may walk or bike to campus, but they own, park, and drive their cars as needed.
- Expanded facilities will mean more patients, visitors and workers that will need parking facilities.
- Aggie Square will bring many others on to the campus.
- Traffic flow needs to be diverted to major thoroughfares and not through neighborhoods.
- Sacramento is a sprawled urban area. Many using the campus and hospital will need cars for the foreseeable future.

Trees and landscape design
It will be important to landscape with the proper large species of trees and landscape plantings to sequester carbon, improve air quality, retain water in the soil and trap pollution, as well as for important aesthetic properties.

I welcome the positive effects of expanding UC facilities for our community – increased access to medical care, education and innovation, employment opportunities, as well as the proposed farmer's market. However, there will be environmental impacts during construction (which will take years) that need to be mitigated, as well as the effect of the increased use of the campus – people coming and going, traffic, dust, noise.

Sacramento Investment Without Displacement, Inc.

RE: Notice of Preparation, EIR, UC Davis Sacramento Campus 2020 Long Range Development Plan Update

Dear Mr. Dulcich,

Sacramento Investment WIthout Displacement Inc. is taking this opportunity to comment on the referenced Notice of Preparation, including some of our concerns about the Aggie Square and Replacement Hospital Tower projects.

Sacramento Investment Without Displacement is a nonprofit corporation organized to support the health and stability of Sacramento communities impacted by major development projects.

Summary: As our leaders have indicated in a number of meetings and forums held with UC Davis planners, Sacramento Investment WIthout Displacement is concerned with the lack of inclusion of residents from neighborhoods adjacent to UC Davis Sacramento Campus, and the organizations that serve these residents, in the planning of Aggie Square and the Campus expansion. This inclusion of residents and community organizations is also absent from UC Davis' formal efforts to identify and plan neighborhood programs and projects that will mitigate the expected and the potential negative impacts of the Campus expansion.

Perhaps due to the lack of inclusion of these stakeholders, UC Davis does not appear to have specific mitigation plans for the expected community displacement that is expected to occur -- resident and small business displacement that commonly follows large development projects which attract out of area investors, large businesses and thousands of new long-term employees and consultants. No plans or programs have been provided by UC Davis Sacramento Campus planners to mitigate the following expected impacts on the neighborhoods:

- escalation in housing costs in neighborhoods adjacent to the Campus and subsequent increased homelessness and overcrowding;
- decreased access to homeownership by existing neighborhood renters;
- increased neighborhood parking and traffic congestion;
- increased hazards for bike riders and pedestrians;
- stress on limited neighborhood-level youth, senior and family services;
- proliferation of low-wage, low-benefit jobs in and around the Campus;

- inequitable access for community members to secure jobs with career opportunities;
- inequitable community access to healthy food options developed for Campus stakeholders;
- movement of resources out of community level art in favor of non-local artists.
- increased demand for UC Davis primary health services to MediCal-eligible neighborhood residents;
- movement of resources out of community level art in favor of non-local artists; and
- proliferation of chain businesses at the expense of locally owned businesses;

Note: Page references below refer to page numbers in the UC Davis Notice of Preparation Environmental Impact Report dated 2/7/20.

Community Engagement: Aggie Square planners have an established Community Engagement Advisory Committee which is primarily or exclusively a forum for updating community organizations and neighborhood associations with UC Davis' Aggie Square plans and partnerships. There exists a great deal of frustration among residents, neighborhoods association representatives and community organizations that their concerns about the Aggie Square development go unanswered. These stakeholders have not been included at a deep level in the planning of this significant development project which will impact vulnerable neighborhoods and families. A stated objective of the LRDP Amendment is to "Create an expansive and inclusive community of people focused on advancing health-contributing to the well-being of people in the communities we serve, propelling a more diverse and healthier economy and expanding the positive impact of UCDH through more expansive partnerships" (page A-3). Aggie Square planners' failure to respond to community concerns throughout the planning process by proposing programs to mitigate significant expected negative impacts on the adjacent neighborhoods indicates to these stakeholders that their health and quality of life concerns are not important to the responsible public entity, UC Davis.

Housing and Populations: "The SEIR will evaluate the potential for implementation of.the 2020 LRDP Update to induce (directly or indirectly) substantial population growth or displace substantial housing or residents (page B-5)." The historical expansion of UC Davis Sacramento Campus at the edge of the vulnerable and diverse community of Oak Park created an out of balance housing market over the last several decades. The pressure of that expansion and more recent regional housing pressures has led to low rental vacancy rates, overcrowding and displacement in that neighborhood and neighborhoods to the south of Oak Park. Home sale prices and rental markets are out-of-balance with the incomes of long-time neighborhood residents. In addition, families who, over the last decade, settled in rental homes in Oak Park, Tahoe Park and other neighborhoods adjacent to the Campus, find that homeownership in their neighborhood is financially beyond their reach. Many are increasingly unable to renew rental leases due to large and frequent rent increases. To understand the current housing issues, UC Davis planners should hold listening sessions in adjacent neighborhoods with residents experiencing homelessness, renters at risk of displacement and existing renter families in the neighborhoods who are ready but unable to afford to purchase homes.

The further expansion of the Campus and increasing employee and academic populations will further exacerbate the housing accessibility and affordability crisis for residents in adjacent neighborhoods. Low and moderate wage employees and UC students will compete with existing residents in an already tight housing market. This competition will exacerbate existsing inequities and and given the history of racial discrimination in housing, households of color will be disproportionately displaced from adjacent neighborhoods.

As it's sole housing proposal in Aggie Square Phase I, UC Davis proposes 200 units of multifamily housing for students, faculty and University staff. One stated objective of Aggie Square Phase I is to "provide housing that meets affordability goals for students in the professional schools (page A-9)." Given the expected influx of new employees, this housing objective is insufficient. WIthout a commitment to setting aside a large portion of these units for *low income* individuals and setting affordable rents, and also planning housing for the other Campus employers' *low wage* workers, these more vulnerable students and employees could find themselves experiencing homelessness, much like many of their peers on the UC Davis campus in Davis.

With the Campus expansion plan prioritizing acreage for academic and commercial uses over residential uses, creating a severe jobs-housing imbalance, it is imperative that UC Davis take the lead in creating an affordable housing plan for low income households, both those working and studying on the Campus and those residents at risk of displacement in adjacent neighborhoods. This can be achieved through a number of methods such as the University and Aggie Square developers paying into a City-controlled affordable housing trust fund, in addition to purchasing properties in the community and donating the properties to the City of Sacramento or affordable housing developers for use as affordable housing for low income households.

The Plan document should include a projection (for Phase I and the Hospital expansion) of the increase in the population of both students and University and non-university employees BY PROJECTED HOUSEHOLD INCOME and provide a plan for providing sufficient new housing options affordable to the new students and employees that reflect their numbers in those projections.

Parking and Traffic Congestion: UC Davis Sacramento Campus users have already had a significant impact on traffic and parking congestion in the neighborhoods surrounding the Campus. The Plan should ensure that the Campus expansion alleviates and solves existing neighborhood traffic and parking congestion issues, as well as create a plan to minimize further auto usage and plan for any increased Campus-user parking on-site rather than on public streets. The intersection of Broadway and Stockton Blvd is already one of the City's most dangerous intersections. As more students, employees, businesses and patients access the new uses at the proposed Aggie Square and the expanded Hospital, the streets surrounding the Campus will pose higher risks for pedestrians, bicyclists and automobile drivers alike. Before developing the plan to mitigate existing and expected issues related to automobiles, planners should hold listening sessions with existing residents and small business representatives in

adjacent neighborhoods to understand the current traffic and parking challenges and the stress and risk that these challenges place on families and their quality of life.

Public Spaces and Recreation: One stated objective of the Aggie Square Phase I project is to "establish public spaces for a wide-range of public activities that serve UC Davis Sacramento Campus employees and residents, as well as the broader community to provide venues for people from diverse communities of interest to meet, interact, share ideas, and spark new partnerships (page A-9)." We would expect an analysis of how the most vulnerable and least resourced members of surrounding neighborhoods will be able to access proposed new public spaces and recreational facilities on campus, given the historic physical and cultural separation of the UC Davis Med Center and neighborhood residents.

Given the expected influx of over 5,000 new students and workers on the Campus, those who chose to reside in surrounding neighborhoods will put pressure on existing schools, community centers, and youth, senior and family services and programs. We would expect an analysis of the expected need for new and expanded community based services as well as a discussion of services and public spaces that are not currently available but needed in the community. For example, young people have noted the lack of neighborhood-based youth-run spaces where students can study, have access to computers and printers for homework and develop their own programs. We encourage Aggie Square planners to conduct listening sessions with young people, seniors and parents who reside in neighborhoods adjacent to the Campus to assist in their analysis and planning for public spaces, public services and recreational facilities and programs.

Workforce and Employment: One of the stated objectives of the LRDP Amendment is to "support growth in workforce development and lifelong learning, including the Continuing and Professional Education program (page A-3)." Workforce development and lifelong learning on the Campus presupposes a stable workforce with employees that continue to grow with their jobs and are eligible for further on-Campus employment opportunities. As the Campus expands to include private industry employers, the nature of work and employment on the Campus will change. UC Davis, as a State employer, has public sector, unionized employees with labor projections, living wage or better wages and family supporting benefits. Inviting private industry employers to lease a substantial amount of commercial space will result in a proliferation of on-campus low wage employees with fewer protections, job stability and critical benefits. We would expect an analysis of this expected cultural change and a plan for supporting worker protections, workforce development, lifelong learning and career pathways on Campus for both the public and private sector employees. The stability and health of the private workforce will greatly impact the health and stability of the surrounding community where many of these employees will be residing.

Neighborhood residents, adults and youth, deserve a pathway to public and private sector jobs on campus--entry level jobs that pay a living wage and that lead to career and income growth. The Plan should provide an analysis of how this can occur, how it will be carried out and what educational supports are needed at the K - 12, community college and State University level to support a school to career pipeline for residents of adjacent neighborhoods.

Food Access and Security: One of the stated objectives of the Aggie Square Phase I project is to "develop physical structures to support the University's involvement in enhancing regional workforce development, addressing food access and security... (page A-9)." The LRDP should provide an analysis of historical and expected barriers to access to Campus, physical and cultural, by vulnerable populations residing in neighborhoods including Oak Park and those further south that share lack of access to full service grocery stores and healthy and affordable food options. The Plan should include UC Davis support of partnerships that will address food insecurity and lack of access to healthy, affordable food in these neighborhoods.

Health Access Equity: One objective of the LRDP Amendment is to "provide additional state-of-the-art inpatient and outpatient capacity to keep pace with community health care needs and to support the UCDH System's teaching, research and community engagement missions (page A-2)." Primary care for homeless and low-income residents is a critical and growing community need. Sacramento County lacks a County-run general hospital and the local community looks to UC Davis Med Center to fill this role as the only public hospital. As of December 2019, 424,000 Sacramento County residents were enrolled in MediCal. UC Davis contracts for its doctors to provide primary care services to just 5,000 MediCal enrollees--at the Sacramento County Primary Care Center. The Plan should provide an equity analysis of income levels of patients currently served by the Hospital and primary care doctors and a proposal for UC Davis to substantially increase the number of MediCal enrollees it serves from the Oak Park and South Sacramento neighborhoods.

Local Economy: One of the most impactful ways that UC Davis can "propel a more diverse and healthier economy and expand the positive impact of UCDH through more expansive partnerships (page A-3) is to support community institutions including local nonprofits, small neighborhood-based and resident owned businesses and local artists. By providing grant support, vendor contracts and performance agreements with these local institutions and stakeholders, the UC Davis Sacramento Campus administrators and staff and those of the private industry employers to be located on Campus will be helping the local economy thrive. UC Davis Sacramento Campus administrators and vendor contracting staff and the private corporations located on Campus will make day-to-day purchasing and contracting choices. Without incentives and/or requirement to hire and contract locally, our local small businesses and artists may lose out to businesses that contracting staff have become accustomed to purchasing from. The LRDP should provide an analysis of contracting and purchasing opportunities and options for incentives and requirements to "buy local."

Conclusion: Recent decades of Campus expansion and increased population of students and employees on Campus have impacted the health and stability of residents of surrounding neighborhoods, both negatively and positively. Given the current regional and local housing crisis, adding an additional over 5,000 employees and students on Campus through the Aggie Square Phase I development threatens to displace vulnerable existing residents in surrounding neighborhoods. As UC Davis approaches the preparation of the LRDP Amendment, its planners have the opportunity to engage at a deeper and more thoughtful level with neighborhood residents and small businesses and the community organizations that work with them to

identify risks to neighborhood and family health and stability and plan thoughtful mitigations. As a public institution, UC Davis has a responsibility to ensure that its resources are used in a manner that promotes equity, fair access and community security.

Thank you for the opportunity to comment.

Sincerely,

Gabby Trejo

University of California, Regents of
1111 Franklin Street, 12th Floor
Oakland, CA 94607

Dear Mr. Dulcich:

UC Davis Sacramento Campus 2020 Long Range Development Plan Update (PROJECT)
Notice of Preparation SCH# 2020020161

The California Department of Fish and Wildlife (CDFW) received a Notice of Preparation of an Environmental Impact Report (EIR) from the Regents of the University of California for the Project pursuant the California Environmental Quality Act (CEQA) and CEQA Guidelines.[1]

Thank you for the opportunity to provide comments and recommendations regarding those activities involved in the Project that may affect California fish and wildlife. Likewise, we appreciate the opportunity to provide comments regarding those aspects of the Project that CDFW, by law, may be required to carry out or approve through the exercise of its own regulatory authority under the Fish and Game Code.

CDFW ROLE

CDFW is California's **Trustee Agency** for fish and wildlife resources and holds those resources in trust by statute for all the people of the State. (Fish & G. Code, §§ 711.7, subd. (a) & 1802; Pub. Resources Code, § 21070; CEQA Guidelines § 15386, subd. (a)) CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species. (*Id.*, § 1802.) Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect fish and wildlife resources.

PROJECT DESCRIPTION SUMMARY

The Project site is located at the UC Davis Sacramento Campus, off U.S. 50 near the Highway 99/Business 80 interchange within the City of Sacramento in Sacramento County. The Sacramento Campus consists of approximately 150 acres and houses UC Davis

[1] CEQA is codified in the California Public Resources Code in section 21000 et seq. The "CEQA Guidelines" are found in Title 14 of the California Code of Regulations, commencing with section 15000.

Health (UCDH), which includes the UC Davis Medical Center, UC Davis School of Medicine, extensive research facilities, outpatient clinics, support facilities, and the Betty Irene Moore School of Nursing, as well as the UC Davis Graduate School of Management's Sacramento Master in Business Administration program. UCDH includes a 625-bed teaching hospital, a National Cancer Institute-designated Comprehensive Cancer Center, and a nationally ranked children's hospital. In 2018-2019, UC Davis Medical Center had over 34,000 inpatient admissions, over 80,000 emergency room visits, and over 900,000 clinic/office visits.

The Project consists of the 2020 update to the Long Ranch Development Plan and will propose general types of campus development and land uses to support projected campus population growth and to enable expanded and new program initiatives. The proposed Aggie Square Phase 1 project consists of approximately 1,150,000 square feet of building space for education, research, residential and commercial uses and parking structure space. The Replacement Hospital Tower includes demolition of the existing tower and construction of approximately 600,000-800,000 gross square feet (gsf) east of the Main Hospital complex's Surgery and Emergency Services Pavilion, plus approximately 100,000 gsf of renovation.

The Project description in the draft EIR should include the whole action as defined in the CEQA Guidelines § 15378 and should include appropriate detailed exhibits disclosing the Project area including temporary impacted areas such as equipment stage area, spoils areas, adjacent infrastructure development, staging areas and access and haul roads if applicable.

As required by § 15126.6 of the CEQA Guidelines, the draft EIR should include appropriate range of reasonable and feasible alternatives that would attain most of the basic Project objectives and avoid or minimize significant impacts to biological resources.

ENVIRONMENTAL SETTING

CDFW recommends three progressive steps in Project impact evaluations: habitat assessment, detection surveys, and impact assessment in evaluating whether projects will have impacts to special-status species. The information gained from these steps will inform any subsequent avoidance, minimization and mitigation measures. The steps for Project impact evaluations are: 1) habitat assessment, 2) surveys, and 3) impact assessment. Habitat assessments are conducted to evaluate the likelihood that a site supports wildlife species and their habitats. Detection surveys provide information needed to determine the potential effects of proposed projects and activities on those species and habitats. Impact assessments evaluate the extent to which wildlife species and their habitat may be impacted directly or indirectly, on and within a reasonable distance of proposed CEQA Project activities. CDFW recommends that the draft EIR include a complete environmental assessment of the existing biological conditions within the Project area including but not limited to the type, quantity and locations of the habitats, flora and fauna. Maps and information regarding the habitat assessment and survey efforts should be included within the draft EIR. Any surveys of the biological conditions and related

environmental analysis should be completed by qualified personnel with sufficient experience in the wildlife and habitats associated with the Project and associated reports should be included as appendices to the draft EIR.

To identify a correct environmental baseline, the draft EIR should include a complete and current analysis of endangered, threatened, candidate, and locally unique species with potential to be impacted by the Project. CEQA guidelines § 15125, subdivision (c) requires lead agencies to provide special emphasis to sensitive habitats and any biological resources that are rare or unique to the area. CDFW recommends that the environmental documentation identify natural habitats and provide a discussion of how the proposed Project will affect their function and value.

CDFW recommends that the California Natural Diversity Database (CNDDB), as well as previous studies performed in the area, be consulted to assess the potential presence of sensitive species and habitats. Although the CNDDB is one tool that may identify potential sensitive resources in the area, the dataset should not be regarded as complete for the elements or areas with the potential to be impacted. Other sources for identification of species and habitats near or adjacent to the Project area should include, but may not be limited to, State and federal resource agency lists, California Wildlife Habitat Relationship (CWHR) System, California Native Plant Society (CNPS) Inventory, agency contacts, environmental documents for other projects in the vicinity, academics, and professional or scientific organizations. In addition, CNDDB is not a comprehensive database. It is a positive detection database. Records in the database exist only where species were detected and reported. This means there is a bias in the database towards locations that have had more development pressures, and thus more survey work. Places that are empty or have limited information in the database often signify that little survey work has been done there. A nine United States Geologic Survey (USGS) 7.5-minute quadrangle search is recommended to determine what may occur in the region (see Data Use Guidelines on the CDFW webpage https://www.wildlife.ca.gov/Data/CNDDB/Maps-and-Data).

IMPACT ASSESSMENT AND MITIGATION MEASURES

Based on habitat assessments and survey results, the draft EIR should clearly identify and describe all short-term, long-term, permanent, or temporary impacts to biological resources under CDFW's jurisdiction, including all direct and foreseeable indirect impacts caused by the proposed Project.

The draft EIR should define the threshold of significance for each impact and describe the criteria used to determine whether the impacts are significant (CEQA Guidelines, § 15064, subd. (f).) The draft EIR must demonstrate that the significant environmental impacts of the Project were adequately investigated and discussed, and it must permit the significant effects of the Project to be considered in the full environmental context. CDFW also recommends that the environmental documentation provide a scientifically supported discussion regarding adequate avoidance, minimization, and/or mitigation measures to address the Project's significant impacts upon fish and wildlife and their habitat. For individual projects, mitigation must be roughly proportional to the level of impacts, including

cumulative impacts, in accordance with the provisions of CEQA (Guidelines Section 15126.4(a)(4)(B), 15064, 15065, and 16355). In order for mitigation measures to be effective, they must be specific, enforceable, and feasible actions that will improve environmental conditions.

The EIR should incorporate mitigation performance standards that would ensure that significant impacts are reduced as expected. Mitigation measures proposed in the EIR should be made a condition of approval of the Project. Please note that obtaining a permit or other authorization from CDFW by itself with no other mitigation proposal may constitute mitigation deferral.

Migratory Birds and Birds of Prey

Migratory nongame native bird species are protected by international treaty under the Federal Migratory Bird Treaty Act (MBTA) (16 U.S.C., §§ 703-712). CDFW implemented the MBTA by adopting the Fish and Game Code section 3513. Fish and Game Code sections 3503, 3503.5 and 3800 provide additional protection to nongame birds, birds of prey, their nests and eggs. Potential habitat for nesting birds and birds of prey is present within the Project area. The proposed Project should disclose all potential activities that may incur a direct or indirect take to nongame nesting birds within the Project footprint and its close vicinity. Appropriate avoidance, minimization, and/or mitigation measures to avoid take must be included in the EIR. Measures to avoid the impacts should include species specific work windows, biological monitoring, installation of noise attenuation barriers, etc.

Landscaping
CDFW has noted that landscaping improvements may be implemented in the Project. CDFW recommends consideration of the Homegrown Habitat Plant List (Sacramento Valley Chapter, California Native Plant Society) (Attachment 1) when developing the final planting palette. The Homegrown Habitat Plant List (HHPL) is the result of a coordinated effort of regional stakeholders with the intent of improving landscape plantings for the benefit of property owners and ecosystem. Including plants from the HHPL is intended to produce the following outcomes for landscaping:

- Increased drought tolerance
- Decreased water use
- Decreased maintenance and replacement planting costs
- Increased functionality for local pollinators and wildlife
    - Increase in overall biodiversity and ecosystem health
- Increased carbon sequestration and climate change resilience
- Educational opportunities for staff and students

ENVIRONMENTAL DATA

CEQA requires that information developed in environmental impact reports and negative declarations be incorporated into a database which may be used to make subsequent or supplemental environmental determinations. (Pub. Resources Code, § 21003, subd. (e).) Accordingly, please report any special status species and natural communities detected

during Project surveys to the California Natural Diversity Database (CNDDB). The CNNDB field survey form can be found at the following link: http://www.dfg.ca.gov/biogeodata/cnddb/pdfs/CNDDB_FieldSurveyForm.pdf. The completed form can be mailed electronically to CNDDB at the following email address: CNDDB@wildlife.ca.gov. The types of information reported to CNDDB can be found at the following link: http://www.dfg.ca.gov/biogeodata/cnddb/plants_and_animals.asp.

FILING FEES

The Project, as proposed, would have an impact on fish and/or wildlife, and assessment of filing fees is necessary. Fees are payable upon filing of the Notice of Determination by the Lead Agency and serve to help defray the cost of environmental review by CDFW. Payment of the fee is required in order for the underlying Project approval to be operative, vested, and final. (Cal. Code Regs, tit. 14, § 753.5; Fish & G. Code, § 711.4; Pub. Resources Code, § 21089.)

CONCLUSION

CDFW appreciates the opportunity to comment on Notice of Preparation and assist the Lead Agency in identifying and mitigating Project impacts on biological resources.

Questions regarding this letter or further coordination should be directed to Dylan Wood, Environmental Scientist at 916-358-2384 or dylan.a.wood@wildlife.ca.gov.

Homegrown Habitat Plant List 2019

	A	B	C	D	E	F	G	H
1	Bloom	Common Name	Scientific Name	Life Cycle	Height	WUCOL	Sun	Notes
2	Early	Western Redbud	Cercis occidentalis	P	10'-20'	L	S/PS	Drought-tolerant; also tolerates semi-riparian conditions
3		Red Willow	Salix laevigata	P	30'-50'	H	FS	Wetland-semi riparian; tolerates clay soils; fast grower, semi-deciduous
4		Arroyo Willow	Salix lasiolepis	P	7'-35'	H	FS	Likes marshes/wet areas; spreads by root runners; deciduous
5		Sandbar Willow	Salix exigua	P	10'-23'	H	FS	Constant moisture; spreads by basal shoots to any moisture
6		Valley Oak	Quercus lobata	P	60'-100'	L	FS	Fast growing (20' in 5 years); drought tolerant
7		Scrub Oak	Quercus berberidifolia	P	15'-20'	L	FS/PS	Smaller, drought tolerant, likes medium fast drainage
8		Buck Brush	Ceanothus cuneatus	P	5'-12'	VL	FS	Needs fast drainage; fast to moderate growth, evergreen
9		California Everlasting	Psuedognaphalium californicu	P	3'	VL/L	FS	Semi deciduous, may like some afternoon shade in summer
10		California Blackberry	Rubus ursinus	P	6'	M/H	FS/PS/S	Requires substantial moisture, wide spreading
11		Dutchmans Pipe	Aristolochia californica	P	20'	L/M	S/PS	Deciduous vine, grows in moist woods along streams
12		Baby Blue Eyes	Nemophila menziesii	A	.25'	L	FS/PS	Annual herb
13		Chinese Houses	Collinsia heterophylla	A	.5'	M	S/PS	Annual purple flowering herb, good in containers
14		Lacy Phacelia	Phacelia tanacetifolia	A	3'	VL/L	FS	Tolerates clay soils; good plant for biological pest control
15		Miners Lettuce	Claytonia perfoliata	A	1.3'	L/M	PS	Edible spreading annual herb; in the valley, does best in part shade
16								
17	Early-Mid	Blue Elderberry	Sambucus nigra var. cerulea	P	20'-30'	M	FS	Easy to grow, fast growing deciduous shrub/tree; host plant for endangered Valley Elderberry Longhorn Beetle
18		Interior Live Oak	Quercus wislizenii	P	15'-50'	VL	S/PS	Medium to large evergreen, moderate grower
19		Blue Oak	Quercus douglasii	P	16'-82'	VL	FS/PS	Slow grower deciduous, supports many species
20		Toyon	Heteromeles arbutifolia	P	12'	L	FS/PS	Evergreen shrub easy to grow, white flowers early summer, red berries in fall
21		Shining Willow	Salix lasiandra	P	3'-30'	M/H	FS/PS	Winter deciduous riparian plant, good for restoration projects
22		Mountain Mahogany	Cercocarpus betuloides	P	8'-20'	VL/L	FS/PS	In the valley this plant will do better with PM shade
23		Hollyleaf Redberry	Rhamnus ilicifolia	P	9'	L	PS	PM shade in the valley, siting is critical for success
24		California Broom/Deerwe	Acmispon glaber	P	3'	VL	FS	Not too showy subshrub with high habitat value
25		Skunkbush, Fragrant Sum	Rhus aromatica	P	8'	L	FS/PS	Winter deciduous shrub, may like PM shade in valley
26		Chaparral Honeysuckle	Lonicera interrupta (hispidula	P		VL/L	FS/PS	Hardy, woody chaparral shrub/vine, summer flowering, edible/bitter berries
27		Silver Bush Lupine	Lupinus albifrons	P	3'	L	FS/PS	Requires good drainage, PM shade in valley
28		Foothill Penstemon	Penstemon heterophyllus	P	5'	L	FS/PS	Perennial evergreen herb. May need pm shade in valley
29		Sonoma Sage	Salvia sonomensis	P	1.3'	VL	PS	Moderately drought tolerant if given part shade
30		Purple Needlegrass	Stipa pulchra	P	3'	VL/L	FS	CA state grass, perennial with deep roots
31		California Poppy	Eschscholzia californica	A	.5'	VL/L	FS	CA State flower, tolerates clay soil, readily reseeds
32		Elegant Clarkia	Clarkia unguiculata	A	.5'	L	FS/PS	Showy pink flowers, reseeds readily
33		Globe Gillia	Gillia capitata	A	1'	L/M	FS	Showy pink to lavender flowers
34		Miniature Lupine	Lupinus bicolor	A	1.3'	L	FS	Showy purple and white flowers, plant with CA poppies
35		Sky Lupine	Lupinus nanus	A	2'	L	FS	Chaparral annual herb

Homegrown Habitat Plant List 2019

	A	B	C	D	E	F	G	H
36	Bloom	Common Name	Scientific Name	Life Cycle	Height	WUCOL	Sun	Notes
37	**Mid**	California Buckwheat	Eriogonum fasciculatum	P	2.5'	VL/L	FS	Tough, easy to grow, prefer good drainage
38		Hoary Coffeberry	Frangula californica var tome	P	20'	L	FS/PS	May prefer PM shade in valley
39		California Wildrose	Rosa californica	P	8'	M	FS/PS	Tolerates clay soils; drought-tolerant; spreads through underground runners
40		California Wild Grape	Vitis californica	P	10'-40'	L/M	FS/PS	Common along rivers and streams, winter deciduous
41		Common Yarrow	Achillea millefolium	P	3'	L-H	FS/PS	Looks best with regular water; semi deciduous in drier conditions; can be aggressive
42		Coyote Mint	Monardella villosa	P	2'	L	PS/S	Requires good drainage, needs PM shade in the valley
43		Showy Milkweed	Asclepias speciosa	P	5'	L/M	FS	Tolerates clay soils; spreads through underground rhizomes
44		Imbricate Phacelia	Phacelia imbricata	P	1'	L	FS/PS	Perennial herb; tolerates clay soil; can re-seed
45		Woolly Sunflower	Eriophyllum lanatum	P	2'	L	FS/PS	Summer semi-deciduous; can be extremely drought-tolerant
46		Nude Buckwheat	Eriogonum nudum	P	6'	L	FS	Summer semi-deciduous; leafless stems
47		Blue Wild Rye	Elymus glaucus	P	5'	L	FS/PS	Popular accent grass for gardens; summer semi-deciduous
48		Deergrass	Muhlenbergia rigens	P	5'	L	FS	Attractive bunch grass; easy to grow; grows in most soils
49		Fleabane Daisy	Erigeron foliosus	P	3.3'	L	PS	
50		Lippia	Phyla nodiflora	P	6''	L	FS/PS	Flowering ground cover; spreads rapidly
51		Spider Lupine	Lupinus benthamii	A	2.3'	VL	FS	
52		Seep Monkeyflower	Erythranthe guttata	A	5'	M/H	FS/PS	Aquatic annual plant; good in ponds or rain gardens
53								
54	**Mid-Late**	Narrowleaf Milkweed	Asclepias fasicularis	P	1.5'	M	FS	Not showy; tolerates clay; host to Monarchs
55		Virgin's Bower	Clematis ligusticifolia	P	30'	L/M	PS/SH	vine; showy white flowers; summer deciduous; part shade to shade
56		Hooker's Evening Primros	Oenothera elata	P	5'	M-H	FS/PS	Wetland-riparian but still drought tolerant; reseeds aggressively
57		California Fuchsia	Epilobium canum	P	3'	L	FS	Hummingbird favorite; spreads; cut back in winter
58		Gumplant	Grindelia camporum	P	4'	L	FS	Tolerates most soils; can be cut back in winter
59		Snowberry	Symphoricarpos albus	P	6'	L	PS/SH	Moist shady areas; winter deciduous; spreads by rhizomes
60		Slender Woolly Buckwhea	Eriogonum gracile	A	5'	EL/VL	FS/PS	Small annual; tolerates most soils; winter semi-deciduous
61		Common Madia	Madia elegans	A	7'	L	FS/PS	Annual herb; showy yellow flowers; tolerates many soils
62		Common Sunflower	Helianthus annuus	A	5'	M	FS	Tolerates most soils; can get very large
63								
64	**Late**	California Aster	Symphyotrichum chilense	P	5'	VL/L	FS/PS	Tolerates clay soil; winter deciduous; cut back in winter; aggressive spreader
65		California Goldenrod	Solidago californica	P	3'	VL/M	FS/PS/S	Easy to grow; for late color plant with Epilobium canum; spreader
66		Sulphur Buckwheat	Eriogonum umbellulatum	P	7'	VL/M	FS	Showy yellow flowers; variable plant; evergreen
67		Bee Plant	Scrophularia californica	P	4'	L	PS	Strong bee attractant; tolerates most soils; needs good drainage
68		Coyote Brush	Baccharis pilularis	P	10'	VL/L	FS/PS	Tour easy to grow shrub; variable forms; blooms into winter
69		Rubber Rubberbrush	Ericameria nauseosa	P	9'	L	FS	Needs good drainage; summer/fall bloom
70		Vinegarweed	Trichostema lanceolatum	A	1'	L	FS	Does not do well in seed mixes; sow individually; tolerates dry clay soils

Subject: New Parking Structure on V Street.

Hello,

I am an Elmhurst resident that lives at 51st and 2nd Ave. Could you please tell me the location of new proposed parking structure on V Street?

I was also wanting to enquire/request if UCD would be able to provide privacy planting for the cul-de-sac on 2nd Avenue (near 51st Street)? Since the parking lot has been put there, right by the c-de-sac we have had issues with the bright flood lights to illuminate the lot flashing into our homes and also employees damaging the fence so they can access 2nd Ave so they can park in front of our houses all day long as the street is not permitted there. Parking is very limited on our street and it's incredibly frustrating. I feel that privacy planting would greatly assist our street with these issues. I have noticed that the other streets similar to ours have already been planted with privacy screening plants on the UCD side. I'm not too sure why this was not provided for 2nd Ave?

Please let me know if this would be possible.

Thank you,
Jessica Marin

REVIEW OF NOTICE OF PREPARTION, ENVIRONMENTAL IMPACT REPORT, UC DAVIS SACRAMENTO CAMPUS 2020 LONG RANGE DEVELOPMENT PLAN UPDATE, SACRAMENTO, SACRAMENTO COUNTY

We have reviewed the *7 February 2020 Notice of Preparation (NOP) Environmental Impact Report for University of California Davis (UC Davis) Sacramento Campus 2020 Long Range Development Plan* (2020 LRDP) Update for the proposed UC Davis Sacramento Campus. The 2020 LRDP states the University of California will be the lead agency under the California Environmental Quality Act (CEQA). **As residents of the Tahoe Park community we are concerned with the drastic effects from the projected campus growth under UC Davis's *2020 LRDP* Update**. The *2020 LRDP* states the campus will consist of the hospital and ancillary facilities, ambulatory care facilities, education and research facilities, a steam power plant, other infrastructure to support these activities, and off-street parking. The *2020 LRDP* reports an anticipated campus growth of up to 19,720. The *2020 LRDP* states it is intended to "promote compact built form, creating places for people to learn and interact, and advancing sustainability goals". The *2020 LRDP* states its purpose is to "provide adequate planning capacity for projected campus population growth and physical infrastructure that may be needed to support future population levels".

We have the following comments and requests regarding the *2020 LRDP*:

- The *2020 LRDP* states that the *"update supplemental environmental impact report will use the years 2030 and 2040 to forecast the potential environmental impacts of implementing the project elements described in the 2020 LRDP Update Supplemental Environmental Impact Report (SEIR)"*. **Due to the potentially significant impacts on urban area communities and project dynamics, earlier LRDP review dates at five-year intervals (i.e. 2025, 2030) should be considered.**

- The *2020 LRDP* includes Exhibit 3 (*2010 Land Use Plan)*, Exhibit 4 (*2020 Land Use Plan)*, and an Attachment C. **These figures do not provide sufficient detailed information for public input and comment.** The *2020 LRDP* **includes neither traffic management and design plans nor information regarding the**

specific SEIR studies proposed to investigate the potential impacts to surrounding surface streets including Stockton, Broadway, 45th ,48th ,59th and 65th streets.

- The *2020 LRDP* states that *"The Aggie Square Phase 1 project would extend 45th Street southward to become a central spine connecting the UC Davis Hospital, the Education Zone, and Aggie Square. The 45th Street Extension would run through the Aggie Square plaza, which would use special paving materials up to the front doors of all Phase 1 buildings that face the plaza."* **Extending 45th street southward from the Elmhurst Neighborhood will result in a significant increase in commuter traffic, on roadways designed to accommodate lower-volume, neighborhood traffic only. Furthermore, Attachment C presents 48th Street as a main traffic route, again impacting the residents of the Elmhurst and surrounding neighborhoods. Please present additional traffic designs and management plans for public comment, including what initial analysis was conducted to determine the appropriateness of the 45th extension and utilization of 48th street as a main route.**

The *2020 LRDP* states its objectives are to:

- "Support access to jobs and services to a more diverse population, including providing housing and transportation opportunities and community-serving uses; however, specifics regarding how these objectives would be achieved were not provided in the 2020 LRDP. **Please provide the specific activities that will occur to meet these objectives.**

- "Provide convenient access to and within the campus" and "Improve pedestrian connections throughout the campus". **Surrounding communities will be affected by foot, bicycle and vehicular traffic, particularly during peak hours. Please provide the traffic plans for construction (48 months), issued to the City of Sacramento for encroachment permits for public view. Please also provide your traffic design plans for UC Davis campus including sidewalks and pedestrian crossings.**

- The *2020 LRDP* states it will *"Embrace a character of architectural diversity and vitality, linked together by a rich network of public spaces and collective commitment of environmental sustainability"* and *"Establish public spaces for a wide-range of public activities that serve UC Davis Sacramento Campus employees and residents, as well as the broader community to provide venues for people from diverse communities of interest to meet, interact, share ideas, and spark new partnerships"* **The *2020 LRDP* does not specify types of public spaces planned (i.e. gardens, walking paths, meeting rooms, etc.) and their locations. Please provide detailed information on the above statement.**

- The *2020 LRDP*'s EIR proposes an assessment of cultural resources affected by this project. **Please expand the scope of the cultural resources assessment to include an ethnographically driven evaluation of the potential negative intended and unintended effects on non-archaeological and non-historical culturally valuable community resources**.

- The *2020 LRDP* states it will use *"Progressive design-build is one application of the design-build delivery method where the process is phased or stepped. Progressive design-build uses a qualification-based (or best value) selection of the design-build contractor, followed by a process whereby the owner then "progresses" towards a design and the guaranteed maximum price with the owner."* **The original designs presented to the public could change dramatically for the (best value) selections in a design build application. Potential changes to the surrounding neighborhoods could be affected by (best value) choices and should be presented for public comment.**

- The 2020 LRDP states the *"SEIR will focus on the significant effects of the 2020 LRDP Update and will document the reasons for concluding that other effects will be less-than-significant. Where significant and potentially significant environmental impacts are identified, the SEIR will also discuss mitigation measures that may avoid or reduce these impacts, when feasible".* **Please provide proposed SEIR update public meeting dates, times and locations. UC Davis should be providing updated information on the effects of the project to residences of the area.**

- **The steam power plant and other support infrastructure is not described on provided figures. Please provide additional details.**

While overall we support the idea of this project, we have been disappointed at the lack of transparency regarding the development of the Phase 1 plan. As so little information and specifics have been made available, it is not possible to determine if we support the plan in its current iteration.

Please respond to our questions and comments by **March 31, 2020** in a letter. If you have any questions, please contact Kyle by e-mail at kylej46@email.arizona.edu

Regards,

Kyle Johnson

COMMENTS TO REQUEST FOR REVIEW FOR THE NOTICE OF PREPARATION FOR THE DRAFT ENVIRONMENTAL IMPACT REPORT, UC DAVIS SACRAMENTO CAMPUS 2020 LONG RANGE DEVELOPMENT PLAN UPDATE PROJECT, SCH#2020020161, SACRAMENTO COUNTY

Pursuant to the State Clearinghouse's 7 February 2020 request, the Central Valley Regional Water Quality Control Board (Central Valley Water Board) has reviewed the *Request for Review for the Notice of Preparation for the Draft Environmental Impact Report* for the UC Davis Sacramento Campus 2020 Long Range Development Plan Update Project, located in Sacramento County.

Our agency is delegated with the responsibility of protecting the quality of surface and groundwaters of the state; therefore our comments will address concerns surrounding those issues.

I. Regulatory Setting

Basin Plan

The Central Valley Water Board is required to formulate and adopt Basin Plans for all areas within the Central Valley region under Section 13240 of the Porter-Cologne Water Quality Control Act. Each Basin Plan must contain water quality objectives to ensure the reasonable protection of beneficial uses, as well as a program of implementation for achieving water quality objectives with the Basin Plans. Federal regulations require each state to adopt water quality standards to protect the public health or welfare, enhance the quality of water and serve the purposes of the Clean Water Act. In California, the beneficial uses, water quality objectives, and the Antidegradation Policy are the State's water quality standards. Water quality standards are also contained in the National Toxics Rule, 40 CFR Section 131.36, and the California Toxics Rule, 40 CFR Section 131.38.

The Basin Plan is subject to modification as necessary, considering applicable laws, policies, technologies, water quality conditions and priorities. The original Basin Plans were adopted in 1975, and have been updated and revised periodically as required, using Basin Plan amendments. Once the Central Valley Water Board has adopted a Basin Plan amendment in noticed public hearings, it must be approved by

the State Water Resources Control Board (State Water Board), Office of Administrative Law (OAL) and in some cases, the United States Environmental Protection Agency (USEPA). Basin Plan amendments only become effective after they have been approved by the OAL and in some cases, the USEPA. Every three (3) years, a review of the Basin Plan is completed that assesses the appropriateness of existing standards and evaluates and prioritizes Basin Planning issues. For more information on the *Water Quality Control Plan for the Sacramento and San Joaquin River Basins*, please visit our website:
http://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/

Antidegradation Considerations

All wastewater discharges must comply with the Antidegradation Policy (State Water Board Resolution 68-16) and the Antidegradation Implementation Policy contained in the Basin Plan. The Antidegradation Implementation Policy is available on page 74 at:
https://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/sacsjr_201805.pdf

In part it states:

Any discharge of waste to high quality waters must apply best practicable treatment or control not only to prevent a condition of pollution or nuisance from occurring, but also to maintain the highest water quality possible consistent with the maximum benefit to the people of the State.

This information must be presented as an analysis of the impacts and potential impacts of the discharge on water quality, as measured by background concentrations and applicable water quality objectives.

The antidegradation analysis is a mandatory element in the National Pollutant Discharge Elimination System and land discharge Waste Discharge Requirements (WDRs) permitting processes. The environmental review document should evaluate potential impacts to both surface and groundwater quality.

II. Permitting Requirements

Construction Storm Water General Permit

Dischargers whose project disturb one or more acres of soil or where projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, are required to obtain coverage under the General Permit for Storm Water Discharges Associated with Construction Activities (Construction General Permit), Construction General Permit Order No. 2009-009-DWQ. Construction activity subject to this permit includes clearing, grading, grubbing, disturbances to the ground, such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility. The Construction General Permit requires the development and implementation of a Storm Water Pollution Prevention Plan (SWPPP). For more information on the Construction General Permit, visit the State Water Resources Control Board website at:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/constpermits.shtml

Phase I and II Municipal Separate Storm Sewer System (MS4) Permits[1]
The Phase I and II MS4 permits require the Permittees reduce pollutants and runoff flows from new development and redevelopment using Best Management Practices (BMPs) to the maximum extent practicable (MEP). MS4 Permittees have their own development standards, also known as Low Impact Development (LID)/post-construction standards that include a hydromodification component. The MS4 permits also require specific design concepts for LID/post-construction BMPs in the early stages of a project during the entitlement and CEQA process and the development plan review process.

For more information on which Phase I MS4 Permit this project applies to, visit the Central Valley Water Board website at:
http://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/municipal_permits/

For more information on the Phase II MS4 permit and who it applies to, visit the State Water Resources Control Board at:
http://www.waterboards.ca.gov/water_issues/programs/stormwater/phase_ii_municipal.shtml

Industrial Storm Water General Permit
Storm water discharges associated with industrial sites must comply with the regulations contained in the Industrial Storm Water General Permit Order No. 2014-0057-DWQ. For more information on the Industrial Storm Water General Permit, visit the Central Valley Water Board website at:
http://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/industrial_general_permits/index.shtml

Dewatering Permit
If the proposed project includes construction or groundwater dewatering to be discharged to land, the proponent may apply for coverage under State Water Board General Water Quality Order (Low Threat General Order) 2003-0003 or the Central Valley Water Board's Waiver of Report of Waste Discharge and Waste Discharge Requirements (Low Threat Waiver) R5-2018-0085. Small temporary construction dewatering projects are projects that discharge groundwater to land from excavation activities or dewatering of underground utility vaults. Dischargers seeking coverage under the General Order or Waiver must file a Notice of Intent with the Central Valley Water Board prior to beginning discharge.

[1] Municipal Permits = The Phase I Municipal Separate Storm Water System (MS4) Permit covers medium sized Municipalities (serving between 100,000 and 250,000 people) and large sized municipalities (serving over 250,000 people). The Phase II MS4 provides coverage for small municipalities, including non-traditional Small MS4s, which include military bases, public campuses, prisons and hospitals.

For more information regarding the Low Threat General Order and the application process, visit the Central Valley Water Board website at: http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2003/wqo/wqo2003-0003.pdf

For more information regarding the Low Threat Waiver and the application process, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/waivers/r5-2018-0085.pdf

Subject: **UC Davis Sacramento Campus 2020 Long Range Development Plan Update / NOP / 2020020161**

Dear Mr. Dulcich:

The Sacramento Municipal Utility District (SMUD) appreciates the opportunity to provide comments on the Notice of Preparation (NOP) for the UC Davis Sacramento Campus 2020 Long Range Development Plan Update (Project, SCH 2020020161). SMUD is the primary energy provider for Sacramento County and the proposed Project area. SMUD's vision is to empower our customers with solutions and options that increase energy efficiency, protect the environment, reduce global warming, and lower the cost to serve our region. As a Responsible Agency, SMUD aims to ensure that the proposed Project limits the potential for significant environmental effects on SMUD facilities, employees, and customers.

It is our desire that the Project NOP will acknowledge any Project impacts related to the following:

- Overhead and or underground transmission and distribution line easements. Please view the following links on smud.org for more information regarding transmission encroachment:
  - https://www.smud.org/en/Business-Solutions-and-Rebates/Design-and-Construction-Services
  - https://www.smud.org/en/Corporate/Do-Business-with-SMUD/Land-Use/Transmission-Right-of-Way
- Utility line routing and the need for public utility easement and easements for electrical infrastructure
- Electrical load needs/requirements
- Energy Efficiency
- Climate Change
- Cumulative impacts related to the need for increased electrical delivery
- The potential need to relocate and or remove any SMUD infrastructure that may be affected in or around the project area

More specifically, the following is a list of *existing facilities* that currently serve and/or border, either wholly or in part, the facilities located within the project area. Additionally, we have included a list of *estimated proposed facilities* that would be needed to serve the project. The need for these facilities will be contingent upon any electrical service changes or additions requested as part of the UCD Sacramento Campus Long-Range Development Plan. This includes either an (1) increase in size to any existing service and/or (2) additional services to any facilities, existing or new, outlined in the project area.

Existing facilities

- SMUD has an existing dedicated 115/21 kV 40 MVA transformer located at SMUD's "Mid City" substation connected by means of underground 21 kV circuits to UCD's Co-Gen (CG) and Central Utility Plant (CUP).
- SMUD has existing 21 kV underground (UG) circuits and pad-mounted (PM) equipment (including transformers and switches) along the east side of Stockton Blvd adjacent to the entire project area. Specific locations where 21kV infrastructure is located is as follows.
    - Along the north side of X Street from Stockton Blvd to 45th Street.
    - Along the north side of Y Street from Stockton Blvd to 45th Street.
    - Along the south side of 2nd Avenue from Stockton Blvd to UCD's Co-Gen CUP facility.
    - Along the south side of 2nd Avenue from Stockton Blvd to 45th Street.
    - 250 feet south of 2nd Avenue heading east from Stockton Blvd along the north side of the existing parking lot.
    - Along the east side of 49th Street from V Street to 2nd Avenue and the west side of 49th Street from 2nd Avenue to the Language Academy of Sacramento.
    - Heading south from V Street approximately 250 feet W/O 48th Street through what is now a parking lot.
    - Along the south side of V Street from 45th Street heading west for approximately 750 feet.

Estimated Proposed Facilities:

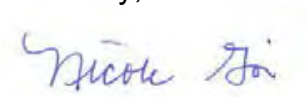
- SMUD will require additional 21 kV UG circuits and space for additional PM equipment (including transformers and switches) within, adjacent and/or through the "Aggie Square" area.
- SMUD will require additional 21 kV UG circuits and space for additional PM equipment (including transformers and switches) within, adjacent and/or through the "NE Quadrant" area.

- SMUD does not anticipate any utility changes to the SMUD infrastructure and/or incidental use and/or standby power requirements for UCD's CG and CUP based on UCD's Utility Master Plan Update dated January 14, 2020. However, should service changes or upgrades at the CG and CUP be required, SMUD may require changes and/or upgrades to the infrastructure, interconnection agreement and/or special facilities agreement as necessary or required.

SMUD would like to be involved with discussing the above areas of interest as well as discussing any other potential issues. We aim to be partners in the efficient and sustainable delivery of the proposed Project. Please ensure that the information included in this response is conveyed to the Project planners and the appropriate Project proponents.

Environmental leadership is a core value of SMUD and we look forward to collaborating with you on this Project. Again, we appreciate the opportunity to provide input on this NOP. If you have any questions regarding this letter, please contact SMUD's Environmental Management Specialist, Rob Ferrera, at rob.ferrera@smud.org or 916.732.6676.

Sincerely,



Nicole Goi

City Sacto State CA Zip 95817

Concerns re: traffic increase with associated parking need increase + pollution increase.

I am STRONGLY in favor of any measure to facilitate use of public transit. Shuttles from 39th & 48th St RT stations to Campus. Bike + ped paths

Concerns re: parking structure(s) at 48th + V. Have heard plans for setback from street; landscaping + ? shutters? to deflect headlights from V-St residents. Possibly ? graduated height → lowest to North/V St; highest part of structure to South/UCDMC.

Concerns re: UCD Campus Police are a lot less "visible" than they used to be. Per officers @ our ENA meetings, they are spending more + more time actually in the hospital itself with a result of much less visible patrol cars; which I feel have been a great crime deterrent in the past. Are there any plans to increase the # of officers as the Campus Population rises?

- Concerns re traffic on V St. Please keep 48th St + 45th streets closed to egress from the Campus.
- What mitigation measures will in place re increased noise, dust etc from the long term construction that will heavily impact Elmhurst

Back to pg 1; re traffic → have places for people to pick up + leave Jump Bikes + Scooters.

Director of Environmental Planning
University of California Davis
environreview@ucdavis.edu

Dear Mr. Dulcich,

RE: NOP of a DEIR for UCD's Sacramento Campus 2020 LRDP Update

This letter provides comments from the Environmental Council of Sacramento (ECOS) on the Notice of Preparation of a Draft (NOP) Environmental Impact Report for the University of California Davis Sacramento Campus 2020 Long Range Development Plan (LRDP) Update.

ECOS is a 501(c)(3) public benefit nonprofit corporation dedicated to protecting the natural resources of the greater Sacramento region while building healthier, more equitable, economically thriving communities. ECOS member organizations include: 350 Sacramento; Breathe California Sacramento Region; Friends of Stone Lakes National Wildlife Refuge; International Dark-Sky Association; Los Rios College Federation of Teachers; Physicians for Social Responsibility, Sacramento Chapter, Sacramento Citizens' Climate Lobby, Sacramento Electric Vehicle Association, Sacramento Environmental Democrats, Sacramento Housing Alliance, Sacramento Natural Foods Coop, Sacramento Audubon Society; California Native Plant Society, Sacramento Valley Chapter; Sacramento Vegetarian Society; Save Our Sandhill Cranes; Save the American River Association; Sierra Club, Sacramento Group; Friends of Swainson's Hawk; and Sacramento Area Creeks Council.

Our primary concern is that the planned expansion of UCD's Sacramento Campus, including Aggie Square, does not cause displacement of low-income residents in the surrounding neighborhoods. The NOP states that a projected increase of 5,572 in Campus population (enrollment and employment) is expected, while only 200 housing units are planned. An excess of 5000 enrolled or employed on campus will inevitably either have an adverse impact on housing in proximity to campus, or an adverse impact on local and regional transportation if that population is not living in proximity to Campus.

The potential risks of displacement, housing impact, and vehicle miles travelled (VMT) impacts must be analyzed and mitigated appropriately. These concerns and potential mitigations are explained in greater detail by separately submitted comments on this NOP

by our member organization, Sacramento Housing Alliance (SHA). ECOS incorporates SHA's comments here by reference.

There are currently multiple overlapping planning efforts on the Stockton Boulevard corridor, including both land use and transportation development. UC Davis's LRDP EIR should demonstrate coordination with these other planning efforts. On transportation VMT impacts specifically, mitigations to consider include:
1) no-cost transit passes for your lowest paid staff who will utilize the development so as to encourage use of light rail, as well as electric shuttles for commuting staff to use -- to minimize additional vehicle miles traveled and the concomitant greenhouse gases.
2) funding to the Sacramento Regional Transit Authority (RT) to operate more frequent transit around the times shifts usually change.
3) funding to allow RT to build Bus-Rapid-Transit (BRT) along Stockton Boulevard.

As to the physical construction of the campus itself, we are concerned that the project be built not only in compliance with existing codes, but also with even more Earth-friendly materials in an Earth-friendly manner when there is not an appreciable cost increase for so doing. Light pollution should be considered and mitigated by use of downward focused, wildlife (and human) friendly lighting. We believe all landscaping should be done with California Native Plants. It is best for the Earth and building inhabitants if there is much foliage involved, but there need not be grass. Shade trees are likewise extremely important, with multiple co-benefits to individual and community health.

Since the development will inevitably affect residents of the surrounding neighborhoods, ECOS would like you to consider entering into a Community Benefits Agreement that could, among all discussed above, also increase the percentage of Medi-Cal patients you serve and perhaps provide funds for improvements to the surrounding neighborhoods. Other community benefits should include (a) inclusive economic development: supporting local businesses and hiring local workers, and (b) workforce development and education: vocational training and mentoring local workers, helping them with transportation, childcare, regular work schedules, and career-ladder programs for entry-level workers.

UC Davis has an opportunity to *lift up* rather than *disrupt* the Sacramento Campus's surrounding community. Investment alone is not enough; these major investments must be coupled with anti-displacement strategies to ensure that existing residents will equitably reap the benefits of these improvement. We hope you seize this opportunity to demonstrate what a true relationship between the University and the community can bring.

Yours very truly,

Ralph Propper, ECOS President

UC Davis Sacramento Campus

2020 Long Range Development Plan (LRDP) Update/Aggie Square/Replacement Hospital Tower Project

1. shadow cast on homes on V St. by new highrise Bldg/hospital and parking structures
2. increase in traffic and congestion in neighborhood
3. increased air pollution with more cars
4. do not want U.C. shuttle on 48th St. from Light rail to Med Center campus
5. route cars of employees of U.C. to use Stockton Blvd, Broadway and X St., not drive through neighborhood
6. mitigate headlights of cars parking in new parking structures on V St e night so headlights don't shine on homes on V St.
7. block off exit from ACC parking garage onto 49th St.
8. make sure 45th St & 48th remain closed to V St.

Subject: Requesting additional information on the UCD Sac Campus 2020 LRDP Update

Dear Matt,

The Environmental Council of Sacramento (ECOS) was sorry to have missed your open house Scoping Session on the 2020 LDRP and SEIR that was held on February 26. We were not notified of this program, nor of the February 7 "Notice of Preparation of a SEIR for the UC Davis Sacramento Campus 2020 Long Range Development Plan Update." As you know, ECOS is working with the California Endowment's Oak Park / South Sacramento "Heathy Communities Program." We would like to be made aware of any announcements or significant steps taken in the Aggie Square and Replacement Hospital Tower projects, as these may affect the UC Davis Sacramento Campus' neighboring communities.

(a) Can you please put ECOS on your "mailing list" for any future project notifications, updates, public meetings, requests for public comments, etc?

Environmental Council of Sacramento (ECOS)
P.O. Box 1526
Sacramento, CA 95812

Robert Meagher, MD
ECOS Land Use Planning Committee co-chair
1157 Markham Way
Sacramento, CA 95818

(b) If there was any additional information given out about these two projects at the February 26 open house, could we get copies of that material?

Thank you again for meeting with the ECOS Land Use Committee this past January .

Robert

RE: Notice of Preparation for the UC Davis Sacramento Campus 2020 Long Range Development Plan (LRDP) Update

Dear Director Dulcich, Vice Chancellor Segar, and Board of Regents,

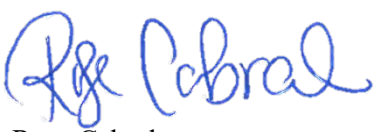
In response to the Notice of Preparation for the UC Davis Sacramento Campus 2020 Long Range Development Plan (LRDP) Update, the Tahoe Park Neighborhood Association (TPNA) is a concerned party and requests to be included in the circulation of 2020 LRDP Update Supplemental EIR documents and notices. We are particularly interested in the project's effects on transportation in the Tahoe Park neighborhood.

Senate Bill 743 (Steinberg, 2013) requires consideration of vehicle miles traveled (VMT) in evaluating a proposed project's transportation impacts under the California Environmental Quality Act (CEQA). Phase 1 of Aggie Square may have significant impacts on two critical areas within the neighborhood association's boundaries. These impacts require analysis and mitigation of increased VMT. The two areas that may be most impacted by the project are Stockton Boulevard between 14th Avenue and Broadway, and Broadway between Stockton Boulevard and 65th Street. This portion of Broadway was designed to operate as a neighborhood street. It has two lanes, residential driveways, Regional Transit bus service, an elementary school with young children walking and bicycling, and two senior citizen housing developments. Section 15064.3 of the CEQA Guidelines directs public agencies to consider the effects of a project on transit and non-motorized travel when evaluating the significance of transportation impacts. <u>The University should therefore consider the effects of Phase 1 of Aggie Square on pedestrians, bicyclists, and transit users on Broadway.</u>

The Technical Advisory on Evaluating Transportation Impacts in CEQA (December 2018) identifies potential measures to reduce VMT. The University should consider the following mitigation measures: orienting the project toward transit, bicycle and pedestrian facilities; improving or increasing access to transit; improving pedestrian and bicycle networks or transit service; and providing traffic calming.

In particular, TPNA recommends an impact analysis to determine the need for traffic calming measures on Broadway between Stockton and 65th Street for pedestrian and bicycle safety, and improved access to public transit on Broadway.

Sincerely,



Rose Cabral
President, Tahoe Park Neighborhood Association

RE: UC Davis Sacramento Campus 2020 Long Range Development Plan Update, Notice of Preparation

Dear Mr. Dulcich,

Thank you for providing the Sacramento Metropolitan Air Quality Management District (Sac Metro Air District) with an opportunity to comment on the Notice of Preparation (NOP) of environmental review under the California Environmental Quality Act (CEQA), for the UC Davis Sacramento Campus 2020 Long Range Development Plan Update (LRDP Update). The proposed 2020 LRDP Update will largely focus on making minor adjustments to the 2010 LRDP land use plan and policies. Environmental review for the 2020 LRDP Update will be a Supplemental Environmental Impact Report (EIR) to evaluate the environmental effects of incremental growth under the 2020 LRDP Update through the year 2040. The 2020 LRDP Update Supplemental EIR will be a program EIR that can be used at a program-level in the environmental review of subsequent campus development projects, and a project-level EIR for the Aggie Square Phase 1 and Replacement Hospital Tower (RHT) projects.

California Environmental Quality Act Review

Please reference Sac Metro Air District's guidance on reviewing projects under CEQA, The Guide to Air Quality Assessment in Sacramento County (CEQA Guide), in preparing the LRDP Update EIR. The CEQA Guide can also help in determining any additions or updates necessary to mitigation measures in the 2010 LRDP EIR. For the overall program-level analysis, we recommend using methods in the CEQA Guide's chapter on Program-Level Analysis of General Plans and Area Plans. Following are recommendations for use of the CEQA Guide in the EIR's project-level analysis.

Construction

If CEQA analysis demonstrates that project construction emissions will exceed applicable Sac Metro Air District thresholds of significance for criteria pollutants, we recommend mitigating associated impacts using mitigation methods referenced in the CEQA Guide's chapter on Construction-Generated Criteria Air Pollutant and Precursor Emissions. Additionally, we recommend that projects implement a set of Basic Construction Emission Control Practices as best management practices (BMPs) regardless of whether construction emissions exceed these thresholds.

Operations
If CEQA analysis demonstrates that project operational emissions will exceed applicable Sac Metro Air District's thresholds of significance for criteria pollutants, we recommend mitigating emission impacts using mitigation methods referenced in the CEQA Guide's chapter on Operational Air Pollutant and Precursor Emissions.

If the project exceeds thresholds of significance for reactive organic gases (ROG), oxides of nitrogen (NOx), or particulate matter (PM), we recommend that the EIR include an Air Quality Mitigation Plan (AQMP) with measures to reduce operational emissions by 15% or more. We recommend using the Sac Metro Air District's Recommended Guidance for Land Use Emission Reductions as guidance in developing any AQMP measures. Should the project develop an AQMP, Sac Metro Air District respectfully requests consultation to review the AQMP for technical adequacy prior to inclusion in the final EIR.

Greenhouse Gases
Please note that the Sac Metro Air District Board of Directors will hold a public hearing to consider an update to our greenhouse gas (GHG) gas thresholds for CEQA review on March 26, 2020**.** We will post an updated technical report on our website once the update is finalized. Sac Metro Air District provides a threshold for agencies without adopted GHG reduction plans or their own adopted thresholds.

If CEQA analysis demonstrates that project GHG emissions will exceed any adopted GHG threshold, we recommend mitigating emission impacts using mitigation methods referenced in the CEQA Guide's chapter on GHG Emissions. If UC Davis chooses to use a GHG reduction plan (GHGRP) for CEQA analysis of climate change impacts, we recommend that the analysis describe project consistency with the GHGRP, and also describe the GHGRP's consistency with the California Code of Regulations' Guidelines for Implementation of CEQA, Section 15183.5 on plans for the reduction of GHG emissions.

Toxic Air Contaminants
Hospital facilities are often associated with toxic air contaminant (TAC) sources, for example combustion sources for emergency generators. Where feasible, Sac Metro Air District recommends using zero emission technology in place of these sources. Please be aware that these sources would require an Authority to Construct and Permit to Operate from Sac Metro Air District. For more information on this process, please contact Sac Metro Air District staff member Jeff Weiss at (916) 874-4862, or jweiss@airquality.org. Sac Metro Air District recommends using methods referenced in CEQA Guide's chapter on TAC Emissions in CEQA analysis, to address the potential impacts of TAC emissions from project construction and operations.

Friant Ranch
Sac Metro Air District recommends that the EIR include an analysis of health impacts that may result from project emissions, pursuant to the "Friant Ranch" decision. In December 2018 the California Supreme Court issued a decision in the Sierra Club v. County of Fresno case regarding the "Friant Ranch" project ((2018) 6 Cal. 5th 502). The Court determined that CEQA air quality analysis include a reasonable effort to connect a project's air quality impacts to likely health consequences or explain in meaningful detail why it is not feasible to do

so. For your reference, Sac Metro Air District with its consultant Ramboll has prepared a DRAFT Guidance to Address the Friant Ranch Ruling for CEQA Projects in the Sac Metro Air District.

Transportation and Circulation
The project's location in a relatively dense urban area, and its mix of uses, have high potential to result in relatively low project motor vehicle miles traveled (VMT) and associated polluting emissions. Consistent with measures in environmental review for the 2010 LRDP, Sac Metro Air District recommends that the UC Davis work cooperatively with Sacramento Regional Transit and other local agencies to coordinate local agency transit routes with UC Davis shuttle and transit programs. Further, we recommend that CEQA analysis include a pedestrian and bicycle circulation plan, including clearly delineated routes to nearby transit facilities, to help ensure that project pedestrian and bicycle facilities maximize the project's low-VMT potential.

Project features that would help maximize the project's low-VMT potential are as follows:

- Short term bicycle parking facilities within 50 feet of public entrances that include racks for storage of both personal bicycles and shared-mobility devices, such as bike-share or scooter-share devices
- Long term bicycle storage facilities at ground level for residents and staff
- Transportation demand management services, consistent with measures in environmental review for the 2010 LRDP, including teleworking, flexible schedules, free transit passes for residents and employees, and rideshare services
- Unbundled parking, whereby parking spaces are not included in the cost of residential units or non-residential uses, and instead must be paid for separately.

Finally, to help further reduce motor vehicle emissions, the Sac Metro Air District recommends including electric vehicle charging stations in parking garages, located near the garage entry.

Conclusion
Thank you for your consideration. All projects are subject to SMAQMD rules and regulations at the time of construction. A list of the most common rules that apply at the construction phase of projects is available on our website. If you have questions about these comments, please contact me at mwright@airquality.org or 916-874-4207

Sincerely,

Molly Wright

Dear Mr. Dulcich:

This letter responds to the Notice of Preparation circulated by UC Davis for the preparation of an environmental impact report (SEIR) for the UC Davis 2020 Long Range Development Plan (LRDP) Update.

The City is currently working with UC Davis on a wide range of activities with the complementary goals of supporting the growth of the Sacramento campus and ensuring meaningful and intentional community benefit. While this letter is focused on the items to be analyzed in the SEIR, the City would like to emphasize our appreciation for the continued partnership with UC Davis that works to address the following policy areas:

1. Investment in innovation through the buildout of Aggie Square and attraction of new businesses to the UC Davis Sacramento campus and vicinity, while supporting Sacramento's small businesses and entrepreneurs;
2. Local employment access to existing and new jobs by generated by the LRDP implementation;
3. Workforce training opportunities for local residents and partnerships with local schools and universities to prepare them for the types of jobs that will be located at the UC Davis Sacramento Campus and Aggie Square;
4. Provision of housing options affordable to residents of varying income levels and adequate quantities to stabilize and balance existing and future residents;
5. Healthy affordable food options accessible to nearby residents;
6. Mass transit and active transportation to serve the UC Davis Sacramento Campus and surrounding neighborhoods; and
7. Leveraging the educational and health services and synergies between UC Davis Health, University of California Davis, and surrounding neighborhoods and schools –with direct services, research, and training opportunities.

Below are comments related to the potential environmental effects of the LRDP that should be included in the SEIR.

1. The City of Sacramento is performing a study to envision transportation improvements to the Stockton Boulevard corridor. The study has identified a list of issues and opportunities which will be explored in greater detail through the project's

upcoming alternatives development. Road diets are potentially under consideration. Please contact the **Project Manager Drew Hart at ahart@cityofsacramento.org or (916) 808-6725** to coordinate on the proposed changes on Stockton Boulevard. All Stockton Boulevard corridor planning efforts should be taken into consideration with the SEIR. More information about the Stockton Boulevard corridor project is available on the City of Sacramento website: http://www.cityofsacramento.org/Public-Works/Transportation/Planning-Projects/Stockton-Blvd-Corridor-Study.

2. An evaluation of the project impacts to the transportation system should address the overall impacts on the circulation system within the project vicinity to improve the system for all modes of transportation. Thoughtful multimodal improvements should be proposed reflective of the City's investments as well as infrastructure and services provided by Regional Transit.

3. The City of Sacramento Public Works Department Transportation Division receives and investigates community concerns regarding the traffic congestion, pedestrian crosswalks, and other issues in the public right-of-way. Within UC Davis Sacramento Campus vicinity, the following concerns have been reported:

- Speeding on V Street (between 48th Street and 51st Street)
- Traffic congestion at V Street/51st Street intersection
- UC Davis patients using 49th Street to drive through the neighborhood
- Traffic signals on Stockton Boulevard have mostly permissive left turn signal phases: the drivers tend not to yield to pedestrians.

4. We understand that in the 2020 LRDP Update, the projected population and building square footage would remain consistent with the prior 2010 projection. The only new land use activity is the addition of an on-campus housing land use activity for 600 persons. Otherwise, it appears the 2020 LRDP Update consists of minor adjustments to land use designations within the total population and building square footage projections from the 2010 LRDP. However, per Attachment C to the NOP, the total campus parking is shown to increase by over 20 percent due to an increase of 2,000 spaces (from 9,963 to 11,963) from previous year 2030 anticipated growth. The significance of this apparent change in mode and increase in traffic and impacts to intersections along Stockton Boulevard and potential neighborhood traffic impacts should be addressed in the SEIR.

5. According to SB743, VMT analysis shall be required for all development projects. The SEIR should follow the latest guidelines provided for this effort and plan on methods to address reducing the VMT of this project if found higher than the threshold.

6. In addition to intersection level of service analysis please include a detailed analysis of pedestrian, bicycle, and transit system impacts and identify appropriate mitigation measures that includes but is not limited to pedestrian sidewalks, crossings, adequate bicycle parking and access, transit stop enhancements, sufficient driveway throat depth length, and other appropriate transportation system improvements. The planned transportation improvements and programs referenced in comment #1 should be included in the analysis.

City of
SACRAMENTO
Community Development

7. The proposed project is required to comply with Sacramento City Code Section 12.20.020 through the preparation of a traffic control plan for any construction activities that may obstruct vehicular or pedestrian traffic on city streets. The plan is subject to review and approval of the City of Sacramento Director of Department of Public Works. City Code Section 12.20.030 outlines the minimum requirements for information that must be provided in the traffic control plan. The Department contact is Aelita Milatzo, whose contact information is provided below.

8. Access to buildings and location of driveways should be evaluated so that there will be no queuing and spill back to public streets.

9. Pursuant to City Code Section 17.700.060, a Transportation System Management Plan is required. The Transportation System Management Plan is subject to review and approval by the City's Department of Public Works.

10. The improvements to the pedestrian, bicycle and transit system that would be provided to improve all modes of transportation within the project vicinity should be described in the SEIR.

Please provide the Department of Public Works offices with copies of any further actions regarding this project. We would appreciate the opportunity to review and comment on any changes related to this development and we would like to be included on early review of the proposed project site plan. If you have any questions regarding the above comments from the Department of Public Works, please contact **Aelita Milatzo at (916) 808-1953 or by email at amilatzo@cityofsacramento.org.**

The City looks forward to our continuing collaboration as UC Davis builds out the anticipated development associated with the 2020 LRDP Update.

Sincerely,

Tom Buford, Manager
Environmental Planning Services

environreview@ucdavis.edu

Dear Mr. Dulcich,

This letter provides comments from the Sacramento Housing Alliance (SHA) regarding the Notice of Preparation for the University of California, Davis (UC Davis) Sacramento Campus 2020 Long Range Development Plan (LRDP) Update.

The Sacramento Housing Alliance is a coalition representing nonprofit affordable housing developers; service providers; community, labor, environmental and faith-based organizations; and community advocates for affordable housing, people experiencing homelessness and equitable community development.

SHA respects the University of California system's vision for continued growth as an anchor institution in Sacramento, but we are concerned with the development's potential to exacerbate existing housing inequities and drive displacement. Much of the area around the UC Davis Sacramento Campus has been identified by UC Berkeley's Urban Displacement Project as either already experiencing ongoing gentrification or at risk of doing so. According to tract-level five-year estimate data from American Community Survey (ACS) conducted by the U.S. Census Bureau, the neighborhoods surrounding the Sacramento Campus experienced significant demographic change between 2008 and 2017: overall median household income increased almost 12% from approximately $39,700 to $44,300 and the percentage of the population that is white and non-Hispanic/Latinx has increased from 38% to 41%, even as the percentage of the population that is white and non-Hispanic/Latinx in the city as a whole decreased. During the same time period these neighborhoods became less racially diverse and higher income, rents have increased, and the rental vacancy rate decreased from 5.3% to 3.7%, making it even more difficult for lower income households to find affordable homes in the area. Without significant mitigation, the Aggie Square project stands to accelerate these trends and exacerbate the widely acknowledged affordable home crisis plaguing Sacramento.

The proposed project will induce population growth while increasing local employment growth. The LRDP anticipates substantial growth in the population within the

surrounding area directly related to the project. The Notice of Preparation projects 5,572 new students and employees and only 200 additional housing units, expected to house 600 University-affiliated occupants. The environmental review must evaluate the impact of these additional 5,000 people and their housing need induced by the proposed project. The approximate income levels of the projected income levels of the new employees and students should be analyzed in comparison to current neighborhood incomes to further elucidate the potential impacts on the market for both for-sale and rental housing. Given the vulnerability of the surrounding neighborhoods to displacement and gentrification, the environmental review should also address the risk of displacement, particularly for existing lower-income communities of color. We urge you to include racial and economic equity as guiding values for the development.

Given the extensive growth-inducing impact of the projects contemplated by the LRDP, the environmental review should also identify commensurate requisite mitigation strategies. Mitigation strategies could include setting aside housing planned as part of the project for lower-income employees; direct University investment into an affordable home trust fund dedicated to the area surrounding Aggie Square; making University owned sites available for the development of multifamily rental affordable homes through the public surplus lands process; and working with the City of Sacramento to establish an inclusionary housing requirement or density overlay zone in the area surrounding Aggie Square. Demonstration of mitigations such as these will ensure the Aggie Square development supports affordable home opportunities for workers and neighborhood residents of all income levels so that University investments benefit and do not harm existing neighborhood residents, vulnerable populations, and the broader surrounding community.

Without a plan for additional homes at all income levels consistent with the population growth of the Sacramento Campus, this project will result in the displacement of lower income households as nearby housing becomes more expensive and less available, as well as increased commuting to and from the campus, leading to increased vehicle miles traveled (VMT), greenhouse gas emissions. This is dealt with in greater detail by our member organization, the Environmental Council of Sacramento, in a separate comment letter. As the environmental review process addresses these VMT and air quality impacts, it must consider mitigations that include additional affordable housing such as those addressed above and integrating the long-term growth of the campus with other planning efforts along Stockton Boulevard and the transit and active transportation improvements identified in those processes.

We believe the potential Aggie Square development effort can have a significant positive impact on the existing and surrounding neighborhoods and create affordable home and job opportunities for residents and communities too often excluded from the economic prosperity and investments elsewhere in the City. Careful and thoughtful planning and investments can also mitigate for displacement risks. One of the objectives of the LRDP Amendment is to "support access to jobs and services to a more diverse population, including **providing housing** and transportation opportunities and community-serving uses" (emphasis added). Prioritizing

and getting the affordable home piece right, especially for multifamily rental homes, is critical to creating equitable, vibrant, and economically strong communities.

Thank you for your consideration and the opportunity to comment.

Sincerely,

Veronica Beaty, Policy Director
Sacramento Housing Alliance

RE: Notice of Preparation for an Environmental Impact Report for Aggie Square--Historic Resources

Mr. Dulcich,

The Board of Directors of Preservation Sacramento wishes to comment on the above named Notice of Preparation for an Environmental Impact Report (EIR). Specifically, there are two buildings in the project area, the Machinery Building and Governor's Hall, which constitute the only surviving buildings from the site's previous use as the California State Fairgrounds. Both properties are eligible historic resources that must be taken into consideration as part of the Aggie Square project, and, ideally, rehabilitated for continued use. At a public meeting regarding Aggie Square, a UC Davis representative stated that they had received analysis of the two buildings, concluding that Governor's Hall was eligible but not the Machinery Building. We were not provided with copies of evaluations of the properties, but question the assumption that the Machinery Building is not eligible for the California Register or National Register. The building, constructed in 1928 by the State Architect's Office under the supervision of George McDougall, retains a high degree of integrity, and is architecturally complementary to the adjacent Governor's Hall building. As the only surviving buildings of a massive State Fair complex of great importance to Sacramentans, the rarity of type and intact external appearance merit greater consideration for eligibility. Both buildings should be retained as part of the Aggie Square project, and both should be listed in the National Register of Historic Places, in order to facilitate their rehabilitation and reuse as part of the Aggie Square project.

William Burg
President, Preservation Sacramento Board of Directors

Subject: Aggie Square NOP comment

Dear Director Dulrich,

This is a public comment in response to the Notice of Preparation for the UC Davis Sacramento Campus 2020 Long Range Development Plan (LRDP) Update. I live in in the Tahoe Park area and am concerned about the project's impacts on transportation, pedestrian and bicyclist safety, and air quality. As you know, Senate Bill 743 (Steinberg, 2013) recently changed the way that public agencies consider a project's impact on transportation. I was surprised to see that the NOP did not mention the project's impact on vehicle miles traveled. The University should evaluate the project's impact on vehicle miles traveled on Stockton Boulevard and Broadway, and update the scoping document accordingly.

Section 15064.3 of the CEQA Guidelines directs public agencies to consider the effects of a project on transit and non-motorized travel when evaluating the significance of transportation impacts. The University should therefore consider the effects of Phase 1 of Aggie Square on pedestrians, bicyclists, and transit users on Stockton and Broadway. When the University considers mitigation measures, it should follow the Technical Advisory on Evaluating Transportation Impacts in CEQA (December 2018), which identifies potential measures to reduce VMT. These include, among others: orienting the project toward transit, bicycle and pedestrian facilities; improving or increasing access to transit; improving pedestrian and bicycle networks or transit service; and providing traffic calming.

Thank you,
Zach Miller

Appendix C

Planning Scenerio

Appendix C
Planning Scenario

The 2020 LRDP Update provides a projection of potential growth with the assumption that the 2020 LRDP Update will guide campus growth through the year 2040. For the University of California, LRDPs do not have an end date. For purposes of this Supplemental EIR, the following assumptions have been made to ensure the environmental impact analysis is both realistic and sufficiently discloses the potential environmental impacts of the project.

The planning scenario for the 2020 LRDP Update encompasses projects that are likely to be built between 2020 and 2040 on the Sacramento Campus. These projects are not currently set for plan or approval; rather, UC Davis staff provided information on future development that is likely to occur in order to analyze the impacts of the 2020 LRDP Update. The assumptions used represent a conservative analysis to capture the full range of potential environmental impacts that could result from implementation of the 2020 LRDP Update. The following tables summarize the growth assumptions used for the 2020 LRDP Update.

Table C-1 summarizes the 2020 to 2030 and the 2030 to 2040 growth assumptions for new buildings, renovations, parking, and demolitions, including the estimated square footage and the project completion years. Table C-2 shows the projected annual campus growth from 2020 to 2040.

As stated in Volume 1, Chapter 2, *Project Description*, of this Supplemental EIR, the 2020 LRDP Update proposes general types of campus development and land uses to support projected campus population growth and enable expanded and new program initiatives: Ambulatory Care; Education, Research, and Housing; Hospital; Landscape Buffer; Major Open Space; Parking Structure; and Support land uses. Table C-3 shows the proposed changes in building square footage per land use category (building space is not allocated within the Landscape Buffer and Major Open Space land use designations). While some of the new building space and associated square footage could be moved to a different land use category within the campus, Table C-3 represents the best estimates of the potential size and location of future projects by land use category. Future projects are also shown in Figure 2-9 in Volume 1 of this Supplemental EIR.

Table C-1. Planning Scenario for 2020 LRDP Update Growth Projections

Construction Type/Project	Completion Year	Existing Square Footage	Proposed Net Increase Square Footage	Total Square Footage	Proposed Net Increase Parking Spaces	Building Type
2020–2030						
New Buildings						
Rehab Hospital (approved in May 2020)	2022	68,000	-9,377	58,623	226	Hospital
Eye Center (approved in June 2020)	2022	–	58,000	58,000	–	Medical Office Building
Aggie Square Phase I (Volume 2)	2023	12,000	1,384,500	1,396,500	1,490	Mixed

Total		3,150,515	3,919,485	7,070,00	4,324[d]	
% Increase (2019–2040)				124%		

[a] Total of 300,000 square feet of renovations will occur between 2020 and 2030, with an annual average of 30,000 square feet per year.

[b] This includes all other building square footage where no changes are anticipated.

[c] Represents total amount of renovations between 2030 and 2040, with approximately 30,000 square feet of renovation per year.

[d] Represents the total amount of parking spots added to the campus, while removing 3,072 which are not show in Table C-1 but are accounted for in the analysis throughout this Supplemental EIR.

Table C-2. Annual Campus Growth Projection

Construction Type/Project	Existing Square Footage	Proposed Net Increase Square Footage	Total Square Footage	Proposed Net Increase Parking Spaces
Annual				
2020	19,483	-19,483	0	–
2021	68,000	-9,377	58,623	1,300
2022	417,977	-177,000	240,977	–

Total	3,150,515	3,919,485	7,070,000	4,700

[a] Annual data was not available for activities occurring between 2031 and 2040. Therefore, totals are presented for years 2031 through 2040.

[b] This includes all other building square footage where no changes are anticipated.

Table C-3. 2020 LRDP Update Building Square Footage by Land Use Designation

	Existing (2019) (gsf)	2020 LRDP Update Proposed 2040 (gsf)	Projected Change with 2020 LRDP Update (gsf)
Ambulatory Care	666,428	1,140,972	474,544
Education, Research, and Housing	570,537	2,984,747	2,414,210
Hospital	2,007,237	2,566,187	558,950
Parking Structure	0	10,000	10,000
Support	425,609	368,094	-57,515
Total Building Space in LRDP Land Use Categories	3,669,811	7,070,000	3,400,189

gsf = gross square feet.

Appendix D

Criteria Pollutant and GHG Modeling Results

Air Quality and Greenhouse Gas Modeling Inputs, Outputs, and Supporting Data

Table of Contents

Volume 1: 2020 LRDP

Construction Analysis

1. CalEEMod outputs characterizing maximum daily and annual construction emissions for projects constructed between 2021 and 2030
2. CalEEMod outputs characterizing maximum daily construction emissions under the maximum growth scenario between 2031 and 2040 (one-quarter total development in a single year)
3. CalEEMod outputs characterizing maximum daily and annual construction emissions under the average growth scenario between 2031 and 2040 (average annual development)
4. GHG emissions calculations for electricity consumed during construction
5. Adjustment factors applied to CalEEMod mitigated emissions to account for NOx, CO, and PM reductions from Mitigation Measure LRDP-AQ-2b (renewable diesel) and ROG reductions from Mitigation Measure LRDP-AQ-2c

Existing (2019 Inventory)

1. CalEEMod outputs characterizing maximum daily and annual operational emissions from UC Davis owned and operated area, water, and wastewater sources
2. CalEEMod outputs characterizing maximum daily and annual non-mobile source operational emissions for existing P3 facilities (Courtyard by Marriott and Ronald McDonald House)
3. Criteria pollutant and GHG calculations for mobile sources (commuting, campus fleet, helicopters)
4. Criteria pollutant and GHG calculations for stationary sources (generators, boilers, turbine, cooling towers, gasoline dispensing facility)
5. Criteria pollutant and GHG calculations for fugitive sources (refrigerants, laboratories, transmission and distribution infrastructure)
6. Criteria pollutant and GHG calculations for purchased natural gas
7. GHG calculations for purchased electricity
8. GHG calculations for business air travel

LRDP Forecasts (2030 and 2040)

1. CalEEMod output characterizing maximum daily and annual forecasted operational emissions from UC Davis owned and operated area, water, and wastewater sources
2. CalEEMod outputs characterizing maximum daily and annual forecasted non-mobile source operational emissions for future P3 facilities (Courtyard by Marriott, Ronald McDonald House, Aggie Square Phase I, Aggie Square Phase II, and Rehabilitation Hospital)
3. Criteria pollutant and GHG forecast for mobile sources (commuting, campus fleet, helicopters)
4. Criteria pollutant and GHG forecast for stationary sources (generators, boilers, turbine, cooling towers, gasoline dispensing facility)
5. Criteria pollutant and GHG forecast for fugitive sources (refrigerants, laboratories, transmission and distribution infrastructure)
6. Criteria pollutant and GHG forecast for purchased natural gas
7. GHG forecast for business air travel

1990 Backcast

1. Scaling factors and backcast calculations for water, waste, and area sources
2. Criteria pollutant and GHG backcast calculations for Scope 3 mobile sources
3. GHG backcast for business air travel

Air Quality Mitigation Plan

Volume 2: Aggie Square Phase I

Construction Analysis

1. CalEEMod outputs characterizing maximum daily and annual construction emissions
2. CalEEMod output characterizing changes in carbon sequestration from tree removal
3. GHG emissions calculations for electricity consumed during construction
4. Adjustment factors applied to CalEEMod mitigated emissions to account for NOx, CO, and PM reductions from Mitigation Measure LRDP-AQ-2b (renewable diesel) and ROG reductions from Mitigation Measure LRDP-AQ-2c

Operational Analysis

1. CalEEMod outputs characterizing maximum daily and annual operational emissions from energy, area, water, and wastewater sources
2. Criteria pollutant and GHG calculations for mobile sources (vehicle trips)
3. Criteria pollutant and GHG calculations for stationary sources (generators)
4. Criteria pollutant and GHG calculations for fugitive sources (laboratories and refrigerants, respectively)
5. GHG calculations for purchased electricity (2024)

Volume 1: 2020 LRDP

Construction Analysis

1. CalEEMod outputs characterizing maximum daily and annual construction emissions for projects constructed between 2021 and 2030

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Building Construction - 2020

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Building Construction - 2020

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2026

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2026

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2028

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Building Construction - 2020

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

UCD LRDP Construction Wellness Building - Sacramento County, Summer

UCD LRDP Construction Wellness Building
Sacramento County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Health Club	10.00	1000sqft	0.23	10,000.00	0
Other Asphalt Surfaces	0.01	Acre	0.01	500.94	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2027
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Construction Phase - Adjusted schedule based on anticipated start date and default phase durations
Construction Off-road Equipment Mitigation - Includes pre-2025 construction; conservatively applied T3. PM reduction from SMAQMD CEQA Guidelines, page 3-9

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Enclosed Parking with Elevator	800.00	Space	7.20	320,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2030
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -
Construction Phase - Adjusted schedule based on anticipated start date and default phase durations
Vehicle Trips - Mobile sources per F&P VMT
Energy Use - Gas provided by Central Plant. Operational output for critiera pollutants only
Water And Wastewater - Operational output for critiera pollutants only
Solid Waste - Operational output for critiera pollutants only
Construction Off-road Equipment Mitigation - 2025(+) construction requires Tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2026

Unmitigated Construction On-Site

UCD LRDP Construction Aggie Square Phase II Garage
Sacramento County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Enclosed Parking with Elevator	800.00	Space	7.20	320,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2030
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Construction Phase - Adjusted schedule based on anticipated start date and default phase durations
Vehicle Trips - Mobile sources per F&P VMT
Energy Use - Gas provided by Central Plant. Operational output for critiera pollutants only
Water And Wastewater - Operational output for critiera pollutants only
Solid Waste - Operational output for critiera pollutants only
Construction Off-road Equipment Mitigation - 2025(+) construction requires Tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Building Construction 1 - 2021

UCD LRDP Construction Additional Renovations 2020-2024
Sacramento County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	120.00	1000sqft	2.75	120,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2026
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Construction Phase - Adjusted schedule based on anticipated start date and default phase durations
Off-road Equipment - Set to 3 hours per day per UC Davis
Off-road Equipment - Cranes, welders, and forklifts for 3 hours per day
Construction Off-road Equipment Mitigation - 2025+ construction requires Tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2032
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Land Use - Assumed 25% of total development and half of Courtyard replacement in a single year.
Construction Phase - Given the accelerated construction assumption and likelihood for concurrent construction, retained default durations (with the exception of building construction) and assumed phase overlap throughout one year.
Demolition - Assumes 25% of total demolition plus full Courtyard demolition (98,000 sf)
Construction Off-road Equipment Mitigation - 2025 (+) tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9.
Off-road Equipment - Scaled default equipment by 1.2 to correspond to condensed schedule (building construction phase only)

UCD LRDP Construction 2031 (Max Annual Renovation Scenario)
Sacramento County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	75.00	1000sqft	1.72	75,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2032
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Land Use - Assumed 25% of total renovation building space in a singel year
Demolition - Amortized total demolition over 10 years; full Courtyard demolition (98,000 sf) in 2031
Construction Off-road Equipment Mitigation - 2025 (+) tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9.
Off-road Equipment - Adusted usage to 3 hours per day per UCD
Off-road Equipment - Adusted usage to 3 hours per day per UCD

1.3 User Entered Comments & Non-Default Data

Land Use - Amortized total development over 10 years; assumes half of Courtyard replacement in 2031.
Construction Phase - Adjusted start and end dates to one year of construction based on default durations.
Off-road Equipment - Equipment quantities scaled by a factor of 1.2 to account for condensed schedule
Demolition - Amortized total demolition over 10 years; full Courtyard demolition (98,000 sf) in 2031
Construction Off-road Equipment Mitigation - 2025 (+) tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9.

University/College (4Yr)	8.75	Employee	0.14	6,178.49	0
Unrefrigerated Warehouse-No Rail	1.03	1000sqft	0.02	1,030.00	0
Enclosed Parking with Elevator	140.00	Space	1.26	51,850.00	0
Other Asphalt Surfaces	0.39	Acre	0.39	17,162.64	0
Health Club	1.03	1000sqft	0.02	1,030.00	0
Hotel	115.00	Room	3.83	74,000.00	0
Apartments Low Rise	17.25	Dwelling Unit	1.08	13,152.00	46

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -
Land Use - Amortized total development over 10 years; assumes half of Courtyard replacement in 2032.
Construction Phase - Adjusted start and end dates to one year of construction based on default durations.
Demolition - Amortized total demolition over 10 years.
Construction Off-road Equipment Mitigation - 2025 (+) tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9.

Off-road Equipment - Equipment quantities scaled by a factor of 1.2 to account for condensed schedule

UCD LRDP Construction 2033 (Average Annual Scenario) - Sacramento County, Annual

UCD LRDP Construction 2033 (Average Annual Scenario)
Sacramento County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	8.24	1000sqft	0.19	8,238.00	0
Hospital	27.85	1000sqft	0.64	27,846.00	0
Medical Office Building	8.05	1000sqft	0.18	8,046.00	0
Research & Development	22.65	1000sqft	0.52	22,654.00	0
University/College (4Yr)	8.75	Employee	0.14	6,178.49	0
Unrefrigerated Warehouse-No Rail	1.03	1000sqft	0.02	1,030.00	0
Enclosed Parking with Elevator	140.00	Space	1.26	51,850.00	0
Other Asphalt Surfaces	0.39	Acre	0.39	17,162.64	0
Health Club	1.03	1000sqft	0.02	1,030.00	0
Apartments Low Rise	17.25	Dwelling Unit	1.08	13,152.00	46

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Land Use - Amortized total development over 10 years.
Construction Phase - Adjusted start and end dates to one year of construction based on default durations.
Demolition - Amortized total demolition over 10 years.
Construction Off-road Equipment Mitigation - 2025 (+) tier 4. PM reduction from SMAQMD CEQA Guidelines, page 3-9.
Off-road Equipment - Equipment quantities scaled by a factor of 1.2 to account for condensed schedule

Volume 1: 2020 LRDP

Construction Analysis

5. Adjustment factors applied to CalEEMod mitigated emissions to account for NOx, CO, and PM reductions from Mitigation Measure LRDP-AQ-2b (renewable diesel) and ROG reductions from Mitigation Measure LRDP-AQ-2c

Mitigation Adjustment Factors

CalEEMod "mitigated" output includes the following mitigation:

1. Dust control (LRDP-AQ-2a)
2. Tier 3 or 4 engines (LRDP-AQ-2b)

The following adjustment factors were applied to account for NOx, CO, and PM reductions from Mitigation Measure LRDP-AQ-2b (renewable diesel) and ROG reductions from Mitigation Measure LRDP-AQ-2c

Low VOC (LRDP-AQ-2c)

CalEEMod VOC g/L	100
Mitigated g/L	50
Reduction in VOC emissions	50%

Renewable Diesel (LRDP-AQ-2b)

	% reduction in emissions*		
Equipment Tier	NOx	CO	PM
Tier 3	10%	10%	30%
Tier 4	0%	0%	30%

Paved Road Dust Emission Factor Calculation

Methodology

Calculation Methodology: USEPA AP-42, Paved Roads, Section 13.2.1
https://www3.epa.gov/ttn/chief/old/ap42/ch13/s021/final/c13s02-1_2002.pdf
Avg vehicle weight and silt loading within Sac County
https://ww3.arb.ca.gov/ei/areasrc/fullpdf/full7-9_2018.pdf

Precipitation

	sL	W	P	WRCC Code
SVAB	0.1	2.4	59	47633

https://wrcc.dri.edu/cgi-bin/cliMAIN.pl?ca7633

Equation 2

Pollutant	Variables					
	k	sL	W	P	N	g per mi
PM_{10}	0.0022	0.1	2.4	59	365	0.28773
$PM_{2.5}$	0.00054	0.1	2.4	59	365	0.07063

E = particulate emission factor (grams of particulate matter/VMT)

k = particle size multiplier (lb/VMT)	default from AP-42
sL = local roadway silt loading (g/m2)	CalEEMod default
W = average weight of vehicles on the road (tons)	CalEEMod default
P = number of wet days with at least 0.254mm of precipitation	from WRCC
N = number of days in the averaging period	annual days (365)
g to lb conversion	0.00220462

Existing Daily Criteria Pollutant Emissions (pounds)

Daily generator operation 30 min*

*Source: Generators are required to run 30 minutes per month per Joint Commission requirements. The runtime logs confirm the generators operate on average 30 minutes per day a month.

Conservative daily generator operation 1 hour*

*Conservatively bumped the 30 minutes to 1 hour per day

Maximum daily operating time (all gen) 3 hours*

*Assumed up to three generators would be tested in a single day

Analysis	ROG	NOx	CO	PM10	PM2.5	SOx

Apartments Low Rise	175.00	Dwelling Unit	10.94	131,520.00	467

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	74	**CH4 Intensity**	0.007	**N2O Intensity**	0.001

1.3 User Entered Comments & Non-Default Data

Project Characteristics - SMUD emission factors adjusted for RPS (2040)
Land Use - Land use inventory per UC Davis
Water And Wastewater - Water forecasted from existing per population growth. Modeled in Hospital category. Apportioned building water to indoor vs. outdoor using defaults. Central Plant water assumed indoor. Irrigation water assumed outdoor.

Solid Waste - Waste forecasted from existing per population growth. Modeled in Hospital category.
Stationary Sources - Emergency Generators and Fire Pumps -

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2030
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	223	**CH4 Intensity**	0.02	**N2O Intensity**	0.002

1.3 User Entered Comments & Non-Default Data

Project Characteristics - SMUD emission factors adjusted for RPS (2030)
Land Use - Land use inventory per UC Davis
Water And Wastewater - Water forecasted from existing per population growth. Modeled in Hospital category. Apportioned building water to indoor vs. outdoor using defaults. Central Plant water assumed indoor. Irrigation water assumed outdoor.

Solid Waste - Waste forecasted from existing per population growth. Modeled in Hospital category.

1.3 User Entered Comments & Non-Default Data

Project Characteristics - RPS adjusted utility EFs
Land Use - Land use data from UCD
Vehicle Trips - Modeled in EMFAC using VMT from F&P
Woodstoves - No hearth
Energy Use - Electricity through Greenergy; only commerical (non-T24 cooking) natural gas
Water And Wastewater - Water from UCD. Modeled all in apartment category.

1.3 User Entered Comments & Non-Default Data

Project Characteristics - RPS adjusted utility EFs
Land Use - Land use data from UCD
Vehicle Trips - Modeled in EMFAC using VMT from F&P
Woodstoves - No hearth
Energy Use - Electricity through Greenergy; only commerical (non-T24 cooking) natural gas
Water And Wastewater - Water from UCD. Modeled all in apartment category.

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Electricity emission factors adjusted for RPS (2030)
Vehicle Trips - Modeled in EMFAC using VMT from F&P
Energy Use - All electric design. kWh scaled from Aggie Square Phase 1, which is also all electic. Total is 11.9 million kWh.
Solid Waste - Waste based on data from UCD. All modeled in the Medical Office category.

Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	223	**CH4 Intensity**	0.02	**N2O Intensity**	0.002

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Electricity emission factors adjusted for RPS (2030)
Vehicle Trips - Modeled in EMFAC using VMT from F&P
Energy Use - All electric design. kWh scaled from Aggie Square Phase 1, which is also all electic. Total is 11.9 million kWh.
Solid Waste - Waste based on data from UCD. All modeled in the Medical Office category.

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Electricity emission factors adjusted for RPS (2030)
Vehicle Trips - Modeled in EMFAC using VMT from F&P
Energy Use - All electric design. kWh scaled from Aggie Square Phase 1, which is also all electic. Total is 11.9 million kWh.
Solid Waste - Waste based on data from UCD. All modeled in the Medical Office category.

Paved Road Dust Emission Factor Calculation

Methodology

Calculation Methodology: USEPA AP-42, Paved Roads, Section 13.2.1

https://www3.epa.gov/ttn/chief/old/ap42/ch13/s021/final/c13s02-1_2002.pdf

Avg vehicle weight and silt loading on Local Roads within Sac County

https://ww3.arb.ca.gov/ei/areasrc/fullpdf/full7-9_2018.pdf

Precipitation

	sL	W	P	WRCC Code
SVAB	0.1	2.4	59	47633

https://wrcc.dri.edu/cgi-bin/cliMAIN.pl?ca7633

Equation 2

Pollutant	Variables					
	k	sL	W	P	N	g per mi
PM_{10}	0.0022	0.1	2.4	59	365	0.28773
$PM_{2.5}$	0.00054	0.1	2.4	59	365	0.07063

E = particulate emission factor (grams of particulate matter/VMT)	
k = particle size multiplier (lb/VMT)	default from AP-42
sL = local roadway silt loading (g/m2)	CalEEMod default
W = average weight of vehicles on the road (tons)	CalEEMod default
P = number of wet days with at least 0.254mm of precipitation	from WRCC
N = number of days in the averaging period	annual days (365)
g to lb conversion	0.002204623

Air Quality Mitigation Plan

Air Quality Mitigation Plan: 2020 LRDP Update

Introduction

The Sacramento Metropolitan Air Quality Management District (SMAQMD) (2020a) has developed guidance to mitigate operational emissions for projects subject to the California Environmental Quality Act (CEQA). SMAQMD's (2020b) *Guide to Air Quality Assessment in Sacramento County* (CEQA Guide) recommends that project applicants prepare an Air Quality Mitigation Plan (AQMP) for all projects that exceed SMAQMD's operational significance thresholds. SMAQMD's operational thresholds are summarized Volume 1, Section 3.2, *Air Quality*, Table 3.2-8.

Operational emissions of particulate matter less than 10 microns in diameter (PM10) from the 2020 LRDP Update (project) are greater than the SMAQMD's daily and annual significance thresholds. Therefore, an AQMP has been prepared for the project.

Air Quality Mitigation Plan Reduction Target

SMAQMD (2020a) has determined for projects that are operationally significant for particulates (PM10 or particulate matter less than 2.5 microns in diameter [PM2.5]), no specific percent reduction has been established as feasible mitigation. The focus of an AQMP for particulates should be to implement all feasible mitigation.

Project Design Elements and Mitigation

Traffic Modeling

The vehicle miles traveled (VMT) estimates for the project were modeled using the Sacramento Area Council of Government's (SACOG) Sacramento Activity-Based Travel Simulation Model 19 (SACSIM19). SACSIM19 accounts for several regional factors that may reduce project VMT, including the following factors.

- Multimodality (bicycle and pedestrian infrastructure)
- Access to transit
- Job accessibility
- Job and housing density
- Jobs and housing mix and balance

Project Location and Site Design

The UC Davis Sacramento Campus is considered a low-VMT area of the Sacramento region as demonstrated in all the mapping analyses conducted by SACOG for the *2020 Metropolitan Transportation Plan/Sustainable Communities Strategy* (MTP/SCS) (Sacramento Area Council of Governments 2019). The 2020 MTP/SCS acknowledges that "location within the region is very likely the most important variable in determining how much time people spend in their vehicles. Communities within existing urban areas, and with a mix and density of uses, tend to produce less VMT per resident than places that are farther away and spread out" (Sacramento Area Council of Governments 2019). In addition, the Sacramento Campus is served by Sacramento Regional Transit

(SacRT). The Light Rail Gold Line begins operation at 5:00 a.m. with service every 15 minutes during the weekday. The closest stop to the project is at 39th Street, which is about 0.25 mile from the northern border of the plan area.

The 2020 LRDP Update proposes an increase in land uses that are complementary to the surrounding area, which would increase land use diversity and internal trip capture. As new facilities and population are added to the campus under the 2020 LRDP Update, bicycle facilities would also be constructed and enhanced on the campus. For example, the 2020 LRDP Update includes the addition of bike lanes on 48th Street, consistent with the *City of Sacramento Bicycle Master Plan*, and a protected intersection is proposed to replace the existing traffic circle at the intersection of X Street and 48th Street to facilitate bicycle travel to the Class I shared-use path along the 48th Street alignment between V Street and X Street.

The 2020 LRDP Update is also being designed to minimize internal and external vehicle trips. Aggie Square Phase I, for example, includes proximate development of residential (up to 324 units) and commercial uses, with the goal of providing on-campus housing for educators and students. The 2020 LRDP Update also includes construction of up to 175 residential units. The additional on-campus housing provided by the 2020 LRDP Update reduces commute-related vehicle trips because individuals can walk or bike to their place of work or study. The 2020 LRDP Update would also substantially increase the density of on-campus uses.[1]

University Sustainable Practices Policy

The *University of California Policy on Sustainable Practices* (UC Sustainable Practices Policy) was adopted by The Regents in 2006. The policy is regularly updated, with the most recent update occurring in July 2019. The policy goals encompass 10 areas of sustainable practices: green building, clean energy, sustainable transportation, sustainable building operations, zero waste, sustainable procurement, sustainable foodservices, sustainable water systems, and sustainability at UC Davis Health. The following practices will reduce mobile source emissions (including PM10) from the project.

Sustainable Transportation

The University will implement transportation programs and greenhouse gas (GHG) emission reduction strategies that reduce the environmental impacts from commuting, fleet and business air travel related to achieving the Climate Protection section of this Sustainable Practices Policy.

1. Each location will reduce GHG emissions from its fleet and report annually on its progress. Locations shall implement strategies to reduce fleet emissions and improve fuel efficiency of all university-owned or operated fleet vehicles and equipment where practical options exist through acquisition and fleet operation protocols.
    a. By 2025, zero emission vehicles or hybrid vehicles shall account for at least 50% of all new light-duty vehicle acquisitions.
2. The University recognizes that single-occupant vehicle (SOV) commuting is a primary contributor to commute GHG emissions and localized transportation impacts.
    a. By 2025, each location shall strive to reduce its percentage of employees and students commuting by SOV by 10% relative to its 2015 SOV commute rates.

[1] With implementation of the 2020 LRDP Update, building square footage would increase from 3.67 million to 7.07 million, all within the existing Sacramento Campus footprint.

   b. By 2050, each location shall strive to have no more 40% of its employees and no more than 30% of all employees and students commuting to the location by SOV.

3. Consistent with the State of California goal of increasing alternative fuel – specifically electric – vehicle usage, the University shall promote purchases and support investment in alternative fuel infrastructure at each location.

   a. By 2025, each location shall strive to have at least 4.5% of commuter vehicles be zero emission vehicles (ZEV).

   b. By 2050, each location shall strive to have at least 30% of commuter vehicles be ZEV.

4. Each location will develop a business-case analysis for any proposed parking structures serving University affiliates or visitors to campus to document how a capital investment in parking aligns with each campus' Climate Action Plans and/or sustainable transportation policies.

UC Davis Health Green Commuter Program

The UC Davis Health Green Commuter Program, housed within Parking, Transportation and Fleet Services, is a program designed to help foster environmental stewardship while creating a better work-life balance by offering more sustainable commute modes to employees and students. These programs include carpool matching, transit planning, bicycling, and walking programs as well as telework. Within these programs are incentives providing benefits to those who choose not to drive alone. A large component of the Green Commuter Program is education and outreach offered throughout the year. Bicycle classes, transit field trips, and informational fairs provide direct involvement on the UC Davis Health Campus. The UC Davis Health Green Commuter Program will contribute to VMT and associated mobile source emission reduction throughout the UC Davis Sacramento Campus.

Supplemental Environmental Impact Report Mitigation

The project would implement Mitigation Measures LRDP-TRA-1a and LRDP-AQ-2e, as described below. Mitigation Measure LRDP-TRA-1a supports mode shifting and associated vehicle emissions reductions by facilitating service improvements that are necessary to improve transit performance and reliability. Through this measure and the 2020 LRDP Update, UC Davis plans to construct and operate a new mobility hub at 45th Street north of 2nd Avenue, which will provide a centralized transit center. UC Davis would also coordinate with and support the City of Sacramento on new roadway transit improvements along Stockton Boulevard, including potentially bus rapid transit. Mitigation Measure LRDP-AQ-2e will reduce mobile source emissions by limiting parking supply and reducing vehicle trips.

Mitigation Measure LRDP-TRA-1a: Monitor transit service performance and support transit improvements

Currently, SacRT regularly monitors transit service performance and adjusts service levels, as feasible, according to established service standards. SacRT will continue to implement this monitoring and service change process over the duration of the 2020 LRDP Update implementation. Moreover, UC Davis will continue to adjust campus shuttle routes and schedules as warranted by passenger demand.

UC Davis will work with SacRT staff to identify and support the implementation of transit service and/or facility improvements necessary to achieve established service standards and, in turn, maintain a high-quality customer experience so as not to deter existing and potential

ridership. Potential transit improvements include modifying existing transit routes or adding new routes to serve areas of the Sacramento Campus underserved by transit, adding service capacity (through increased headways and/or larger vehicles) to prevent chronic overcrowding, constructing transit priority treatments to improve service reliability, improving terminal facilities to accommodate additional passengers and transit vehicles, and improving coordination between transit providers. Improvements should be selected based on existing performance data and targeted to address those areas not meeting established service standards (e.g., investing in transit priority treatments if on-time performance is the issue; or adding service capacity if vehicle loading is the issue).

Transit improvements will offset any degradations to vehicle loading, productivity, and on-time performance in excess of acceptable SacRT standards that would otherwise occur with the implementation of the 2020 LRDP Update. Overall, transit improvements will strive to achieve the vehicle loading, productivity, and on-time performance standards established in the most up-to-date SacRT Service Standards.

Transit facility and roadway improvements will be designed and constructed in accordance with industry best practices and applicable UC Davis, City of Sacramento, and State of California standards. Improvements will be implemented or constructed in a manner that would not physically disrupt existing transit service or facilities (e.g., additional bus service that exceeds available bus stop or transit terminal capacity) or otherwise adversely affect transit operations.

Mitigation Measure LRDP-AQ-2e: Reduce operational PM10 emissions

UC Davis will implement a program that incentivizes employees, students, residents, and visitors to carpool, use electric vehicles (EVs), walk/bike, or use public transit to commute to and from the Sacramento Campus. The program will include, but is not limited to, the following features.

- **Parking**: Limit parking capacity to meet onsite demand and provide preferential parking to carpool vehicles, vanpool vehicles, and EVs. The program will implement the following parking related sub-measures.

    a. Provide no more onsite parking spaces than necessary to accommodate the number of employees working at a project site and/or the number of residents living at a project site, as determined by the project size and design.

    b. Where feasible, for future residential units (on-campus and Aggie Square Phase I), lease/sell parking space separately from the unit and provide the tenant the option of not purchasing/owning a space.

    c. Nonresidential land uses with 20 or more onsite parking spaces will dedicate preferential parking spaces to vehicles with more than one occupant and zero emission vehicles (including battery electric vehicles and hydrogen fuel cell vehicles). The number of dedicated spaces should be no less than two spaces or 5 percent of the total parking spaces on the project site, whichever is greater. These dedicated spaces will be in preferential locations such as near the main entrances to the buildings served by the parking lot and/or under the shade of a structure or trees. These spaces will be clearly marked with signs and pavement markings. This measure will not be implemented in a way that prevents compliance with requirements in the California Vehicle Code regarding parking spaces for disabled persons or disabled veterans.

d. Maintain a virtual or real "ride board" for employees and students to organize carpools and incentives for employees using public transit to commute to and from campus.

- **Vendor Trips**: Implement a program that incentivizes vendors to reduce the emissions associated with vehicles and equipment serving the UC Davis Sacramento Campus. The program will implement the following sub-measures to reduce vendor-related, mobile-source emissions.

  a. Incentivize the use of electric vehicles or other clean fuels in their trucks and equipment.

  b. Work with vendors, especially those using trucks, to reduce the number of vendor trips made to the campus through trip chaining, reducing the number of shipments, or other methods.

- **Campus Shuttles**: Work with Fleet Services to convert Med-Transit (onsite) shuttles to electric or lower-emission fuels or implement emission control technologies to reduce criteria air pollutant emissions from existing conditions.

- **Pedestrian and Bicycle Infrastructure**: Enhance walkability and connectivity of the Sacramento Campus to surrounding residential and commercial uses. The program will implement the following site design related sub-measures.

  a. Ensure all new external connections from the Sacramento Campus to existing or planned streets include bicycle/pedestrian access.

  b. Eliminate physical barriers such as walls, landscaping, and slopes that impede pedestrian circulation throughout the Sacramento Campus.

  c. Require all new sidewalks internal and adjacent to the Sacramento Campus to be at least 5 feet wide. Provide grade separation and wider sidewalks (e.g., 7 feet), wherever feasible.

  d. Require all new sidewalks on the Sacramento Campus to include vertical curbs or a planting strip to separate the sidewalk from the parking or travel lane.

  e. Construct new roads on the Sacramento Campus to include at least one traffic calming feature, such as street parking, chicanes, horizontal shifts (lane centerline that curves or shifts), bollards, rumble strips, or woonerfs. Coordinate with the City of Sacramento to encourage these features on external roads connecting to the campus.

  f. Construct new intersections on the Sacramento Campus to include marked crosswalks, count-down signal timers, curb extensions, channelization islands, speed tables, raised crosswalks, raised intersections, median islands, tight corner radii, traffic circles or mini-circles. Coordinate with the City of Sacramento to encourage these features on external intersections connecting to the campus.

- **Landscaping Equipment**: Reduce emissions from landscaping equipment through the following sub-measures.

  a. Beginning in 2030, require UC Davis landscapers and contracted landscaping companies that maintain campus greenspaces to utilize electric or alternatively fueled mowers and handheld equipment (e.g., trimmers, blowers).

  b. Encourage xeriscape landscaping in all new campus greenspaces.

Air Quality Mitigation Plan Effectiveness

The UC Sustainable Practices Policy and the UC Davis Health Green Commuter Program, which provides incentives for carpooling, vanpooling, biking, walking, and using transit, would contribute to mobile source PM10 reductions by raising awareness about mode shift and reducing mobile source emissions. Implementation of Mitigation Measures LRDP-TRA-1a and LRDP-AQ-2e would also reduce PM10 emissions by supporting high-quality transit to the plan area, limiting parking supply, and reducing vehicle trips. However, UC Davis does not have jurisdiction over transit service and vehicle trips. The effectiveness of Mitigation Measure LRDP-AQ-2e, for example, would depend on the cooperation of visitors, employees, patients, and vendors visiting the plan area. Accordingly, emissions reductions achieved by Mitigation Measures LRDP-TRA-1a and LRDP-AQ-2e are not quantified.

While emissions benefits have not been explicitly modeled, SMAQMD (2020a) guidance provides estimated VMT reductions that may be achieve by similar measures. SMAQMD's published VMT reductions are based, in part, on supporting literature and analysis from the California Air Pollution Control Officers Association (CAPCOA) (2010). The cited effectiveness ranges are often most relevant to urban and suburban mixed use, residential, commercial, retail, and office projects, and therefore may not be wholly applicable to the 2020 LRDP Update. While the 2020 LRDP Update includes employee and resident vehicle travel, like an office or mixed-use development project, a substantial portion of the estimated project vehicle activity is made for medical purposes (e.g., patient travel for procedures, emergency vehicle trips) where use of transit or other trip alternatives is less likely.

Recognizing these considerations, this section identifies the *potential* VMT (and thus mobile source emissions) reductions that might be achieved by the UC Davis programs and Mitigation Measures LRDP-TRA-1a and LRDP-AQ-2e. The cited reductions are drawn from SMAQMD's (2020a) *Recommended Guidance for Land Use Emission Reductions* and other resources, as cited.

- **UC Sustainable Practices Policy:** Use of zero emission vehicles or hybrid vehicles would not reduce VMT but would contribute to emissions reductions. PM10 generated by the campus fleet represents less than 1 percent of forecasted emissions generated by implementation of the 2020 LRDP Update. Using zero emission vehicles would effectively eliminate these emissions, achieving a less than 1 percent reduction in total PM10 emissions. Reducing the percentage of employees and students commuting by single-occupant vehicle or by gasoline-powered vehicles is a scalable action, with the VMT and emissions reduction being proportional to the number of eliminated trips made by gasoline-powered vehicles.
- **UC Davis Health Green Commuter Program**: SMAQMD experience suggest that providing commute trip reduction programs, like those offered by the UC Davis Health Green Commuter Program, can increase sustainable mode share for the commute and results in up to a 5 percent decrease in employee commute-related VMT.
- **Mitigation Measure LRDP-TRA-1a**: While trips made for medical purposes are less likely to use transit, expanding the local transit network and increasing speed and reliability may encourage the use of transit by employees, students, and visitors. Depending on the service expansion and achieved headways, research shows that this type of measure may reduce VMT from these source groups by 0.1 to 10.7 percent.
- **Mitigation Measure LRDP-AQ-2e (parking)**: Providing preferential parking and real-time carpooling resources will contribute to reductions in employee commute related VMT. However,

neither SMAQMD's nor CAPCOA's guidance quantify potential reductions. Unbundling parking costs may reduce VMT generated by new on-campus residential units by 2.6 to 13.0 percent.

- **Mitigation Measure LRDP-AQ-2e (vendor trips)**: Use of alternatively fueled trucks would not reduce VMT but would contribute to emissions reductions. For example, use of renewable diesel can reduce PM10 emissions by 30 percent (Durbin et al. 2010; California Environmental Protection Agency 2015). Minimizing the number of vendor trips through efficient scheduling of deliveries is scalable, with the VMT and emissions reduction proportional to the number of eliminated trips.
- **Mitigation Measure LRDP-AQ-2e (campus shuttle)**: PM10 generated by the campus shuttle represents less than 1 percent of forecasted emissions generated by implementation of the 2020 LRDP Update. Electrifying the campus shuttle would effectively eliminate these emissions, achieving a less than 1 percent reduction in total PM10 emissions.
- **Mitigation Measure LRDP-AQ-2e (pedestrian and bicycle Infrastructure)**: While trips made for medical purposes are less likely to walk or bike, design elements to enhance walkability and pedestrian network connectivity may encourage active transportation among employees, students, and visitors. Depending on the extent and types of improvements, research shows that this type of measure may reduce VMT from these source groups by 3.0 to 23.3 percent. Traffic calming measures may reduce on-campus VMT by 0.3 to 1.0 percent.
- **Mitigation Measure LRDP-AQ-2e (landscaping equipment)**: PM10 generated by the landscaping equipment represents less than 1 percent of forecasted emissions generated by implementation of the 2020 LRDP Update. Electrifying equipment would effectively eliminate these emissions, achieving a less than 1 percent reduction in total PM10 emissions.

1.3 User Entered Comments & Non-Default Data

Land Use - Building square footages from UCD
Construction Phase - Phasing and schedule provided by UCD. Building construction phases with ongoing cut/fill were modeled as "site prep" to capture those emissions. All equipment modeled in a single phase (see equipment notes).

Off-road Equipment - A max of 15 pieces of equipment would operate daily. For the purposes of modeling, ICF selected the equipment with the highest emission rate for NOx and modeled in a single phase that would occur on each day of construction over the project duration.

Grading - Grading and c/f volumes provided by UCD
Demolition - Fleet Services Building

Trips and VMT - Trips provided by UCD. Assigned to the subphase that spans the full duration of the activity.

Architectural Coating - Calculated based on building GSF for the phases and CalEEMod User Guide (75%/25% interior/exterior; 2.0 times GSF coated for nonres; 2.7 times GSF coated res)

Construction Off-road Equipment Mitigation - PM reduction from SMAQMD CEQA Guidelines, page 3-9

UCD Aggie Square Construction (Vol 2) - Sacramento County, Annual

UCD Aggie Square Construction (Vol 2)
Sacramento County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	162.00	1000sqft	3.72	162,000.00	0
Research & Development	777.00	1000sqft	17.84	777,000.00	0
University/College (4Yr)	230.00	Employee	3.73	162,000.00	0
Enclosed Parking with Elevator	1,490.00	Space	13.41	549,996.00	0
Other Asphalt Surfaces	1.70	Acre	1.70	74,052.00	0
High Turnover (Sit Down Restaurant)	20.00	1000sqft	0.46	20,000.00	0
Apartments Low Rise	342.00	Dwelling Unit	21.38	243,500.00	913
Supermarket	20.00	1000sqft	0.46	20,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2024
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	590.31	**CH4 Intensity**	0.029	**N2O Intensity**	0.006

1.3 User Entered Comments & Non-Default Data

Land Use - Building square footages from UCD
Construction Phase - Phasing and schedule provided by UCD. Building construction phases with ongoing cut/fill were modeled as "site prep" to capture those emissions.

Off-road Equipment - Modeled annual equipment emissions based on total operating hours per equipment per phase over the phase duration. Assigned to the subphase that occurs throughout the entire duration of the activity.

Trips and VMT - Trips provided by UCD. Assigned to the subphase that spans the full duration of the activity.
Demolition - Fleet Services Building
Grading - Grading and c/f volumes provided by UCD

Architectural Coating - Calculated based on building GSF for the phases and CalEEMod User Guide (75%/25% interior/exterior; 2.0 times GSF coated for nonres; 2.7 times GSF coated res)

Construction Off-road Equipment Mitigation - PM reduction from SMAQMD CEQA Guidelines, page 3-9

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment
Replace Ground Cover
Water Exposed Area
Reduce Vehicle Speed on Unpaved Roads

3.2 Demolition - 2020

Unmitigated Construction On-Site

2023	287	0.03	0.00	288

Volume 2: Aggie Square Phase I

Construction Analysis

4. Adjustment factors applied to CalEEMod mitigated emissions to account for NOx, CO, and PM reductions from Mitigation Measure LRDP-AQ-2b (renewable diesel) and ROG reductions from Mitigation Measure LRDP-AQ-2c

Mitigation Adjustment Factors

CalEEMod "mitigated" output includes the following mitigation:

1. Dust control (LRDP-AQ-2a)
2. Tier 3 or 4 engines (LRDP-AQ-2b)

The following adjustment factors were applied to account for NOx, CO, and PM reductions from Mitigation Measure LRDP-AQ-2b (renewable diesel) and ROG reductions from Mitigation Measure LRDP-AQ-2c

Low VOC (LRDP-AQ-2c)

CalEEMod VOC g/L	100
Mitigated g/L	50
Reduction in VOC emissions	50%

Renewable Diesel (LRDP-AQ-2b)

	% reduction in emissions*		
Equipment Tier	NOx	CO	PM
Tier 3	10%	10%	30%
Tier 4	0%	0%	30%

UCD Aggie Square Phase 1 Operations - Sacramento County, Summer

UCD Aggie Square Phase 1 Operations
Sacramento County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	162.00	1000sqft	3.72	162,000.00	0
Research & Development	777.00	1000sqft	17.84	777,000.00	0
University/College (4Yr)	881.00	Student	3.72	162,000.00	0
Enclosed Parking with Elevator	1,490.00	Space	13.41	549,996.00	0
High Turnover (Sit Down Restaurant)	20.00	1000sqft	0.46	20,000.00	0
Apartments Low Rise	324.00	Dwelling Unit	20.25	243,500.00	865
Supermarket	20.00	1000sqft	0.46	20,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2024
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity	312	**CH4 Intensity**	0.028	**N2O Intensity**	0.003

1.3 User Entered Comments & Non-Default Data

Project Characteristics - RPS adjusted utility EFs
Land Use - Land use data from UCD
Vehicle Trips - Modeled in EMFAC using VMT from F&P
Woodstoves - No hearth
Energy Use - Electricity through Greenergy; only commerical (non-T24 cooking) natural gas
Water And Wastewater - Water from UCD. Modeled all in apartment category.

Health Risk Assessment

LRDP Methodology

The AERMOD model is a steady-state Gaussian plume model that was developed by EPA for estimating ground-level impacts from point, area, and fugitive sources in simple and complex terrain. Dispersion models such as AERMOD require local meteorological parameters such as wind speed, stability class, mixing height, and temperature. Hourly meteorological data previously developed by CARB from Sacramento Executive Airport covering a 5-year period from 2010 through 2014 were used in the analysis. Construction activities were modeled to occur Monday through Friday between 9 a.m. and 5 p.m. throughout the year.

The OEHHA-recommended range for analyzing the inhalation pathway is 0 to 1.8 meters. For the Project, all receptors were modeled at 1.8 meters. Receptors were placed at residences, hospitals, recreational areas, and schools surrounding and within the Plan site. The FASTAREA AERMOD option was used. All other AERMOD inputs are considered regulatory defaults.

LRDP construction equipment emissions are characterized as an area source (AREAPOLY), with a release height of 5.0 meters (Sacramento Metropolitan Air Quality Management District 2013). Haul truck emissions are characterized as a line/area source (LINEAREA) with a release height of 3.4 meters (U.S. Environmental Protect Agency 2015). A unitized emission rate of 1 gram per second is utilized for each AERMOD source. Each AERMOD area source corresponds to a specific anticipated construction area within the LRDP, and each construction area has a unique construction schedule. DPM concentration results are then scaled by the actual calculated emission rates by AERMOD source by construction year.

The risk calculations incorporate OEHHA's recent guidance update, which now includes age-specific factors that take into account increased sensitivity to carcinogens during early-in-life exposure. The approach to estimating cancer risk from long-term inhalation, with exposure to carcinogens, requires calculating a range of potential doses and multiplying by cancer potency factors in units corresponding to the inverse dose to obtain a range of cancer risks. For cancer risk, the risk for each age group is calculated using the appropriate daily breathing rates, age sensitivity factors, and exposure duration. The cancer risks calculated for individual age groups are summed over the 20-year construction period to estimate the cancer risk for each receptor.

For the residential and hospital receptors, the maximally exposed individual in the third trimester of pregnancy is conservatively assumed to be born in the first year of construction (2020) and exposed to 20 years of construction-related DPM, consistent with OEHHA and BAAQMD recommendations. However, each residential and hospital receptor location would be exposed to varying DPM concentrations over the 20-year construction period, depending on the receptor's proximity and orientation to each AERMOD source. Consequently, in order to definitively determine the maximally exposed individual to construction DPM concentrations, an unborn child in the third trimester pregnancy is assumed to be born in the second year of construction (2021) and subsequently exposed to 19 years of construction-related DPM. This process is then repeated for a child to be born in 2022, 2023, and so forth.

LRDP operational emissions are characterized as point sources (POINT) for labs, boilers, generators, and the Central Energy Plant gas turbine and line/area sources (LINEAREA) with a release height of 3.4 meters for diesel-fueled delivery trucks (U.S. Environmental Protect Agency 2015). The cancer risks calculated for individual age groups are summed over an exposure duration of 30 years to estimate the cancer risk for each receptor. Construction and operational health risks are compared separately to SMAQMD's health risk thresholds of significance.

Aggie Square Methodology

The AERMOD model is a steady-state Gaussian plume model that was developed by EPA for estimating ground-level impacts from point, area, and fugitive sources in simple and complex terrain. Dispersion models such as AERMOD require local meteorological parameters such as wind speed, stability class, mixing height, and temperature. Hourly meteorological data previously developed by CARB from Sacramento Executive Airport covering a 5-year period from 2010 through 2014 were used in the analysis. Construction activities were modeled to occur Monday through Friday between 9 a.m. and 5 p.m. throughout the year.

The OEHHA-recommended range for analyzing the inhalation pathway is 0 to 1.8 meters. For the Project, all receptors were modeled at 1.8 meters. Receptors were placed at residences, hospitals, recreational areas, and schools within 1,000 feet of the project site. The FASTAREA AERMOD option was used. All other AERMOD inputs are considered regulatory defaults.

LRDP construction equipment emissions are characterized as an area source (AREAPOLY), with a release height of 5.0 meters (Sacramento Metropolitan Air Quality Management District 2013). Haul truck emissions are characterized as a line/area source (LINEAREA) with a release height of 3.4 meters (U.S. Environmental Protect Agency 2015). A unitized emission rate of 1 gram per second is utilized for each AERMOD source. Each AERMOD area source corresponds to a specific anticipated construction area associated with Aggie Square, and each construction area has a unique construction schedule. DPM concentration results are then scaled by the actual calculated emission rates by AERMOD source by construction year.

The risk calculations incorporate OEHHA's recent guidance update, which now includes age-specific factors that take into account increased sensitivity to carcinogens during early-in-life exposure. The approach to estimating cancer risk from long-term inhalation, with exposure to carcinogens, requires calculating a range of potential doses and multiplying by cancer potency factors in units corresponding to the inverse dose to obtain a range of cancer risks. For cancer risk, the risk for each age group is calculated using the appropriate daily breathing rates, age sensitivity factors, and exposure duration. The cancer risks calculated for individual age groups are summed over the 28-month construction period to estimate the cancer risk for each receptor.

For the residential and hospital receptors, the maximally exposed individual in the third trimester of pregnancy is conservatively assumed to be born in the first year of construction (2020) and exposed to 28 months of construction-related DPM, consistent with OEHHA and BAAQMD recommendations.

Aggie Square operational emissions are characterized as point sources (POINT) for lab and generators and line/area sources (LINEAREA) with a release height of 3.4 meters for diesel-fueled delivery trucks (U.S. Environmental Protect Agency 2015). The cancer risks calculated for individual age groups are summed over a conservative exposure duration of 28 years to estimate the cancer risk for each receptor. Construction and operational health risks are summed together by receptor type and compared to SMAQMD's health risk thresholds of significance.
