Project Location – County: *San Diego*

Description of Nature, Purpose, and Beneficiaries of Project: *The proposed project would involve installation of a new cathodic protection system to prevent corrosion of onsite equipment by Jankovich (Applicant) in the City of San Diego, California. Work to specifically complete the proposed project would involve drilling ten (10)-inch (in) diameter holes for 10 anodes, excavation of a 300-foot (ft) long, 12-in wide, and 24-in deep trench for anode header cable and a 200-ft long, 12-in wide, and 24-in deep trench for negative cable, backfill of all excavations with native soil, and repair of two (2) asphalt walkways. The proposed project would be installed to reduce corrosion and protection of existing fuel storage and transmission facilities. Construction of the proposed project is anticipated to occur in winter 2019 and would take approximately three (3) days to complete.*

Due to its nature and limited scope, construction of the proposed project would generate a minor amount of vehicle trips and would require limited use of equipment. Therefore, impacts related to air quality, greenhouse gas emissions, and transportation and traffic are not anticipated to occur. Furthermore, the Applicant would be responsible for complying with all applicable federal, state, and local laws regarding construction demolition debris, hazards and hazardous materials, and stormwater.
