Re: Domestic Water Service to Vesting Tentative Parcel Map # 12251, containing **32.01 gross acres** located on the northeast corner of Panama Lane and Old River Rd.

Dear Patricia,

The above referenced parcel is within the service area of the City of Bakersfield Water Resources Department. City water service can be supplied contingent upon the property being within the City limits, and signature of the Domestic Water Service Agreement by the owner(s) of said property, and payment of the domestic water availability fees, 5% inspection fees, and \$10.00 per water meter set fees and \$490.00 per fire hydrant. Signing of the Domestic Water Service Agreement and payment of fees is to be made prior to **final** map recordation of any or all phases and associated gross acreage(s) of the property.

This is not to be considered as a "Will Serve Letter" but only as verification of property being within the City of Bakersfield owned, Cal Water operated water service area. The "Will Serve Letter" will be produced for **final** map requirements after signature of the Domestic Water Service Agreement by the property owner(s) and payment of all fees.

City of Bakersfield  
Water resources Department
