

### State Water Resources Control Board

Brenda Wey Franklin County Water District 2115 Drake Ave. Merced. CA 95348 Governor's Office of Planning & Research

MAR 04 2020 STATE CLEARINGHOUSE

Dear Ms. Wey:

IS/MND FOR FRANKLIN COUNTY WATER DISTRICT (DISTRICT); FRANKLIN COUNTY WATER DISTRICT WASTEWATER COLLECTION AND TREATMENT SYSTEM IMPROVEMENTS (PROJECT); MERCED COUNTY; STATE CLEARINGHOUSE NO. 2020029053

We understand that the District is pursuing Clean Water State Revolving Fund (CWSRF) financing for this Project (CWSRF No. C-06-8304-210). As a funding agency and a state agency with jurisdiction by law to preserve, enhance, and restore the quality of California's water resources, the State Water Resources Control Board (State Water Board) is providing the following information on the IS/MND to be prepared for the Project.

The State Water Board, Division of Financial Assistance, is responsible for administering the CWSRF Program (Program). The primary purpose for the Program is to implement the Clean Water Act and various state laws by providing financial assistance for wastewater treatment facilities necessary to prevent water pollution, recycle water, correct nonpoint source and storm drainage pollution problems, provide for estuary enhancement, and thereby protect and promote health, safety and welfare of the inhabitants of the state.

The Program is partially funded by the United States Environmental Protection Agency (USEPA) and requires additional "California Environmental Quality Act (CEQA)-Plus" environmental documentation and review. Two enclosures are included that illustrate the Program environmental review process including the additional CEQA-Plus federal requirements. For the complete environmental application package and instructions please visit:

http://www.waterboards.ca.gov/water\_issues/programs/grants\_loans/srf/srf\_forms.shtml. The State Water Board is required to consult directly with agencies responsible for implementing federal environmental laws and regulations. Any environmental issues raised by federal agencies or their representatives will need to be resolved prior to the State Water Board's approval of a CWSRF financing commitment for your proposed Project. For further information on the Program, please contact Mr. Brian Cary, at (916) 449-5624.

E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

It is important to note that prior to a CWSRF financing commitment, projects subject to provisions of the Federal Endangered Species Act (ESA), must obtain ESA, Section 7 clearance from the United States Department of the Interior, Fish and Wildlife Service (USFWS), and/or the United States Department of Commerce National Oceanic and Atmospheric Administration, National Marine Fisheries Service (NMFS) specific to any potential effects to special-status species.

Please be advised that the State Water Board will coordinate with the USEPA to consult with the USFWS, and/or the NMFS regarding all federal special-status species that the Project has the potential to affect if the Project is to be financed by the Program. The District will need to identify whether the Project will involve any direct effects from construction activities, or indirect effects such as growth inducement, that may affect federally listed threatened, endangered, or candidate species that are known, or have a potential to occur in the Project site, in the surrounding areas, or in the service area, and to identify applicable conservation measures to reduce such effects.

In addition, CWSRF projects must comply with federal laws pertaining to cultural resources, specifically Section 106 of the National Historic Preservation Act (Section 106). The State Water Board is responsible for ensuring compliance with Section 106 and is required to consult directly with the California State Historic Preservation Officer (SHPO). The SHPO consultation is initiated once sufficient information is provided by the CWSRF applicant. If the District decides to pursue CWSRF financing, please retain a consultant that meets the Secretary of the Interior's Professional Qualifications Standards (<a href="http://www.nps.gov/history/local-law/arch\_stnds\_9.htm">http://www.nps.gov/history/local-law/arch\_stnds\_9.htm</a>) to prepare a Section 106 compliance report.

Note that the District will need to identify the Area of Potential Effects (APE), including construction and staging areas, and the depth of any excavation. The APE is three-dimensional and includes all areas that may be affected by the Project. The APE includes the surface area and extends below ground to the depth of any Project excavations. The records search request should extend to a ½-mile beyond project APE. The appropriate area varies for different projects but should be drawn large enough to provide information on what types of sites may exist in the vicinity.

Other federal environmental requirements pertinent to the Project under the Program include the following (for a complete list of all federal requirements and instructions please visit

http://www.waterboards.ca.gov/water\_issues/programs/grants\_loans/srf/srf\_forms.shtml:

A. An alternative analysis discussing environmental impacts of the Project in either the CEQA document (i.e. Environmental Impact Report) or in a separate report (i.e. for projects utilizing a Negative Declaration or Mitigated Negative Declaration).

- B. A public hearing or meeting for adoption/certification of all CEQA documents except for those with little or no environmental impacts.
- C. Compliance with the Federal Clean Air Act: (a) provide air quality studies that may have been done for the Project; and (b) if the Project is in a nonattainment area or attainment area subject to a maintenance plan; (i) provide a summary of the estimated emissions (in tons per year) that are expected from both the construction and operation of the Project for each federal criteria pollutant in a nonattainment or maintenance area, and indicate if the nonattainment designation is moderate, serious, or severe (if applicable); (ii) if emissions are above the federal de minimis levels, but the Project is sized to meet only the needs of current population projections that are used in the approved State Implementation Plan for air quality, quantitatively indicate how the proposed capacity increase was calculated using population projections.
- D. Compliance with the Coastal Zone Management Act: identify whether or not the Project is within a coastal zone and the status of any coordination with the California Coastal Commission.
- E. Protection of Wetlands: identify any portion of the proposed Project area that should be evaluated for wetlands or United States waters delineation by the United States Army Corps of Engineers (USACE), or requires a permit from the USACE, and identify the status of coordination with the USACE.
- F. Compliance with the Farmland Protection Policy Act: identify whether or not the Project will result in the conversion of farmland. Identify the status of farmland (prime, unique, local or statewide Importance) in the Project area and determine if this area is under a Williamson Act Contract.
- G. Compliance with the Migratory Bird Treaty Act: list any birds protected under this act that may be impacted by the Project and identify conservation measures to minimize impacts.
- H. Compliance with the Flood Plain Management Act: identify whether or not the Project is in a Flood Management Zone and include a copy of the Federal Emergency Management Agency flood zone maps for the area.
- Compliance with the Wild and Scenic Rivers Act: identify whether or not any Wild and Scenic Rivers would be potentially impacted by the Project and include conservation measures to minimize such impacts.

### Following are specific comments on the District's draft IS/MND:

- 1. Please consider using prescriptive language such as shall/will instead of 'would/could/should/may' for mitigation measures. Some examples where this language can be changed include MM BIO-1, MM BIO-2, and MM BIO-4.
- 2. Which months and what times of day would project construction likely take place?

3. On page 3-24 of the Initial Study, it is noted that "The WWTF is located adjacent to Black Rascal Creek, but it is assumed that wastewater is not released into the creek because of potential contamination concerns." Please clarify if wastewater is being discharged into any creeks or nearby drainages or if there is potential for discharges in the future? Are there any measures in place to protect against accidental discharge?

Please upload to FAAST the following documents applicable to the proposed Project following the District's CEQA process: (1) one copy of the draft and final IS/MND, (2) the resolution adopting/certifying the IS/MND and making CEQA findings, (3) all comments received during the review period and the District's response to those comments, (4) the adopted Mitigation Monitoring and Reporting Program and (5) the Notice of Determination filed with the Merced County Clerk and the Governor's Office of Planning and Research, State Clearinghouse. In addition, we would appreciate notices of any hearings or meetings held regarding environmental review of any projects to be funded by the State Water Board.

Thank you for the opportunity to review the District's draft IS/MND. If you have any questions or concerns, please feel free to contact me at (916) 322-0355, or by email at <a href="Matthew.Metelitz@waterboards.ca.gov">Matthew.Metelitz@waterboards.ca.gov</a> or contact Brian Cary at (916) 449-5624, or by email at <a href="Brian.Cary@waterboards.ca.gov">Brian.Cary@waterboards.ca.gov</a>.

Sincerely,

Matthew Metelitz Environmental Scientist

### STATE WATER RESOURCES CONTROL BOARD,

### **DIVISION OF FINANCIAL ASSISTANCE**

### California Environmental Quality Act Requirements

The State Water Resources Control Board (State Water Board) Division of Financial Assistance (DFA) funds wastewater, recycled water, and drinking water infrastructure projects as well as water quality improvement projects using resources from various state grant programs. All applicants seeking grant funds must comply with the California Environmental Quality Act (CEQA) and provide appropriate documents to the State Water Board so that it can fulfill its CEQA responsibilities.

### LEAD AGENCY

The applicant is usually the Lead Agency and must prepare and circulate an environmental document before approving a project. Only a public agency, such as a local, regional or state government, may be the Lead Agency under CEQA. If a project will be completed by a non-governmental organization, Lead Agency responsibility goes to the first public agency providing discretionary approval for the project. In this situation, the State Water Board may serve as Lead Agency.

### RESPONSIBLE AGENCY

Typically, the State Water Board is a Responsible Agency. As a Responsible Agency, the State Water Board must make its own findings using information provided by the Lead Agency before funding a project.

### STATE WATER BOARD RESPONSIBILITIES

The State Water Board's mission is to preserve, enhance, and restore the quality of California's water resources and drinking water for the protection of the environment, public health, and all beneficial uses, and to ensure their proper allocation and efficient use for the benefit of present and future generations. To fulfill this responsibility, and to carry out obligations as a Responsible Agency under CEQA, the State Water Board must consider the Lead Agency's environmental document before funding a project.

### **ENVIRONMENTAL REVIEW**

The State Water Board's environmental review process must be completed before the State Water Board can approve a project for funding and the project can begin construction.

### **DOCUMENT REVIEW**

The State Water Board would like to review CEQA documents as early as possible. Applicants are encouraged to consult with agency staff during development of CEQA documents if considering applying for funding from DFA. Potential applicants should consider sending their environmental documents to DFA, Environmental Section during the CEQA public review period. This way, any environmental concerns the State Water Board has about the project can be addressed early in the process.

### **REQUIRED DOCUMENTS**

The Environmental Section within DFA requires the documents listed below to complete the environmental review:

- Draft and Final Environmental
   Documents Environmental Impact
   Reports, Negative Declarations,
   Mitigated Negative Declarations, Notice
   of Exemptions, as appropriate for the
   project;
- All comments that were received during the public review period and the Lead Agency's responses to those comments;
- 3. Adopted Mitigation Monitoring and Reporting Plan this is separate from, and in addition to, the identification of mitigation measures in the CEQA document;

- 4. Resolution/Minutes these document that the applicant adopted or certified the CEQA document, made CEQA findings, and approved the project;
- 5. Date-stamped copy of the Notice of Determination or Notice of Exemption these result after filing of the document with the County Clerk and the Governor's Office of Planning and Research; and
- 6. Completed Environmental Package this is a component of the Funding Application.

Once the State Water Board receives all the required documents and determines them to be adequate to make its own findings, the environmental review for the funding application will be completed.

### **CONTACT INFORMATION**
