## **Summary Form for Electronic Document Submittal**

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

	State Route 1 (SR 1); Post Mile (PM) 22.8 to PM 33.0 a		Marin
Project Location	City	County	

Project Description (Proposed actions, location, and/or consequences).

The Project proposes to repair 27.8 noncontinuous lane miles of SR 1, and is divided into two portions. The southern portion is located between PM 22.8 and PM 33.0. The northern portion is located between PM 45.0 and PM 50.5. The southern portion spans from Five Brooks to north of Point Reyes Station in unincorporated Marin County. The northern portion spans from the town of Tomales to the Marin-Sonoma County line. The Project includes upgrades to existing SR 1 infrastructure, including pavement rehabilitation, curb ramp upgrades in the communities of Point Reyes Station and Tomales (to meet American with Disabilities Act standards), replacement of guardrails and crash cushions, upgrading of drainage inlets, and replacement of aging culverts. The Project would also include improvements to crosswalks and signage in Point Reyes Station, and improvements to sidewalks in the town of Tomales.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Tree removal may be required at multiple culvert replacement locations. Riparian trees removed as a result of this Project would be replaced onsite at a 3:1 replanting ratio, upon completion of project construction. (Mitigation Measure BIO-1)

The Project would have temporary direct impacts to the following Environmentally Sensitive Habitat Areas: approximately 0.48 acre of riparian habitat, 0.11 acre of wetlands, and 0.13 acre of waters. Impacts would result from construction activities related to culvert replacement, temporary creek diversion system, metal beam guardrail replacement, shoulder backing, and stormwater treatment areas. Mitigation for temporary impacts to wetlands and waters within the California Coastal Zone will be accomplished through onsite restoration, upon completion of Project construction. (Mitigation Measures BIO-2)
