## **Summary Form for Electronic Document Submittal**

SCH #:

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

landscaping and habitat restoration/fuer modificatio	n on the north-lacil	ig slope of Fuerco Can	yon.
madi limadik limadi			

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project is not anticipated to have a significant impact.

The proposed buildings would occur entirely within the existing, required fuel modification areas of surrounding existing buildings and are located within the footprint of the existing modular buildings and previously approved but unbuilt administration building. The proposed development is not located within a stream or wetland. The project would maintain a 29-foot setback from oak-sycamore woodland as established by a previous approval. The proposed project also includes a habitat restoration component that would occur directly in the nearby stream wherein the replacement of non-native, invasive giant reed stand with native species would be accomplished.

The initial study identified potential impacts to biological resources, cultural resource, geology/soil, noise, transportation and mandatory findings of significant but were considered less than significant with mitigation measures. Mitigation measures include habitat restoration and jurisdiction permitting for the removal of the reed, surveys for special-status plants prior to construction, employee training, archaeological and paleontological monitoring during grading, construction noise control, and construction and special event parking program.
