Subject: Phase I Environmental Site Assessment
Proposed Retail Complex
3145 W. Stetson Avenue
APN 460-150-015
Hemet, California

At your request, Sladden Engineering has completed this Phase I Environmental Site Assessment for the proposed retail complex. The *property* (identified as APN 460-150-015) is located at 3145 West Stetson Avenue in the City of Hemet, Riverside County, California.

This report was prepared to stand as a whole and no part should be excerpted or used in exclusion of any other part. The activities conducted have been in accordance with our proposal dated September , 2017 This report completes our Phase I scope of services as outlined in our agreement. We appreciate this opportunity to be of service. If you have any questions regarding this report or the information contained herein, please contact the undersigned at your convenience.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the *property*. We have developed and generally performed *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted,
Sladden Engineering

1.0 INTRODUCTION

This Phase I *environmental site assessment* has been conducted at the request of Mr. Mark Cooper with Page Plaza Partners, LLC.

1.1 Purpose

This report presents the findings of the Phase I Environmental Site Assessment (ESA) conducted for the future parking lot proposed for the *property* (identified as APN 460-150-015) located at 3145 West Stetson Avenue in the City of Hemet, Riverside County, California. The approximate location of the site is indicated on the Site Location Map, Figure 1.

The intent of this investigation was to evaluate areas of potential environmental concern that may be present as a result of past hazardous materials use, handling or storage on or near the *property* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and *petroleum products* for a parcel of *commercial real estate*. This ESA is also intended to permit the *user* to satisfy one of the requirements to qualify for the *landowner liability protection* (LLP) that is, the practice that constitutes "all appropriate inquiry" (AAI) defined at 40 Code of Federal Regulations Part 312.

1.2 Detailed Scope-of-Services

The scope of Phase I ESA work performed herein generally conforms with American Society for Testing and Materials (ASTM) Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and has consisted of a records review, site reconnaissance, interviews, and the preparation of this report. An evaluation of *business environmental risks* and testing of building materials, air, or groundwater is beyond the scope of this report. For reference, the italicized terms presented herein are consistent with those defined in ASTM Standard E1527-13, Section 3, Terminology.

Included in this report is a Site Location Map (Figure 1) and Site Plan (Figure 2). Photographs of the *property* (Appendix A) document the general site features and conditions as observed during site visit on September 26, 2017. For regulatory and agency database information, Environmental Data Resources, Inc. (EDR) was retained. A copy of their report is attached as Appendix B. Relevant and readily available historical records are provided in Appendix C as reference.

There are no *Special Contractual Conditions* between *user* and *environmental professional* for this assessment.

1.3 Significant Assumptions

This environmental assessment and report generally meet the November 1, 2013, ASTM Standard E1527-13. As specified under this standard, certain responsibilities lie with the *user* of the assessment. The *user* is generally the purchaser, owner, lender, property manager, or potential tenant. Under the ASTM standard, it is the responsibility of the *user* to engage a title company or title professional to undertake a review of *Environmental Liens or Activity and Use Limitations (AULs)* with regard to the *property*, and provide this information to the *environmental professional* preparing the assessment. Additionally, the *user* must make the professional aware of any specialized knowledge or experience that is material to *Recognized Environmental Conditions* in connection with the property. Where and when provided, information provided in this regard is presented in the records review section of this report.

"*Recognized Environmental Conditions*" are defined by ASTM as follows: "The presence or likely presence of any Hazardous Substances or Petroleum Products on a Property under conditions that indicate an existing release, a past release, or a material threat of a release of any Hazardous Substances or Petroleum Products into structures on the Property or into the ground, groundwater or surface water of the Property. The term includes Hazardous Substances or Petroleum Products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

2.0 SITE DESCRIPTION

A description and general *property* information is summarized in this section.

2.1 Location and Legal Description

Latitude (North)	33.728657 - 33° 43′ 43.1652″
Longitude (West)	117.003798 - 117° 0′ 13.6728′′
Elevation (mean sea level)	1531 feet above sea level
Assessor Parcel Number (APN)	460-150-015
Approximate Property Size	2.27 Acres

The rectangular shaped *property* is located at 3145 West Stetson Avenue in the City of Hemet, California. Figure 1 shows the location of the *property* relative to the general site vicinity.

2.2 Geology & Hydrogeology

The *property* is located within the Peninsular Ranges Physiographic Province of California. The Peninsular Ranges are mountainous areas that extend from the western edge of the continental borderland to the Salton Trough and from the Transverse Ranges Physiographic Province in the north to the tip of Baja California in the south. The Peninsular Ranges Physiographic province is characterized by elongated, northwest-southeast trending mountain ranges and valleys and is truncated at its northern margin by the east-west grain of the Transverse Ranges. Mountainous areas of the Peninsular Ranges Physiographic Province generally consist of Igneous, metasedimentary and metavolcanic rocks.

Groundwater characteristics in the area of the *property* are governed by the features of the San Jacinto Groundwater Basin that underlies San Jacinto, Perris, Moreno Valley and Menifee Valleys. The basin is bound by San Jacinto Mountains to the north, San Timoteo Badlands to the northeast, the Box Mountains to the north and the Santa Rosa Hills and Bell Mountain to the south. The basin is transected by the San Jacinto fault zone creating groundwater barriers. The basin is primarily recharged through percolation in the San Jacinto River and associated tributaries (CGB, 2006)

The EDR report provides a physical setting source addendum (GeoCheck). The *property* is located at an elevation of approximately 1531 feet above sea level. The topography generally increases in elevation to the east. The EDR report searched for specific hydro-geologic information maintained by EDR within a 1.25-mile radius from the *property*; however, no specific information was found. Near surface soil in the general area is described as fine sandy loam, silt loam, and loamy fine sand. The soil types are described as having moderate infiltration rates.

The EDR report also searched for public water systems and water wells known to the United States Geological Survey (USGS) and State of California within a one-mile radius of the *property*. 12 wells were found within 1 mile of the *property*. In addition there is an abandoned well on the property. Groundwater levels are report at depths of between 151.04 and 208.8 feet.

3.0 USER PROVIDED INFORMATION

A site plan showing the future development proposed for the *property* was provided by Mr. Mark Cooper with Page Plaza Partners, LLC and is included as Figure 2.

The *user* has no knowledge, or information, of *Environmental Liens or Activity and Use Limitations (AULs)* relating to the *property*.

4.0 RECORDS REVIEW

This section covers agency records and readily available and public documents from standard sources.

4.1 Regulatory Records

To identify reported areas of possible environmental impairment on or within a 1.0-mile radius of the *property*, an "Environmental Database Report" was obtained from EDR (Appendix B). This report includes information from the following agencies:

- California Department of Health Services (CDHS)
- California Environmental Protection Agency (Cal EPA)
- California Integrated Waste Management Board (CWMB)
- California Water Resources Control Board (WRCB)
- California Office of Health Services (CDHS)
- Regional Water Quality Control Board - Colorado River Region 9
- U.S. Environmental Protection Agency, Region 9 (EPA)
- County of Riverside Department of Public Health

The databases reviewed include:

Federal Records

- National Priority List (NPL)
- Proposed National Priority List (Proposed NPL)
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
- CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP)
- Corrective Action Report (CORRACTS)
- Resource Conservation and Recovery Information System (RCRIS)
- Emergency Response Notification System (ERNS)
- Biennial Reporting System (BRS)
- Superfund (CERCLA) Consent Decrees (CONSENT)
- Records of Decision (ROD)
- National Priority List Deletions (Delisted NPL)
- Facility Index System/Facility Identification Initiative Program (FINDS)
- Hazardous Materials Information Reporting System (HMIRS)

- Material Licensing Tracking System (MLTS)
- Mines Master Index Files (MINES)
- Federal Superfund Liens (NPL LIENS)
- PCB Activity Database System (PADS)
- RCRA Administrative Action Tracking System (RAATS)
- Toxic Chemical Releases Inventory System (TRIS)
- Toxic Substances Control Act (TSCA)
- FIFRA / TSCA Tracking System (FTTS INSP)
- FIFRA / TSCA Tracking System (FTTS)

California Records

- Annual Workplan Sites (AWP)
- Calsites Database (CAL-SITES)
- California Hazardous Material Incident Report System (CHMIRS)
- Cortese Hazardous Waste & Substances Sites List (CORTESE)
- Proposition 65 Records (NOTIFY 65)
- Toxic Pits Cleanup Act Sites (TOXIC PITS)
- Solid Waste Information System (SWIS)
- Waste Management Unit Database (WMUDS/SWAT)
- Leaking Underground Storage Tank Information System (LUST)
- Bond Expenditure Plan (CA BOND EXP. PLAN)
- Active UST Facilities (UST)

A review of the EDR list indicates nine (9) sites within approximately 1-mile of the *property*.

The site identified as Walmart #1853 located at 1101 South Sanderson Avenue is listed within the Resource Conservation and Recovery Act Large Quantity Generator (RCRA-SQG) database and within the Aboveground Storage Tank (AST) database. No violations are reported and the site should not have a significant environmental impact on the *property* based on distance.

The Walgreens #1081 is listed within the Resource Conservation and Recovery Act Conditionally exempt small quantity generators (RCRA-CESQG) database. No violations are reported. The site should not have a significant environmental impact on the *property* as a small quantity hazardous waste generator.

Three (3) sites identified as Middle School Site, Ryan Aircraft School and Harmony AKA Cawston are listed within the ENVIROSTOR database. The Middle School Site is listed as "no further action". The Ryan Aircraft School is listed as "inactive – needs evaluation". The Harmony AKA Cawston site is listed as "no further action". Based on distance, the sites should not have a significant negative environmental impaction on the subject *property*.

The Kurt E. Mikolaykik site is listed within the Leaking Underground Storage Tank (LUST) and HIST CORTESE databases. This HIST CORTESE database has not been updated since 2001. The site is listed as "case closed" in the LUST databased and should not have a significant negative environmental impact on the *property* based on distance.

The Just 4 Fun 76 site is listed within the Underground Storage Tank (UST) database. The site should not have a significant environmental impact on the *property* base on distance.

The Earthwize Recycling facility is listed within the SWRCY database. The site is not expected to have a significant negative environmental impact on the *property* as a recycling facility.

The EDR report lists the adjacent property to the west (identified as McCrometer Inc. located at 3255 West Stetson Ave) in the Waste Discharge System (WDS), Facility Index System (FINDS), Enforcement and Compliance Online (ECHO), historic underground storage tank (HIST UST), hazardous waste manifests (HAZNET), toxins and criteria pollutant emissions (EMI), NPDES, Toxic Chemical Release Inventory System (TRIS), and RCRA-LQG and databases. The WDS database lists facilities permitted for water

discharges through the Regional Water Quality Control Board (RWQCB), similar to the NPDES listing. The property is considered a minor threat to water quality based on site operations and accepted low complexity treatment approaches. No violations are indicated under WDS. The FINDS database inventories facilities monitored or regulated by the USEPA. Together with the ECHO database, this covers USEPA monitored or regulated facilities. Under ECHO, there are no violations in the last 12-quarter history for the property. The McCrometer facility installed a 3,000-gallon, single-walled UST in 1979 for waste oil (and later unleaded fuel) storage. This tank has been removed. Review of the HAZNET records show disposal and recycling as the facility's means of waste disposal. The McCrometer facility is registered with the South Coast Air Quality Management District and is listed in the EMI database. Similarly, the TRIS database reports emissions from this facility and indicates annual fugitive air release of chromium (0.64 pounds), cobalt (27.69 pounds), manganese (23.70 pounds), nickel (100.39 pounds), copper (52.77 pounds) and lead (0.83 pounds). The database listings for the property should not pose a significant environmental concern in the absence of reported violations.

None of the sites included on the Orphan list are considered to have significant impact on the *property*.

4.2 Sanborn Fire Insurance Maps

The *property* is an unmapped location.

4.3 Aerial Photographs

To identify past uses that may have had an environmental impact on the *property* or surrounding areas, a collection of historical aerial photographs were reviewed. Photographs from 1949, 1953, 1961, 1967, 1978, 1985, 1989, 1996, 2002, 2005, 2006, 2009, 2010, and 2012 were readily available for review (copies are included in Appendix C for reference). The following summaries are interpretive, and are valid only for the dates flown.

1949- The *property* has structures on it that appear to be a farmhouse and some outbuildings. The surrounding area is cropland with pockets of farmhouses and outbuildings. W Stetson Avenue borders the property on the north and appears to be gravel. (USDA, 1949).

1953- The *property* and surrounding area appear mostly unchanged from the previous photograph (USDA, 1953).

1961- The *property* and surrounding area appear mostly unchanged from the previous photograph (USDA, 1961).

1967- One additional building has been built on the *property* in the center north. On the adjacent property to the west two buildings have been built, they appear to be a house and a large shop or barn. West Stetson appears to be paved. The surrounding area remains unchanged (USDA, 1967).

1978- The center north building on the *property* appears to have been expanded. The adjacent property to the west the two buildings from the previous photograph have been demolished and they have been replaced with three large commercial/industrial buildings, two smaller buildings and parking. There are about forty cars and one tractor-trailer parked around the buildings. A building has been built in the field jus to the south of the *property*. There is a housing

development and golf course located to the southeast. There are several commercial/industrial areas located to the northwest (USDA, 1978).

1985- The *property* appears mostly unchanged from the previous photograph. Some of the older buildings on the adjacent property to the west have been demolished. Another large commercial industrial building has been added west of the other buildings on the adjacent property. Two of the smaller buildings have been demolished and have been replaced by a larger building and parking has been consolidated on the adjacent property to the west. The building to the south of the *property* has been demolished. More commercial/industrial property has been added to the northwest of the *property* (USDA, 1985).

1989- The *property* appears mostly unchanged from the previous photograph. There are new housing developments visible to the northeast and southwest (USDA, 1989).

1996- The *property* appears mostly unchanged from the previous photograph. There is more housing visible to the northeast. South Sanderson to the west of the *property* has been paved (USGS, 1996).

2002- The *property* appears mostly unchanged from the previous photograph. The property to the west has expanded into a formerly empty lot east of South Sanderson. More houses have been built to the north, northeast and southwest (USGS/DOQQ, 2002).

2005- The *property* appears mostly unchanged from the previous photograph. A large commercial/industrial complex has been built just across from Sanderson to the west. A housing development is under construction to the south (USDA/NAIP, 2005).

2006- The *property* appears mostly unchanged from the previous photograph. The housing complex to the south has been completed (USDA/NAIP, 2006).

2009- The *property* and surrounding area appear mostly unchanged from the previous photograph (USDA/NAIP, 2009).

2010- All of the buildings south of the two buildings on the northern boundary of the *property* have been demolished. The surrounding area appears mostly unchanged from the previous photograph (USDA/NAIP, 2010).

2012- The *property* and surrounding area appear mostly unchanged from the previous photograph (USDA/NAIP, 2012).

4.4 Topographic Maps

Sladden Engineering retained EDR to provide historical topographic maps prepared by the USGS for the site vicinity. Historical topographic maps were available for the years 1901, 1942, 1943, 1947, 1953, 1956/1957, 1973, 1979, 1996, and 2012. The EDR Historical Topographic Map Report is included in Appendix C.

1901 - The *property* appears to be mapped as undeveloped land. Numerous roads are mapped in the vicinity including West Stetson Avenue and South Sanderson Avenue. Railroad tracks are mapped to the northwest of the *property*.

1942 - The *property* remains mostly unchanged from the previous map. The property to the west has a couple of buildings mapped on it. New streets and structures are mapped in the vicinity.

1943 - A structure is mapped on the *property*. The surrounding area remains mostly unchanged from the previous map.

1947 - The *property* and surrounding area remain mostly unchanged from the previous map.

1953 - The *property* remains mostly unchanged from the previous map. Ryan airfield is mapped to the northwest of the *property* past the railroad tracks. Fuel tanks are mapped to the northwest of the *property* across W Stetson and S Sanderson.

1956/1957 - The portion of the map containing the *property* is unmapped. The surrounding area remains mostly unchanged from the previous map.

1973 - More structures are mapped on the *property.* Housing developments are mapped to the northeast and southwest of the *property*. Larger buildings are mapped to the northwest of the *property*. Ryan Airfield is more developed.

1979- The *property* remains mostly unchanged from the previous map. Additional and larger structures are mapped on the property to the west. More houses are mapped to the southeast of the *property*.

1996- The *property* is in the unmapped portion. The surrounding area remains mostly unchanged from the previous map.

2012- This map shows no structures on the *property* or the surrounding area. The map only shows roads. There are more roads in the vicinity of the property from the previous map.

4.5 City Directory Image Report

Sladden retained EDR to provide a historical city directory search for the *property* and nearby properties. The city directories identify individuals and businesses by street address. EDR obtained information from city and telephone directories from 1975 to 2013. The EDR City Directory Image Report is included in Appendix C.

4.6 Title Records

Title records were not provided by the client and therefore were not reviewed as a part of this assessment.

5.0 SITE RECONNAISSANCE

The *property* was visited by Mr. Matt Cohrt on September 26, 2017 to observe the general site conditions and adjacent land use relative to this assessment and to photo-document the general findings. The following observations were made:

The *property* is located approximately 1000 feet to the west of the intersection of West Stetson Avenue and South Sanderson Avenue in the City of Hemet, California. It is a rectangular shaped property on the south side of West Stetson Avenue The *property* consists of approximately 2.27 acres and is formally identified by the County of Riverside as APN 460-150-015. The *property* is vacant land that formerly had a small farm on it with a house and outbuildings. Trees and shrubs are located along the northern boundary of the *property* along with a wrought iron fence and several gates. A short sidewalk leads from the street sidewalk to the fence. A power pole supporting the property to the east is located in the northeast corner of the property. An abandoned power pole is located approximately 150 feet south of the northern border and 55 feet west of the eastern border. This power pole appears to have supported an abandoned well near the power pole. The rest of the *property* is fairly flat and covered with native grasses and weeds.

The *property* is bounded by West Stetson Avenue to the north, an RV storage unit to the east, a residential development to the south and the McCrometer property to the west.

The following key observation was made during our site walk across the property.

- Abandoned well as described above

The following utilities are available and will likely service the general area.

Potable Water Supply – Eastern Municipal Water District
Sewage Disposal System – Waste Management
Electricity – Southern California Edison
Natural Gas – Southern California Gas
Telephone – Verizon and AT&T

6.0 INTERVIEWS

Interviews with the Owners and Local Government Officials are summarized below.

Interviews with Owners

Based on discussions with Ms. Kathie Purkey (Holland Familty Trust), the *property* has been consecutively owned by the Holland family for more than 50 years. Previous development at the *property* included two (2) houses and a barn. The property was utilized as a residential property that included a Christmas tree farm that extended partially onto the adjacent (west) McCrometer property. A private septic system was previously on the property but has since been removed. A private domestic water well was previously located on-site but has been abandoned. Ms. Purkey is unaware of any past environmental issues associated with the *property*.

Interviews with Local Government Officials

The Santa Ana Regional Water Quality Control Board, Santa Ana Region (RWQCB) is the local environmental oversight agency responsible for site contamination or activities relating to hazardous substances and hazardous waste sites. Because the *property* was not listed on any of the environmental agency databases reviewed, agency would not be expected to have information regarding the presence or absence of adverse or negative environmental conditions at the site. Past interviews with staff from these agencies confirm they do not have unpublished information relating to adverse or negative environmental conditions at sites not listed in environmental databases.

7.0 FINDINGS / OPINION / CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard E-1527-13 for the site identified as APN 460-150-015 located at 3145 West Stetson Avenue in the City of Hemet, California. Any exceptions to, or deletions from, this practice are described in Section 8 of this report. This assessment has revealed no evidence of any Recognized Environmental Condition in connection with the property.

Indoor air quality is specifically listed as a non-scope consideration under Section 13.1.5.7 of ASTM Standard E1527-13. However, *Environmental Professionals* cannot eliminate vapor migration screening from the ASTM Standard E1527-13 Phase I ESA scope of work as this would result in the Phase I ESA being non-AAI compliant. ASTM has released ASTM Standard E2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The Guidance is directed at identifying the likelihood for migrating vapors to encroach onto a target property creating a Vapor Encroachment Condition (VEC). The potential findings of the ASTM Standard E2600-10 screening are the following:

1) A VEC exists or is likely to exist; or,

2) A VEC can be ruled out because it does not exist or is not likely to exist.

ASTM Standard E2600-10 is a two Tier process. Tier 1 focuses on known or suspected contaminated properties identified during the Phase I ESA within an Area of Concern (AOC) about the target property. For volatile and semi-volatile organic compounds (VOCs and SVOCs), such as dry cleaning chemicals and industrial solvents, the AOC is defined as 1/3 mile. For petroleum hydrocarbon chemicals such as gasoline the AOC is defined as 1/10 mile. The AOC can be shortened in the down- and cross-gradient directions if the groundwater flow direction is known. A VEC might exists at the property based on the observed petroleum staining larger than housekeeping losses on the unpaved ground.

Tier 2 focuses on contaminant plumes from contaminated properties identified within the AOC and their proximity (critical distance) to the target property. The critical distance is 100 feet for VOCs and 30 feet for petroleum hydrocarbons. A VEC from these sites can be ruled out because it does not exist or is not likely to exist.

8.0 DEVIATIONS

Historical aerial photographs, maps, and other records pre-dating 1901 were not readily available and reasonably ascertainable through standard historical sources and therefore not reviewed as part of this Phase I ESA.

A 50-year chain-of-title review could help identify *environmental liens or activity use limitations (AULs)*. This report, if provided by the *user*, will be reviewed and this report amended in the event *environmental liens or AULs* are identified during the search.

9.0 ADDITIONAL SERVICES

Non-scope considerations listed in ASTM E1527-13 Sections 12.9 and 13 are not part of this report. These optional assessments cover such issues as: business environmental risks, asbestos, radon, lead-based paint, lead in drinking water, etc.

10.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experienced to assess a property of the nature, history, and setting of the *property*. We have developed and generally performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Summary qualifications of the individuals who conducted this Phase I ESA and prepared this report are presented below. Their *curriculum vitae* detailing relevant experience are available on request.

Matt Cohrt is a Professional Geologist and Certified Engineering Geologist with over 14 years experience in geotechnical and environmental consulting. Matt holds a Bachelor of Science Degree in Geology and has performed dozens of assessments and investigations throughout California.

Brett Anderson is a California Registered Civil Engineer with over 30 years experience in civil and environmental engineering. Brett holds a Masters Degree in geotechnical engineering and has been involved with the preparation of hundreds of Phase I ESAs throughout Southern California.

13.0 LIMITATION AND EXCEPTIONS / USER RELIANCE

This assessment applies to the *property* in the City of Hemet, Riverside County, California. The conclusions and recommendations rendered in this report are opinions based on readily available and reasonably ascertainable information obtained to date within the scope of work authorized by the client. Use of or reliance on the information and opinions contained in this letter by other parties without consulting this office is at those parties own risk.

It should be noted that any level of assessment cannot ascertain that a property is completely free of chemical or toxic substances; therefore, Sladden Engineering cannot offer the certification of a "clean" property. We believe the scope of work performed has been appropriate to allow an owner, prospective buyer, or seller to make an informed business decision.

The results contained in this report are based upon the information acquired during our assessment. It is possible that variations could exist beyond or between points explored during the course of the investigation. Also, changes in conditions found could occur at some time in the future due to contaminant migration, variations in rainfall, temperature, and/or other factors not apparent at the time of the field investigation.

The services performed by Sladden Engineering have been conducted in a manner consistent with the level of care and skill ordinarily exercised by members of our profession currently practicing under similar conditions in this region. No other warranty is expressed or implied.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

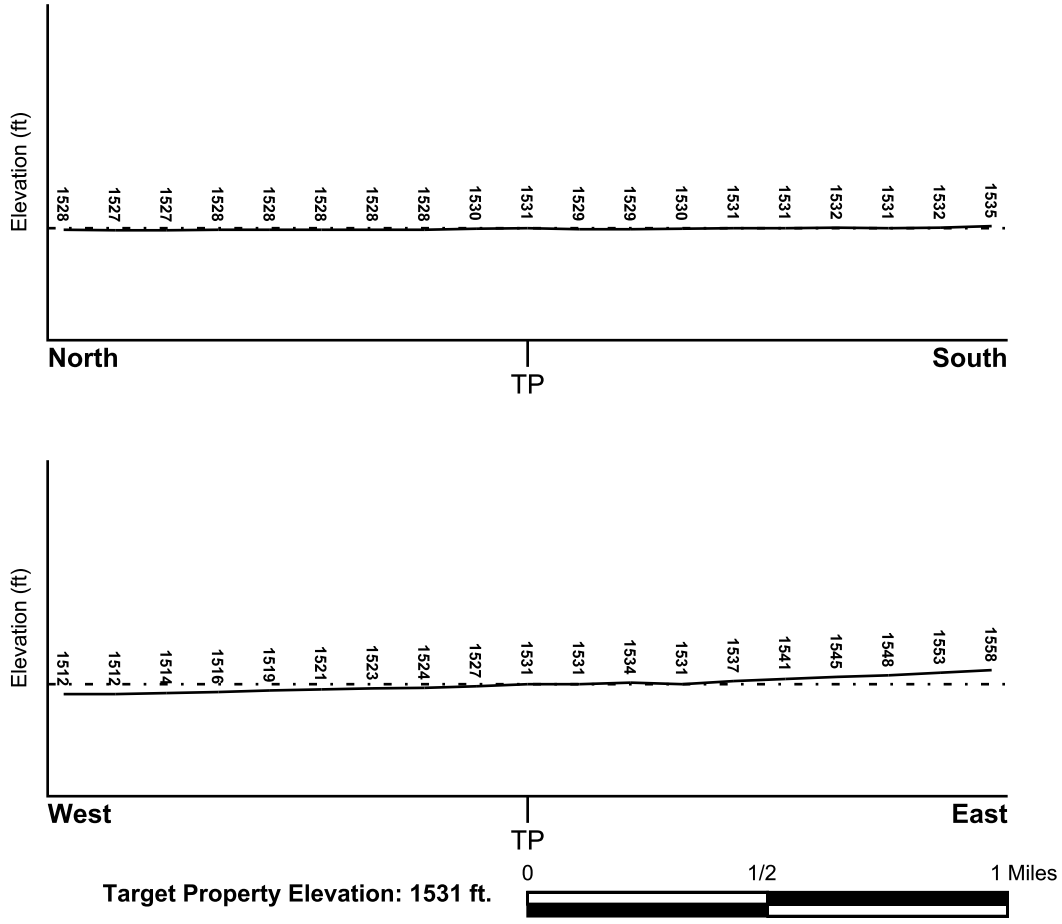
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information. . . . . Page 14

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information. . . . . Page 9

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information. . . . . Page 36

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HIST UST: Hazardous Substance Storage Container Database
Source: State Water Resources Control Board
Telephone: 916-341-5851
The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 07/26/2001
Date of Next Scheduled Update: Not reported

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2015
Database Release Frequency: Annually
Date of Last EDR Contact: 10/10/2017
Date of Next Scheduled Update: 01/22/2018

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Proterra Consulting Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.
