ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

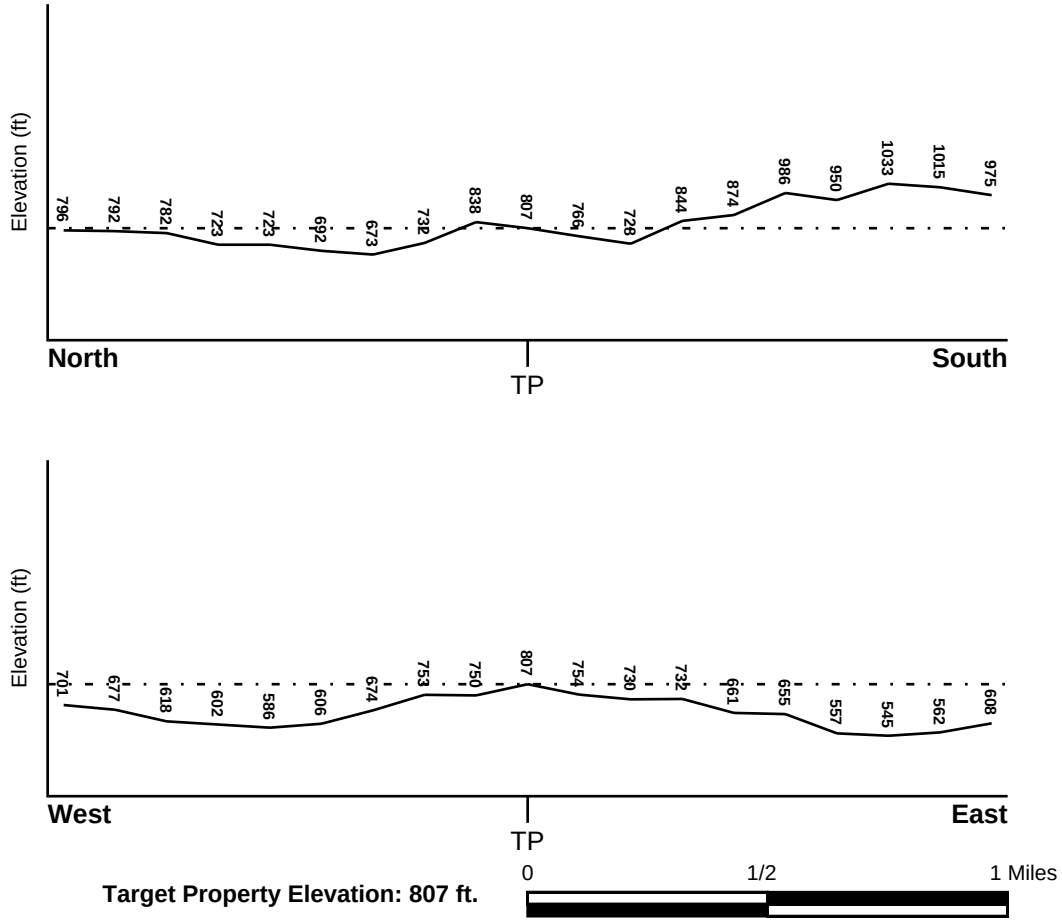
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 807 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 2640 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Permit for Underground Storage Tank Construction/Closure

SITE NAME: Carmel MT. Ranch Country Club
SITE ADDRESS: 14050 Carmel Ridge, San Diego, CA, 92128
OWNER NAME: Cobblestone
OWNER ADDRESS: SAME

DESCRIPTION OF PROPOSED WORK: **Remove one Underground storage tank(s) and all associated product piping**

PERMIT CONDITIONS:

For tank systems that are to be removed, the excavation shall be exposed prior to the scheduled inspection and sampling points identified by the Site Assessment and Mitigation Division (SAM) inspector. Sampling is required for both tank(s) and piping. The tank(s) and piping must remain in the excavation until the SAM inspector approves the removal.

Please Note:

1) All product piping and underground storage tanks must be removed at the same time. Failure to do so will result in a re-inspection and $300.00 re-inspection fee.

Please be advised:

All underground storage tanks that are to be removed or closed in place must be cleaned and properly inerted prior to the removal

1) The tanks are visually free from all product, sludge, rinsate and debris. Residual staining caused by soil and waste consisting of light shadows, slight streaks, or minor discoloration's, and soil and waste in cracks, crevices and pits may be present.

2) Tanks that held a Hazardous material or hazardous waste that had the potential to generate flammable vapors, must be properly inerted. A combustible gas indicator (CGI) which is properly calibrated shall be used to measure the concentration of flammable vapor at the top, center and bottom of the underground storage tank. The concentration of flammable vapor must be below twenty percent of the Lower Explosive Limit (LEL) for the material that was contained in the tank(s) and the oxygen concentration shall be the same as that of ambient air, approximately 20.8%. The underground storage tank(s) must inerted with dry ice using a minimum of 15 pounds for every 1000 gallons of tank capacity.

3) Failure to have the tank properly cleaned prior to the time of the removal will result in the cancellation of the removal and will require a re-inspection and $300.00 re-inspection fee.

This office must be given at least 48 hours notice for all required Underground Storage Tank Activity. Please contact the Site Assessment and Mitigation Division, Plan Check desk at (619) 338-2214 to schedule or cancel inspections.

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS

Submit one (1) original and two (2) copies of this application package, including plan drawings with the required fee to the Department of Environmental Health, Site Assessment and Mitigation Division (SAM). 1255 Imperial Avenue, San Diego, CA 92101. Or mail to P. O. Box 85261, San Diego, CA 92186-5261. **Checks should be made payable to the County of San Diego.**

A permit will be issued by SAM upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in the application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit is issued.

Once the permit has been issued, it is the responsibility of the permittee to notify SAM at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III, IV, & V).

SAMPLING PROTOCOL Tank owner/authorized representative responsible for all sampling analyses and associated costs.

- for tank systems that are to be removed. The excavation shall be exposed prior to the scheduled inspection and sampling points identified by the SAM inspector. Sampling is required for both tank and piping. The tank and piping must remain in the excavation until the SAM inspector approves the removal.

- tank systems to be closed in place. Submit an alternate plan which must include soil sampling, reason for closing the tank system in place and type of material to be used to fill the tank. Soil sampling and/or hydrostatic testing is also required for piping closures. Tank system closure in place will only be considered after evaluating the risks and hazards if the tank system were removed.

G. DISPOSAL SITE OF TANK: LEES IRON & STEEL 1715 LEE AVE VISTA

Note: You must inform SAM of the address of where the tank and piping is to be disposed. Plans will be disapproved without this information.

H. ATTACH THREE COPIES OF PLANS SHOWING THE FOLLOWING:

1. Property lines, site address, scale, north arrow.
2. Location of all existing structures.
3. Location of all existing underground storage tank facilities.
4. Location of underground storage tanks and piping to be closed.
5. Location of underground utility lines and vaults.

E. REQUIRED INSPECTION-PERMIT TO CLOSE

A representative from SAM must be on site at the time the tank(s) are closed.

1. TANK SYSTEM CLOSURE BY REMOVAL:

   - excavation shall be exposed prior to the scheduled inspection. The tank owner/authorized representative on site must submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. A combustible gas instrument and soil sampling equipment must be on site. The SAM inspector will identify sampling points. The tank and piping must remain in the excavation until SAM approves the removal.

2. TANK SYSTEM CLOSURE IN PLACE:

   - after approval of the alternate plan, the tank owner/authorized representative on site shall submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. The SAM inspector shall verify that the tank system has been properly emptied and will witness the filling with an approved inert substance. Piping approved to be closed in place by hydrostatic testing shall also be witnessed by SAM.

J. DECLARATION

I declare that to the best of my knowledge and belief, the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Site Assessment and Mitigation Division.

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for further development (e.g. soil compaction testing) are in addition to the requirements of the Site Assessment and Mitigation Division.

I will notify the Site Assessment and Mitigation Division at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared or assumed by the County of San Diego.

WORKPLAN FOR POST-TANK REMOVAL INVESTIGATION

Complete this Workplan only if you intend to utilize a backhoe to investigate the extent of hydrocarbon contamination within 72 hours of the removal of an underground storage tank (UST). This site investigation work must be implemented in accordance with the DEH-SAM Manual and under the direction of an appropriately Registered Geologist (RG), Certified Engineering Geologist (CEG) or Registered Civil Engineer (RCE). A complete site assessment report, signed by the above referenced registered professional, must be submitted to DEH within 60 days of the date of the field investigation. This workplan must be signed by the above referenced registered professional.

1. Establishment Name/Address CARMEL MT. RANCH COUNTRY CLUB
14050 CARMEL RIDGE RD S.D. 92128

2. Contractor, Contact & Phone No.

Gary Pedretti Service Station Maintenance, Mr. Gary Pedretti, (619) 728-3514

Environmental Consultant, Contact & Phone No.

Environmental Business Solutions, Inc., Ms. Nicki Field, (619) 571-5500

Registered Professional (defined above) & Phone No.

Mr. Barry Pulver (EBS), (619) 571-5500 (CEG 1364)

3. Describe how the backhoe will be utilized to conduct the site investigation (ie. potholing, trenching, etc.) and estimate the maximum quantity of soil to be excavated.

See attachment A.

4. Describe the soil sample collection methods and laboratory analyses to be used (reference Section 4. B. 1. of the SAM Manual). Soil analysis must be performed by a California DTSC Certified Laboratory.

Soil samples will be collected in general accordance with the guidelines set forth in the 1997 SAM Manual. Soil samples will either be collected from the "teeth" of the backhoe bucket and packed into laboratory-supplied glass jars, or collected in brass sleeves with a manual drive sampler. In the case that soil samples are collected in brass sleeves, the sleeves will be covered with Teflon tape and capped. Samples will be transported to an on-site California State-certified mobile laboratory under chain-of-custody protocol and tested in general accordance with appropriate analytical methods detailed in the 1997 SAM Manual.

5. Attach a site drawing ([redacted]scale) which includes at a minimum: site str[redacted]res, subsurface utility lines and fuel lines, UST(s) location, site investigation area, stockpiled soil area, prevailing wind direction, adjacent street and property uses, subsurface water and wells.

6. Describe methods to monitor and control hydrocarbon vapor emissions at the excavation site.

The excavated soil will be placed on and covered with 10 mil plastic sheeting. We will also be monitoring vapors with a photoionization detector at periodic intervals (generally not exceeding 15 minutes) and will have available for use benzene-specific draeger tubes. Should organic vapors be judged excessive during the excavation assessment, the excavation will be discontinued or vapor control measures will be undertaken.

7. Describe the procedures for the management of excavated soil, i.e. soil segregation, engineering controls for the stockpile soil (reference Section 5. C. 4. of the SAM Manual), soil characterization, on-site soil management, off-site disposal, on-site treatment, etc.

Soil interpreted to be less likely to be impacted by petroleum hydrocarbons will be segregated into a separate stockpile. The stockpile(s) will be configured in such a way as to minimize runoff from rain. While soil stockpile characterization and disposal are not part of our contracted scope of services, we anticipate that soil will not remain on-site for an extended period of time. Depending on the results of excavation and stockpile sampling, we anticipate that soil containing elevated concentrations of petroleum hydrocarbons will be transported off-site for treatment and disposal at a facility such as Soil Wash Technologies in San Diego, California.

8. A Public Notification Program must be implemented prior to commencing the site investigation. Attach a copy of the public notice and provide a written description of the program (reference Section 6. A. of the SAM Manual). Identify the targeted population and the method of public notice distribution.

Please Note:

* The investigation trench or excavation must be logged under the direction of a RG, CEG or RCE and include a complete description of the subsurface soil and/or rock.

- All contaminated soil should either be removed from the site or be treated on-site (with agency approval) within 45 days of site excavation.

- The site excavation **must** be secured with fencing, site security and other methods as required to ensure public safety. DEH recommends backfilling the excavation site for safety reasons within 72 hours of the post-tank removal investigation.

UST Excavations

Trenches and/or potholes will be excavated at the UST excavation margins and/or bottoms to attempt to assess the horizontal and vertical extent of petroleum hydrocarbon-bearing soil (if any) in the vicinity of the USTs. We anticipate that a total of 75 yards of soil will be excavated from the UST and pipeline excavations.

Pipeline Excavations

Trenches and/or potholes will be excavated along the pipelines to attempt to assess the horizontal and vertical extent of petroleum hydrocarbon-bearing soil (if any) in the vicinity of the pipelines and remote fill ports. We anticipate that a total of 75 yards of soil will be excavated from the UST and pipeline excavations.

PUBLIC NOTIFICATION
THIS SITE IS CLOSED TO THE PUBLIC

A underground storage tank (UST) removal and soil excavation program is being performed at this Site (_____). The Site is marked by the fencing along the property boundaries. Activities will include UST removal, soil sampling, and possibly soil excavation and stockpiling. Activities will be conducted on _____. Onsite work will be limited to business hours, approximately 7:00 AM to 5:00 PM. Primary potential hazards include physical and chemical hazards associated with Site work, such as heavy equipment and petroleum vapors. Precautions will be taken during the UST removal/excavation activities to restrict Site access. In addition, precautions will be taken to minimize vapors, and air monitoring will frequently be performed.

UNIFIED PROGRAM FACILITY PERMIT APPLICATION

New Cingular Wireless PCS, LLC - Carmel Mountain Ranch Country Club
NS0627-01

☑ This business or service is required to obtain a Unified Program Facility Permit from the San Diego County Department of Environmental Health. I answered "yes" to one or more of the questions on the "Business Activities" form.
Date assumed business ownership at this location:

This permit does not excuse any owner or operator from complying with all applicable federal, state, county or local laws, ordinances or regulations. The owner or operator is required to determine if another permit or approval from any other agency or department is necessary. The County, by issuing this permit, does not relinquish its right to enforce any violation of law.

☐ I have determined that this business or service does not require a Unified Program Facility Permit from the San Diego County Department of Environmental Health.

I declare under penalty of perjury that to the best of my knowledge and belief the statements made herein are correct and true. I consent to all necessary inspections allowed by law and incidental to the issuance of required permit(s) and the operation of this business.

Signature: _____ Title: Operations Manager

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Antonio Perez TITLE: Site Tech

INTRODUCTION:
Routine/Initial Cell Site inspection:

Onsite with Antonio Perez/ Site Tech to conduct the following:

-Initial/Routine cell site inspection.

Observations:

-Verified quantities of the following inventory items disclosed via CERS:

*Battery electrolyte (48.96 gallons)

*DSL generator (210 gallons)

-Facility is accessible, clean and well maintained.

-No other Hazardous Materials above reportable threshold onsite.

-No Hazardous Wastes reported /maintained/observed/ onsite.

-CERS reviewed.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Daryl Bowen TITLE: Engineer III

INTRODUCTION:

ROUTINE INSPECTION

The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, HMD implements the Unified Program in the County and regulates facilities that store reportable quantities of hazardous materials, and generate hazardous waste and medical waste.

Today I conducted a routine compliance inspection at **Verizon Wireless: Carmel Mountain Country Club** to verify compliance with Hazardous Materials Business Plan (HMBP) requirements. Consent to inspect was granted by Daryl Bowen, Engineer III. This facility is an unstaffed cellular/telecommunications site and stores reportable quantities of hazardous materials on-site in the form of an emergency diesel generator used for powering VZW cellular equipment. HMBP last certified in the California Environmental Reporting System (CERS) on 12/13/16. CERS ID: 10593163.

The following was observed on-site during today's inspection:
-1x210 gallon aboveground storage tank of diesel (emergency generator)
-24x2V lead acid batteries

No violations were observed during today's inspection.

Per Daryl Bowen, Verizon Wireless Engineer staff are trained online via training modules at least once a year on hazardous materials management and emergency response/evacuation procedures. Online training last completed on 06/28/17.

Per Daryl Bowen, the emergency diesel generator is serviced by Electronic Environments Corporation.

INSPECTION REMARKS:
Per California Health and Safety Code section 25508.1:

Within 30 days of any one of the following events, a business subject to this article shall electronically update the information submitted to the statewide information management system via CERS:

(a) A 100 percent or more increase in the quantity of a previously disclosed material.

(b) Any handling of a previously undisclosed hazardous material subject to the inventory requirements of this article.

(c) Change of business or facility address.

(d) Change of business ownership.

(e) Change of business name.

(f) (1) A substantial change in the handler's operations occurs that requires modification to any portion of the business plan.

(2) For the purpose of this subdivision, "substantial change" means any change in a facility that would inhibit immediate response during an emergency by either site personnel or emergency response personnel, or that could inhibit the handler's ability to comply with Section 25507, change the operational knowledge of the facility, or impede implementation of the business plan.

Note: Substantial change also includes the removal of a previously disclosed chemical from the facility because the chemical is no longer handled or stored.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Paul Weiss TITLE: Environmental Manager

INTRODUCTION:
Routine /Initial Cell Site inspection:

Today I conducted an initial/ routine inspection to determine facility compliance regarding the handling, storing, and reporting of hazardous materials.

Consent for today's inspection was granted by Paul Weiss/ Environmental Manager representing AT&T.

At the time of this inspection, this facility handles reportable amounts of hazardous materials and they are subject to hazardous materials business plan requirements.

During today's inspection I observed the following:

I verified quantities of the following inventory items disclosed via CERS:

*Battery electrolyte (100 gallons)

At the time of inspection, this facility stores on-site reportable amounts of hazardous materials in the form of batteries containing electrolytes used for powering AT&T cellular equipment.

The facility is accessible, clean and well maintained. Facility is located in the NW corner of the receiving area and are painted a faux brick color.

-There are no other Hazardous Materials above reportable threshold onsite.

-There are no Hazardous Wastes reported /maintained/observed/ onsite.

-CERS has been reviewed and accepted.

- No violations were observed during today's inspection.

-Be advised: if amounts of reported hazardous materials fall below reportable threshold, HMD must be notified and a status verification inspection will be scheduled. Facility may be subject to a re-inspection fee if changes occur within the 18 month

inspection time frame.

Re: 14050 Carmel Ridge Road, San Diego, California 92128

Dear Ms. Alicia Jansen:

We have received your Public Records Act Request for records from Department of Toxic Substances Control.

After thorough review of our files we have found that, **no such records** exist in this office pertaining to the site/facility referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at: http://www.envirostor.dtsc.ca.gov/public.

If you have any questions, or would like further information regarding your request, please contact our Regional Records Coordinator at (619) 516-1982.

Sincerely,

Beatriz Davila

Alicia,

I can't see anything on the map on my phone. Can you please re-PDF to lock the changes in? PDF converter edits do not come through on the phones.

I'm at the city now looking into permits and have found a few different addresses for you.

Thank you.

ROUTINE INSPECTION

SITE HAS A DOUBLE WALL, 500R, 500 gallon UNDER GROUND STORAGE TANK WITH DOUBLE WALL SUCTION PIPING. THE SYSTEM IS MONITORED BY A PETROSENTRY TLD III LEAK DETECTION SYSTEM WITH SENSORS BETWEEN THE TANK WALLS AND IN THE FILL POINT SUMP FOR THE PIPING. THE ONLY REGULATORY REQUIREMENT FOR THIS SYSTEM IS THAT THE PETROSENTRY AND SENSORS MUST BE CHECKED ANNUALLY TO ENSURE PROPER OPERATION.

THE SITE HAS RECENTLY CONTRACTED VEHICLE MAINTENANCE TO A VENDOR. A PROPERLY LABELED WASTE OIL DRUM IS ON SITE. THE PERMIT EXPIRES 12/31/96, THE HAZARDOUS MATERIALS BUSINESS PLAN WAS REVISED 6/23/95, MONTHLY TRAINING IS DOCUMENTED, USED PARTS CLEANING SOLVENT DISPOSAL RECEIPTS ON SITE.

TWO VIOLATIONS WERE OBSERVED:

(1) COBBLESTONE Golf Group SOLD, BUT STILL OPERATES THE Golf COURSE. SECTION 25293 OF THE CALIFORNIA HEALTH AND SAFETY CODE REQUIRES THAT THE OWNER AND OPERATOR ENTER INTO AN AGREEMENT WHICH SPECIFIES WHO IS RESPONSIBLE FOR MONITORING, RECORD-KEEPING AND REPORTING REQUIREMENTS. THIS IS USUALLY IN THE LEASE, BUT IT CAN BE A SEPERATE AGREEMENT. TO COMPLY WITH THE LAW ENTER INTO AN AGREEMENT FOR THE TANK AND KEEP A COPY ON FILE. SUBMIT A COPY TO THE ADDRESS BELOW BY 9/30/96.

On 12/7/98, our company installed a Pomeco 511-C overspill containment manhole with 5 gallon overspill box. On 12/8/98, we installed OPW 61-SO overfill droptube. Existing system has containment boot under pump, containing flex connector. An M.S.A. tank monitor system, monitoring doublewall piping and interstitial area of tank is existing and in working order.
U.S.T. is a Joor doublewall tank equipped with striker plates.

Re: Carmel Mountain Ranch Country Club
Est. No. H26588

Dear Sir or Madam:

Enclosed please find our check in the amount of $350.00 (and a copy of the Official Notice we received from your office) needed to renew the Hazardous Materials Establishment Permit for the above-referenced club. We are requesting that the $50.00 late fee be waived because we have always renewed this permit on time in the past. The renewal application and our first check actually were mailed on September 16th, but they apparently never reached your office or cleared the bank. We have enclosed a copy of the first check for your review.

We would appreciate your consideration in this request. If you have any questions, please do not hesitate to give us a call at 972/960-8677. Thank you very much.

Re: Cobblestone Enterprises of California, Inc.

Dear Ms. Cardenas:

Enclosed please find six (6) applications for Hazardous Materials Health Permits needed for the following clubs:

1. Morgan Run Resort & Club;
2. The Vineyard at Escondido;
3. Carmel Mountain Ranch Country Club (2 applications);
4. El Camino Country Club; and
5. Balboa Park Golf Course.

Cobblestone Enterprises of California, Inc. is the new Operator at each of these clubs. It is leasing the facilities from the current owners.

Per my conversation with Karl Halbridter in your office, the bills for these permits will be mailed out at a later date. If you have any questions regarding these applications, please do not hesitate to give me a call at 972/960-8677. Thank you very much.

Re: Compliance Inspection Report for Carmel Mountain Ranch Country Club
Dated 11/27/96

Dear Sirs:

This law firm represents Carmel Mountain Ranch Country Club and, in that capacity, we have been provided a copy of the recent Compliance Inspection Report completed for this facility (the "Report"). We have been asked to respond to the final item addressed on page 1 of the Report.

The Report states "There was no agreement between the property owner, National Golf Properties, and the business operator, Cobblestone Group, which specified which party was responsible for UST monitoring, record-keeping and reporting requirements." There are actually two different agreements which address environmental compliance at this facility.

On March 10, 1995, the property was sold from Cobblestone Golf Group, Inc. ("CGG"), to National Golf Operating Partnership, L.P. ("NGOP"), pursuant to a Purchase and Sale Agreement and, on the same date, the property was leased back by CGG from NGOP. The substance of these two transactions left CGG as the tenant rather than the owner of the property. Full compliance with environmental rules and regulations was the sole responsibility of CGG when it owned the facility and this obligation remains one solely of CGG as tenant. We have enclosed copies of both the Purchase and Sale Agreement and the Lease Agreement, each dated March 10, 1995, and each containing the environmental compliance language required, for your records.

In the event any additional information is needed with regard to this matter, please do not hesitate to contact the undersigned.

Very truly yours,

ADDISON LAW FIRM,
a Professional Corporation

Dear Tank Owner/Operator:

SECOND NOTIFICATION - UNDERGROUND STORAGE TANK UPGRADE
DEADLINE: DECEMBER 22, 1998

A recent review of our records indicates that minor equipment upgrades or verification of upgrades are needed for one or more of the underground storage tanks (USTs) located at your facility in order for you to meet the State and Federal 1998 UST upgrade requirements (California Code of Regulations, Title 23, Division 3, Chapter 16, Article 6 and 40 Code of Federal Regulations Section 280.21). The deadline for compliance with these requirements is **December 22, 1998**. All underground storage tank systems in operation at that time (including those tank systems that store waste oil) must be in compliance or enforcement measures, including restricting the tanks from continued operation, will be initiated.

With the passage of Assembly Bill (AB) 1491, starting January 1, 1999, fuel distributors **will be prohibited from delivering fuel** to facilities that do not meet the 1998 UST upgrade requirements. Facilities whose **motor vehicle fuel** tank systems are in compliance with the 1998 UST upgrade requirements will receive an UST Operating Permit and a State Certification of Compliance prior to January 1, 1999. In order for a facility to receive a State Certification of Compliance **all motor vehicle fuel tank systems on site** must be in compliance with the 1998 UST upgrade requirements and any non-compliant motor vehicle fuel tank systems must be removed or in temporary closure. Without this State Certification your fuel distributor **will not be able to deliver fuel** to your facility after January 1, 1999.

Enclosed is a printout of the tanks this Department has listed as being owned or operated by you and a check list of the necessary upgrades you must do to ensure compliance with the 1998 UST upgrade requirements. Prior to upgrading your tank system (including piping) you must first receive a permit from this Department. Please note that if you

already performed the required upgrades without first obtaining a permit from this Department we would have no record of completion. If this is the case, you must complete the enclosed "Certification of Compliance for Underground Storage Tank 'Minor Upgrade' Requirements" and submit that along with a **proof** of upgrade, such as an itemized work order/invoice, to this Department. Proof of compliance includes either: (1) detailed records showing the date of installation and purchase records including the make and model of the device; or (2) recent records (within the last year) from a qualified technician verifying installation or testing of the device. Test records used to verify electronic leak detectors, automatic tank gauges, pressurized product leak detectors, and high level alarm systems must be detailed including the name and model of the device, the number of devices tested, and the location of each device.

Please be advised, that after review of the certification of compliance along with any work order if DEH determines that the upgrade work required a permit from this office, a 1998 facility compliance certificate will not be issued until an application with fees and as-builts are submitted. In addition, if any or all of these **minor upgrades** have not been performed you must first receive a **permit** from this Department prior to performing the upgrades or modifications. Please mail all certification of compliance and proof of upgrade to:

San Diego County Department of Environmental Health
P.O. Box 12961
San Diego, CA 92112-9261
Attention: UST Plan Check

A 1998 UST upgrade hotline number, (619) 237-8484, has been established to **answer your questions** regarding the 1998 UST upgrade requirements. We encourage you to act now. Please remember it is your responsibility as the owner/operator of your tanks to ensure that they meet the 1998 UST upgrade requirements. Do not be caught without fuel on January 1, 1999.

Sincerely,

Janet L. Ortiz

SECTION A - HAZARDOUS WASTE GENERATION

NOTE: If you know that your business generates, stores or handles hazardous wastes, please continue with Section B of the questionnaire. All others must complete #1 through #6 that follows.

1. Does your business or service generate, store or handle any of the by-products or wastes listed in the box below?

YES ☒ NO ☐

Circle the letters of the categories found at your business.

A. Solvents
   a. Halogenated - chloroform, methyl chloride.
   b. Oxygenated - acetone, butanol, ethyl acetate.
   c. Hydrocarbons - benzene, hexane, stoddard.
   d. Unspecified solvent mixtures.

B. Sludges - Alum, paint, degreasing, caustic, paper, tetraethyl lead, lime, tank bottom waste and metal sludge.

C. Waste Oil/Mixed Oil - Waste motor oil, fuel tank cleaning residue, oil separation waste, lube oil processing waste.

D. Pesticides and Pesticide Rinse Water - Parathion, Malathion, Diazinon, and other pesticides; pesticide residue from container rinsing.

E. PCB - Mineral oil contaminated-electrical capacitors, ballasts, and electrical transformers.

F. Monomer/Polymeric Resin Waste - Plastic coating and laminating waste, resin coating, metal binding and coating resin rinse waters.

G. Biological Waste - Infectious hospital waste, laboratory and pharmaceutical research waste exceeding 100 kg/month.

H. Organic Liquid/Solids - Polymer extrusion waste, PVC coating residue, adhesive waste, organic stripper from semi-conductor processing waste.

I. Contaminated Aqueous Solutions:
   a. With reactive anions - azide, bromate, chlorate, cyanide, fluoride, hypochlorate, nitrite, perchlorate, sulfide anions, plating rinse solutions, metal coatings and metal parts cleaning solutions.
   b. With heavy metals - including antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium and zinc.
   c. With organic residues - including degreasing and metal cleaning solutions, equipment cleaning, dry cleaning, anticorrosion and coolant solution wastes.

J. Acid Solutions - Wastes battery acid, plating waste, printed circuit etching residue, silicon wafer reclamation and cleaning wastes, galvanizing wastes, other acidic solution wastes with $pH \leq 2$.

K. Alkaline Solutions - Wastes from metal plating, anodizing and etching, containing sodium or calcium hydroxide, and other solutions with $pH \geq 12.5$.

L. Asbestos - Insulation products, old pipe laging.

M. Metal Sludges and Dusts - Metal machining coolant sludges, metal pickling sludges, metal machining dusts.

N. Miscellaneous - Chemical toilet waste, photochemical processing waste, laboratory chemical wastes, drilling mud, soap and detergent production wastes.

2. Do you dispose of any items in #1 by discharging them into the sewer system including down sinks, floor drains, toilets, etc.?

YES ☐ NO ☒ If yes, which category(ies) of by-product or wastes?

_____

3. Do you dispose of any items listed in #1 in a way other than disposal into the sewer system (for example, trash cans, dumpster, storm drain, on the ground, evaporation ponds, land fills, etc)? YES ☐ NO ☒

If yes, which category(ies) of by-products or wastes? _____

_____

4. Do you recycle any of the items listed in #1 through another company/contractor or by yourself? YES ☒ NO ☐

If yes, which category(ies) of by-products or wastes? _____

_____

_____

5. Do you manifest (prepare the required transportation document for hazardous wastes) any items listed in #1? YES ☒ NO ☐

6. If you answered "yes" to <u>any</u> of the questions (1, 3, 4, or 5) your business or service <u>does</u> generate hazardous waste and a permit from the San Diego County Department of Environmental Health is required. Continue with Section B of the questionnaire.

PLEASE RETURN THIS SECTION

SECTION B - INVENTORY OF HAZARDOUS MATERIALS

A "hazardous substance" is a chemical compound, or product for which a manufacturer or producer is required by law to prepare a Material Safety Data Sheet (MSDS) for that substance. An MSDS is a document (usually 2 or 3 pages) which contains chemical composition information, fire and explosive data, health hazard data, reactivity data, spill or leak procedures, special protection information and special precaution information. An MSDS for a hazardous substance can be obtained from the supplier of that substance. Hazardous substances also include materials requiring placard warnings during transportation.

1. Does your establishment use or handle hazardous, substances in quantities equal to or greater than 55 gallons, 500 pounds, or 200 cubic feet of compressed gas at any one time?

   Yes ☐ No ☒

2. Review the health hazards data or health and safety section of the Material Safety Data Sheets (MSDS) to see if any chemicals or substances you use are designated as a cancer-causing substance (carcinogen) or substance which may cause birth defects, miscarriages, or damage to the human reproductive system (reproductive toxin). Does your establishment use or handle carcinogens or reproductive toxins?

   Yes ☐ No ☒

3. Does your establishment use or handle gases with Threshold Limit Values (TLV) or Time Weighted Average (TWA) of 10 parts per million or less?

   Yes ☐ No ☒

If you have answered "Yes" to any of the above questions (1, 2, or 3), you do use or handle hazardous materials that are subject to inventory requirements and a permit from the San Diego County Department of Environmental Health is required. Continue with Section C of the questionnaire.

SECTION C - UNDERGROUND STORAGE TANKS

An "underground storage tank" is a tank, including piping, which holds hazardous wastes (as defined in Section A) or hazardous substances (as defined in Section B, regardless of volume) and has 10% or more of the total volume located below grade.

Does your business have underground storage tanks as defined above?

Yes ☐ No ☒

If you answered "yes", a permit from the San Diego County Department of Environmental Health is required.

Underground storage tanks may not be installed, removed, destroyed, repaired or operated without permits from this Department.

Continue with the Hazardous Materials Summary on page 4.

PLEASE RETURN THIS SECTION

HAZARDOUS MATERIALS SUMMARY

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- [ ] Training records unavailable 66265.16 — V0405 W____
- [ ] Training program not adequate 66265.16 — V0406 W____
- [ ] Facility not designed to minimize release 66265.31 — V0501 W____
- [ ] Spill control equip not available 66265.32 — V0508 W____
- [ ] Aisle space is obstructed 66265.35 — V0509 W____
- [ ] Contingency plan not prepared and/or on file 66265.51, 66265.53 — V0609 W____

MISCELLANEOUS

- [ ] Waste oil contaminated 25250.7 — V0225 W____
- [ ] Used oil filters improperly managed 66266.130 — V0701 W____
- [ ] Damaged batteries improperly managed 66266.81 — V0702 W____
- [ ] Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) — V0125 W____
- [ ] Onsite treatment of waste without authorization 25201 — V0125 W____

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

- [ ] Health Permit not obtained 68.1005, 25284 — V3002 T____
- [ ] Repair/modify/close permit not obtained 68.1005 — V3007 T____
- [ ] UST Permit Application not submitted 25286(a) — V3010 T____
- [ ] Operating permit conditions violated 2712 — V3011 T____
- [ ] Failed to notify HMMD of changes 25284 — V3012 T____
- [ ] No owner/operator agreement 25284 — V3005 T____
- [ ] No records of financial coverage 25292.2 — V3013 T____
- [ ] No maint/monit/calib records available 2712(b), 2641(j) — V3001 T____
- [ ] Monitoring Equip. not tested annually 2630, 2641 — V3003 T____

MONITORING REQUIREMENTS (SINGLE WALL)

- [ ] Leak Detection Method does not meet performance standards 2643 — V3014 T____
- [ ] Integrity test not conducted 25292 — V3015 T____
- [ ] Copy of tank test not submitted to HMMD within 30 days 2643 — V3016 T____
- [ ] Manual tank gauging (<2000 gal) 2645 not done properly — V3017 T____
- [ ] Reconciliation not done properly 2646 — V3018 T____
- [ ] Reconciliation not approved for facility 2646 — V3019 T____

CONTACT THE DEPT. OF HEALTH SERVICES AT LEAST TWO (2) WORKING DAYS BEFORE YOU WISH TO SCHEDULE THE FIRST REQUIRED FIELD INSPECTION

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS:

Submit three (3) copies of this application package, including plan drawings, with the required fee to the Department of Health Services, Hazardous Materials Management Unit, Room 311, 1700 Pacific Highway, San Diego, CA 92101. Checks should be made payable to the County of San Diego.

A permit will be issued by the Department of Health Services (DHS) upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in this application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit has been issued.

Once the permit has been issued, it is the permittee's responsibility to notify the DHS at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III and IV).

F. Indicate the Company/Person you wish to have our plan check comments directed to by circling the appropriate section letter above or if different enter below.

APPLICATION FOR A PERMIT TO CONSTRUCT

A. Total number of tanks to be installed 1

B. Type of primary containers:

Tank #	[redacted] Manufacturer	Composition	Capacity	Double or Single Wall	Material to be Stored
1	JOOR	PLASTEEL	500	DOUBLE	GAS
2					
3					
4					

Attach additional sheets as needed for primary containers.

C. Type of secondary containment:

|X| Double Wall Tanks |___| Flexible Liner (liner thickness) _____

|___| Vault |___| Other _____

Manufacturer JOOR

If other than Double Wall Tanks, will all tanks be in the same secondary containment enclosure? Explain _____

_____

Will a system be installed to de-water the containment area? Explain _____

NO

D. Tank leak detection/monitoring system:

|X| Continuous monitoring device within the secondary containment, connected to an audible/visual alarm system.

Manufacturer PETROSENTRY LEAK MONITOR SYSTEM

|___| Daily manual monitoring of the space between the primary and secondary containers using "dip stick" readings or visual determination.

Please specify: _____

|___| Daily Inventory Control/Records reconciliation (for motor vehicle fuels only)

NOTE: If daily gauging and records reconciliation is to be used as the monitoring system, a letter from the property owner must be provided to this Department outlining the frequency and method of monitoring the space between the primary and secondary containers, as well as a statement that the tanks will be tested using an approved testing method every year.

|___| Other. Explain _____

E. Piping Materials and Construction:

Primary Containment F/G PIPE 2" Manufacturer/Model SMITH

Secondary Containment F/G PIPE 3" Manufacturer/Model " & TEFLEX
(if applicable)

F. Type of product delivery system (i.e., pressurized, suction) SUCTION

G. Piping leak detection/monitoring system:

[ ] Leak detector on pressurized line (for motor vehicle fuels only)

Manufacturer [redacted]

[X] Continuous monitoring device within the secondary containment, connected to an audible/visual alarm system.

Manufacturer PETROSENTRY LEAK MONITOR SYSTEM

[ ] Daily manual monitoring of the space between the primary and secondary containers using "dip stick" readings or visual determinations.

Please specify _____

[ ] Other _____

H. Describe the tank overfill protection system you plan to use. Check all that apply.

[ ] Product level sensing device equipped with high level alarm and/or automatic shut off device. Specify type: _____

[X] Ball float valve on vent and vapor lines

[X] Other. Explain POMECO III-A SPILL CONTAINMENT MH SYSTEM

I. Indicate type/manufacturer of vapor recovery system to be used:

EMCO

NOTE: Those systems with product flow thru the vapor lines during normal operation require secondary containment of these lines. NO

J. What is the approximate depth to ground water? _____

Basis of determination _____

K. Attach a certification from the manufacturer, or his authorized representative, of the tank and piping materials as to the capability of the tank and piping materials to store the proposed hazardous substances.

L. Attach three copies of Plans showing:

1. Location of all existing and proposed structures
2. Location of all existing underground tanks and piping (indicate if tanks are to be removed or abandoned)
3. Location of all proposed tanks and piping and their secondary containment
4. Cross section of tank and piping system including secondary containment, overfill protection equipment, monitor ports and equipment, extension of all pipes and ports to finish grade

5. Location and detail of monitoring/leak detection systems
6. Location of underground utility lines and vaults
7. Site address, property lines, scale, north arrow
8. Surface elevation and location of 100 year flood plain, if applicable
9. Equipment summary

M. Required Inspections - New Tank Installations

Each new tank installation must be inspected by the DHS at each of the following stages:

1. installation of secondary containment (liner) system, where applicable
2. delivery and test of tank on site; excavation complete; placement of tank in excavation
3. product line and associated piping - pressure test on lines and tank; overfill protection devices installed
4. monitoring system installed; monitor ports brought to surface

Projects involving repiping only will normally require just one inspection (at the line pressure-test stage).

Please refer to "Underground Tank Inspection Record - New Tank Installation" (DHS:HW-914) for additional details, or call 236-2222.

N. I declare that to the best of my knowledge and belief the statements and information provided above are correct and true. I understand that information in addition to that provided above may be needed in order to obtain a permit from the Department of Health Services (DHS) and that no work is to begin on this project until the permit is issued.

I understand that any changes in design, materials or equipment will void my permit to construct if prior approval is not obtained.

I understand that a permit to operate the underground storage tank system must be obtained from the Department within 60 days of putting the system into use. This is the responsibility of the tank owner. Conditions of the permit to operate include an acceptable tank monitoring and testing schedule, submittal of an annual report form, and regular inspection by the DHS.

I will notify the Department of Health Services at least two working days (48 hours) in advance to schedule each required inspection. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of San Diego.

SECONDARY CONTAINMENT BOOTS FOR DOUBLE WALL PIPING SYSTEMS

Designed specifically to contain flexible connectors, Teleflex Secondary Containment Boots are engineered for the extremes of the underground environment.

Teleflex Boots consist of a 3-9/16 inch ID boot and cap available for 1½ inch and 2 inch ID connectors. Each boot is made of a nitrile innercore, inner spring and a reinforced nitrile/neoprene cover. Special ozonites and fungicides are added to this blend for long life underground. Teleflex Secondary Containment Boots resist all types of fuel blends and chemicals including hydrocarbons, methanol, ethanol, chlorinated hydrocarbons, aromatic and aliphatic oils, solvents and dilute acids and alkalies. The operating temperature range is –26°F to 212°F. The boots are easily attached with stainless steel wormgear clamps to standard 3 inch FRP pipe.

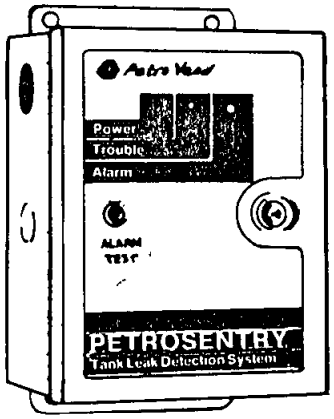
NEW!
PRELIMINARY

24-HOUR MONITORING FOR LEAKING UNDERGROUND STORAGE TANKS■

Leaking underground storage tanks have recently been identified as potential sources for both soil and groundwater contamination. Local, state and federal agencies are already taking action to help reduce possible environmental damage by legislating tough new guidelines regarding the installation, location and monitoring of underground storage tanks.

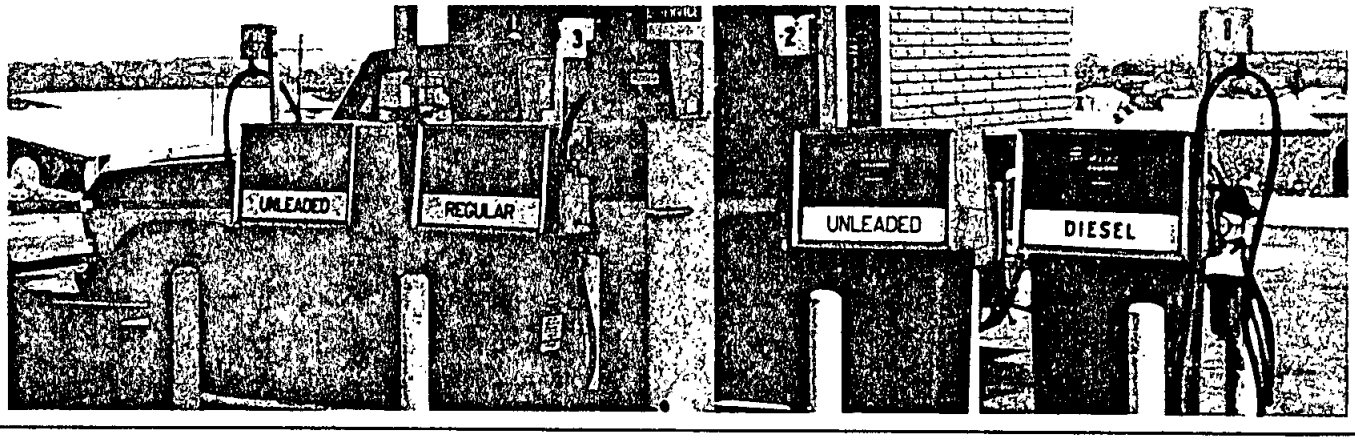


To help facilities comply with both current and proposed pollution control measures, Petro Vend is introducing the Petrosentry Tank Leak Detection System. This low-cost, low maintenance instrument can detect gasoline and other light hydrocarbon vapors that can leak from underground storage tanks. A liquid sensor is also available to detect the presence of liquid buildup.

The instrument is comprised of four long-life, solid-state sensors. The vapor or liquid sensors are connected to a centrally located monitoring and alarm module. The sensors can be located up to 500 feet from the monitor. Placed in bore holes around the perimeter of the tank or between the tank's walls, the sensors continuously monitor for vapor or liquid presence. Signals are then sent back to the alarm module.

FEATURES

- Interfaces with Petrosonic III.
- Simple setup and operation. No complex procedures or calibration equipment.
- Background interferents (such as methane) cancelled during setup.
- Long-life, solid-state sensors that are not degraded by high vapor concentrations or liquid submersions.
- Intrinsically safe sensors for Class I, Division 1, Groups C&D, as defined by the National Electrical Code. UL listed.
- Maintenance is reduced to a simple sensitivity check. (Expose the vapor sensor to hydrocarbon vapors and check its response.)
- Relays are standard for remote alarm and remote trouble.
- Audible and visual alarms provided with front panel test button. Discrete LED's inside the unit provide indication of which sensor has caused the alarm or trouble.
- Built-in time delay to prevent false alarms.
- Up to 4 interchangeable liquid or vapor sensors.
- Miniature vapor or liquid sensors are available for use between the walls of small tanks.



SPECIFICATIONS

OPERATING

Operating Temperature:
Sensor: −5°F to +122°F (−20°C to +50°C)
Monitor: −5°F to +122°F (−20°C to +50°C)

Response Time:
Vapor sensor: 30 seconds max
Liquid sensor: 30 seconds max

Recover Time:
Vapor sensor: 1 minute max
Liquid sensor: 1 minute max

Alarm Delay Time: Immediate or 3 ±0.5 hours (can be bypassed)

Sensor Life:
Vapor sensor: 2 years min
Liquid sensor: 2 years min

Effects of Liquid Immersion:
Vapor sensor: No damage
Liquid sensor: Activates alarm

Max Wire Distance: 500 ft using 18 AWG (monitor to sensor)

PHYSICAL

Power Requirement: 115/220 Vac, 60 VA, 60 Hz

Dimensions:
Monitor: 8¼"h x 6¼"w x 4¼"d
Large liquid or vapor sensor: ¾"dia x 2½"long,
Miniature liquid sensor: ½"dia x 1½"long
Miniature vapor sensor: ⅜"dia x 1½"long
(14 ft of lead wire is attached to all sensors)

Weight: 7 lb

Equipment Classification:
Liquid or Vapor Sensors: Intrinsically safe for Class I, Div. 1, Groups C&D*
Monitor: General purpose
*As defined by the National Electric Code and UL listed 24RI

NOTICE: You are hereby notified that on 3/18/99, an Environmental Health Specialist conducted an inspection for the closure of 1 (one) hazardous substance underground storage tank(s). A summary of the conditions follows:

☐ An **unauthorized release** of a hazardous substance has been observed by the Environmental Health Specialist. You are hereby required to initiate **Corrective Action** measures (See Page 4 for details).

☒ A determination of this site's status is pending the Site Assessment and Mitigation (SAM) Program's receipt and review of analytical results for the samples taken from the tank and/or piping closure site. A laboratory report must be submitted to SAM within **30** days. Please request that the laboratory send a copy of the analytical report directly to Beatrice Griffey at the address provided below.

The SAM Program has completed its review of the analytical results for samples collected at the tank closure site and has determined the following:

☒ **TANK CLOSURE COMPLETE - NO FURTHER ACTION REQUIRED**

☐ **INITIATE CORRECTIVE ACTION MEASURES (See enclosed information)**

COMMENTS: Contractors comments- water seeping into annular space between steel UST and secondary containment. Water also seeping into steel UST. Both UST and containment would be pumped dry and then you could watch water seep back into steel UST along seams between two plates. Plates not welded along the entire length of seams. Had difficulties getting LEL down, had to rewash out UST and second time. Note: this is a country club with a lot of irrigation of landscape being performed.

Contractor instructed to run 8260 (BTEX & MTBE) on sample with highest TPH concentration. If both samples do not contain detectable concentrations of TPH run sample 26588-T-1.

SUBJECT: DATA REPORT – CARMEL MOUNTAIN RANCH COUNTRY CLUB – 14050 CARMEL RIDGE ROAD – SAN DIEGO, CA - PEDRETTI PROJECT #26588-4385

TEG Project # 990318-9

Mr. Pedretti:

Please find enclosed a data report for the above referenced location. Soil samples were analyzed in TEG's DOHS certified mobile laboratory (CERT #1839).

Project Summary

The following analyses were conducted:

- 2 soils for total petroleum hydrocarbons (TPH) by DOHS Modified EPA Method 8015

The samples were received chilled in appropriate containers with appropriate labels, seals, and chain-of-custody documentation.

Project Narrative

The results for all analyses and required QA/QC analyses are summarized in the enclosed tables. All calibrations, blanks, surrogates, and spike recoveries fulfill quality control criteria. No data qualifiers (flags) apply to any of the reported data.

TEG appreciates the opportunity to provide analytical services to Pedretti Construction on this project. If you have any questions relating to this data or report, please do not hesitate to contact us.

Sincerely,

James E. Picker, Ph. D.

Alicia,

I can't see anything on the map on my phone. Can you please re-PDF to lock the changes in? PDF converter edits do not come through on the phones.

I'm at the city now looking into permits and have found a few different addresses for you.

Thank you.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of February 22, 2018 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

PACS ENTERPRISES, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee as to Parcel(s) A through C, D-1, E, F, G-1, H, I-1, J, K-1, L, M, N-1, O and P-1, an easement as to Parcel(s) D-2, D-3, G-2, G-3, I-2, K-2, N-2, P-2 and P-3.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2018-2019, a lien not yet due or payable.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:
1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability

Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;

(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet.

In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.

There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.

FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

Re: 14050 Carmel Ridge Road, San Diego, California 92128

Dear Ms. Alicia Jansen:

We have received your Public Records Act Request for records from Department of Toxic Substances Control.

After thorough review of our files we have found that, **no such records** exist in this office pertaining to the site/facility referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at: http://www.envirostor.dtsc.ca.gov/public.

If you have any questions, or would like further information regarding your request, please contact our Regional Records Coordinator at (619) 516-1982.

Sincerely,

Beatriz Davila

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec Consulting Services Inc.
