Project No.: 185804155

April 11, 2018

Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment, Carmel Mountain Ranch Country Club, 14050 Carmel Ridge Road, San Diego California 92026 was prepared by Stantec Consulting Services Inc. (Stantec) for NUWI Country Club LLC. The material in it reflects Stantec's best judgment in light of the information available to it at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Stantec accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

Author  (signature)

Joshua Sargent, GIT, MS
Geologic Project Specialist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 SUMMARY

Stantec has completed a Phase I Environmental Site Assessment (ESA) for The Lakes, which consists of several parcels of real property occupied by Carmel Mountain Ranch Country Club and Golf Course located at 14050 Carmel Ridge Road, City of San Diego, County of San Diego, California (the "Property"), on behalf of NUWI Country Club LLC (the "Client"). The work was performed in accordance with the Master Services Agreement between New Urban West, Inc. and Stantec (the "MSA"). NUWI Country Club LLC (the "User") has been designated as the User of this report.

The Phase I ESA was conducted in conformance with the requirements of American Society for Testing and Materials (ASTM) Designation E 1527-13 and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM practice are described in Section 2.3.

The Property consists of approximately121 acres of land developed with a golf course, club house area, and a maintenance building. The club house area consists of the main clubhouse building with a kitchen, dining area, pro shop, bridal suite, and a basement electrical golf cart maintenance and storage area. Immediately outside of the clubhouse is a small putting green, fenced driving range, associated asphalt parking area, and a cellular server building. Surrounding properties are primarily residential. A property location map is illustrated on Figure 1. A property plan illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

Stantec observed a two-stage grease trap located in the loading area west of the club house related to the kitchen. There are no reported issues or violations known associated with the grease trap. A two-stage clarifier was observed east of the club house, related to the electric golf cart wash area there are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The grease trap is not considered an environmental concern to the Property; however, prior to redevelopment the grease trap will need to be properly removed per regulatory requirements. The clarifier is identified as a Recognized Environmental Condition (REC) given oils and solvents could have been discharged into the clarifier as a result of maintenance activities.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E-1527-13 (and Final Rule 40 CFR Part 312 et seq.) with respect to the Property. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property with the exception of the following:

- **Maintenance Building.** A maintenance building used for servicing vehicles at the country club is located at the southeastern portion of the Property. The maintenance building has

five service bays with one single-post in-ground hydraulic lift. Minor staining was observed around the in-ground hydraulic lift. Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.

- **Golf Course Maintenance.** A storage room inside the maintenance building contains fertilizer used on at the country club; a chemical storage shed containing pesticides; and a 1,000-gallon aboveground storage tank (AST) containing pre-mixed fertilizers and water. Organochlorine pesticides and their drying agents are known to accumulate in shallow soils where the products are applied. Therefore, the presence of the pesticides represents a REC to the Property.

- **Clubhouse Building Clarifier.** A two-stage clarifier was observed east of the club house, related to the electric golf cart wash area there are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The clarifier is identified as a Recognized Environmental Condition (REC) given oils and solvents could have been discharged into the clarifier, as a result of maintenance activities.

- **Former USTs.** The Property was listed in the environmental database report has having a former 500-gallon UST containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.

Stantec identified the following de minimis conditions associated with the Property:

- **Soil Staining.** During the site visit, Stantec identified the presence of two 500-gallon ASTs containing gasoline and diesel fuel in the southeast portion of the maintenance building. The ASTs appeared in good condition and located within a concrete secondary containment. The concrete secondary containment structure appears intact and in good

condition with no visible cracks or staining. Dark staining was observed adjacent to the ASTs outside of the secondary containment in the soil, likely related to fueling operations. Due to the limited area of dark staining observed, approximately 3-foot by 3-foot, this is considered a de minimis condition.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform appropriate inquiry into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", Designation E1527-13. The purpose of this Phase I ESA was to identify adverse environmental conditions including recognized environmental conditions ("RECs") of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions ("HRECs"), and controlled recognized environmental conditions ("CRECs") that may exist at a property. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

(1) Due to any release to the environment;

(2) Under conditions indicative of a release to the environment; or

(3) Under conditions that pose a material threat of a future release to the environment.

ASTM defines a "HREC" as a REC that has occurred in connection with the property but has been addressed to the satisfaction of the applicable regulatory authority and meets unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional must determine whether the past release is a REC when the current Phase I ESA is conducted (for example, if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De minimis conditions are not RECs. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. As indicated, the term REC does not include de minimis conditions, which generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies.

This ESA was conducted in accordance with ASTM E 1527-13 and AAI. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform any independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this ESA Report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

(1) Information that is publicly available;

(2) Information that is obtainable from its source within reasonable time and cost constraints; and

(3) Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately121 acres of land developed with a golf course, club house area, and a maintenance building. The club house area consists of the main clubhouse building with a kitchen, dining area, pro shop, bridal suite, and a basement electrical golf cart maintenance and storage area. Immediately outside of the clubhouse is a small putting green, fenced driving range, associated asphalt parking area, and a cellular server building. Surrounding properties are primarily residential. A property location map is illustrated on Figure 1. A property plan illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

2.2 SPECIAL TERMS, CONDITIONS, AND SIGNIFICANT ASSUMPTIONS

There were no special terms, conditions, or significant assumptions associated with the Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has

uncovered all potential and actual liabilities and conditions associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the identified portion of the property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. (40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information.) Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition.

This report relates solely to the specific project for which Stantec was retained and the stated purpose for which this report was prepared and shall not be used or relied upon by the client identified herein for any variation or extension of this project, any other project, or any other purpose.

This report has been prepared for the exclusive use of NUWI Country Club LLC, New Urban West Inc., and their respective assigns and designees, and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the site conditions encountered by Stantec at the time the work. Accordingly, additional studies and actions may be required. As the purpose of this report is to identify selected site conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the site is beyond the scope of this assessment. The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the site which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. Issues raised by the report should be reviewed by client legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change. In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional (EP).

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Property. The ASTM standard requires that the Environmental Professional request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire	Yes	The completed user questionnaire was provided and included in Appendix D.
Environmental Liens or Activity Use Limitations	Yes	The user provided an amended preliminary title report for the Property dated February 22, 2018. No environmental liens or activity use limitations were identified within the title report.
Previous Environmental Permits or Reports Provided by User	No.	No previous reports or permits for the Property were provided by the user.
Purpose of the Phase I ESA	Yes	Due diligence.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area, in order to evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the Property's first developed use. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections.

Topography:	The Property is approximately 807 feet above mean sea level (amsl) and generally sloped to the north. The regional gradient is variable (EDR, 2018).
Soil/Bedrock Data:	The vicinity of the Property consists of recent alluvium and floodplain deposits which are underlain by the sandstone and conglomerates of the Mission Valley Formation (CDMG, 1965).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	According to the Site Assessment Report, Site Conceptual Model, and Corrective Action Plan report dated November 13, 2007 for the Shell Service Station located approximately 500 feet to the north of the Property, depth to groundwater ranges between 17.25 and 20.72 feet below ground surface (bgs) with a groundwater flow direction to the north.
Note: Site-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Property Topography and Surface Water Flow

The Property is approximately 807 feet above mean sea level (amsl) and generally sloped to the north. The regional gradient is variable (EDR, 2018). Surface runoff is expected to follow the topography, which is variable throughout the Property.

4.1.2 Regional and Property Geology

The Property is located in San Diego County. The area is located within the Peninsular Ranges Geomorphic Province, which includes northwest-southeast trending mountain ranges and valleys

that have been developed by the San Andreas Fault system (California Geological Survey [CGS], 2002). The stratigraphy underlying the Property consists of recent alluvium and floodplain deposits which are underlain by the sandstone and conglomerates of the Mission Valley (CDMG, 1965).

4.1.3 Regional and Property Hydrogeology

The Property is located within the Poway Hydrologic Area of the Penasquitos Hydrologic Unit (906.2) within the San Diego Region of the State of California Regional Water Quality Control Board Hydrologic Basin Planning Area (SA 9.00). Lake Hodges is located approximately 5 miles to the north of the Property.

According to the Site Assessment Report, Site Conceptual Model, and Corrective Action Plan report dated November 13, 2007 for the Shell Service Station located approximately 500 feet to the north of the Property, depth to groundwater ranges between 17.25 and 20.72 feet below ground surface (bgs) with a groundwater flow direction to the north.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix B.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. Observations about the Property and surrounding properties made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property was listed as AT&T Mobility in the San Diego Co. HMMD and SWEEPS UST databases, as Carmel Mountain Ranch Country in the HAZNET database, and as Verizon Wireless: Carmel Mountain Country Club in the FINDS database. The AT&T listings for the Property in the environmental databases are regarding the historical presence of a single 500-gallon underground storage tank (UST) containing gasoline installed in 1989 and removed in 1993, and the handling and storage of lead-acid batteries, dated in 2017. The environmental database report reference the San Diego Department of Environmental Health case number DEH2014-HUPFP-001141, DEH2016-HCHEM-0124052, and 68476-34-6. The report also references the APN 313-043-09-00, which correlates to a cellular server structure located in the parking area of the clubhouse located on the Property. No other information is listed in the environmental database report regarding the UST and lead-acid batteries. The Carmel Mountain Ranch listing refers to the handling and disposal of 1.0425 tons of "unspecified oil-containing waste" in 1998. This is likely in reference to the grease trap and two-stage clarifier observed during the Property visit. The Verizon

Wireless listing is in reference to the communications building observed in the clubhouse parking area. No details are listed under the FINDS listing.

Based on records obtained from the SDCDEH, the 500-gallon double walled gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions to pose a REC, CREC, or HREC for the Property.

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following listed databases does or does not create a REC for the property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Sun Valet Service 11965 Meriden Lane, San Diego, CA	EDR Hist Cleaner	1006 feet southeast	No
This facility is listed as being a historical dry cleaner operator from 2000 through 2005. The address listed for the business is for a residence. No other information is listed. Due to the address being related to a residence and not for a commercial property, and the distance of the facility being over 1,000 feet from the Property, Stantec considers this listing unlikely to represent a REC to the Property. Therefore, Stantec recommends no further investigation related to this listing.			
KC-130 Refuel Hose Mishap 13891 Fontanelle Place San Diego, CA	FINDS, SLIC	1457 feet south	No
A refueling hose for a military aircraft stationed at Marine Corps Air Station (MCAS) Miramar detached during a local flight on October 2, 2010. A portion of the hose landed on the roof of a house in the Carmel Mountain Ranch neighborhood of the City of San Diego. Residual jet fuel (JP-5) in the three-inch diameter hose was			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
released to the side-yards of the residences at 13885 and 13891 Fontanelle Place. Excavation activities and confirmation sampling was performed at these locations, and a total of approximately 65 cubic feet of soil was removed. This case received regulatory closure from the San Diego DEH in 2010. Due to the nature of the listing being very limited, and the case receiving regulatory closure, Stantec considers this listing unlikely to represent a REC to the Property. Therefore, Stantec recommends no further investigation related to this listing.			

The remaining listings in the database search report provided in Appendix C do not constitute a REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 Local Health Department

Agency Name Contact Information	Finding
San Diego County Department of Environmental Health (SDCDEH) 5500 Overland Avenue #170 San Diego, CA 92123 (619) 338-2222	Stantec submitted a request to SDCDEH regarding files for the Property. Based on records obtained from the SDCDEH, the 500-gallon double walled gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property. Additional records available included inspection reports for the AT&T and Verizon Wireless Communication tower, and the Carmel Mountain Ranch Country Club. No violations were reported in the inspection reports. Copies of the records are provided in Appendix D.

4.3.2 Regional Water Quality Control Board

Agency Name Contact Information	Finding
Regional Water Quality Control Board (RWQCB) – San Diego Region 2375 Northside Drive, Suite 100 San Diego, CA 92108 (619) 516-1990 http://geotracker.waterboards.ca.gov/	Stantec submitted a request to RWQCB regarding files for the Property. According to agency correspondence, no records are available for the Property. Additionally, Stantec searched for available records on the RWQCB's online database Geotracker. No records were available for the Property address
Department of Toxic Substances Control (DTSC) 2375 Northside Drive, Suite 100, San Diego, California 92108	Stantec submitted a request to DTSC regarding files for the Property. A letter was received from this agency, dated March 27, 2018, indicating that no records exist for the Property address at this agency. Additionally, Stantec searched for available records on the DTSC's online database Envirostor. No records were available for the Property address.

4.3.3 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
City of San Diego Development Services Department 1222 First Avenue, 2nd Floor San Diego, California 92101	Stantec reviewed available records for the Property at the City of San Diego Development Services Department. These records indicated several different addresses related to the Property. After a thorough review, the address of 14050 Carmel Ridge Road had multiple documents titled Hazardous Materials Questionnaire and indicated the presence of an underground storage tank (UST) containing either gasoline or diesel. No other documents were identified confirming the presence of the UST at this agency. Other permitting documents were on file related to the construction of the club house at this address.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Stantec was provided with a preliminary title report for the Property from New Urban West, Inc. prepared by First American Title Company dated March 02, 2018. A copy of the title report is provided in Appendix D. Stantec identified no environmental liens associated with the Property.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1939	1" = 1250'	The Property and surrounding area appears undeveloped land. An area to the southeast of the Property appears to be cleared but the use of this area is undiscernible due to the scale of the photograph.
1949	1" = 1250'	The Property and surrounding area appears largely similar to the previous photograph. A road is present to the west of the Property, in the location of present-day Intersate-15.
1953 1964	1" = 1250'	The Property and surrounding area appears similar to the previous photograph. A single access road is visible in the area of the Property, leading to what appears to be a small quarry. Minor development is observable west of Interstate-15.
1967	1" = 1250'	The Property and surrounding area appears to be undeveloped. There appear to be unpaved access roads and trails in the area of the Property. New development is observable west of Interstate-15.
1970	1" = 1250'	The Property and surrounding area appears to be undeveloped. There appear to be unpaved access roads and trails in the area of the Property. The area west of Interstate-15 appears mostly developed.
1979	1" = 1250'	The Property and surrounding area appears similar to the previous photograph.
1985	1" = 1250'	The Property and surrounding area appears to be under development. The area west of Interstate-15 appears fully developed.
1989	1" = 1250'	The Property appears to be developed as a golf course and country club. Immediately adjacent properties are developed with residential houses. Nearby property appears to be under development as a residential neighborhood, with what appears to a commercial development north of the Property.
1996 2002 2005 2010 2014	1" = 1250'	The Property is fully developed with the country club, and the surrounding residences are fully developed. Commercial development is present north of the Property. Minor changes are observable in the surrounding area throughout the years, but the area is largely unchanged from 1996 to 2014.

EDR, 2018

The Property and adjacent land have been historically undeveloped land until circa 1985. At this time, development of the gold course, country club, and nearby Carmel Ridge neighborhood

began. No RECs were identified from the historical aerial photography of the Property and surrounding area.

Copies of the historical aerial photographs are located in Appendix C.

4.4.3 City Directories

Stantec reviewed the historical city directory abstract provided by EDR. City directories were available from 1903 until 2014. The following is a summary of Stantec's review of the city directory listings:

Subject/Adjoining Property	Year	Listed Occupants
Property: 14050 Carmel Ridge Road	2014	Club Mr Boutique
Property: 14050 Carmel Ridge Road	2010 – 2014	Pacs Enterprises LLC
Property: 14050 Carmel Ridge Road	2000 - 2006	Carmel Mtn Ranch Country Club
Property: 14050 Carmel Ridge Road	1991-1995	Maintenance / Gold Course Pro Shop / Clubhosue
Property: 11747 Cedarhurst Lane	--	Not listed
Property: 11730 Boulton Avenue	--	Not listed
Property: 14424 Highland Ranch Road	--	Not listed
Property: 14404 Highland Ranch Road	--	Not listed
Property: 12153 Ted Williams Parkway	--	Not listed
Property: 12107 Ted Williams Parkway	--	Not listed
Property: 12253 Ted Williams Parkway	--	Not listed

Name of city directories and source: EDR, 2018

Addresses for the surrounding area were listed primarily as residential properties. No RECs were identified in the city directories. A copy of the complete City Directory Abstract is provided in Appendix C.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; however, there is no coverage for the Property. The Sanborn® Map Search Report is presented in Appendix C.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps of the Property vicinity to help identify past Property usage and areas of potential environmental concern.

Stantec identified no additional RECs based on its review of the topographic maps. Copies of the historical maps are provided in Appendix C. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1903 1930	1:62,500	The Property and surrounding area appears to be undeveloped; however, given the scale, no Property detail is visible. There appears to be two roads in the area, transecting from southwest to northeast, but no identifying descriptions are provided on the map.
1942	1:24,000	The Property and surrounding area is depicted as undeveloped. Chicarita Creek is shown to the west of the Property, with an unpaved, unnamed road. Highway-395 is shown east of the Property.
1952	1:24,000	The Property and surrounding area remains undeveloped. A "Gravel Pit" and access road is depicted in the area of the Property. A new highway is shown to the west of the Property and is now identified as Highway-395. The highway located east of the Property, formerly identified as Highway-395, now has no identifying marks.
1967	1:24,000	The Property and surrounding area appears similar to the previous map. Minor development has occurred west of the highway west of the Property. Some development has occurred along the road east of the Property and is now identified as Pomerado Road.
1975	1:24,000	The Property appears similar to the previous topographic map. New development is depicted along each of the nearby highways, shown as a purple shading.
1996 2012	1:24,000	The Property and surrounding area is fully developed with the present-day configuration.

USGS via EDR, 2018

4.4.6 Other Historical Sources

Stantec did not review any additional historical sources for the Property.

5.0 PROPERTY RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Mr. Joshua Sargent, Geologic Project Specialist with Stantec, on March 30, 2018. Access to the Property was provided by Mr. Jonathan Frankel with New Urban West, Inc. Mr. Frankel coordinated access to the Property with the Property Owners. Stantec was accompanied by Mr. Frankel and Mr. Kevin Hwang, Property owner, during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of the shallow soil samples. Photographs collected during the Property visit are included in Appendix A.

5.1 PROPERTY RECONNAISSANCE METHODOLOGY

The Property reconnaissance focused on observation of current conditions and observable indications of past uses and conditions that may indicate the presence of RECs. The Property reconnaissance was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse transects across the Property.
- Traverse the periphery of all structures on the Property.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

Weather conditions during the visit to the Property were clear and sunny. There were no weather-related property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located in a mixed residential and commercial area of northern San Diego City, California. The majority of the country club is bordered with residential development, with commercial retail located to the northwest of the Property.
Property Operations.	The Property is currently occupied by an operating country club and golf course. The Property is bordered with residential properties.
Structures, Roads, Other Improvements:	An asphalt driveway at 14050 Carmel Ridge Road leads to a large parking lot that serves as the country club's clubhouse. The clubhouse is three stories and is used as a pro shop, kitchen and dining area, guest check-in, bridal suite, and an electric golf cart service area in the partial basement area. Three temporary trailers are located in the southwestern portion of the southwestern portion of the parking lot and serve as auxiliary county club offices. A single-story masonry structure is located adjacent to these

	temporary trailers and is utilized by a communications company as a server building with a backup generator. No access was provided for this communications building. A maintenance building used for servicing vehicles used at the country club is located at the southeastern portion of the Property. The maintenance building has five service bays with one single-post in-ground hydraulic lift. A storage room inside this building contains fertilizer used on at the country club; a chemical storage shed containing pesticides; a 1,000-gallon aboveground storage tank (AST) containing pre-mixed fertilizers and water; a dispenser island with one 500-gallon AST containing gasoline and one 500-gallon AST containing diesel. A suspect concrete patch was noted in the parking area of the maintenance building, possibly related to a former underground storage tank (UST).
Property Size (acres):	Approximately 121 acres
Estimated % of Property Covered by Buildings and/or Pavement:	5%
Observed Current Property Use/Operations:	Operating country club.
Observed Evidence of Past Property Use(s):	Golf course, club house, and maintenance shop.
Sewage Disposal Method (and age):	City sewer system.
Potable Water Source:	City of San Diego.
Electric Utility:	SDG&E

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	Various greases and cleaners were noted in the electric golf cart maintenance area located in the basement of the clubhouse. A "chemical shed" was observed near the maintenance building and housed various pesticides. Two 500-gallon ASTs were observed southeast of the maintenance building within a concrete secondary containment. These ASTs contained gasoline and diesel. Small containers of various greases and other lubricants were observed inside the maintenance building.

Observations	Description/Location
Drums (≥ 5 gallons):	Multiple drums were located inside of the maintenance building. A list of these drums and their contents are as follows: • (1) 55-gallon drum of used motor oil • (1) 55-gallon drum of used antifreeze • (1) 55-gallon drum of used oil filters • (1) 55-gallon drum of eco animal-based solvent with a metal sink and pump attached to the top
Strong, Pungent, or Noxious Odors:	None detected.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	Stantec observed three pad mounted transformers near the clubhouse building. A pad mounted transformer was also observed east of the maintenance building. All transformers appeared to be in good condition with no leaks or staining present. They do not represent an environmental concern to the Property.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of the building interiors at the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
Heating/Cooling Method:	According to the Property owner, the club house is cooled and heated through multiple roof-mounted HVAC systems, and one concrete-mounted HVAC system located outside of the clubhouse.
Surface Stains or Corrosion:	Surface stains were noted in the basement electric golf cart maintenance area. Additional surface staining was observed in the maintenance building near drum storage areas.
Floor Drains and Sumps:	Approximately eight (8) floor drains were observed in the basement electric golf cart maintenance and storage are, with one floor drain located in the wash area close by. Approximately five (5) floor drains were noted in the kitchen of the clubhouse. No floor drains were observed in the maintenance building; however, a large drain was observed outside of the maintenance building with the surrounding concrete stained green from fertilizer.
Other Interior Observations:	Due to site access limitations, Stantec was unable to observe the interior of the communications building located in the southern

Observations	Description
	part of the clubhouse parking lot. According to signage on the exterior of this building, there appears to be a diesel fuel tank located inside, likely used in conjunction with a backup generator.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-Property Pits, Ponds, or Lagoons:	Stantec observed a small pond on hole number 11. Additional water crossings are present throughout the course; however, at the time of the Property visit, these water features were dry.
Stained Soil or Pavement:	Stantec observed minor staining adjacent to the gasoline and diesel ASTs located south of the maintenance building.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	No areas indicative of solid waste disposal were observed.
Potential Areas of Fill Placement:	No mounds, piles or depressions suggesting the placement of old fill material were observed on the Property.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	No storm water was present during the Property visit. Stormwater is expected to infiltrate through unpaved areas of the Property, and, where applicable, flow over hardscaped surfaces to the local drain and gutter system.
Wells:	No wells were observed.
Septic Systems:	Stantec observed a grease trap in the loading bay area along the west side of the club house. It appears this grease trap is connected the sewer system.
Other Exterior Observations:	Multiple cellular antennas were observed on the exterior of the club house.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the Property reconnaissance.
Former USTs:	The Property was listed in the environmental database report has having a former 500-gallon underground storage tank (UST) containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of

	the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.
Other Underground Structures:	Stantec observed a two-stage grease trap located in the loading area west of the club house related to the kitchen. There are no reported issues or violations known associated with the grease trap. Additionally, a two-stage clarifier was observed east of the club house, related to the electric golf cart wash area. There are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The grease trap is not considered an environmental concern to the Property; however, prior to redevelopment the grease trap will need to be properly removed per regulatory requirements. The clarifier is identified as an REC to the Site due to the potential that oils and solvents could have been released into this structure. Stantec also observed a single-post in-ground hydraulic lift located within the maintenance building. Minor staining was observed around this lift. Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	Stantec observed a 500-gallon diesel and a 500-gallon gasoline aboveground storage tanks with a concrete secondary containment located southeast of the maintenance building. Additionally, Stantec observed a 1,000-gallon fertilizer and water tank located east of the maintenance building. Stantec observed the a 100-gallon tractor hydraulic fluid and a 100-gallon new oil ASTs located inside the maintenance building.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties:

NORTH	Residential.
SOUTH	Residential.
EAST	Residential.
WEST	Residential.

Refer to Figure 2.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining properties:

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property is approximately 807 feet above mean sea level (amsl) and generally sloped to the north. The regional gradient is variable (EDR, 2018).

6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name and contact information	Relationship to Property	Key findings:
Mr. Kevin Hwang	Owner	Mr. Hwang is familiar with the Property for the past 15 years. Mr. Hwang indicated that the gold course was developed in 1984 and the club house was developed in circa 1986. This information is consistent with findings from permitting in that time period. Mr. Hwang was unaware and had no knowledge of historical USTs being located on the Property.

7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data review, and a property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

Finding 1: An environmental records search was performed and identified sites within their respective ASTM E 1527-13 search radii of the Property that may represent RECs, HRECs, or *de minimis* conditions.

Opinion 1: Based on one or more of the following reasons: distance from the Property, position of sites with respect to assumed groundwater flow direction, the native soils, and regulatory status, none of the nearby sites identified in the environmental records search report represents an environmental concern to the Property. The environmental records search identified no RECs, HRECs or *de minimis* conditions at or near the Property.

Finding 2: The Property was listed in the environmental database report has having a former 500-gallon underground storage tank (UST) containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required.

Opinion 2: The former UST is considered an REC to the Property. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST.

Finding 3: Stantec observed a two-stage clarifier was observed east of the club house, related to the electric golf cart wash area ere are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer.

Opinion 3: The clarifier is considered an REC to the Property. The clarifier will need to be properly removed per regulatory requirements. Soil samples should be collected at that time to verify no impact exists that would require remedial action.

Finding 4: During the site visit, Stantec identified the presence of two 500-gallon ASTs containing gasoline and diesel fuel southeast of the maintenance building. The ASTs appeared in good condition located within a concrete secondary containment. The concrete secondary containment structure appears intact and in good condition with no visible cracks or staining, dark staining was observed adjacent to the ASTs outside of the secondary containment in the soil, likely related to fueling operations.

Opinion 4: Due to the limited area of dark staining observed, approximately 3-foot by 3-foot, this is considered a de minimis condition.

Finding 5: During the site visit, Stantec identified the presence of a single-post in-ground hydraulic lift located within the maintenance building in the southeastern portion of the Property. Oil staining was observed around the piston of the lift.

Opinion 5: Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.

Finding 6: During the site visit, Stantec identified the presence of a chemical storage shed located east of the maintenance building containing pesticide products used throughout the Property.

Opinion 6: Organochlorine pesticides and their drying agents are known to accumulate in shallow soils where the products are applied. Therefore, the presence of the pesticides represents a REC to the Property.

Finding 7: During the site visit, Stantec identified a floor drain with visible staining on the surrounding concrete located southeast of the maintenance building.

Opinion 7: Although the staining was determined to be related to fertilizer disposal, it is anticipated that other chemicals have been disposed of at this location. Therefore, Stantec has identified this feature as a potential REC to the Property and suggests performing an assessment at this located for the presence of other chemicals of concern.

7.2 DATA GAPS

The federal AAI rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a "data gap" as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions From Scope of Work Referenced in Section 1.4:	None
Weather-Related Restrictions To Property Reconnaissance:	None
Facility Access Restrictions to Property Reconnaissance:	Stantec was unable to access the interior of the Verizon Wireless building located in the parking area of the club house. A sign posted on the door indicated that the building stored diesel fuel. It is unknown if the fuel is contained aboveground or underground.
Other Property Reconnaissance Restrictions:	None
Data Gaps From Environmental Records Review:	None
Data Gaps From Historical Records Review:	None
Data Gaps From Interviews:	None
Other Data Gaps:	None

7.3 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E-1527-13 (and Final Rule 40 CFR Part 312 et seq.) with respect to the Property. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property with the exception of the following:

- **Maintenance Building.** A maintenance building used for servicing vehicles used at the country club is located at the southeastern portion of the Property. The maintenance building has five service bays with one single-post in-ground hydraulic lift. Minor staining was observed around the in-ground hydraulic lift. Given the potential for a release of hydraulic fluid from the in-ground hydraulic lift, the lift is considered a REC. Stantec recommends conducting a subsurface investigation in the vicinity of the lift.

- **Golf Course Maintenance.** A storage room inside the maintenance building contains fertilizer used on at the country club; a chemical storage shed containing pesticides; and a 1,000-gallon aboveground storage tank (AST) containing pre-mixed fertilizers and water. Organochlorine pesticides and their drying agents are known to accumulate in shallow soils where the products are applied. Therefore, the presence of the pesticides represents a REC to the Property.

- **Maintenance Building Clarifier.** A two-stage clarifier was observed east of the club house, related to the electric golf cart wash area ere are no reported issues or violations known associated with the clarifier. The clarifier drains into the sanitary sewer. The clarifier is

identified as a Recognized Environmental Condition (REC) given oils and solvents could have been discharged into the clarifier, as a result of maintenance activities.

- **Former USTs.** The Property was listed in the environmental database report has having a former 500-gallon UST containing gasoline installed in 1989 and removed in 1993. Based on records obtained from the San Diego County Department of Environmental Health, the gasoline UST was located adjacent to the eastern corner of the club house and was removed under the oversight of the San Diego Fire Department on March 18, 1999. No staining or odors were observed in the native soil during the removal and no reinspection was required. No detections were reported in the two soil samples collected from beneath the UST and analyzed for total petroleum hydrocarbons (TPH) by EPA Method 8015. One additional soil sample was also analyzed for TPH; volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylenes (BTEX); and total recoverable petroleum hydrocarbons (TRPH). Minor detections of 1,1-DCE at 1.2 milligrams per kilogram (mg/kg) and toluene at 4.1 mg/kg were reported. The Site Assessment and Mitigation (SAM) Program reviewed the soil analytical results and determined that no further action was required. Soil vapor samples were not collected at the time of the UST removal, therefore, Stantec recommends collecting soil vapor samples in the vicinity of the former UST location to evaluate the potential for residual vapor concentrations associated with the former UST that could represent an environmental concern to the Property.

Stantec identified the following de minimis conditions associated with the Property:

- **Soil Staining.** During the site visit, Stantec identified the presence of two 500-gallon ASTs containing gasoline and diesel fuel in the southeast portion of the maintenance building. The ASTs appeared in good condition and located within a concrete secondary containment. The concrete secondary containment structure appears intact and in good condition with no visible cracks or staining. Dark staining was observed adjacent to the ASTs outside of the secondary containment in the soil, likely related to fueling operations. Due to the limited area of dark staining observed, approximately 3-foot by 3-foot, this is considered a de minimis condition.

8.0 NON-SCOPE CONSIDERATIONS

No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA with the following exceptions:

8.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

The age of the dwelling as follows: maximum risk is from paint applied before 1950.

There is severe risk from paint applied before 1960.

There is moderate risk from deteriorated paint applied before 1970.

There is slight risk from the paint that is intact but applied before 1977.

The condition of the painted surfaces.

The presence of children and certain types of households in the building.

Previously reported cases of lead poisoning in the building or area.

Due to the age of the structures (constructed circa 1985), LBP is unlikely to be present at the Property in the main clubhouse and nearby structures.

8.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is an Asbestos Containing Material (ACM) that can be reduced to powder by hand pressure. Friable asbestos can become airborne and be inhaled, and has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Stantec makes no warranty as to the possible existence or absence of inaccessible materials or to their evaluation with respect to asbestos content. Samples of suspect ACM should be collected for laboratory analysis of asbestos prior to any renovation or building demolition, in order to determine the need for compliance with EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) regulations.

Given the age of the existing buildings on the Property (circa 1985), the presence of ACM is considered unlikely.

8.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA (http://www.epa.gov/radon/zonemap.html) on average indoor radon concentrations in the vicinity of the Property.

Zip Code 92128	**San Diego County**
EPA Radon Zones (w/Average Measured Indoor Radon concentrations)	
100% below 4 pCi/L	Zone 3 – low (<2 pCi/L); average first floor concentration 0.400 pCi/L
Normally-occupied sub grade areas (i.e. basement apartments, offices, stores, etc.)?	
A partial basement is present under the club house and it utilized for the storage, charging, maintenance, and cleaning of the electric golf carts use on the Property.	

The Property is located in Zone 3 and is considered to have low potential for radon. Stantec concludes that radon is unlikely to represent an environmental concern to the Property and recommends no further investigation regarding this issue.

8.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the Property is not located within a 100-year or 500-year flood plain. Stantec also searched the FEMA flood plain map service at www.msc.fema.gov and the Property is not located in a flood plain.

8.5 DRY-CLEANING OPERATIONS

No dry-cleaning operations were reported or observed at or near the Property.

PROPERTY MAP -
MAINTENANCE BUILDING

Appendix A

PHOTOGRAPHS OF THE PROPERTY AND VICINITY

Photo #1 View of clubhouse from parking area located at 14050 Carmel Ridge Drive.

Photo #2 View of exterior of clubhouse. This view shows the pro shop and a partial view of the bridal suite.

Photo #3 View of grease trap located in the loading bay area near the kitchen of the clubhouse.

Photo #4 View of floor drain and household cleaners in loading bay area near the kitchen.

Photo #5 View of remodeling area in the restroom and locker room area of the clubhouse. The remodeling is a result of water flooding damage.

Photo #6 View of dining area in clubhouse.

Photo #7 View of pro shop located in the ground floor of the clubhouse.

Photo #8 View of bridal suite located on the ground floor of the clubhouse.

Photo #9 View of electric golf cart storage area located in the partial basement of the clubhouse.

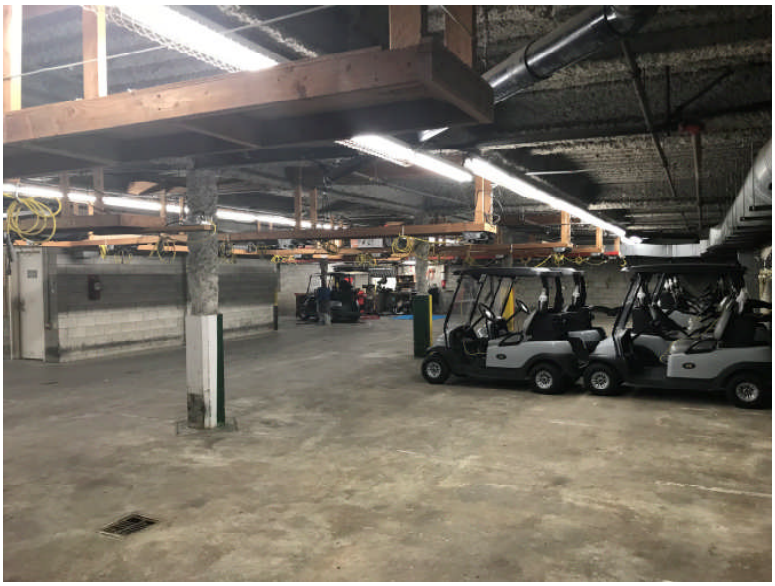

Photo #10 Alternate view of electric golf cart storage area located in the partial basement of the clubhouse.

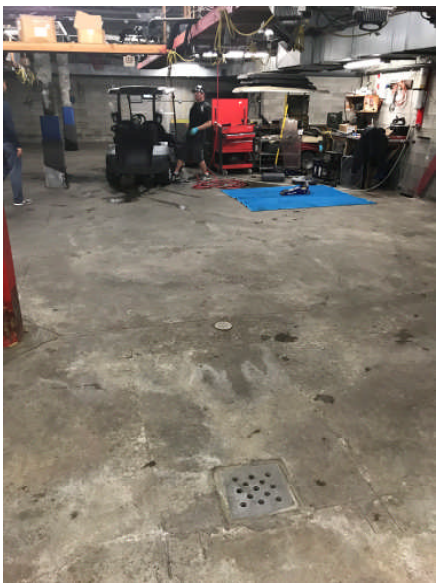

Photo #11 View of electric golf cart maintenance area located in the partial basement of the clubhouse.

Photo #12 View of electric golf cart wash area located in the partial basement of the clubhouse.

Photo #13 View of two-stage clarifier unit located near the electric golf cart wash area located on the west side of the clubhouse.

Photo #14 Overview look of kitchen area located inside of the clubhouse on the ground floor.

Photo #15 View of floor drain located in the kitchen area within the clubhouse.

Photo #16 View of walk-in refrigerator located within the kitchen area inside the clubhouse.

Photo #17 View of gasoline and diesel ASTs located southeast of the maintenance building.

Photo #18 View of gasoline and diesel AST secondary containment. Minor staining observed on the concrete secondary containment.

Photo #19 View of pesticide storage shed, and fertilizer/water AST, located east of the maintenance building.

Photo #20 Close-up view of pesticide storage shed.

Photo #21 View of chemicals stored inside pesticide shed.

Photo #22 Close-up view of fertilizer/water AST. Minor staining visible on ground near the AST.

Photo #23 View of fertilizer storage room located in the eastern portion of the maintenance building.

Photo #24 Interior view of fertilizer storage area. This room was previously used for cellular communications equipment.

Photo #25 Exterior view of maintenance building.

Photo #26 View of flammable materials cabinet located in the eastern bay of the maintenance building. Minor staining observed beneath the cabinet.

Photo #27 View of equipment stored in the eastern bay of the maintenance station. Minor staining visible on concrete in this are associated with leaking equipment.

Photo #28 View of machinist lathe located in maintenance shop. Flooring located beneath the lathe was observed to be heavily stained with gear lubricant.

Photo #29 View of waste oil, waste antifreeze, waste oil filters, and waste absorbent drums located within the maintenance building. The waste oil and waste anti-freeze drums are located within a secondary containment unit, while the waste oil filters and waste absorbent drums are stored on bare flooring.

Photo #30 View inside secondary containment unit for the drums. Free liquid was observed in the bottom on the secondary containment unit.

Photo #31 View of a single-post in-ground hydraulic lift centrally located within the maintenance building. Surface staining was visible around the piston of the lift.

Photo #32 View of compressor located along the back wall inside the maintenance building. Minor staining was observed in the area of the compressor unit.

Photo #33 View of 100-gallon tractor hydraulic fluid AST, 100-gallon new oil AST, animal-based solvent wash station with sink, and 55-gallon drum of granular absorbent. No secondary containment was observed for these features.

Photo #34 View of 5-gallon buckets of lubricants, oils, and greases. These containers are stored on a secondary containment unit.

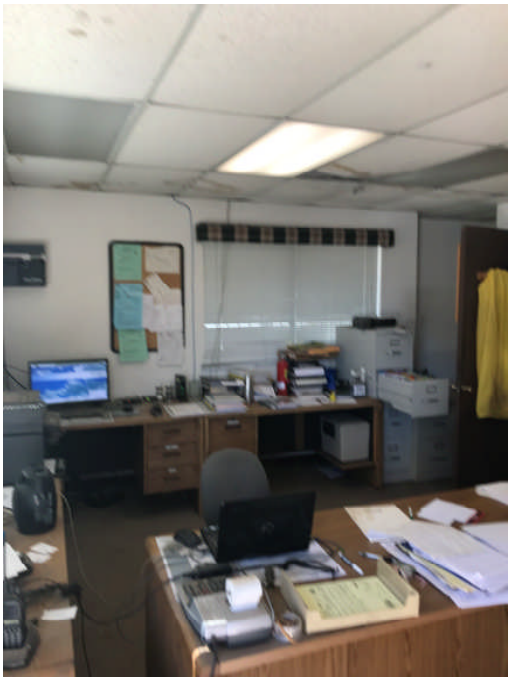

Photo #35 View of office space located in the western portion of the maintenance building.

Photo #36 View of locker room and break room located in the western portion of the maintenance building.

Photo #37 View of drain located southeast of the maintenance building. Green staining was visible on the concrete surrounding this drain.

Photo #38 View of wood pile located east of the maintenance building.

Photo #39 View of miscellaneous equipment stored east of the maintenance building.

Photo #40 View of cellular infrastructure located east of the maintenance building. This equipment appears to be electrical-based only.

Photo #41 View of suspect concrete patch located southeast of maintenance building.

Photo #42 Exterior view of Verizon Wireless building located in the southwestern portion of the clubhouse parking lot.

Photo #43 Exterior view of Verizon Wireless building located in the southwestern portion of the clubhouse parking lot.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 7 RCRA-LQG sites within approximately 1.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 8 RCRA-SQG sites within approximately 1.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are

2 RCRA-CESQG sites within approximately 1.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 5 ENVIROSTOR sites within approximately 2 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 SWEEPS UST sites within approximately 1.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 1.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/21/2018 has revealed that there are 76 FINDS sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2016 has revealed that there are 139 HAZNET sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 1.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 1.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 15 RGA LUST sites within approximately 1 mile of the target property.

RB Case Number:	Not reported
File Location:	Local Agency
Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Not reported
Site History:	A refueling hose for a military aircraft stationed at Marine Corps Air Station (MCAS) Miramar detached during a local flight on October 2, 2010. A portion of the hose landed on the roof of a house in the

KC-130 REFUEL HOSE MISHAP (Continued) **S110656440**

Carmel Mountain Ranch neighborhood of the City of San Diego. Residual jet fuel (JP-5) in the three-inch-diameter hose was released to the side-yards of the residences at 13885 and 13891 Fontanelle Place. Emergency response contractors removed a combined total of approximately 60 cubic feet of soil and landscaping materials (i.e., gravel and weed abatement fabric) observed to be stained by JP-5. Six soil samples were collected from the yards and analyzed for total petroleum hydrocarbons (TPH) as JP-5 and volatile organic compounds (VOCs). JP-5 was detected in one of the samples collected adjacent to a fence-line between the residential lots at a concentration of 155 milligrams per kilogram (mg/kg). TPH was not detected in the remaining five samples and VOCs were not detected in any of the samples. On October 12, 2010, additional soil was removed from the location of the sample in which JP-5 was detected. Approximately two cubic feet of soil were excavated. Three confirmation samples were collected from the sides and base of the excavation. JP-5 was detected in one of the confirmation samples at a concentration of 13.4 mg/kg. The sample was collected at the base of the excavation from a depth of 1.5 below the ground surface. Soil and landscaping materials removed from the site were placed in a roll-off bin and transported to MCAS Miramar pending sample analytical results. The soil was then transported offsite to a licensed disposal facility.
The site is located in a beneficial use area; however, the nearest production well is located 4,775 feet to the northwest and is used for golf course irrigation. Due to the absence of VOCs in the soil samples, the low levels of TPH detected, the removal of the impacted materials, the lack of surface water and/or groundwater receptors, and the lack of risk to human health, DEH concurs that no further action is necessary at the site.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No

RITE AID #5662 (Continued) **1014387675**

Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 291
. Waste name: Latex waste

. Waste code: 311

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	JS
RB Case Number:	Not reported
Local Agency:	SAN DIEGO COUNTY LOP
File Location:	Local Agency
Local Case Number:	H32744-001
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Gasoline
Site History:	In December 2003, soil samples were collected under the direction of DEH during dispenser and product piping upgrade activities. Based on laboratory data, Case H32744-001 was opened on April 12, 2004. During upgrade activities, approximately 82 cubic yards of soil was removed from the site. Between August 2004 and June 2007, six soil borings were advanced and five groundwater monitoring wells were installed. At total of 91 soil samples were collected for analysis to define the vertical and horizontal extent of soil contamination. The chemicals of concern in soil were MTBE and TBA. The highest concentration for TPHg was reported at 1.1 mg/kg. BTEX concentrations were report below laboratory detection limits. The consultant concluded that soil contamination is defined vertically and horizontally and has not migrated offsite. The consultant also stated that residual MTBE and TBA in soil do not pose a risk to human health, nearby sensitive receptors, or the environment. The groundwater was monitored and sampled for 19 consecutive quarters beginning in June 2005. Dissolved-phase benzene concentrations have been below the MCL in all wells since October 2007. Dissolved-phase MTBE concentrations have been below the secondary MCL in all wells since January 2008. Dissolved-phase TBA concentrations are currently above the State

SHELL (Continued) **S106874606**

Action Level (AL) in wells MW-1 (52 ug/l), MW-3 (190 ug/l), and MW-5 (730 ug/l) and are showing a decreasing trend. The consultant estimates TBA will reach the AL by 2019. Based on the data, the consultant concluded that groundwater contamination has been adequately defined and does not pose a risk to human health, nearby sensitive receptors, or the environment. Based on available data, DEH concurs with the consultants conclusions.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

SHELL SERVICE STATION (Continued) **1014677917**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency:	SAN DIEGO COUNTY LOP
File Location:	Local Agency
Local Case Number:	H29570-002
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	Please see "Site Documents" for additional information. The site consists of the combined Carmel Mountain Ranch Car Wash and Chevron gasoline service station, constructed in 1990. A convenience store building is also located on the property. This case (H29570-002) was opened in August 2002 after fuel-related contamination was reported in soil samples collected below dispensers during a product piping upgrade. A Voluntary Assistance Program (VAP) case (H29570-001, currently being considered for closure) had previously been opened in August 2001 at the site to address potential health risks from contaminated soil/soil vapors associated with a chlorinated solvent release at the dry cleaning facility previously located on the adjacent property to the north (11040 Rancho Carmel Drive). Limited soil and soil gas investigations conducted from 1998-2000 indicated that dissolved chlorinated volatile organic compounds (VOCs) had migrated to the property from the dry cleaners site. Closure of this case applies only to the contamination associated with the unauthorized release of petroleum products at the car wash site. The Regional Water Quality Control Board (RWQCB) is overseeing the assessment and mitigation of the adjacent site release (Former Marstons Cleaners) under Case 2090006 (H25987-001). However, because several of the downgradient monitoring wells installed for the chlorinated solvent release are located on the car wash property, data from these wells (MW-3, MW-4, MW-5, and MW-9) are included in the car wash site characterization. Elevated concentrations of trichloroethene (TCE), perchloroethene (PCE), and chlorinated by-products are present in several of the wells located in the northern portion of the car wash site. Petroleum hydrocarbon contaminants were reported in soil samples collected below the eight dispensers and piping during an April 2002 piping upgrade at the site. Benzene was not detected in any of the samples, but elevated concentrations of toluene, ethylbenzene, and xylenes were detected in the sample collected approximately 5.5 feet below one dispenser (D1). Methyl tertiary butyl ether (MTBE) was detected only in the sample collected below the dispenser (D2) adjacent to D1. Petroleum hydrocarbon contaminant concentrations in the remaining dispenser/piping soil samples were very low or below detection limits. In May 2002, approximately 36 tons of petroleum

CARWASH OF AMERICA (Continued) **U003789889**

hydrocarbon-impacted soil was excavated from the D1/D2 dispenser area and disposed of at an off-site facility. Subsequently, four soil borings were installed in the dispenser area in November 2004. Total petroleum hydrocarbons as gasoline (TPH-g) was not detected in the soil boring samples, but MTBE (only) was detected in soil samples collected from each boring for VOCs analysis. The consultant concluded that the source of benzene, toluene and MTBE from leaking pipes and/or dispensers had likely been removed. In May 2007, approximately 332 tons of chlorinated-solvent bearing soil was removed from an area along the northern portion of the site and the southern portion of the adjacent property as part of a remedial action for the dry cleaners site. Analytical results for soil vapor samples collected at the car wash site in 1998 and 2000 indicated the presence of elevated levels of PCE and TCE, along with lower concentrations of BTEX, MTBE, and other chlorinated VOCs. The highest PCE and TCE concentrations were detected in samples collected near the northern border of the property. DEH reviewed the risk assessment data submitted in 2001 and concurred that there was acceptable risk to the employees of the convenience store from benzene, but requested that soil vapor probes be installed adjacent to the store in order to fully assess the chlorinated VOCs risk. In July 2004, six additional soil vapor probes were installed in borings across the car wash property, including three near the perimeter of the store building. Based on 5-foot vapor sample results from all of the borings, the cumulative health risk for PCE, TCE, 1,1-dichloroethene, vinyl chloride, benzene, and MTBE in soil vapor for an adult worker in the store was calculated as 1 x 10-6, and the combined hazard index was 2.8 x 10-2. The consultant concluded that the measured concentrations do not pose an unacceptable risk to on-site receptors based on the site use, and DEH concurred with the findings in a meeting held on February 23, 2005. For the March 2011 Corrective Action Plan prepared for the site, the consultant recalculated the human health risks using only data from the three soil vapor probes installed near the store building. An estimated cancer risk of 3 x 10-7 (less than the threshold cancer risk of 1 x 10-6), and a non-cancer hazard index of 3.0 x 10-4 (acceptable level is less than one) were calculated. The consultant stated that the risk associated with on-site workers was less than significant. Seven site groundwater monitoring wells were installed at the site between 2003 and 2010, including four wells associated with the dry cleaners investigation and one cross-gradient well installed on an adjacent hotel parking lot (11002 Rancho Carmel Drive) located west of the dispenser area. Analytical results for groundwater samples collected from the wells indicate that the primary fuel contaminant of concern at the car wash site is dissolved MTBE. Only very low concentrations of non-chlorinated VOCs and TPH-g have been detected in site groundwater. As discussed above, the high concentrations of several chlorinated VOCs (above MCLs) in wells near the northern boundary of the site are being addressed under the Former Marstons Cleaners case. The site is located in a groundwater basin with designated beneficial uses. However, the consultant contacted the City of San Diego, and in a letter dated October 21, 2011, the City stated that they have no immediate plans to install wells close to the site. However, they reserve the right to develop all available groundwater resources on City property. The consultant determined that there were no sensitive receptors that would be impacted by the groundwater. An irrigation well is located at the Carmel Mountain Highlands Golf and Tennis Resort at 14455 Penasquitos

CARWASH OF AMERICA (Continued) **U003789889**

Drive, but the resort is located greater than one-half mile away from the site to the north. The most recent (November 2010) groundwater data submitted for the site showed maximum MTBE concentrations of 180 micrograms per liter (ug/l) in monitoring well NM-MW-1 (near dispensers) and 32 ug/l in northern well MW-5. Both concentrations exceed the maximum contaminant level (MCL) for MTBE of 13 ug/l. MTBE concentrations reported in the other site wells were less than 1 ug/l, including the most downgradient well (NM-MW-3) located near the southern boundary of the car wash property. In the DEH-approved March 2011 Corrective Action Plan prepared for the site, the consultant recommends natural attenuation as the site remedy. The extent of soil and groundwater contamination has been adequately delineated, and the consultant concludes that the likely fuel contaminant sources have been removed; the plume is stable and contracting; the dissolved-phase petroleum hydrocarbons will remediate by natural attenuation; and dissolved MTBE should naturally attenuate to below the MCL in approximately 15 years. Based on the assessment and remediation activities conducted at the site and vicinity, the consultant recommends case closure. DEH concurs with these conclusions and the recommendation for case closure.

CARWASH OF AMERICA (Continued) **U003789889**

Case Worker:	TS
Local Agency:	SAN DIEGO COUNTY LOP
RB Case Number:	Not reported
File Location:	Local Agency
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Gasoline
Site History:	PLEASE SEE DEH LOP CASE# H29570-002 FOR SITE DOCUMENTS RELATED TO THE CARMEL MOUNTAIN RANCH CAR WASH SITE. The site consists of the combined Carmel Mountain Ranch Car Wash and Chevron gasoline service station, constructed in 1990. A convenience store building is also located on the property. This Voluntary Assistance Program (VAP) case (H29570-001) for the site was opened in August 2001 to address potential human health risks to site workers from contaminated soil/soil vapor associated with a chlorinated solvent release at a dry cleaning facility previously located on the adjacent property to the north (11040 Rancho Carmel Drive). Limited soil and soil gas investigations conducted in 1998-2000 indicated that dissolved chlorinated volatile organic compounds (VOCs) had migrated to the property from the dry cleaners site. Fuel-related contaminants were also reported in some of the soil vapor samples. This case involves only the soil vapor contamination and on-site human health risks associated with the chlorinated VOCs release and an unauthorized release of petroleum products at the car wash site. The Regional Water Quality Control Board is overseeing the assessment and mitigation of the dry cleaners release (Former Marstons Cleaners) under Case #H25987-001. The fuel-related contamination at the car wash site is addressed under DEH Local Oversight Program (LOP) Case #H29570-002. Analytical results for soil vapor samples collected at the car wash site in 1998 and 2000 indicated the presence of elevated levels of perchloroethene (PCE) and trichloroethene (TCE), along with lower concentrations of benzene, toluene, ethylbenzene and xylenes (BTEX), methyl tertiary butyl ether (MTBE), and other chlorinated VOCs. The highest PCE and TCE concentrations were detected in samples collected near the northern border of the property. DEH reviewed the risk assessment data in 2001 and concurred that there was acceptable risk to the employees of the convenience store from benzene, but requested that soil vapor probes be installed adjacent to the store in order to assess the chlorinated VOCs risk. In July 2004, six additional soil vapor probes were installed in borings across the car wash property, including three near the perimeter of the store building. Based on 5-foot vapor sample results from all of the borings, the cumulative health risk for PCE, TCE, 1,1-dichloroethene, vinyl chloride, benzene, and MTBE in soil vapor for an adult worker in the store was calculated as 1.06 x 10-06, and the combined hazard index was 2.8 x 10-02. The consultant concluded that the measured concentrations do not pose an unacceptable risk to on-site receptors based on the site use. DEH concurred with the risk assessment results in a meeting held on February 23, 2005. In the CAP for the LOP site, dated March 31, 2011, the consultant recalculated the risks using only the data from the three perimeter soil vapor probes, and the results were lower. The consultant estimated a cancer risk of 2.72 x 10-07 (less than the threshold cancer risk of 1.0 x 10-06) and a non-cancer hazard index of 3.0 x 10-04 (less than one).

FINDS:

Registry ID: 110002804421

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Update Date: 11/02/2012
Case Number: 68476-34-6
Name: DIESEL
Other Information: UNDERGROUND TANK 126451 T001 DIESEL
Material Waste: Material
Hazardous Categories 1: FIRE
Hazardous Categories 2: Not reported

Violations Active Permits:
Permit Number: 126451
Update Date: 11/02/2012
Inspection Date: 04/19/2011
Violation Code: 6HV3152
Violation: ALL MAINT/MONITOR RECORDS NOT AVAILABLE
Violation Citation: All maintenance/monitoring/calibration/ repair records not available. 25293; 2712 (b)
Activity: ACTIVE

Permit Number: 126451
Update Date: 11/02/2012
Inspection Date: 04/01/2003
Violation Code: 6HV3404
Violation: PIPE INT TEST DOESN'T DETECT .1 GPH@150%
Violation Citation: DOUBLE WALLED PRESSURIZED PIPING: OPTION 2-Piping integrity test does not detect 0.1-gph leak with ELLD or at 150% pressure 2636(f)(4)
Activity: ACTIVE

Permit Number: 126451
Update Date: 11/02/2012
Inspection Date: 04/01/2003
Violation Code: 6HV3257
Violation: 2NDRY CONTAINMENT NOT LIQUID FREE
Violation Citation: Secondary containment system components not liquid free. 2631(d)(4)
Activity: ACTIVE

Permit Number: 126451
Update Date: 11/02/2012
Inspection Date: 04/01/2003
Violation Code: 6HV3258
Violation: SENSORS NOT AT LOW POINT OR ADEQUATELY
Violation Citation: Sensors not placed adequately and/or at low point in sumps. 2641(a), 25291(a)(7)(C)
Activity: ACTIVE

Permit Number: 126451
Update Date: 11/02/2012
Inspection Date: 04/13/2004
Violation Code: 6HV3152
Violation: ALL MAINT/MONITOR RECORDS NOT AVAILABLE
Violation Citation: All maintenance/monitoring/calibration/ repair records not available.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Description:	The contractor’s right fuel tank was punctured in a prior accident. 50 gallons were released onto USPS property and cleaned up by a contractor. There was an additional unknown amount released elsewhere including some diesel that leaked from this trruck into the gutter and storm drain across from the post office (11251 Rancho Carmel Dr.).

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 29240

Environmental Interest/Information System
HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status:	Completed - Case Closed
Status Date:	10/16/2014
Case Worker:	NS
RB Case Number:	Not reported
Local Agency:	SAN DIEGO COUNTY LOP
File Location:	Local Agency
Local Case Number:	113134-001
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Gasoline
Site History:	This case was opened in March 2008, following the discovery of contaminated soil beneath the dispenser islands during station upgrade activities in February 2008. Gasoline was detected in soil at a maximum concentration of 490 mg/kg, diesel fuel at 230 mg/kg, benzene at 20 mg/kg, and xylenes at 9.5 mg/kg. Soil samples were collected and analyzed from beneath the dispenser islands, and from soil borings, including borings for monitoring wells. Higher concentrations were limited to the dispenser islands. Low concentrations of contaminants were discovered outside of the dispenser area to a depth of 30 feet below ground surface (bgs). The consultant estimated that there are approximately 8 cubic yards of contaminated soil onsite. Six monitoring wells (MW-4 through MW10) were installed at the site between 2009 and 2011. Groundwater was monitored at the site from October 2009 through March 2013. Free product was not detected at the site. Dissolved phase gasoline and its constituents toluene, ethylbenzene, xylenes, and additives methyl tertiary butyl ether (MTBE) and tert butyl alcohol (TBA) were detected in groundwater. The maximum concentrations of gasoline and MTBE: 140 and 150 ug/l, respectively, were detected in onsite well MW-7. The other dissolved contaminants were below the maximum contaminant levels (MCLs) for all wells. Active remediation has not been conducted at the site. The consultant concluded that the groundwater plume has been delineated and did not extend off-site. The concentrations of MTBE and gasoline have decreased over time. The consultant estimated that it would take 1.6 years for MTBE to remain

96929 (Continued) **U001573302**

below the MCL based on first order decay rate equations and trend analysis. The consultant contacted the City of San Diego regarding current and future uses of groundwater in the site vicinity. The City indicated that there was a private well within a \\% mile radius of the site. The City stated that it had no immediate plans to install production wells in the site vicinity. The consultant evaluated potential sensitive receptors in the site vicinity including surface water and human health. A small pond, is located approximately 500 feet north and upgradient of the site, and Chicarita Creek is located approximately]% mile east-southeast. The consultant stated that based on the location of the pond and the distance to the Creek, the exposure pathways were incomplete. The site is an active gasoline station and a soil vapor survey was not warranted. The consultant reported that subsurface utilities in the site vicinity include gas, electric, water, sewer and storm drain lines, which are buried between 2 and 10 feet bgs. The consultant stated that since the depth to water in site wells had ranged from 22.67 to 36.40 feet, the potential for groundwater to migrate along utility lines is unlikely. The consultant prepared a Low Threat UST Case Closure report for the site which recommended no further action and the destruction of all site monitoring wells. This case meets the criteria for closure under the Low Threat Closure Policy. DEH concurs with the recommendation for no further action.

FINDS:

Registry ID: 110070085176

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Inspection Violation:

Record ID:	DEH2002-HUPFP-133092
Permit Status:	Permit Renewed
Active Permit:	Y
Facility Id Number:	37-000-133092
Program Element:	Underground Storage Tank
Inspection Type:	Routine
Inspection Number:	5413225
Return To Compliance Date:	2016-04-21T00:00:00.000
Nov:	No
Violation Classification:	Class II
Underground Storage Tank Id:	2013-NT2539-1
Container/Tank Id:	Not reported
Last Update:	2017-10-06T00:48:59.000
Inspection Date:	2016-04-21T12:52:56.000
Violation Code:	2030065 (RD) Failure to maintain the interstitial space under constant vacuum, pressure, or hydrostatic such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment. (Product Tight) HSC 25290.1(e)

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 2049

COSTCO WHOLESALE # 452 (Continued) **1004677961**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 884

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

COSTCO WHOLESALE # 452 (Continued) **1004677961**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Latitude: 32.975046
Longitude: -117.091571
Status: Completed - Case Closed
Status Date: 07/02/2012
Case Worker: CH
RB Case Number: 9UT2127
Local Agency: SAN DIEGO COUNTY LOP
File Location: Local Agency
Local Case Number: H06042-001
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The site is currently occupied by a maintenance/rental office for the adjacent residential rental housing. Previous site use included refueling of vehicles used on site, and on January 8, 1992, an underground storage tank (UST) containing gasoline and a dispenser located to the east of the UST were removed from the site. DEH-directed soil sampling was completed at each end of the UST excavation and under the dispenser. Petroleum hydrocarbons were detected in all three samples, with a maximum concentration of 13,400 milligrams per kilograms (mg/kg) detected in the sample from under the dispenser. Based upon these results, Unauthorized Release H06042-001 was opened. In May 1992, the UST excavation was enlarged and extended to approximately 10.5 feet below ground surface (bgs), and the area where the dispenser was located was excavated to 6 feet bgs and extended west to the UST excavation. The excavations were back-filled with clean fill, and approximately 65 cubic yards of soil was removed from the site. Confirmation soil sampling was completed at the north, south, and west ends of the UST excavation and at the bottom of the UST and dispenser excavations. Xylenes were detected in the sample from the bottom of the UST excavation at 0.0339 mg/kg, and were the only gasoline constituents detected in the confirmation samples. Based upon these results, the consultant concluded that the contaminants had been removed from the site and requested that the case be closed. DEH did not concur with case closure and required vertical delineation of soil impacts and groundwater sampling. Further investigation of the site was initiated in 2011 as a result of enforcement action by DEH. A groundwater monitoring well was installed in the location of the former UST and a boring was completed in the location of the former dispenser. Petroleum constituents were not detected in three soil samples collected at 10,

CALIFORNIA PROPERTIES VILLAGE (Continued) **S100727228**

15, and 45 feet bgs during installation of the groundwater monitoring well or in the soil sample collected at 6 feet bgs from the soil boring. DEH had directed that the boring be completed to at least 10 feet bgs; however, shallow bedrock encountered at 7 feet bgs and limited access prevented further drilling in this location.
Groundwater monitoring and sampling was conducted at the site in June and September 2011, and petroleum constituents were not detected in groundwater samples collected during these monitoring events. The groundwater monitoring well was destroyed under permit LMON 108257 in March 2012. Based upon current and historical soil and groundwater sampling data, the consultant concludes that petroleum-impacted soils were removed from the site in 1992 and that there is no remaining petroleum-impacted soil on site. The consultant further concludes that groundwater was not impacted by the release. Based upon these findings, the consultant recommends that the case be closed. DEH concurs with the consultants conclusions and recommendation to close the case.

Environmental Interest/Information System
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations Active Permits:

Permit Number: 134787
Update Date: 11/02/2012
Inspection Date: 04/02/2012
Violation Code: 6HV0224
Violation: MISMANAGED EMPTY CONTAINERS >5GALS.
Violation Citation: Failed to mark date on empty container larger than 5 gallons and/or manage it within one year. 66261.7(e) & (f).
Activity: ACTIVE

Permit Number: 134787
Update Date: 11/02/2012
Inspection Date: 04/02/2012
Violation Code: 6HV0226
Violation: HW NOT ACCUMULATED IN TANK/CONTAINER
Violation Citation: Did not accumulate waste in container or tank. 66262.34 (d)(2)
Activity: ACTIVE

Permit Number: 134787
Update Date: 11/02/2012
Inspection Date: 04/02/2012
Violation Code: 6HV0234
Violation: FACILITY NOT OPERATED TO MINIM. RELEASE
Violation Citation: Did not maintain &/or operate facility to prevent release or fire. CFR 265.31
Activity: ACTIVE

Permit Number: 134787
Update Date: 11/02/2012
Inspection Date: 05/04/2007
Violation Code: 6HV1013
Violation: HMBP NOT AVAILABLE FOR REVIEW
Violation Citation: Copy of HMBP not onsite for inspector’s review. 25505(e)
Activity: ACTIVE

Permit Number: 134787
Update Date: 11/02/2012
Inspection Date: 05/04/2007
Violation Code: 6HV0138
Violation: NO TSDF SIGNED MANIFEST ONSITE
Violation Citation: Generator has not maintained the required signed copy of the hazardous waste manifest from the TSD facility on site for review. CCR 66262.40(a)
Activity: ACTIVE

Permit Number: 134787
Update Date: 11/02/2012
Inspection Date: 05/04/2007
Violation Code: 6HV0223
Violation: MISMANAGED NON-EMPTY CONTAINER/LINER
Violation Citation: Failed to properly manage non-empty container or inner liner removed from a container. 66261.7 (b), (d) &/or (r)
Activity: ACTIVE

Permit Number: 134787

CARVIN CORP (Continued) **1006826507**

Update Date: 11/02/2012
Inspection Date: 05/04/2007
Violation Code: 6HV0407
Violation: EMPLOYEE TRAINING NOT ADEQUATE
Violation Citation: Employee training program for small quantity generator of hazardous waste is inadequate. CFR 262.34(d)(5)(iii)
Activity: ACTIVE

FINDS:

Registry ID: 110002869673

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1740

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 97

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 3

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 1048

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 1048

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 2

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 4060

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

TARGET STORE T0296 (Continued) **1014465511**

USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

FINDS:

Registry ID: 110019006056

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

NORTHROP GRUMMAN SYSTEMS CORPORATION (Continued) **1001075503**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Latitude: 32.9657166741576
Longitude: -117.094146347949
Case Type: Cleanup Program Site
Case Worker: CF
Local Agency: SAN DIEGO COUNTY LOP
RB Case Number: Not reported
File Location: Local Agency
Potential Media Affected: Soil, Surface water
Potential Contaminants of Concern: Gasoline
Site History: A tanker truck transporting gasoline overturned on northbound Interstate-15 on September 18, 2014. The accident occurred approximately one mile northeast of the Poway Road overpass and resulted in a gasoline spill to the emergency traffic shoulder lane adjoining the right side of the freeway. An estimated 2,000 to 2,200 gallons of gasoline was released. A portion of the gasoline release entered freeway storm drain grates, flowed through a subsurface storm drain culvert, and discharged into Chicarita Creek, an intermittent drainage that receives natural and urban runoff. Chicarita Creek is a tributary of Los Penasquitos Creek. A private emergency response contractor was dispatched to the accident scene and implemented cleanup measures to contain and mitigate the release. Spill response activities continued for three days following the release. The storm

COX PETROLEUM TRANSPORT I-15 AND HWY 56 ROLLOVER (Continued) **S117338913**

drain culvert was flushed with approximately 1,000 gallons of water. Absorbent materials were used to remove gasoline from surface soil and boom socks were deployed into the intermittently-flowing creek. Approximately 14 cubic yards of soil impacted by the release was removed by excavation. The petroleum transport company entered the DEH Voluntary Assistance Program (VAP) on October 1, 2014. Following DEH review and approval of a work plan, a soil assessment was performed to evaluate the lateral and vertical extents of gasoline impacts. The consultant, GeoEnviro Services, Inc. (GESI), initially collected 23 sediment samples along the waterline of Chicarita Creek, as well as five background samples from dry channels of the creek. Gasoline was not detected in soil samples collected near the outfall of the storm drain into Chicarita Creek, but were detected in two sediment samples collected 260 feet downstream of the outfall. The maximum detected concentrations of total petroleum hydrocarbons as gasoline (TPH-g) in these samples were 1,130 and 48 milligrams per kilogram (mg/kg), respectively. The volatile organic compounds xylene and trimethylbenzenes were detected in one of these stream sediment samples. GESI estimates that TPH-g impacts to the upper two inches of stream sediment occur within a 480-square foot area. Five borings were advanced near the center of the gasoline spill on the shoulder of the freeway to depths of 14 to 25 feet below the adjoining roadway. Twenty-four soil samples were collected from the borings at approximately 4-foot intervals. The maximum detected concentration of TPH-g in the samples was 5.12 mg/kg. Detected VOCs included benzene, toluene, ethylbenzene, and xylene (at a total concentration of 1.62 mg/kg) and trimethylbenzenes at a total concentration of 0.46 mg/kg. Gasoline and its constituents were not detected below a depth of 16 feet. Based on the soil assessment findings, GESI recommends no further action and case closure. DEH concurs with these recommendations.

Case Worker:	CB
RB Case Number:	9UT3717
Local Agency:	SAN DIEGO COUNTY LOP
File Location:	Local Agency
Local Case Number:	H20713-002
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	On August 25, 1998, two 10,000 gallon and one 6,000 gallon Underground Storage Tanks (USTs) were removed from the site. As a part of the removal process soil samples were collected beneath the USTs. Laboratory results indicated Total Petroleum Hydrocarbons as gasoline (TPHg) ranging from below laboratory reporting limit (ND) to 2,100 milligrams per kilogram (mg/kg). As a result, Unauthorized Release H20713-002 was opened. To mitigate hydrocarbons in soil observed following tank removal activities, approximately 582 tons of hydrocarbon impacted soil were excavated and treated offsite. Between 1999 and 2001, several site assessments were conducted to delineate the extent of hydrocarbons in soil and groundwater. During these assessments, TPHg concentrations in soil ranged from ND to 1.5 mg/kg, Xylene concentrations ranged from ND to 0.01 mg/kg, Methyl Tertiary Butyl Ether (MTBE) concentrations ranged from ND to 0.016 mg/kg. All other constituents in soil were not reported above laboratory reporting limits. The site is located in a basin designated for beneficial municipal, agricultural, and potential industrial service uses. Groundwater flow direction has been consistently towards the southwest. Groundwater monitoring wells installed onsite and offsite have shown that groundwater has been impacted by the unauthorized release. Quarterly groundwater monitoring and sampling has been conducted at the site from February 1999 through June 2008. Dissolved phase concentrations of TPHg, Benzene, Toluene, Ethylbenzene, Xylenes, Ethyl-tert-butyl ether, di-isopropyl ether, and tert-Amyl-methyl ether are below laboratory limits in all wells. Dissolved phase concentrations of MTBE and tert-Butyl Alcohol (TBA) have remained in wells MW-2 and MW-8 but show a decreasing trend. A receptor search was conducted within \\% mile radius of the site as a part of the Corrective Action Plan (CAP). One irrigation well was located. According to the consultant, this well is located hydraulically upgradient. There is no estimation of residual hydrocarbon impacts in soil, as they were removed during the 1998 tank upgrades. A trend analysis was completed to estimate the timeframe for MTBE and TBA to reach their cleanup goals proposed in the CAP. According to the consultant, MTBE concentrations in monitoring wells MW-2 and MW-8 will reach the primary MCL in less than one year. TBA concentrations in monitoring wells MW-2 and MW-8

7-ELEVEN FOOD STORE #13624 (Continued) **S100731669**

will reach their action level in four years and one and three quarters years, respectively. The consultant recommends no further action and DEH concurs with this recommendation.

RB Case Number:	Not reported
Local Agency:	SAN DIEGO COUNTY LOP
File Location:	Local Agency
Local Case Number:	202471-001
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Waste Oil / Motor / Hydraulic / Lubricating
Site History:	On January 25, 2005, a 550-gallon capacity waste oil underground storage tank (UST) was removed from the site. Standing water with free product and stained soil were observed in the excavation. The two soil samples collected from the bottom of the tank excavation were impacted by petroleum hydrocarbons. Between 2006 and 2012, eight soil borings/groundwater monitoring wells were installed to delineate the extent of contamination. Initially, four wells were installed in 2006 in the vicinity of the excavation. MW-1, located in the tank pit and screened to a depth of 21 feet below ground surface, is currently dry, but a maximum of 0.36 feet of free product was measured in the well in 2008. In 2007, free product was also observed in monitoring well MW-3 (located 10 feet south of MW-1, but screened deeper). Prior to 2015 (see below), a maximum free product thickness of 1.6 feet was measured in well MW-3. The primary dissolved contaminant of concern at the site is methyl tertiary butyl ether (MTBE). Prior to December 2012, recoverable product was removed by hand bailing (total volume not available). From December 2012 to February 2013, oil-absorbing

POWAY ECONO LUBE N TUNE #197 (Continued) **U003941167**

socks were placed in well MW-3 to further mitigate free product. A product thickness of approximately 0.01 feet was measured in MW-3 in December 2013. In order to verify that free product had been removed to the extent practicable, MW-3 was re-checked on June 15, 2015, and no free product was present. However, when the consultant returned to the site on June 30, 2015 to collect groundwater samples, they found approximately 3 to 4 feet of what appeared to be waste oil in MW-3. The consultant suspected that waste oil had been dumped in the well, and installed new locking mechanisms on the site wells. From July 6, 2015 through October 9, 2015, vacuum truck extractions and hand bailing removed approximately 23 gallons of free product from MW-3. Free product was not observed in subsequent monitoring events, and the consultant concludes that free product has been removed to the extent practicable. The groundwater basin beneath the site has designated beneficial uses in the San Diego Region Water Quality Control Boards Basin Plan. With the exception of MTBE, reported dissolved concentrations of benzene, toluene, ethylbenzene, xylenes, and naphthalene in all of the wells were below their respective Maximum Contaminant Levels (MCLs) in the last sampling event (October 21, 2015). The primary MCL for MTBE is 13 micrograms per liter (a%g/l), and dissolved MTBE concentrations of 16.2 a%g/l and 29.9 ug/l were reported in two wells. The consultant estimates that approximately 50 cubic yards of impacted soil remains at the site, primarily in the immediate vicinity of the former waste oil UST. The consultant concludes that concentrations of petroleum hydrocarbons at the site have demonstrated stable to decreasing trends over time, and residual petroleum constituents do not pose a risk to human health. The consultant further concludes that this site fulfills the closure criteria in the State Water Resources Control Boards Low-Threat UST Case Closure Policy, and recommends no further action. DEH concurs with this recommendation. A 60-day public comment period for DEHs Notification of Intent to Close Case was completed, and no comments were received. DEH issued permit #DEH2016-LMWP-002366 for the destruction of the monitoring wells associated with the case.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
