Project Description: (please use a separate page if necessary)

The California Department of Transportation (Caltrans) is proposing a seismic project to provide State Route 162 Postmile 8.2 with an earthquake-resistant bridge structure capable of resisting a maximum credible earthquake.

Three alternatives are in consideration for the South Eel River Bridge Project.

- Alternative A would perform retrofit work to improve the structural integrity and make this bridge capable of resisting a maximum credible earthquake. One-way traffic control would be in place during construction.
- Alternative B would consist of a staged replacement of the existing structure in which the bridge would be reduced to one lane. One-way traffic control would be in place during construction. Construction of a partial width of the new bridge would be completed on the southeast side of the existing bridge. Once the partial section of the new bridge is completed, the one lane of traffic would be moved to the new bridge, and the remainder of the existing bridge would be removed, followed by completion of the new bridge.
- Alternative C would replace the existing bridge with a new one to the south of the existing bridge. Little to no traffic control would occur.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency please denote that with an "S".
