Martinez, CA 94553

Project Title: Pinehurst Road Sinkhole and Culvert Repair
Proj. No. WO #6202 CP#18-09

Project Applicant: Contra Costa County Public Works Department

Project Location – Pinehurst Road, approximately 2.5 miles northwest of Canyon Road at the first hairpin turn

Project Location: Unincorporated Orinda

Project Location – County: West Contra Costa

Description of Nature, Purpose and Beneficiaries of Project:

The Public Works Department of Contra Costa County is proposing to repair an 84" culvert and sinkhole beneath Pinehurst Road that were heavily damaged in 2017 in order to return the road to satisfactory condition. Storm drainage will be conveyed through the culvert instead of bypassing the culvert to the side and bottom. The road embankment will be compacted and the ditch on the roadway will be restored to allow for proper drainage of surface runoff. Work will be done during the summer season when the creek is dry or has a very minimal amount of flow. Culvert repairs include the following:

1. Culvert inlet protection: Excavation of loose soils around the pipe and placement of rip rap around the inlet and on the creek bank.
2. Culvert invert repair: 1) Cleaning the silt and debris off of the pipe's flowline and disposing the sediments off-site. 2) Remove corroded pipe sections and fill all the voids beneath the pipe with grout. 3) Repair the bottom of the pipe with wire mesh and grout. The grout will be placed the full length of the pipe up to a maximum thickness of 6" to the pipe spring line.
3. Culvert outlet repair: Removal of material/debris from the creek bed adjacent to the outlet to allow for positive drainage.
4. Culvert joint repair: Grout crown of pipe where voids exist after interior grouting is completed. The joints will be inspected and it will be determined if concrete collars are necessary.

Sinkhole road repair includes excavating and compacting subgrade, placing aggregate base and hot mix asphalt, removing temporary rip rap and sandbags and compacting any voids caused by erosion beneath the shoulder, and replacing rip rap and reestablishing the roadside ditch. No tree removal will be necessary. Tree and shrubbery trimming may be necessary throughout the project area. In order to minimize damage to trees, any roots exposed during construction activities will be clean cut. The Project will maintain the existing drainage pattern and will not create new impervious areas. Appropriate Best Management Practices (BMPs) will be implemented for water pollution control. Construction will take approximately 25 working days. Temporary road closure may be necessary for approximately two weeks; however, advance notification would be provided to surrounding residents identifying potential detours. Emergency vehicles will have access at all times. Real Property transactions, including right-of-way acquisition may be necessary in support of this project.

Name of Public Agency Approving Project:

Contra Costa County

Name of Person or Agency Carrying Out Project:

Contra Costa County Public Works Department

Exempt Status:
