

**CALIFORNIA ENVIRONMENTAL QUALITY ACT
NOTICE OF DETERMINATION**

To: ☒ Office of Planning and Research
P.O. Box 3044, Room 113
Sacramento, CA 95812-3044

From: Contra Costa County
Dept. of Conservation & Development
30 Muir Road
Martinez, CA 94553

County Clerk
County of: Contra Costa

State Clearinghouse Number: SCH# 2020040312

Project Title: Marsh Creek Road Bridge Replacement Project, Bridges #28C-0143 and #28C-0145

Project No. 0662-6R4083, CP# 15-41

Project Applicant: Contra Costa County Public Works Department
255 Glacier Drive, Martinez, CA 94553-Contact: Laura Cremin-Phone 925-313-2015

Project Location: Unincorporated Antioch/Brentwood area in eastern Contra Costa County, along Marsh Creek Road, Bridge #28C-0143 is approximately 1.6 miles west of Deer Valley Road and Bridge #28C-0145 is approximately 3.1 miles east of Deer Valley Road and approximately 0.2 mile west of Camino Diablo

Lead Agency: Contra Costa County Department of Conservation and Development-Telma B. Moreira 925-674-7783

Project Description: The purpose of this project is to replace two existing bridges (Bridges #28C-0143 and #28C-0145) on Marsh Creek Road that carry traffic over Marsh Creek. The improvements are necessary to meet current design standards. It is anticipated that both bridges would be constructed at the same time. Construction is expected to begin in May of 2022 and take approximately 18 months to complete. The Project is a covered activity under the East Contra Costa Habitat Conservation Plan. The proposed replacement for Bridge #28C-0143 would be a single span bridge. The new bridge would be approximately 43 feet wide (two 12-foot travel lanes, 8-foot shoulders, and 1.5-foot wide concrete barriers) and 80 feet long. The west and east roadway approaches to the bridge would be reconstructed. Bridge #28C-0143 would be replaced on a shifted alignment (approximately 45 feet to the northwest) to provide a single stage construction approach that would allow traffic to use the existing bridge during most of the construction duration while the new bridge and roadway approaches are built. Retaining walls would be required on both ends of the bridge. The proposed replacement for Bridge #28C-0145 would also be a single span bridge. The new bridge would be approximately 43 feet wide (two 10-foot travel lanes, 8-foot shoulders, and 1.5-foot wide concrete barriers) and 80 feet long. The west and east roadway approaches would be reconstructed. Retaining walls would be required on both ends of the bridge. Bridge 145 would be replaced on a shifted alignment to provide a single stage construction approach, similar to the approach described above for Bridge #28C-0143. Ground disturbance would be necessary. Construction depth would vary between project elements. The maximum depth of excavation for the project work would be approximately 75 feet for the installation of bridge foundation piles (using drilling), approximately 10 to 15 feet of excavation for bridge abutments, and approximately five feet for general roadway work and utility relocations. Work would occur in Marsh Creek. If creek flows are present, dewatering would be required. Disturbed areas would be stabilized as necessary following construction. Drainage patterns in the project area would be maintained. Utility relocation would be necessary. Right-of-way acquisition and temporary construction easements would be required. Tree removal (approximately 30 total) and vegetation removal would be necessary throughout the project area. No full detours are anticipated. Standard traffic control measures would be employed, and emergency vehicles and private property owners will have access at all times.

The project was approved by the Board of Supervisors on 8/4/2020

1. The project ☐ will ☒ will not have a significant effect on the environment.
2. ☐ An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
☒ A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures ☒ were ☐ were not made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan ☒ was ☐ was not adopted for this project.
5. A statement of Overriding Considerations ☐ was ☒ was not adopted for this project.
6. Findings ☒ were ☐ were not made pursuant to the provisions of CEQA.
