Present Land Use/Zoning/General Plan Designation:

Various (project site is linear and passes through multiple jurisdictions; refer to Initial Study Table 2-1)

Project Description: *(please use a separate page if necessary)*

The project involves upgrading existing high-pressure natural gas pipeline infrastructure along North Shore Lane, North Shore Drive/State Route 38, and Stanfield Cutoff to increase the pressure and natural gas feed into the Big Bear area for the purpose of meeting existing and future demands. The proposed improvements would involve replacing the existing 6-inch high-pressure steel natural gas pipeline with an 8-inch high-pressure steel natural gas pipeline. Other lateral pipelines would also be upgraded. The existing natural gas pipelines would be abandoned in place and capped off, and new natural gas pipelines would be installed primarily by open trench excavation with some areas installed by horizontal directional drilling.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
