

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2020049036

Project Title: Stirling City Sewer Rehabilitation Project

Lead Agency: Butte County Department of Public Works

Contact Name: Eric Schroth, Associate Civil Engineer

Email: ESchroth@buttecounty.net Phone Number: (530) 538-7266

Project Location: Btwn. Skyway and Manzanita St. & btwn. Gypsum St. and 100 ft. past Diamond Street, Stirling, Butte  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The Proposed Project is the rehabilitation of a portion of the wastewater collection system under the authority of County Service Area (CSA) 82, Stirling City Sewer System. Replacement and repair of portions of the system has been completed in the past, but further rehabilitation is needed. Approximately 2,700 linear feet of the original 5,500-foot clay pipe wastewater collection system needs replacement. The Project will also include the replacement of 12 existing manholes with nine standard 48-inch manholes and the installation of 83 new laterals (approximately ten linear feet each, up to the new sewer cleanouts). Known deficiencies determined by the County include aging pipe, lack of standard manholes for proper system maintenance, possible root intrusion and infiltration and inflow due to disjointed piping. All construction will occur within the existing pipeline right-of-way under unpaved alleys and roads throughout the small community.

Environmental consequences are explained below.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

1. Biological Resources:

- Project construction has the potential to significantly impact nesting birds protected by the federal Migratory Bird Treaty Act and the California Fish and Game Code. Mitigation measures BIO-1 and BIO-2 will mitigate this potential impact to be less than significant.

2. Cultural Resources & Tribal Cultural Resources:

- Project construction has the potential to significantly impact cultural or human subsurface deposits. Mitigation measure CUL-1 will mitigate this potential impact to be less than significant.

3. Geology and Soils

- Project construction has potential to impact paleontological or geologically sensitive resources. Mitigation measure GEO-1 will mitigate this potential impact to be less than significant.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy exist for the Proposed Project.

Provide a list of the responsible or trustee agencies for the project.

- Caltrans, District 3
- Fish and Game, Region 2
- Regional Water Quality Control Board, District 5
