PROJECT DESCRIPTION: (Briefly describe project including need, purpose, location, limits, right-of-way requirements, and activities involved in this box. Use Continuation Sheet, if necessary.)

The California Department of Transportation (Caltrans) is proposing a project to improve worker safety by reducing the frequency and duration of worker exposure to traffic and to provide safe access to roadway facilities within Caltrans Right-of-Way on State Route (SR) 51 in Sacramento County between Post Miles (PM) 1.6 to 4.4. The purpose of this project is to decrease maintenance worker exposure to traffic and errant vehicles due to existing narrow roadside areas and absence of maintenance vehicle pullouts (MVP) limiting maintenance personnel's ability to pull far off as possible from the roadway facility, to conduct maintenance activities of existing unpaved narrow and beyond the gore areas, as well as, areas that are overgrown with vegetation, requiring repetitive on foot maintenance activities.
