Subject: Phase I Environmental Site Assessment report for a vacant land for a parcel number 330-080-006 located at Mapes Road, City of Perris, CA 92570.

Dear Mr. Abraham:

Per your request, we are pleased to submit our report for a Phase I Environmental Site Assessment for the subject property. This report includes the results of our findings from visual surveys, historical land use review, interviews, records and regulatory review, and related sources.

We appreciate the opportunity to be of service and look forward to working with you.

Very truly yours,
Nicholas

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

5.94 Acres of Vacant Land

Located at

Parcel number 330-080-006
at Mapes Road, City of Perris
State of California 92570

1.0 INTRODUCTION

This report presents a summary of the activities and the results of the Phase I Environmental Assessment performed by USA Environmental, Inc. ("USAE") for the subject property legally described in Section 4.0 of this report. This assessment generally follows industry guidelines for a Phase I Environmental Risk Report.

2.0 PURPOSE AND SCOPE

The purpose of this investigation was to determine if there exists any significant surface or subsurface property contamination by hazardous and toxic substances that could constitute a potential liability for the property owner or lessee.

The Environmental Site Assessment, (according to was conducted according to the American Society for Testing & Materials Standard Practice doe ESA's number E-1527-13, latest edition. and consisted of the following procedures as applicable:

1. A review of the chain of title for the subject property for a period of the last 50 years.
2. A determination of past site uses based upon interviews with prior or current owners, owners of adjacent property or other familiar with subject property, and a review of historical documents, aerial photographs and other relevant data, f available.
3. A review of the records of local, state, and federal environmental agencies to ascertain documented information regarding the site and surrounding areas.

4. A visit to the site to visually ascertain the existence of potential areas of currently recognized contamination, including unusual land or soil discoloration, stressed vegetation, physical irregularities, dumping, aboveground (AST's) or underground tanks (UST's), transformer of landfills.
5. Visual identification of other issues, deemed appropriate in order to determine evidence of potential contamination by currently recognized hazardous substances at the site.
6. Any other pertinent information deemed necessary for a Phase I meting the minimum standards and requirements.
7. Preparation of a site sketches showing existing property boundaries and improvements, and locations for storage and/or use of hazardous materials and/or waste, if any.
8. Color photos of the subject site.
9. Preparation of a summary report indicating investigation done, sources of information, data obtained, and interpretation of data regarding possible or identified site contamination.

3.0 ACTIVITIES CARRIED OUT

USAE personnel performed a review of public records, for the purpose of identifying readily available evidence; that would provide a record of past and present activities, on or in the immediate vicinity of the subject property, which may have resulted in the deposit of hazardous materials, or contamination of the site by hazardous materials. Such activities conducted by USAE personnel during this portion of the environmental evaluation included review of the following:

3.1 REVIEW OF COUNTY RECORDS;

1. City, Building and Planning Department concerning historic and future development in the general vicinity;
2. City, Engineering Records;
3. City, Business License Section;
4. City, Bureau of Fire Prevention;
5. City, Hydraulic/Water Conservation Department;
6. State Regional Water Control Board;
7. County Environmental Health Services, Site Assessment and Mitigation
8. County, Assessor Office;
9. County, Appraisal Office;
10. County, Clerk and Recording Office.

3.2 REVIEW OF FEDERAL AND STATE RECORDS;

Review of Federal records to gain insight into any on site or surrounding environmental hazards, which included:

NPL, TSD, CERCLIS, CORRACTS,, RCRIS-SG, RCRIS-LG, NFRAP, ERNS, FINDS, TRIS, NPL.

Review of State and County records to identify any hazardous substance release locations, and emergency response records concerning use, storage, spills, or accidents involving hazardous materials at or surrounding the site, including:

CAL-SITES, CORTESE, LUST, UST, HWIS, AST.

A detailed explanation of each database, its contents, codes used, and dates of last update are included in Appendix F.

3.3 SITE INVESTIGATION

USAE personnel conducted a site investigation February 8, 2019 by Nicholas F. Aboufadel P.E. (see Appendix A) to identify any indications of environmental contamination. Some of the signs, which were investigated during on site investigations, include:

1. Surface spills or disposal areas of liquid or solids;
2. Surface storage of drums or transformers;
3. Areas of unusual and stressed vegetation;
4. The presence of buried material, (e.g., fills or vents pipes);
5. Fill areas;
6. Site drainage features;
7. General housekeeping and maintenance;
8. Staining on soil or pavement;
9. Abrupt or abnormal changes in land contours; and
10. Other areas of possible contamination sources.

Adjacent properties and land uses were also surveyed, regarding possible use or storage of hazardous materials that might impact the subject site.

4.0 ASSET INFORMATION

Asset name and address (Please see Figures 1, 2, 3 and Appendix B);
The subject site is an undeveloped vacant land totaling 5.94 acres, Parcel number is 3330-080-006 and is located at unassigned number at Mapes Road, City of Perris, Riverside Side County, State of California 92570.

5.0 SITE BACKGROUND

5.1 Site Location and Description;

Site Improvements: The subject site consists of one parcel APN's Numbers 330-080-006 (see Figures 1 and 2). The property site is undeveloped vacant land.
The site is located on the north side of Mapes Road. The land is covered throughout with natural vegetation.

The subject site total area is approximately 5.94 acres. The site is classified as zoned GI-General Industrial. This zoning classification allows light industrial development (see Figures 3 and Appendix D). The subject site undeveloped vacant land.

Driveway and Parking Area: The site can be accessed from Mapes Road.

Landscaped Areas: The site is landscaped with grass.

Current Use: Vacant Land.

Current Occupants/Tenants (Please See Appendix C): At the time of the survey was conducted, the subject site is a vacant land.

Vegetation: Visual observations were made of the vegetation noted on the property in an effort to evaluate if it had sustained damage that could be related to the presence of localized soil or water contamination. None of the vegetation observed appeared to be damaged or stressed in a manner, which could be attributable to the presence of contamination.

Stained Soil: Visual observations were made of the soil to identify any discolorations or surface staining which could be indicative of contaminant discharge. Soil stains were not observed on the subject site.

Surface Anomalies/Depression: Visual observations were also made to evaluate the presence of environmentally unusual and /or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, drywells, waste dump sites, leach fields or other subsurface activities.

Utilities: Electric Power-Southern California Edison
Gas-Southern California Gas
Drinking Water- County
Sewage- County
Trash Collection- County Disposal Contractor.

General Condition of the Site: The site is a vacant land.

Site Improvements: None.

5.2 Properties Surrounding the Site (illustrated in Figure 4);
West: vacant land with a parcel number 330-080-007 and mobile park.

South: Mapes Road and vacant land.

North: Light Industrial buildings.

East: Vacant Land.

There are no properties adjacent to the subject site which are managed by a governmental agency.

The adjacent land uses do not present any environmental threat to the property for the following reasons:

The immediate adjacent land uses is light industrial buildings.

6.0 SITE HISTORY

The subject property has never been developed, please see Figures 1 and 2:

Currently, the subject site use is a vacant land.

6.1 Aerial Photography;

A review of the aerial photography collection, supplied from EDR, please see Appendix G, displayed the following:

In 2016 Photos: the subject property is a vacant land.
In 2012 Photos: the subject property is a vacant land.
In 2009 Photos: the subject property is a vacant land.
In 2006 Photos: the subject property is a vacant land.
In 2002 Photos: the subject property is a vacant land.
In 1997 Photos: the subject property is a vacant land.
In 1989 Photos: the subject property is a vacant land.
In 1985 Photos, the subject property is a vacant land.
In 1978 Photos, the subject property is a vacant land.
In 1974 Photos, the subject property is a vacant land.
In 1967 Photos, the subject property is a vacant land.
In 1961 Photos, the subject property is a vacant land.
In 1953 Photos, the subject property is a vacant land.
In 1949 Photos, the subject property is a vacant land.
In 1938 Photos, the subject property is a vacant land.

The review of the aerial photography did reveal no evidence of an environmental concern for the subject property.

6.2 Prior Ownership and Usage;

A title review was conducted for the subject property. All of the title transfers have either been between private owners and development companies or investment companies.

A review of the grant deeds for the property showed:

No environmental lien was found. Ownership records don't suggest activities of an environmental concern.

6.3 Maps;

A review of the USGS map collection housed at the County Planning Department displayed the following information:

In 1967 and 1977, the subject property is a vacant land (see Appendix E).

In general the surrounding area is light industrial buildings / Vacant Land / Residential.

Oil and Gas Agency Records or Maps;
USAE submitted a request to the local Oil and Gas Agency for copies of readily available oil and gas related records pertaining to environmental issues on the subject site. However, USAE was informed that no records for the subject site are on file with this agency.

A review of the City Directory displayed no information for the subject site.

.

A review of the Sanborn Maps supplied from EDR, displayed no information for the subject site.

7.0 REGULATORY REVIEW

7.1 Local Records Review;
A review of the City Building Permits, revealed no information for the subject property. The subject site is a vacant land (please see Appendix C).

USAE submitted a request to the local Health Department and/or Environmental agency for the purpose of reviewing readily available environmental records that may be on file with this agency for the subject site. However, USAE was informed that no records for the subject site were on file with this agency.

Water Quality Agency Records
USAE submitted a request to the Water Quality Agency for the purpose of determining if past and present businesses at the subject site are listed on regulatory lists (such as leaking underground tank lists, site cleanup lists, etc.). USAE was informed that no records for the subject site are on file with this agency.

According to the City Buildings and Safety Department, there are no environmental violations for the site.

According to the County, Tax Assessor, the existing site is a light industrial building

(please see Appendix C).

According to the City Fire Department, Hazardous Materials Division, no UST tanks exist on site.

According to Enviro Check search of databases and files from federal, state, and local environmental regulatory agencies. The complete records search report is included in Appendix F, and the results of USAE's review are presented below.

7.2 Federal and State;

The Federal records search compiles information from the records of the Environmental Protection Agency (USEPA) that identifies environmental problem sites and activities close in proximity (one-mile radius) to the subject site.

7.2.1 National Priorities List (NPL):

The NPL is the USEPA's database of uncontrolled or abandoned hazardous waste sites, identified for priority remedial actions, under the Superfund program. A site included on the NPL must either meet, or surpass, a predetermined hazard ranking system score, or be chosen as a state's top-priority site, or meet all the following criteria:

1. The U.S. Department of Health and Human Services issues a health advisory, recommending that people be removed from the site to avoid exposure;
2. The USEPA determines that the site represents a significant threat;
3. The USEPA determines that remedial action is more cost effective than removal action.

Appendix F contains the NPL database that lists the facility locations within a one-mile radius of the subject site. No NPL site case is present at the site and around the subject site.

7.2.2 Facilities under RCRA Corrective actions (CORRACTS):

Appendix F contains the CORRACTS database, which lists the facility locations within one- mile radius around the subject site. One CORRACTS site was present around the subject site. This site does not have an environmental concern for the subject site.

7.2.3 Facilities that treatment, storage and dispose of hazardous waste (RCRA/TSD):
Appendix F contains the RCRA/TSD database, which lists the facility locations within one-mile radius around the subject site. Two RCRA/TSD sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.4 Unused and formerly Used Defense Sites (DEFENSE):
Appendix F contains the DEFENSE database, which lists the facility locations within one-mile radius around the subject site. No DEFENSE site was present around the subject site.

7.2.5 Brownfields Cleanup and Reuse Sites (Brown):
Appendix F contains the Brown database, which lists the facility locations within one-mile radius around the subject site. No Brown sites were present around the subject site.

7.2.6 Contaminated Sites List (CSL):
Appendix F contains the CSL database, which lists the facility locations within one-mile radius around the subject site. Seven sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.7 Contaminated Sites List (DEED):
Appendix F contains the DEED database, which lists the facility locations within one-mile radius around the subject site. Two sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.8 Superfund Database (SUPERFUND):
Appendix F contains the SUPERFUND database, which lists the facility locations within half- mile radius around the subject site. No SUPERFUND sites were present around the subject site.

7.2.9 Sites with Leaking Underground Storage Tank (LUST):
Appendix F contains the LUST database that lists facility locations within a half-mile radius of the subject site. No records concerning LUST sites were found around the subject site.

7.3.10 Solid Waste Landfills (SWLF):

Appendix F contains the SWLF database, which lists the facility locations within a half-mile radius around the subject site. One SWLF site was present around the subject site. This site does not have an environmental concern for the subject site.

7.3.11 Air Emissions Sites (EMISSIONS):

Appendix F contains the EMISSIONS database, which lists the facility locations within a half-mile radius around the subject site. No EMISSIONS site was present at the site or around the subject site.

7.3.12 Hazardous Waste Information System (HAZNET):

Appendix F contains the HAZNET database, which lists the facility locations within a half-mile radius around the subject site.

Seventy-four sites were present at the site or around the subject site. These sites do not have an environmental concern for the subject site. These sites do not have an environmental concern for the subject site.

The subject site was identified as a HAZNET Site, but the address is not for the subject site.

7.3.13 Emergency Response Notification System of Spills (ERNS):

Appendix F contains the ERNS database, which lists the facility locations within a 1/4 of a mile radius around the subject site. No ERNS site was present around the subject site.

7.3.14 Facilities that generate hazardous waste (RCRA/GEN):

Appendix F contains the RCRA/GEN database, which lists the facility locations within a 1/4 of a mile radius around the subject site. Five RCRA/GEN sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.3.15 Underground/Aboveground Storage Tank Reports (UST/AST):

Appendix F contains the UST/AST database that lists facility locations within a 1/4 of a mile radius of the subject site. Three records concerning UST /AST sites were found around the subject site. These sites do not have an environmental concern for the subject site.

7.3.16 Water Wells (WELLS):

Appendix F contains the WELLS database that lists facility locations within a 1/4 of a mile radius of the subject site. No records concerning WELLS sites were found around the subject site.

7.3.17 Hazardous Materials Storage and Incident Records (HAZMAT):

Appendix F contains the HAZMAT database that lists facility locations within a 1/4 of a mile radius of the subject site. Eight records concerning HAZMAT sites were found around the subject site. These sites do not have an environmental concern for the subject site.

8.0 SITE INVESTIGATION AND REVIEW OF HAZARDS

8.1 Topography;

The property is characterized as a flat area, gently sloping to the southeast side. Elevation on the site is approximately 1,415 feet above Mean Sea Level (MSL) see Appendix E.

8.2 Soils;

The soil at the subject site consists of fine grained sands and silts from existing grade to approximately 25 feet below existing grade.

8.3 Geology;

The area is located within the Peninsular Ranges Geomorphic Province. Low topographic relief and shallow slopes characterize the plain. Pleistocene terrace deposits, along with Pleistocene and Holocene age alluvial and eolian fans, underlie it. The area is immediately underlain by poorly consolidated non-marine alluvial fans of Holocene age several hundred feet thick, and by stratified sedimentary rocks of marine origin.

The site vicinity is located in the southern part of the Peninsular Ranges geomorphic province of California. Cretaceous granite rocks of the southern California batholith comprise the major rock type in the area. The Green Valley Tonalite, a light gray intrusive igneous rock, also occurs throughout the site vicinity. Relatively unweathered tonalite may be found from 4 to 11 feet below the ground surface.

Large earthquakes from the San Andreas or San Jacinto fault zones could also produce significant ground shaking at the site. The maximum probable ground acceleration to be expected at the site would be in the range of 0.7g.

8.4 Hydrology;

8.4.1 Surface-Water Hydrology;

Site Surface Drainage: Hydraulic flow is generally in a down-gradient direction, usually toward the nearest surface water body. Based upon site surface and improvement characteristics observed during the on-site reconnaissance of the property, surface drainage at the subject site would flow on-site east direction. The surface runoff is handled by a street runoff system. According to the County, Planning Department. There are no surface water bodies such as streams, lakes, etc. around the subject site. Murrieta Creek is located approximately 500 east of the subject site. The creek flows roughly south-southeast.

Flood Zone: The subject site is located in Zone X (area determined to be outside the 500-year flood plain) of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), dated November 20, 1996.

8.4.2 Ground-Water Hydrology;
According to the County Public Works, Hydrology Department, the ground water depth is approximately 100 feet below the ground surface and the flow direction is to the southeast.

No Wetlands was found for the subject site.

8.5 Chemicals and raw materials;
No Chemicals were found at the subject site.

8.6 Polychlorinated Biphenyls (PCBs):
No transformer is located at the subject side.

8.7 Asbestos-containing Materials (ACM) and Mold;
The presence of materials such as sprayed-on insulation, ceiling texture, which may potentially contain friable asbestos, could be found. Asbestos Inspections are not required in the ASTM1527-13 Assessment Standard.

During the Site Reconnaissance, Environmental Concerns looked for material and rea dily apparent evidence of the presence of suspect mold growth, mold was not sampled or absolutely identified.

8.8 Radon;
In the County area, only 0.5% of the homes are predicted to have radon levels above the EPA standard of 4 Pico Curies/Liter (CDHS, 1990). According to the Radiological Health Section of the County Public Health Department there is "no significant health hazard from radon" in County since most homes, building and schools have radon levels below 0.5 Pico Curies/Liter.

According to the California Department of Health, Radon Section, there are no radon problems within the area of the subject site. The EPA has set an action level for radon in air of 4 picocurries per liter (pCi/L). Due to the practical time constraints of this

assessment, air sampling for radon gas was not requested nor conducted. Radon concentration determinations generally are not accurately measured by short period sampling. If long-term exposure to radon gas is a concern, a minimum of a three-month alpha-track test is recommended.

8.9 Lead-based Paint;

The lead-based paints do not appear to represent an environmental threat to the subject property. Lead based paint identification, sampling testing is not a requirement in the ASTM 1527-13 Standard Practice.

8.10 Lead in Drinking Water;

According to the County Water Department, no lead is found in the drinking water at the subject site. It is unlikely to find lead in the building that would effect the water supply, because the water department periodically tests it.

8.11 Hazardous Substances;

No Hazardous substances were found at the subject site.

8.12 Landfills;

No landfills were observed at the site or within a one-half mile (0.5 mile) radius of the site. Also, the database search did not identify any landfills near the site (see Appendix F: SWLF).

8.13 Pits, Sumps, Drywells and Catchbasins;

No drywells was found at the subject site.

8.14 On-site Aboveground and Underground Storage Tanks;

A review of State and Local records, and a site inspection were conducted, to identify any on-site UST's or AST's, concerning use, storage, spills, or accidents involving storage tanks at the site. The results are discussed below.

8.14.1 Underground Storage Tanks (USTs);

There was no evidence that UST’s had been recently removed from the property.

8.14.2 Aboveground Storage Tanks (ASTs);

There was no evidence that an ASTs exist at the subject property.

8.15 Storm Water Drainage;

The storm water drainage is a street runoff system. There are no storm water permits for the site.

9.0 DISCLAIMER

USA Environmental, Inc. has performed the activities cited herein, solicited and received information and documentation from public agencies and private parties and conducted appropriate visitations and observations in accord with generally accepted requirements for a preliminary site assessment of this nature. Interviews were held with representatives and tenants. Information, data, documentation and observations, from all sources, were compared and analyzed in order to reach the results and conclusions delineated above.

This work has been conducted in an objective and unbiased manner, and is in accord with generally accepted professional practice for this type of work. USA Environmental, Inc. believes the results and conclusions to be accurate and relevant, but cannot accept responsibility for the accuracy or completeness of public documentation, or possible withholding of information by those interviewed, or other private parties.

10.0 SUMMARY AND RECOMMENDATIONS

USA Environmental, Inc. ("USAE") has conducted a Phase I Environmental Site Assessment for the subje site is a vacant land totaling 5.98 acres for a parcel number 330-080-006 located at Mapes Road, City of Perris, City of Temecula, Riverside Side County, State of California 92570 referred to as the "subject site". This included visual observations of the subject property and limited observations of surrounding propertie review of historical land use, review of regulatory database, interviews, and related sources. This Environmental Site Assessment report was conducted according to the American Society for Testing & Materials Standard Practice, ESA's number E-1527-05, latest edition.

Site Improvements: The subject site consists of one parcel APN's Numbers 330-080-006 (see Figures 1 and 2). The property site is undeveloped vacant land. The site is located on the north side of Mapes Road. The land is covered throughout with natural vegetation.

The subject site total area is approximately 5.94 acres. The site is classified as zoned GI-General Industrial. This zoning classification allows light industrial development (see Figures 3 and Appendix D). The subject site undeveloped vacant land.

Driveway and Parking Area: The site can be accessed from Mapes Road.

Landscaped Areas: The site is landscaped with grass.

Current Use: Vacant Land.

Current Occupants/Tenants (Please See Appendix C): At the time of the survey was conducted, the subject site is a vacant land.

Vegetation: Visual observations were made of the vegetation noted on the property in an effort to evaluate if it had sustained damage that could be related to the presence of localized soil or water contamination. None of the vegetation observed appeared to be damaged or stressed in a manner, which could be attributable to the presence of contamination.

Stained Soil: Visual observations were made of the soil to identify any discolorations or surface staining which could be indicative of contaminant discharge. Soil stains were not observed on the subject site.

Surface Anomalies/Depression: Visual observations were also made to evaluate the presence of environmentally unusual and /or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, drywells, waste dump sites, leach fields or other subsurface activities.

General Condition of the Site: The site is a vacant land.

Site Improvements: None.

Recommendations

Based on the site investigation and the research of records, USA Environmental, Inc. does not suggest the existence of an environmental condition that should be a cause of concern for the subject property. USA Environmental, Inc. did not perform any previous environmental inspection for the seller or purchaser of the subject property. Also, USA Environmental, Inc. never had any affiliation with the seller or the purchaser of the subject property.

If you have any questions, please feel free to call me any time.

B.S., Civil Engineering, California State University, Long Beach, 1984

REGISTRATION

State of California and Arizona, Registered Professional Civil Engineer, PE.
State of California, Registered Environmental Assessor No. 03846.
Asbestos building inspector, under EPA and AHERA Guidlines.

EXPERIENCE

1990 - Present: Project Manager, USA Environmental, Inc. - Responsibilities include:

- Preparation of construction details and specifications for the construction of underground tanks, internal roads, and surface drainage structures at PWI Lokern facility.
- Fungai (Mold amd Milldow) Microbiology Testing and Environmental Assessment Reports and evaluating site remediation technology and preparing Phase I, II and III for apartments, schools, churches, gas stations, hotels, land, commercial, and industrial facilities in the states of AR, AZ, CA, CO, CT, FL, GA, HI, IN, KA, LA, MA, MD, MI, MT, NA, NC, NM, NY, OK, OR, PA, PR, RI, TN, TX, WVA, VA, WI, Puerto Rico. Over four-hundered jobs.

1988 - 1990: Project Engineer, ESI - Responsibilities included:

- Civil design and Earthwork of three proposed sites for a new Titan/Centaur launch complex at Vandenberg Air Force Base, California. Work included grading and excavation of up to 10 million cubic yards in cut. Cost estimates for the proposed sites. Designed a mobile launch platform road to withstand 12 million lbs. load, 150 ft. wide according to military manual. Cost estimate and schedule for facilities needed to be demolished and constructed to modify from Space Shuttle launcher to Titan/Centaur launcher.
- Drainage and Erosion control system for access road for a radar station in Saipan.
- Design, slope stability analysis and related cost estimate, for several major gold mining for GFOC (Chimney, Mesquite, Mule Canyon), landfills projects (OII & Chem.Waste) and Liquid Waste storage system for Biomas Power plant.
- QA /QC for construction of realignment of State Highway (9 miles).
- Design and QC for methane gas protection system (600,000 square feet of building area, American Honda). Design of underground steel storage retention structure 150 tons for CSI.
- Site Assessment and remediation for various Santa Fee Rail Yard Facilities.

1986 - 1988: Project Engineer, ARLE Engineering Ltd., Riyadh, Saudi Arabia -
Responsibilities included:

- Preparing reports for planning and execution of subsurface explorations, data evaluation, and construction in all phases of geotechnical exploration, materials testing.Construction inspection of multi-story residential buildings, roads and an airport. Three million dollar soil improvement, using dynamic compaction and CPM analysis for a 600,000 square meter project.

1985: Geotechnical and Civil Engineer, ENJ & Associates, Inc. - Responsibilities included:

- Wrote preliminary soil investigation reports for residential and commercial buildings throughout Los Angeles, San Bernardino and Orange counties. Work included foundation and slope stability analysis, pavement structure design, sewage design, utility lines, grading

and drainage plans, site investigation and surveying, and inspection of concrete and masonry construction.

1982 - 1984: Engineer Assistant, Los Angeles County Road Depart - Responsibilities included:

- Monthly updating of the status of the construction of street improvements throughout Los Angeles County in regard to cost estimates and project completion. Involved in improvements of many streets, design, street signals, cost estimates and preparation of bid documents.

LAND USE INDEX MAP

(NOT FOR SALE OR PUBLIC RELEASE)

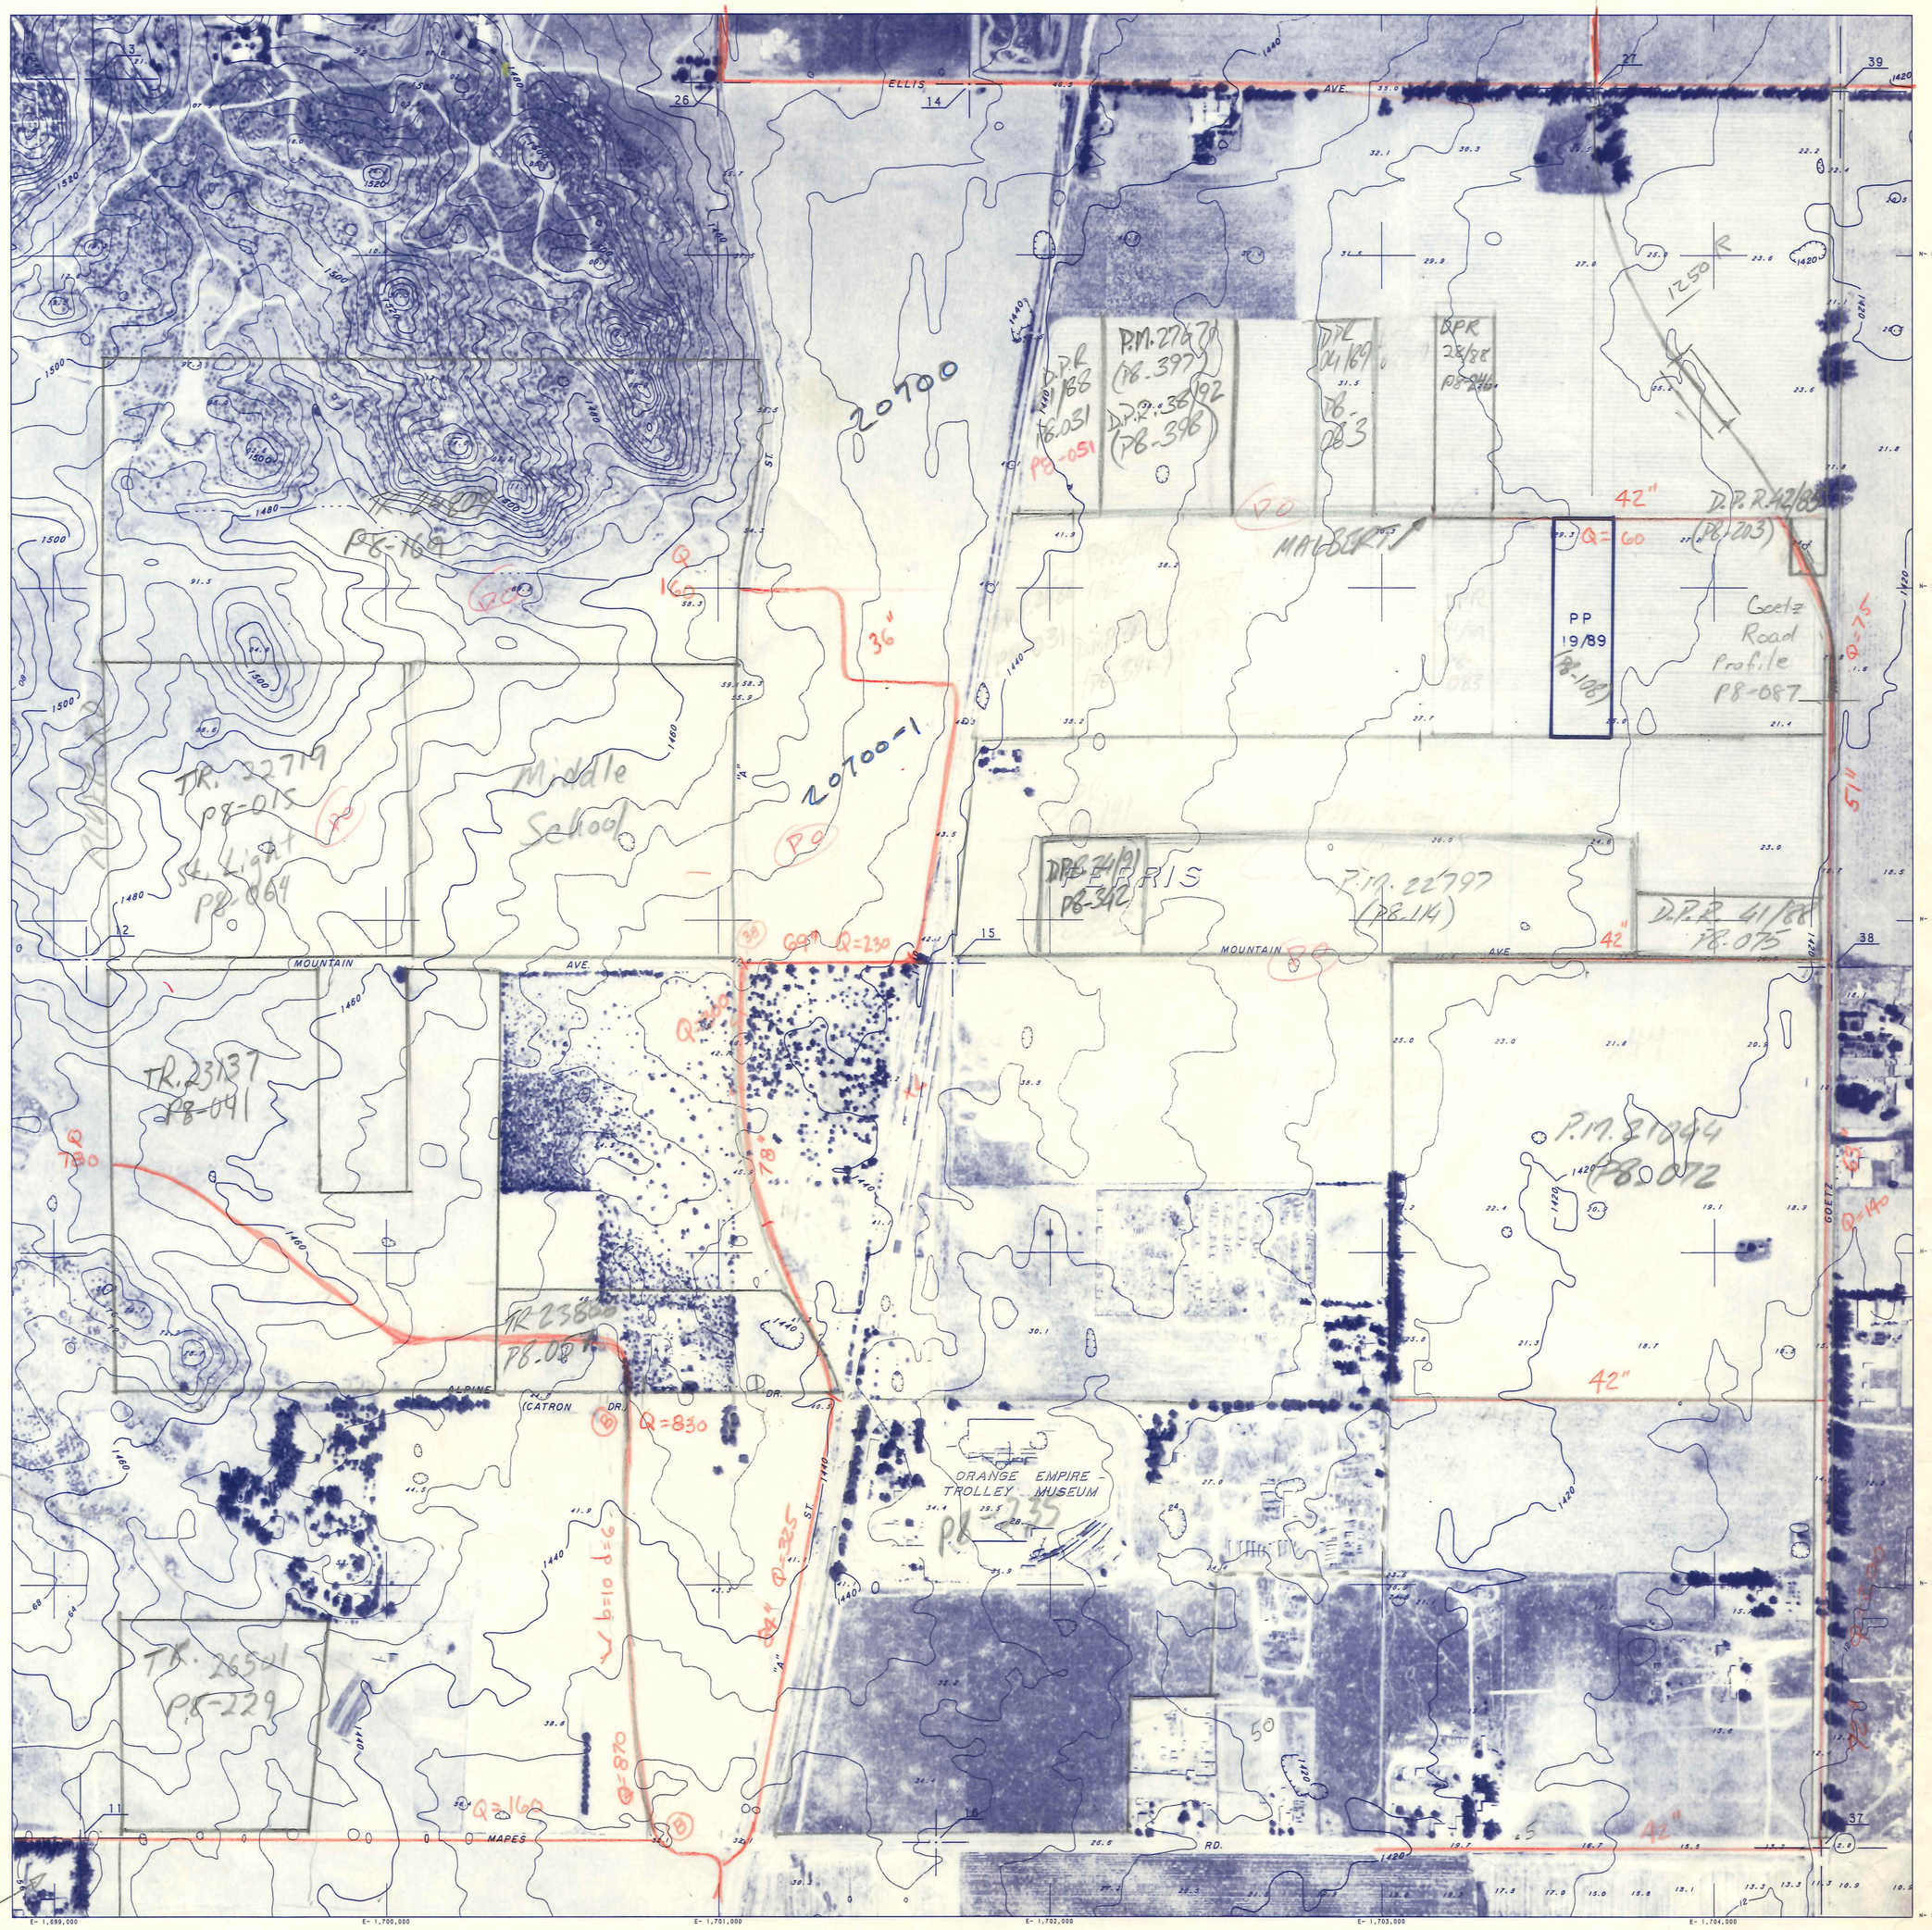

PHOTO MAP

Prepared by the Riverside County Flood Control and Water Conservation District. Map compiled by photogrammetric methods from orthophotography dated August 8, 1977. Photo imagery transferred by simple projection 7.5 times from original aerial negative. Images of objects not at ground level may be displaced. Horizontal survey data and 1000' grid are based on the California Coordinate System Zone VI. Vertical data is based on the U.S. National Oceanic Survey System (USC&GS).

Case Type	Land Disposal Site	**Status**	Completed - Case Closed
Status Date	12/6/2013 12:00:00 AM	**Cuf Case**	NO
Lead Agency	DEPARTMENT OF TOXIC SUBSTANCES CONTROL	**Loc Case Number**	80001433
File Location	DTSC	**Site History**	Techalloy Company, Inc. operates a steel wire manufacturing facility in Perris, CA. From 1966 to1979, Techalloy discharged acidic hazardous wastes (containing high levels of chromium, nickel, fluoride, copper, and nitrate) to three lined surface impoundments at the site under Board Order No. 88-66 and Resolution No. 66-38. In Oct. 1984, during removal of residual solid wastes from the impoundments, the liner puncture was discovered. Subsurface investigations (13 soil boreholes and 23 monitoring wells) performed in 1985 and 1986. These investigations concluded that groundwater contamination by total dissolved solids and heavy metals. Additional groundwater monitoring wells installed in June 1990 to investigate the extent of contaminant plumes. The site closure plan was approved by the Regional Board, State Dept. of Toxic Substances Control (DTSC), and the USEPA. The installation of a low permeanility closure cap over the three surface impoundments completed in July 1989. The Regional Board issued Order No. 90-145 for post-closure groundwater monitoring at the site on October 9, 1990. Since this is a hazardous waste facility, DTSC is the lead agency for site closure and groundwater monitoring program for the site. The Regional Board issued Order No. 90-145 for post-closure groundwater monitoring at the site on October 9, 1990. Since this is a hazardous waste facility, DTSC is the lead agency for site closure and groundwater monitoring program for the site. In May 1996, DTSC issued a hazardous waste post-closure facility permit for this facility. The Regional Board is a responsible agency (but a

Site History	Entered 8/26/04 - Techalloy operates a plant in Perris, Riverside County, California that produces high quality specialty steel wire for the Aerospace and related industries. The facility treats on site waste consisting of spent plating and etchant solutions through a process of precipitation, filtering, and evaporation. The resultant liquid is evaporated through an evaporation tower and the filter cake is shipped off site for disposal. Until recently, this process was governed by a RCRA permit. Through waste reduction and waste management changes, Techalloy was able to permit their on site treatment activities under a Permit By Rule through the County of Riverside and have allowed their RCRA permit to expire. Prior to 1985, Techalloy evaporated their waste waters in surface impoundments that were found to have leaked contaminants to the groundwater. The surface impoundments were subsequently closed		

and are now regulated by a RCRA Post Closure Permit. Techalloy is a USEPA GPRA site under USEPA lead for Corrective Action. Corrective Action activities are conducted via a Federal court order. There are three groundwater plumes at the site. The Metals plume and the Total Dissolved Solids and Nitrates plume are associated with the surface impoundments. The BETX plume is associated with an underground storage tank that was removed in the past. A few years ago, USEPA selected a pump and treat groundwater remedy which only addressed the Metals Plume. The remedy allowed the facility to process the low flow of groundwater in their on site treatment system. After two years with little effect on the apparently stable contaminant plume, USEPA allowed the facility to shut down the groundwater pump and treat systems to study the effects of the pumping on the groundwater. USEPA plans to re-evaluate the remedy after two years . As for the other two groundwater plumes, the Total Dissolved Solids and Nitrates plumes contribute to a basin wide problem that the Water Board is studying and the BTEX plume is small and stable. On December 2, 2005, DTSC-Cypress approved a Class 2 Permit Modification

(requested April 7, 2005 and revised July 26, 2005) to release Techalloy from RCRA financial assurance liability requirements for operation of its WWTS. Updated on April 25, 2006: DTSC-Cypress approved a Class 3 Permit Modification which makes a completion of corrective action determination (termination) for 81 of the 101 acres of property at the facility. DTSC and Techalloy entered into a Land Use Covenant to restrict future land use on the remaining 20 acre parcel to industrial/commercial use. The 81 acres is to be developed by Jennings Land Company for housing. A Land Use Restriction Inspection Report was submitted on May 23, 2006. Update: As of June 2006, there has been a proposal to terminate the Federal Consent Decree and transfer corrective action obligations to DTSCs post-closure permit. Techalloy requested changes to the Water Quality Monitoring and Response Program in their Post-Closure Permit Plan Renewal Application (in November 2005). The project was transferred from Cypress to Sacramento in February 2006. Administrative completeness was determined May 8, 2006. A Hazardous Substances Fee Transmittal Form (BOE-825) was submitted. For Technical Review, the Groundwater

Monitoring Plan is being reviewed. Update 6/29/07 - A NOD was sent to the facility on September 13, 2006, which was amended on December 5, 2006. On February 16, 2007, the Permit Team took over the post closure permit renewal.

Site History

SITE/FACILITY TYPE POST CLOSURE PERMIT - PERMITTED ACTIVITIES: SURFACE IMPOUNDMENT-DISPOSAL, SURFACE IMPOUNDMENT STORAGE, SURFACE IMPOUNDMENT TREATMENT - PERMIT AUTHORITY: RCRA QUARTERLY UPDATE for October thru December 2017: PERMITTING ACTIVITY: DTSC completed the technical review of the hazardous waste post-closure permit application. SIGNIFICANT ISSUES: None to report. FACILITY DESCRIPTION/ HISTORY The Central Wire facility (aka Techalloy; facility) is located approximately 20 miles southwest of Riverside, at 2500 \"A\" Street, Perris, California. The facility produces specialty stainless-steel and nickel alloy wire products. The facility occupies 20 acres but the majority of the operations are conducted on approximately seven (7) acres. A Post-Closure Permit exists for three (3) closed surface impoundments located on the western portion of the facility. The three impoundments

EnviroCheck Solutions, Inc.
v. 866-517-5513 - f.858-259-0757
www.envirochecksolutions.com

were ponds used to collect wastewater from the past wire-finishing operations and these pond leaked contaminants into the groundwater. The facility is located on the outskirts of the town of Perris and is surrounded by open fields and low hills. South and southeast of the property is zoned as agricultural and is actively farmed. North and northwest of the property is zoned as residential/agricultural and is sparsely populated. The closest development is a residential community located approximately 0.4 miles north of the facility. In 1965, the facility was constructed. From mid-1960's through 1985, wastewater from metal finishing operations were discharged to one of three evaporation ponds or surface impoundments. The facilitys operational permit allowed the following hazardous constituents in the waste stream: copper cyanide, hydrochloric acid, hydrofluoric acid, nickel compounds, nitric acid, potassium permanganate, sodium dichromate, sodium dichromate, sodium hydroxide, sulfuric acid, and zinc compounds. In 1979, wastewater discharge to Pond 2 and Pond 3 ceased and in 1985 discharge to Pond 1 ceased when the current waste water treatment system (WWTS) started. Pond 1 has a synthetic liner over concrete base and Ponds 2 and 3 have synthetic liners. Closure of the ponds: For Pond 1 the sludge material was neutralized on site and remains in Pond 1 on top of the concrete base. The estimated volume of sludge left in Pond 1 is approximately 30,000 cu-ft (1,111 cu-yd). For Ponds 2 and 3 the sludge materials were neutralized, excavated and hauled off-site to an approved disposal facility. About 220, 16-yard loads of sludge material and visibly impacted soil were removed. All three ponds were backfilled with clean soil, covered with: a clay layer, a layer of 60-mil high-density polyethylene sheeting, a geomembrane liner, and a top cover of soil to establish ground cover. The entire cap covers the three ponds and is surrounded by a V-ditch to control drainage. There are three groundwater plumes at the site. A metals plume and a total dissolved solids and nitrates plume are associated with the closed surface impoundments. A benzene, toluene, ethylbenzene, xylene plume is associated with an underground storage tank that was removed. Post closure activities include groundwater monitoring, inspection and maintenance of the cover, reporting and record keeping. Currently, the Facility is under a corrective action groundwater monitoring program. PERMITTING REGULATORY DESCRIPTION/ HISTORY In July 1989, the impoundments were closed under DTSC oversight and in May 1996, DTSC approved the Post Closure Plan granting closed status for the ponds. In 1985, the WWTS became operational to treat on-site waste that was governed by a Resource Conservation and Recovery Act (RCRA) permit. In 1998, U.S. EPA selected a pump and treat groundwater remedy to address only the metals plume in groundwater. In January 2002, groundwater extraction was

EnviroCheck Solutions, Inc.
v. 866-517-5513 - f.858-259-0757
www.envirochecksolutions.com

discontinued. On August 8, 2002, the regulatory authority for WWTS changed to a Permit By Rule overseen by the County of Riverside. All federally regulated residual wastes from the WWTS are shipped off-site. On April 25, 2006, the DTSC determined the completion of corrective action for 81 of the 101 acres of property the facility formerly owned. The facility currently owns the remaining 20-acre parcel and is in a Land Use Covenant with DTSC that restricts future land use to industrial/commercial use. The 81 acres may be developed for residential use. The Facility is now in post-closure and is permitted and regulated by a DTSC Hazardous Waste Facility Post-Closure Permit (EPA ID CAD059277137) dated 2008. The permit will expire on March 1, 2018. The permit covers three former Hazardous Waste Management Units: -Surface Impoundment 1, -Surface Impoundment 2, and -Surface Impoundment 3. The units are also referred to as former evaporation ponds or ponds. On October 16, 2014, DTSC approved a Class 1* Permit Modification to reduce the frequency of water-level-measurements from quarterly to semiannually to match corresponding groundwater sampling events occurring in January and July of each year. In addition, text in the Water Quality Monitoring and Response Program (Jan. 2008, Weston Solutions, Inc.) was amended to account for the Modification. On March 16, 2015, DTSC acknowledged a Class I Modification to the post-closure permit changing the business and parent corporation name from Techalloy Company, Inc. to Central Wire Incorporated. Pursuant to California Health and Safety Code, chapter 6.11 (commonly known as Senate Bill 1082), both DTSC and the Santa Ana Regional Water Quality Control Board (SARWQCB) reached an agreement that DTSC is fully responsible to implement corrective action at the Facility. SARWQCB will not be involved in corrective action at this Facility. The facility monitors the two groundwater plumes associated with the closed ponds, as Corrective Action Monitoring, complying with California Code of Regulations, Title 22, Division 4.5, Chapter 14, Article 6. The Facilitys has a standby letter of credit and a trust agreement as their chosen method of financial assurance.

EnviroCheck Radius Search Report

About This Report

The databases searched to compile the enclosed report are gathered from numerous federal, state and local governing environmental entities. All of the databases required to be searched by ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process - Section 8.2, Standard Environmental Records Sources, have been included in this report, and searched to the required distances from the subject property. Additionally, EnviroCheck Solutions, Inc (ECS) has acquired other valuable databases and integrated them into this report in order to provide more valuable information to our clients regarding hazardous materials storage and release sites within a onemile radius from the subject property.

ECS has created a sophisticated data update system, keeping our report databases as current as possible (surpassing ASTM E1527 requirements). ECS consistently requests and updates data from each of the government agencies used to create this report. Depending on the type of database, records are updated at the agencies at varying intervals (daily, monthly, quarterly, semi-annually, or annually). An overall data update (including all available updates) is loaded into our specialized software on a quarterly basis.

It should be clearly understood that this database/map report lists only reported and accurately entered sites. Numerous sites have yet to be discovered and therefore are not yet listed by any governmental agency. The most effective way to determine if a site may be listed by a government agency in the future is by performing a Transaction Screen or Phase I Environmental Site Assessment, which include a professional site inspection and review of historical records. This radius report satisfies only one subsection requirement found within the ASTM Phase I Environmental Site Assessment reporting requirements. This report should not be considered a Phase I Environmental Site Assessment. If no sites are found for a database searched, the database and its description are excluded from the report details so as to report recorded sites only. Sites that include erroneous or incomplete address information may not show up on the report. Every attempt is made to include a listing of these unlocated sites in the report where there is a possibility of their impacting the subject property, but no guarantee can be made.

ECS has used a technology called Geocoding to locate the sites on the map. While this technology is the standard of care in the industry and is generally reliable for well formatted, complete and correct addresses, due to the limitations of this technology no guarantee of the accuracy of site placement can be made.

For specific data inquiries, interpretations or environmental consultation contact us via email at service@envirochecksolutions.com, or via telephone at 866-517-5513. A full summary of our firm, including services offered and pricing can be viewed at www.envirochecksolutions.com.

DISCLAIMER

ECS has researched and obtained certain State and Federal environmental databases (Data) to assist its client's in meeting the requirements of ASTM E 1527-13. ECS has obtained Data that is readily available and of adequate quality to be included in this report. As of the date of this report, there are certain Data that are either not yet available or are not of adequate quality and therefore are not included in this Report.

This report contains data obtained from multiple governmental agencies. EnviroCheck Solutions, Inc. cannot insure the accuracy of the enclosed information. ECS is in no way responsible for errors and/or omissions occurring in data, data conversion, or for the client's use of the information (report). ECS and its affiliates cannot be held liable for accuracy, storage, loss or expense suffered by customers resulting directly or indirectly from any data provided by ECS. No warranty expressed or implied is made in any way in connection with this report.

EnviroCheck Radius Search Report

Searched Databases

NPL: National Priority List Sites

Sites which are found on the NPL database or the Proposed NPL database. NPL sites are a special category among National Superfund (CERCLA) Sites listed in the Environmental Protection Agency's (EPA) CERCLIS database. NPL sites are of serious, high concern and priority based on a national comparison to sites needing investigations and contamination cleanup activities (remediation). These sites, some of the worst in the nation, normally contain high levels of various contaminants that have spread over relatively long distances and usually require long term, highly expensive remediation technologies. Proposed NPL sites are of serious concern and are in the process of being evaluated for categorization as National Priority List sites.Delisted NPL sites have been removed (delisted) from the NPL if no further response or action is appropriate at the site, per EPA guidelines.

- **US EPA's Superfund Enterprise Management System Database**

CORRACTS: Corrective Action Sites

CORRACTS (Corrective Action Sites) is a subset of data found within the Federal RCRA database (RCRIS) or other state database. RCRA Corrective Action is the process by which areas at a hazardous waste facility are evaluated and, if necessary, are cleaned up. Transportation, Storage and Disposal facilities are often also listed as CORRACTS facilities.

- **California EPA Site Portal**
- **Federal EPA RCRA Generators Database**

TSD: Treatment, Storage and Disposal Sites

TSDs are subsets of data found within the Federal RCRA database (RCRIS) or other state database. TSD sites treat, store and/or dispose of hazardous materials and are federally permitted. TSD facilities are often also listed as CORRACTS facilities.

Searched Databases

BROWN: Brownfields Cleanup and Reuse Database

The U.S. Environmental Protection Agency (EPA) defines a Brownfield site as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant." Common examples of Brownfield sites are abandoned gas stations and dry cleaners, railroad properties, factories, and closed military bases. Brownfield sites are located throughout the country, and the U.S. EPA as well as state governments have compiled a listing of these sites. Voluntary Cleanup Program Sites are sometimes also included in this category.

- **EPA's Assessment, Cleanup And Redevelopment Exchange System (ACRES) database**

CSL: Contaminated Sites List

State or Local Contaminated Sites databases. These databases include local and state-designated hazardous waste sites, spill sites, superfund sites, voluntary cleanup program sites and land disposal sites. In general, these sites are currently undergoing remediation for on site contamination, remedation has been completed and/or remediation is proposed. In states where a specific Contaminated Sites database is not maintained, the CERCLIS database will contain applicable information on contaminated sites.

- **Fresno County CUPA Facilities List**

DEED: List of Deed Restrictions

The implementation of recorded land use restrictions within property deeds is one of the methods agencies use to protect the public from unsafe exposures to hazardous substances and wastes. Sites with deed restrictions are often contaminated, however levels of contaminants and methods used to control migration of contaminants are controlled and approved by the agency. These are also called Environmental Covenants or Use Restrictions

- **California Department of Toxic Substances Control's Deed Restrictions list**
- **California DTSC's HWMP Land Use Restrictions List**

SEMS: Superfund Database

Sites which are found on the Superfund Enterprise Management System (SEMS) database. The SEMS database contains information on hazardous waste sites, site inspections, preliminary assessments, and remediation of hazardous waste sites under CERCLA (Superfund). The database contains general information on sites including location and status. This database includes those SEMS sites not included on the NPL or Proposed NPL databases. This includes archived sites determined to be "No Further Remedial Action Planned (NFRAP) sites are contained within this database. Archived sites may be properties where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require Federal Superfund action. The SEMS database is a newer version of the CERCLIS database and the current SEMS version does not export as much information as the CERCLIS database once did.

CONTROLS: Institutional and Engineering Controls

U.S. EPA's and State Engineering Control Sites List and/or Institutional Control Sites List. The Engineering Control Sites list are facilities that have engineered controls in place, such as capping, containment, slurry walls, extraction wells and/or treatment methods that are intended to manage environmental and health risks by reducing contamination levels at a site, or limiting exposure pathways. The Institutional Control Sites list are administrative or legal devices, such as deed restrictions, to ensure that engineering controls stay in place and/or to ensure that land use restrictions stay in place.

- **U.S. Environmental Protection Agency's Engineering Controls list**

LUST: Leaking Underground Storage Tanks

Leaking Underground Storage Tank records contain an inventory of reported leaking underground fuel storage tank incidents. Thousands of underground storage tanks have leaked within the United States, and both open and closed cases are reported on this list. These leaks can affect subsurface soils and groundwater. Both state and local agencies oversee and track these sites.

GENERATOR: Small and Large Hazardous Materials Generators

GENERATORS is a subset of data found within the Federal RCRA database (RCRIS) or other state GENERATORS list. RCRA GENERATORS are federally permitted generators of varying amounts of hazardous materials. A listing on the GENERATOR database does not directly indicate a release has occurred, only that the site generates hazardous materials.

- Calaveras County CUPA Facilities List
- California EPA's CUPA facilities database
- California EPA Site Portal
- Contra Costa County Health Services Facilities Database
- Federal EPA RCRA Generators Database
- Fresno County CUPA Facilities List
- Marin County CUPA Facilities List
- Nevada County CUPA Facilities List
- San Francisdco Dept of Public Health HMUPA Facilities List

UST: Underground Storage Tank Sites

The databases include permitted active, inactive and closed UST facilities recorded with the below mentioned agencies. A listing on the UST databases does not directly indicate a release has occurred, only that the site currently or historically contained an underground storage tank.

- Calaveras County CUPA Facilities List
- California EPA's CUPA facilities database
- California EPA Site Portal
- California State Water Resources Control Board's Underground Storage Tank List, Historical
- Contra Costa County Health Services Facilities Database

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
