Professional Certification

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

David Noren, Vice President

1.0 INTRODUCTION

The following presents the findings of a Phase I Environmental Site Assessment (ESA) performed by EBA Engineering (EBA) for the properties located at 1200 Shiloh Road and 5823 Skylane Boulevard in Windsor, California. The properties are further identified as Sonoma County Assessor Parcel Numbers (APNs) 164-150-012 and -064, respectively and are hereinafter referred to as the project site. This ESA was completed for Mangal Dhillon (Client) in conformance with ASTM Standard Practice E1527-13.

1.1 Purpose

The purpose of this environmental site investigation is to assess the possible contamination of the project site with hazardous or toxic substances or wastes. A site may contain these substances or wastes as a result of current or past site activities, unauthorized dumping or disposal, or migration of contaminants from adjacent or nearby properties.

The Client should be aware that strict interpretation of California and federal legislation and case law may hold the landowner responsible for any toxic liability including future cleanup costs and, potentially, historical assessments and remediation work on the project site. Such statement is not motivated by any condition of the project site but is a general observation of the advisability that property owners and purchasers exercise all appropriate diligence and alertness to hazardous material risks.

This report is not intended to provide the necessary level of detail to be utilized for structural demolition/remodeling or soil or groundwater remediation. For such activities, appropriate regulations should be followed to ensure adequate coverage of material handling, worker and employee safety, airborne contamination during construction, and the precise extent of any contamination for contractor directions. This report conforms to American Society of Testing and Materials (ASTM) Standards E 1527-13 for Phase I Environmental Site Assessments.

In defining a standard of good commercial and customary practice for conducting an environmental site assessment, the goal of the processes established by this practice is to identify recognized environmental conditions, historical recognized environmental conditions and controlled recognized environmental conditions. The term recognized environmental conditions (RECs) refers to the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term historic REC refers to a past release of a hazardous substance or petroleum hydrocarbons that has occurred in connection to the property and has been addressed to the satisfaction of applicable regulatory agencies without restricting use of the property or requiring controls. The term controlled REC refers to a past release of a hazardous substance or petroleum hydrocarbons that has occurred in connection to the property and has been addressed to the satisfaction of applicable regulatory agencies and allowed to remain in place subject to the implementation of required controls. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not

present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

By performing a Phase I ESA of a parcel of real estate with respect to the range of contaminants within the scope of the CERCLA (42 U.S.C. §9601) and petroleum products, a user satisfies one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability.

1.2 Scope of Services

The scope of services performed was in general accordance with the scope and limitations of ASTM's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527 – 13) and included records review, research of historical records, interviews with past and present owners and occupants, interviews with state and/or local government officials, a site reconnaissance, and an analysis of the Subject Property's physical setting.

To determine the condition of the project site with respect to environmental liability, EBA performed the following tasks:

- 1) Reviewed past and current land use for indications of the manufacture, generation, use, storage, and/or disposal of hazardous substances;
- 2) Evaluated the potential for on-site soil and/or groundwater contamination resulting from past and present project site land use activities and, to the extent possible, adjacent off-site operations;
- 3) Rendered findings and professional opinions regarding the potential for environmental contamination at the project site; and
- 4) Recommend and perform further investigations (i.e., Phase II ESA), if deemed appropriate to evaluate whether contamination and/or environmental hazards exist at the locations identified.

1.3 Significant Assumptions

The following significant assumptions were made:

- All known and relevant information, knowledge, and experience have been provided by the User.
- Reasonably ascertainable records available from publicly available sources were used for the assessment of the project site. We assume the records used in our research are reliable

1.4 User Reliance

This Phase I ESA documents the results and conclusions regarding the potential for site impairment by hazardous substances generated, used, or stored on the project site property and within the immediate vicinity of the project site. This report has been prepared solely for the Client and any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

Please note pursuant to Section 4.6 of the ASTM Standard E 1527-13 for Phase I Environmental Site Assessments, this report is valid for 180 days from the date noted herein.

1.5 Limitations & Exceptions

Local, State, and Federal environmental regulations and property conditions can vary significantly over time. Consequently, the conclusions and recommendations presented as a result of this environmental site assessment apply strictly to the environmental regulations and property conditions existing at the time EBA performed this study. EBA assumes that the data obtained and the inferences made during this investigation are reasonable and representative of the property.

EBA makes no warranty, expressed or implied, except that our services have been performed in accordance with generally accepted existing environmental engineering, health and safety principles, and applicable regulations at the time and location of the study. EBA has analyzed the available information using currently applicable engineering techniques.

Please be advised that the recommendations presented herein are based solely on information made available to EBA by others, and includes professional interpretations based on limited research and data. Based on these circumstances, the decision to conduct additional investigative work to substantiate the findings and conclusions presented herein is the sole responsibility of the Client.

No Exceptions or Deviations occurred from the ASTM Standard.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The project site is comprised of two parcels of land located at 1200 Shiloh Road and 5823 Skylane Boulevard in Windsor, California. (Figure 1, Appendix A). The properties are 1.0 and 0.74 acres in size, respectively and include a single-family dwelling and detached garage.

A legal description of the project site is provided in the Preliminary Title Report that is included in Appendix B.

2.2 Current Use of Property

The project site property is currently an occupied residential property.

2.3 Current Uses of Adjoining Properties

The project site is located within an area that includes rural residential and commercial properties. The site is bound on the west and south by developed commercial properties. Shiloh Road borders the northern side of the project site and Skylane Boulevard borders the eastern side of the property.

2.4 Site and Vicinity General Characteristics

The project site is located in the southern portion of the incorporated area of Town of Windsor. The area to the south of the project site has been developed over many years as the Airport Business Park that contains primarily commercially developed properties. The properties to the north and west of the project site include residential and commercial properties. Zoning for the project site is Community Commercial (CC). A Parcel Map is included as Figure 2, Appendix A.

Access to the project site is from Shiloh Road that borders the northern side of the project site.

2.5 Physical Setting

The project site has a single-family dwelling that is located on the western side of the project site on the 1200 Shiloh property parcel. The project site is located within the northern portion of the Santa Rosa Plain and is generally flat and level and is located at an approximate elevation of 107 feet above mean sea level.

The following physical setting sources were utilized:

- California Geologic Survey, Santa Rosa Quadrangle Maps
- FEMA Flood Insurance Rate Map
- USGS Quadrangle Map Healdsburg, California

An aerial Site Map for the project site is included as Figure 3, Appendix A. Photo Plates showing relevant site features are also included in Appendix A.

2.5.1 Local Geology and Soils

The project site is located within the Coast Range Geomorphic Province of northern California. The Coast Range Geomorphic Province is generally characterized as a series of northwest trending elongated ridges and valleys that are a result of folding and faulting. The province includes many separate ranges, coalescing mountain masses, and several major structural valleys. The regional structure of the Coast Range is considered to be a number of independent fault blocks with different stratigraphic and structural histories.

The project site is located on the northern portion of the Santa Rosa Plain, which consists of alluvial fan deposits of Pleistocene and Holocene age. The alluvial fan deposits form a nearly continuous blanket over the Santa Rosa Plain and consist of poorly sorted coarse sand and gravel, moderately sorted fine sand and silt, and silty clay. The project site has

been mapped as having basement materials that underlie the alluvial fan deposits that consist of marine sedimentary rocks of the Miocene Age Wilson Grove Formation. Portions of these rocks may be covered by younger continental sedimentary rocks of the Pliocene-Pleistocene Age Glen Ellen Formation.

2.5.2 Hydrogeology

Based on investigations conducted at near site properties, first encountered groundwater in the area of the project site is expected to be encountered at depths of 10 to 15 feet below the ground surface. Groundwater flow has been calculated to be to the northwest towards Pool Creek and the Russian River drainage. Please note that groundwater flow directions are expected to be influenced by local topography and drainage courses and groundwater levels are expected to vary seasonally.

2.5.3 Flood Zone Map

A review of the applicable Flood Insurance Rate Map published by the Federal Emergency Management Agency (06097C0568E) indicates the project site is not located within a 100-year floodplain or floodway.

2.5.4 MS4 Stormwater Permitting Area

The project site is located within the Town of Windsor Municipal Separate Storm Sewer Service (MS4) permitting area. Enhanced stormwater management requirements can apply within MS4 areas for land uses.

3.0 HISTORICAL INFORMATION

3.1 Historical Summary

Historic information reviewed for this assessment indicates that the project site was initially developed as a rural residential property in 1964 when the existing dwelling and garage were constructed on the 1200 Shiloh Road property. The project site appears to have changed little over time and it appears that the land use for the 1200 Shiloh Road property parcel has consisted of residential use.

The 5823 Skylane Boulevard property parcel appears to have remained undeveloped over time with few improvements. The property parcel was part of the Airport Business Park planning and entitlement process and there are improvements such as utilities and sidewalks on the eastern side of the property parcel. It also appears that there is fill materials that have been placed over a majority of the parcel.

Limited planning and permitting records reviewed as part of this assessment indicate that there appears to have been few changes to the project site over time. Historic aerial photographs of the project site dating from 1942 to the present were reviewed for this assessment that confirm that the existing dwelling and several associated structures were present at the project site from at least 1964 to the present day with no significant changes.

Both properties are currently owned by Mangle S. Dhillon.

From the available historical documentation reviewed for this assessment, it appears the site history is well known and documented with no significant data gaps.

3.2 Historical Aerial Photographs

Historical aerial photographs for the years 1942, 1952, 1968, 1970, 1973, 1983, 1993, 2006, 2009, 2012 and 2016 were obtained from Environmental Data Resources (EDR). Aerial photographs can indicate changes in land use of a site over time. The following tables presents our findings from a review of the available aerial photographs.

Historical Aerial Photographs - Grant Property

Photo Date	Photo Scale	Description
Date	Scale	
1942	1" = 500'	The 1942 photograph indicates the project site as a bare and undeveloped rural property. No site improvements are visible at either of the property parcels. Shiloh Road is visible to the north. Most of the surrounding area is visible as undeveloped land. Rural residential properties are visible to the east and west of the project site.
1952	1"= 500'	The 1952 photograph indicates no significant changes to the project site from the 1942 photograph. The surrounding area appears generally unchanged.
1968	1"= 500'	The 1968 photograph shows the dwelling and detached garage present at the 1200 Shiloh Road property parcel. The remainder of the project site is undeveloped. The surrounding area appears generally unchanged.
1973	1"= 500'	The 1973 photograph indicates no significant changes to the project site from the 1968 photograph. The surrounding area appears generally unchanged.
1973	1"= 500'	The 1973 photograph indicates no significant changes to the project site from the 1970 photograph. The surrounding area appears generally unchanged.
1983	1"= 500'	The 1983 photograph indicates no significant changes to the project site from the 1973 photograph. The surrounding area appears generally unchanged.
1993	1"= 500'	The 1993 photograph indicates no significant changes to the project site from the 1983 photograph. The surrounding area appears generally unchanged.
2006	1"= 500'	The 2006 photograph indicates no significant changes to the project site from the 1993 photograph. The surrounding area appears with many newly developed commercial properties to the south and east. Newly developed residential properties and a golf course are visible to the north of the project site across Shiloh Road.
2009	1"= 500'	The 2009 photograph indicates no significant changes to the project site from the 2006 photograph. The surrounding area appears generally unchanged.
2012	1"= 500'	The 2012 photograph indicates no significant changes to the project site from the 2009 photograph. The surrounding area appears generally unchanged.
2016	1"= 500'	The 2016 photograph indicates no significant changes to the project site from the 2012 photograph. The surrounding area appears generally unchanged.

Copies of the aerial photographs are included in Appendix C.

3.3 Fire Insurance Maps

EBA contacted EDR to determine if Sanborn Fire Insurance Maps are available for the project site. No Sanborn Map coverage is available for the project site. A Sanborn Map no coverage certificate is included in Appendix D.

3.5 Recorded Land Title Records

Based on records obtained from the Sonoma County Recorder's Office and the Preliminary Title Report, the project site is currently owned Mangel S. Dhillon.

3.6 Historical Use Information for Adjoining Properties

Historic use information for adjoining properties was obtained from historic aerial photographs, topographic maps, development records and other publicly available information. As discussed herein, the area of the project site is rural in nature with rural residential properties and orchards in the surrounding area.

4.0 REGULATORY RECORDS REVIEW

4.1 Standard Environmental Record Sources

EBA contacted EDR to conduct a comprehensive Federal, state and local environmental records search for the project site and properties within a one-mile radius of the project site boundary. The purpose of the database search was to identify potential exposure to the subject property from various environmental concerns and/or hazardous materials releases. The following databases and environmental programs are included in the database search:

- National Priority List
- Proposed National Priority List Sites
- NPL Federal Superfund Liens
- National Priority List Deletions
- CERCLIS Comprehensive Environmental Response, Compensation, & Liability Information System
- Federal Facility Site Information listing
- CERC-NFRAP CERCLIS No Further Remedial Action Planned

The Environmental Record Search (ERS) consists of a map showing the location of the identified sites relative to the project site, a summary listing the identified sites by street names, and a final report describing the sources investigated and the resulting findings. It should be noted that the findings are those noted on the regulatory database(s) and that accuracy and completeness of record information varies among information sources, including government sources. The ERS findings are supplemented by interviews with owners/occupants/employees, and local government officials as necessary. Agency records review and historical data review are also used to ascertain the potential environmental significance of sites reported in the ERS. Results of the record search are presented in Appendix E. Results of the database search results are discussed below.

4.1.1 The Project Site

The project site is not identified in regulatory agency files or available records as having issues of environmental concern. There is no indication of the use, storage or disposal of hazardous materials or wastes at the project site. Further there is no indication of the current or historic use of underground fuel storage tanks or dump sites at the property.

4.1.2 Relevant Record Listings for Surrounding Properties

Several properties were identified in EDR Radius Map Report and regulatory agency records as having environmental concerns within one mile of the boundary of the project site. The following presents information for relevant near site properties.

American Tartaric Products – 1230 Shiloh Road, Windsor

The American Tartaric Products site is located directly southwest and adjacent to the project site. The site is identified in regulatory agency records as being regulated for the use and storage of hazardous materials. Available information indicates that the operations at the property include supplied products for food and beverage production. The available information indicates that minor violations have been issued by the Sonoma County Department of Fire and Emergency Services; however there is no indication of release or environmental contaminants. Based on the available information, the site is seen as posing no threat to the project site.

Shiloh Aggregates/Piombo Construction/C.A. Rasmussen – 101 & 1012 Shiloh Road, Windsor

The property located at 1010/1012 Shiloh Road is located approximately 800 feet east of the project site and is identified in regulatory records under several facility names including Shiloh Aggregates, Piombo Construction and C.A. Rasmussen. The site is identified in a number of environmental databases as having issues of environmental concern. First, the site is identified as a closed leaking underground fuel storage tank site. Available information indicates that two underground fuel storage tanks (USTs) were removed from the property in 1986 and 1996. The UST removed in 1986 was reported to not have leaked and no further investigation or actions were required. Conversely, the UST removed in 1996 was a 10,000 gallon UST used to store diesel fuel that was removed in November 1996. Soil samples collected at the time the UST was removed indicated the presence of diesel fuel contamination in soil and groundwater.

Several phases of investigation were completed at the property that included the installation of 10 soil borings and three groundwater monitoring wells that were installed in an effort define the extent of impacts to soil and groundwater.

Remedial activities at the property included the excavation of 300 cubic yards of contaminated soil and pumping and treating of 40,000 gallons of contaminated groundwater. Soil samples collected from the margins of the excavation indicated that the excavation was generally effective at removing the primary mass of contamination in soil.

Groundwater monitoring was conducted at the property for a period one year in which groundwater samples were collected quarterly. Analysis of the groundwater samples

indicated no detection of petroleum hydrocarbons or fuel related volatile organic compounds at the conclusion of the monitoring period. Based on these results, the site investigation was closed by the Sonoma County Department of Health Services in October 1999.

Based on the available information, it appears that there was a release of contaminants to soil and groundwater at the property that were determined to be confined to the identified site. Remedial activities appear to have effectively removed contaminants in soil and groundwater monitoring indication no contamination remained at the conclusion of the monitoring period. Based on the available information the site is seen as posing no threat to the project site.

It should be noted that there are numerous additional database listings for these addresses that appear to relate to the historic use of hazardous materials as well as the business operations that were conducted at these facilities. None of these additional listing are indicative of releases of hazardous materials or wastes and the additional listing are not seen as posing an environmental risk to the project site. Finally it should be noted that the identified property has been redeveloped and is now used as a commercial property.

Airport Business Park - Phase 5, Lot 9, Windsor

The Airport Business Park Phase 5, Lot 9 property is located approximately 800 feet east of the project site. Available information indicates that a Phase II Environmental Site Assessment was conducted at the property in March 1995 prior to the development of the property. The property was reported to have been historically used for several industrial purposes including an asphalt plant. Soil samples collected during the investigation indicated the presence of petroleum hydrocarbons consisting of diesel and motor oil. In addition low concentrations of diesel was detected in several grab groundwater samples. The investigation of the site was overseen by the North Coast regional Water Quality Control Board (NCRWQCB) under the Spills, Leaks, Investigation and Cleanup (SLIC) program.

Remedial actions at the property included the excavation and disposal of the contaminated soil that was conducted as part of the redevelopment of the property that was completed as part of a Mitigated Negative Declaration and Waiver of Waste Discharge requirements from applicable regulatory agencies. It appears that some of the excavated soil was reused as fill materials under streets and sidewalks for the redevelopment of the property.

From the available information it appears that the contamination discovered at the property was localized and confined to the site and there is no indication that the contamination impacted the project site. The investigation was subsequently closed by the agencies with no further action required. Based on this information the site is seen as posing no threat to the project site.

Airport Business Park Lots 15 & 16, 1175 Kittyhark Boulevard, Windsor

The Airport Business Park Lots 15 & 16 are located approximately 1,500 feet southeast of the project site. Environmental investigation of the site was initiated after contaminated soil was encountered during the development of the property. The site was reported to be part of the Rasmussen Construction Yard and the soil contamination was attributed to the historic land uses. The contaminants in soil consisted primarily of diesel and motor oil weight range hydrocarbons. An extensive excavation was conducted at the property that reportedly removed approximately 10,000 cubic yards of soil which was reportedly hauled for disposal to licensed landfills.

A groundwater investigation was also conducted at the property that included the installation and sampling of 10 groundwater monitoring wells to define conditions in groundwater. The wells were sampled quarterly for a period of one year and the results indicated no presence of petroleum hydrocarbons other than low concentrations of the fuel oxygenate methyl tert-butyl ether. Based on these results the site investigation was closed by the NCRWQCB in December 2004.

From the available information it appears that the contamination discovered at the property was localized and confined to the site and there is no indication that the contamination impacted the project site. The investigation was subsequently closed by the agencies with no further action required. Based on this information the site is seen as posing no threat to the project site.

Ecodyne Site- 930 Shiloh Road, Windsor

The Ecodyne/Fluor (Ecodyne) property is located approximately 1,800 feet southeast of the project site. The site is reported to have manufactured wooden cooling towers from 1965 to 1984. The Ecodyne facility included a large area within the existing Shiloh Business Park. The facility operations utilized chromic acid, sodium dichromate, and copper sulfate as a wood treatment in the manufacturing process. Surplus chemical solution was reportedly pumped to an evaporation and settling pond located at the property. Overflow from the pond was reportedly discharged to a drainage ditch which then discharged to Pruitt Creek and eventually the Russian River.

Assessment activities conducted at the site beginning in 1982 indicated the presence of elevated chromium concentrations in soil and groundwater. Several phases of investigation and remediation have occurred at the site with oversight from the NCRWQCB. In 1989 the discharger started a groundwater extraction, treatment, and disposal system to remediate groundwater contaminated with hexavalent chromium. The extraction system operated from March 1992 to September 1994. In 1997 the discharger started direct injection of calcium polysulfide as a means to remediate groundwater insitu. Injection of calcium polysulfide was conducted during three events from 1997 to 2002. These remedial treatments were reported to be generally successful in lowering concentrations of chromium in groundwater, however elevated concentrations persist in the shallow groundwater near the source area and did not appear to be capable of achieving remedial goals.

Additional injection of calcium polysulfide was performed in 2007 and 2013 in areas where hexavalent chromium was still persistent. Currently the site is in verification monitoring to assess the impacts of remediation. The site currently has 16 groundwater monitoring wells that are monitored semi-annually. From the available information groundwater flow from the site is to the northwest towards the project site; however the site is located a significant distance from the project site and there is no indication that releases from the site have migrated from the property. It is likely the monitoring and potentially additional remedial efforts will continue into the foreseeable future.

There is no indication that the releases at the property have impacted the project site. Based on the available information the site is seen as posing a low risk to the project site.

Shiloh Road LLC Property- 930 Shiloh Road, Windsor

The Shiloh Road LLC property is also located approximately 1,800 feet southeast of the project site and was also historically a part of the former Ecodyne facility. In 2016 a Preliminary Endangerment Assessment was completed at the facility with oversight from the California Department of Toxic Substances Control (DTSC). The investigative work included sampling and characterizing soil, groundwater and sediment at the property.

The investigative work was conducted in two phases. The first phase of work included drilling 41 borings to two feet below the ground surface to characterize surface soils, installing four borings to five feet below the ground surface to characterize intermediate depth soils and collecting four sediment samples from the drainage swale along the western property boundary. The second phase consisted of drilling an additional 24 borings to depths ranging from 20 to 24 feet below the ground surface to collect soil and grab groundwater samples, drilling four additional borings to two feet below the ground surface to collect additional shallow soil samples and collecting four soil samples from immediately beneath the concrete lining of the drainage swale on the west side of the property.

The assessment of the property indicated the presence of a variety of contaminants in soil and groundwater including chromium, arsenic, lead, petroleum hydrocarbons, organochlorine pesticides, wood treatment products including creosote and volatile organic compounds. In several cases the detected concentrations of these compounds exceeded applicable regulatory limits for residential and commercial uses.

There is no indication that the releases at the property have impacted the project site. Based on the available information the site is seen as posing a low risk to the project site.

ADDITIONAL SITES

Additional properties in the surrounding area of the project site are identified in regulatory agency files as having environmental issues. Many of these sites are regulated facilities for the use, generation and disposal of hazardous materials and waste. Several other sites have either completed or are currently conducting investigations for release of contaminants to the environment. All of the additional sites are seen as posing a minimal risk to the project site property.

4.1.3 Orphan Sites

An orphan site is a listing with an undefined location. Typically, orphan sites result from poor address and site location information. EDR identified seven orphan sites during the standard environmental records search. None of the identified sites are located near the project site. The Orphan site listing is included in the EDR Radius Map included in Appendix E.

4.1.4 Vapor Encroachment Screening

Vapor encroachment screening was conducted for the project site property in conjunction with this assessment pursuant to ASTM Standard 2600-10. Tier 1 vapor screening was performed to determine if vapor intrusion was a threat to the present or future use of the project site due to the presence of the documented release of petroleum hydrocarbons at the near site properties. The Tier 1 screening is based on the following factors:

- Types and concentrations of contaminants present
- Soil characteristics
- Depth to groundwater
- Location of the project site property in relation to the known or suspected contaminants
- Vapor conduits
- Cleanup status of the contaminated property

The minimum distance criteria for the assessment of petroleum hydrocarbon releases pursuant to ASTM 2600-10 is one-tenth mile (528 feet) and one-third mile (1,760 feet) for volatile organic compounds. As discussed there have been no known releases of hazardous materials or wastes at the project site.

As discussed there are a number of known contaminant sites within the criteria distances in the vicinity of the project site. Several of the identified sites located in the area of the project site are expected to be downgradient or side gradient with respect to groundwater flow and contaminant transport. Of the known sites, there has been a significant amount of investigation and remediation associated with these sites which has adequately characterized these impacts and remedial activities have greatly reduced groundwater contaminant concentrations. There is no indication that the contaminant releases from surrounding properties has impacted soil or groundwater at the project site.

Investigations in the surrounding area have indicated that soil in the area of the project site consists of alluvial soil which consists of a heterogeneous mixture of sands, silts, clays and gravel. Fine grained materials were found to be more prevalent than coarse grained materials. These soil types would be expected to be of low to moderate transmissivity with respect to vapor.

Groundwater was demonstrated to vary in depth seasonally from ten to 15 feet below the ground surface and the groundwater flow direction was calculated to be to the west to northwest in the area of the project site.

It is expected that a variety of subsurface utilities are present in the area surrounding the project site. These utilities could represent a vapor conduit if contaminants were present in significant concentrations and were of a nature and type that volatilization would be expected to occur.

Given the conditions at the project site and surrounding properties the risk of vapor intrusion at the project site from the historic releases at the near site properties is seen as unlikely.

4.2 Additional Environmental Information Sources

Supplemental environmental information was obtained by reviewing reasonably ascertainable information at applicable regulatory agencies. The following provides a summary of the regulatory agencies contacted for this assessment and provides a brief description of the information source and record review findings.

4.2.1 Sonoma County Assessor's Office

Development and tax records were reviewed at the Sonoma County Assessor's Office. No significant data gaps were noted within the available information.

4.2.2 Sonoma County Recorder's Office

Recorded deeds and other relevant site documentation were reviewed at the Sonoma County Recorder's Office internet site. No environmental liens or deed restrictions were noted in the available information.

4.2.3 Sonoma County Department of Health Services

No information for the project site was available at this agency. Information for several near site properties was reviewed using the online public information portal.

4.2.4 Sonoma County Fire & Emergency Services

No information for the project site was available at this agency.

4.2.5 Sonoma County Permit & Resource Management Department

Limited permitting and planning records for the project site were reviewed at the Sonoma County Permit and Resource Management Department. This is mainly due to the fact that the area of the project site has been annexed by the Town of Windsor and building and planning records are now archived at the Town of Windsor offices.

4.2.6 Town of Winsor Department of Community Development

Building and planning records for the project site were acquired from the Town of Windsor. The available information is limited due to the fact that there appears to have been few changes to the project site over time. The available information included documentation for several proposed projects for the project site; however it appears none of these projects were constructed. The documentation also included planning documentation for the Airport Business Park which includes the project site property parcel located at 5823 Skylane Boulevard.

4.2.7 North Coast Regional Water Quality Control Board

No information for the project site was available at this agency. Information for several near site properties was reviewed at this agency.

4.2.8 California Department of Toxic Substances Control

No information for the project site was available at this agency. Information for several near site properties was reviewed at this agency.

4.2.9 California State Water Resources Control Board Geotracker Database

The Geotracker web site is an online information repository for environmental cleanup sites that is administered and overseen by the State Water Resources Control Board. The Geotracker site was consulted to determine if either the project site or surrounding properties were identified in this environmental database as having environmental concerns. The project site was not identified. Several sites in the surrounding area were identified and are discussed herein.

4.2.10 California Department of Toxic Substances Control EnviroStor Database

The Envirostor web site was consulted to determine of either the project site or surrounding properties were identified in this environmental database as having environmental concerns. The project site was not identified. Several sites in the surrounding area were identified and are discussed herein.

5.0 USER PROVIDED INFORMATION

User provided information is discussed in the following sections.

5.1 User Questionnaire

A User Questionnaire was completed by the Client. A copy of the questionnaire is included in Appendix E.

5.2 Results of Title Records Search for Environmental Liens or Activity and Use Limitations

A review of Title information was performed using available public documents from the Sonoma County Recorder's Office and the Preliminary Title Report dated March 6, 2019. No environmental liens or Use Limitations were noted in record information reviewed for this assessment.

5.3 Specialized Knowledge or Experience of the User

The User of this assessment indicated no specialized knowledge or experience regarding the history and uses of the project site.

5.4 Actual Knowledge of User

The User of this assessment indicated no specific knowledge of the history and use of the project site which includes having specialized knowledge regarding environmental conditions at the project site.

5.5 Commonly Known or Reasonably Ascertainable Information

The User of this report indicated as having no known and/or reasonably ascertainable information regarding the history and use of the project site.

5.6 Reason for Significantly Lower Purchase Price

The User of this report is generally aware of the historic use and current condition of the project site. The User is further aware that there can be reductions in the price of the project site through property acquisition if there are recognized environmental conditions present. There were no environmental conditions identified at the project site from this assessment that would be expected to lower the price or value of the property.

5.7 Owner, Property Manager and Occupant Information

The current owners of the project site are Mangel S. Dhillon.

As stated the dwelling at the project site is currently occupied.

5.8 Reason for Performing Assessment

It is our understanding that the User contracted this Phase I Environmental Site Assessment to provide an assessment of the environmental condition of the project site as part of the potential development of the project site.

5.9 Previous Reports

There are no previously completed Phase I Environmental Site Assessments or reports related to the project site.

6.0 INTERVIEWS

Interviews were conducted with individuals knowledgeable about the history and use of the project site. Interviews were conducted with the following individuals:

Harman Dhillon - Current Owner of the Project Site

Harman Dhillon is the current owner of the project site with his father Mangel Dhillon. Mr. Dhillon was interviewed as part of this assessment to understand the property history and use. Mr. Dhillon confirmed that the project site was purchased recently in two phases to acquire both parcels. Mr. Dhillon indicated that to her knowledge there were no environmental issues present at the project site.

7.0 SITE RECONNAISSANCE

7.1 Methodology and Limiting Conditions

EBA personnel conducted a site reconnaissance on March 7, 2019. The site reconnaissance entailed viewing the project site and the surrounding areas. The site was inspected to observe the property and to identify discernible or potential environmental concerns. In addition, a general reconnaissance of adjacent properties was performed to confirm surrounding land use and conditions. Information was obtained by interviews with knowledgeable individuals regarding the past and current uses of the project site. No limitations were encountered to limit the extent of the property inspection. Findings from the site reconnaissance activities are summarized in the following sections.

7.2 Current Use of the Property

The dwelling at the project site is reported to be currently occupied by tenants.

7.3 Description of Structures & Site Improvements

The project site has a single-family dwelling and a detached garage that are located on the 1200 Shiloh Road property parcel. The dwelling and garage were reportedly constructed in 1964 and consist of a 1,356 square foot single-family dwelling and 840 square foot garage. Both structures are wood framed and sided with concrete foundations. Both of the structures were occupied at the time of the property inspection and as a result no interior inspection was performed. Both of the structures were observed to be in poor condition.

Additional site improvements include curb and gutter that is present on the eastside of the project site adjacent to Skylane Boulevard. There is also several underground utility vaults located on the eastern side of the project site that appear to be used to house electrical and telecommunications equipment.

A small wooden chicken coop is also located to the south of the dwelling.

The remainder of the project site consists of grass pasture land with limited landscaping.

7.4 Exterior Observations

Exterior portions of the project site were inspected for this assessment. The project site was observed to be generally clean and well maintained with no issues of environmental concern.

7.4 Interior Observations

The interior of the structures at the project site were not inspected as part of this assessment.

7.5 Hazardous Substances and Petroleum Products

At the time of the property inspection no hazardous materials or petroleum products were observed to be present at the project site.

7.6 Odors

No odors were observed at the project site during the site reconnaissance.

7.7 Pools of Liquid

No pools of free liquid were observed at the project site during the site reconnaissance.

7.8 Drums

No drums were observed at the project site during the site reconnaissance.

7.9 Unidentified Substance Containers

No unidentified substance containers were observed at the project site during the site reconnaissance.

7.10 Stains or Corrosion

No stains or corrosion was observed at the project site during the site reconnaissance.

7.11 Drains and Sumps

A storm drain sump is present on the northeastern portion of the project site.

7.12 Pits, Ponds or Lagoons

No pits, ponds or lagoons were observed at the project site during the site reconnaissance.

7.13 Stained Soil or Pavement

No surface staining of soil or pavement was observed at the project site during the site reconnaissance.

7.14 Solid Waste

No solid waste was observed at the project site at the time of the site reconnaissance.

7.15 Stressed Vegetation

No areas of stressed vegetation were observed at the project site during the site reconnaissance.

7.16 Wells

A water supply well was observed to be present on the east side of the garage. It is reported that the well is used to supply potable water for the dwelling at the project site.

7.17 Septic Systems

It is reported that there is a septic system present at the project site that is associated with the dwelling. The use and condition of the system is unknown.

7.18 Electrical Transformers

No electrical transformers were observed at the project site during the site reconnaissance.

7.19 Underground Storage Tanks

There are no records or evidence of the current or historic use of underground fuel storage tanks at the project site.

7.20 Aboveground Storage Tanks

No aboveground tanks were observed to be present at the project site.

7.21 Utilities

There appears to be established utilities present at the boundary of the project site.

7.22 Fill Materials

There appears to be fill materials that are present on a majority of the 5823 Skylane Boulevard property parcel. The origin and structural suitability of the fill materials are unknown.

7.23 Non-Scope Observations

7.23.1 Asbestos

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability,

and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are presumed asbestos containing material (PACM).

The existing structures at the project site were constructed prior to 1981. The property inspection included a limited, visual evaluation of accessible areas for the presence of suspect ACM at the project site. The objective of this visual survey was to note the presence and condition of suspect ACM observed. The limited visual survey consisted of noting observable materials that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant potential sources of ACM or PACM are present at the project site property. Additional sampling, assessment, and evaluation may be warranted for any other uses.

According to the U.S. Environmental Protection Agency, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the structures at the project site that would be reasonably expected to disturb ACM or PACM, a comprehensive ACM survey is recommended.

7.23.2 Lead Based Paint

Lead based paint is defined as any paint, varnish, stain, or other applied coating that has 1 milligram per square centimeter (or 5,000 ug/g or 0.5% by weight) or more of lead. The United States Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as Title X, to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a hazard, although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development and the U.S. Environmental Protection Agency to require the disclosure of known information on lead based paint and hazards associated with lead based paint before the sale or lease of most housing built before 1978.

No testing for lead based paint was performed as part of this assessment. Based on the age of the structures at the project site, there is a potential that lead based paint is present.

7.23.3 Radon

The U.S. Environmental Protection Agency Radon Zone Classification for Sonoma County is 3, which is defined as having a low potential to have radon concentration less than 2 picocuries per liter (pCi/L). The U.S. EPA action level for radon is 4.0 pCi/L. Based on the radon concentration information, it is unlikely that radon abatement activities would be required at the project site.

8.0 DEVIATIONS

8.1 Data Gaps

AAI Section 312.20(g) states that:

To the extent there are data gaps ... that affect the ability of persons conducting all appropriate inquiries to identify conditions indicative of releases or threatened releases in each area of inquiry under each standard and practice, such persons should identify such data gaps, identify the sources of information consulted to address such data gaps, and comment upon the significance of such data gaps with regard to the ability to identify conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances.

The history and use of the project site is well documented with no significant data gaps.

8.2 Exceptions or Deletions

There were no exceptions to, or deletions from, ASTM Practice E 1527-13.

9.0 ADDITIONAL SERVICES

9.1 Non-Scope Considerations

The following environmental issues are outside the scope (non-scope considerations) of the standard practice defined by ASTM Standard Practice E 1527-13:

- Regulatory Compliance;
- Cultural and Historic Resources;
- Industrial Hygiene;
- Health and Safety;
- Ecological Resources;
- Endangered Species;
- Indoor Air Quality;
- Biological Agents; and
- Mold

EBA identified no ASTM non-scope considerations/RECs in connection with the project site that represent potential environmental risk but are outside the standard scope of services prescribed by ASTM Standard Practice E 1527-13.

9.2 Additional Services

No additional services beyond the standard scope of services prescribed by ASTM Standard Practice E 1527-13 were requested by the Client.

10.0 DISCUSSION

The project site property appears to have been initially developed as a rural residential

property in 1964 when the existing dwelling and garage were constructed. It appears that the structures have not been significantly changed since they were constructed. The use of the project site appears to be primarily as a rural residential property. As stated the structures at the project site are currently occupied by tenants.

There is no indication of the use, storage or disposal of hazardous materials or wastes at the project site. Further there is no indication of the current or historic use of underground fuel storage tanks or dump sites at the project site.

Several sites were identified in the surrounding area as having issues of environmental concern. The identified sites are all seen as posing no environmental threat to the project site.

11.0 CONCLUSIONS/Recognized Environmental Conditions

EBA Engineering has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the properties located at 1200 Shiloh Road and 5823 Skylane Boulevard in Santa Rosa, California. Based on conclusions from the environmental records search, historical data review, and the site reconnaissance we find no recognized environmental conditions in connection with the project site.

CLTA Guarantee Form No. 28 - Condition of Title

ISSUED BY

First American Title Insurance Company

GUARANTEE NUMBER

5026900-5892180

Guarantee

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE GUARANTEE CONDITIONS ATTACHED HERETO AND MADE A PART OF THIS GUARANTEE.

FIRST AMERICAN TITLE INSURANCE COMPANY

a Nebraska corporation, herein called the Company

GUARANTEES

against loss or damage not exceeding the Amount of Liability stated in Schedule A sustained by the Assured by reason of any incorrectness in the Assurances set forth in Schedule A

First American Title Insurance Company

Dennis J. Gilmore President

Jeffrey S. Robinson Secretary

By:

Authorized Countersignature

This jacket was created electronically and constitutes an original document

© California Land Title Association. **All rights reserved.** The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses prohibited. Reprinted under license or express permission from the California Land Title Association.

EXCLUSIONS FROM COVERAGE

Except as expressly provided by the assurances in Schedule A, the Company assumes no liability for loss or damage by reason of the following:

- (a) Defects, liens, encumbrances, adverse claims or other matters against the title to any property beyond the lines of the Land.
- (b) Defects, liens, encumbrances, adverse claims or other matters, whether or not shown by the Public Records (1) that are created, suffered, assumed or agreed to by one or more of the Assureds; or, (2) that result in no loss to the Assured.
- (c) Defects, liens, encumbrances, adverse claims or other matters not shown by the Public Records.
- (d) The identity of any party shown or referred to in any of the schedules of this Guarantee.

- (e) The validity, legal effect or priority of any matter shown or referred to in any of the schedules of this Guarantee.
- (f) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the Public Records.
- (g) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the Public Records.

GUARANTEE CONDITIONS

1. Definition of Terms.

The following terms when used in the Guarantee mean:

- a. the "Assured": the party or parties named as the Assured in Schedule A, or on a supplemental writing executed by the Company.
- b. "Land": the Land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "Land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.
- "Mortgage": mortgage, deed of trust, trust deed, or other security instrument.
- d. "Public Records": those records established under California statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.
- e. "Date of Guarantee": the Date of Guarantee set forth in Schedule A.
- f. "Amount of Liability": the Amount of Liability as stated in Schedule A.

2. Notice of Claim to be Given by Assured.

The Assured shall notify the Company promptly in writing in case knowledge shall come to an Assured of any assertion of facts, or claim of title or interest that is contrary to the assurances set forth in Schedule A and that might cause loss or damage for which the Company may be liable under this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice by the failure and then only to the extent of the prejudice.

3. No Duty to Defend or Prosecute.

The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. Company's Option to Defend or Prosecute Actions; Duty of Assured to Cooperate.

Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:

- a. The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in Paragraph 4 (b), or to do any other act which in its opinion may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
- b. If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of the Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.
- c. Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or
- d. In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, the Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such Assured for this purpose. Whenever requested by

GUARANTEE CONDITIONS (Continued)

the Company, the Assured, at the Company's expense, shall give the Company all reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A to prevent or reduce loss or damage to the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

5. Proof of Loss or Damage.

- a. In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Assured furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.
- In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this paragraph shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonable necessary information from third parties, as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.
- 6. Options to Pay or Otherwise Settle Claims: Termination of Liability. In case of a claim under this Guarantee, the Company shall have the following additional options:
 - a. To pay or tender payment of the Amount of Liability together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.

- b. To pay or otherwise settle with the Assured any claim assured against under this Guarantee. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Assured that where authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay; or
- c. To pay or otherwise settle with other parties for the loss or damage provided for under this Guarantee, together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in 6 (a), (b) or (c) of this paragraph the Company's obligations to the Assured under this Guarantee for the claimed loss or damage, other than the payments required to be made, shall terminate, including any duty to continue any and all litigation initiated by the Company pursuant to Paragraph 4.

7. Limitation Liability.

- a. This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in Schedule A and only to the extent herein described, and subject to the Exclusions From Coverage of This Guarantee.
- b. If the Company, or the Assured under the direction of the Company at the Company's expense, removes the alleged defect, lien, or encumbrance or cures any other matter assured against by this Guarantee in a reasonably diligent manner by any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.
- c. In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom.
- d. The Company shall not be liable for loss or damage to the Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.
- 8. Reduction of Liability or Termination of Liability.
 All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the Amount of Liability under this Guarantee pro tanto.

9. Payment of Loss.

- a. No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.
- When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions, the loss or damage shall be payable within thirty (30) days thereafter.

GUARANTEE CONDITIONS (Continued)

10. Subrogation Upon Payment or Settlement.

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

11. Arbitration.

Either the Company or the Assured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision, or to any other controversy or claim arising out of the transaction giving rise to this Guarantee. All arbitrable matters when the amount of liability is \$2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of \$2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. Arbitration pursuant to this Guarantee and under the Rules shall be binging upon the parties. Judgment upon the aware rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

12. Liability Limited to This Guarantee; Guarantee Entire Contract.

- a. This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole
- Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.
- c. No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

13. Severability.

In the event any provision of this Guarantee, in whole or in part, is held invalid or unenforceable under applicable law, the Guarantee shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

14. Choice of Law; Forum.

- a. Choice of Law: The Assured acknowledges the Company has underwritten the risks covered by this Guarantee and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of Guaranties of the jurisdiction where the Land is located.
 - Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims that are adverse to the Assured and to interpret and enforce the terms of this Guarantee. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.
- Choice of Forum: Any litigation or other proceeding brought by the Assured against the Company must be filed only in a state or federal court within the United State of America or its territories having appropriate jurisdiction.

15. Notices, Where Sent.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at First American Title Insurance Company, Attn: Claims National Intake Center, 5 First American Way, Santa Ana, California 92707. Phone: 888-632-1642 (claims.nic@firstam.com).

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EBA Engineering were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no

further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/13/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Site Name: American Tartaric Products

Violation Date: 06-25-2018

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter

6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in

safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training

records for a minimum of three years.

Violation Notes: The business failed to provide initial and annual training to all

employees in safety procedures in the event of a release or threatened

release of a hazardous material including familiarity with the

emergency response plan or failure to document and maintain training records for a minimum of three years. Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three

years.

FINDS:

Registry ID: 110009532167

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA BOND EXP. PLAN:

Reponsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN

Project Revenue Source Company: Not reported Project Revenue Source Addr: Not reported Project Revenue Source City, St, Zip: Not reported

Project Revenue Source Desc: The following potential responsible parties have been identified: Ecodyne

> Corporation, Fluor Corporation, Sid Shah and Ted Rivas. DHS issued a remedial action order to the responsible parties in August, 1987. The order was amended in September, 1987. DHS has budgeted \$100,000 for oversight/monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs

associated with remedial investigations and cleanup activities.

Site Description: The Ecodyne Cooling site was a former wood treatment facility, operating from

1965 to 1984. Lumber was treated with sodium dichromate, chromic acid, copper sulfate and arsenic acid to protect the lumber from rotting and insects. During its operation, these chemicals were spilled onto the soil and into the ground

water.

Hazardous Waste Desc: The chemicals of concern are: Soil: Hexavalent chromium, copper, arsenic and

chromium. Ground Water: Hexavalent chromium.

Threat To Public Health & Env: The primary threat to public health is from ground water contamination onsite

and offsite. Although no private or municipal wells have been impacted, several

domestic wells are located within a 3 mile radius of the site. Site Activity Status:

Operations at the facility are presently inactive. Ground water investigation and cleanup is actively being pursued. Soil contamination is presently being

evaluated.

Local Agency:
SONOMA COUNTY

RB Case Number: 1NSO037

File Location: Regional Board

Potential Media Affected: Aquifer used for drinking water supply

Potential Contaminants of Concern: Chromium

Site History:

Ecodyne operated a wood treatment facility from July 1965 to January 1984, at 930 Shiloh Road property. The discharger utilized chromic acid, sodium dichromate, and occasionally copper sulfate in the wood treatment process. The acid chromated copper was diluted with water and applied to lumber in a pressure vessel. The surplus chemical solution was pumped to an evaporation and settling pond, which was allowed to discharge to a ditch. The drainage ditch discharged to Pruitt Creek and eventually the Russian River. In 1989 the discharger started a groundwater extraction, treatment, and disposal system to remediate groundwater contaminated with hexavalent chromium. The remediation effort was implemented pursuant to Cleanup and Abatement Order No. 89-61 adopted April 14, 1989 and Waste Discharge Requirements Order No 92-39 adopted on May 3, 1993. This system operated from March 1992 to September 1994. In 1997 the discharger started direct injection of calcium polysulfide using a direct-push drilling rig. Injection of calcium polysulfide was conducted during three events from 1997 to 2002. These treatments were successfull in lowering concentrations of chromium in the intermediate and deep groundwater, however elevated concentrations persist in the shallow groundwater near the source area and did not appear to be capable of achieving remedial goals. In September and October 2004 highly impacted soil was treated by mixing calcium polysulfide with the soil using a hydraulic backhoe. In April 2007 additional injection of calcium polysulfide was performed in areas where hexavalent chromium was still persistent. Currently the site is in verification

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting

monitoring to assess the impacts of remediation.

The Ecodyne Pond site was used as a drip treatment facility for Background Info:

wood and metal products until the early 1970's. During site operations pentachlorophenol (PCP), creosote and lead were used to treat wood. Chemicals used in the operations were stored in

above-ground and below-grade storage tanks. Not reported

Surface soil has been contaminated with creosote, PCP, dioxin and furan congeners, and lead. Low levels of PCP have also been detected in the groundwater. Most of the site was covered with asphalt.

Not reported

A pilot was conducted to determine the effectiveness on in-situ ozonation to treat PCP and polynuclear aromatic hydrocarbons (PAHs) was conducted. The process involved the injection of ozone gas to chemically oxidize organic compounds such as PCP and

PAHs. Results from the study indicated that a successful

CA BOND EXP. PLAN:

Reponsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN

Project Revenue Source Company: Not reported Project Revenue Source Addr: Not reported Project Revenue Source City, St, Zip: Not reported

Project Revenue Source Desc: One of the past and current site owners and operators, Fluor Daniels

Corporation is funding the investigation and remediation activities. DHS will be issuing an order or entering into an enforceable agreement with the RPs. DHS has budgeted \$50,000 for oversight and monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with site

cleanup.

Site Description: This facility was a former wood treating facility. During site operations,

pentachlorophenol (PCP) and creosote were used to treat the wood.

Hazardous Waste Desc: The surface soil has been contaminated with creosote, pentachlorophenol (PCP),

low levels of dioxins and furans. Lead and zinc have also been detected in soil

and low levels have been detected in ground water.

Threat To Public Health & Env: Shallow surface soil contamination exists. Two locations were found to be

contaminated to depths of 12 feet; the contamination may extend to the ground water. Surface soil contamination may be dispersed via winds. Contaminants were routinely discharged into surface water systems and residual contaminants may

be bioavailable.

Site Activity Status: The area has been berned, paved and fenced to prevent migration via surface

water runoff. Further surface water, ground water and soil remedial

investigation activities are being completed.

WDS:

Facility ID: North Coastal 82050OSON

Facility Type: Industrial - Facility that treats and/or disposes of liquid or

semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water

pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is

under Waste Discharge Requirements.

NPDES Number: Not reported

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to

> water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Primary Waste: **CNSOIL** Not reported Waste Type2: Waste2: Contaminated Soil

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to

> water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: 0 Baseline Flow: 0

No reclamation requirements associated with this facility. Reclamation:

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category A - Any major NPDES facility, any non-NPDES facility

(particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility

(particularly those with toxicwastes) with numerous discharge points,

leak detection systems or ground water monitoring wells.

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants

> or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils,

rubble and concrete are examples of this category.

Primary Waste: **STORMS** Waste Type2: Not reported Waste2: Stormwater Runoff

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants

> or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils,

rubble and concrete are examples of this category.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

> should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

> cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

S101305079

repair facility, a towing company, and an electrical contractor (Alton, 1998). In 1987, a 350-gallon used-oil UST, a 10,000-galion UST, and an 8,000-gallon UST were removed from the site (Emcon, 1993). The site has been vacant since 1999 (TRC, 1999). Site Assessment Activities Soil and groundwater investigations have been conducted at the site since 1987. Well construction details are provided in Table 2. Soil sample analytical results are summarized in Tables 3A and 3B. Remediation Activities In March 1987, 100 cubic yards of soil were excavated from the UST pit and aerated on site. Ten cubic yards of soil were excavated from beneath the used-oil UST and removed from the site (Brunsing, 1991). In 2001, 120 feet of steel product lines and approximately 150 cubic yards of excavated soil were removed from the site (TRC, 2001). The GWPTS was started on July 18, 2003. The GWPTS extracted groundwater from wells MW4A, MW8, MW10, and MW11. ERI collected water samples monthly, quarterly, annually, or as necessary, at influent, intermediate, and effluent sample ports, and from the receiving waters, to ensure compliance with the NPDES permit and performance of the GWPTS. The NPDES permit expired in June 2006. The GWPTS treated 284,600 gallons of groundwater and removed approximately <13.7 pounds of TPHg, 2.5 pounds of benzene, and <0.05 pound of MTBE (ERI, 2007). The GWPTS was then shut down pending remedial evaluation. The SVE system was started on June 29, 2004. The SVE system extracted soil vapor from wells MW4A, MW8, MW10, and MW11. ERI collected vapor samples at influent and effluent sample ports on a monthly basis. The SVE system removed less than approximately 21,765 pounds of TPHg, 532 pounds of benzene, and 131 pounds of MTBE from the vapor stream (ERI, 2007). The SVE system was shut down in 2006 pending remedial evaluation. Remedial Excavation January 20, 2010 Between November 16 and 20, 2009, ERI observed Wayne Perry excavate soil containing petroleum hydrocarbons from the area shown on Plate 5 using a Komatsu PC300 LC excavator. ERI monitored the ambient air during the excavation activities with a PID and LEL to evaluate air quality in the workspace. Wayne Perry excavated approximately 2,831 tons of soil. The excavated material was loaded directly into 119 trucks and transported for disposal to the Clean Harbors Buttonwillow Landfill, in Buttonwillow, California. . . ERI collected samples from soils retrieved in the excavator bucket using glass jars provided by H&P Labs and brass sleeves and 5035 Sampling Kits for Calscience. The excavation was delineated by previous soil boring analytical results, placement of the shoring, and the physical constraints of the site. The excavation extended to within approximately 5 feet of the planter curb along the southern side of the site and approximately 16 feet from the edge of the station building on the northern side of the site. The northern and southern sidewalls were delineated by the placement of shoring. The western and eastern sidewalls of the excavation were sloped at an approximate 1:1 ratio. At the completion of the excavation activities, the floor of the excavation was approximately 19 feet bgs. Additional Notes by LOP staff: Verification monitoring wells and borings were installed from Jun 14 to June 17, 2010. SITE OFFICIALLY CLOSED ON AUGUST 16, 2013.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016 Date Data Arrived at EDR: 01/05/2017 Date Made Active in Reports: 04/07/2017

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/12/2018

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

USER QUESTIONNAIRE - Phase I Environmental Site Assessment

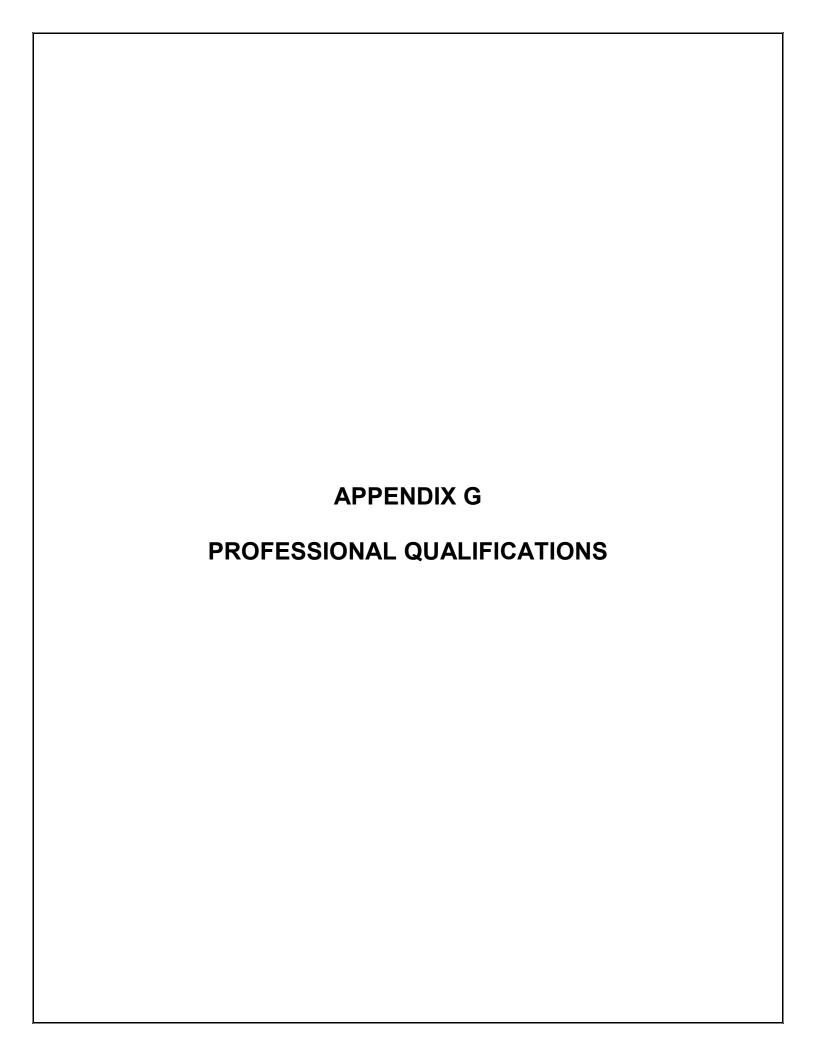

To the best of your ability please provide answers to the following questions:

(1.) Did a search of <i>recorded land title records</i> (or judicial records where appropriat see below) identify any environmental liens filed or recorded against the property undefederal, tribal, state or local law?
Yes
No_X
(2.) Did a search of recorded land title records (or judicial records where appropriate identify any activity use limitations (AULs), such as engineering controls, land us restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
Yes
No_X
(3.) Do you have any specialized knowledge or experience related to the <i>property</i> of nearby properties? For example, are you involved in the same line of business as the current or former occupants of the <i>property</i> or an <i>adjoining property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Yes ·
Yes
(4.) Does the purchase price being paid for this <i>property</i> reasonably reflect the fa market value of the <i>property</i> ? If you conclude that there is a difference, have yo considered whether the lower purchase price is because contamination is known obelieved to be present at the <i>property</i> ?
Yes_X
No

(5.) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

	(a.) Do you know the past uses of the property?
•	Yes
	No X
*	(b.) Do you know of specific chemicals that are present or once were present at the property?
	Yes
	No
	(c.) Do you know of spills or other chemical releases that have taken place at the property?

M.Sc., Environmental Management
University of San Francisco, San Francisco, California

B.Sc., Agricultural Science & Management University of California Davis, Davis, California

EXPERIENCE SUMMARY

Mr. Noren is a Registered Environmental Assessor with over 25 years of experience in the field of environmental assessments and investigations. Prior experience includes technical and management services for a wide range of environmental, hydrogeologic, and solid waste landfill projects. The nature and scope of these projects have included field and management positions for property assessments, assessments of surface and subsurface geologic investigations, underground fuel storage tank investigations and remediation, hydrogeologic characterization investigations, remedial action design and implementation of soil, groundwater, and landfill gas corrective action programs and storm water management sampling and reporting.

At EBA Engineering, Mr. Noren is the Manager of Environmental Services and oversees a number of projects including site investigations and monitoring, environmental assessments, as well as providing technical support and management services for solid waste management projects. The management requirements include the oversight of project budgets, client interactions, site investigation activities and field and reporting programs.

Mr. Noren has experience in the application of numerous investigative and treatment methodologies in a wide range of geologic environments including performing the investigation and remediation of a diverse range of contaminated sites and municipal solid waste facilities.
