Remarks: All cultural sites within this project area have been flagged for avoidance. This includes arborglyphs/dendroglyphs. This clearance should be reviewed again for consistency once a timber harvesting plan and trail reroute plan have been finalized. If the documentation included in Cultural Resource Management Report 05-16-2305 is consistent with the final proposed action and site 05-16-0430 is determined not to be eligible for the National Register of Sites due to lack of site integrity, this project will be in compliance with Section 106 of the National Historic Preservation Act. Please keep a copy of this letter in the project's planning and implementation files. Should any cultural resources be discovered during implementation, all project activities shall cease and the District Archaeologist shall be notified. Let me know if you have any questions.
