

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: St. Anthony On-site Sewer and Water Distribution System

Lead Agency: State Water Resources Control Board

Contact Name: Kristen Way

Email: Kristen.Way@waterboards.ca.gov Phone Number: 916-341-5879

Project Location: Mecca Riverside  
*City County*

Project Description (Proposed actions, location, and/or consequences).

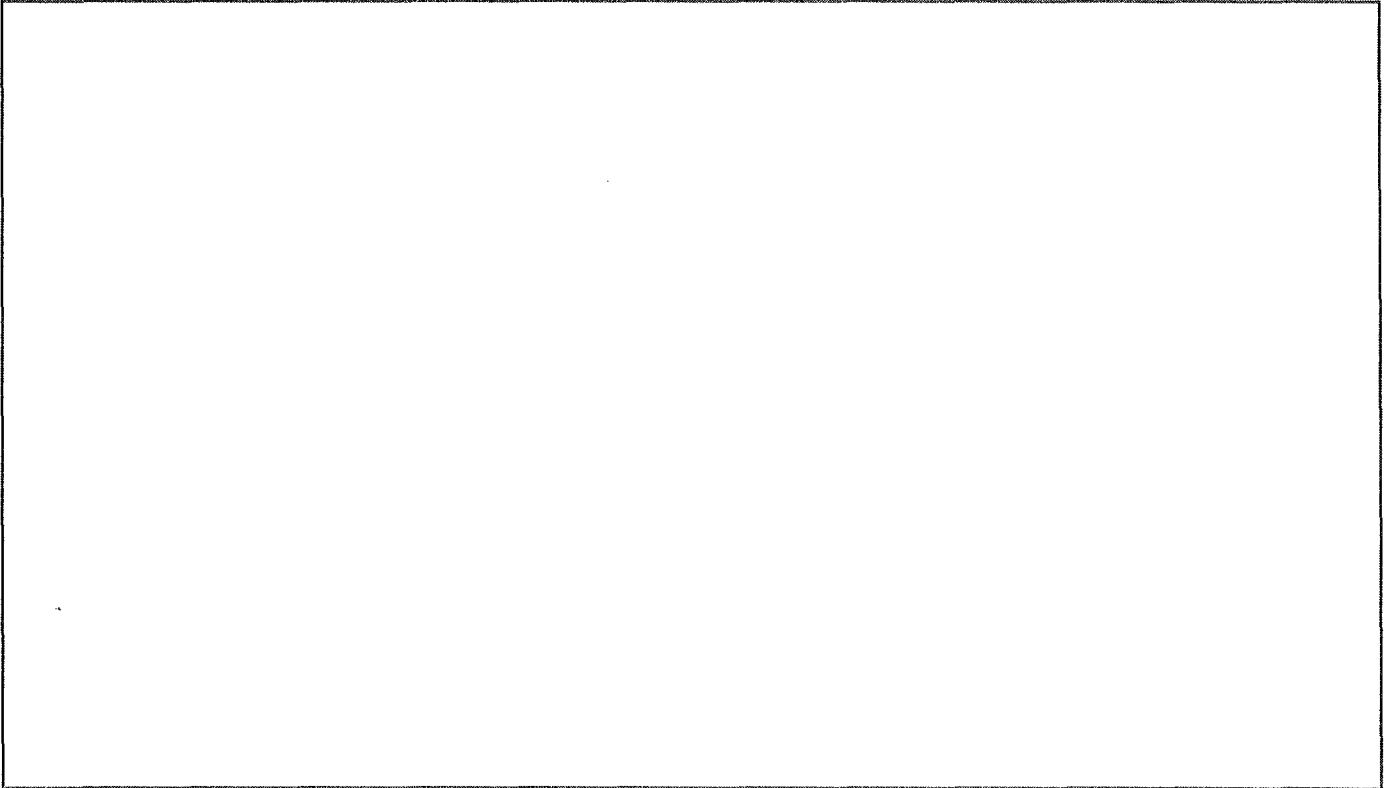

The Project includes the construction of an on-site sewage collection system and laterals that will convey sewage from each mobile home to the existing Coachella Valley Water District (CVWD) lift station at Lincoln Street and Avenue 68. The on-site sewer system will consist of approximately 32 manholes, approximately 2,200 linear feet of 4" laterals, and approximately 7,250 linear feet of 8" sewer main pipe.

The proposed on-site water distribution system will consist of approximately 8,350 linear feet of 6" water main interconnecting the mobile homes to CVWD's future off-site water main located under Lincoln Street. In addition, a 20,000-gallon hydropneumatics water storage tank will be located on the northeast corner of the Project area to serve as an emergency water supply and meet fire flow for the Mobile Home Property.

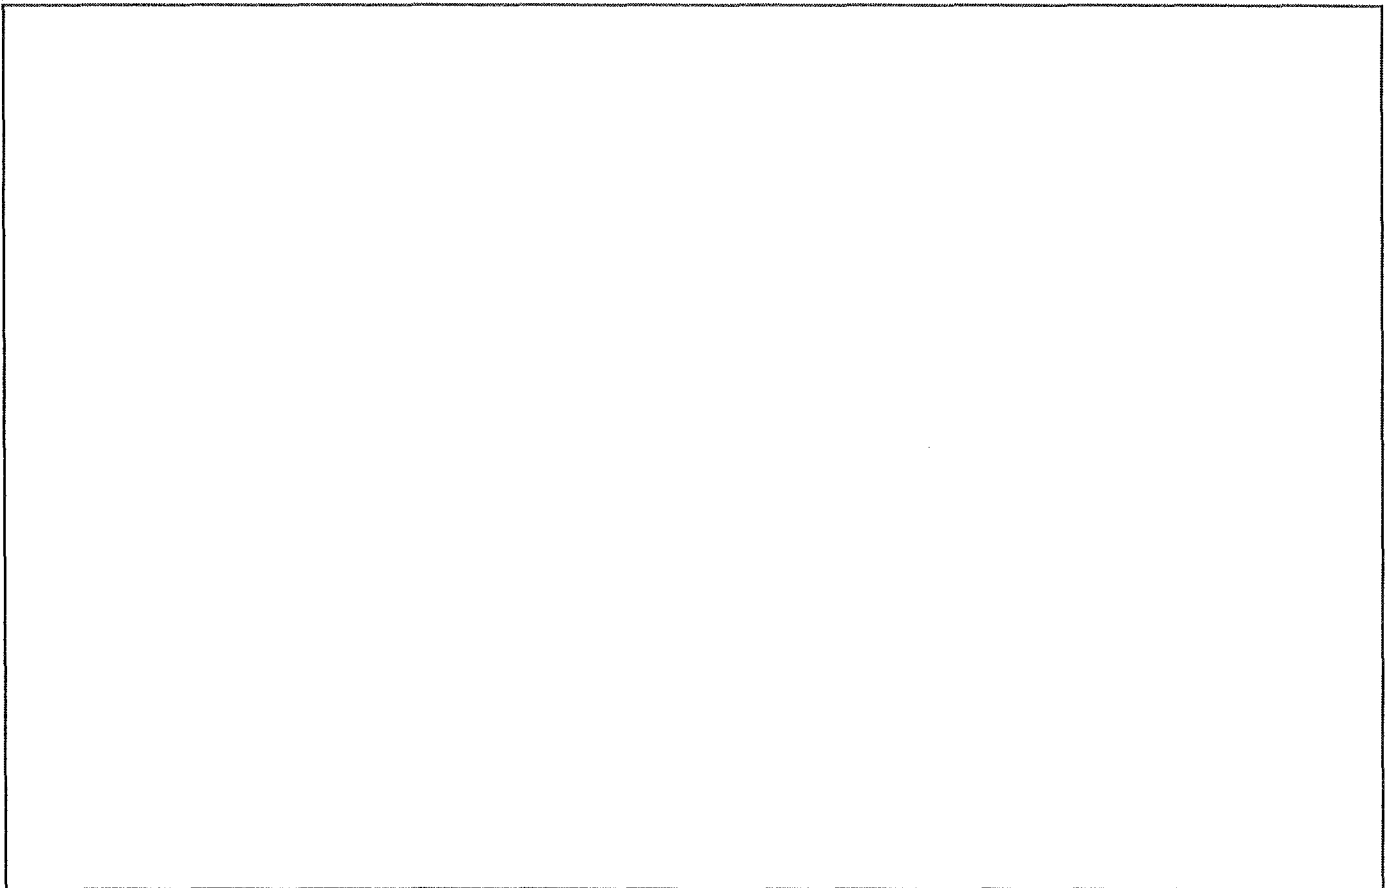

The Project will grade the entire site in ensure proper drainage, including mobile home unit pads and streets with curb and gutters to carry stormwater flow to on-site retention facilities to be located at the southernmost portion of the site with a combined storage capacity of approximately 284,484 cubic yards. The Project will also install subsurface tile drainage in accordance with the CVWD standards below the retention facilities with a gravel filtration system that allows stormwater to percolate into the groundwater basin.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

A large, empty rectangular box with a thin black border, intended for the user to describe any areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
