CA State Park

Project Description: (please use a separate page if necessary)

Construct two 100,000 gallon bolted steel water tanks at the existing tank farm in the approximate same footprint as the two exiting 88,000 gallon redwood tanks (see attached Preliminary Site Plan), connect new tanks to existing water distribution lines, install liquid chlorination facilities (which replaces the existing gas chlorination facility) potentially within the existing water treatment plant building or place said new chlorination facilities in a separate new structure adjacent/near to water treatment plant facilities. The existing access road will be graded (minor) for construction vehicles, although large delivery trucks will not be able to access the tank site due to the tight alignment and steep grades. Tank shell components, large materials and concrete will be shuttled to the tank farm site with smaller equipment. A State Park service gate will be installed

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
