Project Description (Proposed actions, location, and/or consequences).

The California Department of Transportation (Caltrans) proposes to resurface the existing pavement on State Route 58 in Kern County from 6 miles southeast of the San Luis Obispo County line to the junction with State Route 33 near McKittrick (post miles 6.0 to 15.4). This project would also replace 8 culverts within the project limits. All work would be within Caltrans right-of-way.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

A 2081 Incidental Take Permit from the California Department of Fish and Wildlife would be obtained for the San Joaquin antelope squirrel. Caltrans intends to purchase one credit from a California Department of Fish and Wildlife-approved mitigation bank.
To avoid the potential for impacts to an archaeological site that is adjacent to the project but outside the Area of Potential Effects avoidance and minimization measures would be implemented, including establishment of an ESA and Native American monitoring of the area during construction.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.
