Water Reclamation Facility WRF-3/ Utility (SP99-03)/Utility

Project Description: (please use a separate page if necessary)

"The proposed WRF-3 Lift Station is designed to pump sewage tributary from WRF-3 to the Arantine Hills Lift Station. The proposed lift station will permit the collection of sewage flows tributary to the treatment plant and upon collection, discharge the sewage to another lift station, which is properly sized to intake additional flow, before the sewage is ultimately directed to WRF-1 Treatment Plant. "The WRF-3 Lift Station is designed to pump a peak flow of 2.25 million gallons per day (MGD) (1,560 gallons per minute [gpm]) with two operational pumps and one standby pump sending flows to the WRF-3 sewer force main. Flow from the WRF-3 sewer force main would discharge to the Arantine Hills Lift Station wet well.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
