Project Description (Proposed actions, location, and/or consequences)

The Metropolitan Water District of Southern California (Metropolitan) has prepared a Program Environmental Impact Report (PEIR) and Climate Action Plan (CAP) to outline a strategy for reducing greenhouse gas (GHG) emissions associated with future construction, operation, and maintenance activities. The CAP is a roadmap that analyzes historical and forecasts future GHG emissions; sets a GHG reduction target for reducing emissions consistent with state policies; and identifies a suite of reduction actions that Metropolitan can choose from to achieve the adopted target consistent with Section 15183.5 of the CEQA Guidelines. The CAP is a customized roadmap for making informed decisions and understanding where and how to achieve emissions reductions that conform to Metropolitan's mission/goals in a meaningful and cost-effective manner. The PEIR identifies potential projects and analyzes impacts that could result from construction and operation or projects implemented to meet GHG reduction goals. As project details are developed for the individual projects identified in the CAP and PEIR, the individual project will undergo further CEQA review to ensure consistency with the impacts analyzed in the PEIR. Additional CEQA documentation will be prepared, if necessary.

Most GHG reduction measures would be implemented at Metropolitan facilities and within its rights-of-way throughout a six-county Southern California region comprised of Los Angeles, Orange, Riverside, San Bernardino, San Diego, and Ventura counties. These counties include all of Metropolitan's service area and most of its infrastructure facilities. The CAP may also involve implementation of GHG reduction measures or programs at Metropolitan land holdings in Imperial County, specifically within the Palo Verde Irrigation District, as well as land holdings in San Joaquin and Contra Costa counties, specifically on lands commonly known as Bacon Island, Bouldin Island, Holland Tract, and Webb Tract in the Sacramento-San Joaquin Delta region.
