Appendix C Phase	I Environmental	Site Assessment

June 14, 2018

Alan Smith Southwest Design Group, LLC 12223 Highland Avenue, Suite 106-201 Rancho Cucamonga, CA 91739

SUBJECT: PHASE I ENVIRONMENTAL SITE ASSESSMENT

Proposed Arbor Carwash

9744, 9760, & 9786 Arrow Route (APN 0208-291-06, 03, & 02)

Rancho Cucamonga, California

Mr. Smith:

Enclosed, please find our Phase I Environmental Assessment report for the subject property. Our services are generally guided by the provisions of the ASTM E 1527 and EPA AAI (CFR 40 312) standards.

The objective of this study is to evaluate the environmental condition of the subject property and determine the likelihood of hazardous materials impact.

Our findings, conclusions, and recommendations relating to the environmental condition of the property are presented herein. Should you have any questions, please do not hesitate to call our office. We appreciate this opportunity to be of service.

Respectfully submitted,

**RGS Engineering Geology** 

Christopher Krall, P.G. 5717, E.G. 1816

**Engineering Geologist**

#### 1.0 **SUMMARY**

In summary, based on the findings of this environmental assessment, the likelihood of hazardous waste or petroleum product contamination existing on, or migrating onto the subject sites is considered low.

Please understand that changes in the conditions of a property and surrounding areas can occur with the passage of time, whether they be due to natural processes or the works of man on this or adjacent properties. Accordingly, our findings relative to the observable conditions of the sites are valid as of the date of our site visit, and historical research information is valid as of the dates specified.

#### 2.0 INTRODUCTION

This report presents the findings of our Phase I Environmental Site Assessment conducted in accordance with our proposal and your written authorization. This report has been prepared in general conformance with applicable guidelines provided by various professional societies and institutions.

Our field reconnaissance of the site was performed on Thursday June 13, 2018. The field reconnaissance involved traversing the property in order to observe surface soil conditions, structures, possible generators or storage of hazardous materials, drainage courses, land use, vegetation, and any notable surface conditions which would indicate the presence of hazardous waste or petroleum product contamination on or near the site.

#### 2.1 Purpose

The purpose of this investigation was to identify, to the extent feasible and pursuant to the processes presented herein, the presence or likely presence of hazardous substances or petroleum products on the property under conditions that indicate an existing release, a past release, or a material threat of a release of hazardous substances or petroleum products into structures on the properties or into the ground, groundwater, or surface water in connection with the properties.

#### 2.2 Detailed Scope-of Services

The scope of work completed for this investigation included a field reconnaissance of the site and surrounding areas, historical record and document review, historic aerial photo review, and submittal of this report.

# 2.3 Significant Assumptions

This Phase I Environmental Site Assessment was performed using the degree of care and skill ordinarily exercised under similar circumstances by environmental professionals practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report.

In addition, changes in the conditions of a property can occur with the passage of time, whether they are due to natural processes or the works of man on this or adjacent properties. Changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside our control. No soil/water sampling or testing was provided for this assessment.

#### 2.4 Limitations and Exceptions

In preparing this report, we were provided information derived from secondary sources. We have made no independent investigation as to the accuracy or completeness of the information derived from these sources. We have assumed the information provided to us by our sources was accurate and complete.

#### 2.5 Special Terms and Conditions

No special terms or conditions were brought to our attention or discovered through the course of our investigation relating to the environmental condition of the property.

#### 2.6 User Reliance

The findings and analyses set forth in this report are strictly limited in time and scope to the date of the evaluation(s) and is the property and for the sole use of our Client. However; RGS may, upon written authorization and instruction from the Client, provide copies of this report, and then only in total, to whom ever instructed. Additionally, Client, without any permission from RGS may assign this report to person(s) or entity(s) of their choice and all of the same entitlements, restrictions, and limitations apply to the new entity(s) as if they were the original requestor of services.

#### 3.0 SITE DESCRIPTION

#### 3.1 Location and Legal Description

The site is located along the north side of Arrow Route, just east of Archibald Avenue in the City of Rancho Cucamonga, California. The site includes three contiguous properties with the following addresses and APN numbers:

9744 Arrow Route - APN 0208-291-06-0000 9760 Arrow Route - APN 0208-291-03-0000 9786 Arrow Route - APN 0208-291-02-0000

The geographical relationships of the site and surrounding vicinity are depicted on our Site Location Map, **Figure 1**.

#### 3.2 Site and Vicinity General Characteristics

The property located at 9744 Arrow Route is currently open and vacant. There are remnants of a previous single-family home on-site. The properties of 9760 and 9786 Arrow Route currently support occupied single-family home developments with appurtenant landscaping and yard improvements.

Vegetation consists of a few mature landscape trees and landscape bushes and grass locally. Seasonal weeds and grasses occupy the open areas of the site.

Topographically the site is relatively flat with a uniform gradient sloping to the south at less than two percent. Site drainage is generally directed as sheet flow toward the south where it is collected along Arrow Route which exists as an improved road with concrete curb, gutter, and pavement.

# 3.3 <u>Current Use of the property</u>

Selected site photographs showing the physical condition of the property and manmade improvements are provided in **Appendix B** of this report for your review. The following is a brief description of the on-site features.

Man-made features on the site include two single family residences with associated improvements such as driveways and landscaping.

Overhead electrical lines serve the property and we assume underground utilities include sewer, water and gas. Other utilities may also be present. A pole mounted transformer was noted along the southern property line at 9760 Arrow Route. The transformer does not appear to be in a compromised condition, showing no visible leaks or damages.

#### **Asbestos**

The structures present on-site were likely constructed prior to the 1980's and could contain asbestos containing materials (ACM). Prior to the deconstruction or remodeling, an asbestos and lead paint survey should be conducted by a professionally licensed consultant to determine the potential impacts from these substances, if any.

# 3.4 <u>Descriptions of Structures, Roads, Other Improvements on the site</u> (including heating/cooling system, sewage disposal, source of potable water)

No structures are present at 9744 Arrow Route. A residential structure is present at 9760 Arrow Route, and 9786 Arrow Route. Out buildings/sheds are also noted at 9786 Arrow Route. The residential structures and out buildings were not surveyed as part of this assessment and are reportedly limited to typical residential use and storage. No interior inspection was conducted or considered necessary as the homes are reportedly leased and used only for residential purpose. The homes are accessed along driveways extending from Arrow Route. On-site sewage disposal was likely used in the past. Septic tanks may be present on the properties.

#### 3.5 Current Uses of the Adjoining Properties

Based on our historical research, data review, and aerial photograph examination, the property is bordered to the north by a school, to the east by a residence, to the west by an abandoned gas station, and to the south by Arrow Route (4 lanes) and a retail shopping center.

#### 4.0 USER PROVIDED INFORMATION

#### 4.1 <u>Title Records</u>

No title records were provided for our review.

#### 4.2 Environmental Liens of Activity and Use Limitations

No environmental liens or use limitation were provided by the client or known to exist in association with the property.

#### 4.3 Specialized Knowledge

We have not been provided with any specialized knowledge concerning the past land use or environmental condition of the property.

#### 4.4 Commonly Known or Reasonably Ascertainable Information

Information has been obtained for the purpose of this Phase I environmental assessment from EDR resource group and together with our field inspection and document review represents commonly known or reasonably ascertainable information.

#### 4.5 Valuation Reduction for Environmental Issues

No reduction in the value of the property related to environmental impacts, issues, or concerns has been reported.

#### 4.6 Owner, Property Manager, and Occupant Information

The property is currently owned by:

- 9744 Arrow Route - Dejager Family Trust

- 9760 Arrow Route - Mathews, Cleotis and Jancy

- 9786 Arrow Route - Graber, Janice

# 4.7 Reason for Performing Phase I

It is our understanding that the client intends to develop the site as a carwash. This phase I assessment was performed as part of the due diligence associated with the development.

#### 4.8 Other

No other information of significance was provided by our client for the purpose of our assessment.

#### 5.0 RECORD REVIEW

Records were obtained and reviewed that would help identify recognized environmental conditions in connection with the property. Reasonably ascertainable information, which was publicly available, obtainable from its source within reasonable time and cost constraints, and that was practically reviewable, was utilized.

#### 5.1 Standard Environmental Record Sources

For this ESA, Environmental Data Resources, Inc. (EDR) provided a complete search of standard environmental records in accordance with the requirements of ASTM E 1527-05, Section 8.2.1. A complete list of the records searched and a copy of The EDR report is presented in Appendix 16.6.

Information obtained by the review of standard records indicated the following:

 No facilities are noted in a condition, location, or elevation that could impact the subject property.

#### 5.2 Additional Environmental Record Sources

Additionally, EDR and the client/user provided records for our review from the following local agencies.

- San Bernardino County Department of Environmental Health Services,
   Waste Management Department
- San Bernardino County Land Use Services Department
- California Regional Water Quality Control Board, Lahontan Region
- California Department of Toxic Substance Control
- California Department of Conservation, Office of Mine Reclamation
- Mojave Desert Air Quality Management District
- U.S. Environmental Protection Agency, Region 9

Copies of the records requests and agency responses are contained in Appendix 16.6. The remaining agencies did not report relative information within their files.

# 5.3 Physical Setting Source(s)

The physical setting of the property was determined by review of the USGS 7.5 Minute topographic map, Guasti Quadrangle and information provided by EDR. A complete list of referenced used to findings is provided in Section 13.0, References.

Topographically the site is relatively flat with a uniform gradient of less than two percent sloping toward the south. Site drainage is generally directed as sheet flow toward the south where it is collected along Arrow Route.

The subject site is situated within a natural geomorphic province in southern California known as the Peninsular Ranges which are one of California's eleven geomorphic provinces, each of which display distinct geologic and topographic features. The Peninsular Ranges are bordered to the east by the Salton Trough and to the north by the Transverse Ranges (San Bernardino, San Gabriel, and Santa Monica Mountains). The Peninsular Range province extends southerly to the Baja peninsula and westerly to the Pacific Ocean. Elongated northwesterlytrending valleys and mountains structurally controlled by regional tectonic forces with elevated erosional surfaces generally characterize this province. The eastern portion of the province has been extensively uplifted by faulting and represents the highest and most rugged terrain including Mount San Jacinto at well over 10,000 feet elevation. From the east, the province gradually descends to the west toward the Pacific Ocean. The Peninsular Ranges are traversed by numerous northwest trending faults creating and subdividing the province into many sub-parallel, northwest trending ranges and valleys. The northwesterly trending mountains and valleys are flanked by regional faults, which remain active today, including the San Andreas, San Jacinto, and Elsinore Fault zones.

Locally, the site is situated on a broad alluvial fan emanating from the San Gabriel Mountains to the north. These deposits consist of braised stream channel deposits of silt, sand, and gravel, and rocks. The largest sediments remain near the foothills while the finer material is distributed across the valley floor.

#### 5.4 <u>Historical Use Information on the Property</u>

The properties were developed as rural residential homes during the 1950's based on review of historic aerial photographs. The residences remain on the eastern two parcels. The home on the western parcel was demolished around 1985. Prior to the residential development, the property was used for agricultural purpose and appears to have young citrus trees planted during 1938. No records are available beyond that year.

# 5.5 <u>Historical Use Information on Adjoining Properties</u>

Uses in the area surrounding the property were assessed to the extent information were revealed in the course of researching the property itself. This included aerial photographs, fire insurance maps, city directories and historical topographic maps.

The adjacent properties have similarly been open and vacant land in the past. Agriculture was conducted just west of the site from at least 1938. During the 1950's residential improvements were constructed on the adjoining properties and by 1959 no agricultural use is noted on the surrounding properties.

The gas station to the west appears in 1985 and the school to the north between 1994 and 2006.

# **Groundwater Conditions**

The specific depth of groundwater occurrence at the site could not be determined through the scope of our work and likely fluctuates seasonally. In general, groundwater occurs within the alluvial sediment and is recharged seasonally from mountain streams to the north. The static water table below the site is likely on the order of more than 300 feet below the ground surface considering the regional topography, physical properties of the sediment, and distance to mountain streams. The direction of groundwater flow is south, concurrent with the natural topography.

#### 6.0 SITE RECONNAISSANCE

#### 6.1 <u>Methodology and Limiting Conditions</u>

The field reconnaissance was performed on Wednesday, June 13, 2018 to obtain information indicating the likelihood of identifying recognized environmental

conditions in connection with the property. The property was visually and physically observed from all adjacent public thoroughfares and by traversing it in order to observe the existence of or potential indications of the present and past uses, treatment, storage, disposal or generation of hazardous substances and petroleum products, above and underground storage tanks, odors, pools of liquid, drums and other containers, potentially PCB-containing electrical and hydraulic equipment, fuel sources, stains and corrosion of structures and equipment, drains and sumps, pits, ponds, lagoons, stained soil and pavement, stressed vegetation, solid waste, trash, construction and demolition debris, mounds and depressions suggesting disposal, waste water or other liquid or any discharge into a drains, ditches, underground injection systems, or streams, wells, and septic systems and any other notable conditions which would indicate a recognized environmental condition in connection with the property.

The western portion of the site exists as open, vacant land. The eastern portions are currently occupied by homes and were not accessible. Considering the size of the property, our methodology for site reconnaissance included review of government database lists, examination of aerial photographs, followed by site inspection of potential environmental conditions identified.

The interior of the residence was not observed nor is inspection of the residence considered necessary as it is reportedly used solely for residential purposes. There were no other physical limitations or inaccessible site areas noted during our site visit.

# 6.2 General Site Setting

The site is located along Arrow Route which exists as an improved, four-lane road. The property supports single-family residential development with no commercial or industrial operations.

Topographically the site area is rather flat with a uniform gradient to the south. Site drainage is generally directed as sheet flow toward the south and is collected along storm water improvements associated with Arrow Route. Photographs of the site are presented in Appendix B.

# 6.3 <u>Exterior Observations</u>

Observations	Identification	Comments
Indications of the present and past uses,	No	
treatment, storage, disposal or generation of		
hazardous substances and petroleum products		
Aboveground storage tanks	No	
Underground storage tanks	No	
Odors	No	
Pools of liquid	No	
Drums and other containers	No	
PCB-containing equipment	Yes	Pole mounted transformer
Fuel sources	No	
Stains	No	
Corrosion of structures and equipment,	No	
Drains and sumps	No	
Pits	No	
Ponds	No	
Lagoons	No	
Stained soil and pavement	No	
Stressed vegetation	No	
Solid waste, trash, construction and demolition	Yes	Various domestic trashes.
debris		
Mounds and depressions	No	
Waste water, liquid or discharges	No	
Underground injection systems	No	
Streams	No	
Wells	No	
Septic systems	No	
Other	No	

#### 6.4 <u>Interior Observations</u>

The on-site homes are reportedly used for residential occupancy only. Accordingly no observation of the home interior is considered necessary or was conducted as part of this phase I.

#### 7.0 INTERVIEWS

# 7.1 <u>Interview with Owner</u>

Considering the open, vacant, and residential land use dating back to the 1950's, interviews with the site manager and owner were not considered necessary. Information regarding the environmental conditions of the property and mandatory State disclosures will be provided by the owner as pertinent.

The owner provided no information relative to recognized environmental conditions associated with the property. The owner is not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property; and any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

No other recognized environmental conditions were indicated by the owner.

## 7.2 <u>Interview with Site Manager</u>

No site manager is associated with the property.

# 7.3 <u>Interview with Occupants</u>

The owners representative (Alan Smith) was contacted via telephone and reported no environmental impact to the site. The property has been used for residential purposes since the 1950's according to records search and phone discussion with the tenant.

#### 7.4 Interview with Local Government Officials

Interviews were attempted with state and local government officials to obtain information that may indicate recognized environmental conditions in connection with the Property. A reasonable attempt was made to interview staff of the following agencies:

- The local fire department (Corona Fire Department)
- Riverside County Department of Environmental Health
- Riverside County Department of Land Use Services
- Riverside County Solid Waste Management
- California Regional Water Quality Control Board
- City of Corona building permits.

No pertinent information relating to the environmental condition of the property was obtained from these agencies.

#### 7.5 Interview with Others

No other pertinent information relating to the environmental condition of the property was ascertained from interviews or discussions with others.

#### 8.0 FINDINGS

The following recognized environmental conditions were identified:

 Asbestos containing materials and/or lead paint may be present within the structure based on the age of construction. This condition should be evaluated by a qualified professional prior to demolition.

The following historical environmental conditions were identified:

 No historical recognized environmental conditions were identified in addition to the aforementioned issues.

The following de minimis conditions were identified, but are not considered recognized environmental conditions for reasons explained below:

Localized domestic trash on-site.

#### 9.0 OPINION

In summary, based on the findings of this environmental assessment, the likelihood of petroleum product contamination existing on, or migrating onto the subject site is considered low.

Localized domestic trash and organic debris does not constitute a significant environmental impact to the site. The potential for asbestos containing materials and lead paint should be evaluated prior to demolition of the existing residence.

Please understand that changes in the conditions of a property and surrounding areas can occur with the passage of time, whether they be due to natural processes or the works of man on this or adjacent properties. Accordingly, our findings relative to the observable site conditions are valid as of the date of our site visit, and historical research information is valid as of the dates specified.

No significant data gaps that affected our ability to recognize environmental conditions were encountered.

#### 10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 for the Property. Any exceptions to, or deletions from this practice are described in Section 11.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property with the possible exception of asbestos containing materials and lead paint to be evaluated by others.

No additional recognized environmental conditions were noted through the scope of this study and no further action, other than described above, is considered necessary at this time.

#### 11.0 DEVIATIONS

No deletions, deviations, or other limitations to the standard of practice were imposed as part of our assessment.

## 12.0 ADDITIONAL SERVICES

No additional services are recommended at this time with the exception of asbestos and lead paint evaluation to be conducted prior to demolition of the building.

# 15.0 QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The resumes of professionals involved in the collection, analysis, and reporting of environmental data for this report are provided in Appendix 16.9 for review.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EXXONMOBIL OIL CORPO	8477 ARCHIBALD AVE	W 0 - 1/8 (0.016 mi.)	B3	8

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

INSPIRON CORP	8600 ARCHIBALD AVE	SSW 1/8 - 1/4 (0.173 mi.)	16	23

## State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

## State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

#### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Facility Id: 86009049				

#### State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 01/30/2018 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/30/2018 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

## Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# **GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING**

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

# Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/26/2017 Date Made Active in Reports: 02/09/2018

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

#### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

### State- and tribal - equivalent CERCLIS

**ENVIROSTOR:** EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 01/19/2018 Date Data Arrived at EDR: 01/19/2018 Date Made Active in Reports: 02/09/2018

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

**DEED: Deed Restriction Listing** 

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

#### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

### **EDR HIGH RISK HISTORICAL RECORDS**

### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

### **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Elevation: 1156 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map: 5620426 GUASTI, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

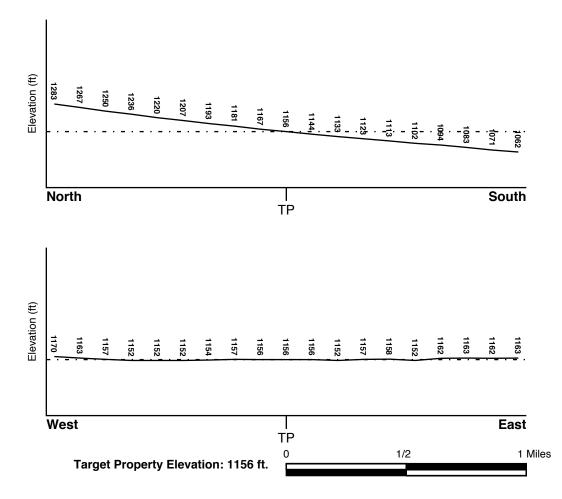

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

GUASTI YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HANFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Bou	ındary		Classification		Classification	Saturated	
Layer	Upper	Lower	Soil Texture Class		Unified Soil	hydraulic conductivity micro m/sec	Soil Reaction (pH)	
1	0 inches	11 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1	
2	11 inches	59 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6	

### Soil Map ID: 2

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

			Soil Layer	r Information

	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

LOCATION

## **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### **HYDROLOGIC INFORMATION**

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish & Game

Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

#### OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

## CHRISTOPHER M. KRALL P.G, C.E.G., REA

**POSITION**: Principal Engineering Geologist

**EDUCATION**: B.S., Geology, University of Redlands, Redlands, California, 1985 Special Studies in Environmental Waste Management, University of California, Riverside Extension Program, Cal-OSHA Safety Training Program for Hazardous Waste Workers, Trench Excavation Safety

**EXPERIENCE**: Mr. Krall has performed numerous preliminary geotechnical investigations throughout southern California. He has conducted fault investigations along the San Andreas, San Jacinto, Elsinore-Whittier, Willard, Wildomar, Murrieta Hot Springs, Cucamonga, Casa Loma and Park Hills fault zones. Mr. Krall is experienced in percolation testing, geologic field mapping, subsurface explorations, aerial photo interpretations, seismic refraction surveys, laboratory testing and report preparations. In various localities, these studies have involved evaluation of slope stability, landslides, fault zones, seismicity, liquefaction, ground water conditions, grading requirements and other geologic conditions. Mr. Krall has served as the Project Manager for Assessment District 159 and 161 improvements in the Temecula area of Riverside County, California.

Mr. Krall has gained extensive practical experience on transportation related projects through his participation in a variety of highway and road improvement projects on major San Bernardino and Riverside County Highways. He has been involved in geotechnical investigations on five major highway projects in San Bernardino and Riverside Counties including: Highway 74/Ortega Highway; Highway 178/San Bernardino County; Interstate 10/San Bernardino County; Route 91/Riverside County; and Highway 60/Riverside County. Mr. Krall is knowledgeable and experienced in working with highway operating right-of-ways, encroachment permits and lane closure procedures, in accordance with Caltrans standards. Additionally, Mr. Krall has been involved in the preparation of Materials reports following Caltrans Test 130 procedures.
