Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: ARTERIAL ROADS REHABILITATION AND BICYCLE LA	NE IMPROVEMENTS PROJECT (WPR014)
Lead Agency: City of Elk Grove	
Contact Name: Kristin Parsons	
Email: kparsons@elkgrovecity.org	Phone Number: 916.478.2236
Project Location: Elk Grove, Sacramento County	
City	County
Project Description (Proposed actions, location, and/or consequences).	
Rehabilitate and improve pavement and/or surface treatments (as deemed Waterman Road and Elk Grove Florin Road, as described in the Initial Stanoulders to accommodate Class 2 bike lanes with the goal of providing the City. The purpose of the Project is to reconstruct and rehabilitate Warprovide bike lanes in each direction on each roadway.	cudy, and as needed will widen roadway continuous bike routes in the eastern portion of

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential impacts as a result of the proposed Project include impacts to aesthetics, air quality, biological resources, cultural resources, geology and soils, hazards and hazardous materials, hydrology and water quality, and tribal cultural resources. Avoidance, minimization, and mitigation measures would be implemented to reduce any potential impacts to less than significant. No unavoidable and significant impacts would occur as a result of the proposed Project. The impacts of the Project are mitigated to a less-than-significant level, mostly limited to the construction phase and following Basic Construction Emissions Control Practices are considered feasible for controlling fugitive dust from a construction site. Limiting the project to be constructed during the driest times of the year, following best management practices, and implementing a SWPPP will avoid impacts to water quality. Preconstruction nesting bird surveys and western spadefoot surveys will be completed to ensure no project impacts to these species will occur. Loss of Swainson's Hawk foraging habitat will be mitigated by follow the City's Swainsons Hawk Mitigation Fee program. An Aerially Deposited Lead study will be completed prior to construction to determine presence and appropriate soil management practices. A traffic control plan will be implemented to avoid traffic congestion and ensure emergency vehicle access.

If applicable, describe any of the proje agencies and the public.	ect's areas of contro	oversy known to the	Lead Agency, in	cluding issues raised b
No controversies have been noted.				
Provide a list of the responsible or truste	ee agencies for the p	oroject.
