Project Description: (please use a separate page if necessary)

Replace the existing Kilburn Road Bridge with a new three-span bridge that would be approximately 95 feet long and 34.8 feet wide, accommodating an 11-foot lane and 2-foot shoulder in each direction. Construction of the new bridge will involve building piers within the creek channel located approximately 28.5 feet from the abutments and approximately 38 feet apart. With the bridge replacement, Kilburn Road would horizontally be similar to existing while the vertical profile would be revised in order the bridge to clear the 50-year flood water elevation. Realignment of the roadway profile would require a reconfiguration of the private driveways on both sides of the bridge.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
