Project Description (Proposed actions, location, and/or consequences).	
The California Department of Transportation (Caltrans) proposes to stabi on both sides of State Route 26 at 8 locations in Calaveras County from a Amador County line (post mile 21.4 to 38.31). The project would also upg	about 5.4 miles west of Ridge Road to the

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project would have no significant adverse effect on animal species, plant species, threatened and endangered species, and U.S. waters and wetlands because the following mitigation measures would reduce potential effects to a level of insignificance:

- Various avoidance and minimization measures such as surveys, erosion control measures, and preconstruction training would be implemented for threatened and endangered species.
- Oak woodland would be replanted or compensated for at an off-site location.
- Compensatory mitigation for wetland impacts would be a minimum 1 to 1 ratio.
