STATE CLEARINGHOUSE

Reason why project is exempt:

PCRCDD is proposing the qualification of exemption from a comprehensive CEQA analysis under the Class 4 category as follows: (i) Fuel management activities within 30 feet of structures to reduce the volume of flammable vegetation, provided that the activities will not result in the taking of endangered, rare, or threatened plant or animal species or significant erosion and sedimentation of surface waters. This exemption shall apply to fuel management activities within 100 feet of a structure if the public agency having fire protection responsibility for the area has determined that 100 feet of fuel clearance is required due to extra hazardous fire conditions. Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 21084, Public Resources Code. Discussion: This section describes the class of projects involving minor alterations to the land. The 1998 revision to the section specified that this exemption applies to fuel management activities which will not impact threatened or endangered species or result in significant erosion or sedimentation.

The proposed project will not result in the taking of any endangered, rare, or threatened species. A professional archaeologist was employed to conduct an archaeological survey of the proposed project area, and the proposed project will not result in impacts to cultural resources.
