PHASE I ENVIRONMENTAL SITE ASSESSMENT ASSESSOR'S PARCEL NUMBER 381-050-69-00 South County Animal Shelter, Santee San Diego County, California

## **PREPARED FOR:**

County of San Diego Department of General Services 5560 overland Avenue, Suite 410 San Diego, California 92123 And

MS. MORGAN WEINTRAUB RECON ENVIRONMENTAL, INC. 1927 FIFTH AVENUE SAN DIEGO, CALIFORNIA 92101

> **PREPARED BY:** The Bodhi Group Inc.

APRIL 2020 PROJECT NO. 9140001

April 7, 2020 Project No. 9140001

Ms. Morgan Weintraub Environmental Analyst RECON Environmental, Inc. 1927 Fifth Avenue San Diego, California 92101

Subject: Phase I Environmental Site Assessment APN 381-050-69-00 South County Animal Shelter, Santee San Diego County, California

Dear Ms.Weintraub,

Please find attached Phase I Environmental Site Assessment (ESA) for the property located within San Diego County Tax Assessor's Parcel Number 381-50-69-00 in the city of Santee within San Diego County, California.

Sincerely,

THE BODHI GROUP, INC.

Freelwound

Sree Gopinath, P.E. Principal Engineer

Distribution: (1) Addressee

1076 Broadway, Suite B • El Cajon • California • 92021 • Phone (858) 513-1469 • Fax (858) 513-1609

## EXECUTIVE SUMMARY

The Site consists of a 154-acre portion of a larger parcel assigned San Diego County Tax Assessor's Parcel Number (APN) 381-050-69-00 and is located north of Riverview Parkway and west of North Magnolia Avenue in the city of Santee within San Diego County (Figure 1). The Site is currently owned by the County of San Diego and currently consists of undeveloped land and is not associated with a street address. It is our understanding the Site is the proposed location for development of the South County Animal Shelter.

A computerized, environmental database search was performed by Environmental Data Resources, Inc (EDR) on March 16, 2020. The Site was not listed in the ASTM International (ASTM) standard environmental databases searched; however, several facilities were listed in the vicinity of the Site including adjacent properties to the south (9065 Edgemoor Drive and 451 Riverview Parkway) and to the north (9631 North Magnolia Avenue).

The property located at 9065 Edgemoor Drive was listed under former occupant, Edgemoor Geriatric Hospital, on multiple databases including leaking underground storage tank (LUST), San Diego County Site and Mitigation (SAM), and Historical UST databases. The LUST cases were also listed on State Water Resources Control Board (SWRCB) GeoTracker (Geotracker) database (H14318-001 and -002). According to the Closure Reports on GeoTracker, three diesel USTs were removed from this property in 1998 and associated releases affected soil only.

The property located at 451 Riverview parkway was listed under the name Las Colinas Detention Facility and was listed on the Environmental Data Resources Inc (EDR) Database report for active hazardous waste permits for pharmaceutical, sharps, and red bag waste. Violations on file were minor and related to bookkeeping. Two additional closed Voluntary Assistance Program (VAP) cases (DEH2014-LSAM-00257 and H39793-001) were listed on GeoTracker for the detention center property. Both cases are related to pesticide impacts to shallow soil from historical agricultural use at the property. According to the Closure Reports, residual pesticide concentrations do not pose a threat to human health for property occupants.

The facility associated with the address 9631 Magnolia Avenue was listed under the name RCP Block and Brick and listed on the Spills, Leaks, Investigations, and Cleanup (SLIC) and California Environmental Reporting System (CERS) databases for a release of hydraulic oil from a former sump in 2016. A VAP case (DEH2016-LSAM-000402) was subsequently opened. Soil and groundwater sampling indicated the release impacted soil only and the case was closed in November 2016. A closed unauthorized release case (H08229-001) is also on file on GeoTracker for this facility. According to the Closure Report, dated August 2015, the case was opened in 1998 when a diesel release was discovered during fuel system upgrades at the property impacted soil and groundwater. The Closure Report also states that total petroleum hydrocarbons (TPH) in the gasoline range (TPD-G) and diesel range (TPH-D) impacted soil remains at the property; however, contamination in groundwater was not detected at the time of closure.

Based on the nature of permit violations (minor bookkeeping), medium affected (soil) and case statuses (closed) described in the EDR Database report and the GeoTracker database, the facilities described above do not present a concern to the Site at this time.

The Site was not listed on Geotracker; however, properties adjacent to the Site that were listed on the GeoTracker Database were also listed on the EDR Database report and are discussed above.

The Site or adjacent properties were not listed on the California Department of Toxic Substances Control (DTSC) Envirostor or CalRecycle Solid Waste Information System (SWIS) databases.

Records on file with the San Diego County Department of Environmental Health (DEH) for the Site APN included boring permits from 2014 and 2019.

A Preliminary Geotechnical Report for the Site, dated February 2020, was provided by RECON Environmental Inc. (RECON, Client). The report indicated that undocumented fill had been imported to the Site previously. The fill reportedly reached a maximum depth of 15 feet below ground surface (CTE, 2020). Based on review of the report and correspondence with the Client, the source of the fill soil is unknown. There is a potential for contamination in the undocumented fill soil at the Site. The undocumented fill soil is a Recognized Environmental Condition (REC) and soil sampling of the fill is recommended.

A review of historical aerial photographs indicates that the Site and adjacent properties were historically occupied by agricultural rows from as early as 1949 to sometime before 1979. Based on our experience on similar projects, the historical presence of agricultural land indicates potential residual pesticide contamination, which is a REC for the Site. Sampling for pesticides is recommended.

#### 1. INTRODUCTION

The Bodhi Group, Inc. (Bodhi Group) was retained by RECON Environmental, Inc. (RECON, Client) to perform a Phase I Environmental Site Assessment (ESA) for a 154-acre portion of a larger parcel assigned Assessor's Parcel Number (APN) 381-050-69-00 located north of Riverview Parkway and west of North Magnolia Avenue (Site, Figure 1) in the city of Santee within San Diego County. The Site is currently owned by the County of San Diego and currently consists of undeveloped land and is not associated with a street address. It is our understanding the Site is the proposed location for development of the South County Animal Shelter.

#### 1.1. Purpose

RECON has requested a Phase I ESA to identify Recognized Environmental Conditions (RECs) at the Site. In accordance with the ASTM International (ASTM) "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," Standard Practice E1527-13, the objective of the ESA is to document, to the extent feasible, RECs, which are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." De minimis conditions are not RECs as they do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

#### **1.2.** Scope of Services

The following services were provided for this assessment:

- Review of physical setting and background information for the Site (e.g., topographic, and geologic maps).
- Site reconnaissance to document potential hazardous materials handling, storage, and disposal practices, areas of possibly contaminated surficial soil or surface water, possible sources of polychlorinated biphenyls (PCBs), underground and aboveground storage tanks (USTs and ASTs, respectively), and other possible sources of contamination.
- Review of federal, state, tribal, and local regulatory agency databases for the Site and for properties located within a specified radius of the Site. The databases document locations of known hazardous waste sites, landfills, leaking underground storage tanks (LUSTs), permitted facilities that utilize USTs, and permitted facilities that use, store, or dispose of hazardous materials and wastes.
- Review of reasonably ascertainable local regulatory agency files for the Site, as applicable.
- Review of historical information for the Site, such as Sanborn fire insurance maps, historical aerial photographs, reverse street directories, and building permit records, as available and reasonably ascertainable.
- Review of Client-provided information regarding the environmental status of the Site, as applicable.
- A search for engineering or institutional controls associated with the Site.
- A search of historical RECs for unrestricted residential use standards.

- The potential for vapor intrusion (VI) of gas phase volatile organic compounds (VOCs) into structures, as applicable.
- Preparation of this Phase I ESA report, summarizing findings and providing opinions, conclusions, and recommendations regarding RECs at the Site.

## **1.3.** Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM guidelines for the performance of such assessment and does not constitute an exhaustive assessment of the Site. No other warranties either expressed or implied, are made. The evaluations, analyses, and opinions contained herein should not be taken as representations regarding subsurface conditions or the actual value of the Site. Subsurface conditions may differ from the conditions implied by the surficial observations and can only be reliably evaluated through comprehensive Site investigation, including the collection and analyses of subsurface media samples.

Documentation and data provided by the client, other interested third parties, or from the public domain, and referred to in the preparation of this assessment, are assumed to be complete and correct and have been used and referenced with the understanding that the Bodhi Group assumes no responsibility or liability for their accuracy. The conclusions contained herein are based upon such information and documentation and on our observations of Site conditions, as they existed on the date of the Site inspection. Because Site conditions may change significantly over a short period of time and additional data may become available, data reported, and conclusions drawn in this report are limited to current conditions and may not be relied upon on a significantly later date or if changes occurred at the Site.

#### **1.4.** Limitations and Exceptions

Reasonable efforts have been made during this assessment to uncover evidence of features of potential environmental concern at the Site. "Reasonable efforts" are limited to information gained from visual observation of unobstructed areas, recorded database information held in public record, and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to paving, construction or debris pile storage, or incorrect/incomplete information from sources.

This assessment was not an environmental compliance audit. While some observations and discussion in this report may address conditions and/or operations that may be regulated, the regulatory compliance of those conditions and/or operations is outside the scope of this investigation. Nothing in this report constitutes a legal opinion or legal advice. For information regarding specific individual or organizational liability, the Bodhi Group recommends consultation with independent legal counsel.

This ESA does not address non-scope ASTM considerations including, but not limited to: asbestos containing materials, radon, lead in drinking water, wetlands, protected environments and habitat, threatened or endangered species, industrial hygiene concerns, human health risk assessment, indoor air quality, high voltage power lines, geotechnical conditions, cultural and historical resources, health and safety, and mold.

## **1.5.** Special Terms and Conditions

No special terms and conditions between the Bodhi Group and the client pertinent to the findings of this ESA or methodology used to complete this assessment are noted. The Bodhi Group does not have a financial interest in the Site.

## 1.6. User Reliance

This report was prepared for use solely and exclusively by the County of San Diego and RECON. The report is not for the use or benefit of, nor may it be relied upon by, any other person or entity for any purpose without the advance written consent of the Bodhi Group. The Bodhi Group makes no representation to any third party except that it has used the degree of care and skill ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other use or disclosure is intended or authorized by the Bodhi Group. In the preparation of this ESA, the Bodhi Group has used the degree of care and skill ordinarily exercised by a reasonably prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other use of disclosure is intended or authorized by the Bodhi Group. In the preparation of this ESA, the Bodhi Group has used the degree of care and skill ordinarily exercised by a reasonably prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other warranties are made to any third party, either expressed or implied.

## 2. SITE DESCRIPTION

## 2.1. Location and Description

The Site is located northeast of the intersection of Riverview Parkway and North Magnolia Avenue in the city of Santee within San Diego County. The Site is comprised of San Diego County-owned vacant land and is not associated with a street address.

#### 2.2. Current Use of The Site

On April 1, 2020, a representative of the Bodhi Group performed a visual inspection of the Site and adjoining properties. As previously noted, the Site was vacant and undeveloped. The majority of the Site was covered with trees and low vegetation. The Site was secured with a chain link fence with some breaks/damage to the fencing and appeared accessible to foot traffic. Site photographs are included in Appendix A.

## 2.3. Current Uses of Adjoining Properties

Adjacent properties and their current uses are described in the following table and are labeled on Figure 2. Photographs of the Site and adjacent properties are included in Appendix A.

Direction	Adjoining Property Use
North	Chubb Lane, followed by the San Diego Riverbed and vacant land
East	N Magnolia Avenue, followed by New Frontier Mobile Home Park (9255 N
Last	Magnolia Avenue)
South	The Santee Historical Society and Historic Barn (9200 N Magnolia Avenue) and
South	Las Colinas Detention and Reentry Facility (451 Riverview Parkway)
West	Vacant land

#### Table 1 – Current Uses of Adjoining Properties

#### 2.4. User-Provided Information

The following sections summarize information obtained from RECON.

## 2.4.1. Title Records

Title records were not reviewed for this assessment. Based on information provided by RECON and verified through County of San Diego Tax Assessor, the Site is assigned APN 381-050-69-00 and is owned by the County of San Diego.

#### 2.4.2. Environmental Liens or Activity and Use Limitations

Environmental lien and activity and use limitations (AUL) databases were researched as part of the Environmental Data Resources Inc. (EDR) Radius Report discussed in Section 4.1. No environmental liens or AULs were found for the Site.

#### 2.4.3. Specialized Knowledge

The Client provided a Preliminary Geotechnical Report for the Site, dated February 2020, which indicated that undocumented fill had been imported to the Site to support a large building pad for previously proposed development that was not completed. The fill reportedly reached a maximum depth of 15 feet below ground surface (bgs) (CTE, 2020). Based on review of the report and correspondence with the Client, the source of the fill is unknown. RECON stated they were aware of possible historical agricultural use at the Site.

#### 2.4.4. Commonly Known or Reasonably Ascertainable Information

The Bodhi Group was not made aware of additional commonly known or reasonably ascertainable information that would help the environmental professional to identify conditions indicative of releases or threatened releases of hazardous wastes or materials at the Site.

## 2.4.5. Valuation Reduction for Environmental Issues

Monetary valuation was not performed for this assessment.

## 2.4.6. Owner, Property Manager, And Occupant Information

The Site is currently unoccupied and owned by the County of San Diego.

## 2.4.7. Reason for Performing Phase I ESA

The Bodhi Group has been retained to conduct this Phase I ESA to identify RECs prior to development.

## 3. RECORDS REVIEW

The following sections summarize records reviewed for the Site.

## 3.1. Standard Environmental Record Sources

The Bodhi Group obtained and reviewed an environmental database search conducted by EDR, dated March 2020 (EDR, 2020a). The environmental databases searched ("standard environmental record sources") and their corresponding search radii were equal to or greater than the minimum search distances specified by ASTM E1527-13. Properties within specific search radii and identified on environmental databases are listed in Table 2. Further details and descriptions of the databases reviewed by EDR are provided in the environmental database report in Appendix B.

Database Name	Search Radius (Mile)	Number of Mapped Listings
FEDERAL DATABASES		
National Priority List (NPL)	1.0	0
Proposed NPL	1.0	0
NPL Liens	Site	0
Delisted NPL	1.0	0
SEMS (Superfund Enterprise Management System; formerly Comprehensive Environmental Response Compensation and Liability Information System)	0.5	0
SEMS-ARCHIVE (Superfund Enterprise Management System Archive)	0.5	1
FEDERAL FACILITY (Federal Facility Site Information listing)	0.5	0
RCRA Corrective Action Sites (CORRACTS)	1.0	0
RCRA Treatment Storage and Disposal Facilities (TSDF)	0.5	0
RCRA – Large Quantity Generator (LQG)	0.25	1
RCRA – Small Quantity Generator (SQG)	0.25	1
RCRA – Very Small Quantity Generators (VSQG)	0.25	0
Federal Engineering Controls	0.5	0
Federal Institutional Controls	0.5	0
Land Use Control Information System (LUCIS)	0.5	0
Federal Emergency Response Notification System (ERNS)	Site	0

#### Table 2 – Standard Environmental Databases

Database Name	Search Radius (Mile)	Number of Mapped Listings
STATE/TRIBAL DATABASES		
State-and Tribal- equivalent NPL (Response)	1.0	0
State and Tribal Landfill and/or Solid Waste Disposal Sites/Recyclers	0.5	0
State and Tribal LUSTs	0.5	11
State Spills, Leaks, Investigation and Cleanup (SLIC)	0.5	3
San Diego County Site Assessment and Mitigation (SAM) Cases	0.5	6
Indian LUST	0.5	0
State and Tribal Registered UST	0.25	1
State and Tribal Registered ASTs	0.25	0
Drycleaners	0.25	0
Indian Voluntary Cleanup Sites (VCP)	0.5	0
State VCP	0.5	0
US Brownfields	0.5	0
Local Land Records – Liens	Site	0

#### 3.1.1. Subject Site

The Site was listed on the CIWQS database. According to the Database report, the Site was associated with one Stormwater Construction Permit under the name Liberty High. The permit was issued in 2008 and terminated in 2012.

## 3.1.2. Adjacent Properties Listed in The EDR Report

Off-Site properties/facilities listed in the Database report were evaluated as to their potential to impact soil and/or groundwater at the Site. To supplement the information in the EDR report, the State Water Resources Control Board (SWRCB) GeoTracker (GeoTracker) database was reviewed. Information from both sources is included in the facilities of potential concern summaries below. Select regulatory documentation is provided in Appendix C. The following properties were interpreted to represent a potential environmental concern to the Site, based on their proximity to the Site, the nature of the database on which listed, and/or the assumed direction of groundwater flow in the Site vicinity (southeast):

• Edgemoor Geriatric Hospital (9065 Edgemoor Drive) – The property was formerly occupied by a hospital and is located adjacent to the south. The hospital was listed on multiple databases including LUST, San Diego County Site and Mitigation (SAM), and Historical UST databases. The LUST

cases were also listed on GeoTracker (H14318-001 and -002). According to the Closure Reports on GeoTracker, three diesel USTs were removed from this property in 1998 and associated releases affected soil only. Groundwater was reported to flow to the southeast. Based on the medium affected (soil) and case status (closed), the former hospital does not present a concern to the Site at this time.

- Las Colinas Detention Facility (451 Riverview Parkway) The property is also adjacent to the south and, according to the database report, has active hazardous waste permits for pharmaceutical, sharps, and red bag waste. Violations on file were minor and related to bookkeeping. Two additional closed Voluntary Assistance Program (VAP) cases (DEH2014-LSAM-00257 and H39793-001) were listed on GeoTracker for the property and are associated with the address 9000 Cottonwood Avenue. Both cases are related to pesticide impacts to shallow soil from historical agricultural use at the property. According to the Closure reports, residual pesticide concentrations do not pose a threat to human health for property occupants. Based on the nature of the violations (minor bookkeeping) and the medium affected (soil), the facility does not present a concern to the Site at this time.
- RCP Block and Brick (9631 North Magnolia Avenue) The property is located adjacent to the north and was listed on the SLIC and California Environmental Reporting System (CERS) databases. According to the Database report, a release of hydraulic oil from a former sump was observed during excavation at the property in 2016. A VAP case (DEH2016-LSAM-000402) was subsequently opened. Soil and groundwater sampling indicated the release impacted soil only and the case was closed in November 2016. A closed unauthorized release case (H08229-001) is also on file on GeoTracker for this facility. According to the Closure Report, dated August 2015, the case was opened in 1998 when a diesel release was discovered during fuel system upgrades at the property impacted soil and groundwater. The Closure Report also states that total petroleum hydrocarbons (TPH) in the gasoline range (TPH-G) and the diesel range (TPH-D) impacted soil remains at the property; however, contamination in groundwater was not detected at the time of closure. Based on the case status (closed) and that impacts remain in soil only; the closed unauthorized release case does not present a concern to the Site at this time.

Additional properties in the Site vicinity were listed on various databases; however, based on the distance from the Site, the nature of the database, and/or the medium affected, these properties do not pose an environmental concern to the Site at this time.

## 3.1.3. Non-Geocoded (Unmapped) Listings

This portion of the regulatory database report includes properties for which regulatory agencies did not report sufficient address information to be plotted by EDR. One Unmapped listing was listed and based on the available address information is believed to be located approximately 1.5 miles southwest of the Site.

## 3.2. Regulatory Files Search

This section discusses findings from a review of State and Local regulatory agency files.

## 3.2.1. County of San Diego Department of Environmental Health

A request for records was sent to the Department of Environmental Health (DEH) for the Site APN on March 16th, 2020; however, as of the date of this report, a response has not been received. The DEH document library was also searched and three San Diego County Boring Permit Applications were on file. Two Permit applications were dated May 2014 and were related to boring advancement in the Right-of-Way in Chubb Lane and N Magnolia Avenue. And one Permit Application was dated December 2019 and appeared to be related to the Preliminary Geotechnical Study discussed in Section 2.4.3.

## 3.2.2. Regional Water Quality Control Board San Diego Region

The Regional Water Quality Control Board (RWQCB) searches records by property address. Because the Site is not associated with a street address, records were not requested from the RWQCB. A review of the SWRCB's GeoTracker website did not identify LUST, cleanup, land disposal, or other environmental concerns at the Site; however, multiple properties in the immediate vicinity were listed and are summarized in Section 3.1.2.

## 3.2.3. California Department of Toxic Substances Control

A review of the California Department of Toxic Substances Control (DTSC) Envirostor website did not identify Federal Superfund, State Response, Voluntary Cleanup, Evaluation, Corrective Action, Tiered Permit, or other types of sites regulated by DTSC at or near the Site.

## 3.2.4. California Department of Resources Recycling and Recovery

A review of California Department of Resources Recycling and Recovery (CalRecycle)'s Solid Waste Information System (SWIS) did not show any disposal sites mapped at or near the Site.

## **3.3.** Physical Setting Sources

The following sections include discussions of topographic, geologic, and hydrogeologic conditions in the vicinity of the Site, based upon the referenced document review and/or our visual reconnaissance of the Site.

## 3.3.1. Topography

Based on a review of United States Geological Survey (USGS), 7.5-minute topographic series, El Cajon, California quadrangle map, the Site is relatively flat with an elevation of approximately 350 feet above mean sea level (USGS, 2018).

## 3.3.2. Site Geology

Based on a review of the Preliminary Geologic Map of the El Cajon 30' x 60' Quadrangle, the Site is underlain by Quaternary Alluvium and Colluvium, undivided, which are described as younger and older alluvium and colluvium not mapped separately (Todd, 2004).

As part of the proposed redevelopment, a Preliminary Geotechnical Investigation was performed in December 2019 for the Site. Boring advancement during the study indicated that imported fill was observed throughout the Site at the surface to a maximum depth of 15 feet bgs. The fill was described as loose to medium dense, reddish brown silty to clayey fine to medium grained sand and clay with gravel (CTE, 2020).

## 3.3.3. Surface Waters

Surface water bodies are not located on the Site. The nearest surface water body is the San Diego River, located adjacent to the north of the Site (USGS, 2018; Figure 1).

## 3.3.4. Groundwater

The Site is located within the Santee Hydrologic Subarea (HSA) of the Lower San Diego Hydrologic Area, of the San Diego Hydrologic Unit. The beneficial uses of groundwater in the Santee HSA include municipal, industrial, agricultural, and processing supply (RWQCB, 2016).

## 3.4. Historical Use Information on The Site and Adjoining Properties

The following sections summarize the results of our review of historical records for the Site and adjoining properties.

## 3.4.1. Sanborn Fire Insurance Maps

Sanborn® fire insurance maps were requested from EDR; however, there is no map coverage for the Site and vicinity. EDR's Certified Sanborn Map Report is provided in Appendix B.

## 3.4.2. Historical Aerial Photographs

The Bodhi Group reviewed aerial photographs from 1949, 1953, 1964, 1966, 1970, 1979, 1985, 1989, 1994, 1996, 2005, 2009, 2012, 2016, 2017, and 2018 from EDR (EDR, 2020d) and Google Earth. The aerial photographs reviewed are included in Appendix B.

In the 1949 photograph, the majority of the Site is occupied by agricultural rows. Two small structures are located in the southern portion. Roads are located adjacent to the north and east in similar configurations to present-day Chubb Lane and N Magnolia Avenue, respectively. The San Diego River is adjacent to the north of the Site. The property adjacent to the west is vacant, to the east is occupied with agricultural rows. The property to the south is developed with multiple structures and equipment and is the former Edgemoor Stock Farm and later, the Edgemoor Geriatric Home (Santee Historical Society, 2020).

The 1953 through 1970 photographs are similar to the 1949 photograph with the exception of the two structures on the southern portion of the Site are no longer present.

In the 1979 photograph, the majority of the Site is vacant, agricultural rows are no longer visible, and a large structure is located in the northeast corner. The adjacent property to the east appears graded for development, and the adjacent properties to the north, south, and west are in similar configurations to the previous photographs.

In the 1985 through 2009 photographs, the Site remains undeveloped except for the northeast corner, which appears to have additional structures and a paved parking area visible in the 1989 photograph. The property adjacent to the east is developed with the present-day mobile home park. The property to the south remains developed with multiple structures associated with the Edgemoor Geriatric Hospital, and the properties adjacent to the north and west remain undeveloped.

In the 2012 photograph, the structures in the northeast are no longer present and the Edgemoor Geriatric Hospital buildings are no longer present to the south, except for one large barn. The adjacent properties to the north, east, and west are similar to the previous photograph.

In the 2016 through 2020 images, the Site and adjacent properties are in their present-day configurations including the Las Colinas Detention Facility adjacent to the south of the Site which appeared to undergo development beginning in 2012 and completed by 2016.

## 3.4.3. Historical Topographic Maps

The Bodhi Group reviewed historical topographic maps provided by EDR for the years 1983, 1901, 1993, 1939, 1942, 1947, 1948, 1955, 1967, 1975, 1996, and 2012 (EDR, 2020d). The topographic maps are consistent with the aerial photograph review. The topographic maps reviewed for this ESA are provided in Appendix B.

## **3.4.4.** Reverse City Directories

The Site is not associated with a street address; however, addresses along N Magnolia Avenue and Riverview Parkway were searched as part of the EDR City Directory Image Report. Multiple residences were listed for the adjacent property address 9255 N Magnolia Avenue for years between 1975 and 2014. 9200 N Magnolia was listed under the name San Diego County for the year 2010. Properties of environmental concern were not observed during a review of the City Directory Image Report.

## 3.4.5. Building Department Records

The Site is vacant and does not have an associated street address; therefore, building department records were not searched.

## 4. SITE RECONNAISSANCE

The objective of the Site reconnaissance was to obtain information indicating the likelihood of RECs in connection with the Site. Ms. Brianne Cortright of the Bodhi Group performed the Site reconnaissance on April 1, 2020. A Site plan is provided in Figure 2 and photographic documentation is provided in Appendix A.

#### 4.1. Methodology and Limiting Conditions

The Site reconnaissance consisted of walking on accessible portions of the Site and viewing adjacent properties. Physical limitations were not encountered with the exception of some portions of the Site were not accessible or visible due to thick vegetation.

#### 4.2. General Site Setting

As previously noted, the Site was vacant and undeveloped. The majority of the Site was covered with trees and low vegetation. The Site was secured with a chain link fence with some breaks/damage to the fencing and appeared accessible to foot traffic.

#### 4.3. Site Observations

No observations of potential environmental concerns were noted during the Site reconnaissance. Table 3 below provides a checklist of common Site observations relative to potential environmental concerns.

Conditions	Observed or Noted	Comments	Significant Concern?
Hazardous Substances/Petroleum Products		Not Observed	Ν
Waste Generation/Storage/Disposal		Not Observed	Ν
ASTs		Not observed	Ν
Potential Evidence of USTs		Not observed	Ν

Table 3 – On-Site Observations

Conditions	Observed or Noted	Comments	Significant Concern?
Potential PCB-Containing Equipment	Y	A transformer was observed along N Magnolia Avenue, east of the Site. The transformer appeared to be new and in good condition.	N
Chemical/Petroleum Odors		Not Observed	N
Concrete Patches/Pads		Not Observed	N
Pools of Liquid		Not Observed	N
Sewage Discharge Pipes		Not Observed	Ν
Floor Drains/Sumps		Not Observed	N
Hydraulic Elevator		Not Observed	Ν
Wells		Not Observed	Ν
Drums		Not Observed	Ν
Unidentified Substance Containers		Not Observed	Ν
Stained Soil or Pavement		Not Observed	Ν
Stressed Vegetation		Not Observed	Ν
Pits, Ponds, or Lagoons		Not Observed	Ν
Wastewater Discharge Disposal Systems		Not Observed	N
Septic Systems/Cesspools		Not Observed	N
Municipal Solid Waste Disposal Areas		Not Observed	Ν
Other Conditions		Not Observed	Ν

 Table 3 – On-Site Observations

## 5. FINDINGS

- The Site consists of a 154-acre portion of a larger parcel assigned APN 381-050-69-00 and is located north of Riverview Parkway and west of North Magnolia Avenue in the city of Santee within San Diego County. The Site is currently owned by the County of San Diego and consists of undeveloped land and is not associated with a street address. It is our understanding the Site is the proposed location for development of the South County Animal Shelter.
- A computerized, environmental database search was performed by EDR on March 16, 2020. The Site was not listed in the ASTM standard environmental databases searched; however, several facilities were listed in the vicinity of the Site, including adjacent properties to the south (9065 Edgemoor Drive and 451 Riverview Parkway) and to the north (9631 North Magnolia Avenue).

The property located at 9065 Edgemoor Drive was listed under former occupant, Edgemoor Geriatric Hospital, on multiple databases including; LUST, SAM, and Historical UST databases. The LUST cases were also listed on GeoTracker (H14318-001 and -002). According to the Closure Reports on GeoTracker, three diesel USTs were removed from this property in 1998 and associated releases affected soil only.

The property located at 451 Riverview parkway was listed under the name Las Colinas Detention Facility and was listed on the EDR Database report for active hazardous waste permits for pharmaceutical, sharps, and red bag waste. Violations on file were minor and related to bookkeeping. Two additional closed VAP cases (DEH2014-LSAM-00257 and H39793-001) were listed on GeoTracker for the property. Both cases are related to pesticide impacts to shallow soil from historical agricultural use at the property. According to the Closure Reports, residual pesticide concentrations do not pose a threat to human health for property occupants.

The facility associated with the address 9631 Magnolia Avenue was listed under the name RCP Block and Brick and was listed on the SLIC and CERS databases for a release of hydraulic oil from a former sump in 2016. A VAP case (DEH2016-LSAM-000402) was subsequently opened. Soil and groundwater sampling indicated the release impacted soil only and the case was closed in November 2016. A closed unauthorized release case (H08229-001) is also on file on GeoTracker for this facility. According to the Closure Report, dated August 2015, the case was opened in 1998 when a diesel release was discovered during fuel system upgrades that impacted soil and groundwater. The Closure Report also states that TPD-G and TPH-D impacted soil remains at the property; however, contamination in groundwater was not detected at the time of closure.

Based on the nature of permit violations (minor bookkeeping), medium affected (soil) and case statuses (closed) described in the EDR Database report and the GeoTracker database, the facilities described above do not present a concern to the Site at this time.

- The Site was not listed on the GeoTracker database. Properties adjacent to the Site that were listed on the GeoTracker database were also listed on the EDR Database report and are discussed above.
- Records on file with the DEH for the Site APN included boring permits from 2014 and 2019.
- A Preliminary Geotechnical Report for the Site, dated February 2020, was provided by RECON. The report indicated that undocumented fill had been imported to the Site previously. The fill reportedly reached a maximum depth of 15 feet bgs (CTE, 2020). Based on review of the report and correspondence with the Client, the source of the fill soil is unknown.
- A review of historical aerial photographs indicates that the Site and adjacent properties were historically occupied by agricultural rows from as early as 1949 to sometime before 1979.

#### 6. CONCLUSIONS AND RECOMMENDATIONS

It is our opinion the presence of undocumented fill soil at the Site from an unknown source is considered a REC based on the potential for contamination in the fill.

It is our opinion the historical presence of agricultural crops at the Site is also considered a REC based on the potential for residual pesticides to be present in soil.

To address the REC for undocumented fill, the Bodhi Group recommends investigating the fill soil. To address the REC from historical agricultural activities, it is recommended to test the soil for residual pesticide contamination. The presence and magnitude of contamination in soil will dictate response actions, if necessary.

This Phase I ESA, performed in conformance with the scope and limitations of ASTM Practice E1527, has not revealed any RECs other than those listed above.

## 7. DEVIATIONS/DATA GAPS

Deletions or deviations were not noted during this assessment. Title records were not reviewed for this assessment based on the information required by the Client. Since no environmental liens or activity and use limitations were found, it is assumed for the purposes of this assessment that the title records would not reveal evidence of RECs associated with the Site. Therefore, the lack of review of title records is not considered to be a significant data gap that would affect the ability of the environmental professional to identify conditions indicative of releases or threatened releases for this Phase I ESA. No significant data gaps that would affect the ability conditions indicative of releases were encountered during this Phase I ESA.

#### 9. SIGNATURE AND QUALIFICATIONS OF THE ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Sreehwey

Sree Gopinath, P.E. C57987 Principal Engineer

Qualifications for the environmental professionals involved in the performance of the Phase I ESA are included in Appendix D.

#### **10. LIMITATIONS**

This report was prepared in general accordance with current regulatory guidelines and the standard-ofcare exercised by environmental consultants preparing similar documents in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this document. Variations in Site conditions will exist, and conditions not observed or described in this document could be encountered during subsequent activities and Site work. Please also note that this document did not include an evaluation of geotechnical conditions or potential geologic hazards.

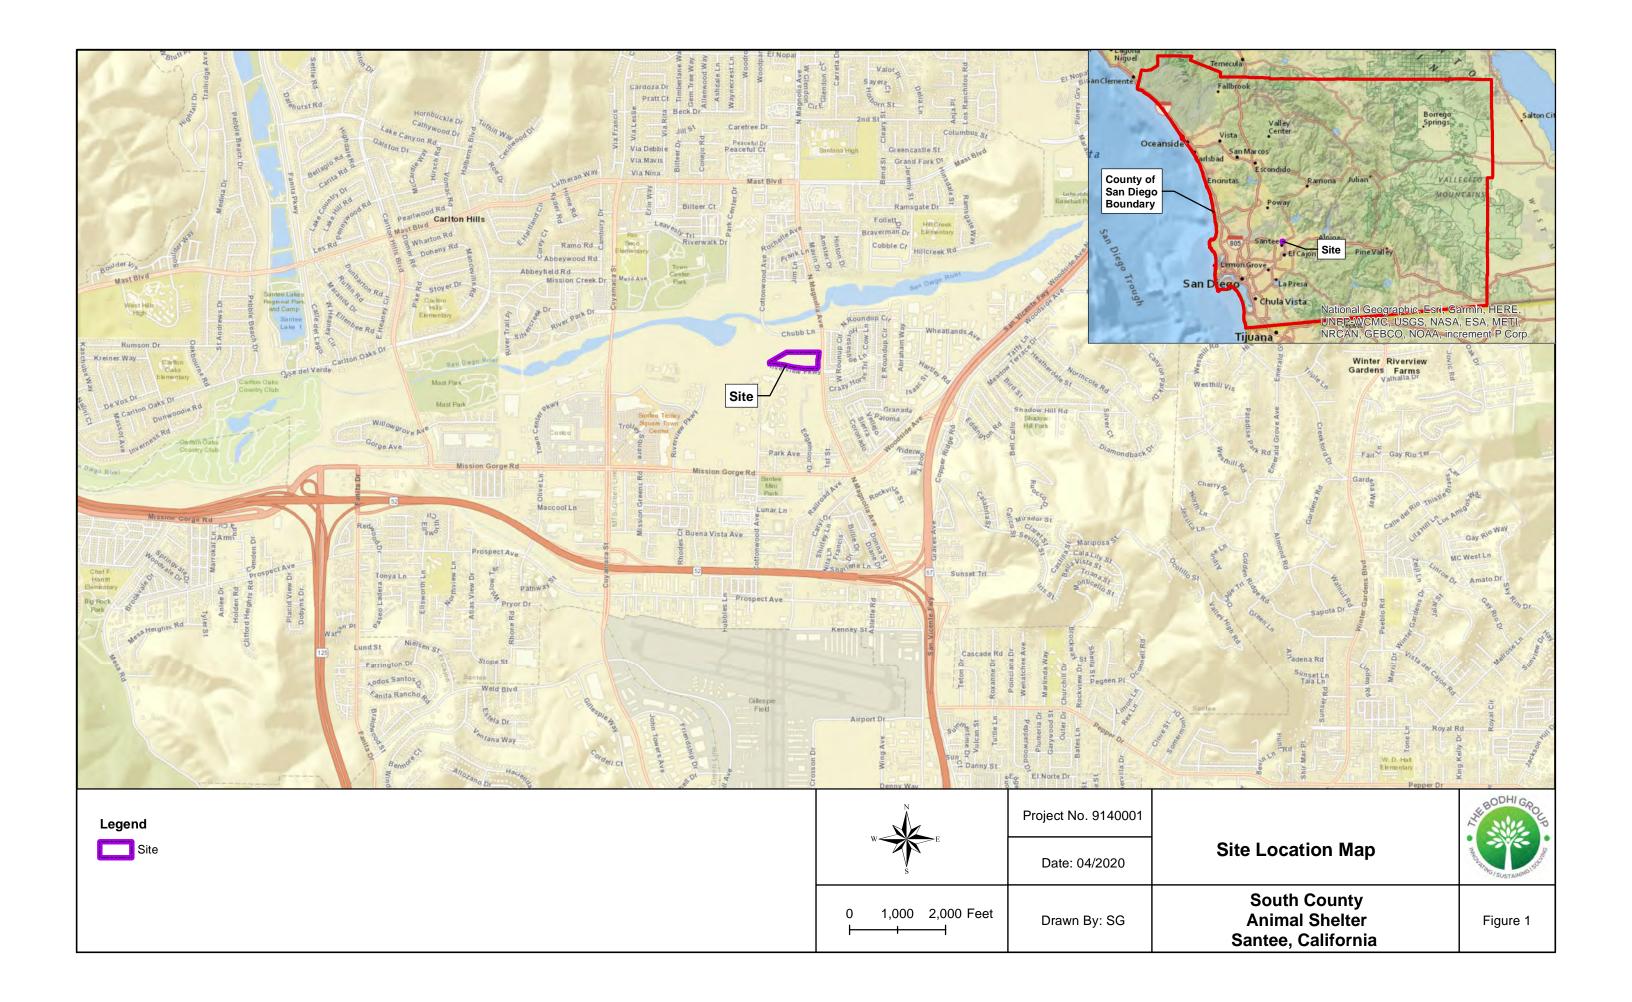

The conclusions, opinions, and recommendations regarding environmental conditions, as presented in this document, are based on an analysis of observed Site conditions and the referenced sources. Further assessment of environmental conditions at the Site may be accomplished by a more comprehensive assessment.

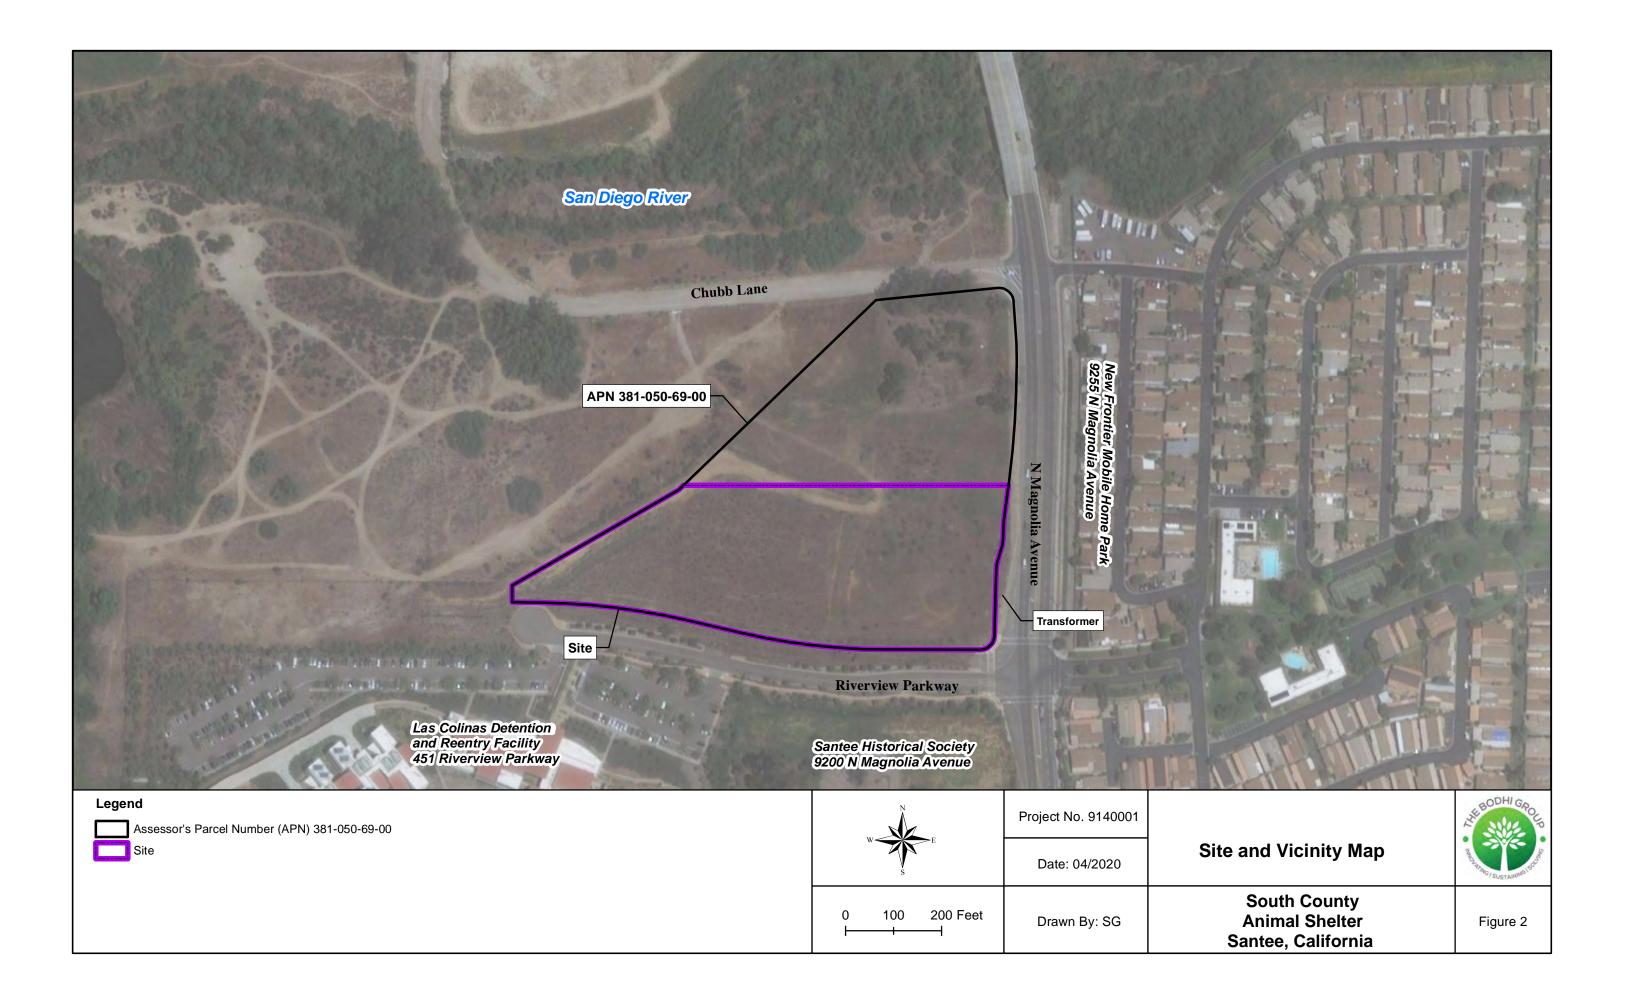

It should be understood that the conditions of a Site will change with time as a result of natural processes and the activities of man at the subject Site or nearby Sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this document may, therefore, be invalidated over time, in part or in whole, by changes over which the author has no control.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. The author should be contacted if the reader requires any additional information, or has questions regarding content, interpretations presented, or completeness of this document.

Data presented in this report should not be relied on for bidding purposes. This document is intended exclusively for use by the client. Any use or reuse of the findings, conclusions, and/or recommendations of this document by parties other than the client is undertaken at said parties' sole risk.

# **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
DAVE'S AUTO Site ID: 0905459 EPA Id: CASFN0905459	10538 MISSION GORGE	SSE 1/4 - 1/2 (0.413 mi.)	F20	108

#### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
FORMER EDGEMOOR HOSP	9065 EDGEMOOR DR	SSW 1/8 - 1/4 (0.187 mi.)	C9	29
EPA ID:: CAR000202697				

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 6 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

#### Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

SAN DIEGO COUNTY LOP DEH2016-LSAM-000402 32.84845 -116.97179 Cleanup Program Site JC SAN DIEGO COUNTY LOP Not reported Not reported Not reported Not reported Comments: The Site is located at 9631 North Magnolia Avenue, Santee, California. A concrete sump associated with a former hydraulic brick press was removed as part of ongoing excavation and reclamation activities at the Site. During implementation of a larger excavation of soils beneath the former RCP building, visual and olfactory indications of hydraulic oil impacts were observed in soil beneath the former brick press sump. Soil was initially excavated from the area surrounding the former sump location to a depth of approximately 12 feet below the pre-excavation grade and approximately three feet above the water table. Immediately to the west of the sump, the soil was excavated an additional four feet deep, to a depth of approximately one foot below the water table. The hydraulic oil impacted soil from the brick press sump area was separately stockpiled for characterization and disposal at a future date. The Site was subsequently enrolled in the DEH Site Assessment and Mitigation (SAM) Voluntary Assistance Program (VAP), and VAP case DEH2016-LSAM-000406 was opened. A work plan for the evaluation of

indications of hydraulic oil impacts were observed in soil beneath the former brick press sump. Soil was initially excavated from the area surrounding the former sump location to a depth of approximately 12 feet below the pre-excavation grade and approximately three feet above the water table. Immediately to the west of the sump, the soil was excavated an additional four feet deep, to a depth of approximately one foot below the water table. The hydraulic oil impacted soil from the brick press sump area was separately stockpiled for characterization and disposal at a future date. The Site was subsequently enrolled in the DEH Site Assessment and Mitigation (SAM) Voluntary Assistance Program (VAP), and VAP case DEH2016-LSAM-000406 was opened. A work plan for the evaluation of residual hydraulic oil impacts to soil and groundwater at the Site was submitted and approved by DEH. Soil samples were initially collected from six locations along the approximate extent of the excavation beneath the former sump location. Additional excavation was conducted within the areas in which laboratory analysis of soil samples indicated that TPH impacts were present above Environmental Screening Levels (ESLs). Soil was laterally excavated until there were no visual or olfactory indications of hydraulic oil impacts to remaining in-place soil. Within the area of secondary excavation, soil was removed to a depth of approximately six inches to one foot beneath the top of the groundwater table to remove the extent of immiscible hydraulic impacts within soil located directly above the water table. Approximately 30 additional yards of soil suspected to be impacted with hydraulic oil was removed and stockpiled for characterization and disposal. Confirmation soil samples were collected from the northern and southern extent of the additional excavation. The initial excavation beneath the former sump location extended to approximately three feet above the top of the groundwater table. The secondary excavation extended the excavation to a depth between approximately 15 to 16 feet below ground surface (bgs), approximately six inches below the groundwater table in the western portion of the excavation. Groundwater was sampled to evaluate if other analytes potentially associated with hydraulic oil impacts, including BTEXs and naphthalene, were present above ESLs. Concentrations of TPH, BTEXs, and naphthalene were not detected above laboratory reporting limits in samples collected from the ponded groundwater, indicating that constituents within the impacted soil are generally insoluble and did not result in groundwater impacts

above screening levels. Based on the extent of initial and secondary

#### S119007867

excavation of soil impacted with hydraulic oil, and the laboratory analytical results of soil and groundwater sampling, soil impacted with hydraulic oil has been excavated to the extent practicable, and did not result in impacts to groundwater underlying the Site; therefore, the consultant requests that a no further action determination be granted for this case. DEH concurs with No Further Action for VAP Case DEH2016-LSAM-000402.

#### Case Type: Cleanup Program Site Case Worker: CF Local Agency: SAN DIEGO COUNTY LOP RB Case Number: Not reported File Location: Local Agency Potential Media Affected: Not reported Potential Contaminants of Concern: Not reported Site History: A replacement facility for the Los Colinas Womens Detention Center is under construction on a County-owned property located south of the San Diego River in Santee, California, between Cottonwood and Magnolia Avenues. The former facility was vacated in August 2014 and was subsequently demolished. New portions of the replacement facility were recently constructed immediately east and north of the subject property. Since the majority of the property had been used for agricultural purposes since the 1920s, the project Environmental Impact Report required testing site soils for the presence of organochlorine pesticides (OCPs). The Countys grading contractor, Balfour Beatty Construction, Inc., entered the DEH Voluntary Assistance Program on August 29, 2014. A VAP case (#DEH2014-LSAM-000257) was opened to provided regulatory oversight and review services for the soil investigation. Construction Testing & Engineering, Inc. (CTE) was retained to perform the soil investigation prior to bulk grading activities at the site. Historical aerial photographs and topographic maps were reviewed by CTE to develop a work plan for collection of soil samples. The work plan was approved by DEH on September 14, 2014. During the soil investigation on September 16 and 17, 2014, hand-augered borings were advanced and a soil sample was collected at a depth of 0.5 to 1.0-foot below ground surface (bgs) from each boring. If fill material was sampled, the boring was deepened in order to collect a sample of the underlying alluvium [the alluvial material presumably was at the ground surface when previous agricultural use of the property may have occurred]. The borings were advance to a maximum depth of 5.0 feet bgs. Upon submittal for laboratory, the samples of alluvium were analyzed for OCPs and the metals arsenic, copper, lead, and mercury. Laboratory results for the 34 soil samples collected indicated that OCPs were not detected. The non-detect OCP results for

LAS COLINAS DETENTION FACILITY (Continued)

SAN DIEGO COUNTY WOMEN'S DETENTION FACILITY

concurs with these recommendations.

the soil samples did not exceed their respective residential California Human Health Screening Levels (CHHSLs). None of the analytical results for the metals copper, lead, or mercury exceeded their respective residential CHHSLs. However, arsenic, with a laboratory reporting limit of 1.0 milligrams per kilogram (mg/kg), was detected in 31 of the 34 samples at concentrations that ranged from 1.0 to 3.6 mg/kg. The detected range of arsenic concentrations was also compared to its residential CHHSL (0.70 mg/kg) and the US EPA Region IX Regional Screening Level (residential) for arsenic, which is 0.67 mg/kg. However, the detected arsenic concentrations are within the range of background levels in southern California soils. Based on the analytical results for soil samples, CTE concluded that the residual OCP concentrations do not pose a human health risk to future residents of the womens detention replacement facility. The consultant recommended no further action and case closure. DEH

SANTEE, CA 92071 STATE **Completed - Case Closed** 03/05/2013 T10000004142 SAN DIEGO COUNTY LOP H39793-001 32.841411667168 -116.972529888153 **Cleanup Program Site** SAN DIEGO COUNTY LOP Not reported Local Agency Potential Contaminants of Concern: DDD / DDE / DDT, Other Insecticides / Pesticide / Fumigants / Herbicides A replacement facility for the Los Colinas Womens Detention Center is planned for a 30-acre property located south of the San Diego River in Santee, California, between Cottonwood and Magnolia Avenues. The property, which is owned by the County of San Diego (County), was formerly used as agricultural land and lies immediately east of the present facility. A portion of the County-operated Edgemoor Hospital occupied the east-central area of the property until it was demolished in 2012. Since the majority of the property had been used for agricultural purposes since the 1920s, the project Environmental Impact Report required testing site soils for the presence of organochlorine pesticides (OCPs). The Countys grading contractor, Balfour Beatty Construction, Inc., entered the DEH Voluntary Assistance Program on June 14, 2012. A VAP case (#H39793-001) was opened to provided regulatory oversight and review services for the soil investigation. Construction Testing & Engineering, Inc. (CTE) was retained to perform the soil investigation prior to bulk grading activities at the site. Historical aerial photographs and topographic maps were reviewed by CTE to develop a work plan for collection of soil samples. The work plan, which proposed the collection of 60 soil samples over a grid pattern and up to 10 judgmental soil samples in areas deemed to have had potential pesticide impacts, was approved by DEH on June 24, 2012. Shallow test pits were excavated at the site by a backhoe to facilitate soil sample collection. Samples were collected from the sidewalls of the test pits at depths of 0 to 0.5, 1.5 to 2, and 3 to 3.5 feet below ground surface (bgs). Upon submittal to the laboratory, the samples were analyzed for OCPs and the metals arsenic, copper, lead, and mercury. OCPs were not detected in 43 of the soil samples collected from the 0 to 0.5-foot depth interval. Twelve OCPs were detected in the remaining unbiased and judgmental samples, primarily in samples collected from the 0 to 0.5-foot depth interval. 4,4-DDE, 4,4-DDT, dieldrin, and endrin were the most frequently detected OCPs. OCP, copper, lead, and mercury concentrations detected in the soil samples were compared to residential California Human Health Screening Levels (CHHSLs) except for the concentrations of OCPs endosulfan I and heptachlor epoxide, which were compared to U.S. EPA Regional Screening Levels (RSLs). Arsenic levels in the soil samples were compared to regional background levels. None of the OCPs or metals detected exceeded its respective residential CHHSL or RSL and detected arsenic

concentrations were less than the regional background level of 12 milligrams per kilogram (mg/kg). Based on the analytical results for soil samples, CTE concluded that the residual OCP concentrations do not pose a human health risk to future residents of the womens detention replacement facility and that mitigation of OCP-impacted soils was not necessary. DEH concurred, but required implementation of a community health and safety plan (CHSP) during bulk grading activities to mitigate potential off-site impacts (e.g., fugitive dust, noise, storm runoff, traffic). Implementation of the CHSP included establishing four temporary air monitoring points around the site perimeter prior to initiation of bulk grading at the site on September 4, 2012. A temporary weather station was also installed to measure wind speed and direction during grading activities. Daily air particulate samples were collected at the four monitoring points during the initial week of bulk grading and analyzed for OCPs. No OCPs were detected in the samples. Subsequent air particulate sampling was performed on a weekly basis at each monitoring point. These samples were archived in the event off-site impacts were reported, but no such reports were received. Bulk grading at the site was completed on December 3, 2012, and the air monitoring equipment was decommissioned. CTE submitted a final report recommending no further action and case closure. DEH concurs with the consultants recommendations.

Parsons Trust since 1970. David Tucker subleased a portion of this property from Mr. Storrs from 1985 to 1986, and again from 1987 to 1993, and used the building as a radiator repair shop. After the sublease expired in 1993, Mr. Storrs and Mr. Tucker entered into a 20-year sublease agreement for the radiator shop. In 1993, Mr. Storrs evicted Mr. Tucker for nonpayment of rent. Not reported Three businesses currently operate on the Site. These include: 1) Conceptions Retail Store (a toy and baby supply store), 2) Import Auto Tech, and 3) Chi Li Auto Center (Parker Properties, 2002). Conceptions Retail Store used to be a Sewing and Vacuum shop. The parking lot for Conceptions Retail Store is in the southeast portion of the Site. Previously, there was

a J.T. Diesel in the northern portion of the site, and Brake

Depot was there prior to that. J.T. Diesel was east of Chi Li Auto Center, northeast of Conceptions Retail Store, south of the former sump, and southwest of the section of bare soil in the northeast corner of the Site. This portion of the site is now vacant. The cars that were being serviced by J.T. Diesel were parked on the Site, in the eastern portion of the site, east of J.T. Diesel. The employees of Chi Li Auto Center park on an adjacent property immediately east of the site. 06272003 amount excavated was 224 tons, or an estimated 172 cubic yards. 04102003 The Removal Action Workplan was approved for the excavation of 04102003 approximately 180 cubic yards of soil contaminated with lead 04102003 and cadmium from this site and adjacent areas and the disposal 04102003 of this soil to a permitted disposal facility. 04262001 Samples taken at the site using an XRF. Found up to 38,000 04262001 ppm. of lead. 05251999 Performed site visit as part of PA, and took samples. Found 05251999 lead as high as 11,000 ppm. 06231999 Mailed PA package to U.S. EPA. 06272003 Lead and cadmium-contaminated soil was excavated and removed to 06272003 a permitted disposal facility. Cleanup was completed to a 06272003 residential standard. All confirmation samples were below the 07302003 The Department has determined that all appropriate response 07302003 actions have been completed, that all acceptable engineering 07302003 practices were implemented and that no further removal/remedial 07302003 action is necessary. 08021999 Completed a Preliminary Assessment with sampling for this site. 08021999 It was approved by U.S.EPA on August 2, 1999. 09252001 DTSC's contractor Tetra-tech submitted a report of soil 09252001 sampling. Found up to approximately 1,000 mg./kg lead. 09252001 Tetra-tech will take more surface samples and prepare a 09252001 Removal Action Workplan. 10191998 Changed the site status from PEAR to PEAP. 10222002

	Potential Media Affect:	Aquifer used for drinking water supply
	Potential Contaminants of Concern:	
	Site History:	The Site is located at 9631 North Magnolia Avenue in Santee,
		California (Site) just north of the San Diego River. The Site was
		owned and operated by RCP Block and Brick (RCP) and used as a block and brick manufacturing, sales, and storage facility. In January
		1998, fuel dispensers and piping were removed and replaced as part of
		a fuel system upgrade. As part of the fuel system upgrade, DEH
		directed the collection of four soil samples. The soil samples were
		collected at approximately two feet below grade and were analyzed for
		total petroleum hydrocarbons (TPH). Two of the four soil samples were
		reported to contain concentrations of total petroleum hydrocarbons as
		diesel (TPHd) at 1,200 and 19,000 milligrams per kilogram (mg/kg). Based on the results of soil sampling, DEH opened Local Oversight
		Program Case H08229-001. At the direction of DEH, eight groundwater
		monitoring wells (MW-1 through MW-8) were installed at the Site.
		Measurable phase-separated petroleum hydrocarbons (PSH) were detected
		in MW-2 during a July 2002 event. PSH was subsequently not measured
		at the Site. The UST system was removed on August 20, 2004. Two
		diesel and one gasoline underground storage tanks (USTs) were
		removed. The consultant estimates that approximately 5.3 cubic yards
		of impacted soil remains onsite. On February 5, 2013, a Corrective

#### S100727577

Action Plan (CAP) was submitted. A receptor survey was conducted as part of the CAP. The presence of groundwater production wells was investigated within a \\%-mile radius of the Site. Based on the reported water well locations and the distance to the estimated edge of the dissolved-phase plume, a low likelihood exists for the Site release to impact nearby production wells. Given the limited extent of subsurface impacts at the Site and the apparent lack of impact to groundwater resources and sensitive receptors within the Site vicinity, it was concluded that natural attenuation would be effective in achieving remediation goals within a reasonable period of time and has already achieved cleanup goals. DEH concurred with the CAP conclusion. Public notification was conducted as part of the CAP. No comments were received. On May 14, 2015, notification was made to the Helix Water District that DEH was proposing closure of the case. No comments were received. Note: A permit for the destruction of the monitoring wells was issued on August 27, 2014. The permit number is DEH2013-LMWP-000790.

sampling beneath the USTs and associated piping. Total petroleum hydrocarbons (TPH) were detected beneath the USTs up to a concentration of 330 milligrams per kilogram (mg/kg) and DEH subsequently opened unauthorized release case H13967-001 (Shattuck Property) citing both Tuneup Masters and Donald Shattuck as responsible parties. In a letter dated May 6, 1996, DEH determined that Tuneup Masters was not a responsible party after limited assessment activities conducted in August 1995 indicated that gasoline was the primary constituent present in the subsurface. During this assessment, three soil borings were advanced in the vicinity of the former USTs and soil samples were collected. One of the borings was converted to a temporary well and a grab groundwater sample was collected. Total petroleum hydrocarbons as gasoline (TPHg) and benzene impacted soil were detected up to 2,540 and 17.3 mg/kg, respectively. TPHg and benzene impacted groundwater were detected up to 116,000 and 5,490 micrograms per liter, respectively. Gasoline impacts were generally found to increase with depth suggesting the USTs were not the source of gasoline impacts observed in the smear zone (approximately 15 to 20 feet below grade). Further investigation identified an unauthorized release at Chevron Station 9-1408 (H05725-001), located hydrologically upgradient of the Shattuck property to the southeast across Railroad Avenue, at 8888 North Magnolia Avenue in Santee. Monitoring wells installed by Chevron in the vicinity of the Chevron site and the Shattuck property indicated a significant release of petroleum hydrocarbons had occurred at the Chevron station, resulting in liquid-phase hydrocarbon (LPH) impacts up to 5.48 feet thick. Historically, LPH extended from the Chevron dispenser islands beneath the Shattuck property into Mission Gorge Road, north and northwest of the Shattuck property. The site conceptual model provided by Chevron indicated that the dissolved-phase and LPH plume extended more than 250 feet downgradient of the Chevron dispenser islands, encompassing the majority of the Shattuck property. Chevron monitoring wells located adjacent to the Shattuck property confirm this interpretation indicating that smear zone gasoline impacts observed during the aforementioned boring investigation on the Shattuck property originated from the Chevron Station. The Shattuck property consultant estimated that approximately 1,100 cubic yards of hydrocarbon-impacted soil associated with the used oil release remains at the site. However, a significant amount of petroleum-impacted soil from the Chevron release exists at the Shattuck property which Chevron has agreed to address. The Shattuck property consultant concluded that any hydrocarbon impacts associated with the operation of the gasoline and waste oil tanks at the Shattuck property are minimal and not significant in comparison with impacts from the Chevron release. The consultant recommends that the Shattuck property site be closed and that no further action be required at this time. DEH agrees with the consultants conclusions and recommendation provided that access to the Shattuck property be allowed for Chevron to conduct DEH required assessment and remediation activities. In a letter dated June 2, 2011, addressed to Donald Shattuck and Chevron, DEH required that Chevron address potential health risk issues and mitigation of hydrocarbon-impacted soil and groundwater on the Shattuck property. In subsequent correspondence, Chevron agreed to address these issues as part of their cleanup of H05725-001.

Potential Contaminants of Concer	
Site History:	A leak of unleaded gasoline from a riser pipe at the northeastern
	pump island was reported in 1983. 430 gallons of gasoline were
	recovered by a vacuum truck. Monitoring wells were installed to
	investigate this release. In 1987 a release estimated at 10,000
	gallons occurred from an underground storage tank. Free product was
	present on and off-site with a maximum thickness off-site of 3.8 feet
	in MW20 in May 2001. Soil vapor extraction operated during 1991-92
	and intermittently until 1994. Seven monthly 24 hour DPE events were
	conducted in April through September 2001 & November 2001 and four
	quarterly events that ranged from 71 to 82 hours were conducted in
	2003. Secor estimated that 238 lbs of hydrocarbons were removed in
	2001 and 302 lbs in 2003. See Environmental Data tab for additional
	information.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### Federal NPL site list

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/30/2020 Date Data Arrived at EDR: 02/05/2020 Date Made Active in Reports: 02/14/2020 Number of Days to Update: 9 Source: EPA Telephone: N/A Last EDR Contact: 03/04/2020 Next Scheduled EDR Contact: 04/13/2020 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 7 Telephone: 913-551-7247

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020 Date Data Arrived at EDR: 02/05/2020 Date Made Active in Reports: 02/14/2020 Number of Days to Update: 9 Source: EPA Telephone: N/A Last EDR Contact: 03/04/2020 Next Scheduled EDR Contact: 04/13/2020 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

## Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020 Date Data Arrived at EDR: 02/05/2020 Date Made Active in Reports: 02/14/2020 Number of Days to Update: 9 Source: EPA Telephone: N/A Last EDR Contact: 03/04/2020 Next Scheduled EDR Contact: 04/13/2020 Data Release Frequency: Quarterly

## Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 01/03/2020 Next Scheduled EDR Contact: 04/13/2020 Data Release Frequency: Varies

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/30/2020 Date Data Arrived at EDR: 02/05/2020 Date Made Active in Reports: 02/14/2020 Number of Days to Update: 9 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/05/2020 Next Scheduled EDR Contact: 04/27/2020 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/30/2020 Date Data Arrived at EDR: 02/05/2020 Date Made Active in Reports: 02/14/2020 Number of Days to Update: 9 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 03/04/2020 Next Scheduled EDR Contact: 04/27/2020 Data Release Frequency: Quarterly

## Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/16/2019	Source: EPA
Date Data Arrived at EDR: 12/16/2019	Telephone: 800-424-9346
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 02/27/2020
Number of Days to Update: 4	Next Scheduled EDR Contact: 04/06/2020
	Data Release Frequency: Quarterly

## Federal RCRA non-CORRACTS TSD facilities list

## RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/16/2019 Date Made Active in Reports: 12/20/2019 Number of Days to Update: 4 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 02/27/2020 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

#### Federal RCRA generators list

## RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/16/2019 Date Made Active in Reports: 12/20/2019 Number of Days to Update: 4 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 02/27/2020 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/16/2019 Date Made Active in Reports: 12/20/2019 Number of Days to Update: 4 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 02/27/2020 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/16/2019 Date Made Active in Reports: 12/20/2019 Number of Days to Update: 4 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 02/27/2020 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

#### Federal institutional controls / engineering controls registries

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/04/2019Source: Department of the NavyDate Data Arrived at EDR: 11/13/2019Telephone: 843-820-7326Date Made Active in Reports: 01/28/2020Last EDR Contact: 02/10/2020Number of Days to Update: 76Next Scheduled EDR Contact: 05/25/2020Data Release Frequency: Varies

## US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/22/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/22/2019	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2020	Last EDR Contact: 02/20/2020
Number of Days to Update: 67	Next Scheduled EDR Contact: 06/08/2020
	Data Release Frequency: Varies

## US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/22/2019 Date Data Arrived at EDR: 11/22/2019 Date Made Active in Reports: 01/28/2020 Number of Days to Update: 67 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 02/20/2020 Next Scheduled EDR Contact: 06/08/2020 Data Release Frequency: Varies

#### Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/19/2019 Date Made Active in Reports: 03/06/2020 Number of Days to Update: 78 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 12/19/2019 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

## State- and tribal - equivalent NPL

#### **RESPONSE:** State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/28/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 10/29/2019	Telephone: 916-323-3400
Date Made Active in Reports: 01/07/2020	Last EDR Contact: 01/28/2020
Number of Days to Update: 70	Next Scheduled EDR Contact: 05/11/2020
	Data Release Frequency: Quarterly

#### State- and tribal - equivalent CERCLIS

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/28/2019 Date Data Arrived at EDR: 10/29/2019 Date Made Active in Reports: 01/07/2020 Number of Days to Update: 70 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/28/2020 Next Scheduled EDR Contact: 05/11/2020 Data Release Frequency: Quarterly

#### State and tribal landfill and/or solid waste disposal site lists

#### SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/11/2019 Date Data Arrived at EDR: 11/12/2019 Date Made Active in Reports: 01/08/2020 Number of Days to Update: 57 Source: Department of Resources Recycling and Recovery Telephone: 916-341-6320 Last EDR Contact: 02/11/2020 Next Scheduled EDR Contact: 05/25/2020 Data Release Frequency: Quarterly

#### State and tribal leaking storage tank lists

LUST REG 1: Active Toxic Site Investigation Del Norte, Humboldt, Lake, Mendocino, Mod please refer to the State Water Resources Co	oc, Siskiyou, Sonoma, Trinity counties. For more current information, ontrol Board's LUST database.

#### State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/18/2019 Date Data Arrived at EDR: 12/19/2019 Date Made Active in Reports: 02/19/2020 Number of Days to Update: 62 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 12/19/2019 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

## ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/02/2019 Date Data Arrived at EDR: 12/16/2019 Date Made Active in Reports: 03/06/2020 Number of Days to Update: 81 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/16/2019 Next Scheduled EDR Contact: 03/30/2020 Data Release Frequency: Semi-Annually

## Local Lists of Landfill / Solid Waste Disposal Sites

## WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

#### Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 06/11/2019 Date Data Arrived at EDR: 06/13/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 82 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 02/21/2020 Next Scheduled EDR Contact: 06/08/2020 Data Release Frequency: No Update Planned

## HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006 Number of Days to Update: 21 Source: Department of Toxic Substance Control Telephone: 916-323-3400 Last EDR Contact: 02/23/2009 Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

## SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 10/28/2019 Date Data Arrived at EDR: 10/29/2019 Date Made Active in Reports: 01/07/2020 Number of Days to Update: 70 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/28/2020 Next Scheduled EDR Contact: 05/11/2020 Data Release Frequency: Quarterly

## CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 06/30/2018 Date Data Arrived at EDR: 07/16/2019 Date Made Active in Reports: 09/24/2019 Number of Days to Update: 70 Source: Department of Toxic Substances Control Telephone: 916-255-6504 Last EDR Contact: 01/06/2020 Next Scheduled EDR Contact: 04/20/2020 Data Release Frequency: Varies

#### CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 10/21/2019 Date Data Arrived at EDR: 10/22/2019 Date Made Active in Reports: 01/02/2020 Number of Days to Update: 72 Source: CalEPA Telephone: 916-323-2514 Last EDR Contact: 01/22/2020 Next Scheduled EDR Contact: 05/04/2020 Data Release Frequency: Quarterly

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995 Date Data Arrived at EDR: 08/30/1995 Date Made Active in Reports: 09/26/1995 Number of Days to Update: 27 Source: State Water Resources Control Board Telephone: 916-227-4364 Last EDR Contact: 01/26/2009 Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019 Date Data Arrived at EDR: 06/13/2019 Date Made Active in Reports: 09/03/2019 Number of Days to Update: 82 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 02/21/2020 Next Scheduled EDR Contact: 06/08/2020 Data Release Frequency: Quarterly

## PFAS: PFAS Contamination Site Location Listing

A listing of PFAS contaminated sites included in the GeoTracker database.

Date of Government Version: 12/09/2019Source: State Water Resources Control BoardDate Data Arrived at EDR: 12/10/2019Telephone: 866-480-1028Date Made Active in Reports: 02/19/2020Last EDR Contact: 03/10/2020Number of Days to Update: 71Next Scheduled EDR Contact: 06/22/2020Data Release Frequency: Varies

#### Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

 Date of Government Version: 06/01/1994

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/03/2019 Date Data Arrived at EDR: 12/04/2019 Date Made Active in Reports: 02/04/2020 Number of Days to Update: 62 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 03/03/2020 Next Scheduled EDR Contact: 06/15/2020 Data Release Frequency: Semi-Annually

## **Records of Emergency Release Reports**

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/05/2019	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 12/06/2019	Telephone: 202-366-4555
Date Made Active in Reports: 02/14/2020	Last EDR Contact: 12/06/2019

#### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/16/2019 Date Made Active in Reports: 12/20/2019 Number of Days to Update: 4 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 02/27/2020 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

#### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 11/12/2019 Date Data Arrived at EDR: 11/19/2019 Date Made Active in Reports: 01/28/2020 Number of Days to Update: 70 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 02/19/2020 Next Scheduled EDR Contact: 06/01/2020 Data Release Frequency: Varies

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005

#### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 12/16/2019 Date Data Arrived at EDR: 12/19/2019 Date Made Active in Reports: 02/27/2020 Number of Days to Update: 70 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 12/19/2019 Next Scheduled EDR Contact: 04/06/2020 Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/03/2020 Next Scheduled EDR Contact: 05/18/2020 Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 02/07/2020 Next Scheduled EDR Contact: 05/18/2020 Data Release Frequency: Varies

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/21/2017 Date Made Active in Reports: 01/05/2018 Number of Days to Update: 198 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/20/2019 Next Scheduled EDR Contact: 03/30/2020 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2017 Date Data Arrived at EDR: 11/16/2018 Date Made Active in Reports: 11/21/2019 Number of Days to Update: 370 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 02/05/2020 Next Scheduled EDR Contact: 06/01/2020 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 05/01/2019SDate Data Arrived at EDR: 10/23/2019DDate Made Active in Reports: 01/15/2020DNumber of Days to Update: 84M

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/25/2019 Date Data Arrived at EDR: 05/02/2019 Date Made Active in Reports: 05/23/2019 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 01/21/2020 Next Scheduled EDR Contact: 05/04/2020 Data Release Frequency: Varies

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mil	I Tailings Sites	

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Financial Assurance 1: Financial Assurance Information Listing Financial Assurance information

Date of Government Version: 10/17/2019<br/>Date Data Arrived at EDR: 10/22/2019Source: Department of Toxic Substances Control<br/>Telephone: 916-255-3628<br/>Last EDR Contact: 01/17/2020Date Made Active in Reports: 01/02/2020<br/>Number of Days to Update: 72Last EDR Contact: 01/17/2020<br/>Next Scheduled EDR Contact: 05/04/2020<br/>Data Release Frequency: Varies

#### Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 11/08/2019	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 11/12/2019	Telephone: 916-341-6066
Date Made Active in Reports: 01/08/2020	Last EDR Contact: 02/07/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 05/25/2020
	Data Release Frequency: Varies

#### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 05/29/2019	Telephone: 916-255-1136
Date Made Active in Reports: 07/22/2019	Last EDR Contact: 04/22/2019
Number of Days to Update: 54	Next Scheduled EDR Contact: 04/20/2020
	Data Release Frequency: Annually

## ICE: ICE

Contains data pertaining to the Permitted Facilities with Inspections / Enforcements sites tracked in Envirostor.

Date of Government Version: 11/18/2019		
Date Data Arrived at EDR: 11/19/2019		
Date Made Active in Reports: 01/23/2020		
Number of Days to Update: 65		

Source: Department of Toxic Subsances Control Telephone: 877-786-9427 Last EDR Contact: 02/19/2020 Next Scheduled EDR Contact: 06/01/2020 Data Release Frequency: Quarterly

#### HIST CORTESE: Hazardous Waste & Substance Site List

The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

Date of Government Version: 04/01/2001 Date Data Arrived at EDR: 01/22/2009 Date Made Active in Reports: 04/08/2009 Number of Days to Update: 76 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/22/2009 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

## HWP: EnviroStor Permitted Facilities Listing

Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Date of Government Version: 11/18/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/19/2019	Telephone: 916-323-3400
Date Made Active in Reports: 01/23/2020	Last EDR Contact: 02/19/2020
Number of Days to Update: 65	Next Scheduled EDR Contact: 06/01/2020
	Data Release Frequency: Quarterly

#### HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 01/06/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/07/2020	Telephone: 916-440-7145

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 11/19/2019 Date Data Arrived at EDR: 01/07/2020 Date Made Active in Reports: 03/09/2020 Number of Days to Update: 62 Source: RWQCB, Central Valley Region Telephone: 559-445-5577 Last EDR Contact: 01/07/2020 Next Scheduled EDR Contact: 04/20/2020 Data Release Frequency: Varies

#### WDS: Waste Discharge System

Sites which have been issued waste discharge requirements.

Date of Government Version: 06/19/2007	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/20/2007	Telephone: 916-341-5227

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 12/09/2019 Date Data Arrived at EDR: 12/10/2019 Date Made Active in Reports: 02/19/2020 Number of Days to Update: 71 Source: State Water Resources Control Board Telephone: 916-341-5810 Last EDR Contact: 03/10/2020 Next Scheduled EDR Contact: 06/22/2020 Data Release Frequency: Quarterly

#### CIWQS: California Integrated Water Quality System

The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

Date of Government Version: 12/03/2019 Date Data Arrived at EDR: 12/04/2019 Date Made Active in Reports: 02/04/2020 Number of Days to Update: 62 Source: State Water Resources Control Board Telephone: 866-794-4977 Last EDR Contact: 03/03/2020 Next Scheduled EDR Contact: 06/15/2020 Data Release Frequency: Varies

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

Date of Government Version: 10/21/2019 Date Data Arrived at EDR: 10/22/2019 Date Made Active in Reports: 01/03/2020 Number of Days to Update: 73 Source: California Environmental Protection Agency Telephone: 916-323-2514 Last EDR Contact: 01/22/2020 Next Scheduled EDR Contact: 05/04/2020 Data Release Frequency: Varies

NON-CASE INFO: Non-Case Information Sites (GEOTRACKER) Non-Case Information sites

EDR HIGH RISK HISTORICAL RECORDS		
EDR Exclusive Records		

## EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

# **GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM**

#### TARGET PROPERTY ADDRESS

SOUTH COUNTY ANIMAL SHELTER MAGNOLIA AVE SANTEE, CA 92071

#### TARGET PROPERTY COORDINATES

Latitude (North):	32.845335 - 32° 50' 43.21"
Longitude (West):	116.970637 - 116° 58' 14.29"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	502747.8
UTM Y (Meters):	3633950.8
Elevation:	347 ft. above sea level

#### USGS TOPOGRAPHIC MAP

Target Property Map:	5622884 EL CAJON, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

#### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

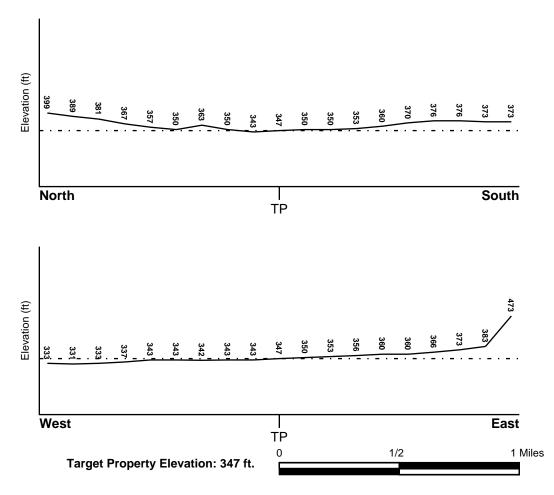

#### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1651G	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type
06073C1652G 06073C1653G 06073C1654G	FEMA FIRM Flood data FEMA FIRM Flood data FEMA FIRM Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property EL CAJON	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
3	1/2 - 1 Mile SW	Varies
5	1/2 - 1 Mile WSW	Not Reported
1G	1/2 - 1 Mile WSW	Not Reported
2G	1/2 - 1 Mile SW	Varies

For additional site information, refer to Physical Setting Source Map Findings.

#### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

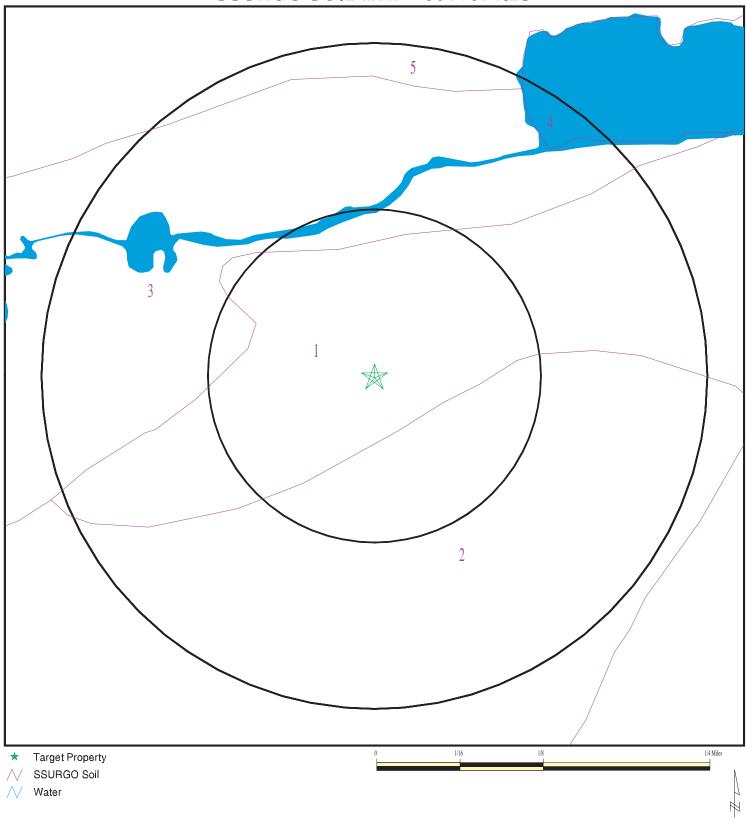

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	VISALIA
Soil Surface Texture:	sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
Boundary			Classification		Saturated hydraulic		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	11 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
2	11 inches	40 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
3	40 inches	59 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1

### Soil Map ID: 2

Soil Component Name:	GRANGEVILLE
Soil Surface Texture:	fine sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class: Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 92 inches

	Soil Layer Information							
	Boundary		Boundary Clas		Classi	fication	Saturated hydraulic	
Layer	ayer Upper Lower Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)			
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 7.9	
2	11 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 7.9	

Soil Map ID: 3	
Soil Component Name:	RIVERWASH
Soil Surface Texture:	gravelly coarse sand
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

	Soil Layer Information						
	Βοι	undary		Classi	fication	Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 4	
Soil Component Name:	Water
Soil Surface Texture:	gravelly coarse sand
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches
No Layer Information available.	

### Soil Map ID: 5

Soil Component Name:	TUJUNGA
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessively drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
Boundary			Classification		Saturated hydraulic		
Layer	Upper Lower		Soil Texture Class	AASHTO Group Unified Soil		conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	14 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6
2	14 inches	33 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6
3	33 inches	59 inches	stratified gravelly sand to gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6

#### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

#### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

#### OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

#### RADON

State Database: CA Radon Source: Department of Public Health Telephone: 916-210-8558 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Bodhi Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Bodhi Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Mr. Sean Phillips Balfour Beatty Construction 10620 Treena Street, Suite 300 San Diego, California 92131

Dear Mr. Phillips:

# CLOSURE LETTER VOLUNTARY ASSISTANCE PROGRAM #DEH2014-LSAM-000257 LOS COLINAS WOMEN'S DETENTION FACILITY REPLACEMENT PHASE 2 9000 COTTONWOOD AVENUE, SANTEE, CALIFORNIA 92071

The County of San Diego, Department of Environmental Health (DEH), Site Assessment and Mitigation Program (SAM), reviewed the environmental investigation report summarizing site assessment findings for the above-referenced property. Provided that the information presented to DEH/SAM was complete, accurate, and representative of existing site conditions, **this agency concurs that the cleanup goals established for the subject site have been met.** 

Please be advised that this letter does not relieve the responsible party of any liability under the *California Health and Safety Code* or the Porter Cologne Water Quality Control Act. Any change in the proposed use of the above site as a residential property may require reevaluation to determine if the change would pose a risk to public health.

Thank you for selecting the Department of Environmental Health as your lead agency to assist you with the progress of your environmental project. Please contact Carol Fenner of the Site Assessment and Mitigation Program at (858) 505-6896, if you require additional assistance.

Sincerely,

SCOTT WELDON, Program Manager Supervising Environmental Health Specialist Site Assessment and Mitigation Program

# III. SITE CHARACTERIZATION AND/OR INFORMATION (Continued)

DEH2014-LSAM-000257

COMMENTS:

A replacement facility for the Los Colinas Women's Detention Center is under construction on a County-owned property located south of the San Diego River in Santee, California, between Cottonwood and Magnolia Avenues. The former facility was vacated in August 2014 and was subsequently demolished. New portions of the replacement facility were recently constructed immediately east and north of the subject property. Since the majority of the property had been used for agricultural purposes since the 1920s, the project Environmental Impact Report required testing site soils for the presence of organochlorine pesticides (OCPs). The County's grading contractor, Balfour Beatty Construction, Inc., entered the DEH Voluntary Assistance Program on August 29, 2014. A VAP case (#DEH2014-LSAM-000257) was opened to provided regulatory oversight and review services for the soil investigation.

Construction Testing & Engineering, Inc. (CTE) was retained to perform the soil investigation prior to bulk grading activities at the site. Historical aerial photographs and topographic maps were reviewed by CTE to develop a work plan for collection of soil samples. The work plan was approved by DEH on September 14, 2014.

During the soil investigation on September 16 and 17, 2014, hand-augered borings were advanced and a soil sample was collected at a depth of 0.5 to 1.0-foot below ground surface (bgs) from each boring. If fill material was sampled, the boring was deepened in order to collect a sample of the underlying alluvium [the alluvial material presumably was at the ground surface when previous agricultural use of the property may have occurred]. The borings were advance to a maximum depth of 5.0 feet bgs. Upon submittal for laboratory, the samples of alluvium were analyzed for OCPs and the metals arsenic, copper, lead, and mercury.

Laboratory results for the 34 soil samples collected indicated that OCPs were not detected. The non-detect OCP results for the soil samples did not exceed their respective residential California Human Health Screening Levels (CHHSLs). None of the analytical results for the metals copper, lead, or mercury exceeded their respective residential CHHSLs. However, arsenic, with a laboratory reporting limit of 1.0 milligrams per kilogram (mg/kg), was detected in 31 of the 34 samples at concentrations that ranged from 1.0 to 3.6 mg/kg. The detected range of arsenic concentrations was also compared to its residential CHHSL (0.70 mg/kg) and the US EPA Region IX Regional Screening Level (residential) for arsenic, which is 0.67 mg/kg. However, the detected arsenic concentrations are within the range of background levels in southern California soils.

Based on the analytical results for soil samples, CTE concluded that the residual OCP concentrations do not pose a human health risk to future residents of the women's detention replacement facility. The consultant recommended no further action and case closure. DEH concurs with these recommendations.

# Non-LOP or Voluntary Assistance Program

# IV. CLOSURE DEH2014-LSAM-000257 Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Ms. Kathleen Hider County of San Diego, Department of Public Works 5555 Overland Ave, Building 2 MS-0348 San Diego, CA 92123

Dear Ms. Hider:

UNDERGROUND STORAGE TANK (UST) CASE #H14318-002 EDGEMOOR GERIATRIC HOSPITAL 9065 EDGEMOOR DRIVE, SANTEE, CA

This letter confirms the completion of a site investigation and corrective action for the underground storage tanks formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquines concerning the former underground storage tanks is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code. Please contact Melissa Porter at (619) 338-2497 if you have questions regarding this matter.

\$incerely,

GARY W. ERBECK, Director Department of Environmental Health Site Assessment and Mitigation Program

Comments:

Three USTs were removed from the site in 1998. The two 2,000 diesel tanks were located in a below grade, seamless concrete vault in the basement of the facility's mechanical room, and the 1,200 gallon tank was located northwest of the main parking lot area. Diesel range hydrocarbons were detected at concentrations listed above in shallow soil samples collected from below the concrete of the vault floor. Concentrations of diesel decreased significantly with depth. No release was observed associated with the UST near the parking lot.

Three ground water monitoring wells and one temporary well point were installed. No compounds of concern were detected in the soils during the drilling of the wells. No compounds of concern (except one detection of toluene at 2.5 ug/l) were detected in two rounds of quarterly ground water sampling.

It is estimated that less than 9 cubic yards of soil with diesel contamination remain in the soil in the vicinity of the vaulted diesel tanks.

DEPARTMENT OF ENVIRONMENTAL HEALTH LAND AND WATER QUALITY DIVISION P.O. BOX 129261, SAN DIEGO, CA 92112-9261 858-505-6700/1-800-253-9933 www.sdcdeh.org ELIZABETH POZZEBON ASSISTANT DIRECTOR

March 5, 2013

Mr. Sean Phillips Balfour Beatty Construction, Inc. 10620 Treena Steet, Suite 300 San Diego, California 92131

Dear Mr. Phillips:

CLOSURE LETTER VOLUNTARY ASSISTANCE PROGRAM #H39793-001 SAN DIEGO COUNTY LOS COLINAS WOMEN'S DETENTION FACILITY 9000 COTTONWOOD AVENUE, SANTEE, CALIFORNIA 92071

The County of San Diego, Department of Environmental Health (DEH), Site Assessment and Mitigation Program (SAM), reviewed the environmental reports related to the above-referenced property. The reports summarize site assessment and remedial work performed at the above-referenced location. Provided that the information presented to DEH/SAM was complete, accurate, and representative of existing site conditions, **this agency concurs that the cleanup goals established for the subject site have been met.** 

Please be advised that this letter does not relieve the responsible party of any liability under the *California Health and Safety Code* or the Porter Cologne Water Quality Control Act. Any change in the present use of the above site as a residential property may require reevaluation to determine if the change would pose a risk to public health.

Thank you for selecting the Department of Environmental Health as your lead agency to assist you with the progress of your environmental project. Please contact Carol Fenner of the Site Assessment and Mitigation Program at (858) 505-6896, if you require additional assistance.

Sincerely,

SCOTT WELDON, Program Manager Supervising Environmental Health Specialist Site Assessment and Mitigation Program

### III. SITE CHARACTERIZATION AND/OR INFORMATION (Continued)

H39793-001

COMMENTS:

A replacement facility for the Los Colinas Women's Detention Center is planned for a 30-acre property located south of the San Diego River in Santee, California, between Cottonwood and Magnolia Avenues. The property, which is owned by the County of San Diego (County), was formerly used as agricultural land and lies immediately east of the present facility. A portion of the County-operated Edgemoor Hospital occupied the east-central area of the property until it was demolished in 2012. Since the majority of the property had been used for agricultural purposes since the 1920s, the project Environmental Impact Report required testing site soils for the presence of organochlorine pesticides (OCPs). The County's grading contractor, Balfour Beatty Construction, Inc., entered the DEH Voluntary Assistance Program on June 14, 2012. A VAP case (#H39793-001) was opened to provided regulatory oversight and review services for the soil investigation.

Construction Testing & Engineering, Inc. (CTE) was retained to perform the soil investigation prior to bulk grading activities at the site. Historical aerial photographs and topographic maps were reviewed by CTE to develop a work plan for collection of soil samples. The work plan, which proposed the collection of 60 soil samples over a grid pattern and up to 10 judgmental soil samples in areas deemed to have had potential pesticide impacts, was approved by DEH on June 24, 2012.

Shallow test pits were excavated at the site by a backhoe to facilitate soil sample collection. Samples were collected from the sidewalls of the test pits at depths of 0 to 0.5, 1.5 to 2, and 3 to 3.5 feet below ground surface (bgs). Upon submittal to the laboratory, the samples were analyzed for OCPs and the metals arsenic, copper, lead, and mercury. OCPs were not detected in 43 of the soil samples collected from the 0 to 0.5-foot depth interval. Twelve OCPs were detected in the remaining unbiased and judgmental samples, primarily in samples collected from the 0 to 0.5-foot depth interval. 4,4-DDE, 4,4-DDT, dieldrin, and endrin were the most frequently detected OCPs.

OCP, copper, lead, and mercury concentrations detected in the soil samples were compared to residential California Human Health Screening Levels (CHHSLs) except for the concentrations of OCPs endosulfan I and heptachlor epoxide, which were compared to U.S. EPA Regional Screening Levels (RSLs). Arsenic levels in the soil samples were compared to regional background levels. None of the OCPs or metals detected exceeded its respective residential CHHSL or RSL and detected arsenic concentrations were less than the regional background level of 12 milligrams per kilogram (mg/kg).

Based on the analytical results for soil samples, CTE concluded that the residual OCP concentrations do not pose a human health risk to future residents of the women's detention replacement facility and that mitigation of OCP-impacted soils was not necessary. DEH concurred, but required implementation of a community health and safety plan (CHSP) during bulk grading activities to mitigate potential off-site impacts (e.g., fugitive dust, noise, storm runoff, traffic).

Implementation of the CHSP included establishing four temporary air monitoring points around the site perimeter prior to initiation of bulk grading at the site on September 4, 2012. A temporary weather station was also installed to measure wind speed and direction during grading activities. Daily air particulate samples were collected at the four monitoring points during the initial week of bulk grading and analyzed for OCPs. No OCPs were detected in the samples. Subsequent air particulate sampling was performed on a weekly basis at each monitoring point. These samples were archived in the event off-site impacts were reported, but no such reports were received.

Bulk grading at the site was completed on December 3, 2012, and the air monitoring equipment was decommissioned. CTE submitted a final report recommending no further action and case closure. DEH concurs with the consultant's recommendations.

Sree Gopinath is a California-Registered Civil Engineer with over 20 years professional experience providing environmental engineering and consulting services in San Diego County. Sree is experienced in hazardous materials technical studies, Phase 1, Phase 2, remedial investigations, remedial design, risk assessment, remediation construction, and environmental monitoring during construction. Sree also has experience performing studies in support of PEAs, Coastal Development Permits, and 401/404 permits. Sree oversees migration of field and laboratory data into geospatial databases for integration with GIS on all projects.

# Representative Project Experience

Environmental Assessment and Research of Historical Sources of Contamination of Goodrich Aerostructures Facilities and Vicinity, Chula Vista, California.

Project Manager for preparing a Phase I Environmental Site Assessment (ESA) per ASTM E1527-13 and researching sources of contamination: historical waste disposal practices (discharge of PCB oils and untreated metal waste); and historical features such as drainage ditches, ponds, and incinerator. The studies were performed for the former South Campus facility, Parcel H-3, Sweetwater parcels, and the Shangri La parcels.

Environmental Assessment and Research of Historical Sources of Contamination of Bay Sediments in the Laurel-Hawthorn Embayment, San Diego Bay, California.

Project Manager for preparing a Phase I ESA and researching sources of contamination of Bay sediments. The study identified former aerostructure facilities and operations at Convair/GD, Teledyne-Ryan, Solar, and the Airport as potential sources based on historical practices/features and chemistry data from prior investigations.

Phase II Environmental Assessment and Remediation of Former UST Site, Automated Flight Service Center, Hawthorn Airport, Hawthorn, California.

Project Manager for completing a Phase II ESA and developing a Site Conceptual Model relating sources of contamination (former diesel tank and piping) to impacts in soil. Delineated the extent of contamination, prepared a remedial action work plan, and remediated the site by excavating 75 cubic yards of petroleum-impacted soil for disposal at a landfill facility. The site received No Further Action letter from the Los Angeles Department of Public Works and the RWQCB. Challenges included coordinating the remediation over the weekend so that the site tenant was not inconvenienced and performing the remediation in limited space.

# Outer Harbor Intermodal Terminal Construction, Port of Oakland, Oakland.

Risk Management Plan Consultant for the investigation and remediation of 133 sites regulated by DTSC and RWQCB. Reviewed plans for design and construction of OHIT infrastructure – Joint Utility Trench (communication and electrical); Storm Drain and Outfall; water lines, and railyards. Oversaw monitoring element of Risk Management Plan (screening for contaminated soil, sampling). Supported the remedial team with closure of Outer Harbor bay sediments (ecological risk assessment by others).

San Diego County Water Authority On-Call Site Assessment, San Diego County, California.

Project Manager for eight Phase I ESAs to assist the Water Authority with acquiring property or entering into Easement Agreements for widening the Second Aqueduct. Performed a Phase II ESA based on Recognized Environmental Conditions identified in a Phase I ESA for construction of a new Flow Control Facility in San Marcos, CA.

Brianne also has experience with environmental data review and compilation, Health and Safety Plan preparation, geologic mapping, and soil classification in accordance with USCS Soil Classification.

# Representative Project Experience

# HMTS for the Kearny Mesa Community Plan Update, San Diego, California

Prepared a Hazardous Materials Technical Study for the Kearny Mesa Community Plan Update in San Diego, California. The HMTS was prepared for a 4,000-acre Project area in accordance with the California Environmental Quality Act (CEQA) Statute and Guidelines, and consisted of researching and identifying hazardous materials release sites within the Project area and evaluating the significance of these releases to Project construction.

# Phase I Environmental Site Assessments, Multiple Clients, Southern California

Senior Staff Environmental Geologist and author of Phase I ESAs for multiple locations in Southern California in accordance with ASTM standards. Conducted site reconnaissance, evaluated the long-term history of commercial and industrial tenants in light of proposed redevelopment activities at various sites, researched former site uses, and prepared Phase I ESA reports with recommendations for further assessment.

# Metropolitan Transit System, 13th Street Light Rail Vehicle Maintenance Facility San Diego, California

Assisted with implementation of the facility's Storm Water Pollution Prevention Plan (SWPPP). The project included wet and dry season monitoring, sampling, an annual inspection for the comprehensive site compliance evaluation for potential pollutant sources, and reporting to comply with the facility's Regional Water Quality Control Board industrial storm water permit requirements.

# Cajon Valley Union School District, Magnolia Elementary School, El Cajon, California

Performed an indoor air quality (IAQ) study, soil vapor survey, and human health risk assessment at Magnolia Elementary School. The project was initiated in response to concerns that indoor air may be impacted with chlorinated hydrocarbons as a result of groundwater contaminants from an adjacent aerospace facility migrating into the school structures via vapor intrusion. The project was under regulatory oversight by the Department of Toxic Substances Control (DTSC).

# County of San Diego, Cedar and Kettner Development Project, San Diego, California

Senior Staff Geologist for the Cedar and Kettner Development Project. The site was historically occupied by Hercules Oil Refining Company and an automotive repair facility. Scope of services included: pre-characterization of soil; preparation of a Soil and Groundwater Management Plan (SGMP) Community and Contractor Health and Safety Plans; and construction field support implementing the SGMP and Health andSafety Plans at the site which was heavily contaminated with volatile organic compounds (VOCs) from previous site use.

# Sampling and Analysis Plan, Accident Prevention Plan for IR Site 1119, MCB Camp Pendleton, California

Prepared a Sampling and Analysis Plan (including the field sampling plan and quality assurance project plan) and Accident Prevention Plan for the installation of groundwater monitoring wells at Resource Conservation and Recovery Act (RCRA) Facility Assessment (RFA) IR Site 1119 at Marine Corps Base, Camp Pendleton, California.

Sampling Activities for Groundwater Investigation, IR Site 1120, MCB Camp Pendleton, California

Managed the coordination and execution of an investigation into potentially contaminated groundwater at IR Site 1120, including scheduling, coordinating sub-contractors, performing field sampling activities, notifying MCB personell, and IDW removal.
