1.0 INTRODUCTION

This Final Environmental Impact Report (FEIR) was prepared in accordance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines (Section 15132). The City of San Jacinto is the lead agency for the environmental review of the Envision San Jacinto – General Plan 2040 Project (General Plan, General Plan Update, or Project) and has the principal responsibility for approving the Project. This FEIR assesses the expected environmental impacts resulting from approval and adoption of the Envision San Jacinto – General Plan 2040 and responds to comments received on the Draft EIR.

Envision San Jacinto – General Plan 2040 is the overarching policy document that guides land use, housing, transportation, open space, public safety, community services, and other policy decisions throughout the City of San Jacinto and the Sphere of Influence (collectively referred to as the Study Area). The General Plan includes the eight elements mandated by State law, to the extent that they are relevant locally, including: Circulation, Conservation, Housing, Land Use, Noise, Open Space, Environmental Justice and Safety. General plans must also address the topics of climate change and resiliency planning, either as separate elements or as part of other required elements. At the discretion of each jurisdiction, the general plan may combine these elements and may add optional elements relevant to the physical features of the jurisdiction. The City may also address other topics of interest; this General Plan includes an element related to Economic Development. The General Plan Update sets out the goals, policies, and actions in each of these areas, serves as a policy guide for how the City will make key planning decisions in the future, and guides how the City will interact with the broader Riverside County, surrounding cities, and other local, regional, State, and federal agencies.

The General Plan Update contains the goals and policies that will guide future decisions within the Study Area. It also identifies implementation programs, in the form of actions, that will ensure the goals and policies in the General Plan Update are carried out. As part of the General Plan Update, the City and the consultant team prepared several support documents that serve as the building blocks for the General Plan Update and analyze the environmental impacts associated with implementing the General Plan Update.

Refer to Section 3.0 (Project Description) of the Draft EIR for a more comprehensive description of the details of the proposed Project.

1.1 PURPOSE AND INTENDED USES OF THE EIR

CEQA REQUIREMENTS FOR A FINAL EIR

This FEIR for the Envision San Jacinto – General Plan 2040 has been prepared in accordance with the California Environmental Quality Act (CEQA) and State CEQA Guidelines. State CEQA Guidelines Section 15132 requires that a FEIR consist of the following:

- the Draft Environmental Impact Report (Draft EIR) or a revision of the draft;
- comments and recommendations received on the Draft EIR, either verbatim or in summary;
- a list of persons, organizations, and public agencies commenting on the Draft EIR;

- the responses of the lead agency to significant environmental concerns raised in the review and consultation process; and
- any other information added by the lead agency.

In accordance with State CEQA Guidelines Section 15132(a), the Draft EIR are incorporated by reference into this Final EIR.

An EIR must disclose the expected environmental impacts, including impacts that cannot be avoided, growth-inducing effects, impacts found not to be significant, and significant cumulative impacts, as well as identify mitigation measures and alternatives to the proposed project that could reduce or avoid its adverse environmental impacts. CEQA requires government agencies to consider and, where feasible, minimize environmental impacts of proposed projects, and obligates them to balance a variety of public objectives, including economic, environmental, and social factors.

PURPOSE AND USE

The City of San Jacinto, as the lead agency, has prepared this EIR to provide the public and responsible and trustee agencies with an objective analysis of the potential environmental impacts resulting from adoption of the General Plan Update and subsequent implementation of projects consistent with the General Plan Update. The environmental review process enables interested parties to evaluate the proposed Project in terms of its environmental consequences, to examine and recommend methods to eliminate or reduce potential adverse impacts, and to consider a reasonable range of alternatives to the project. While CEQA requires that consideration be given to avoiding adverse environmental effects, the lead agency must balance adverse environmental effects against other public objectives, including the economic and social benefits of a project, in determining whether a project should be approved.

This EIR will be used as the primary environmental document to evaluate all subsequent planning and permitting actions associated with the General Plan Update. This EIR may also be used by other agencies within Riverside County. Responsible and trustee agencies that may use the EIR are identified in Section 2.0 of the Draft EIR.

1.2 ENVIRONMENTAL REVIEW PROCESS

The review and certification process for the EIR has involved, or will involve, the following general procedural steps:

NOTICE OF PREPARATION

The City of San Jacinto circulated a Notice of Preparation (NOP) of an EIR for the Project on December 17, 2020 to trustee and responsible agencies, the State Clearinghouse, and the public. A scoping meeting was held on January 6, 2021 utilizing teleconferencing and electronic means consistent with State Executive Order N-29-20. No public or agency comments on the NOP related to the EIR analysis were presented or submitted during the scoping meeting. However, during the 30-day public review period for the NOP, which ended on January 19, 2021, 10 written comment letters were received on the NOP. A summary of the NOP comments is provided in Section 1.0 of the Draft EIR. The NOP and all comments received on the NOP are presented in Appendix A of the Draft EIR.

NOTICE OF AVAILABILITY AND DRAFT EIR

The City of San Jacinto published a public Notice of Availability (NOA) for the Draft EIR on July 28, 2022, inviting comment from the general public, agencies, organizations, and other interested parties. The NOA was filed with the State Clearinghouse (SCH# 2020120312) and was published in the Press Enterprise pursuant to the public noticing requirements of CEQA. The Draft EIR was available for public review from July 28, 2022 through September 12, 2022. The Public Draft Envision San Jacinto – General Plan 2040 was also available for public review and comment during this time period.

The Draft EIR contains a description of the Project, description of the environmental setting, identification of the Project's direct and indirect impacts on the environment and General Plan policies and actions to reduce impacts to the extent feasible, as well as an analysis of Project alternatives, identification of significant irreversible environmental changes, growth-inducing impacts, and cumulative impacts. This Draft EIR identifies issues determined to have no impact or a less than significant impact, and provides detailed analysis of potentially significant and significant impacts. Comments received in response to the NOP were considered in preparing the analysis in this EIR.

RESPONSE TO COMMENTS/FINAL EIR

The City of San Jacinto received five comment letters regarding the Draft General Plan and Draft EIR from public agencies, organizations, and members of the public during the 45-day review period.

In accordance with CEQA Guidelines Section 15088, this Final EIR responds to the written comments received on the Draft EIR. The Final EIR also contains minor edits to the Draft EIR, which are included in Section 3.0, Errata. This document and the Draft EIR, as amended herein, constitute the Final EIR.

CERTIFICATION OF THE EIR/PROJECT CONSIDERATION

The San Jacinto City Council will review and consider the Final EIR. If the City Council finds that the Final EIR is "adequate and complete," then it may certify it in accordance with CEQA. The rule of adequacy generally holds that an EIR can be certified if:

- 1) The EIR shows a good faith effort at full disclosure of environmental information; and
- 2) The EIR provides sufficient analysis to allow decisions to be made regarding the proposed project in contemplation of environmental considerations.

Upon review and consideration of the Final EIR, the San Jacinto City Council may take action to approve, revise, or reject the Project. A decision to approve the Envision San Jacinto – General Plan 2040, for which this EIR identifies significant environmental effects, must be accompanied by written findings in accordance with State CEQA Guidelines Sections 15091 and 15093.

Policies and actions to mitigate potential environmental impacts have been incorporated into the Project, to the extent feasible. No additional mitigation is feasible or available, as described in Section 5.1 through 6.0 of the Draft EIR. The annual report on general plan status required pursuant to the Government Code will serve as the monitoring and reporting program for the Project.

1.3 ORGANIZATION OF THE FINAL EIR

This Final EIR has been prepared consistent with Section 15132 of the State CEQA Guidelines, which identifies the content requirements for Final EIRs. This Final EIR is organized in the following manner:

SECTION 1.0 – INTRODUCTION

Section 1.0 briefly describes the purpose of the environmental evaluation, identifies the lead agency, summarizes the process associated with preparation and certification of an EIR, and identifies the content requirements and organization of the Final EIR.

SECTION 2.0 – COMMENTS ON DRAFT EIR AND RESPONSES

Section 2.0 provides a list of commenters, copies of written comments made on the Draft EIR (coded for reference), and responses to those written comments.

SECTION 3.0 – ERRATA

Section 3.0 consists of minor revisions to the Draft EIR in response to comments on the Draft EIR. The revisions to the Draft EIR do not change the intent or content of the analysis or mitigation.

2.0 COMMENTS ON DRAFT EIR AND RESPONSES

2.1 INTRODUCTION

In accordance with the California Environmental Quality Act (CEQA) Guidelines, Section 15088, the City of San Jacinto, as the lead agency, has evaluated the comments received on the Public Review Draft Envision San Jacinto – General Plan 2040 Environmental Impact Report (Draft EIR) (State Clearinghouse No. 2020120312).

CEQA Guidelines Section 15088.5 states that: *New information added to an EIR is not “significant” unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the project’s proponents have declined to implement.*

Sections 2.0 and 3.0 of this Final EIR include information that has been added to the EIR since the close of the public review period in the form of responses to comments and/or errata. As noted below and in Section 3.0, no new significant information was provided on the Draft EIR during the comment period.

2.2 LIST OF COMMENTERS

Table 2-1 lists the comments on the Draft EIR that were submitted to the City during the 45-day public review period. The assigned comment letter, letter author, affiliation, if presented in the comment letter or if representing a public agency, and letter date are also listed.

Table 2-1
List of Commenters

Response Letter	Individual or Signatory	Affiliation	Date
A	Bonnie Bryant	San Manuel Band of Mission Indians	8/03/2022
B	Jill McCormick, M.A.	Quechan Indian Tribe	8/04/2022
C	Demian Boettcher, P.E.	Eastern Municipal Water District	9/12/2022
D	Bernadette Ann Brierty	Morongo Band of Mission Indians	9/14/2022
E	Jason Cohen, Esq.	Mitchell M. Tsai Attorney At Law; Southwest Regional Council of Carpenters	9/12/2022

2.3 COMMENTS AND RESPONSES

REQUIREMENTS FOR RESPONDING TO COMMENTS ON A DRAFT EIR

CEQA Guidelines Section 15088 requires that lead agencies evaluate and respond to all comments on the Draft EIR that regard an environmental issue. The written response must address the significant environmental issue raised and be detailed, especially when specific comments or suggestions (e.g., additional mitigation measures) are not accepted. In addition, the written response must be a good faith

and reasoned analysis. However, lead agencies only need to respond to significant environmental issues associated with the project and do not need to provide all the information requested by the commenter, as long as a good faith effort at full disclosure is made in the EIR (CEQA Guidelines Section 15204(a)).

CEQA Guidelines Section 15204 recommends that commenters provide detailed comments that focus on the sufficiency of the Draft EIR in identifying and analyzing the possible environmental impacts of the project and ways to avoid or mitigate the significant effects of the project, and that commenters provide evidence supporting their comments. Pursuant to CEQA Guidelines Section 15064, an effect shall not be considered significant in the absence of substantial evidence.

CEQA Guidelines Section 15088 also recommends that revisions to the Draft EIR be noted as a revision in the Draft EIR or as a separate section of the Final EIR. Section 3.0 of this Final EIR identifies all revisions to the Envision San Jacinto – General Plan 2040 Draft EIR.

RESPONSES TO COMMENT LETTERS

Written comments on the Draft EIR are reproduced on the following pages, along with responses to those comments. To assist in referencing comments and responses, the following coding system is used:

- a) Each comment letter is lettered (i.e., Letter A), each comment within each letter is numbered (i.e., A-1, A-2, etc.), and each response is numbered correspondingly (i.e., A-1, A-2, etc.).

If changes to the Draft EIR text result from the response to comments, those changes are included in the response and identified with revisions marks (underline for new text, ~~strike out~~ for deleted text).

Dear Mr. Randel,

Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above-referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by the Cultural Resources Management Department on August 2, 2022. The proposed project is located outside of Serrano ancestral territory and, as such, SMBMI will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates.

San Jacinto, CA 92583

Subject: City of San Jacinto General Plan Update

Dear Mr. Randel:

Eastern Municipal Water District (EMWD) thanks you for the opportunity to review Draft EIR for the General Plan Update for the City of San Jacinto. The City of San Jacinto is located in EMWD's San Jacinto Valley water service area and spans portions of the 1719, 1807 and 1940 pressure zones. The subject area is also within EMWD's sewer service area with flows from the City of San Jacinto tributary to EMWD's San Jacinto Valley Regional Water Reclamation Facility (SJVRWRF). Under the proposed General Plan Update, the General Plan land use map would be revised to make changes to land use designations for some parcels in the area which will impact EMWD's water, wastewater and recycled water infrastructure.

C-1

EMWD offers the following comments:

These proposed land use changes will impact EMWD's water, wastewater and recycled water systems. These land-use changes were not considered as part of the EMWD's wastewater or potable water master plans which were completed in 2015. If these changes are approved, they will be incorporated into EMWD's future planning efforts to better understand and quantify their impacts to EMWD's water, wastewater and recycled water systems.

C-2

At the local level, as individual projects move forward under the new land use, developers will need to contact EMWD to determine the availability of water and sewer service and coordinate the construction of local infrastructure to serve their respective developments.

Project Title: City of San Jacinto General Plan Update

Project Location: San Jacinto City limits and Sphere of Influence

Project Description: The City of San Jacinto is preparing a comprehensive update to its existing General Plan, which was last comprehensively updated in 2006. The updated San Jacinto General Plan is scheduled to be considered for adoption in 2022 and will guide the City's development and conservation through land use objectives and policy guidance. The General Plan Update is intended to be an expression of the community's vision for the City and Study Area and constitutes the policy and regulatory framework by which future development projects will be reviewed and public improvements will be implemented. The City will implement the General Plan Update by requiring development, infrastructure improvements, and other projects to be consistent with its policies and by implementing the actions included in the General Plan Update.

The General Plan Update will include a comprehensive set of goals, policies, and actions (implementation measures), organized into Elements, as well as a revised Land Use Map. The goals and policies provide guidance to the City on how to direct change, manage growth, and manage resources over the 20-year life of the General Plan.

The General Plan Update includes the eight elements mandated by State law, including: Circulation, Conservation, Housing, Land Use, Noise, Open Space, Environmental Justice and Safety. General plans must also address the topics of climate change and resiliency planning, either as separate elements or as part of other required elements. At the discretion of each jurisdiction, the general plan may combine these elements and may add optional elements relevant to the physical features of the jurisdiction. The City may also address other topics of interest; this General Plan Update includes an element related to Economic Development.

While no specific development projects are proposed as part of the San Jacinto General Plan Update, the General Plan Update will accommodate future growth in San Jacinto, including new businesses, expansion

of existing businesses, and new residential uses. The buildout analysis assumes a 20-year planning horizon (the level of development that could reasonably be expected by the year 2040), while the year 2060 is assumed to be the full buildout year of the General Plan (the point at which all parcels in the City are developed according to their General Plan land use designation). The 20-year planning horizon (2040) represents approximately 50 percent of total buildout; this expected pace of growth is based on historical development patterns in and around San Jacinto and development trends projected for Western Riverside County.

Consistent with the proposed General Plan Land Use Map, new growth is anticipated to occur at infill locations within existing urbanized areas of the City, as well as new growth adjacent to existing urbanized areas; refer to Figure 1, attached. Buildout of the General Plan could yield a total of up to 32,081 housing units, a population of 107,152 people, 24,413,227 square feet of non-residential building square footage, and 26,986 jobs within the Study Area. This represents development growth over existing conditions of up to 16,252 new housing units, 54,280 people, 21,839,634 square feet of new non-residential building square footage and 19,674 jobs.

The Draft Environmental Impact Report provides a review of environmental effects associated with implementation of the proposed General Plan Update. When considering approval of subsequent activities under the proposed General Plan Update, the City of San Jacinto would utilize this EIR as the basis in determining potential environmental effects and the appropriate level of environmental review, if any, of a subsequent activity. Projects or activities successive to this EIR may include, but are not limited to, the following:

- Approval and funding of major projects and capital improvements;
- Future Specific Plan, Planned Unit Development, or Master Plan approvals;
- Revisions to the San Jacinto Municipal Code (Title 8 – Health and Safety, Title 16 – Subdivisions, and Title 17 – Zoning) Update;
- Development plan approvals, such as tentative subdivision maps, variances, conditional use permits, and other land use permits;
- Development Agreements;
- Property rezoning consistent with the General Plan;
- Permit issuances and other approvals necessary for public and private development projects; and
- Issuance of permits and other approvals necessary for implementation of the General Plan.

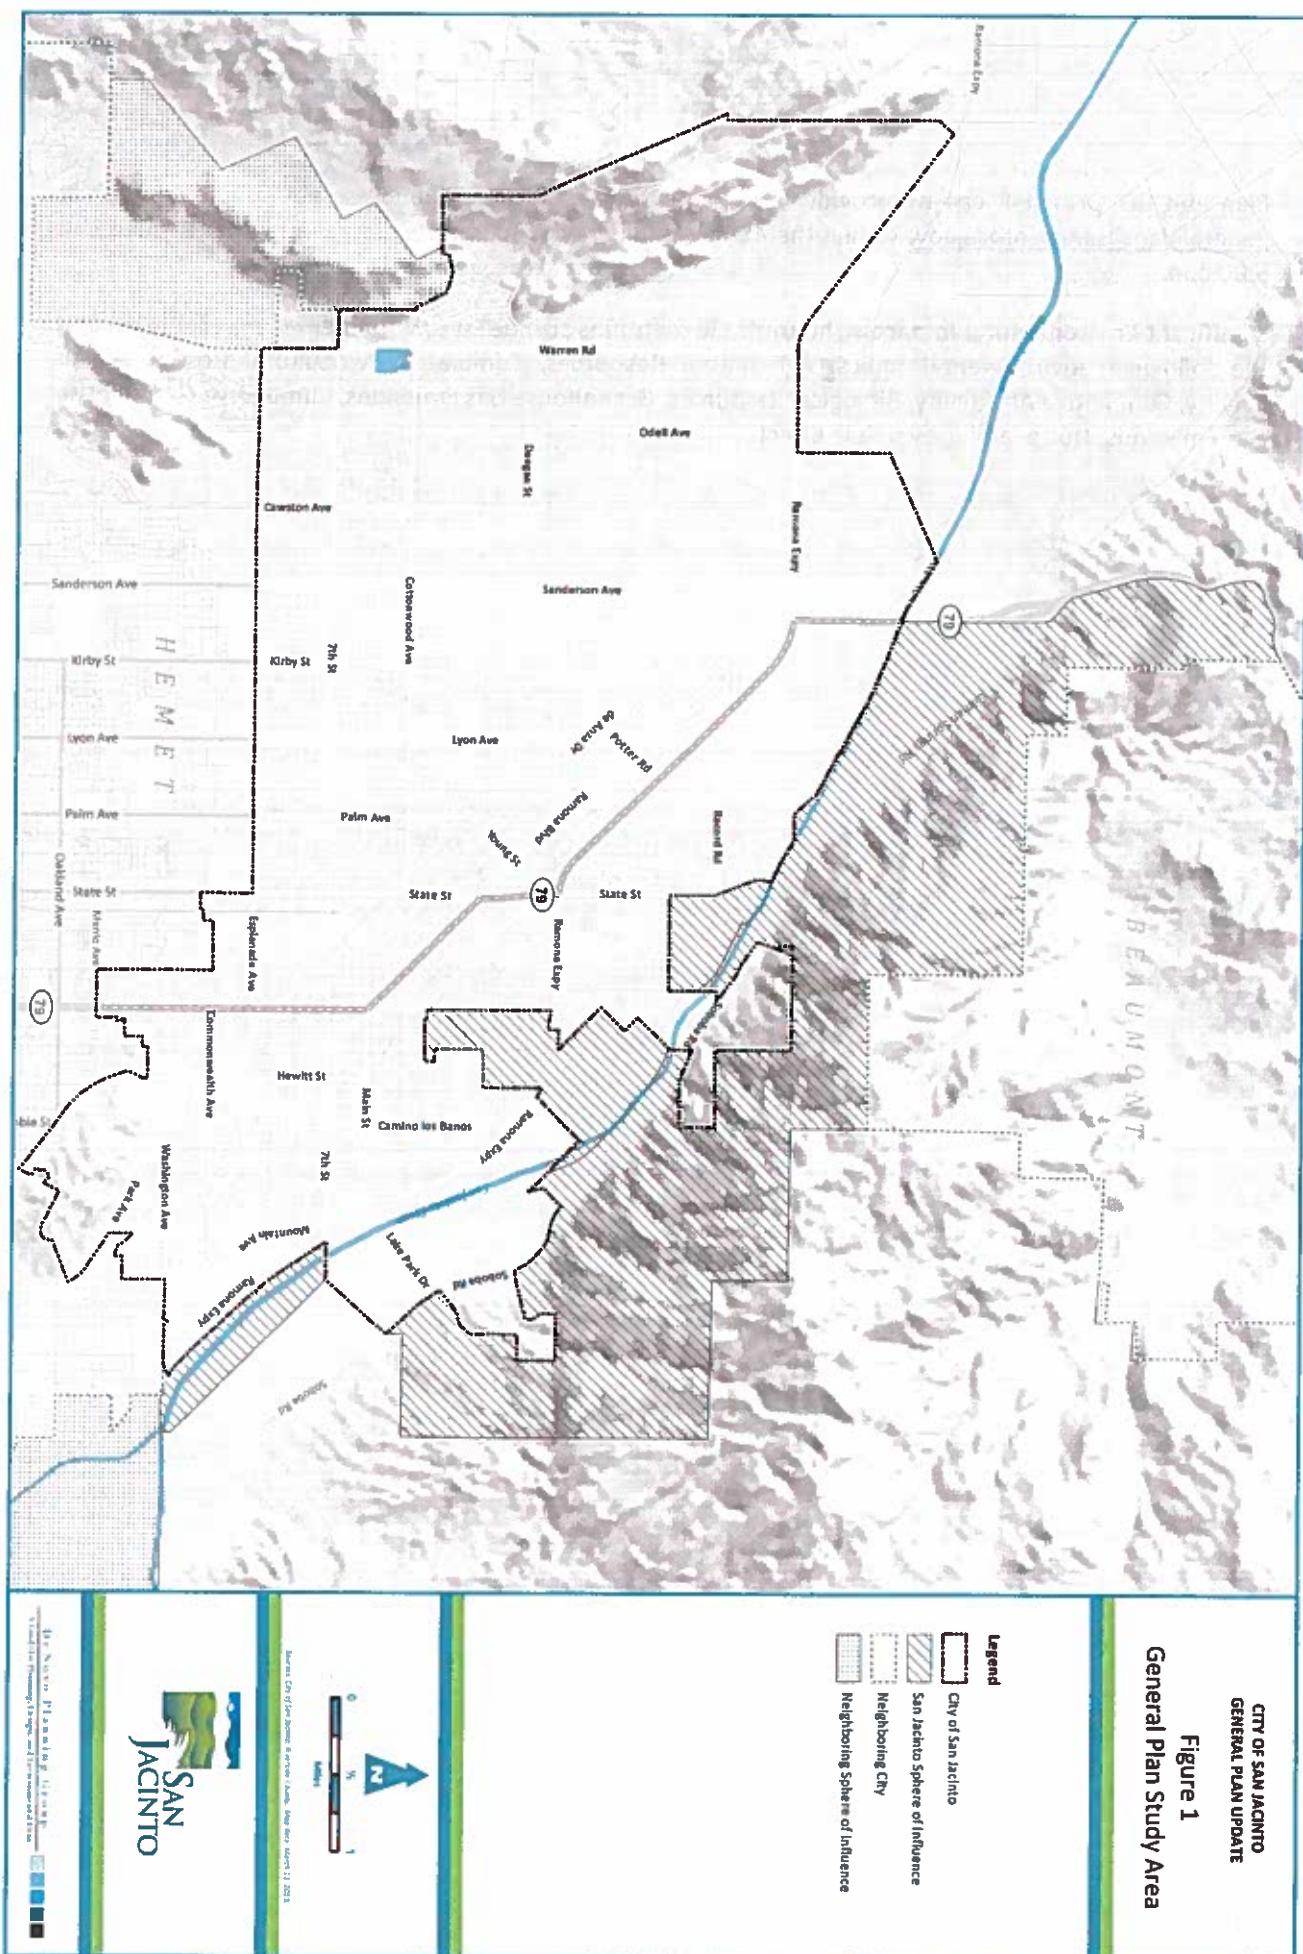

Public Review: 45 days, extending from July 28, 2022 to September 12, 2022 at 5:00 p.m.

Document Availability: The Draft EIR and the San Jacinto General Plan are available for review at the City of San Jacinto City Hall, 595 S. San Jacinto Avenue, San Jacinto, CA 92583; The City of San Jacinto Library, 595 S. San Jacinto Avenue, San Jacinto, CA 92583, and the San Jacinto Community Center, 625 Pico Avenue, San Jacinto, CA 92583 in addition to online at <https://sanjacinto.generalplan.org/>.

Provision of Comments: Members of the public and other interested agencies and individuals are invited to provide comments on the San Jacinto General Plan and Draft EIR. Comments on the San Jacinto General

Plan and the Draft EIR can be provided in writing to the City at the address above, or by email at generalplan@sanjacintoca.gov, during the 45-day public review period, ending September 12, 2022 at 5:00 p.m.

Significant Environmental Impacts: The Draft EIR identifies significant environmental impacts related to the following environmental topics: Agricultural Resources, Cumulative Agricultural Resources, Air Quality, Cumulative Air Quality, Biological Resources, Greenhouse Gas Emissions, Cumulative Greenhouse Gas Emissions, Noise, and Irreversible Effects.

Response to Comment Letter C

Demian Boettcher, P.E.
Eastern Municipal Water District
September 12, 2022

- C-1 This introductory paragraph states that portions of the Project area are within EMWD water service area and spans portions of the 1719, 1807, and 1940 pressure zones. Additionally, the Project area is also within EMWD's sewer service area with flows tributary to EMWD's San Jacinto Valley Regional Water Reclamation Facility (SJVRWRF). The comment further states the proposed changes to the General Plan land use map for some parcels will impact EMWD's water, wastewater and recycled water infrastructure. The comment is introductory in nature and does not contain any information requiring changes to the Draft EIR. The comment is noted and no further response is warranted.
- C-2 The comment states the proposed land use changes will impact EMWD's water, wastewater, and recycled water systems and that the proposed land use changes were not considered as part of EMWD's wastewater or potable water master plans which were completed in 2015. The comment further notes that if approved, the changes will be incorporated into EMWD's future planning efforts to better understand and quantify impacts to EMWD's water, wastewater and recycled water systems. The comment is noted. The General Plan includes policies and actions that require the City cooperate with the water districts to update population projections, water use and sewer formulas, needed improvements, and programs within the Water and Sewer Master Plans at least every five years. The comment does not contain any information requiring changes to the Draft EIR. No further response is warranted.
- C-3 This comment states that as individual projects move forward under the new land use, developers will need to contact EMWD to determine the availability of water and sewer service and coordinate the construction of local infrastructure to serve the respective developments. The General Plan includes policies and actions to ensure that adequate water supplies and sewage treatment facilities are provided and maintained, including ensuring service providers are consulted during the development review process regarding the potential impact on water supplies and sewage treatment facilities. By practice, the City requires Will-Serve letters for both water and sewer for all new development projects, confirming adequate supply and facilities are available to serve the development being proposed at that time. The comment is noted and does not contain any information requiring changes to the Draft EIR. No further response is warranted.

RE: NOA EIR General Plan Update for General Plan Update for 2040

The Morongo Band of Mission Indians (Tribe/MBMI) Tribal Historic Preservation Office received the San Jacinto (City) letter regarding the above referenced project on 8/4/2022. The proposed General Plan Update for 2040 (Project) is located within the ancestral territory and traditional use area of the Cahuilla and Serrano people of the Morongo Band of Mission Indians.

The Project proposes a General Plan Update for 2040 to update current land use(s) and guide future development within the City of San Jacinto Land Use Area.

MBMI acknowledges that the Project (as proposed) only proposes changes to the City of San Jacinto Land Use Maps, and, at this time, no construction or physical alterations of lands are proposed or authorized under this Project.

As such, MBMI THPO does not have any comments at this time on the City of San Jacinto General Plan Update. However, any construction or alterations within the Land Use Area will be of interest of MBMI THPO under Senate Bill (SB) 18 (California Civil Code §65352) and/or Assembly Bill (AB) 52 California Public Resources Code §21080.

We look forward to working with the City of San Jacinto in the future to protect irreplaceable cultural resources.

This letter does not waive any rights under AB-52 to engage in additional review and meaningful government-to-government consultation on projects or permits which may be proposed in the future under the General Plan Update for 2040.

The lead contact for this Project is Bernadette Ann Brierty, Tribal Historic Preservation Officer (THPO). MBMI Cultural Resource Specialist Laura Chatterton, will be assisting the Tribe in the review of this project. Please do not hesitate to contact us at ABrierty@morongo-nsn.gov, THPO@morongo-nsn.gov, Ichatterton@morongo-nsn.gov or (951) 663-2842, should you have any questions. The Tribe looks forward to future meaningful government-to-government consultation with the City of San Jacinto.

Response to Comment Letter D

Bernadette Ann Brierty
Morongo Band of Mission Indians
September 12, 2022

- D-1 The comment states the proposed Project is located within the ancestral territory and traditional use area of the Cahuilla and Serrano people of the Morongo Band of Mission Indians. The comment articulates that the Morongo Band of Mission Indians acknowledges that the proposed Project only proposes changes to the land use map and, at this time, no construction or physical alterations of lands are proposed or authorized under this Project. The comment does not contain any information requiring changes to the Draft EIR. The comment is noted and no further response is warranted.
- D-2 This comment notes that while the Morongo Band of Mission Indians does not have any comments at this time, that any construction or alterations with the Land Use area will be of interest to the tribe under Senate Bill (SB) 18 and/or Assembly Bill (AB) 52 and the letter does not waive any rights under AB 52 to engage in additional review and meaningful consultation on projects or permits which may be proposed in the future under the General Plan Update. The comment provides the lead contacts and associated contact information. The comment does not contain any information requiring changes to the Draft EIR. The comment is noted and no further response is warranted.

RE: City of San Jacinto's General Plan Update (SCH#: 2020120312).

Dear Travis Randel,

On behalf of the Southwest Regional Council of Carpenters (“**Southwest Carpenters**” or “**SWRCC**”), my Office is submitting these comments for the City of San Jacinto’s (“**City**”) General Plan Update (“**Project**”) Draft Environmental Impact Report (“**DEIR**”).

The Southwest Carpenters is a labor union representing 57,000 union carpenters in six states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Individual members of the Southwest Carpenters live, work, and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Southwest Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Southwest Carpenters incorporates by reference all comments raising issues regarding the Environmental Impact Report (EIR) submitted prior to certification of the EIR for the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225

E-1

Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

Moreover, the Southwest Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

The City should require the use of a local skilled and trained workforce to benefit the community's economic development and environment. The City should require the use of workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire and skilled and trained workforce requirements can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Skilled and trained workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce

Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Furthermore, local skilled and trained workforce requirements and policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that the “[u]se of a local state-certified apprenticeship program or a skilled and trained workforce with a local hire component” can result in air pollutant reductions.²

Cities are increasingly incorporating local skilled and trained workforce policies and requirements into general plans and municipal codes. For example, the City of Hayward’s 2040 General Plan requires the city to “promote local hiring . . . to help achieve a more positive jobs-housing balance, and reduce regional commuting, gas consumption, and greenhouse gas emissions.”³

The City of Hayward has even gone as far as incorporating a Skilled Labor Force policy into its Downtown Specific Plan and municipal code, requiring developments in its downtown area to require that the City “[c]ontribute to the stabilization of regional construction markets by spurring applicants of housing and nonresidential developments to require contractors to utilize apprentices from state-approved joint

labor-management training programs[.]”⁴ The City of Hayward mandates the same measure on all projects that are 30,000 square feet or larger.⁵

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.⁶

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁷ Some municipalities have even tied local hire and skilled and trained workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \sum(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at:

http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	
	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

¹⁴ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44				
CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006		

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44		CH4 Intensity (lb/MWhr)	0.029	
				N2O Intensity (lb/MWhr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44				
CH4 Intensity (lb/MWhr)	0.029				
N2O Intensity (lb/MWhr)	0.006				

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44		CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)
	0.006				

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44				
CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006		

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44		CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)
	0.006				

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

EXHIBIT B

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS "Conti Perdido" *Defendant*.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosciences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sessler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Other Experience:

Selected as subject matter expert for the California Professional Geologist licensing examination, 2009-2011.

Response to Comment Letter E

Jason Cohen, Esq.

Mitchell M. Tsai Attorney At Law; Southwest Regional Council of Carpenters

September 12, 2022

- E-1 This comment provides introductory information about the Southwest Regional Council of Carpenters and their purpose for submitting comments to the Draft EIR. The commenter notes the right to supplement these comments and incorporates by reference all comments raising issues regarding the EIR submitted prior to certification of the EIR. The comment further requests the City provide notice for any and all notices referred or related to the Project. The comment is noted and no further response is warranted.
- E-2 This comment states that the City should require the use of a local skilled and trained workforce to benefit the community's economic development and environment and further describes benefits of hiring local, providing examples of studies and other communities incorporating local skilled and trained workforce policies into their general plans, including attachments. The comment is noted; the comment does not challenge the adequacy of the Draft EIR and no further response is warranted. It is noted that a majority of City residents leave the City for employment and the objectives of Envision San Jacinto – General Plan 2040 include attracting and retaining businesses and industries that provide jobs for local residents and creating a more balanced jobs-housing ratio within the community. By providing additional development opportunities through implementation of the General Plan, it is anticipated residents will benefit from increased opportunities to work locally.

3.0 ERRATA

This section includes any changes to the Draft EIR. The revisions herein do not result in new significant environmental impacts, do not constitute significant new information, and do not alter the conclusions of the environmental analysis that would warrant recirculation of the Draft EIR pursuant to State CEQA Guidelines Section 15088.5.

Changes to the Draft Environmental Impact Report (EIR) are noted below and are listed by page and, where appropriate, by paragraph. Changes are provided with double underline for new text and ~~strike through~~ for deleted text.

SECTION 1.0, EXECUTIVE SUMMARY

As described under Section 3.0, Project Description, below, the proposed General Plan Land Use Map (Draft EIR Figure 3-4) has been revised, resulting in minor modifications to the growth assumptions identified throughout the Draft EIR.

Draft EIR Table 1-1, General Plan Update Growth Assumptions, has been modified in the Final EIR as follows:

Table 1-1
General Plan Update Growth Assumptions

Description	Housing Units	Population	Non-Residential Development (Square Feet)	Jobs
Existing Conditions (2020)	15,830	52,872	2,573,593	7,312
2040 General Plan	<u>32,092</u> 32,081	<u>107,187</u> 107,152	<u>24,367,961</u> 24,413,227	<u>26,978</u> 26,986
Net Change	<u>+16,262</u> +16,252	<u>+54,315</u> +54,280	<u>+21,792,603</u> +21,839,634	<u>+19,666</u> +19,674

Draft EIR Page 1-6, Section 1.6, Summary of Project Alternatives, has been modified in the Final EIR as follows:

The development anticipated by the No Project General Plan Alternative would result in the following when compared to the General Plan Update:

- 9,800 ~~9,789~~ fewer dwelling units;
- 32,732 ~~32,697~~ fewer residents;
- 6,398,773 ~~6,440,729~~ fewer nonresidential square feet of development; and

- 6,558 6,566 fewer jobs.

Draft EIR Pages 1-6 through 1-7, Section 1.6, Summary of Project Alternatives, has been modified in the Final EIR as follows:

The development anticipated by the Reduced Growth General Plan Alternative would result in the following when compared to the General Plan Update:

- 4,350 4,339 fewer dwelling units;
- 14,528 14,493 fewer residents;
- 746,568 788,524 fewer nonresidential square feet of development; and
- 3,036 3,044 fewer jobs.

Draft EIR Page 1-7, Section 1.6, Summary of Project Alternatives, has been modified in the Final EIR as follows:

The development anticipated by the Employment Focused General Plan Alternative would result in the following when compared to the General Plan Update:

- 12,660 12,649 fewer dwelling units;
- 42,285 42,250 fewer residents;
- 4,046,008 4,087,964 fewer nonresidential square feet of development; and
- 6,339 6,347 fewer jobs.

SECTION 3.0, PROJECT DESCRIPTION

The proposed General Plan Land Use Map (Draft EIR Figure 3-4) has been revised to correct inconsistencies between existing development and the existing land use designations for several parcels, identified below. The revised Draft EIR Figure 3-4, General Plan Update Land Use Map is included at the end of this section.

APN	Existing Use	Draft EIR General Plan Land Use	Revised General Plan Land Use

The following Draft EIR tables (Table 3-2, Table 3-3, Table 3-4, and Table 3-5) have been modified in the Final EIR to reflect the proposed changes to the land use designations of the parcels identified above. The land use designation modifications result in minor changes to the General Plan 2040 buildout and growth assumptions and do not result in any changes to the impact analysis and conclusions.

Draft EIR Table 3-2, Proposed General Plan Land Use Designations, has been modified in the Final EIR as follows:

Table 3-1
Proposed General Plan Land Use Designations

General Plan Land Use Designations	Acres	% of Total Acres
Very Low Density Residential (VLDR)	1,073.39	5%
Low Density Residential (LDR)	4,025.06	18%
Medium Density Residential (MDR)	<u>1,364.23</u> 1,365.88	6%

Draft EIR Table 3-5, General Plan Update Growth Assumptions, has been modified in the Final EIR as follows:

Table 3-5
General Plan Update Growth Assumptions

Description	Housing Units	Population	Non-Residential Development (Square Feet)	Jobs
Existing Conditions (2020)	15,830	52,872	2,573,593	7,312
2040 General Plan	<u>32,092</u> 32,081	<u>107,187</u> 107,152	<u>24,367,961</u> 24,413,227	<u>26,978</u> 26,986
Net Change	<u>+16,262</u> +16,252	<u>+54,315</u> +54,280	<u>+21,792,603</u> +21,839,634	<u>+19,666</u> +19,674

SECTION 4.0, CUMULATIVE ANALYSIS

Draft EIR Page 4-3, Section 4-2, Cumulative Analysis in this EIR, has been modified in the Final EIR, as follows:

As indicated in Section 3.0, Project Description, the City is forecast to have approximately 32,092 32,081 housing units by 2040 buildout, which would result in an approximate population of 107,187 107,152 persons. Therefore, the General Plan Update would facilitate the addition of 16,262 16,252 housing units through 2040 and would result in a population growth of approximately 54,315 54,280 persons in the City.

SECTION 5.11, LAND USE AND PLANNING

Draft EIR Page 5.11-11, Section 5.11.4, Impacts and Mitigation Measures, has been modified in the Final EIR, as follows:

Based on the proposed land use designations, density and intensity permitted for each parcel, and associated development assumptions, the proposed land plan would increase development over existing (2020) conditions by 16,262 16,252 additional dwelling units and 1,792,603 21,839,634 additional square feet of non-residential uses; refer to Table 3-6.

Draft EIR Page 5.11-20, Impact LU-2, has been modified in the Final EIR as follows:

The property owners of the Villages SP have expressed interest to the City in submitting a future amendment to the Specific Plan to remove the planned residential component and allow for a broader range of nonresidential uses, including business park and industrial-type development. The General Plan Update Land Use Map (Figure 3-4) maintains the land use designation of “Specific Plan” for the Villages SP. Given the future land use changes expected to be proposed to the Villages SP, the General Plan 2040 Buildout (Table 3-4) analyzes the Villages SP area as developing with exclusively nonresidential uses (approximately 5 million square feet of development). It is noted that citywide, the land uses considered under the proposed General Plan Update Land Use Map would increase the total residential development

capacity in the City by a net 9,519 9,509 units (from 21,095 units under the existing General Plan, inclusive of the current residential development potential at the Villages SP, to 30,614 30,604 units under the proposed General Plan Update Land Use Map which does not consider any residual development in the Villages SP). The increased development potential allowed under the proposed General Plan Land Use Map would more than replace the 1,322 units currently approved for the Villages SP, should those units be removed from the development potential of the Villages SP at some point in the future.

SECTION 5.14, POPULATION AND HOUSING

Draft EIR Page 5.14-7, Impact POP-1, has been modified in the Final EIR as follows:

Impact Analysis: The proposed General Plan Update accommodates future growth in San Jacinto, including new businesses, expansion of existing businesses, and new residential uses. Infrastructure and services would need to be extended to accommodate future growth. At 2040 buildout, the proposed General Plan Update could accommodate approximately 16,262 16,252 new housing units and 21,792,603 21,839,634 square feet of new non-residential building square footage within the Study Area compared to existing conditions, as shown in Table 3-6 in Section 3.0. This new growth may increase the City's population by approximately 54,315 54,280 residents and 19,666 19,674 jobs compared to the existing condition.

Draft EIR Table 5.14-6 and subsequent text, have been modified in the Final EIR as follows:

Table 5.14-6
General Plan Update Compared to SCAG

Forecast Category	2040 General Plan Update	SCAG 2045 Growth Forecast	GPU Difference	Percent Change
Population	<u>107,187</u> 107,152	69,900	<u>37,287</u> 37,252	53.3%
Households	<u>29,172</u> 29,162 ¹	25,000	<u>4,172</u> 4,162	16.76%
Dwelling Units	<u>32,092</u> 32,081	27,275 ¹	<u>4,817</u> 4,806	17.76%
Employment	<u>26,978</u> 26,986	13,100	<u>13,878</u> 13,886	106.0%
Notes:				
1. Based on 9.1% vacancy rate (California Department of Finance).				

As indicated in Table 5.14-6, SCAG projects that the City's population will reach 69,900 persons by 2045. The General Plan Update is projected to result in a population of approximately 107,187 107,152 persons (2040). The City's projected population would be approximately 53.3 percent greater than SCAG's forecast. Similarly, the City's projected housing stock and employment would be approximately 16.76 percent and 106 percent greater than SCAG forecasts, respectively. As discussed above, the SCAG

projections, which are compiled using a number of sources including adopted plans, historical trends, and interviews with local jurisdictions, tend to be more accurate on a regional level than on a local or city level. It is likely that through a combination of market changes, catalytic projects, updated land use direction in the General Plan, and other factors, San Jacinto could capture either more or less of expected regional growth than forecasted by SCAG.

SECTION 5.15, PUBLIC SERVICES

Draft EIR Page 5.15-15, Impact PS-1, has been modified in the Final EIR as follows:

Impact Analysis: Development accommodated under the General Plan Update would result in additional residents and businesses in the City. Based on the anticipated growth, as described in Section 3.0, Project Description, and summarized in Table 3-4, General Plan 2040 Buildout by Land Use Designation, 2040 buildout under the General Plan Update could yield a net change over existing conditions of an additional 16,262 ~~16,252~~ housing units, an additional population of 54,315 ~~54,280~~ people, an additional 21,792,603 ~~21,839,634~~ square feet of non-residential building square footage, and an additional 19,666 ~~19,674~~ jobs within the Study Area.

Draft EIR Page 5.15-24, Impact PS-3, has been modified in the Final EIR as follows:

Impact Analysis: Implementation of the General Plan Update could result in the development of up to 16,262 ~~16,252~~ dwelling units (estimated reduction of 519 single-family units and an increase of 16,781 ~~16,771~~ multi-family units) over existing conditions. All new dwelling units are assumed to be multi-family units as the total number of single-family units are anticipated to decrease due to redevelopment with implementation of the General Plan Update. School districts typically use student generation factors to determine the potential number of students that would be generated by the amount of residential development in order to accurately anticipate the needs for new/expanded facilities. Table 5.15-5, San Jacinto School Unified School District, identifies the number of potential students that would be generated from development anticipated by the General Plan Update in 2040.

Table 5.15-5
San Jacinto Unified School District Student Generation Rates

Grade Level	Student Generation Factor		Proposed Net Increase Dwelling Units	Total Students Generated	Existing Excess/ (Shortage) Capacity	Able to Accommodate Project?
	Single-Family	Multi-Family				
Elementary School	0.3352	0.3362	<u>16,262</u> 16,252	<u>5,464</u> 5,463	(664)	No
Middle School	0.1652	0.1608	<u>16,262</u> 16,252	<u>2,615</u> 2,613	(34)	No
High School	0.2165	0.1734	<u>16,262</u> 16,252	<u>2,820</u> 2,818	382	No
Total	0.7169	0.6704	<u>16,262</u> 16,252	<u>10,915</u> 10,895	(316)	No

Source: Koppel & Gruber, *San Jacinto Unified School District School Fee Justification Study*, March 2020.

Assuming all new development anticipated under the proposed General Plan Update occurs within SJUSD's school boundary, the Project would generate approximately 10,915 ~~10,895~~ students (5,464 ~~5,463~~ elementary school students, 2,615 ~~2,613~~ middle school students, and 2,820 ~~2,818~~ high school students). As shown in Table 5.15-5, SJUSD does not currently have excess capacity at the elementary or middle school levels, or have excess capacity overall. The high schools have an excess capacity of 382 seats, but as shown, that capacity is not sufficient for future growth assumed under the General Plan Update. As such, based on the conservative assumption that all 16,262 ~~16,252~~ residential units would be constructed within SJUSD's school boundary, SJUSD would not be able to adequately accommodate the increase in student population. Therefore, new facilities would need to be created, or existing facilities would need to be expanded, to accommodate for future population growth. As mentioned above, the SJUSD currently has plans to expand facilities within the next ten years.

Draft EIR Page 5.15-30, Section 5.15.5, Cumulative Impacts, has been modified in the Final EIR, as follows:

Impact Analysis: Development accommodated under the General Plan Update would result in additional residents and businesses in the City, including new residential, industrial, office, and commercial uses. Based on the anticipated growth, as described in Section 3.0, Project Description, and summarized in Table 3-4, General Plan 2040 Buildout by Land Use Designation, 2040 buildout under the General Plan Update could yield a net change over existing conditions of an additional 16,262 ~~16,252~~ housing units, an additional population of 54,315 ~~54,280~~ people, an additional 21,792,603 ~~21,839,634~~ square feet of non-residential building square footage, and an additional 19,666 ~~19,674~~ jobs within the Study Area.

SECTION 5.16, RECREATION

Draft EIR Page 5.16-7, Impact REC-1, has been modified in the Final EIR as follows:

Impact Analysis: According to Table 3-1, Existing General Plan Land Use Designations of Section 3.0, Project Description, there are currently 177 ~~176~~ acres designated as Park and 322 ~~321~~ acres designated as Open Space-Recreational. Based on the anticipated growth, as described in Section 3.0, and summarized in Table 3-4, General Plan 2040 Buildout by Land Use Designation, 2040 buildout under the General Plan Update could yield a net change over existing conditions of an additional 16,262 ~~16,252~~ housing units, an additional population of 54,315 ~~54,280~~ people, an additional 21,792,603 ~~21,839,634~~ square feet of non-residential building square footage, and an additional 19,666 ~~19,674~~ jobs within the Study Area. These new residents are expected to use park and recreational facilities, and this additional use may result in greater demands on parks and recreational facilities in the Study Area such that deterioration of these facilities could occur or be accelerated. The additional demand on existing parks and recreational facilities would increase the need for maintenance and improvements. These improvements could have environmental impacts, although the exact impacts cannot be determined since the potential improvements are currently unknown.

The provision of new parks and recreation facilities would reduce the potential for adverse impacts and physical deterioration of existing parks and recreation facilities, by providing additional facilities to accommodate the demand for parks and recreation facilities. These new facilities would be provided at a pace and in locations appropriate to serve new development, as required to maintain the City adopted standard for park space acreage at five acres for every 1,000 residents. Table 5.16-2, Required Parkland Dedication, shows the required parkland dedication to meet the City's standard of five acres per 1,000 people.

Table 5.16-2
Required Parkland Dedication

Existing Conditions (2020)				2040 General Plan Update	
Population	Parkland Acreage	Required Parkland	Parkland Deficit	Net Population Growth	Required Parkland
52,872	179.2	264.36	85.16	+ <u>54,315</u> 16,252	<u>271.6</u> 271.4

Draft EIR Page 5.16-9 has been modified in the Final EIR as follows:

The City currently provides approximately 3.39 acres of parkland for every 1,000 people. The existing deficit in park land is currently being offset with the recreational opportunities available in two golf courses, the San Jacinto River Park, the Diamond Valley Lake recreational area, and other nearby regional parks. Based on the City's adopted standard of five acres per 1,000 residents, the increase in population due to implementation of the General Plan Update would require approximately 271.6 ~~271.4~~ acres of additional parkland, for a total of 535.94 ~~535.76~~ acres of parkland, assuming a population of 107,187 ~~107,152~~. It should be noted that new development would be required to fund its fair share for required parkland but would not make up for existing system deficiencies.

The General Plan Update includes 175 ~~176~~ acres of the Park land use designation and 6,189 ~~6,188~~ acres of the Open Space land use designation. The Open Space land use designation allows for hiking, biking and equestrian trails; and outdoor recreational facilities, it also allows for passive and active recreation sites operated by the City and regional agencies.

Draft EIR Page 5.16-13, Impact REC-2, has been modified in the Final EIR as follows:

Impact Analysis: The General Plan Update designates a total of 175 acres as Parks and 6,189 ~~6,188~~ acres as Open Space. No site-specific projects are proposed under the General Plan Update. Based on the anticipated 2040 buildout population of 107,187 ~~107,152~~, which results in an increase of approximately 54,315 ~~54,280~~ people, a total need of 535.94 ~~535.76~~ acres of parkland will be needed to comply with the City's park standard of five acres per 1,000 people.

Draft EIR Page 5.16-17, Section 5.16.5, Cumulative Impacts, has been modified in the Final EIR, as follows:

Impact Analysis: Future development accommodated through implementation of the General Plan Update would result in additional demands on existing parks and recreation facilities. As discussed, the total parkland demand associated with future development is 535.94 ~~535.76~~ acres. The General Plan Update proposes a total of 175 acres designated as Parks and 6,189 ~~6,188~~ acres designated as Open Space to accommodate for the population increase.

SECTION 5.19, UTILITIES AND SERVICE SYSTEMS

Draft EIR Page 5.19-35, Impact USS-1, has been modified in the Final EIR as follows:

In regard to water facilities, the General Plan Update is expected to result in population and employment growth within the Study Area, and thus, an overall increase in demand on water supply, which would necessitate construction of future water supply infrastructure. Based on the anticipated growth, as described in Section 3.0, Project Description, and summarized in Table 3-4, General Plan 2040 Buildout by Land Use Designation, buildout under the General Plan Update could yield a net change over existing conditions of an additional 16,262 ~~16,252~~ housing units, an additional population of 54,315 ~~54,280~~ people, an additional 21,792,603 ~~21,839,634~~ square feet of non-residential building square footage, and an additional 19,666 ~~19,674~~ jobs within the Study Area.

Draft EIR Page 5.19-36, Impact USS-1, has been modified in the Final EIR as follows:

As shown in Table 5.19-13, the City's 2018 Sewer Master Plan estimates that the City's total wastewater flow by 2040 would be 5.2 MGD, assuming a population of 120,700. Based on the anticipated growth under the General Plan Update, as described in Section 3.0, Project Description, and summarized in Table 3-4, General Plan 2040 Buildout by Land Use Designation, buildout under the General Plan Update would accommodate a population of 107,187 ~~107,152~~. Therefore, using the wastewater generation rate of 43 gpcd, as calculated in the 2018 Sewer Master Plan, the City's total wastewater flow for 2040 under the General Plan Update would be 4.6 MGD. This is approximately 0.6 MGD less than the 5.2 MGD projected 2040 wastewater flow in the 2018 Sewer Master Plan Update. Therefore, the sewer system under the 2018 Sewer Master Plan accommodates the projected population growth of implementation of the General Plan Update.

Draft EIR Page 5.19-42, Impact USS-2, has been modified in the Final EIR as follows:

As described in Section 3.0, Project Description, and summarized in Table 3-4, General Plan 2040 Buildout by Land Use Designation, buildout under the General Plan could yield a total of 32,092 32,081 housing units, a population of 107,187 107,152 people, 24,367,961 24,413,227 square feet of non-residential building square footage, and 26,978 26,989 jobs within the Study Area. This represents development growth over existing conditions of up to 16,262 16,252 new housing units, 54,315 54,280 people, 21,792,603 21,839,634 square feet of new non-residential building square footage, and 19,666 19,674 new jobs.

Draft EIR Page 5.19-49, Impact USS-4, has been modified in the Final EIR as follows:

Impact Analysis: Future development of projects as contemplated under the General Plan Update may increase the population within the Study Area by an additional 54,315 54,280 people. As described above, the City of San Jacinto has achieved a disposal rate of 3.8 PPD per resident in 2019. Assuming these disposal rates remain constant throughout the life of the General Plan Update, the new growth under General Plan buildout would result in a net increase of approximately 206,397 206,264 PPD of solid waste over existing conditions, which equals 103.2 103.1 net TPD or 37,667.5 37,631.5 net tons of solid waste per year.

Draft EIR Page 5.19-50, Impact USS-4, has been modified in the Final EIR as follows:

Lamb Canyon Sanitary Landfill has a remaining capacity of approximately 8.7 million tons as of 2020, is permitted a maximum throughput of 5,000 TPD, and has enough projected capacity to serve residents and businesses until approximately 2029 with the potential for expansion. El Sobrante Landfill has a remaining capacity of approximately 8.7 million tons as of 2019, is permitted a maximum throughput of 16,054 TPD, and has enough projected capacity to serve residents and businesses until approximately 2051, beyond the 20-year planning horizon of the General Plan Update. Conservatively assuming the Lamb Canyon Sanitary Landfill reaches full capacity during the 20-year planning horizon of the General Plan Update, the El Sobrante Landfill would have adequate capacity to accommodate the City's projected solid waste generation under buildout of 203.7 203.6 TPD. Further, it is more likely that future solid waste would be distributed to the other landfills serving the City.

SECTION 6.0, OTHER CEQA CONSIDERATIONS

Draft EIR Page 6.0-4, Section 6.3, Growth-Inducing Impacts, has been modified in the Final EIR as follows:

As shown in Table 3-5, General Plan Update Growth Assumptions, buildout of the General Plan Update through 2040 could yield up to 16,262 16,252 new housing units and 21,792,603 21,839,634 square feet of new non-residential building square footage within the Study Area.

SECTION 7.0, ALTERNATIVES

Draft EIR Table 7-1, Growth Projections by Alternative, has been modified in the Final EIR as follows:

Table 7-1
Growth Projections by Alternative*

Alternative	Dwelling Units	Population	Nonresidential Square Feet of Development	Jobs	Jobs per Housing Unit
Existing Conditions					
Study Area	15,830	52,872	2,575,358	7,312	0.46
New Growth					
Proposed General Plan	<u>16,262</u> 16,251	<u>54,315</u> 54,280	<u>21,792,603</u> 21,834,559	<u>19,666</u> 19,674	-
Alternative 1: Existing General Plan/No Project	6,462	21,583	15,393,830	13,108	-
Alternative 2: Reduced Growth Alternative	11,912	39,787	21,046,035	16,630	-
Alternative 3: Employment Focused Alternative	3,602	12,030	17,746,595	13,327	-
Buildout Growth: Existing plus New Growth					
Proposed General Plan	<u>32,092</u> 32,081	<u>107,187</u> 107,152	<u>24,367,961</u> 24,409,917	<u>26,978</u> 26,986	0.84
Alternative 1: Existing General Plan/No Project	22,292	74,455	17,969,188	20,420	0.92
Alternative 2: Reduced Growth Alternative	27,742	92,659	23,621,393	23,942	0.86
Alternative 3: Employment Focused Alternative	19,432	64,902	20,321,953	20,639	1.06
Notes: *Assumes 2040 buildout of the proposed General Plan Update					

Draft EIR Table 7-2, Alternative 1: No Project Alternative Compared to the Proposed Project, has been modified in the Final EIR as follows:

Table 7-2
Alternative 1: No Project Alternative Compared to the Proposed Project

Alternative	Dwelling Units	Population	Nonresidential Square Feet of Development	Jobs	Jobs per Housing Unit
Alternative 1: Existing General Plan/No Project	22,292	74,455	17,969,188	20,420	0.92
General Plan Update (Proposed Project) *	<u>32,092</u> <u>32,081</u>	<u>107,187</u> <u>107,152</u>	<u>24,367,961</u> <u>24,409,917</u>	<u>26,978</u> <u>26,986</u>	0.84
Difference	<u>-9,800</u> <u>-9,789</u>	<u>-32,732</u> <u>-32,697</u>	<u>-6,398,773</u> <u>-6,440,729</u>	<u>-6,558</u> <u>-6,566</u>	-
Notes: *Assumes 2040 buildout of the proposed General Plan Update					

Draft EIR Page 7-7, Section 7.3, Environmental Analysis, has been modified in the Final EIR as follows:

Future projects under both development scenarios would be subject to applicable Municipal Code requirements. Buildout of this Alternative would result in 9,800 9,789 fewer dwelling units and 6,398,773 6,440,729 fewer square feet of nonresidential uses, which could impact the City's long-term visual character differently than buildout of the General Plan Update. Generally, the existing General Plan would not address the visual character of future development to the extent of the General Plan Update. For example, the General Plan Update includes goals and policies to identify and preserve the positive characteristics and features of a site, to retain the significant hillsides and ridgelines on San Jacinto's eastern and western borders as open space, and provides additional protections for historic buildings. Additionally, this Alternative would not introduce mixed-use land use designations, which would allow a combination of commercial and residential uses together in the same area, creating more pedestrian and transit-oriented neighborhoods. As such, Alternative 1 would be considered environmentally **inferior** to the General Plan Update.

Draft EIR Page 7-12, Section 7.3, Environmental Analysis, has been modified in the Final EIR as follows:

As shown in Table 7-2, Alternative 1 would allow for 9,800 9,789 fewer residential units which would result in 32,732 32,697 less residents compared to the General Plan Update. Alternative 1 would not establish updated goals and policies intended to reduce potential growth-related impacts when compared to the General Plan Update. The existing General Plan does not reflect the most current population, employment, and housing numbers or projections, nor does it provide quantitative population, employment, and housing projections for the year 2040. In contrast, the General Plan Update reflects existing population, employment, and housing conditions and provides projections to 2040.

Draft EIR Table 7-3, Alternative 2 Compared to the Proposed Project, has been modified in the Final EIR as follows:

Table 7-3
Alternative 2 Compared to the Proposed Project

Alternative	Dwelling Units	Population	Nonresidential Square Feet of Development	Jobs	Jobs per Housing Unit
Alternative 2: Reduced Growth Alternative	27,742	92,659	23,621,393	23,942	0.86
General Plan Update (Proposed Project) *	<u>32,092</u> <u>32,081</u>	<u>107,187</u> <u>107,152</u>	<u>24,367,961</u> <u>24,409,917</u>	<u>26,978</u> <u>26,986</u>	0.84
Difference	<u>-4,350</u> <u>-4,339</u>	<u>-14,528</u> <u>-14,493</u>	<u>-746,568</u> <u>-788,524</u>	<u>-3,036</u> <u>-3,044</u>	-

Notes:
*Assumes 2040 buildout of the proposed General Plan Update

Draft EIR Page 7-15, Section 7.3, Environmental Analysis, has been modified in the Final EIR as follows:

As shown in Table 7-3, Alternative 2 would result in approximately 4,350 4,339 fewer housing units and 14,528 14,493 fewer residents within San Jacinto when compared to the proposed General Plan Land Use Map. Nonresidential development potential would be reduced by 746,568 788,524 square feet and employment opportunities would be decreased under this alternative, with approximately 3,036 3,044 fewer jobs created within the City limits when compared to the proposed General Plan Update.

Draft EIR Page 7-20, Section 7.3, Environmental Analysis, has been modified in the Final EIR as follows:

Similar to the General Plan Update, this Alternative would update the City's environmental baseline conditions and development projections through 2040. As shown in Table 7-3, the Reduced Growth Alternative would anticipate 4,350 4,339 fewer residential units compared to the General Plan Update, which would result in 14,528 14,493 less residents compared to Alternative 2. Both the General Plan Update and Reduced Growth Alternative account for population growth and establish goals and policies to reduce potential growth-related impacts. The net increase in population and housing is nominal and would result in similar less than significant impacts.

This Alternative anticipates approximately 746,568 788,524 fewer square feet of non-residential development compared to the proposed Project. The reduction in non-residential development would result in a decrease of approximately 3,036 3,044 jobs. The amount and typology of allowable development under the General Plan Update and Alternative 2 has been crafted to meet City's Regional Housing Needs Allocation (RHNA) for future housing needs. While Alternative 2 would provide sufficient development capacity to accommodate the City's RHNA, the maximum density allowed under Alternative 2 (up to 22 du/acre) does not meet the State's default density of 30 du/acre used to establish the affordability of new housing units. Absent of the ability to rely on the default density, the City would be

required to prove in the Housing Element based on substantial evidence that development at densities allowed under Alternative 2 would result in the production of units affordable to all income categories, including extremely very low, very low, low, and moderate income households.

Draft EIR Table 7-3, Alternative 2 Compared to the Proposed Project, has been modified in the Final EIR as follows:

Table 7-4
Alternative 3 Compared to the Proposed Project

Alternative	Dwelling Units	Population	Nonresidential Square Feet of Development	Jobs	Jobs per Housing Unit
Alternative 3: Employment Focused Alternative	19,432	64,902	20,321,953	20,639	1.06
General Plan Update (Proposed Project) *	<u>32,092</u> 32,081	<u>107,187</u> 107,152	<u>24,367,961</u> 24,409,917	<u>26,978</u> 26,986	0.84
Difference	-12,660 -12,649	-42,285 -42,250	-4,046,008 -4,087,964	-6,339 -6,347	-

Notes:
*Assumes 2040 buildout of the proposed General Plan Update

Draft EIR Page 7-24, Section 7.3, Environmental Analysis, has been modified in the Final EIR as follows:

As shown in Table 7-4, Alternative 3 would result in approximately 12,660 ~~12,649~~ fewer housing units and 42,285 ~~42,250~~ fewer residents within San Jacinto when compared to the proposed General Plan Land Use Map. Nonresidential square feet would be reduced by 4,046,008 ~~4,087,964~~ square feet and employment opportunities would be decreased under this alternative, with approximately 6,339 ~~6,347~~ fewer jobs created within the City limits when compared to the proposed General Plan.

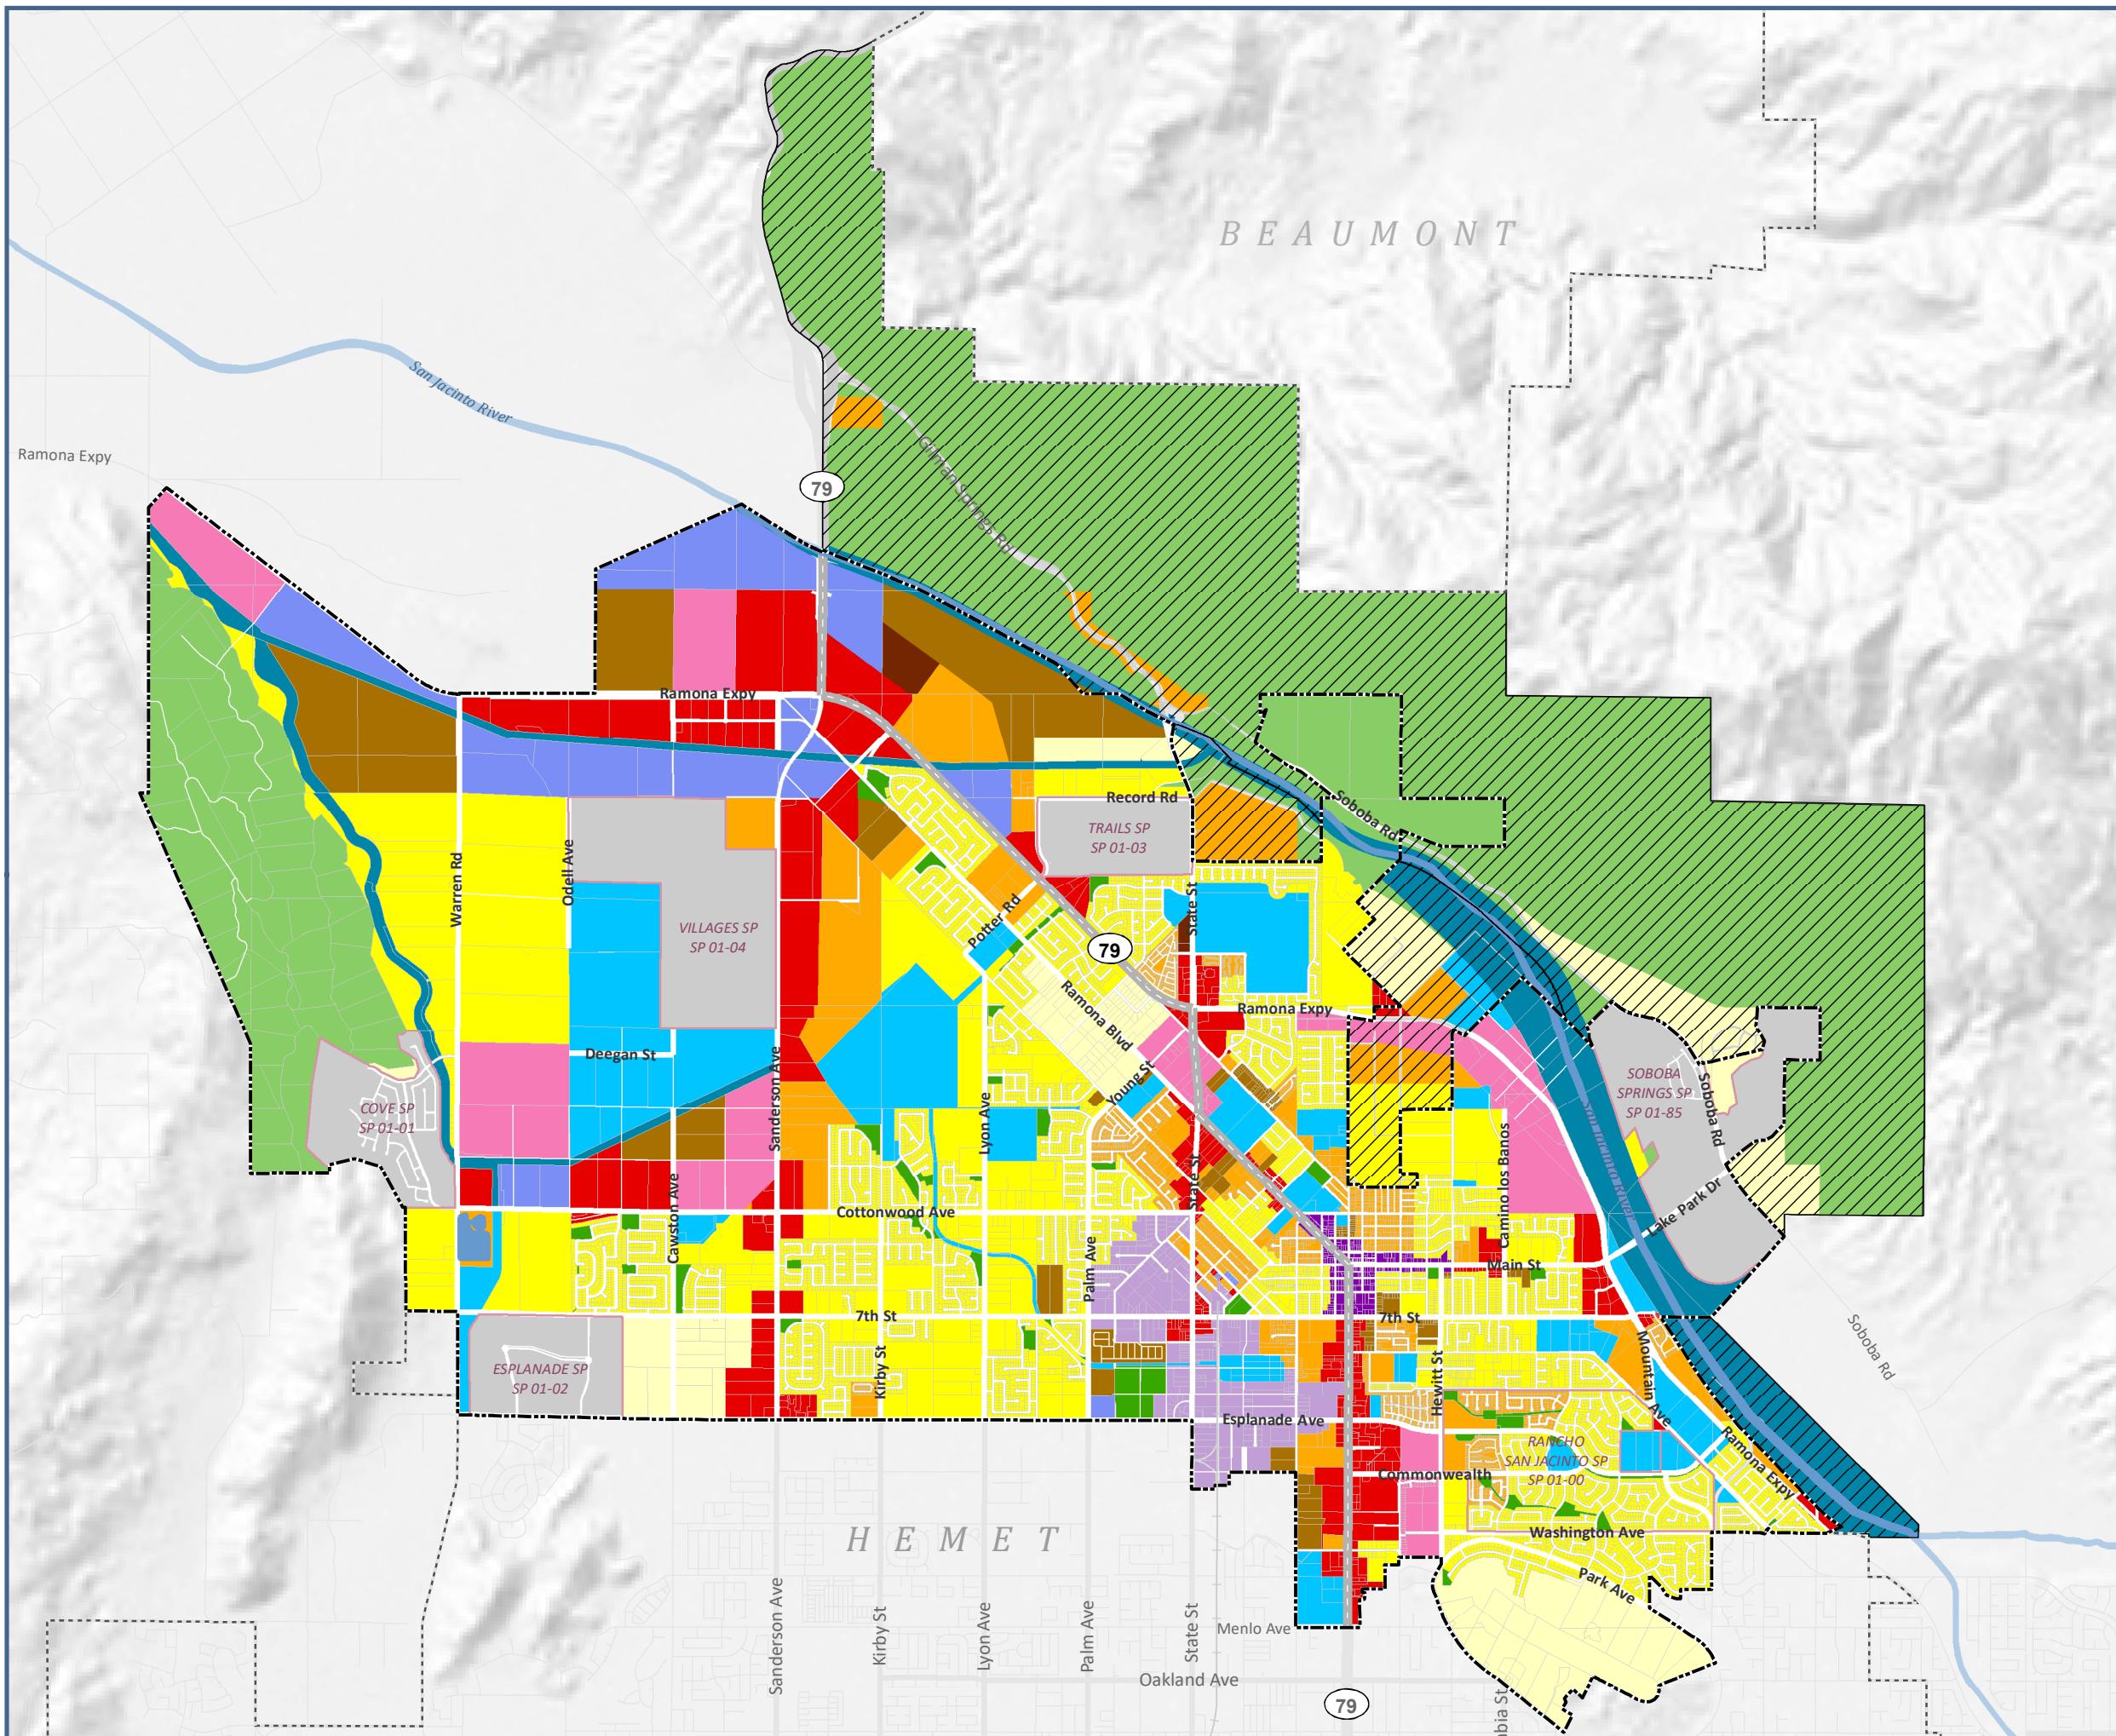

Draft EIR Pages 7-29 through 7-30, Section 7.3, Environmental Analysis, has been modified in the Final EIR as follows:

Similar to the General Plan Update, this Alternative would update the City's environmental baseline conditions and development projections through 2040. As shown in Table 7-4, the Employment Focus Alternative would anticipate 12,660 ~~12,649~~ fewer residential units, which would result in 42,285 ~~42,250~~ less residents compared to the General Plan Update. Both the General Plan Update and Employment Focus Alternative account for population growth and establish goals and policies to reduce potential growth-related impacts. The net increase in population and housing is nominal and would result in similar less than significant impacts.

This Alternative anticipates approximately 4,046,008 ~~4,087,964~~ fewer square feet of non-residential development compared to the proposed Project. The reduction in non-residential development would result in a decrease of approximately 6,339 ~~6,347~~ jobs. However, while the amount and typology of allowable development under the General Plan Update has been crafted to meet City's Regional Housing

Needs Allocation (RHNA) for future housing needs, Alternative 3, similar to the existing General Plan, would not allow the City to adequately plan for population growth and housing to meet its RHNA obligations. As such, this Alternative would be considered environmentally **inferior** to the General Plan Update.
