Lead Agency: Contra Costa County Department of Conservation and Development, Attn. Gary Kupp
(925) 655-2705

Project Description: The project will modify the existing Rodeo refinery into a repurposed facility that would
discontinue the refining of petroleum crude oil and switch to processing renewable feedstocks into renewable
diesel fuel, renewable blending components, and renewable fuel gas. In addition to renewable fuels currently
produced at the refinery, the project would enable the Rodeo refinery to produce up to 55,000 bpd of
renewable transportation fuels from renewable feedstocks. Once the project is operational, the Rodeo refinery
would supply up to 107,000 bpd of both renewable and blended transportation fuels, including a total of
67,000 bpd of renewable fuels. The facility could also receive, blend, and ship up to 40,000 bpd of gasoline
and gasoline blendstocks. Other aspects of the project include the demolition of the Rodeo Carbon Plant and
the Santa Maria refinery in Arroyo Grande, CA. Additionally, Phillips 66 pipelines 100, 200, 300, and 400,
located in San Luis Obispo, Santa Barbara, Kern, Kings, Fresno, Merced, Stanislaus, San Joaquin, Alameda,
and Contra Costa Counties will be decommissioned in-place, since they will no longer be necessary under the
project to transport crude-based feedstocks from the Santa Maria facility to the Rodeo refinery.

The project was approved on May 3, 2022 by the Board of Supervisors.
