State Clearinghouse
P.O. Box 3044, 1400 Tenth Street, Room 212
Sacramento, CA 95812-3044

From: Department of Toxic Substances Control
Permitting Division
8800 Cal Center Drive
Sacramento, CA 95826

Project Title: Emergency Permit for Transfer of Hazardous Waste, World Oil Environmental Services, Dixon, CA

Project Location: 7300 Chevron Way, Dixon, CA, 95620

County: Solano County

Project Applicant: Kyle McManus, Environmental Compliance Specialist, World Oil Environmental Services – Dixon (WOES – Dixon)

Approval Action Under Consideration by DTSC: Emergency Permit

Statutory Authority: California Health and Safety Code, Chapter 6.5

Project Description: The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations, Title 22, Division 4.5, Chapter 20, Section 66270.61, has issued an Emergency Permit to WOES - Dixon (EPA ID# CAT080012602) to transfer hazardous waste from a tanker truck into another truck and/or containers.

The hazardous waste is used antifreeze that was determined to have ignitable hazardous characteristics upon arrival and prior to acceptance, at the WOES - Dixon facility. The hazardous waste arrived in a transport truck that does not meet standards for transport or storage of ignitable hazardous waste. The waste is to be repackaged into an approved truck and/or container. Once the hazardous waste is transferred, it will be transported offsite to an authorized facility, World Oil Recycling located in Compton, California, for treatment, storage, and/or disposal.

Background: Upon arrival to the WOES - Dixon facility located at 7300 Chevron Way, Dixon, CA, 95620, the used antifreeze was tested and found to have a flash point of less than 140°F. This classified the used antifreeze as hazardous waste under California hazardous waste laws. WOES - Dixon and WOES do not have a permit to manage RCRA hazardous waste at the WOES - Dixon facility and the tanker truck does not meet specifications that would allow it to safely transport ignitable hazardous waste.

Project Activities:

The transfer will be performed in a manner that is protective of the environment by implementing the following controls:

- Personnel performing the transfer must maintain an unobstructed view of the transfer activity allowing for immediate shutdown of the transfer in the event a leak occurs.
- The transfer must occur within WOES – Dixon's loading/unloading area located within secondary containment.
- Spill pans must be placed under the hose to valve connections.
- To prevent risk to the public, public access is to be restricted during the transfer operation.
- A portable fire extinguisher must be on hand.

Within 10 business days of the expiration of this permit, WOES - Dixon will submit a final report, signed in accordance with Title 22, California Code of Regulations section 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed.

The Emergency Permit is effective beginning December 31, 2020 and shall expire on January 8, 2021.

Name of Public Agency Approving Project: Department of Toxic Substances Control

Name of Person or Agency Carrying Out Project: WOES - Dixon

Exempt Status: Categorical Exemption: [CCR Title 14, Sec. 15330]

Reasons Why Project is Exempt: This action is necessary to properly disposed of at an authorize RCRA disposal facility consistent with Class 30. DTSC has evaluated whether any of the exceptions to the categorical exemptions apply to this project, as described in Public Resources Code Section 21084(c), (d), and (e), and 14 CCR Section 15300.2. DTSC has determined that no exceptions to the categorical exemption apply to this project. The hazardous waste used antifreeze

will be removed from the site once repacked into a DOT truck and/or approved container and shipped to a lawfully permitted destination.

The administrative record for this project is available to the public by appointment at the following location:
