INITIAL STUDY/NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Maria Dolan

PROJECT TITLE/FILE NUMBER(S): PA-2000119 (SA)

PROJECT DESCRIPTION: <u>A Site Approval application to establish a breeding facility for a maximum of ten (10)</u> dogs on site. The project includes the construction of six (6) kennels totaling 3,009 square feet. The site utilizes an onsite well and septic system and is accessed from East Tokay Colony Road. This parcel is under Williamson Act contract. Use type: Animal Specialty Services – Kennels, Small Breeding. The project site is located on the north side of East Tokay Colony Road, one (1) mile east of Jack Tone Road, Lodi.

ASSESSORS PARCEL NO.: 065-080-20

ACRES: <u>11.12</u>

GENERAL PLAN: A/G (General Agriculture)

ZONING: AG-40 (General Agriculture, 40-acre minimum)

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S): <u>6 Kennels totaling 3,009 square feet.</u>

SURROUNDING LAND USES:

NORTH: Agricultural, scattered residences

SOUTH: Agricultural

EAST: <u>Agricultural, scattered residences</u>

WEST: Agricultural, scattered residences

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff. Staff knowledge or experience; and independent environmental studies submitted to the County as part of the project application Enter report name, date, and consultant.).). Copies of these reports can be found by contacting the Community Development Department.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

No.

GENERAL CONSIDERATIONS:

1. Does it appear that any environmental feature of the project will generate significant public concern or controversy?

Nature of concern(s): Enter concern(s).

2. Will the project require approval or permits by agencies other than the County?

X No

Agency name(s): Enter agency name(s).

3. Is the project within the Sphere of Influence, or within two miles, of any city?

City: Enter city name(s).

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a **"Potentially Significant Impact"** as indicated by the checklist on the following pages.

| Aesthetics | Agriculture and Forestry Resources | Air Quality |
|-----------------------------|------------------------------------|------------------------------------|
| Biological Resources | Cultural Resources | Energy |
| Geology / Soils | Greenhouse Gas Emissions | Hazards & Hazardous Materials |
| Hydrology / Water Quality | Land Use / Planning | Mineral Resources |
| Noise | Population / Housing | Public Services |
| Recreation | Transportation | Tribal Cultural Resources |
| Utilities / Service Systems | Wildfire | Mandatory Findings of Significance |

DETERMINATION: (To be completed by the Lead Agency) On the basis of this initial evaluation:

I find that the proposed project <u>COULD NOT</u> have a significant effect on the environment, and a <u>NEGATIVE</u> <u>DECLARATION</u> will be prepared.

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A **MITIGATED NEGATIVE DECLARATION** will be prepared.

I find that the proposed project MAY have a significant effect on the environment, and an **ENVIRONMENTAL IMPACT REPORT** is required.

I find that the proposed project <u>MAY</u> have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An <u>ENVIRONMENTAL IMPACT REPORT</u> is required, but it must analyze only the effects that remain to be addressed.

I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier <u>EIR</u> or <u>NEGATIVE DECLARATION</u> pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier <u>EIR</u> or <u>NEGATIVE</u> <u>DECLARATION</u>, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

John Junderbry

01/11/2021 Date

Signature

X

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

ISSUES:

| I. AESTHETICS. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact |
|--|--------------------------------------|---|------------------------------------|
| Except as provided in Public Resources Code Section 21099, would the project: | | | |
| a) Have a substantial adverse effect on a scenic vista? | | | |
| b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway? | | | |

- c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publically accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?
- d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Analyzed

In The

Impact Prior EIR

No

Impact Discussion:

a-d) The proposed project site is located on Tokay Colony Road. Pursuant to San Joaquin County General Plan 2035 Natural and Cultural Resources Element Figure NCR-1 (page 3.4-13), Tokay Colony Road is not a designated Scenic Route. Therefore, the project will have no impact on a scenic vista.

II. AGRICULTURE AND FORESTRY RESOURCES.

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land. including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. -- Would the project:

- a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?
- b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?
- c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?
- d) Result in the loss of forest land or conversion of forest land to non-forest use?
- e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

Impact Discussion:

a-e) The subject property is not identified or designated as Prime or Unique Farmland or as Farmland of Statewide Importance on maps provided by the California Department of Conservation's Farmland Mapping and Monitoring Program. The subject property is designated as Local Importance (L), which is described as land used that is or has been used for irrigated pasture, dryland farming, confined livestock or dairy facilities, aquaculture, poultry facilities, and dry grazing. The subject property is zoned General Agriculture (A-G) and is subject to the terms and conditions for Williamson Act Contract 71-C1-194.

| | | X | |
|--|---|---|--|
| | X | | |
| | | × | |
| | | × | |
| | | × | |

Pursuant to Development Title Section 9-1810.3 a Kennel is a permitted use on contracted land and has been determined to be a compatible use by the Board of Supervisors.

- 1. The use will not significantly compromise the long-term productive agricultural capability of the subject contracted parcel or parcels or on other contracted lands in agricultural preserves.
 - This Principle of Compatibility can be made because a kennel facility is classified in the Animal Specialty Services use type and additionally the project will only occupy a 3,009 footprint within a 11.12 acre legal lot and the use is a compatible use on contracted land pursuant to Development Title Section 9-1810.3. As a result, the use will not significantly compromise the long-term productive agricultural capability of the subject contracted parcel or on other contracted lands in agricultural preserves.
- 2. The use will not significantly displace or impair current or reasonably foreseeable agricultural operations on the subject contracted parcel or parcels or on other contracted land in agricultural preserves. Uses that significantly displace agricultural operations on the subject contracted parcel or parcels may be deemed compatible if they relate directly to the production of commercial agricultural products on the subject contracted parcel or parcels or neighboring lands including activities such as harvesting, processing, or shipping.
 - This Principle of Compatibility can be made because the proposed use a kennel will occur on a
 portion of disturbed land and not significantly displace or impair current or reasonably foreseeable
 agricultural operations on the subject contracted parcel or parcels or on other contracted lands in
 agricultural preserves.
- 3. The use will not result in the significant removal of adjacent contracted land from agricultural or open-space use. In evaluating compatibility a board or council shall consider the impacts on non-contracted lands in the agricultural preserve or preserves.
 - This Principle of Compatibility can be made because the Animal Specialty Services Kennels Small Breeding use type is a permitted use on property under contract and is consistent with the A/G (General Agriculture) General Plan Designation, and is a conditionally permitted use on parcels with an AG-40 (General Agriculture, 40-acre minimum) zoning designation subject to an approved Site Approval application. Therefore, the kennel facility will not negatively impact agricultural uses on adjacent contracted lands and will not result in the significant removal of adjacent contracted land from agricultural or open-space.

The project will not affect any agricultural uses, nor will it affect properties under Williamson Act contracts to the north, south, east, and west. Therefore, the proposed application will have a less than significant impact on agriculture. The proposed project does not conflict with any existing or planned uses as the zoning and General Plan designations will remain the same. Therefore, this project will not set a significant land use precedent in the area. There are no applicable Master Plans, Specific Plans, or Special Purpose Plans in the vicinity. Referrals have been sent to the Department of Conservation for review and no comments were received.

| <u>III.</u> | AIR QUALITY. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No Impact | Analyzed In The Prior EIR |
|-------------|--|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| the cor | here available, the significance criteria established by applicable air quality management or air pollution ntrol district may be relied upon to make the following erminations. Would the project: | | | | | |
| a) | Conflict with or obstruct implementation of the applicable air quality plan? | | | × | | |
| b) | Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? | | | × | | |
| c) | Expose sensitive receptors to substantial pollutant concentrations? | | | × | | |
| d) | Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people? | | | × | | |

a-d) The project site is located in the San Joaquin Valley Air Basin, which is regulated by the San Joaquin Valley Air Pollution Control District (SJVAPCD). SJVAPCD is the lead air quality regulatory agency for San Joaquin. This project was referred to the SJVAPCD for review on. As a condition of approval, the project will be subject to the District's rules and regulations. Therefore, any impacts to air quality will be reduced to less than significant.

| <u>IV.</u> | BIOLOGICAL RESOURCES. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No | Analyzed In The Prior EIR |
|------------|--|--------------------------------------|---|------------------------------------|----|---------------------------------|
| Wo | ould the project: | | | | | |
| a) | Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | | X | | | |
| b) | Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? | | | | × | |
| c) | Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | | | | × | |
| d) | Interfere substantially with the movement of any | | | | | |

X

Less Than

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

- e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?
- Conflict with the provisions of an adopted Habitat f) Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

| X | | | |

| | | X | |
| | | × | |
| X | | | |
| | × | | |
| | | | |

Impact Discussion:

a-f) The California Department of Fish and Wildlife Natural Diversity Database does not list any rare, endangered, or threatened species or habitat located on or near the site for the proposed project. Referrals have been sent to the San Joaquin Council of Governments (SJCOG), the agency responsible for verifying the correct implementation of the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), which provides compensation for the conversion of Open Space to non-Open Space uses which affect the plant, fish and wildlife species covered by the Plan. Pursuant to the Final EIR/EIS for SJMSCP, dated November 15, 2000, and certified by SJCOG on December 7, 2000, implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

SJCOG responded in a letter dated July 8, 2020 that the project site is subject to the SJMSCP. The applicant has confirmed that they will participate in SJMSCP. With the applicant's participation, the proposed project is consistent with the SJMSCP and any impacts to biological resources resulting from the proposed project will be reduced to a level of less-than-significant.

The project site is not located in a riparian habitat as there is no river, stream or other waterway on the site, nor is it within an identified protected wetland, therefore the project will have no impact on riparian habitat or wetlands.

The project's impact on resident or migratory wildlife corridors will be reduced to less than significant because the project applicant will participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

The projects impact on protected biological resources will be reduced to less than significant because the project applicant will participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

The project will not conflict with the provisions of an adopted Habitat Conservation Plan, natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan, because the project applicant will participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

Less Than Potentially Less Than Analyzed Significant with Significant Significant In The No Mitigation Impact Incorporated Impact Impact Prior EIR **V. CULTURAL RESOURCES.** Would the project: a) Cause a substantial adverse change in the significance of a historical resource pursuant to§ X 15064.5? b) Cause a substantial adverse change in the significance of an archaeological resource pursuant X to § 15064.5? c) Disturb any human remains, including those interred outside of dedicated cemeteries?

Impact Discussion:

a-c) The proposed project will have no impact on Cultural Resources as there are no resources on the project site that are listed or are eligible for listing on a local register, the California Register of Historic Places, or National Register of Historic Places.

In the event human remains are encountered during any portion of the project, California state law requires that there shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains until the coroner of the county has determined manner and cause of death, and the recommendations concerning the treatment and disposition of the human remains have been made to the person responsible for the excavation (California Health and Safety Code - Section 7050.5). In this way, any disturbance to human remains will be reduced to less than significant.

| <u>VI. ENERGY.</u> | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No | Analyzed In The Prior EIR |
|---|--------------------------------------|---|------------------------------------|----|---------------------------------|
| Would the project: | | | | | |
| a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation? | | | × | | |
| b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? | | | × | | |

a-b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to the proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and preventing any conflict with state or local plans for energy efficiency and renewable energy.

Less Than Potentially Less Than Significant with Significant Significant No Mitigation Impact Impact Impact Prior EIR Incorporated including failure,

- landslide, lateral spreading, subsidence, liquefaction or collapse?
- Be located on expansive soil and create direct or indirect risks to life or property?
- e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?
- f) Directly or indirectly destroy unique а paleontological resource or site or unique geologic feature?

Impact Discussion:

a-f) The geology of San Joaquin County is composed of high organic alluvium, which is susceptible to earthquake movement. The project will have to comply with the California Building Code (CBC) which includes provisions for soils reports for grading and foundations as well as design criteria for seismic loading and other geologic hazards based on fault and seismic hazard mapping. All recommendations from a soils report must be incorporated into the construction plans. Therefore, impacts to seismic-related (or other) landslide hazards will be less than significant.

The project will not result in substantial soil erosion or the loss of topsoil because the project will require a grading permit. The grading will be done under permit and inspection by the San Joaquin County Community Development Department's Building Division, and as a result, impacts to soil erosion or loss of topsoil will be less than significant.

VII. GEOLOGY AND SOILS.

Would the project:

- Directly or indirectly cause potential substantial a) adverse effects, including the risk of loss, injury, or death involving:
 - Rupture of a known earthquake fault, as i) delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.
 - ii) Strong seismic ground shaking?
 - iii) Seismic-related ground liquefaction?
 - iv) Landslides?
- b) Result in substantial soil erosion or the loss of topsoil?
- Be located on a geologic unit or soil that is unstable, c) or that would become unstable as a result of the project, and potentially result in on- or off-site
- d)

| | X | |
|--|-------------|--|
| | × | |
| | X X X | |
| | × | |
| | × | |

Analyzed

In The

The project site is relatively flat terrain where landslides have not historically been an issue. A soils report will be required for grading and foundations and all recommendations from a soils report must be incorporated into the construction plans. Therefore, any risks resulting from being located on an unstable unit will be reduced to less than significant.

The project will be served by an onsite septic tank or alternative waste water disposal system for the disposal of waste water. The Environmental Health Department is requiring a soil suitability/nitrate loading study to determine the appropriate system and design prior to issuance of building permit(s). The sewage disposal system shall comply with the onsite wastewater treatment systems standards of San Joaquin County prior to approval. A percolation test that meets absorption rates of the manual of septic tank practice or E.P.A. Design Manual for onsite wastewater treatment and disposal system is required for each parcel. With these standards in place, only soils capable of adequately supporting the use of septic tanks will be approved for the septic system.

| | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No Impact | Analyzed In The Prior EIR |
|--|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| VIII. GREENHOUSE GAS EMISSIONS. | | | | | |
| Would the project: | | | | | |
| a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | | | × | | |
| b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases? | | | × | | |

a-b) Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the proposed project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO2) and, to a lesser extent, other GHG pollutants, such as methane (CH4) and nitrous oxide (N2O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO2 equivalents (MTCO2e/yr).

Neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change. As such, the analysis herein is limited to discussion of long-term operational GHG emissions.

The proposed project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA and the District Policy – Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency.¹¹ The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energy-efficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures. This will reduce the impact of GHG emissions to a level of less than significant.

¹San Joaquin Valley Air Pollution Control District. *Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA*. December 17, 2009.San Joaquin Valley Air Pollution Control District. *District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency*. December 17, 2009.

Would the project:

IX. HAZARDS AND HAZARDOUS MATERIA

- a) Create a significant hazard to the public environment through the routine transpor disposal of hazardous materials?
- b) Create a significant hazard to the publ environment through reasonably foreseea and accident conditions involving the rehazardous materials into the environment?
- Emit hazardous emissions or handle haza c) acutely hazardous materials, substances, within one-quarter mile of an existing or school?
- Be located on a site which is included o d) hazardous materials sites compiled put Government Code Section 65962.5 and, a would it create a significant hazard to the the environment?
- e) For a project located within an airport land or, where such a plan has not been adopt two miles of a public airport or public us would the project result in a safety h excessive noise for people residing or work project area?
- Impair implementation of or physically inte f) an adopted emergency response plan or e evacuation plan?
- Expose people or structures, either d d) indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Impact Discussion:

a-g) The proposed project is a kennel operation. The project site is not included on the California Department of Toxic Substances Control EnviroStor database map, compiled pursuant to Government Code 65962.5. The project would not result in, create or induce hazards and associated risks to the public.

The project location is in the General Plan community of Lockeford-Clements which is not identified as a Community at Risk from Wildfire by Cal Fire's "Fire Risk Assessment Program". Communities at Risk from Wildfire are those places within 1.5 miles of areas of High or Very High wildfire threat as determined from CDF-FRAP fuels and hazard data. Therefore, the impact of wildfires on the project, or on future development at the project site, are expected to be less than significant.

Х

X. HYDROLOGY AND WATER QUALITY.

Would the project:

- a) Violate any water quality standard discharge requirements or otherwise degrade surface or ground water qualit
- b) Substantially decrease groundwater interfere substantially with groundwat such that the project may impede groundwater management of the basin'
- c) Substantially alter the existing drainage the site or area, including through the the course of a stream or river or addition of impervious surfaces, in a m would:
 - result in substantial erosion or siltati i) site;
 - ii) substantially increase the rate of surface runoff in a manner which w flooding on- or off-site;
 - iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or
 - iv) impede or redirect flood flows?
- In flood hazard, tsunami, or seiche zones, risk d) release of pollutants due to project inundation?
- e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Impact Discussion:

a-e) The proposed project does not propose any substantial alteration to a drainage pattern, stream or river. Any necessary drainage improvements onsite will be required as conditions of approval for the project. The project will not result in substantial soil erosion because the site is flat and will be paved and landscaped subject to building code and Development Title requirements.

The proposed project site is not in a tsunami or seiche zone. The site is located in the X(levee) flood zone, which is defined as areas of 0.2% annual chance (500-year) flood; or areas of 1% annual chance (100-year) flood with average depths of less than 1 foot or with drainage areas less than 1 square mile. Therefore, there is no risk of release of pollutants due to inundation.

| XI. LAND USE AND PLANNING. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No | Analyzed In The Prior EIR |
|---|--------------------------------------|---|------------------------------------|----|---------------------------------|
| Would the project: | | | | | |
| a) Physically divide an established community? | | | | X | |
| b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | | | × | | |

a-b) The approval and operation of the proposed project will not physically divide an established community. The proposed project will not result in conflicts between existing and proposed on-site or off-site land uses because the proposed project, small kennel operations is consistent with all land use policies and regulations of the County Development Code and 2035 General Plan. The Animal Specialty Services – Kennels Small Breeding use type may be conditionally permitted in the A-G (General Agriculture, 40-acre minimum) zone with an approved Site Approval application.

The project is not a growth-inducing action nor is it in conflict with any existing or planned uses. The project will not set a significant land use precedent in the area. There are no applicable Master Plans, Special Purpose Plans, or Specific Plans in the vicinity.

| XII. MINERAL RESOURCES. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | | Analyzed In The Prior EIR |
|--|--------------------------------------|---|------------------------------------|---|---------------------------------|
| Would the project: | | | | | |
| a) Result in the loss of availability of a known_mineral resource that would be of value to the region and the residents of the state? | | | | × | |
| b) Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | | | | × | |

a-b) The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. The proposed project is not in a designated MRZ zone. Therefore, the proposed project applications will not have an impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

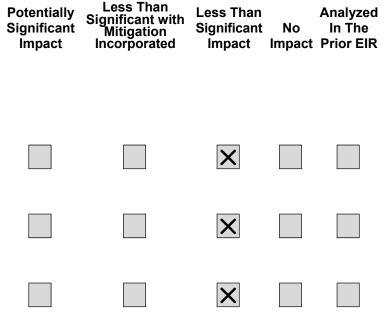

XIII. NOISE.

Would the project result in:

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
- b) Generation of excessive groundborne vibration or groundborne noise levels?
- c) For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Impact Discussion:

a-c) The project area is within an agricultural area comprised of large parcels, with few noise sensitive receptors. The kennel operation is subject to noise performance standards for stationary noise sources which require a daytime (7 a.m. to 10 p.m.) hourly equivalent sound level to remain below 50 dB with a maximum sound level of 70 dB and a nighttime (10 p.m. to 7 a.m.) hourly equivalent sound level to remain below 45 dB with a maximum sound level of 65 dB (Development Title Table 1025.9 Part II). There is no evidence to indicate the project will exceed these standards. Therefore, any impacts resulting from noise will be less than significant.

| XIV. POPULATION AND HOUSING. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | Analyze No In The Impact Prior El | 1 |
|---|--------------------------------------|---|------------------------------------|---|---|
| Would the project: | | | | | |
| a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? | | | | × | |
| b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? | | | | × | |

a-b) The proposed project would not displace substantial numbers of people or existing housing, necessitating the construction of replacement housing elsewhere. Therefore, the project will have no impact on population and housing.

| XV. PUBLIC SERVICES. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No | Analyzed In The Prior EIR |
|--|--------------------------------------|---|------------------------------------|----|---------------------------------|
| a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: | | | | | |
| Fire protection? | | | | × | |
| Police protection? | | | × | | |
| Schools? | | | | × | |
| Parks? | | | | × | |
| Other public facilities? | | | | × | |

a) The proposed project is a small kennel operation for a maximum of 10 dogs. The project site is served by the San Joaquin County Sheriff's Office. The Sheriff's Office was provided with the project proposal and provided the following comments below which will included in the project conditions of approval.

Upon review of the referral; it is the position of the Sheriff's Office that, in the interest of public safety, the following requirements be addressed prior to and while in operation of this project:

- Obey all laws
- Obey all County Ordinances
- Employees(s) and/or Ownership must allow for regular and unannounced inspections by the Sheriff's Office during normal and reasonable business hours or while investigating complaints/referrals in the course of a Deputy and/or Animal Service Officers' official duties.
- Facility must be constructed in such a manner as to prevent escape of an animal from either the kenneled area or overall property.
- Facility must be constructed and maintained in such a manner as to allow for humane living conditions.

With these requirements being included as conditions of approval the projects impact on police protection is expected to be less than significant.

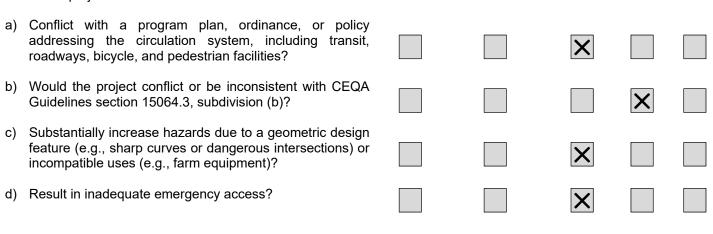

| XVI. RECREATION. | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | | Analyzed In The Prior EIR |
|---|--------------------------------------|---|------------------------------------|---|---------------------------------|
| a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | | | | X | |
| b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on | | | | × | |

the environment?

a-b) This project will not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated, because the project will not generate any new residential units and the impacts to parks generated by the employees of this project will be minimal. This project does not include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment, because the type of project proposed, a small kennel, will not result in an increased demand for recreational facilities. Therefore, the project will have no impact on recreation facilities.

In The

Impact Discussion:

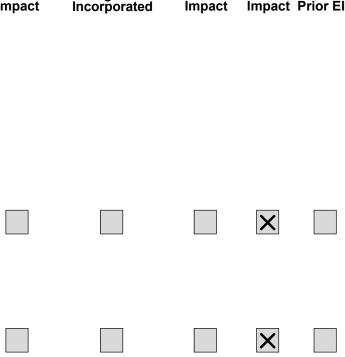

a-d) The Department of Public Works has been notified of this project and there is no substantial evidence that the project will cause significant impacts to Tokay Colony Road. Based on project square footage, it was determined that this project will generate less than 110 automobile trips per day and, therefore, is considered a small project according to the Technical Advisory on Evaluating Transportation Impacts in CEQA, as published by the California Office of Planning and Research (OPR) in December 2018. According to this OPR guidance, a small project that generates or attracts "fewer than 110 trips per day generally may be assumed to cause a less-than-significant transportation impact" with regards to Vehicle Miles Traveled (VMT). Therefore, this project is anticipated to have a less than significant impact on traffic.

The project is not expected to conflict with a program plan, ordinance, or policy addressing the vehicle circulation system. There will be no changes to the geometric design of roads or to emergency access routes. The proposed project is not expected to result in inadequate emergency access.

Less Than Potentially Less Than Analyzed Significant with In The Significant Significant No Mitigation Impact Impact Impact Prior EIR Incorporated

XVIII. TRIBAL CULTURAL RESOURCES.

- a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:
 - i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or
 - ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Impact Discussion:

a) There are no known significant tribal cultural resources in the vicinity. A project referral was sent to the California Native American Heritage Commission, the North Valley Yokuts Tribe, and the United Auburn Indian Community for review. No responses were received before or after the review period.

The project must comply with state and federal laws regarding any resources or remains found during construction. If, in the course of development, concentrations of prehistoric or historic-period materials are encountered, all work in the vicinity of the find must be halted until an archaeologist can evaluate the materials and make recommendations for further action. If human remains are encountered, all work must halt in the vicinity and the County Coroner shall be notified immediately. At the same time, a qualified archaeologist shall be contacted to evaluate the finds. If Human burials are found to be of Native American origin, steps shall be taken pursuant to Section 15064.5(e) of Guidelines for California Environmental Quality Act. The California Valley Miwok Tribe was sent a referral for the project on July 27, 2020 and a response was not received.

Less Than Potentially Significant with Significant Mitigation Impact Incorporated

XIX. UTILITIES AND SERVICE SYSTEMS.

Would the project:

- Require or result in the relocation or construction of a) new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?
- b) Have sufficient water supplies available to serve the project reasonably foreseeable and future development during normal, dry and multiple dry years?
- Result in a determination by the wastewater c) treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?
- d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?
- e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Impact Discussion:

a-e) There are no public services available for this parcel. Water services will have to be from an on-site well, sewer services must be through an on-site septic system, and storm water drainage must be retained on-site. The Environmental Health Department will determine if the existing on-site well and septic system are adequate for the proposed use. The applicant will need to show that any additional storm water drainage will be retained on-site.

XX. WILDFIRE.

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:

- a) Substantially impair an adopted emergency response plan or emergency evacuation plan?
- b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?
- c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?
- d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

| Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No Impact | Analyzed In The Prior EIR |
|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| | | | | |
| | | × | | |
| | | × | | |
| | | X | | |
| | | × | | |

Impact Discussion:

a-d) The project will have no impact on wildland fires as the project is located outside of a wildfire area.

XXI. MANDATORY FINDINGS OF SIGNIFICANCE.

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

| Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No Impact | Analyzed In The Prior EIR |
|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| | × | | | |
| | | X | | |
| | | × | | |

Impact Discussion:

a-c) The proposed project does not appear to have the potential to significantly degrade the overall quality of the region's environment, or substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory. There are no identified historic or prehistoric resources identified on this site. No archaeological or paleontological resources have been identified in the project area.

The applicant has confirmed that he will participate in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), which provides compensation for the conversion of Open Space to non-Open Space uses which affect the plant, fish and wildlife species covered by the Plan. With the applicant's participation, the proposed project is consistent with the SJMSCP and any impacts to biological resources resulting from the proposed project will be reduced to a level of less-than-significant

The project is not expected to have cumulatively considerable impacts. Less than significant impacts to air quality, biological resources, traffic, and hydrology have been identified. Any potential impacts will be adequately addressed through conditions of approval and compliance with existing laws and regulations.

The project does not have environmental effects which will cause substantial adverse effects to the public.
