Form F

Summary Form for Electronic Document Submittal

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Locatio	n:	
	City	County

Project Description (Proposed actions, location, and/or consequences).

The project would involve seismic retrofits to The Old Road Bridge over Castaic Creek, which is located in the unincorporated community of Val Verde in Los Angeles County. The proposed seismic retrofitting of the existing bridge would bring the bridge into conformance with current seismic standards. Construction of the retrofits is expected to occur in 2024 and would take approximately 24 weeks. Construction would require some excavations within the creek bottom underneath the bridge; however, any disturbance areas within the creek would be returned to pre-construction conditions upon completion of construction. Temporary staging areas would be established to the north and south of the existing bridge. Once project construction has been completed, the bridge would be maintained and used in a manner consistent with existing conditions. No expansion in lane capacity would occur, and no substantial changes to the layout of connecting roadways would occur.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

• Impacts to biological resources (special-status species, wildlife nursery sites, and non-wetland waters): MM-BIO-1 (pre-construction survey and avoidance of special-status and maternity roosting bats), MM-BIO-2 (pre-construction survey and avoidance of nesting birds and raptors), MM-BIO-3 (avoidance of white rabbit-tobacco plant), MM-BIO-4 (prevention of importation and spread of non-native plants), MM-BIO-5 (replacement of habitat within non-wetland jurisdictional waters)

- Impacts to archaeological resources: MM-CUL-1 (proper treatment for unanticipated archaeological finds)
- Impacts to paleontological resources: MM-GEO-1 (proper treatment for unanticipated paleontological finds)

• Impacts related to hazards and hazardous materials on and near the project site: MM-HAZ-1 (identification and abatement of hazardous materials on the project site), MM-HAZ-2 (proper management of lead-contaminated soils), MM-HAZ-3 (protection of worker health and safety), MM-HAZ-4 (fire prevention and protection)

• Impacts associated with elevated noise levels during construction: MM-NOI-1 (notification of local residents and businesses of the schedule, duration, and progress of construction)

- Impacts to tribal cultural resources: MM-TCR-1 (proper treatment for unanticipated tribal cultural resource finds)
- Impacts to wildfire: MM-HAZ-4 (fire prevention and protection)

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Potential for inadvertent finds of previously unidentified cultural resources or tribal cultural resources during construction ground disturbance.

Provide a list of the responsible or trustee agencies for the project.
