I. PROJECT DESCRIPTION

The following is an Initial Study and Environmental Checklist for the proposed 1207 Tenth Street Mixed-Use Project (project). Copies of all materials referenced in this report are available for review on the City's website at:

https://www.cityofberkeley.info/Planning_and_Development/Zoning_Adjustment_Board/1207_ Tenth.aspx

1. **Project Title:** 1207 Tenth Street Mixed-Use Project

2. Lead Agency Name and Address:

City of Berkeley Department of Planning and Development 1947 Center Street 2nd Floor Berkeley, CA 94704

3. Contact Person and Phone Number:

Ashley James, Associate Planner (510) 981-7458 AJames@cityofberkeley.info

4. Project Sponsor's Name and Address:

Frederick Hyer Hyer Architecture 263 Amherst Avenue Kensington, CA

- 5. General Plan Land Use Designation: Manufacturing
- **6. Zoning:** Mixed Use-Light Industrial (MU-LI)

7. Project Location:

The project site is located at 1207 Tenth Street in West Berkeley, midblock between Harrison Street and Gilman Street, and one block west of San Pablo Avenue, as shown in Figure 1.

The site is approximately 12,800 square feet (0.29 acres) in size and comprises the entirety of the parcel with Assessor's Parcel Number (APN) 060235401503. The site is bounded by a one-story retail building to the north, two one-story retail buildings which front San Pablo Avenue to the east separated from the project site by a 14-foot wide alley, a one-story warehouse and office building to the south, and one-story buildings containing a range of commercial and light industrial uses to the west of the project site.

The project site is one-half block west of several Alameda County Transit (AC Transit) bus routes (52, 72, 72R, 800) which operate along San Pablo Avenue between Harrison Street and Gilman Street; and the 12 and G bus line on Gilman and San Pablo, approximately about 1-mile northwest of the North Berkeley Bay Area Rapid Transit (BART) Station; and 1.5 miles

southwest of the El Cerrito Plaza BART Station. Regional vehicular access to the site is provided by Interstate 80/580 via the Gilman Street on- and off-ramps located approximately 0.6 miles southwest of the project site.

8. Surrounding Land Uses and Setting:

The project site is located in an urban, developed area in northwest Berkeley. The area is developed with retail, office, and light industrial/warehousing uses. Residential neighborhoods are located east of San Pablo Avenue, northwest of Harrison Street (University Village), and south of Camelia Street (two blocks to the south). Goods and services are located along San Pablo Avenue, which consist of one-story commercial buildings, and on Gilman Street, which include the one-story Whole Foods Market located one-half block to the south of the project site. More immediately adjacent to the project site are light industrial and auto-oriented uses.

9. Description of Project:

The project site characteristics and the project are described below.

a. Existing Conditions

The 12,800 square foot (0.29 acres) project site currently contains a 2,300-square-foot, one-story, commercial warehouse building constructed in 1960. The existing 13-foot-tall building is sited at the front of the lot facing Tenth Street and is accessible from Tenth Street via a driveway and 12-foot, 8-inch metal fence with a rolling gate, which leads to a paved contractor's yard area. According to the applicant statement, the property is currently used as research and development and artist studios. However, these existing uses are different than the most recent use approved, according to City zoning and building division records, which is light manufacturing. Planters line the western side of the existing building. There is a portable wood ramp at the northern portion of the existing building. Bike racks and an air compressor are located on the rear (east) facade of the building. Along the interior side (north) lot line there is a paved yard area that contains an approximately 1,000-square-foot accessory building located, and two accessory shed structures to the rear (east) of the lot. Both of these structures are also proposed to be demolished. The remainder of the site (not occupied by structures) is entirely paved and is used for storage, parking, and site circulation. Figure 2 shows photos of the existing uses on the project site and its vicinity.

The main structure is older than 40 years old, and therefore, a historic resource evaluation (HRE) was performed. City permit records indicate that the building was designed by Cameo Engineers Incorporated and constructed by the property owner, Christner Plumbing Company in 1960. The HRE concluded that the building does not meet the criteria for designation of a City Landmark or structure of merit under the Landmark Preservation Ordinance. The accessory building and accessory structures are less than 40 years old and not considered historic.

¹ City of Berkeley, 2020. Berkeley Municipal Code Chapter 3.24, Landmarks Preservation Commission.

The project site was previously used as a plumbing business and is on a Cortese list due to the presence of four Leaking Underground Storage Tanks (LUSTs), which were removed in 1991. The case was closed in 2004. The closure letter includes site management requirements due to the presence of residual contamination at the time of case closure. The requirements include the review of proposed redevelopment plans, such as underground work, excavation, and dewatering, by the City of Berkley Toxic Management Division prior to approval.

b. Project Characteristics

The project would demolish the existing buildings on the project site and construct a new, 75-foot tall, three-story, mixed-use building totaling 25,034 square feet and includes the following:

- Two live/work units totaling 3,871 square feet.
- 12 artist studios totaling 4,406 square feet.
- 2,005-square-foot research and development facility .
- 1,725-square-foot art gallery.
- 2,070-square-foot fabrication shop.
- 5,400-square-foot garage with 12 automobile parking and 24 bicycle parking spaces.

Uses by floor are shown below:

- Ground Floor (see Figure 3):
 - 5,400-square-foot garage with 12 automobile parking and 24 bicycle parking spaces, as well as garbage and electrical/mechanical space.
 - 690-square-foot work portion of live/work unit #2.
 - Building lobby with elevator and three bathrooms.
 - 1,130-square-foot courtyard and sculpture garden, one loading space and stormwater planters.
- Second Floor (see Figure 4):
 - 2,005-square-foot research and development facility.
 - 690-square-foot live portion of live/work unit 2.
 - Six artist studios surrounded by a 2,142-square-foot quad.
 - 1,116-square-foot main hall.
 - 420-square-foot lounge.
- Third Floor (see Figure 5):
 - 2,285-square-foot live/work unit #2.
 - 1,725-square-foot art gallery.
 - Six artist studios, lounge, and kitchen.
 - Four bathrooms.

Automobile access to and from the garage would be via a driveway on Tenth Street on the northern portion of the site. Primary building access is also provided on Tenth Street via a storefront entry. A loading space would be accessible via a 10-foot, 3-inch fence and gate with

rolling door at the southern portion of the project site. Pedestrian access between the garage and the lobby would be provided through a door on the ground floor of the building.

The project would provide a total of 938 square feet of Usable Open Space, consisting of a 678-square-foot courtyard and sculpture garden located on the ground floor and a 260-square-foot balcony accessible only by the occupant of live/work unit #1, located on the third floor.

Construction is anticipated to last approximately 24 months. The excavation depth would be a maximum of 3 feet. No pile driving would occur or be required. The project would not include an emergency generator.

10. Required Approvals:

The following approvals by the City of Berkeley will be required for the project:

- Use Permit pursuant to BMC Section 23C.08.050.A, to demolish a commercial building.
- Use Permit pursuant to BMC Section 23E.80.030, to provide 1,725 square feet of gross floor area dedicated to incidental retail sales of goods manufactured on-site (art gallery).
- Use Permit pursuant to BMC Section 23E.80.030, to construct two new live/work units containing art/craft studios.
- Use Permit pursuant to BMC Section 23E.80.080.E, to designate 10% of the required automobile parking spaces for bicycle parking.
- Administrative Use Permit pursuant to BMC Section 23E.80.050 to construct a new building that is 18,450 square feet in size.
- Administrative Use Permit pursuant to BMC Section 23E.04.020.C to allow architectural elements to exceed the height limit in a mixed-use district.

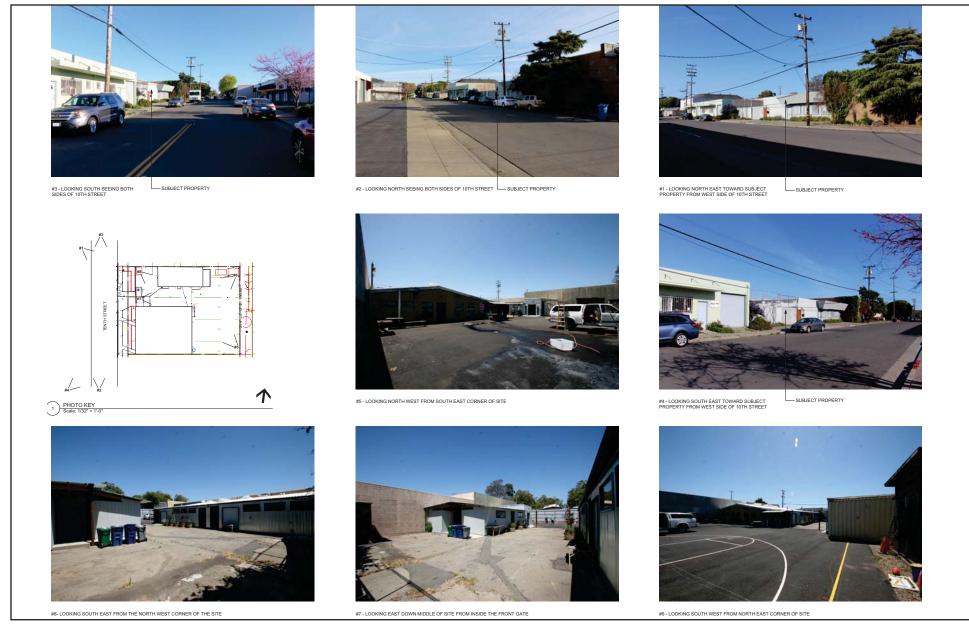

11. Other Public Agencies Whose Approval is Required:

The City of Berkeley is the lead agency with responsibility for approving the project. Discretionary approval from other public agencies is not required, although some ministerial approvals from other public agencies may be needed, such as a water connection permit from the East Bay Municipal Utility District.

III. ENVIRONMENTAL CHECKLIST

1. Agricultural and Forestry Resources

| | | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| Wo | uld the project: | | | | |
| a. | Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to a non-agricultural use? | | | | |
| b. | Conflict with existing zoning for agricultural use, or a Williamson Act contract? | | | | |
| C. | Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? | | | | |
| d. | Result in the loss of forest land or conversion of forest land to non-forest use? | | | | |
| e. | Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use? | | | | |

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to a non-agricultural use?

No Impact. The project site is classified as "Urban and Built-Up Land" by the State Department of Conservation.² The Land Use Element of the City's General Plan does not designate land for agricultural use in the City of Berkeley. Neither the project site nor adjacent properties are

² California Department of Conservation (CDC), 2016. Division of Land Resource Protection, Farmland Mapping and Monitoring Program. Accessed November 2, 2020. https://maps.conservation.ca.gov/dlrp/ciff/.

enrolled in Williamson Act contracts and the area does not support forest land.³ No agricultural or forest resources located on or near the project site; therefore, development of the project would not convert agricultural land, including Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to non-agricultural use, nor forest land to non-forest use.

b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. Refer to discussion 2a. above.

c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

No Impact. Refer to discussion 2a. above

d) Result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. Refer to discussion 2a. above.

No Impact. Refer to discussion 2a. above.

e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?

³ California Department of Conservation (CDC), 2016. Division of Land Resource Protection, Farmland Mapping and Monitoring Program. Accessed November 2, 2020. https://maps.conservation.ca.gov/dlrp/ciff/.

2. Air Quality

| Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|--|--------------------------------------|--|------------------------------------|--------------|
| a) Conflict with or obstruct implementation of the applicable air quality plan? | | | \boxtimes | |
| b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard? | | | \boxtimes | |
| c) Expose sensitive receptors to substantial pollutant concentrations? | | | \boxtimes | |
| d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people? | | | \boxtimes | |

The project site is located in the San Francisco Bay Area Air Basin (SFBAAB), which is under the jurisdiction of the Bay Area Air Quality Management District (BAAQMD). In the SFBAAB, the primary criteria air pollutants of concern are carbon monoxide (CO), ground level ozone formed through reactions of nitrogen oxides (NO_x) and reactive organic gases (ROG), respirable particulate matter (PM₁₀), and fine particulate matter (PM_{2.5}). The BAAQMD adopted thresholds of significance to assist lead agencies in the evaluation and mitigation of air quality impacts under CEQA. The BAAQMD's thresholds, which were incorporated into the 2017 CEQA Air Quality Guidelines, established levels at which emissions of ROG, NO_x, PM₁₀, PM_{2.5}, local CO, and toxic air contaminants (TACs) could cause significant air quality impacts. The BAAQMD's thresholds that relate to the analysis of the project's impacts on the environment are used in this CEQA analysis in conjunction with the BAAQMD's current CEQA Air Quality Guidelines. ⁴ The thresholds of significance used in this CEQA analysis are summarized in Table 1, below.

17

⁴ Bay Area Air Quality Management District (BAAQMD), 2017. CEQA Air Quality Guidelines, May.

TABLE 1 BAAQMD PROJECT-LEVEL THRESHOLDS OF SIGNIFICANCE

| Impact Analysis | Pollutant | Threshold of Significance |
|-------------------------------------|---|--|
| | ROG | 54 pounds/day (average daily emission) |
| | NO _x | 54 pounds/day (average daily emission) |
| Regional Air Quality (Construction) | Exhaust PM ₁₀ | 82 pounds/day (average daily emission) |
| (Construction) | Exhaust PM _{2.5} | 54 pounds/day (average daily emission) |
| | Fugitive Dust (PM ₁₀ and PM _{2.5}) | Best management practices |
| | POC. | 54 pounds/day (average daily emission) |
| | ROG | 10 tons/year (maximum annual emission) |
| | NO | 54 pounds/day (average daily emission) |
| Regional Air Quality (Operation) | NO_x | 10 tons/year (maximum annual emission) |
| | 5 L DM | 82 pounds/day (average daily emission) |
| | Exhaust PM ₁₀ | 15 tons/year (maximum annual emission) |
| | 5 L D14 | 54 pounds/day (average daily emission) |
| | Exhaust PM _{2.5} | 10 tons/year (maximum annual emission) |
| | 60 | 9.0 ppm (8-hour average) |
| | CO | 20.0 ppm (1-hour average) |
| Local Community Risks | Exhaust PM _{2.5} (project) | 0.3 μg/m³ (annual average) |
| and Hazards | Exhaust PM _{2.5} (cumulative) | 0.8 μg/m³ (annual average) |
| (Operation and/or | TACs (project) | Cancer risk increase > 10 in 1 million |
| Construction) | TACs (project) | Chronic hazard index > 1.0 |
| | TACs (supplied in se) | Cancer risk > 100 in 1 million |
| | TACs (cumulative) | Chronic hazard index > 10.0 |

Note: ppm = part per million; $\mu g/m^3$ = micrograms per cubic meter Source: Bay Area Air Quality Management District (BAAQMD), 2017.

Impact Evaluation

a) Conflict with or obstruct implementation of the applicable air quality plan?

Less Than Significant. In accordance with the federal Clean Air Act and California Clean Air Act, the BAAQMD is required to prepare and update an air quality plan that outlines measures by which both stationary and mobile sources of pollutants can be controlled in order to achieve federal and State ambient air quality standards. In April 2017, the BAAQMD adopted the 2017 Clean Air Plan: Spare the Air, Cool the Climate (2017 CAP), which includes 85 control measures to reduce ROG, NO_x, PM₁₀, PM_{2.5}, TACs, and greenhouse gases (GHGs). The 2017 CAP was developed based on a multi-pollutant evaluation method that incorporates well-established studies and methods on quantifying the health benefits and air quality regulations, computer modelling and analysis of existing air quality monitoring data and emission inventories, and

⁵ Bay Area Air Quality Management District (BAAQMD), 2017. Final 2017 Clean Air Plan, Spare the Air, Cool the Climate, April 19.

growth projections prepared by the Metropolitan Transportation Commission and the Association of Bay Area Governments.

Based on the BAAQMD's current CEQA Air Quality Guidelines, the following criteria should be considered to determine if a project would conflict with or obstruct implementation of the 2017 CAP:

- Does the project include applicable control measures from the air quality plan?
- Does the project disrupt or hinder implementation of any air quality plan control measures?
- Does the project support the primary goals of the air quality plan?

The 2017 CAP includes control measures that aim to reduce air pollution and GHGs from stationary, area, and mobile sources. The control measures are organized into nine categories: stationary sources, transportation, buildings, energy, agriculture, natural and working lands, waste, water, and super-GHG pollutants (e.g., methane, black carbon, and fluorinated gases). As described in Table 2, the project would be consistent with applicable control measures from the 2017 CAP. Because the project would not result in any significant and unavoidable air quality impacts related to emissions, ambient concentrations, or public exposures (see subsections b-d below and Section 8, Greenhouse Gas Emissions), the project supports the primary goals of the 2017 CAP. Therefore, based on the BAAQMD's CEQA Air Quality Guidelines, the project would not conflict with or obstruct implementation of the applicable air quality plan, and the impact would be less than significant.

TABLE 2 PROJECT CONSISTENCY WITH BAAQMD'S 2017 CAP

| Control Measures | Project Consistency |
|-------------------|---|
| Stationary Source | The stationary source measures, which are designed to reduce emissions from stationary sources, are incorporated into rules adopted by the BAAQMD and then enforced by the BAAQMD's Permit and Inspection programs. Since the project would not include any stationary sources, the stationary source control measures of the 2017 CAP are not applicable to the project. |
| Transportation | The transportation control measures are designed to reduce vehicle trips, use, miles traveled, idling, or traffic congestion for the purpose of reducing vehicle emissions. The project is an infill mixed-use development that would co-locate residential, commercial, and light industrial uses near employment/schooling opportunities and encourage alternative modes of travel. Other project-specific features, such as the live/work units and bicycle parking, would further reduce trips and vehicle miles traveled generated by the project. Therefore, the project would be consistent with the goals for transportation control in the 2017 CAP. |
| Energy | The energy control measures are designed to reduce emissions of criteria air pollutants, TACs, and GHGs by decreasing the amount of electricity consumed in the Bay Area, as well as decreasing the carbon intensity of the electricity used by switching to less GHG-intensive fuel sources for electricity generation. Since these measures apply to electrical utility providers and local government agencies (and not individual projects), the energy control measures of the 2017 CAP are not applicable to the project. However, the project's electricity is supplied by East Bay |

TABLE 2 PROJECT CONSISTENCY WITH BAAQMD'S 2017 CAP

| Control Measures | Project Consistency |
|------------------------------|--|
| | Community Energy, which would supply more than 80 percent of the electric power |
| | mix from a combination of renewable and greenhouse-gas free sources.a |
| Buildings | The BAAQMD has authority to regulate emissions from certain sources in buildings such as boilers and water heaters but has limited authority to regulate buildings themselves. Therefore, the building control measures focus on working with local governments that have authority over local building codes to facilitate adoption of best practices and policies to control GHG emissions. The project will comply with the local building codes and indoor lighting systems would meet the minimum code efficiency requirements for Title-24 2019 Building Energy Efficiency Standards, such as light emitting diode (LED) lighting, occupancy sensors in offices, and daylight dimming controls at the perimeter zones. Therefore, the project would be consistent with the buildings control measures of the 2017 CAP. |
| Agriculture | The agriculture control measures are designed to primarily reduce emissions of methane. Since the project does not include any agricultural activities, the agriculture control measures of the 2017 CAP are not applicable to the project. |
| Natural and Working Lands | The control measures for the natural and working lands sector focus on increasing carbon sequestration on rangelands and wetlands, as well as encouraging local governments to ordinances that promote urban-tree plantings. Since the project does not include the disturbance of any rangelands or wetlands, the natural and working lands control measures of the 2017 CAP are not applicable to the project. |
| Waste Management | The waste management measures focus on reducing or capturing methane emissions from landfills and composting facilities, diverting organic materials away from landfills, and increasing waste diversion rates through efforts to reduce, reuse, and recycle. The project would comply with local requirements for waste management (e.g., recycling and composting services). Therefore, the project would be consistent with the waste management control measures of the 2017 CAP. |
| Water | The water control measures to reduce emissions from the water sector will reduce emissions of criteria pollutants, TACs, and GHGs by encouraging water conservation, limiting GHG emissions from publicly owned treatment works (POTWs), and promoting the use of biogas recovery systems. Since these measures apply to POTWs and local government agencies (and not individual projects), the water control measures of the 2017 CAP are not applicable to the project. |
| Super GHGs | The super-GHG control measures are designed to facilitate the adoption of best GHG control practices and policies through the BAAQMD and local government agencies. Since these measures do not apply to individual projects, the super-GHG control measures of the 2017 CAP are not applicable to the project. |

^a East Bay Community Energy, 2020. Our Power Mix. Accessed December 8. Our Power Mix, https://ebce.org/our-powermix/.
Source: Bay Area Air Quality Management District (BAAQMD), 2017. CEQA Air Quality Guidelines, May.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard?

Less Than Significant. Construction and operation of the project would generate criteria pollutant emissions that could potentially impact regional air quality. During construction, the primary pollutant emissions of concern would be ROG, NO_x, PM₁₀, and PM_{2.5} from the exhaust of off-road construction equipment and on-road construction vehicles (worker vehicles, vendor trucks, and haul trucks). In addition, fugitive dust emissions of PM₁₀ and PM_{2.5} would be generated by soil disturbance activities, and fugitive ROG emissions would result from the application of architectural coatings and paving during construction. During operation, the primary pollutant emissions of concern would be ROG, NO_x, and exhaust PM₁₀ and PM_{2.5} from mobile sources, energy use and area sources (e.g., consumer products, architectural coatings, and landscape maintenance equipment).

The BAAQMD CEQA Air Quality Guidelines include screening levels for criteria air pollutant emissions from projects of certain land uses. Table 3 shows the percentage of each project land-use size to the BAAQMD's screening levels for construction and operation. If the sum of these percentages exceeds 100 percent, then the project could result in potentially significant air quality impact related to criteria air pollutant emissions. As shown in Table 3, the combined land uses of the project is below the BAAQMD's screening levels (5.5 percent and 3.6 percent , respectively). Therefore, the project's NO_x , ROG, and exhaust PM_{10} and $PM_{2.5}$ emissions would not be considered significant during construction or operation.

TABLE 3 CRITERIA AIR POLLUTANT AND PRECURSOR SCREENING LEVEL SIZES

| | | Project Screening Levels | | Project Land Use Percentages of Screening Levels | | |
|---|-------------------|--------------------------|---------------------------------------|--|--------------|-----------|
| Land Use | Unit | Sizea | Construction | Operation | Construction | Operation |
| Apartments, Low-Rise ^b | Dwelling Units | 2 | 240 | 451 | 0.8% | 0.4% |
| General Office Building ^c | Square Feet | 8,450 | 277,000 | 346,000 | 3.1% | 2.4% |
| General Light Industry ^d | Square Feet | 4,100 | 259.000 | 541,000 | 1.6% | 0.8% |
| | ٦ | | entage of Project mpared to Screer | | 5.5% | 3.6% |

^a Square footage associated with each land use is rounded to the nearest ten and is consistent with Project Description.

The BAAQMD does not have a quantitative threshold of significance for fugitive dust PM₁₀ and PM_{2.5} emissions; however, the BAAQMD considers implementation of best management practices (BMPs) to control dust during construction sufficient to reduce potential impacts to a less-than-

^b Includes 40 percent of proposed live/work units.

Source: Bay Area Air Quality Management District (BAAQMD), 2017. CEQA Air Quality Guidelines, May.

significant level. The project is required to comply with the City of Berkeley's Condition of Approval (COA): *Public Works – Implement BAAQMD-Recommended Measures during Construction*. In accordance with this COA, the project must implement the following BMPs recommended by BAAQMD to reduce fugitive dust emissions during construction:

- A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
- B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
- D. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
- E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
- G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified visible emissions evaluator.
- H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

Because implementation of dust-control measures under this COA would satisfy the BAAQMD's threshold of significance, the air quality impact from dust generated during project construction would be less than significant.

c) Expose sensitive receptors to substantial pollutant concentrations?

Less Than Significant. The term "sensitive receptor" refers to a location where individuals are more susceptible to poor air quality. Sensitive receptors include schools, convalescent homes, and hospitals because the very young, the old, and the infirm are more susceptible than the rest of the public to air-quality-related health problems. Residential areas are also considered sensitive to poor air quality because people are often at home for extended periods, thereby increasing the duration of exposure to potential air contaminants. The BAAQMD recommends evaluating the potential impacts to sensitive receptors located within 1,000 feet of a project. The project's potential impacts to sensitive receptors from emissions of CO and TACs are discussed below.

Localized Carbon Monoxide Concentrations

The occurrence of localized CO concentrations, also known as "hotspots," can impact sensitive receptors in local communities. The source of local CO emissions is often associated with heavy traffic congestion, which most frequently occurs at signalized intersections of high-volume roadways. The BAAQMD's threshold of significance for local CO concentrations is equivalent to the 1- and 8-hour California Ambient Air Quality Standards (CAAQS) of 20.0 and 9.0 parts per million, respectively, because these represent levels that are protective of public health.

The BAAQMD has developed conservative screening criteria that can be used to determine if a project would generate traffic congestion at intersections that could potentially cause or contribute to local CO levels above the CAAQS. According to the BAAQMD, a project would result in a less-than-significant impact related to localized CO concentrations if all of the following screening criteria are met:

- The project is consistent with an applicable Congestion Management Program established by the County Congestion Management Agency for designated roads or highways, regional transportation plans, and local congestion management agency plans.
- The project traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour (vph).
- The project traffic would not increase traffic volumes at affected intersections to more than 24,000 vph where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, below-grade roadway).

As discussed in Section 17, Transportation, the project would not interfere with any applicable congestion management program and would not increase traffic volumes nearby to more than 44,000 vph, or more than 24,000 vph when atmospheric mixing is limited. Therefore, the project would not be expected to cause or contribute to local CO levels above the CAAQS and would have a less-than-significant impact on nearby sensitive receptors.

Toxic Air Contaminants from Construction

Project construction would generate diesel particulate matter (DPM) and PM_{2.5} emissions from the exhaust of off-road diesel construction equipment. DPM and PM_{2.5} from diesel-powered engines are a complex mixture of soot, ash particulates, metallic abrasion particles, volatile organic compounds, and other components that can penetrate deeply into the lungs and contribute to a range of health problems. In 1998, the California Air Resources Board (CARB) identified DPM from diesel-powered engines as a TAC based on its potential to cause cancer and other adverse health effects.⁶ DPM and PM_{2.5} emissions could affect nearby sensitive receptors. The City of Berkeley's COA: *Air Quality – Diesel Particulate Matter during Construction,* requires projects whose construction would last more than two months to comply with one of the following measures:

⁶ California Air Resources Board (CARB), 1998. Initial Statement of Reasons for Rulemaking; Proposed Identification of Diesel Exhaust as a Toxic Air Contaminant, June.

- A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAQMD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or
- B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

The following health risk assessment meets the requirement under Measure A of COA *Air Quality – Diesel Particulate Matter during Construction*. To estimate construction emissions of PM₁₀ and PM_{2.5}, the BAAQMD currently recommends using the most recent version of the California Emissions Estimator Model (CalEEMod Version 2016.3.2). CalEEMod utilizes widely accepted models for emission estimates combined with appropriate default data for a variety of land use projects that can be used if site-specific information is not available. The default data (e.g., type and power of construction equipment) are supported by substantial evidence provided by regulatory agencies and a combination of statewide and regional surveys of existing land uses. The primary input data used to estimate TAC emissions associated with construction of the project are summarized in Table 4. A copy of the CalEEMod report for the project, which summarizes the input parameters, assumptions, and findings, is provided in Appendix A.

TABLE 4 SUMMARY OF CALEEMOD LAND-USE INPUT PARAMETERS

| Land-Use Type | CalEEMod Land-Use Type | Units | Unit Amount ^a |
|--|--------------------------|-----------------------|-----------------------------|
| Live (Mark Units (Pasidontia)) | Apartments Low Disa | Dwelling Units | 2 |
| Live/Work Units (Residential) ^b | Apartments Low Rise | Square Feet | 1,550 |
| Live/Work Units (Retail) ^c | Regional Shopping Center | Square Feet | 2,320 |
| Fabrication Shop, Research, and development facility | General Light Industry | Square Feet | 4,100 |
| Art Gallery and Art Studio | Regional Shopping Center | Square Feet | 6,130 |
| Parking Garage | Enclosed Parking | Square Feet | 5,400 |

Note: The project footprint would be about 0.29 acres.

Source: California Emissions Estimator Model (CalEEMod), Appendix A.

^a Square footage associated with each land use is rounded to the nearest ten and is consistent with Project Description.

b Includes 40 percent of proposed live/work units.

^c Includes 60 percent of proposed live/work units.

Based on the project design, construction activities would include demolition, site preparation, grading/foundation work, building construction, paving, and architectural coatings. Emissions of exhaust PM₁₀ and PM_{2.5} during project construction were estimated using the CalEEMod input parameters summarized in Table 5. For this analysis, emissions of exhaust PM₁₀ were conservatively used as a surrogate for DPM.

TABLE 5 SUMMARY OF CALEEMOD CONSTRUCTION INPUT PARAMETERS

| CalEEMod Input | | | | | |
|---|--|--|--|--|--|
| Category Construction Assumptions and Changes to Default Data | | | | | |
| Construction Equipment | CalEEMod applies default equipment usage and construction phase lengths based on the findings of a statewide survey of construction projects less than 5 acres. The survey results are organized in CalEEMod based on lot acreage size. While the project is less than 1 acre, the multi-story development projects included in the construction survey were at least 2 acres. Therefore, the default equipment usage and construction phase lengths for a 2-acre lot were used to estimate the total hours of equipment operation (and associated emissions) required to construct the project. A bore/drill rig was added to the site preparation phase to account for possible mini piles indicated by the geotechnical report. | | | | |
| Construction Schedule | It was assumed that construction would last approximately 24 months. | | | | |
| Material Movement | It was assumed that maximum depth of excavation would be three across the entire project site. Therefore, approximately 1,400 cubic yards of materials would be excavated and exported, and the same volume of fill would be imported. | | | | |
| Demolition | Approximately 2,300 square feet of existing buildings would be demolished and hauled off-site. | | | | |

Source: California Emissions Estimator Model (CalEEMod), Appendix A.

The annual average concentrations of DPM and exhaust PM_{2.5} during construction were estimated within 1,000 feet of the project using the U.S. Environmental Protection Agency's Industrial Source Complex Short Term (ISCST3) air dispersion model. The input parameters and assumptions used for estimating emission rates of DPM and PM_{2.5} from off-road diesel construction equipment are included in Appendix A.

Daily emissions from construction were assumed to occur from 7:00 a.m. to 6:00 p.m., Monday through Friday, and from 9:00 a.m. to 4:00 p.m. on Saturday and no construction-related activity shall occur on Sunday or any Federal Holiday, consistent with the City's COA: *Construction Hours*. The exhaust from off-road equipment was represented in the ISCST3 model as a series of volume sources with a release height of 5 meters to represent the mid-range of the expected plume rise from frequently used construction equipment.

The model assumes a uniform grid of receptors spaced 20 meters apart around the project site with receptor heights of 1.8 meters (approximately 5 feet, 11 inches, for ground-level receptors) for developing isopleths (i.e., concentration contours) that illustrate the air dispersion pattern from the various emission sources. The ISCST3 model input parameters

included 3 years of the BAAQMD meteorological data from Station 1804 located about 3.5 miles south of the project.

Based on the annual averaged concentrations of DPM and PM_{2.5} estimated using the air dispersion model (Appendix A), potential health risks were evaluated for the maximally exposed individual resident (MEIR) located approximately 450 feet southeast of the project site.

In accordance with guidance from the BAAQMD⁷ and Office of Environmental Health Hazard Assessment (OEHHA),⁸ the health risk assessment calculated the incremental increase in cancer risk and chronic hazard index (HI) to sensitive receptors from DPM emissions during construction. The acute HI for DPM was not calculated because an acute reference exposure level has not been approved by OEHHA and CARB, and the BAAQMD does not recommend analysis of acute non-cancer health hazards from construction activity. The annual average concentration of DPM at the MEIR was used to conservatively assess potential health risks to nearby sensitive receptors.

The incremental increase in cancer risk from on-site DPM emissions during construction was assessed for an infant of 0 to 2 years of age exposed to DPM at the MEIR location. This exposure scenario represents the most sensitive individual who could be exposed to adverse air quality conditions in the vicinity of the project. It was also assumed that the infant at the MEIR location would be exposed to an annual average DPM concentration over the entire estimated duration of construction, which is about 24 months; therefore, this analysis is conservative. The input parameters and results of the health risk assessment are included in Appendix A

Table 6 summarizes the estimated health risks at the MEIR due to DPM and PM_{2.5} emissions from project construction and compares them to the BAAQMD's thresholds of significance. The estimated cancer risk and chronic HI for DPM and annual average PM_{2.5} concentrations from construction emissions were below the BAAQMD's thresholds of significance. Therefore, the impact from the project's emissions of DPM and PM_{2.5} during construction on nearby sensitive receptors would be less than significant with implementation of COA: *Air Quality – Diesel Particulate Matter during Construction*.

Toxic Air Contaminants from Operation

The project does not include any emergency diesel generators. Therefore, project operations would not introduce a new stationary source of TAC emissions and would have no impact on nearby sensitive receptors related to substantial pollutant concentrations.

Cumulative TAC Emissions

In addition to a project's individual TAC emissions during construction and operation, the potential cumulative health risks to the MEIR from existing and reasonably foreseeable future sources of TACs were evaluated. The BAAQMD's online screening tools were used to provide conservative estimates of how much existing and foreseeable future TAC sources would contribute to cancer risk, HI, and PM_{2.5} concentrations. The individual health risks associated with each source were summed to find the cumulative health risk at the MEIR. The supporting health risk calculations are included in Appendix A.

Based on the BAAQMD's Permitted Stationary Sources Risks and Hazards Screening Tool, there are five existing stationary sources of TAC emissions within 1,000 feet of the MEIR that could pose health risks to the MEIR (Table 7). The BAAQMD's Diesel Internal Combustion Engine Distance Multiplier Tool and Gasoline Dispensing Facility Multiplier Tool were used to refine the screening values associated with three of the existing stationary sources to represent the attenuated health risks that can be expected with increasing distance from diesel engines and gasoline fueling facilities, respectively.

There is a foreseeable future residential development within 1,000 feet of the MEIR that may include an emergency diesel generator. The BAAQMD does not issue permits for stationary

⁹ Bay Area Air Quality Management District (BAAQMD), 2020. Permitted Stationary Sources Risks and Hazards Screening Tool. https://baaqmd.maps.arcgis.com/apps/webappviewer/index.html?id=2387ae674013413f987b1071715daa65. Last updated on January 2, 2020.

sources that result in an excess cancer risk greater than 10 in 1 million or a chronic HI greater than 1.0 at the source of emissions. Conservatively assuming an emergency diesel generator for the future residential development would result in a maximum excess cancer risk of 10 in 1 million due to emissions of DPM, the BAAQMD's Risk and Hazards Emissions Screening Calculator (Beta Version 4.0) was used to estimate the equivalent screening-level health risks values for chronic HI and annual average PM_{2.5} concentrations. The health risk screening values from the future generator were then refined based on the distance from the source to the MEIR using the BAAQMD's Diesel Internal Combustion Engine Distance Multiplier Tool.

TABLE 7 CUMULATIVE HEALTH RISKS AT MEIR

| Source | Source Type | Method Reference | Cancer Risk (10 ⁶) | Chronic Hazard Index | PM _{2.5} (μg/m³) |
|----------------------------------|-------------------------------|---------------------|--------------------------------------|----------------------------|------------------------------|
| Project | | | | | |
| Construction Equipment | Diesel Exhaust | | 9.2 | <0.01 | 0.03 |
| Existing Stationary Sources | | | | | |

| Cumulative Health Risks | | 35 | <0.1 | 0.7 | |
| BAAQMD's Cumulative Thresholds | | | 100 | 10.0 | 0.8 |
| Exceed Thresholds? | | | No | No | No |

Notes: $\mu g/m^3 = micrograms$ per cubic meter; NA = not applicable; AADT=annual average daily traffic Health risk screening values derived using the following BAAQMD tools and methodologies:

¹⁾ BAAQMD's 2018 stationary source emissions data.

²⁾ BAAQMD's Risk and Hazards Emissions Screening Calculator (Beta Version 4.0) Diesel Internal Combustion Engine Distance Multiplier Tool.

³⁾ BAAQMD's Risk and Hazards Emissions Screening Calculator (Beta Version 4.0) Gasoline Dispensing Facility Distance Multiplier Tool.

⁴⁾ BAAQMD's Roadway Screening Analysis Calculator.

⁵⁾ BAAQMD's recommended Office of Environmental Health Hazard Assessment cancer risk adjustment factor. Sources: Appendix A.

Preliminary health risk screening values at the MEIR from exposure to mobile sources of TACs were estimated based on the BAAQMD's Bay Area modeling of health risks from highways, railroads, and major roadways with an average annual daily traffic (AADT) volume greater than 30,000 vehicles per day. According to the BAAQMD's modeling of mobile sources, there is no major roadway, railroad, or highway within 1,000 of the MEIR.¹⁰ The BAAQMD also recommends using their Roadway Screening Analysis Calculator to evaluate health risks from roadways with between 10,000 and 30,000 AADT. Based on review of 2020 average annual daily traffic (AADT) volumes forecasted by Alameda County Transportation Commission (Alameda CTC),¹¹ there are two roadways with an AADT volume between 10,000 AADT and 30,000 AADT within 1,000 feet of the project site. The maximum potential health risks at the MEIR from mobile emissions along these roadways were estimated using the BAAQMD's Roadway Screening Analysis Calculator¹² and the cancer risks were adjusted using a factor of 1.374 to account for the most recent health risk parameters recommended by OEHHA.¹³

Estimates of the cumulative health risks at the MEIR are summarized and compared to the BAAQMD's cumulative thresholds of significance in Table 7. The cumulative cancer risk and chronic HI from DPM emissions and annual average $PM_{2.5}$ concentrations at the MEIR were below the BAAQMD's cumulative thresholds. Therefore, the project's emissions of DPM and $PM_{2.5}$ during construction would have a less-than-significant cumulative impact on nearby sensitive receptors.

d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less Than Significant. Typical odor sources are generally associated with municipal, industrial, or agricultural land uses, such as wastewater treatment plants, landfills, confined animal facilities, composting stations, food manufacturing plants, refineries, and chemical plants. The occurrence and severity of odor impacts depend on the nature, frequency, and intensity of the source, the wind speed and direction, and the sensitivity of receptors. Project construction would not be expected to generate significant odors because the project would not include handling or generation of noxious materials. Similarly, the proposed live/work units, art studios, and art gallery would not be expected to be emission sources of significant odors. The proposed research and development facility and the fabrication shop could potentially use substances that would generate odors. However, with ventilation features required in laboratories and fabrication shops designed to protect safety and health of project occupants, it is unlikely that any odor generated indoors on the project site would disperse beyond the

building envelope and be detectable beyond the project site. Therefore, the project's impact related to emissions of odors affecting a substantial number of people is less than significant.

3. Biological Resources

| Wo | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| a. | Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | | | | |
| b. | Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | | | | |
| C. | Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) Through direct removal, filling, hydrological interruption, or other means? | | | | |
| d. | Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? | | | | |
| e. | Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? | | | | |
| f. | Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan or other approved local, regional, or State habitat conservation plan? | | | | |
| | | | | | |

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

No Impact. The project site is located in a densely urbanized area and is currently developed with a single-story commercial warehouse building, and several accessory structures. The remainder of the project site is entirely paved. Planters line the western side of the existing building. The project site is in an urban location and does not contain substantial areas of

native vegetation or biological resources suitable to provide habitat for candidate, sensitive, or special status species, such as riparian habitat or other sensitive natural communities. Common wildlife species that are adapted to urban environments are expected to continue to use the site after redevelopment. The site is not occupied by, or suited for, any special status species. Therefore, the project would not result in direct or indirect adverse effects on special-status plant or wildlife species.

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

No Impact. The project site is in a developed area of Berkeley and does not support any riparian habitats. Development of the project would not directly or indirectly adversely affect any existing riparian habitat within this area. Furthermore, compliance with pre-existing stormwater quality requirements, including City COAs, as discussed in Section 9, Hydrology and Water Quality, would further ensure that the project would not result in an adverse effect on any riparian habitat or other sensitive natural community; therefore, there would be no impact.

c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.)
Through direct removal, filling, hydrological interruption, or other means?

No Impact. The project site does not support any state or federally protected wetlands. ¹⁴ Therefore, no impact related to federally protected wetlands would occur as a result of the project. Compliance with all applicable pre-existing requirements, including City COAs, associated with the protection of water quality in stormwater runoff would further ensure that there are no impacts to wetlands within or beyond the vicinity of the project. Compliance with pre-existing stormwater quality requirements is discussed in Section 9, Hydrology and Water Quality.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Less Than Significant. The project site is entirely developed and is not located within a migratory wildlife movement corridor. The species that use the project site are likely "generalists" that are adept at moving through urban landscapes. Trees generally have the potential to support nests of common native bird species. All native birds and their nests, regardless of their regulatory status, are protected under the federal Migratory Bird Treaty Act and California Fish and Game Code.

¹⁴ U.S. Fish and Wildlife Service (USFWS), 2020. National Wetlands Inventory, Wetlands Mapper. Accessed November 2, 2020. www.fws.gov/wetlands/data/mapper.HTML.

The project site has wood planter boxes at the front of the site and an existing Bay Tree is located in the alleyway adjacent to the to the east, both of which would be removed during construction. Two street trees would be planted. Furthermore, the City's COA: *Avoid Disturbance of Nesting Birds*, prohibits initial site disturbance activities, including vegetation and concrete removal, during the February 1 to August 30 bird nesting season if feasible. If nesting season avoidance is not feasible, nesting bird surveys conducted by a qualified biologist are required and no ground-disturbing activities are permitted in proximity to the nests until the nest are no longer active.

The project site is in a busy urban area with little to no native vegetation, and the project would not decrease the total amount of vegetation on or adjacent to the site, but would rather increase the amount of vegetation from existing conditions. Furthermore, the City's COA: *Avoid Disturbance of Nesting Birds*, above would ensure avoidance of effects to nesting birds during site disturbance activities. For all of these reasons, the project would have a less-than-significant impact on the movement of native or resident migratory wildlife.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Less Than Significant. According to Policy EM-30 and EM-31 of the City's General Plan, new development should contribute to the urban forest through preservation of existing on-site trees, wherever feasible; replacement of trees on site; and the addition of new trees in the public right-of-way. The project would require removal of an existing tree in the alleyway adjacent to the site to the east, which is not a coast live oak tree and is therefore not protected by the City's moratorium on the removal of such trees. In addition, the project includes the planting of two new street trees on the Tenth Street sidewalk. Therefore, the project would have a less-than-significant impact related to policies or ordinances protecting biological resources.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan or other approved local, regional, or State habitat conservation plan?

No Impact. The project is not located within the boundaries of an adopted conservation plan. Therefore, the project would not conflict with the provisions of a habitat conservation plan, natural community plan, or other approved local, regional, or State habitat conservation plan.

4. Cultural Resources

| Wo | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| a. | Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5? | | | | |
| b. | Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5? | | | | |
| C. | Disturb any human remains, including those interred outside of formal cemeteries? | | | | |

a) Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?

Less Than Significant. The project involves the demolition of a one-story commercial building that was constructed in 1960. City permit records indicate that the building was designed by Cameo Engineers Incorporated and constructed by the property owner, Christner Plumbing Company in 1960. The project would also demolish an accessory building and accessory structure that are each less than 40 years old. While building permit records could not be located for construction of the accessory building and accessory structures on site, it is understood that they were constructed after 1981. Pursuant to BMC Section 23C.08.050.C, neither of the accessory structures are subject to Landmarks Preservation Commission review prior to consideration of the Use Permit application for demolition, because they are less than 40 years old. For this reason, the HRE only focuses on the main building.

The following addresses historic potential per the California Register of Historical Resources (CR), which were addressed in the HRE that has been submitted in the form of California Department of Parks and Recreation (DPR) Forms 523 A and B, and completed by historical architect Mark Hulbert in May 2020 and revised in July 2020. Owing to the subject building's commercial warehouse use, location in West Berkeley, and period of significance, this property is linked to a historic context that is best defined as Berkeley's commercial and industrial development. The evaluation of the property's historical significance, therefore, analyzes the significance criteria within the themes of commercial and industrial development.

In determining the potential significance of the property, the HRE analyzed the buildings extant features and any associated parties against the criteria of the CR and the Landmarks Preservation Ordinance (LPO), BMC Chapter 3.24. The evaluation concentrates on possible associations with events (CR-1, BMC Chapter 3.24.110.A.2 and B.2), persons (CR-2, BMC Section

¹⁵ Hulbert, Mark. 2020 Department of Parks (DPR Forms) A and B, 1207 Tenth Street, May.

3.24.110.A.4), architectural design (CR-3, BMC Section 3.24.110.A.1a-c and B.2.a and C), and information/education (CR-4, BMC Section 3.24.110.A.3).

The main commercial warehouse building is a utilitarian wood frame structure, clad with vertical wood board and corrugated sheet metal, and includes a projecting awning over the building's entrance on its primary (west) façade. There are three metal windows with metal security grills set in between two doors on its primary façade facing Tenth Street. The building's north side was an open shed. Sometime after 1981 this portion was enclosed and is now clad with corrugated metal siding and includes metal doors and windows.

The HRE reports that the property was vacant until the 1940s, when Codornices Village, a large World War II-era housing complex, was constructed in the vicinity. The subject property was first developed in 1960 thereafter occupied by the Christner Plumbing Company. After 2000, the project site was occupied by a landscaping business called "Shelterbelt Builders." Since approximately 2018 the project site has also been used as research and development and artist's studios, replacing the landscaping business. ¹⁶

Criterion 1 - Events

The subject property was first developed in 1960 and may have been originally occupied by an irrigation/sprinkler business. By 1973 the project site was occupied by commercial (plumbing contractor) use. ¹⁷ Such commercial uses were typical west of the San Pablo Avenue corridor in the mid-20th century, and therefore do not constitute an important development event or pattern. There are no specific events of any individual importance associated with this commercial property. Consequently, as there are no identifiably historic events associated with the subject property, it does not meet CR criterion 1.

Criterion 2 - Persons

At present no information has been found about identified persons associated with the subject commercial building when it was operated by the Christner Plumbing Co. Lacking identifiable associations, the subject property does not meet CR criterion 2.

Criterion 3 - Design/Construction

1207 Tenth Street is a basic, flat-roofed, wood framed, wood and metal clad building, The building is therefore without potential historical design or construction distinction. In addition, neither the original designer or builder has been identified, nor are there artistic qualities to the building. Thus, the subject property and building does not meet CR criterion 3.

¹⁶International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

¹⁷International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

Criterion 4 - Education and Pre-history

In conclusion, based on the presently available records and its exterior characteristics and overall presence, the subject property and building have no potential historical or historic architectural significance per the National and California Register criteria. The HRE and staff conclude¹⁸ that the building would not meet the criteria for designation of a City Landmark or structure of merit under the LPO.¹⁹ The LPO criteria closely aligns with the National and State Register criteria, giving value to architectural merit as well as historical, education and cultural significance.

Therefore, the demolition of the existing structures on the project site and the construction of a new, mixed-use residential building would have a less than significant impacts on historical resources.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?

Less Than Significant. No archaeological or paleontological resources are currently known to exist on the project site. Nevertheless, impacts to unrecorded subsurface archaeological resources could occur as subsurface construction could uncover previously undisturbed resources if they are located on the site. Compliance with the City's COA: *Archaeological Resources*, below, which addresses accidental discovery of archaeological resources during construction, would ensure any potential impacts to archaeological resources remain less than significant.

Pursuant to CEQA Guidelines Section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:

- A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian, or paleontologist to assess the significance of the find.
- B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

¹⁸ City of Berkeley, 2020, Landmarks Preservation Commission Staff Report, August 6.

¹⁹ City of Berkeley, 2020. Berkeley Municipal Code Chapter 3.24, Landmarks Preservation Commission.

- C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.
- D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources are carried out.
- E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

Accordingly, the project would have a less than significant impact on archaeological resources.

c) Disturb any human remains, including those interred outside of formal cemeteries?

Less Than Significant. The project site and the surrounding area is highly developed and the likelihood of encountering human remains is low. Any potential impacts to human remains would be less than significant as the project would comply with the City's COA: *Human Remains*, as described below.

In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt, and the Alameda County Coroner shall be contacted to evaluate the remains following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

5. Energy

| Wo | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| a. | Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation? | | | | |
| b. | Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? | | | | |

a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Less Than Significant. Construction of the project would result in short-term consumption of energy. Energy during construction would be primarily consumed for the manufacture and transportation of building materials, preparation of the project site, and construction of buildings and infrastructure. During project construction, fossil fuels would be consumed by operation of off-road construction equipment and on-road vehicles such as haul trucks and worker vehicles. Grid power may also be needed for construction trailers or electric construction equipment. Energy use during construction would be temporary in nature, and construction equipment used would be typical of construction projects in the region. The construction contractor would also have a financial disincentive to waste fuel used by the construction equipment (i.e., excess fuel usage reduces profits). Therefore, it is generally assumed that energy used during construction would be conserved to the maximum extent feasible. Furthermore, regulations enforced by the California Air Resources Board (Title 13, Section 2485 of California Code of Regulations) limit the idling time of diesel construction equipment to 5 minutes. It is anticipated that energy consumption during the construction period would be minimized to the maximum extent practical.

Operational energy use would include use of transportation fuel. As discussed in Section 17, Transportation/Traffic, the project would meet applicable VMT screening criteria, therefore both the residential and light industrial land use components of the project would have a less than significant VMT impact. Although the project would likely result in additional daily vehicle trips, the increase would be due mostly to the introduction of residential uses with the addition of live/work units in West Berkeley. In addition, the project would be located on an urban infill site already served by roads, transit, and utilities. This type of mixed-use infill development tends to encourage use of public transit, walking, and biking as alternatives to private vehicles, as well as trip internalization, thereby reducing unnecessary consumption of vehicle fuels.²⁰

²⁰ Victoria Transport Policy Institute.2020. Land Use Impacts On Transport: *How Land Use Factors Affect Travel Behavior*. June 5.

In addition to transportation energy use, operation of the project would consume natural gas and electricity for building heating and power, lighting, and water conveyance, among other operational requirements. The project would increase the number of natural gas- and electricity consuming uses above those existing at the project site. However, the City of Berkeley passed a new ordinance on July 16, 2019, prohibiting natural gas infrastructure in new buildings, effective January 1, 2020. This ordinance will reduce natural gas usage and increase reliance on electrical energy in place of natural gas for new development within the city. Project energy consumed would represent an incremental increase in energy usage compared to existing energy use in Berkeley, and the project would implement energy-efficient components to reduce energy demand. Additionally, the project would comply with Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37), including through the provision of rooftop solar panels, electric vehicle charging infrastructure, and low-carbon concrete. Therefore, construction and operation of the project would not result in potentially significant environmental effects due to the wasteful, inefficient, or unnecessary consumption of energy and this impact would be less than significant.

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Less Than Significant. The City of Berkeley's Climate Action Plan contains GHG-reduction policies for transportation and land use, building energy use, as well as waste reduction and recycling. As discussed in Section 8, Greenhouse Gas Emissions, the project would be consistent with the Climate Action Plan and the energy efficiency strategies contained therein. Therefore, the project would not conflict with or obstruct a State or local plan for renewable energy or energy efficiency and this impact would be less than significant.

6. Geology and Soils

| Wo | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| a. | Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: | | | | |
| | i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. | | | | |
| | ii. Strong seismic ground shaking? | | | \boxtimes | |
| | iii. Seismic-related ground failure, including liquefaction? | | | | |
| | iv. Landslides? | | | | \boxtimes |
| b. | Result in substantial soil erosion or the loss of topsoil? | | | | |
| c. | Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in onor off-site landslide, lateral spreading, subsidence, liquefaction, or collapse? | | | | |
| d. | Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property? | | | | |
| e. | Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water? | | | | |
| f. | Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? | | | | |

- a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:
 - i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on

other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42;

- ii) Strong seismic groundshaking;
- iii) Seismic-related ground failure, including liquefaction;
- iv) Landslides?

Less Than Significant. The project site is located within the central portion of the Coast Ranges geomorphic province, which includes numerous active faults identified by the California Geological Survey (CGS) under the Alquist-Priolo Earthquake Fault Zoning Act.²¹ CGS defines an active fault as one that has ruptured during the Holocene Epoch (i.e., the last 11,000 years). The Working Group on California Earthquake Probabilities and the United States Geologic Survey (USGS) have predicted a 6.4-percent probability of a 6.7 magnitude (Mw. or Moment Magnitude)²² or greater earthquake on the Northern San Andreas Fault between 2014 and 2044, a 14.3-percent chance on the Hayward Fault, and a total probability of 72 percent that an earthquake of that magnitude will occur on one of the regional San Francisco Bay Area faults during that time.²³ Potential impacts associated with seismic activity at the project site, including fault rupture, ground shaking, ground failure, liquefaction, and landslides are discussed below.

Fault Rupture

Surface fault rupture occurs when the ground surface is broken due to fault movement during an earthquake. Fault rupture is generally expected to occur along active fault traces. Areas susceptible to fault rupture are delineated by the CGS Alquist-Priolo Earthquake Fault Zones and require specific geological investigations prior to certain kinds of development to reduce the threat to public health and safety and to minimize the loss of life and property posed by earthquake-induced ground failure. The project site is not located within or adjacent to an Alquist-Priolo Earthquake Fault Zone. ²⁴ Therefore, the project would have no impact on people and structures related to fault rupture.

²¹ A geomorphic province is a naturally defined geologic region that displays a distinct combination of features based on geology, faults, topography, and climate. Eleven geomorphic provinces are recognized in California.

 $^{^{22}}$ Moment magnitude (M_w) is now commonly used to characterize seismic events as opposed to Richter Magnitude. Moment magnitude is determined from the physical size (area) of the rupture of the fault plane, the amount of horizontal and/or vertical displacement along the fault plane, and the resistance to rupture of the rock type along the fault.

²³ United States Geological Survey (USGS), 2015. UCERF3: A New Earthquake Forecast for California's Complex Fault System, USGS Fact Sheet 2015-3009, March. Accessed December 9. https://pubs.usgs.gov/fs/2015/3009/pdf/fs2015-3009.pdf.

²⁴ California Department of Conservation (CDC), 1982. Earthquake Fault Zones; Richmond Quadrangle, January 1.

Ground Shaking

The project site is susceptible to strong seismic ground shaking in the event of a major earthquake. Nearby active faults include the San Andreas fault (17.5 miles to the southwest), the Calaveras and Concord faults (14.5 miles to the east-southeast), and the Hayward fault (1.75 miles to the northeast). These faults are capable of producing at least moderate to strong seismic ground shaking at the project site.25 The 2019 California Building Code (CBC), as adopted in Chapter 19.28 of the Berkeley Municipal Code, contains requirements for structural design, including seismic design specifications. Adherence to the 2019 CBC requires that a sitespecific geotechnical investigation be performed for the project to evaluate soil stability, soil strength, position and adequacy of load-bearing soils, the effect of moisture variation on soilbearing capacity, compressibility, liquefaction, and expansiveness; and that a geotechnical report be prepared to provide recommendations on foundation type and design criteria. A Geotechnical Report²⁶ was prepared for the project in 2019 which included an evaluation of subsurface conditions at the project site and provided recommendations for site preparation, earthwork, and foundation designs to address the potential for strong seismic ground shaking. Compliance with the mandatory building code structural specifications, as well as adherence to the recommendations in the geotechnical report, would result in a building that adequately resists adverse effects from seismic ground shaking. Therefore, impacts associated with strong seismic ground shaking would be less than significant.

Seismic-Related Ground Failure and Liquefaction

The potential for different types of ground failure to occur during a seismic event is discussed below.

Liquefaction

Soil liquefaction is a phenomenon primarily associated with saturated soil layers located close to the ground surface. During ground shaking, these soils lose strength and acquire a "mobility" sufficient to permit both horizontal and vertical movements. Soils that are most susceptible to liquefaction are clean, loose, uniformly graded, saturated, fine-grained sands that lie relatively close to the ground surface. However, loose sands that contain a significant amount of fines (silt and clay) may also liquefy.

²⁵ Langbehn Geotechnical Group, 2019. Geotechnical Investigation, New Commercial Development and, Seismic Hazard Evaluation, 1207 10th Street, Berkeley, California, June 28.

²⁶ Langbehn Geotechnical Group, 2019. Geotechnical Investigation, New Commercial Development and, Seismic Hazard Evaluation, 1207 10th Street, Berkeley, California, June 28.

The project site is located within a Seismic Hazard Zone for liquefaction as mapped by CGS. Ampping by USGS indicates that the project site has moderate liquefaction susceptibility. Because the project site is located in a Seismic Hazard Zone for liquefaction as mapped by CGS, the Seismic Hazards Mapping Act (Public Resources Code, Chapter 7.8, Section 2690-2699.6) requires that a site-specific geotechnical report must be prepared consistent with CGS Special Publication 11729 (as amended) and contain, at a minimum, a description of the geological and geotechnical conditions at the site, an evaluation of site-specific seismic hazards based on geological and geotechnical conditions, and recommended measures to reduce potential impacts related to liquefaction hazards. According to the Geotechnical Report, the risk of soil liquefaction during strong seismic shaking can be considered low to moderate for most soils at the project site; however, the risk of liquefaction is locally high for the sandy layer observed at a depth of about 20 to 21.5 feet in the northwest portion of the project site, and possibly moderate to high in some of the cleaner sand lenses observed in all borings below the groundwater level.

A Geotechnical Peer Review³¹ was prepared for the project and Geotechnical Report, which indicated that earth materials on the project site range from expansive clays to sands and loose gravels, which are prone to liquefaction, and that four underground storage tanks (USTs) were removed from the project site in 1991 and were potentially replaced with excavation spoils and undocumented imported fill. The Geotechnical Peer Review indicated that the potential for liquefaction was not fully evaluated in the Geotechnical Report consistent with State requirements, and recommended that additional geotechnical investigation should be performed to further evaluate the potential for hazards related to liquefaction and undocumented fill, including evaluation of total and differential settlements and the potential for surface expressions of liquefaction.

Consistent with the recommendations of the Geotechnical Peer Review, ³² additional geotechnical investigation and recommendations for the project would be required in accordance with the Seismic Hazards Mapping Act. Required implementation of additional geotechnical investigation and recommendations, and compliance with the mandatory building code structural specifications would result in a building that resists adverse effects related to liquefaction. Therefore, impacts would be less than significant.

Lateral Spreading

Lateral spreading is a phenomenon in which surficial soil displaces along a shear zone that has formed within an underlying liquefied layer. Upon reaching mobilization, the surficial soils are transported downslope or in the direction of a free face by earthquake and gravitational forces. Lateral spreading is not likely to occur at the project site because the project site is relatively flat and there are no slopes or free faces on or nearby the project site. The Geotechnical report also indicated that due to the level terrain, the risk of lateral spreading at the project site is considered low. Therefore, impacts associated with lateral spreading would be less than signification.

Surface Settlement

Settlement can occur when non-saturated, cohesionless soil is densified by earthquake vibrations. As discussed above, there may be undocumented fill at the project site associated with the backfilling of a former USTs excavation, and the Geotechnical Peer Review indicated that additional geotechnical investigation should be performed to further evaluate the potential for settlement related to undocumented fill.³³ Consistent with the recommendations of the Geotechnical Peer Review, additional geotechnical investigation and recommendations for the project would be required in accordance with the Seismic Hazards Mapping Act. Final grading, foundation, and building plans must be designed in accordance with the 2019 CBC and geotechnical recommendations. These designs would include measures that would address, as necessary, the potential for surface settlement. Therefore, implementation of additional geotechnical investigation and recommendations, as required by the existing regulations discussed above, would ensure that the potential impacts associated with surface settlement would be less than significant.

Landslides

Seismically induced landslides occur as the rapid movement of large masses of soil on unstable slopes during an earthquake. The Seismic Hazard Zones mapped by CGS delineate areas susceptible to seismically-induced landslides that require additional investigation to determine the extent and magnitude of potential ground failure. According to CGS, the project site is not located within or near a Seismic Hazard Zone for seismically-induced landslides, and the project site and surrounding area are relatively flat.³⁴ Therefore, the project would have no impact related to seismically-induced landslides.

b) Result in substantial soil erosion or the loss of topsoil?

Less Than Significant. The topography of the project site and surroundings is relatively level and the project site is already developed with a one-story commercial warehouse. However, soil

³³ Cotton, Shires and Associates, Inc., 2020. Geotechnical Peer Review – Liquefaction Zone, Bachrach, New Three-Story Commercial Building, ZP2020-0046,1207 Tenth Street, October 26.

³⁴ California Geological Survey (CGS), 2003. Seismic Hazard Zones; Richmond Quadrangle, February 14.

erosion, which is discussed in detail in Section 10, Hydrology and Water Quality, could occur during project grading and construction. As described in Section 10, compliance with the City's COAs related to water quality and stormwater protection during construction would ensure that the project would have a less-than-significant impact related to erosion or the loss of top soil. This includes the City's COA which requires the applicant to prepare an erosion prevention plan, to be approved by the City, for any soil disturbance activities during the rainy season.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Less Than Significant. As previously discussed in sub-section a) above, lateral spreading and landslides are not a concern for the project because of the flat topography of the area. As discussed above, there are liquefiable soils at the project site and there may be unstable undocumented fill at the project site associated with the backfilling of a former USTs excavation. Consistent with the recommendations of the Geotechnical Peer Review, ³⁵ additional geotechnical investigation and recommendations for the project would be required in accordance with the Seismic Hazards Mapping Act. Required implementation of additional geotechnical investigation and recommendations, and compliance with the mandatory building code structural specifications would result in a building that resists adverse effects related to liquefaction of potentially unstable soils.

Subsidence

Subsidence or collapse can result from the removal of subsurface water resulting in either catastrophic or gradual depression of the surface elevation of the project site. The only removal of subsurface water that may occur as part of the project is temporary dewatering of excavations during construction. The temporary dewatering of excavations would not cause significant ground subsidence or collapse as the dewatering would be the limited and localized to the area of the excavation. Therefore, this potential impact is less than significant.

Consolidation

Consolidation of soils is a process by which the soil volume decreases as water is expelled from saturated soils under static loads. As the water moves out from the pore space of the soil, the solid particles realign into a denser configuration which results in settlement. Consolidation typically occurs as a result of new buildings or fill materials being placed over compressible soils. Soils on the project site, including potential undocumented fill material, could be subject to consolidation from the load of the new structure that would be constructed on the project site. This could result in settlement on the project site which could impact the proposed

³⁵ Cotton, Shires and Associates, Inc., 2020. Geotechnical Peer Review – Liquefaction Zone, Bachrach, New Three-Story Commercial Building, ZP2020-0046,1207 Tenth Street, October 26.

structure and could also potentially impact neighboring structures. The Geotechnical Report³⁶ indicated that the weak and potentially compressible soils observed beneath the northwest portion of the project site pose a risk for long-term settlements under normal building loads and in response to strong seismic shaking. The Geotechnical Report recommended the use of a mat slab foundation combined with deep foundation elements such as driven "mini" piles to address settlement concerns. The Geotechnical Peer Review indicated that the potential undocumented fill in the area of the former USTs was not evaluated by the Geotechnical Report, and that additional geotechnical investigation would be required to address the potential for settlement and differential settlement associated with undocumented fill.³⁷

Consistent with the recommendations of the Geotechnical Peer Review, ³⁸ additional geotechnical investigation and recommendations for the project would be required in accordance with the Seismic Hazards Mapping Act. Required implementation of additional geotechnical investigation and recommendations, and compliance with the mandatory building code structural specifications would result in a building that resists adverse effects related to settlement of potentially unstable soils. Therefore, compliance with existing regulations would reduce the potential risks to people and structures as a result of consolidation of unstable soils to a less-than-significant level.

Collapse or Settlement Related to Excavation near Existing Structures

The project would involve demolition of the existing structures and excavation for the construction of the proposed structure. If appropriate shoring and excavation practices are not performed during project construction, the soil supporting structures adjacent to the project site could become unstable and collapse or settle, resulting in damage to the adjacent structures.

Section 1804.1 of the 2019 CBC indicates that excavation for any purpose shall not reduce lateral support from any foundation or adjacent foundation without first underpinning or protecting the foundation against detrimental lateral or vertical movement, or both. Section 1803.5.7 of the 2019 CBC indicates that where excavation will reduce support from any foundation, a registered design professional shall prepare an assessment of the structure as determined from examination of the structure, the review of available design documents and, if necessary, excavation of test pits. The registered design professional shall determine the requirements for underpinning and protection and prepare site-specific plans, details, and sequence of work for submission. Such support shall be provided by underpinning, sheeting, and bracing, or by other means acceptable to the building official.

³⁶Langbehn Geotechnical Group, 2019. Geotechnical Investigation, New Commercial Development and, Seismic Hazard Evaluation, 1207 10th Street, Berkeley, California, June 28.

³⁷ Cotton, Shires and Associates, Inc., 2020. Geotechnical Peer Review – Liquefaction Zone, Bachrach, New Three-Story Commercial Building, ZP2020-0046,1207 Tenth Street, October 26.

³⁸ Cotton, Shires and Associates, Inc., 2020. Geotechnical Peer Review – Liquefaction Zone, Bachrach, New Three-Story Commercial Building, ZP2020-0046,1207 Tenth Street, October 26.

Project plans would be designed in accordance with the 2019 CBC, which would include measures that would address, as necessary, the potential for impacts related to existing foundations from proposed excavation activities. Therefore, compliance with the existing regulations would ensure that the potential impacts associated with excavation near existing structures would be less than significant.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code, creating substantial risks to life or property?

Less Than Significant. Expansive soils are characterized by the potential for shrinking and swelling as the moisture content of the soil decreases and increases, respectively. Shrink-swell potential is influenced by the amount and type of clay minerals present and can be measured by the percent change of the soil volume. The shrinking and swelling of soil can damage structures, concrete slabs, and paving. The Geotechnical Report indicated that there is highly expansive topsoil at the project site and included recommendations to address the expansive soils including use of a structural mat slab foundation, removal of expansive soil, placement of non-expansive engineered fill, directing surface runoff away from foundations.

The project would be designed in accordance with the 2019 CBC and geotechnical recommendations which would mitigate the potential for impacts related to expansive soils. Therefore, compliance with the existing regulations would ensure that the potential impacts associated with expansive soils would be less than significant.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

No Impact. The project site will be served by a wastewater conveyance system maintained by the City of Berkeley. Wastewater from the City's collection system is conveyed to the East Bay Municipal Utility District's wastewater treatment plant. Development of the project would not involve the use of septic tanks or alternative wastewater disposal systems. Therefore, the project would have no impact related to septic tanks or alternative wastewater disposal systems.

f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less Than Significant. The project would involve subsurface construction activities. Therefore, it is possible that paleontological resources could be encountered during construction. Implementation of City's COA: *Paleontological Resources*, described below, would ensure that any impacts to paleontological resources encountered during project subsurface construction activities would be less than significant.

In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP]

1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for minimizing the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

49

7. Greenhouse Gas Emissions

| W | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| a) | Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | | | | |
| b) | Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions greenhouse gases? | | | | |

Climate change refers to change in the Earth's weather patterns, including the rise in temperature due to an increase in heat-trapping greenhouse gases (GHGs) in the atmosphere. According to the California Air Resources Board (CARB), some of the potential effects of increased GHG emissions and the associated climate change may include loss in snow pack (affecting water supply), sea level rise, more frequent extreme weather events, more large forest fires, and more drought years. In addition, climate change may increase electricity demand for cooling, decrease the availability of hydroelectric power, and affect regional air quality and public health.³⁹

In 2006, the California State Legislature passed the California Global Warming Solutions Act (AB 32), which requires the CARB to develop and implement regulatory and market mechanisms that will reduce GHG emissions to 1990 levels by 2020. In 2016, the state legislature adopted Senate Bill (SB) 32, which requires further reduction of GHG emissions to 40 percent below the 1990 level by 2030. In addition, Executive Order S-3-05 set a GHG reduction goal of 80 percent below 1990 levels by 2050. In 2009, the City of Berkeley created and adopted the Climate Action Plan in order to implement measures to reduce GHG emissions and adapt to climate change. The Climate Action Plan sets the target of reducing the City of Berkeley's GHG emissions by 33 percent below the 2000 levels by 2020, and by 80 percent below the 2000 levels by 2050. The City's GHG reduction targets are more aggressive than the statewide reduction targets. The Climate Action Plan includes detailed recommendations for sustainable transportation and land use, building energy use, waste reduction and recycling, community outreach and empowerment, and preparing for climate change impacts. ⁴⁰

The primary GHG emissions of concern are carbon dioxide, methane, and nitrous oxide. Other GHGs of concern include hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride, but

³⁹ California Air Resources Board (CARB), 2017. The 2017 Climate Change Scoping Plan Update, January 20.

⁴⁰ City of Berkeley, 2009. Climate Action Plan, June.

their contribution to climate change is less than one percent of the total GHGs that are well mixed (i.e., that have atmospheric lifetimes long enough to be homogeneously mixed in the troposphere). Each GHG has a different global warming potential. For instance, methane traps about 21 times more heat per molecule than carbon dioxide. As a result, emissions of GHGs are reported in metric tons of carbon dioxide equivalents (CO_2e), where each GHG is weighted by its global warming potential relative to carbon dioxide. Carbon dioxide emissions dominate the GHG inventory in the San Francisco Bay Area Air Basin (SFBAAB), accounting for more than 90 percent of the total CO_2e emissions reported. ⁴²

The project is located in the SFBAAB, which is under the jurisdiction of the BAAQMD. The BAAQMD established a climate protection program to reduce pollutants that contribute to global climate change and affect air quality in the SFBAAB. The climate protection program includes measures that promote energy efficiency, reduce vehicle miles traveled, and develop alternative sources of energy, all of which assist in reducing emissions of GHGs and air pollutants that affect the health of residents. The BAAQMD also seeks to support current climate protection programs in the region and to stimulate additional efforts through public education and outreach, technical assistance to local governments and other interested parties, and promotion of collaborative efforts among stakeholders.

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Less Than Significant. The project would generate temporary GHG emissions through construction activities, such as operation of on-site heavy construction equipment and off-site construction vehicle trips, and would generate long-term GHG emissions through project operations related to the direct and indirect combustion of fossil fuels for generation of heat and electricity, decomposition of solid waste, and wastewater treatment.

The BAAQMD CEQA Air Quality Guidelines established thresholds of significance for project-level annual GHG emissions and annual GHG emissions per capita of service population. The BAAQMD does not recommend a threshold of significance for GHG emissions during construction because there is not sufficient evidence to determine a level at which temporary construction emissions are significant. The BAAQMD CEQA Guidelines also established screening levels for GHG emissions from projects of certain land uses. Table 8 shows the percentage of each project land-use size to the BAAQMD's screening levels. If the sum of these percentages exceeds 100 percent, then the project could result in potentially significant air quality impact related to criteria air pollutant emissions. As shown in Table 8, below, the combined land uses of the project size is below the BAAQMD's screening level. Therefore,

52

⁴¹ Intergovernmental Panel on Climate Change, 2013. Climate Change 2013, the Physical Science Basis.

⁴² Bay Area Air Quality Management District, 2017. Final 2017 Clean Air Plan, Spare the Air, Cool the Climate. April 19.

emissions of GHGs from the project would not be considered a significant impact on global climate change.

TABLE 8 GREENHOUSE GAS EMISSIONS SCREENING LEVEL SIZES

| Land-Use | Unit | Project Sizeª | Screening Levels | Project Land Use Percentages of Screening Levels |
|--------------------------------------|-------------------|------------------|---------------------|--|
| Apartments, Low-Rise ^b | Dwelling Units | 2 | 78 | 2.6 |
| General Office Building ^c | Square Feet | 8,450 | 53,000 | 15.9 |
| General Light Industry | Square Feet | 4,100 | 121,000 | 3.4 |
| Total Percentage | 21.9 | | | |

Notes: The project footprint would be about 0.29 acres.

Source: Bay Area Air Quality Management District (BAAQMD), 2017. CEQA Air Quality Guidelines, May.

b) Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions greenhouse gases?

Less Than Significant. The BAAQMD's GHG quantitative thresholds were designed to ensure compliance with the State's AB 32 GHG reduction goals, as set forth in the CARB's Climate Change Scoping Plan. Since the GHG emissions from the project would be below the BAAQMD's thresholds of significance (Table 8), it can be assumed that the project is consistent, and not in fundamental conflict, with the AB 32 Scoping Plan.

As discussed previously, the City of Berkeley adopted the Climate Action Plan in June 2009. The project is consistent with, and would not hinder, the GHG reduction goals set forth in the Climate Action Plan and the green planning policies of the General Plan because the project would promote land use patterns and densities that help improve regional air quality conditions, as demonstrated by its compliance with Plan Bay Area's preferred development scenario. The project would also be required to comply with the CALGreen Code, which supports the goals, policies, and actions of the Climate Action Plan, the General Plan, and the West Berkeley Plan. The project's consistency with the applicable goals in the Climate Action Plan is summarized in Table 9.

^a Square footage associated with each land use is rounded to the nearest ten and is consistent with Project Description.

^b 40% of proposed live/work units.

^c 60% of proposed live/work units.

^d Includes fabrication shop and research and development facility.

TABLE 9 PROJECT CONSISTENCY WITH THE CITY OF BERKELEY'S CLIMATE ACTION PLAN

| Chapter | Climate Action Plan Goals | Project Consistency |
|--------------------------------|---|--|
| | Increase cycling and walking | The project would provide live/work units within walking distance of several transit routes, as well as secure bicycle parking. |
| | Increase compact development patterns (especially along transit corridors) | The project would provide a mixed-use building with live/work units and complimentary on-site commercial functions. The project would achieve vehicle trip reduction due to its proximity to several public transit stops. |
| Transportation and Land Use | Increase the usage of low-carbon vehicles | The City of Berkeley's COA: <i>Electrical Vehicle (EV) Charging</i> , requires at least 10% of the project residential automobile parking spaces and 3% of the non-residential automobile parking spaces be pre-wired to allow installation of a plug-in electric vehicle charging system. The project would comply with Berkeley Municipal Code Chapter 19.37 (Berkeley Green Code), including electric vehicle charging stations. The availability of electric vehicle charging stations would encourage the use of low-carbon vehicles. |
| Building and Energy Use | Increase number of certified green buildings | The project is required to meet the standards in the CALGreen Code and comply with Berkeley Municipal Code Chapter 19.36 (Berkeley Energy Code). Building energy-saving features of the project would include installation of solar photovoltaics and low-carbon concrete. |
| Waste Reduction and | Increase residential composting, and source reduction | The project is required to comply with the CALGreen Code. The project is also required to include recycling and organics collection areas for occupants in accordance with the Alameda County Mandatory Recycling Ordinance (ACWMA Ordinance 2012-01). |
| Recycling | Increase recycling, construction, and demolition debris | The project would comply with the Bay-Friendly Basics Landscape Checklist; measures include requirements for landscape construction waste reduction and recycling. |

Source: Berkeley, 2009. Climate Action Plan, June.

The project is subject to the City's COAs, some of which reduce GHG emissions. These include but are not limited to the following COAs: COA: Solar Photovoltaic, COA: All-Electric or Efficient Mixed-Fuel Construction, COA: Electric Vehicle Charging, COA: Water Efficient Landscaping, SCA: Recycling and Organics Collection, COA: Construction and Demolition Diversion, COA: Low-Carbon Concrete, and COA: Exterior Lighting. Overall, the project would not conflict with applicable GHG plans, policies or regulations and this impact would be less than significant.

8. Hazards and Hazardous Materials

| Wo | uld the project: | Potentially Significant Impact | Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| a. | | | | | |
| b. | Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | | | | |
| C. | Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within ¼-mile of an existing or proposed school? | | | | |
| d. | Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? | | | | |
| e. | For a Project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the Project result in a safety hazard or excessive noise for people residing or working in the Project area? | | | | |
| f. | Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? | | | | |
| g. | Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires. | | | | |

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Less Than Significant. The project proposes the demolition of the existing structures on the project site and construction of a new mixed-use residential building with a ground floor parking garage, two live/work units, 12 artist studios, a gallery, a fabrication shop, and a research and development (R&D) facility. These types of proposed land uses would generally not involve transport, use, or disposal of significant quantities of hazardous materials. Generally, small quantities of hazardous materials such as paints and cleaning products would be used for routine maintenance. Some larger quantities of hazardous materials storage could occur in the fabrication shop and R&D facility, depending on the types of activities that would

occur in these areas. As required by the City's COA: *Toxics*, and BMC Section 15.12.040, a Hazardous Materials Business Plan (HMBP) must be submitted to the Berkeley Toxics Management Division (TMD) within 30 days if on-site hazardous materials exceed in aggregate any of the following: 55 gallons for liquids; 500 pounds for solids; or 200 cubic feet of gases at standard temperature and pressure.

The Berkeley TMD is designated as the Certified Unified Program Agency (CUPA) for the City and coordinates the regulation of hazardous materials and hazardous wastes in the City. The role of a CUPA is to consolidate, coordinate, and makes consistent the administrative requirements, permits, inspections, and enforcement activities associated with the regulation of hazardous materials and hazardous wastes.

During project construction, hazardous materials such as fuel, lubricants, paint, sealants, and adhesives would be transported and used at the project site. The routine transport, use, or disposal of hazardous materials could pose a potential hazard to construction workers and future users of the project site as they would be handling the hazardous materials and could therefore be exposed through inhalation of vapors, direct contact with skin, or accidental ingestion. The routine transport, use, or disposal of hazardous materials would not pose a significant hazard to the public or environment unless the hazardous materials were accidentally spilled or released into the environment, as discussed under Criterion (b) below.

Transportation of Hazardous Materials

In 1990 and 1994, the federal Hazardous Material Transportation Act was amended to improve the protection of life, property, and the environment from the inherent risks of transporting hazardous material in all major modes of commerce. The U.S. Department of Transportation (USDOT) developed hazardous materials regulations, which govern the classification, packaging, communication, transportation, and handling of hazardous materials, as well as employee training and incident reporting. The transportation of hazardous materials is subject to both Resource Conservation and Recovery Act (RCRA) and USDOT regulations.

The California Highway Patrol, the California Department of Transportation (Caltrans), and the California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC) are responsible for enforcing federal and State regulations pertaining to the transportation of hazardous materials. If a discharge or spill of hazardous materials occurs during transportation, the transporter is required to take appropriate immediate action to protect human health and the environment (e.g., notify local authorities and contain the spill), and is responsible for the discharge cleanup.

Use of Hazardous Materials

The project would be required to comply with all applicable Occupational Safety and Health Administration (OSHA) regulations regarding worker safety related to the use and disposal of hazardous materials. Under OSHA jurisdiction, the Hazardous Waste Operations and Emergency Response regulations require training and medical supervision for workers at hazardous waste

sites (Code of Federal Regulations, Title 29, Labor, Section 1910.120, Hazardous Waste Operations and Emergency Response). State worker health and safety regulations related to construction activities are enforced by the California Division of Occupational Safety and Health (Cal/OSHA). Regulations include requirements for protective clothing, training, and limits on exposure to hazardous materials. California standards for workers dealing with hazardous materials are contained in CCR, Title 8 and include practices for all industries (General Industrial Safety Orders), and specific practices for construction, and other industries. Compliance with these existing regulations would ensure that workers are protected from exposure to hazardous materials that may be used on-site.

As required by the City's COA: *Stormwater Requirements*, the project plans shall identify and show site-specific BMPs appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

Compliance with the regulations described above, including: RCRA and USDOT regulations; Title 29, Labor, Section 1910.120; the City's COA Stormwater Requirements, requiring implementation of BMPs designed to minimize discharges to storm drainage systems; and COA Toxics, requiring a HMBP if necessary, would ensure that hazardous materials are properly handled and therefore ensure that the project would not result in a significant hazard to the public or the environment during construction or operation. Therefore, potential impacts of the project associated with routine transport, use, or disposal of hazardous materials would be less than significant.

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less Than Significant. The public and/or the environment could be affected by the release of hazardous materials from the project site into the environment if: 1) workers and/or the public were exposed to hazardous building materials (e.g., polychlorinated biphenyls [PCBs], lead paint, asbestos) during demolition of the existing structures; or 2) workers and/or the public were exposed to potentially contaminated soil, groundwater, and vapors during construction and/or operation of the project.

Demolition of Existing Structures

Based on the age of the structures on the project site, it is possible that hazardous building materials such as asbestos-containing materials (ACMs), lead-containing paint, PCB-containing materials and equipment, and mercury containing devices (including fluorescent light bulbs and mercury switches) could be present in the structures.

The City's COA: *Toxics*, requires a building materials survey be conducted by a qualified professional prior to approval of any permit for partial or complete demolition activities involving the removal of 20 square or lineal feet of interior or exterior walls. The survey shall

include, but not be limited to, identification of any lead-based paint, asbestos, PCB containing equipment, hydraulic fluids in elevators or lifts, refrigeration systems, treated wood and mercury containing devices (including fluorescent light bulbs and mercury switches). The Survey shall include plans on hazardous waste or hazardous materials removal, reuse, or disposal procedures to be implemented that fully comply with state hazardous waste generator requirements (22 CCR 66260 et seq). The Survey becomes a condition of any building or demolition permit for the project. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition. If asbestos is identified, BAAQMD Regulation 11-2-401.3 notification must be made and the BAAQMD Job Number (or "J Number") must be made available to the City of Berkeley Permit Service Center. Compliance with the City's COA: *Toxics*, would ensure that potential impacts related to accidental releases of hazardous building materials during demolition would be less than significant.

Soil and Groundwater Contamination

In July 2020, a Phase I Environmental Site Assessment (ESA), ⁴³ provided in Appendix B, was prepared for the project site which summarized historic land uses on the project site and surrounding area to evaluate whether the project site may be impacted by releases of hazardous material. According to the Phase I ESA, the project site was first developed as early as the mid-1940's with two, eight-family apartment buildings that were part of the surrounding Codornices Village Federal Housing Project. The current main structure on the project site was constructed circa-1960 and may have originally been occupied by an irrigation/sprinkler business. By 1973, the project site was occupied by a plumbing company which operated until about 2000. Several alterations were made to the original metal structure after 1970, with the smaller building on the project site constructed sometime after 1990. After 2000, the project site was occupied by a landscaping business called "Shelterbelt Builders." Since approximately 2018 the project site has also been used as research and development and artist's studios.

In December 1991, gasoline and diesel underground storage tanks (USTs) were removed from the project site. The USTs were located in the northwest portion of the project site and were reportedly in good condition with no visible holes, and the excavation appeared clean. The excavation was backfilled with soils generated from the tank removal and unspecified imported fill, then resurfaced with asphalt. No soil samples were collected during the UST removal, and no inspection was made by the TMD or Berkeley Fire Department.⁴⁴

In January 1993, drilling and soil sampling was performed around the perimeter of the former USTs. Elevated concentrations of gasoline and xylenes were detected in a soil sample from one

⁴³International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

⁴⁴ International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

boring, and much lower to non-detectable concentrations of gasoline were reported in the other borings.⁴⁵

In 2004, a limited subsurface investigation was conducted at the project site which involved the collection of groundwater samples from two borings that were locate within and west of the former USTs excavation area. Concentrations of gasoline, toluene, and diesel were detected in the groundwater samples. The TMD subsequently reviewed the groundwater sampling data and issued a letter which stated: "Residual gasoline and diesel constituents remain in soil and groundwater at the site. The TMD is satisfied that the known potential sources of contamination have been removed and that the residual soil and groundwater contamination resulting from leaks from the former underground tank systems represents a low to insignificant potential to impact human health or the environment.." ⁴⁶

The Phase I ESA indicated that more recent uses of the project site that included a gardening and landscaping business and the current research and development and artist studio uses (at the time the Phase I was prepared) do not appear likely to have impacted the subsurface or buildings of the project site. As described in the project description, the existing uses are different than the use approved according to City zoning and building division records, which is light manufacturing. The Phase I ESA indicated a low potential for vapor intrusion and recommended no further investigation regarding the environmental condition of the project site. The Phase I ESA recommended that a Soil and Groundwater Management Plan (SGMP) be developed to provide guidance should unexpected soil and/or groundwater impacts be encountered during the demolition and construction of the project.⁴⁷

The project is located within the City's Environmental Management Area (EMA). 48 These areas in the city are known or suspected to have soil or groundwater contamination. 49 The City's COA: *Toxics*, requires that a SGMP be prepared for all non-residential projects, as well as residential or mixed-use projects with five or more units, that: 1) are located within the EMA, and 2) propose any excavations deeper than 5 feet below grade. The project is within the EMA and is a proposed mixed-use development with more than 5 units, and may require excavation deeper than 5 feet; therefore, preparation of a SGMP would be required for the project.

According to the City's COA: *Toxics*, the SGMP must be site specific and include the following:

⁴⁵ International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

⁴⁶ International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

⁴⁷ International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

⁴⁸ City of Berkeley, 2010. Environmental Management Area, last updated December 8. Accessed December 10, 2020. https://www.cityofberkeley.info/uploadedFiles/IT/Level_3_-_General/ema.pdf.

⁴⁹ City of Berkeley, 2020. Environmental Management Area Website. Accessed December 10, http://www.ci.berkeley.ca.us/Planning_and_Development/Toxics_Management/Environmental_Management_Area.aspx.

- Identify procedures for soil and groundwater management including identification of pollutants and disposal methods.
- Identify permits required and comply with all applicable local, State, and regional requirements.
- Require notification to the City's TMD of any hazardous materials found in soils and groundwater during development.
- Provide guidance on managing odors during excavation.
- Provide the name and phone number of the individual responsible for implementing the SGMP and post the name and phone number for the person responding to community questions and complaints.

The TMD may impose additional conditions as deemed necessary. All requirements of the approved SGMP would be conditions of approval of the Use Permit. Preparation and implementation of a SGMP in accordance with the requirements of the City's COA: *Toxics*, would ensure that potential impacts associated with encountering contaminated soil and/or groundwater during excavation at the projects site would be less than significant.

Performing a hazardous building materials survey prior to demolition and preparing and implementing a SGMP for excavation and dewatering activities, as required by COA: *Toxics* (described above), would ensure that the project would result in less than significant impacts to the public or the environment related to reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment.

c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within ½-mile of an existing or proposed school?

No Impact. There are no schools located within a ¼-mile of the project site; therefore, no impacts would occur related to hazardous emissions within a ¼-mile of a school.

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Less Than Significant. The provisions of Government Code Section 65962.5 require the DTSC, the State Water Resources Control Board (State Water Board), the California Department of Health Services, and the California Department of Resources Recycling and Recovery (formerly the California Integrated Waste Management Board) to submit information pertaining to sites associated with solid waste disposal, hazardous waste disposal, LUST sites, and/or hazardous materials releases to the Secretary of Cal/EPA. The project site is listed as a closed LUST case as of 2004 on the State Water Board's GeoTracker database; 50 therefore, the project site is included

⁵⁰ State Water Board, 2020. GeoTracker Web Page for Chris's Payless Plumbing (T0600131578), 1207 10th Street, Berkeley CA 94710. Accessed December 10.

on the lists of hazardous materials release sites compiled in accordance with Government Code Section 65962.5, also known as the "Cortese List." ⁵¹

Although the project site is included on lists of hazardous materials release sites compiled pursuant to Government Code Section 65962.5, the hazardous materials release at the project site has been investigated, and the TMD indicated that residual soil and groundwater contamination resulting from leaks from the former USTs represents a low to insignificant potential to impact human health or the environment. ⁵² Preparation and implementation of a SGMP during construction as required by the City's COA: *Toxics*, as discussed in Sections a) and b) above, would ensure that potential impacts to the public or the environment associated with past releases of hazardous materials at the project site would be less than significant.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

No Impact. The project site is located approximately 10.5 miles north of the Oakland International Airport. The project site is not located within an airport land use plan area or within two miles of a public airport; ⁵³ therefore, the project would not result in a safety hazard to people working or residing in the area due to the proximity of an airport.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less Than Significant. The project would be consistent with the policies outlined in the General Plan's Disaster Preparedness and Safety Element⁵⁴ and would not obstruct emergency evacuation routes. San Pablo Avenue and Gilman Street are the designated emergency access and evacuation routes in the project area. The project would not alter these designated emergency access and evacuation routes or roadways adjacent to the project site. Therefore, the project would not be expected to impair the function of nearby emergency evacuation routes and would have a less-than-significant impact on implementation of an adopted emergency response plan or emergency evacuation plan.

⁵¹ California Environmental Protection Agency (CalEPA), 2020. Cortese List Data Resources. Accessed December 7. .

⁵² International Geologic LLC, 2020. Summary Report, Phase I Environmental Assessment at 1207 Tenth Street, Berkeley, California, July 31.

⁵³ Alameda County Community Development Agency, 2010. Oakland International Airport, Airport Land Use Compatibility Plan, December.

⁵⁴ City of Berkeley, 2001. Berkeley General Plan, Disaster Preparedness and Safety Element, April 23.

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

No Impact. The project site is in a highly developed urban area and is not within or adjacent to a wildland fire hazard area. Therefore, the project would not expose people or structures to a significant loss, injury or death involving wildland fires.

9. Hydrology and Water Quality

| 14/ | LLat | | Potentially Significant Impact | Less Than Significant With Mitigation | Less Than Significant | No |
|-----|-------------------------------|--|--------------------------------------|--|--------------------------|-------------|
| Wot | Would the project: | | | Incorporated | Impact | Impact |
| a. | discha | e any water quality standards or waste or otherwise substantially de surface or ground water quality? | | | | |
| b. | interfe such t | antially decrease groundwater supplies or ere substantially with groundwater recharge hat the project may impede sustainable dwater management of the basin? | | | | |
| C. | the sit the co addition | antially alter the existing drainage pattern of se or area, including through the alteration of urse of a stream or river or through the on of impervious surfaces, in a manner would: | | | | |
| | i. | Result in a substantial erosion or siltation on- or off-site; | | | \boxtimes | |
| | ii. | substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite; | | | | |
| | iii. | create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or | | | | |
| | iv. | impede or redirect flood flows? | | | | |
| d. | | od hazard, tsunami, or seiche zones, risk e of pollutants due to project inundation? | | | | \boxtimes |
| e. | water | ct with or obstruct implementation of a quality control plan or sustainable dwater management plan? | | | | |

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Less Than Significant. The project site is located within the Gilman Basin Watershed, which drains stormwater in part of the northwestern portion of Berkeley into the San Francisco Bay (the Bay). Stormwater drainage from the project site is conveyed to a storm drain pipeline

beneath Gilman Street located approximately 400 feet south of the project site which discharges to the Bay approximately 4,000 feet west of the project site. 55

The State Water Resources Control Board has listed the Bay as an impaired water body for pollutants including pesticides, heavy metals, dioxins, furans, polychlorinated biphenyls (PCBs), and trash. ⁵⁶ Total Maximum Daily Loads (TMDLs) have been established for PCBs and mercury in the Bay. TMDLs describe the maximum amount of a pollutant that a water body can receive while still meeting water quality standards. Once a TMDL has been developed, they are implemented by allocating waste loads via National Pollutant Discharge Elimination System (NPDES) permits.

Stormwater runoff quality is regulated by the NPDES Program (established through the federal Clean Water Act). The NPDES program objective is to control and reduce pollutant discharges to surface water bodies. Compliance with NPDES permits is mandated by State and federal statutes and regulations. Locally, the NPDES Program is overseen by the San Francisco Bay Regional Water Quality Control Board (Regional Water Board). The Alameda Countywide Clean Water Program (ACCWP) assists cities, towns, and unincorporated areas with coordination and consistency of approaches across the County in implementing the Regional Water Board requirements.

Construction and demolition activities of the project would involve disturbance, grading, and excavation of soil, which could result in temporary erosion and movement of sediments into the storm drain system, particularly during precipitation events. In addition, the potential for chemical releases is present at most construction sites due to the use of paints, solvents, fuels, lubricants, and other hazardous materials associated with heavy construction equipment. Once released, these hazardous materials could be transported to nearby surface waterways in stormwater runoff, wash water, and dust control water, potentially reducing the quality of the receiving waters. The release of sediments and other pollutants during construction and demolition could adversely affect water quality in receiving waters.

As outlined in the City's COA: Stormwater Requirements, the applicant is required to demonstrate compliance with the requirements of applicable NPDES permits as described in BMC Chapter 17.20. The COA includes requirements for project plans to identify site-specific BMPs appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions; and requires that maintenance requirements and schedules for any stormwater quality treatment structural controls be submitted to the Department of Public Works for review.

⁵⁵ City of Berkeley, 2009. City of Berkeley Drainage Map, January 22.

⁵⁶ State Water Resources Control Board, 2020. Final 2014/2016 California Integrated Report (Clean Water Act Section 303(d) list/305(b) Report, Accessed December 9. https://www.waterboards.ca.gov/water_issues/programs/tmdl/integrated2014_2016.shtml.

The following City COAs related to water quality and stormwater protection would also apply to the project:

- COA: Public Works. All piles of debris, soil, sand, or other loose materials shall be covered
 at night and during rainy weather with plastic at least one-eighth millimeter thick and
 secured to the ground.
- COA: Public Works. The applicant shall ensure that all excavation considers surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.
- COA: Public Works. The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed offsite and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.
- COA: Public Works. Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

As discussed in Section 9, Hazards and Hazardous Materials, dewatering of contaminated groundwater could be required during construction of the project. Preparation and implementation of a Soil and Groundwater Management Plan (SGMP) in accordance with the requirements of the City's COA: *Toxics*, would ensure that potential impacts associated with management of contaminated groundwater during excavation at the project site would be less than significant.

Stormwater runoff during the operational phase of the project would be subject to the Regional Water Board's Municipal Regional Permit (MRP) under Regional Water Board Order R2-2015-0049. Under the MRP, the preparation of a Stormwater Control Plan (SCP) would be required. The SCP would present the design elements and implementation measures that would be used to meet MRP requirements. A Stormwater Facility Operation and Maintenance Plan would also be required, to ensure that stormwater control measures are inspected, maintained, and funded for the life of the project.

The project would replace over 10,000 square feet of impervious area and would therefore be required to comply with provision C.3 of the MRP which requires implementation of low impact development (LID) source control, site design, and stormwater treatment. LID employs principles such as preserving and recreating natural landscape features and minimizing impervious surfaces to create functional and appealing site drainage that treats stormwater as a resource, rather than a waste product. The project is proposing to comply with Provision C.3

⁵⁷ California Regional Water Quality Control Board, San Francisco Bay Region, 2015. San Francisco Bay Region, Municipal Regional Stormwater NPDES Permit, Order No. R2-2015-0049, NPDES Permit No. CAS612008, November 19.

requirements by using flow through planters to treat stormwater prior to discharging stormwater to off-site stormwater drainage systems.

Compliance with existing stormwater control regulations, including the City's Conditions of Approval Public Works and NPDES requirements described above, would reduce potential construction and operational impacts on water quality to a less-than-significant level. No additional potential impacts of the project to water quality are expected beyond those discussed above. Therefore, the potential for the project to otherwise degrade water quality would be less than significant.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less Than Significant. The East Bay Plain groundwater sub-basin, which is part of the larger Santa Clara Valley groundwater basin, underlies the project site. ⁵⁸ The East Bay Plain sub-basin extends from Richmond to Hayward and is composed primarily of alluvial deposits formed by tributaries to the Bay. The water-bearing formations within this sub-basin have a cumulative thickness of approximately 1,000 feet.

The project would decrease the amount of impervious surface on the project site from 12,121 square feet to 12,050 square feet and would include stormwater control features that would enhance infiltration of stormwater to the subsurface (e.g., flow-through planters). Therefore, the project would increase the amount of groundwater recharge compared to existing conditions.

The project would connect to the EBMUD water system and would not use groundwater. Although no use of groundwater is proposed as part of the project, some dewatering could be required during construction depending on the depths of excavations and depth to groundwater at the time. This dewatering would be temporary and limited to the areas of the excavation and would focus on the uppermost shallow groundwater zone. Therefore, potential impacts related to depletion of groundwater supplies would be less than significant.

- c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:
 - i. result in a substantial erosion or siltation on- or off-site;

Less Than Significant. The project would not alter the course of a stream or a river. The project would slightly alter the existing on-site drainage patterns (e.g., adding flow through planters and increasing pervious surface area). Compliance with the City's Conditions of Approval for Stormwater Requirements related to water quality and stormwater protection, as

⁵⁸ California Department of Water Resources (CDWR), 2004. California's Groundwater: Santa Clara Valley Groundwater Basin, East Bay Plain Subbasin, Bulletin 118, February 27.

described above, would ensure that the project would have a less than significant impact related to erosion and off-site siltation during the construction phase. During the operational phase, stormwater runoff from the project site would be treated in accordance with requirements of Provision C.3 of the MRP. Consequently, the potential of the project to result in substantial erosion or siltation on- or off-site associated with changing the drainage pattern of the project site would be less than significant.

ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;

Less Than Significant. The project would decrease the impervious surface area of the project site, thereby decreasing the rate of stormwater runoff from the project site and decreasing the potential for flooding. Consequently, the potential of the project to result in on- or off-site flooding associated with changing the drainage pattern of the project site would be less than significant.

iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

Less Than Significant. The project would reflect existing drainage conditions by directing runoff towards the corresponding off-site drainage facilities that currently serve the project site. As discussed above, the impervious surface area of the project site is being reduced, which thereby decreases the contribution of stormwater runoff from the project site to the City's existing storm drain system. Therefore, the potential of the project to create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems is less-than-significant. Compliance with existing stormwater control regulations, including the City's Conditions of Approval described above and NPDES requirements would ensure that the project would have a less-than-significant impact related to contributing additional sources of polluted runoff.

iv. impede or redirect flood flows?

Less Than Significant. The project site is not located within a 100-year or 500-year flood hazard zone as mapped by Federal Emergency Management Agency (FEMA);⁵⁹ therefore, the chance of flooding at the project site in any given year is less than 0.2 percent. Due to the low risk of flooding at the project site, the project would have a less-than-significant impact related to impeding or redirecting flood flows.

d) In flood hazard, tsunami, or seiche zones, risk release pollutants due to project inundation?

No Impact. As discussed above, the project site is not located within a 100-year or 500-year flood hazard zone as mapped by FEMA. Additionally, the project site is not located in an area

⁵⁹ Federal Emergency Management Agency (FEMA), 2018. Flood Insurance Rate Map, Alameda County and Incorporated Areas, Map 06001C0018H, December 21.

protected from flooding by levees⁶⁰ or within a dam failure inundation area;⁶¹ therefore, no impact related to flooding inundation of the project site would occur.

A seiche is the oscillation of a body of water at its natural period. Seiches occur most frequently in enclosed or semi-enclosed basins such as lakes, bays, or harbors and may be triggered by strong winds, changes in atmospheric pressure, earthquakes, tsunami, or tides. Triggering forces that set off a seiche are most effective if they operate at specific frequencies relative to the size of an enclosed basin. Due to the basin geometry and dimensions of the Bay, seiches pose a negligible hazard to the San Francisco Bay Area. The project is located almost 4,000 feet inland from the Bay; therefore, there would be no impact associated with seiche inundation.

The project site is located approximately 3,200 feet inland from a mapped tsunami inundation area along the shore of the Bay 62 ; therefore, there would be no impact associated with tsunami inundation.

e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less Than Significant. The quality of surface water and groundwater in the vicinity of the project site is affected by past and current land uses at the project site and within the watershed and the composition of geologic materials in the vicinity. The State Water Board and nine regional water quality control boards regulate water quality of surface water and groundwater bodies throughout California. In the Bay Area, including the project site, the Regional Water Board is responsible for implementing the Water Quality Control Plan (Basin Plan). The Basin Plan establishes beneficial water uses for waterways and water bodies within the region and is a master policy document for managing water quality in the region.

Stormwater quality during construction and operation of the project would be controlled through compliance with the existing stormwater control regulations, including the City's COAs and MRP requirements. Therefore, the project would not conflict with or obstruct implementation of a water quality control plan.

The 2014 Sustainable Groundwater Management Act (SGMA) requires local public agencies and Groundwater Sustainability Agencies in high- and medium-priority basins to develop and implement Groundwater Sustainability Plans (GSPs) or Alternatives to GSPs. 64 GSPs are detailed

⁶⁰ Federal Emergency Management Agency (FEMA), 2018. Flood Insurance Rate Map, Alameda County and Incorporated Areas, Map 06001C0018H, December 21.

⁶¹ City of Berkeley, 2001. Berkeley General Plan, Disaster Preparedness and Safety Element, April 23.

⁶² California Emergency Management Agency, 2009. Tsunami Inundation Map for Emergency Planning, Richmond Quadrangle, July 31.

⁶³ San Francisco Bay Regional Water Quality Control Board, 2017. San Francisco Bay Basin (Region 2) Water Quality Control Plan (Basin Plan). Incorporating all amendments as of May 4.

⁶⁴ California Department of Water Resources, 2020a. Groundwater Sustainability Plans. Accessed December 8. https://water.ca.gov/Programs/Groundwater-Management/SGMA-Groundwater-Management/Groundwater-Sustainability-Plans

road maps for how groundwater basins will reach long term sustainability. Existing Groundwater Management Plans (GWMPs) will be in effect until GSPs are adopted in medium and high priority basins. The project is located in the Santa Clara Valley – East Bay Plain Groundwater Basin, which is designated as a medium priority basin and is subject to SGMA to develop a GSP. 65 A GSP or GWMP has not yet been developed for the Santa Clara Valley – East Bay Plain Groundwater Basin. 66

The project would not substantially contribute to depletion of groundwater supplies during construction. Some dewatering could be required during construction depending on the depths of excavations and depth to groundwater at the time. This dewatering would be temporary and limited to the areas of the excavation and would focus on the uppermost shallow groundwater zone. During operation, the project would not use groundwater. In addition, the proposed reduction of impervious area and implementation of stormwater control features would enhance infiltration of stormwater to the subsurface (e.g., flow-through planters) and reduce potential impacts related to depletion of groundwater supplies to a less-than-significant level.

⁶⁵California Department of Water Resources, 2020b. 2018 SGMA Basin Prioritization Dashboard. Accessed December 8. https://gis.water.ca.gov/app/bp2018-dashboard/p1/#.

10. Land Use and Planning

| Wa | and the project | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| WO | ould the project: | | | | |
| a. | Physically divide an established community? | | | | \boxtimes |
| b. | Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | | | | |

a) Would the project physically divide an established community?

No Impact. The physical division of an established community typically refers to the construction of a physical feature (such as an interstate highway or railroad tracks) or removal of a means of access (such as a local road or bridge) that would impair mobility within an existing community, or between a community and outlying areas. For instance, the construction of an interstate highway through an existing community may constrain travel from one side of the community to another; similarly, such construction may also impair travel to areas outside of the community.

The project site is an existing property located in an urbanized area of Berkeley. The project does not involve street closures, linear features, or development that would separate land uses or neighborhoods. Development of the project site would not physically divide an established community and no impact would occur.

b) Would the project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less Than Significant. The project site is designated Manufacturing in the Berkeley General Plan. The site is within the Mixed Use-Light Industrial (MU-LI) zoning district. The site is also within the West Berkeley Plan.

General Plan

The Manufacturing designation applies to areas of the city that are intended to maintain and preserve industrial uses necessary for a multi-faceted economy and job growth. According to the General Plan Land Use Element, building intensity in areas designated for Manufacturing uses will generally range from a Floor Area Ratio (FAR) of less than 1.0 to a FAR of 2.0. With development of approximately 19,594 square feet of gross floor area on a 12,800-square-foot project site, the proposed FAR for the site would be approximately 1.53, consistent with the General Plan's guidance.

The project would be generally consistent with applicable policies of the 2002 General Plan related to environmental issues addressed by CEQA, including the following:

Policy LU-3: Infill Development. Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

Policy UD-16: Context. The design and scale of new or remodeled buildings should respect the built environment in the area, particularly where the character of the built environment is largely defined by an aggregation of historically and architecturally significant buildings.

*Policy UD-*33: Sustainable Design. Promote environmentally sensitive and sustainable design in new buildings.

As discussed in Section 5, Cultural Resources, the project would not result in significant impacts to historic resources. Compatibility with the City's zoning ordinance is discussed below. The project would be generally consistent with the City's zoning regulations.

H-12: Transit-Oriented New Construction. Encourage construction of new medium- and high-density housing on major transit corridors and in proximity to transit stations consistent with zoning, applicable area plans, design review guidelines, and the Climate Action Plan.

T-16: Access by Proximity, Action B. Encourage higher density housing and commercial infill development that is consistent with General Plan and zoning standards in areas adjacent to existing public transportation services.

T-16: Access by Proximity, Action E. In locations served by transit, consider reduction or elimination of parking requirements for residential development.

The project is a mixed-use residential building that would provide 12 automobile parking spaces. While the minimum required by the City of Berkeley Municipal Code is 14, as shown in Table 10 below, the project is requesting a waiver of 2 spaces pursuant to BMC Section 23E.80.080. The project site is located close to several AC Transit routes, and is approximately 1.2 miles northwest of the North Berkeley BART Station. Furthermore, the project site is located within two blocks of designated bicycle boulevards and bike ways that connect to local and regional transitways.

T-43 Bicycle Network, Action C: Encourage, and when appropriate require, new multi-family residential developments to provide secure locker space for resident bicycles and for such things as dollies, shopping rollers, wagons, and carts that facilitate a non-motorized lifestyle.

The project would include 24 secure bicycle spaces (12 long-term and 12 short-term). Long term bicycle parking would be provided in the garage, and short-term bicycle parking would be provided using six inverted U-Racks that provide space for two bikes each on the sidewalk.

Furthermore, the following general policies are also applicable to the project. These policies do not pertain to avoiding or mitigating an environmental effect and are included for informational purposes only.

Policy H-33: Regional Housing Needs. Encourage housing production adequate to meet the housing production goals established by ABAG's Regional Housing Needs Determination for Berkeley.

Policy LU-23: Transit-Oriented Development. Encourage and maintain zoning that allows greater commercial and residential density and reduced residential parking requirements in areas with above-average transit service such as Downtown Berkeley.

The project is an infill development that would add two live/work units and other manufacturing uses that are consistent with the MU-LI zoning regulations, and would replace an underutilized manufacturing/commercial use in an area of Berkeley that is served by numerous transit and bicycle routes. The project would increase the population within one block of the San Pablo Avenue and Gilman Street transit and commercial corridors and thus would bring more activity to this transit-rich area.

Policy LU-7: Neighborhood Quality of Life, Action A. Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.

Policy UD-17: Design Elements. In relating a new design to the surrounding area, the factors to consider should include height, massing, materials, color, and detailing or ornament.

Policy UD-24: Area Character. Regulate new construction and alterations to ensure that they are truly compatible with and, where feasible, reinforce the desirable design characteristics of the particular area they are in.

The project would require approval by the Zoning Adjustments Board and Design Review Committee to ensure its compatibility with the scale, character and architectural design of neighboring land uses.

West Berkeley Plan

The project site is also located in the West Berkeley Plan Area, defined as the area west of San Pablo Avenue (incorporating both sides of the street) to the Eastshore Freeway (Interstate 80). The West Berkeley Plan is intended to guide the development of West Berkeley. It sets forth the City's key land use, environmental, economic development, transportation, housing and social services, and physical form (urban design, historic preservation, open space) policies for West Berkeley. The project would be generally consistent with applicable policies of the West Berkeley Plan related to environmental issues addressed by CEQA, including the following:

Environmental Policy 1.6: Avoid the establishment of new uses which pose unmitigable environmental hazards (see Permitted and Prohibited Uses in Land Use Element).

Environmental Policy 2.1: Reduce to the greatest feasible extent the amount and/or hazard intensity of hazardous materials and hazardous waste imported into West Berkeley, transported through West Berkeley, used or stored in West Berkeley and disposed of by West Berkeley businesses, institutions, and households.

Environmental Policy 2.2: Promote risk management and communication.

Environmental Policy 2.3: Promote hazardous waste reduction and recycling.

As discussed throughout this Initial Study but in particular in Section 7, Geology and Soils, and Section 9, Hazards and Hazardous Materials, the project would not result in unmitigable environmental hazards.

Environmental Policy 5.6: Avoid the establishment of new uses which would create immitigable odors in residential districts.

As discussed in Section 3, Air Quality, impacts related to odors would be less than significant.

Environmental Policy 5.7: Institute tree planting as an anti-pollution measure (see Physical Form Element for Implementation Measures).

The project would plant two additional street trees.

Transportation Goal 1: Improve traffic flow and air quality by reducing reliance on single occupant automobiles, by encouraging use of alternative means of transportation.

The project would be located on an infill site in a transit priority area, close to several AC Transit bus lines. In addition, the project would provide 24 bicycle spaces, exceeding the minimum requirement of five long-term bicycle spaces, and six short-term bicycle spaces as described in Table 10 below.

In addition, the following West Berkeley Plan policies are applicable to the project. These policies do not pertain to avoiding or mitigating an environmental effect and are included for informational purposes only.

Economic Development Goal 3: Improve the level of neighborhood serving retail in West Berkeley. Specifically, explore how neighborhood serving retail uses might be brought to San Pablo Avenue (Policy A).

Economic Development Goal 5: Continue to create employment opportunities, especially for Berkeley and West Berkeley residents.

Housing and Social Services Goal 5: Encourage the development of Live/Work Units in appropriate locations as set forth in the Land Use Element under appropriate development standards (Policy 5.1).

TABLE 10 PROJECT CONSISTENCY WITH DEVELOPMENT STANDARDS

| Standard | BMC Sections 23E.80.070-080 | Existing | Proposed Total | Permitted/Required |
|------------|-------------------------------------|----------------|-------------------|---|
| Lot Area (| SF) | 12,800 | No Change | N/A |
| Gross Floo | or Area () | 4,545 | 19,594 | 25,600 max ^a |

| | R&D Facilities | | | Long Term: 2, or 1 per 2,500 SF (2) Short Term: 2, or 1 per 10,000 SF (2) |
| | Live/Work Units | 0 | | Long Term: None Required (0) Short Term: 2, or 1 per 5 units (2) |
| | Gallery | | | Long Term: 1, or 1 per 10,000 SF (1) Short Term: 2, or 1 per 15,000 SF (2) |
| | Total Long Term Total Short Term | | 12 12 | 5 6 |

^a Maximum FAR is 2.0 (12,800 square feet \times 2.0 = 25,600).

Source: City of Berkeley Municipal Code Section Sections 23E.80.070-080, Google Maps, 2021. 1207 Tenth Street. Accessed January 14. https://www.google.com/maps/place/1207+Tenth+St,+Berkeley,+CA+94710/@37.8814351,-122.2972675,122m/data=!3m1!1e3!4m5!3m4!1s0x80857ecdd0544b85:0x41f5c4d21a51a224!8m2!3d37.8815601!4d-122.2971537

^b The project would require a Use Permit pursuant to BMC Section 23E.80.030, to provide two new live/work, art/craft studios.

^c The applicant is applying for an administrative use permit pursuant to BMC Section 23E.04.020.C to allow architectural elements to exceed the height limit in a mixed-use district.

^dBased off of estimation of number of parking spaces from aerial photo of project site.

e Per BMC 23E.28.070.B, bicycle parking shall be provided for new non-residential floor area at a ratio of one space per 2,000 square feet. However, the Berkeley Bicycle Facility Design Toolbox 2017 specifies the specific ratios outlined in the table above.

Land Use Goal 1: Over the economically active area of West Berkeley, provide for a continued economic and land use mix, incorporating manufacturing, other industrial, retail and office/laboratory uses, to benefit Berkeley residents and businesses economically, benefit the City government fiscally, and promotes the varied and interesting character of the area.

Physical Design Goal 1: Preserve and enhance the vital commercial corridors, particularly San Pablo and University Avenue, with intensification of commercial and mixed-use development at key intersections or "nodes".

The project is intended to activate the light industrial and commercial area in proximity to the San Pablo Avenue and Gilman Street Node⁶⁷, and attract new residents to this West Berkeley neighborhood. Within the mixed-use development, the proposed live/work units would provide tenant spaces at this currently underutilized lot for small business owners and provide art/craft retail opportunities for residents and patrons. The light manufacturing and R&D uses would support the continuance of the current light manufacturing character of the surrounding area.

Housing and Social Services Goal 4: Encourage appropriately scaled and located housing development.

Land Use Goal 3: Protect residential core neighborhoods from adverse impacts of economic growth – especially traffic and parking congestion and noise.

Land Use Goal 4: Assure that new development in any sector is of scale and design that is appropriate to its surrounding, while respecting the genuine economic and physical needs of the development.

As shown in Table 10, the project would be consistent with all applicable MU-LI district development standards, with the exception of parking, and height. As described above in Project Description, the applicant would be required to obtain a Use Permit pursuant to BMC Section 23E.80.080.E, in order to designate 10% of the required automobile parking spaces for bicycle parking. In addition, the applicant would also need to obtain an Administrative Use Permit pursuant to BMC Section 23E.04.020.C to allow architectural elements to exceed the height limit in a mixed-use district. Furthermore, the project would require approval of a Use Permit pursuant to BMC Section 23E.80.030, to provide two new live/work, art/craft studios.

As described in BMC Section 23E.80.070, no yards for main buildings, accessory buildings, or accessory structures shall be required, except that: when a lot is adjacent to an abutting or confronting lot in a residential zone, the requirements of Section 23E.04.050 and 23E.04.060 shall apply to require additional yard and building feature standard. The project is not adjacent to or abutting a confront lot in a residential zone; therefore, building setbacks are not described below.

⁶⁷ BMC Section 23E.64.040.C.1, West Berkeley Commercial District, Designated Nodes.

As described above, the project is generally consistent with the applicable policies from the City of Berkeley General Plan, West Berkeley Plan, and BMC. Therefore, impacts related to consistency with land use plans, policies, and regulations would be less than significant.

77

11. Mineral Resources

| | | Potentially Significant Impact | Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| Wo | uld the project: | | | | |
| a. | Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the State? | | | | |
| b. | Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan? | | | | |

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the State?

No Impact. The project site is located within an urban area on an infill site. There are no known mineral resources within or in the vicinity of the project site. The Environmental Management Element of the City's General Plan states that there is no active mineral extraction in Berkeley. ⁶⁸ The project would not result in the loss of availability of a known mineral resource of value to the region or residents of the State. Therefore, the project would have no impact.

b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

No Impact. As stated above, the project would not result in the loss of availability of any known locally-important mineral resource recovery sites. Therefore, the project would have no impact.

⁶⁸ City of Berkeley, 2001. General Plan, Environmental Management Element, April 23.

12. Noise

| | | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| Wo | ould the project result in: | | | | |
| a) | Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | | | | |
| b) | Generation of excessive groundborne vibration or groundborne noise levels? | | | | |
| c) | For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? | | | | |

a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less Than Significant. Noise is commonly defined as unwanted sound that annoys or disturbs people and can have an adverse psychological or physiological effect on human health. Sound is measured in decibels (dB), which is a logarithmic scale. Decibels describe the purely physical intensity of sound based on changes in air pressure, but they cannot accurately describe sound as perceived by the human ear since the human ear is only capable of hearing sound within a limited frequency range. For this reason, a frequency-dependent weighting system is used, and monitoring results are reported in A-weighted decibels (dBA).

In an unconfined space, such as outdoors, noise attenuates with distance according to the inverse square law. Noise levels at a known distance from point sources are reduced by at least 6 dBA for every doubling of that distance over hard surfaces and 7.5 dBA for every doubling of that distance over soft surfaces. Noise levels at a known distance from line sources are reduced by at least 3 dBA for every doubling of that distance over hard surfaces and 4.5 dBA for every doubling of that distance over soft surfaces. ⁶⁹ A greater decrease in noise levels can result from the presence of intervening structures or buffers.

⁶⁹ California Department of Transportation (Caltrans), 2013. Technical Noise Supplement to the Traffic Noise Analysis Protocol. September

A typical method for determining a person's subjective reaction to a new noise is by comparing it to existing conditions. The following describes the general effects of noise on people:⁷⁰

- A change of 1 dBA cannot typically be perceived, except in carefully controlled laboratory experiments;
- A change of 3 dBA is considered a just-perceivable difference;
- A minimum of a 5-dBA change is required before any noticeable change in community response is expected; and
- A 10-dBA change is subjectively perceived as approximately a doubling (or halving) in loudness.
- The project is located in the West Berkeley area and the surrounding land uses consist of commercial and mixed-use light industrial. Traffic along Tenth Street and Gilman Street is the primary source of noise at the project site. The project is located in an area where general noise levels range from 70 to 75 dBA Average Day-Night Level (L_{dn}). Z2,73 Land uses where low noise levels are necessary to preserve their intended goals such as relaxation, education, health, and general state of well-being are considered noise-sensitive receptors. Noise-sensitive receptors include residences, hospitals, convalescent homes, schools, and churches. The nearest noise-sensitive receptors to the project site are two-family residential units located approximately 330 feet to the east.

The City of Berkeley regulates short-term and long-term noise and vibration in the Berkeley Community Noise Ordinance, Section 13.40 of the Berkeley Municipal Code (BMC). Table 11 and Table 12 outline maximum permissible day and night exterior and interior noise levels based on the zoning district of the property subject to the noise, rather than the property from which the noise originates. Stationary machinery is required to be enclosed or muffled so that noise levels in surrounding zoning districts do not exceed the thresholds outlined in Table 11 and Table 12. BMC Section 13.40.070, Prohibited Acts, restricts noise-generating construction operations that occur between the hours of 7:00 p.m. and 7:00 a.m. on weekdays and the hours of 8:00 p.m. and 9:00 a.m. on weekends and holidays. Where technically and economically feasible, construction operations occurring between the hours of 7:00 a.m. and 7:00 p.m. on weekdays and the hours of 9:00 a.m. and 8:00 p.m. on weekends and holidays are prohibited from generating noise levels at affected properties that exceed the maximum permissible day and night noise levels specified in the Table 13 and Table 14 (below).

⁷⁰ Charles M. Salter Associates, Inc., 1998. Acoustics - Architecture, Engineering, the Environment.

⁷¹ City of Berkeley, 2014. Land Use Zoning Districts, March 20.

 $^{^{72}}$ L_{dn} (Day/Night Noise Level) is the average A-weighted sound pressure level during a 24-hour day, obtained after addition of 10 decibels to levels measured during the night between 10:00 p.m. and 7:00 a.m.

TABLE 15 NOISE AND LAND USE COMPATIBILITY GUIDELINES

| Land Use Category | Normally Acceptable | Conditionally Acceptable | Unacceptable |
|---|------------------------|-----------------------------|--------------|
| Residential, Hotels, and Motels | <60 | 60-75 | >75 |
| Office Buildings, Business Commercial, and Professional | <70 | 70-80 | >80 |

Notes: Normally Acceptable - Specified land use is satisfactory, based upon the assumption that any buildings involved are of normal conventional construction, without any special noise insulation requirements.

Conditionally Acceptable - Specified land use may be permitted only after detailed analysis of the noise reduction requirements and needed noise insulation features.

Unacceptable - New construction or development should generally not be undertaken because mitigation is usually not feasible to comply with General Plan.

Source: City of Berkeley, 2010. West Berkeley Project, Draft Environmental Impact Report, State Clearinghouse Number 2009072084, January.

Land Use Compatibility - Noise Exposure During Project Operation

The Land Use Compatibility Standards in Table 15 indicate that noise levels of 60 to 75 dBA L_{dn} are conditionally acceptable for residential land uses. Table 15 also indicates that noise levels of 70 to 75 dBA L_{dn} are conditionally acceptable for office buildings, business commercial, and

professional.⁷⁷ As discussed above, ambient noise levels at the project site range from approximately 70 to 75 dBA L_{dn}. COA: *Interior Noise Levels* requires the project applicant to submit a report by a qualified acoustic engineer certifying that the interior residential portions of the project will achieve interior noise levels of no more than 45 dBA L_{dn}. The implementation of COA: *Interior Noise Levels* would reduce the interior noise levels in the residential portion of the proposed live/work units to no more than 45 dBA L_{dn}.

The 2019 California Building Standards Code specifies interior noise levels for both residential and nonresidential uses during operation. Specifically, it specifies that interior noise levels attributable to exterior sources shall not exceed 45 dBA L_{dn} in any habitable room (e.g., residential homes for living, sleeping, eating, or cooking). The noise metric used (either L_{dn} or CNEL) shall be consistent with the noise element of the local general plan. The 2019 California Building Standards Code also specifies that buildings containing non-residential uses (e.g., retail spaces and offices) that are exposed to exterior noise levels at or above 65 dBA L_{eq} or CNEL shall maintain an interior noise level below 50 dBA L_{eq} in occupied areas during any hour of operation. An acoustical analysis documenting compliance with this interior sound level is required. Compliance with the 2019 California Building Standards Code would require noise levels in the commercial/work portion of the project to be reduced to 50 dBA L_{eq}.

Therefore, the potential for the project to conflict with the City of Berkeley's land use compatibility standards in Table 15 or expose people to excessive noise levels would be reduced to a less-than-significant level with the implementation of COA: *Interior Noise Levels* and adherence to the Building Standards Code.

Noise Generated During Project Operation

Operation of the project would generate noise from commercial and residential activities and associated vehicular traffic. In general, the proposed land uses are consistent with the existing land uses in the vicinity of the project site.

The project would involve the installation of heating, ventilation, and air conditioning (HVAC) systems. The HVAC system would be required to be enclosed or muffled and maintained so that noise levels in surrounding zoning districts do not exceed the thresholds outlined in Table 11 and 12. Specifically, COA: HVAC Noise Reduction Measures requires the project applicant to

⁷⁷ Conditionally acceptable means that specified land use may be permitted only after detailed analysis of the noise reduction requirements and needed noise insulation features.

⁷⁸ Habitable space is a space in a building for living, sleeping, eating or cooking. Bathrooms, toilet rooms, closets, halls, storage or utility spaces and similar areas are not considered habitable spaces.

⁷⁹ California Code of Regulations, Title 24, Part 2, Vol. 1, Section 1206.4.

⁸⁰ CNEL (Community Noise Equivalent Level) is the average A-weighted noise level during a 24-hour day, obtained after addition of 5 decibels to sound levels during the evening from 7:00 to 10:00 p.m. and after addition of 10 decibels to sound levels during the night between 10:00 p.m. and 7:00 a.m.

⁸¹ California Code of Regulations, Title 24, Part 11, Section 5.507.

⁸² Leq (Equivalent Noise Level) is the average A-weighted sound pressure level during the measurement period. Leq refers to a 1-hour period unless otherwise stated.

submit plans that show the location, type, and design of proposed HVAC equipment, as well as product specification sheets or a report from a qualified acoustical consultant showing the compliance with the Berkeley Community Ordinance Therefore, the stationary equipment in the project would not violate the standards in Berkeley Community Noise Ordinance.

Noise levels near the project site would potentially increase due to the additional vehicle trips contributed by the project-proposed land uses and could exceed the standards established in the Berkeley Community Noise Ordinance. According to the West Berkeley Project EIR, the Planrelated traffic noise level increases calculated for 69 intersections in the Plan area are less than 3 dBA and therefore would not be perceptible. Therefore, the Plan-related traffic would cause a less-than-significant noise impact. 83 This EIR evaluates the potential environmental impacts that may be associated with implementation of the West Berkeley Project, which is intended to guide future development in the manufacturing and industrial zoning districts within an area bounded by the City of Albany on the north, portions of Central Berkeley and South Berkeley adjacent to San Pablo Avenue on the east, the cities of Emeryville and Oakland on the south, and Interstate 80/Interstate 580 on the west in Berkeley, California. As contemplated by CEQA, this programlevel EIR is intended to serve as the basis for further CEQA review that may be appropriate for specific new development projects in West Berkeley, including this project. As the project is consistent with the type of development evaluated under the West Berkeley Project EIR, the project-generated traffic volumes would not be expected to result in a perceptible increase in ambient noise levels, and the potential impact would be less than significant.

Noise Generated During Project Construction

Construction of the project would last approximately 24 months. Construction activities would temporarily increase noise levels in the vicinity of the project site. Construction noise levels would vary from day-to-day, depending on the number and condition of the equipment being used, the types and duration of activity being performed, the distance between the noise source and the receptor, and the presence or absence of barriers, if any, between the noise source and receptor. Demolition, excavation/grading, and foundation work are typically the noisiest phases of construction and would occur during the first phases of construction. The later phases of construction include activities that are typically quieter and that occur within the building under construction, thereby providing a barrier for noise between the construction activity and any nearby receptors. Cast-in-drilled-hole mini-piles or cast-in-drilled-hole helical screw anchors would be used for the foundation. In both cases, the anchors would be set in pre-drilled holes and grouted in place. No pile driving would occur.⁸⁴

⁸⁴ James, Ashley, City of Berkeley, e-mail correspondence with Lisa Luo, Baseline Environmental Consulting, December 15, 2020.

Table 16 shows typical noise levels associated with various types of construction equipment that may be used during each phase of construction. To evaluate potential construction noise impacts associated with the project, this analysis quantified the noise levels that would result from the simultaneous operation of the two noisiest pieces of equipment expected to be used during each construction phase (this is a standard analytical approach used in acoustical analysis to estimate construction noise levels). Table 16 also presents the estimated construction noise at the closest noise-sensitive receptors (two-family residential units) located about 330 feet to the east of the project site.

As shown in Table 16, construction activities have the potential to result in noise levels above the 60-dBA standard established by the BMC at the nearest two-family residential units.

TABLE 16 REFERENCE AND CALCULATED NOISE LEVELS FROM CONSTRUCTION EQUIPMENT (DBA)

| Phase | Equipment | Reference Noise Level at 50 Feet (dBA) | Calculated Exterior Noise Level at the Nearest Noise-Sensitive Receptors (dBA) |

(CalEEMod) equipment list (see Air Quality Section and Appendix A)

Source: Federal Highway Administration, 2006. FHWA Highway Construction Noise Handbook, August.

Although construction-generated noise could temporarily result in the exposure of the nearby receptors to noise levels in excess of the Noise Ordinance Standards, the implementation of the City's COAs would lessen the impacts of construction period noise, as described below.

COA: Construction Noise Reduction Program, requires the project to prepare and implement a site-specific construction noise reduction program. The noise reduction program must be prepared by a qualified acoustical consultant, submitted to, and approved by, the City prior to the issuance of a building permit. The noise reduction program must include the time limits for the project construction, as well as measures needed to ensure that construction complies with BMC Section 13.40.070. The noise reduction program would include, but would not be limited to, available measures to reduce noise levels such as: maintenance of construction equipment; use of mufflers on all internal combustion engine-driven equipment; utilization of "quiet" models of air compressors and other stationary noise sources where technologically feasible; placement of stationary noise-generating equipment as far as possible from sensitive receptors; limit on unnecessary idling; construction of solid plywood fences around construction sites adjacent to noise-sensitive land uses, if necessary; use of temporary blanket barriers, if necessary; and routing of construction-related traffic away from sensitive receptors, when feasible.

COA: Construction Hours and COA: Construction Hours - Exceptions, require the construction activity of the project to be limited to between the hours of 7:00 a.m. and 6:00 p.m. on Monday

through Friday, and between 9:00 a.m. and 4:00 p.m. on Saturday, and any construction activities that will exceed these limits must be performed in a continuous manner must obtain approval from the Zoning Officer prior to initiating any such activities.⁸⁷

Implementation of the COAs listed above would reduce construction noise levels at nearby receptors to the maximum extent that is technically and economically feasible. Since noise would be reduced to the maximum extent that is technically and economically feasible, the project construction would be consistent with the Berkeley Community Noise Ordinance (BMC Section 13.40.070). The proper implementation of these COAs would ensure that the construction of the project would not conflict with the Berkeley Community Noise Ordinance and therefore, the potential impact would be less than significant.

b) Generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant. Vibration is an oscillatory motion through a solid medium in which the motion's amplitude can be described in terms of displacement, velocity, or acceleration. Several different methods are used to quantify vibration. Typically, groundborne vibration generated by human activities attenuates rapidly with distance from the source of the vibration. Sensitive receptors to vibration include structures (especially older masonry structures), people (especially residents, the elderly, and sick), and vibration-sensitive equipment. Vibration amplitudes are usually expressed as either Peak Particle Velocity (PPV) or as Root Mean Square (RMS) velocity. PPV is appropriate for evaluating potential damage to buildings, but it is not suitable for evaluating human response to vibration because it takes the human body time to respond to vibration signals. The response of the human body to vibration is dependent on the average amplitude of a vibration event. Thus, RMS is more appropriate for evaluating human response to vibration. PPV and RMS are normally described in units of inches per second (in/sec), and RMS is also often described in vibration decibel (VdB).

BMC Section 13.40.070 prohibits vibration levels that annoy or disturbs two or more reasonable persons of normal sensitiveness who reside in separate residences. 88 Table 17 summarizes the vibration criteria to prevent disturbance of residents nearby the project site. In the analysis below, the "Occasional events" criterion is applied for construction equipment. Table 18 summarizes the vibration criteria to prevent damage to structures. The vibration criterion for non-engineered timber and masonry buildings is selected to conservatively represent the building types adjacent to and near the project site.

⁸⁷ Some construction processes, such as cement pouring and placement of concrete, during which work needs to be performed in a continuous manner, may require an extension beyond the construction work hours permissible under BMC Section 13.40.070.7.

⁸⁸ City of Berkeley Municipal Code Section 13.40.070 Prohibited Acts.

TABLE 17 VIBRATION CRITERIA TO PREVENT DISTURBANCE – RMS (VDB)

| Land Use Category | Frequent | Occasional | Infrequent |
|--|---------------------|---------------------|---------------------|
| | Events ^a | Events ^b | Events ^c |
| Residences and buildings where people normally sleep | 72 | 75 | 80 |

^a More than 70 vibration events of the same kind per day or vibration generated by a long freight train.

TABLE 18 VIBRATION CRITERIA TO PREVENT DAMAGE TO STRUCTURES

| Building Category | PPV (in/sec) | RMS (VdB) |
|---|-----------------|--------------|
| Reinforced-concrete, steel, or timber (no plaster) | 0.5 | 102 |
| Engineered concrete and masonry (no plaster) | 0.3 | 98 |
| Non-engineered timber and masonry buildings | 0.2 | 94 |
| Buildings extremely susceptible to vibration damage | 0.12 | 90 |

Source: Federal Transit Administration, 2018. Transit Noise and Vibration Impact Assessment Manual. FTA Report No.0123. September.

Vibration impacts from project operation and construction are discussed below with respect to the vibration criteria summarized in Table 17 and Table 18.

Vibration Generated During Project Operation

The project would include live/work units, artist studios, a research and development facility, art gallery, fabrication shop, and parking spaces. These land uses do not involve equipment or activities that generate excessive groundborne vibration or groundborne noise levels. Therefore, operation of the project would have a less-than-significant impact related to groundborne vibration.

Vibration Generated during Project Construction

Construction activities can result in varying degrees of ground vibration, depending on the equipment, activity, and relative proximity to sensitive receptors. The reference vibration levels at 25 feet away from the construction equipment that could be used at the project site are summarized in Table 19. Although the table provides one vibration level for each piece of equipment, it should be noted that there is considerable variation in reported ground vibration levels from construction activities, primarily due to variation in soil characteristics. Table 19 also shows the buffer distance that would be required to reduce vibration levels to below the Federal Transit Administration (FTA) thresholds for disturbance and building damage.

^b Between 30 and 70 vibration events of the same kind per day.

^c Fewer than 30 vibration events of the same kind per day.

TABLE 19 REFERENCE SOURCE LEVELS FOR CONSTRUCTION EQUIPMENT AND THE ASSOCIATED BUFFER
DISTANCES REQUIRED TO PREVENT EXCEEDANCE OF FTA THRESHOLDS

| Equipment | At 25 Feet | | Required Buffer Distance from Source | |
|------------------|---------------------|--------------|--|---|
| | PPV (in/se c) | RMS (VdB) | Building Damage Threshold 0.2 PPV (Feet) | Human Annoyance Threshold 75 VdB (Feet) |
| Vibratory roller | 0.210 | 94 | 26 | 107 |
| Large bulldozer | 0.089 | 87 | 15 | 63 |
| Caisson drilling | 0.089 | 87 | 15 | 63 |
| Loaded truck | 0.076 | 86 | 13 | 58 |
| Small bulldozer | 0.003 | 58 | 1.5 | 7 |

Note: Based on vibration levels at 25 feet, the following propagation adjustment was applied to estimate buffer distance required to reduce vibration levels at a receptor to 0.2 PPV:

 $PPV2 = PPV1 \times (D1/D2)^{1.5}$

Where: PPV1 is the reference vibration level at a specified distance.

PPV2 is the calculated vibration level.

D1 is the reference distance (in this case 25 feet).

D2 is the distance from the equipment to the receiver.

Based on vibration levels at 25 feet, the following propagation adjustment (FTA, 2018) was applied to estimate buffer distance required to reduce RMS vibration levels at a receptor to 75 VdB:

 $RMS2 = RMS1 - 30 Log_{10} (D2/D1)$

Where: RMS1is the reference vibration level at a specified distance.

RMS2 is the calculated vibration level.

D1 is the reference distance (in this case 25 feet).

D2 is the distance from the equipment to the receiver.

Source: PPV and RMS vibration levels at 25 feet from the FTA (2018) Transit Noise and Vibration Impact Assessment.

According to Table 19, the construction equipment that would generate the highest vibration levels is a vibratory roller. As discussed above, the closest residences are located approximately 330 feet to the east of the project site boundary. The closest residences would be located outside of the 107-foot buffer distance where a vibratory roller could exceed the 75-VdB threshold. Therefore, construction activities would not generate vibration with the potential to disturb residences and the impact related to vibration disturbance would be less than significant.

However, the minimum distance between the project site and adjacent buildings is 1 foot. Therefore, according to Table 19, the construction equipment would have the potential to damage the buildings adjacent to the project site, within 26 feet of the project boundary.

The impact related to construction vibration of the project would be reduced by the City's COA: Damage Due to Construction Vibration, under which the project is required to submit a screening level analysis on damage due to construction vibration. The project applicant would need to prepare a vibration impact assessment if the screening level analysis shows that the

project may create vibration to damage nearby structures. The screening level analysis (shown in Table 19) indicates that the adjacent buildings (to the north, east, and south of the project site) are within the buffer distance for potential building damage and would need to be included in the vibration impact assessment. Therefore, the project applicant must prepare a vibration impact assessment. The vibration impact assessment is required to consider project specific information and the soil characteristics in the area, as well as to recommend design means and methods of construction to avoid the potential damage, if feasible. The project sponsor is responsible for repair of any vibration damage to nearby structures resulting from the project construction.

With the implementation of COA: Damage Due to Construction Vibration, the vibration-related impact of the project construction would be less than significant.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. Oakland International Airport is the closest public use airport to the project site and is located approximately 12 miles to the south. The project site is not located within a public airport land use plan or within 2 miles of any other public use airport or private airstrip. ^{89,90} Therefore, the project would have no impact related to the exposure of people to excess noise levels from public use airports or private airstrips.

13. Population and Housing

| Wo | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| a. | Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? | | | | |
| b. | Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? | | | | |

a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less Than Significant. The project proposes to construct 12 artists' studios, two live/work units, an art gallery, fabrication space and tenant space for research and development. Based on the City's average household size of 2.17 persons, ⁹¹ the project would accommodate approximately 4.34 persons, assuming the two live/work units are calculated at full residential capacity. The new residents could increase the City's population if they relocate from outside the City; however, the percentage growth would be very marginal.

As of 2010, the population of Berkeley was estimated to be approximately 112,580.⁹² The anticipated population growth associated with the project—if each new resident results in a net increase in the City's population—represents less than a 0.0001 percent increase to the City's current population. Berkeley's population is projected to grow to a total of 140,100 people by 2040, an increase of approximately 27,520 people.⁹³ The project represents less than 0.001 percent of the population growth anticipated through 2040.

The State of California mandates that Housing Elements must allocate and accommodate a certain number of housing units by affordability level to help plan to meet a jurisdiction's share of projected adequate housing for the State. The Regional Housing Needs Allocation (RHNA) process determined that the City of Berkeley needs to demonstrate capacity for 2,959 new units for the current planning period (2014-2022). ⁹⁴ The City's Site Inventory and Residential Capacity Analysis process for the City of Berkeley has shown that there is a capacity of approximately

⁹¹ City of Berkeley, 2015. City of Berkeley 2015-2023 Housing Element, April 28.

⁹² City of Berkeley, 2015. City of Berkeley 2015-2023 Housing Element, April 28.

⁹³ City of Berkeley, 2015. City of Berkeley 2015-2023 Housing Element, April 28.

⁹⁴ City of Berkeley, 2015. City of Berkeley 2015-2023 Housing Element, April 28.

5,328 new units on underutilized parcels throughout the City, with the greatest capacity for new units in the commercial districts. ⁹⁵ The two live/work units that would be constructed as a result of the project are therefore consistent with the housing capacity requirements and projections for the City of Berkeley and would contribute towards the area's housing need allocations.

Given the reasons described above, the project would not either directly or indirectly induce unplanned population growth in Berkeley beyond that planned for the City. Therefore, the project would have a less-than-significant impact related to population growth.

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. The project site is currently developed with a single-story commercial warehouse building, and several accessory structures that would be demolished and replaced with the project. The project would not displace any people or housing. Therefore, the project would have a less-than-significant impact related to displacement of existing housing.

⁹⁵ City of Berkeley, 2015. City of Berkeley 2015-2023 Housing Element, April 28.

14. Public Services

| Wo | uld the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| a. | Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: | | | | |
| | 1. Fire Protection? | | | \boxtimes | |
| | 2. Police Protection? | | | \boxtimes | |
| | 3. Schools? | | | \boxtimes | |
| | 4. Parks? | | | \boxtimes | |
| | 5. Other public facilities? | | | \boxtimes | |

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: Fire protection, police protection, schools, parks, other public facilities?

The following section addresses the project's potential effects on: fire service, police service, schools, parks, and other public facilities. Impacts to public services would occur if the project increases demand for services such that new or expanded facilities would be required, and construction or operation of these new facilities would cause environmental impacts.

Fire Protection

Less Than Significant. The Berkeley Fire Department currently provides fire protection and emergency medical services to the project site. The Berkeley Fire Department operates seven fire stations including seven engine companies, two truck companies, and three ambulances, and two reserve ambulances. Primary service to the project site would be provided by Station 6 at 999 Cedar Street. This station is approximately ½-mile south of the project site. Station 6

houses an engine company and a reserve engine. ⁹⁶ Currently, the Fire Department is staffed with 128 employees. ⁹⁷ The City's goal for staffing is reviewed each budget cycle and considers historical and current year information related to fire and emergency services. Additional housing units add to the potential for increase in call volume. In 2016 (the most recent data available), the Berkeley Fire Department responded to 244 fires, including 92 structure fires, and 10,066 emergency medical calls for service. ⁹⁸

The addition of two live/work units, 12 artists' studios totaling 4,406 square feet, 2,005-square-foot research and development facility, 1,725-square-foot art gallery and a 2,070-square-foot fabrication shop and would increase the day and nighttime population on the project site and in Berkeley in general, incrementally increasing the demand for emergency fire services. The total service population would be 32. 99 Maximum building heights on the site would reach approximately 47 feet and 10 inches to the rooftop. The Fire Department's aerial ladder truck reaches 100 feet and the Department has the appropriate equipment to access these buildings. Furthermore, the project would be required to comply with all applicable codes for fire safety and emergency access and the Fire Department would ensure that appropriate measures are implemented to reduce hazardous conditions at the site.

The Berkeley Fire Department would continue to provide services to the project site and would not require additional firefighters to serve the project. The construction of new or expanded fire stations would not be required to meet response time goals. Therefore, the project would not result in a substantial adverse physical impact associated with the provision of additional fire facilities or services. Furthermore, the City's Fire Department evaluates staffing needs on a continual basis as growth occurs throughout the City. Funding for additional firefighting services, including new staff, is obtained through the City's General Fund.

In addition, the Berkeley Fire Department administers the Uniform Fire Code and applicable sections of the California Health and Safety Code, California Administrative Codes, Title 19, Public Safety and Title 24, Building Standards. The Berkeley Fire Department also actively participates in the City of Berkeley's development process by commenting on building design and materials. The project would be required to comply with all applicable codes for fire safety and emergency access and additional review by the Fire Department to ensure that appropriate measures are implemented to reduce hazardous conditions at the site and provide for adequate emergency access. Compliance with the Berkeley Fire Department's requirements would further ensure that potential impacts to fire services would be less than significant.

⁹⁶ City of Berkeley. Berkeley Fire Department, Fire Stations and Fire Districts. Accessed November 4, 2020. https://www.cityofberkeley.info/Fire/Home/Fire_Stations_and_Fire_Districts.aspx.

⁹⁷ City of Berkeley. Berkeley Fire Department, Recruitment. Accessed November 4, 2020. https://www.cityofberkeley.info/fire/recruitment/.

⁹⁸ City of Berkeley, 2017. NFPA Response Data, January 1 to December 31, 2016.

⁹⁹ Service population was estimated using 2.17 persons/residential unit and 2.5 persons per 1,000 square feet of commercial. For the purposes of this analysis all artist studios, R and D facilities, art galleries and fabrication shop were considered under 2.5 persons per 1,000 square feet.

Police Protection

Less Than Significant. The Berkeley Police Department provides police protection services to the project site. Police headquarters are located at 2100 Martin Luther King Jr. Way, approximately 1.5 miles to the southeast of the project site. The Police Department consists of 270 employees including 181 sworn officers. This number allows for a ratio of 1.61 sworn officers per 1,000 residents. The City's goal for staffing is reviewed each budget cycle and considers historical and current year information related to police services.

The Police Department has transitioned to a 16-beat system; the project site is located within Beat 15N. ¹⁰¹ The standard City-wide response time for Priority 1 calls (life-threatening situations) is 5 minutes from the time of dispatch. ¹⁰²

The addition of two live/work units, 12 artists' studios totaling 4,406 square feet, 2,005-square-foot research and development facility, 1,725-square-foot art gallery and a 2,070-square-foot fabrication shop would increase the day and nighttime population on the site and in Berkeley in general, incrementally increasing the demand for police services. However, the presence of a day and nighttime population in this area could also increase security, which could in turn reduce the potential for criminal activity. Increased demand for police services on the site would not require the alteration of existing police facilities or construction of new facilities in order to maintain existing service standards or staffing ratios. The project would not result in an adverse environmental impact related to demand for police services. Therefore, the project would have a less-than-significant impact related to police services.

Schools

Less Than Significant. The Berkeley Unified School District (BUSD) operates 20 schools, including 11 public elementary schools (grades K-5), three middle schools (grades 6-8), and one high school (grades 9-12), In addition, the BUSD has three preschool facilities and one Adult School, and a continuation high school serving several thousand students each year.

The estimated number of students the project would generate is derived by multiplying the number of students per dwelling unit (the student yield factor) by the number of dwelling units in the project (two units). The BUSD has not developed student generation rates to estimate the number of students that might be anticipated with new development. However, the California State Allocation Board Office of Public School Instruction reports that the statewide student yield factor per dwelling unit is 0.5 students for Grades K through 6th and 0.2 students for

¹⁰⁰ City of Berkeley. Berkeley Police Department, About Us. Accessed November 4, 2020. https://www.cityofberkeley.info/Police/Home/About_Our_Department.aspx.

¹⁰² City of Berkeley, 2001. General Plan Draft Environmental Impact Report, Chapter 4.C, Community Services, February.

grades 7th through 12th. 103 Applying the statewide average student yield factor, the project could generate 1 to 2 students—approximately one elementary school student and one middle and high school student. 104

California state law authorizes local school districts to adopt one-time fees for new housing and commercial developments. SB 50, which revised the existing limitation on developer fees for school facilities, was enacted as urgency legislation which became effective on November 4, 1998 as a result of the California voters approving a bond measure (Proposition 1A). SB 50 established a 1998 base amount of allowable developer fees (Level One fee) for residential construction (subject to adjustment) and prohibits school districts, cities, and counties from imposing school impact mitigation fees or other requirements in excess of or in addition to those provided in the statute.

Effective June 8, 2017, most new developments in Berkeley will be assessed a one-time School Facility Fee by the BUSD. The fee is \$3.48 per square foot for residential development of more than 500 square feet and \$0.56 per square foot for new commercial and industrial development. This fee represents the maximum allowed under State law. ¹⁰⁵ The fees would be directed towards maintaining adequate service levels, which would ensure that any impact to schools that could result from the project would be offset. The project will be required to pay the fee before being issued a building permit. Therefore, potential impacts pertaining to schools would be less than significant.

Parks

Less Than Significant. The City owns and operates approximately 52 parks, comprising 230 acres of urban parks. The City has a goal of two park acres per 1,000 residents. The population of Berkeley (112,580 residents) enjoys a park service ratio of 1.9 acres per 1,000 residents. With the addition of Tilden Regional Park (2,079 acres), Eastshore State Park (1,854 acres), and the Bay Trail (6.3 acres), and Claremont Canyon Regional Park (198 acres) parkland available to residents increases to over 12 acres per 1,000 residents.

¹⁰⁶ City of Berkeley, 2001. City of Berkeley General Plan, Open Space and Recreation Element, April 23.

The closest park is Harrison Park, five blocks west of the project site on Harrison Street between Fifth Street and Cedarwood Lane. Harrison Park has two full size soccer fields, a skate park, and a field house. 107

Development of the project could increase the use of these parks, as well as other parks within the City and within the region. However, this increase in use is not expected to adversely affect the physical conditions of local and regional open space areas or recreational facilities or require the provision of new parks or facilities. Specifically, the project is anticipated to increase the City population by less than one-half of 1 percent. The project would not result in a substantial increase in demand for park or recreation services in the vicinity, such that new facilities would be required to serve the project. Therefore, the project would have a less-than-significant impact related to the provision of park and recreational facilities.

Other Public Facilities

Less Than Significant. Development of the project could also increase demand for other public services, including libraries, community centers, and public health care facilities. However, the increased residential population that would result from the project would not substantially increase the use of these facilities, such that new facilities would be needed to maintain service standards, as these facilities are not currently overused and have capacity to serve new demand. Therefore, impacts to other public facilities would be less than significant.

¹⁰⁷ City of Berkeley, 2020, Harrison Park. Accessed November 5, 2020.

15. Recreation

| Wo | ould the project: | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| a. | Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | | | | |
| b. | Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? | | | | |

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Less Than Significant. As discussed in Section 15, Public Services, residents of the project would be expected to use local parks and community facilities in Berkeley as well as regional recreational facilities. Although the project would incrementally increase use of these facilities, this minor increase in use is not expected to result in substantial physical deterioration of local parks, trails, and community centers and this impact would be less than significant. Specifically, the project is anticipated to increase the City's population by less than one-half of 1 percent and these facilities are anticipated to have capacity to serve this minimal increase in demand. Therefore, the project would have a less-than-significant impact on existing parks or other recreational facilities.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Less Than Significant. The project would involve redevelopment of the project site with a variety of light industrial, commercial and live/work uses. The project does not include or require the construction or expansion of existing public recreational facilities; therefore, development of the project and associated recreational opportunities for use by project residents would not result in additional environmental effects beyond those described in this document.

16. Transportation and Traffic

| Would the project | | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|---|--|--------------------------------------|--|------------------------------------|--------------|
| Would the project: | | _ | _ | _ | _ |
| a) Conflict with a program policy addressing the cir including transit, roadwa pedestrian facilities? | culation system, | | | | |
| b) Would the project conflict with CEQA Guidelines Se subdivision (b)? | | | | | |
| c) Substantially increase ha geometric design feature or dangerous intersectio uses (e.g., farm equipme | e (e.g., sharp curves ns) or incompatible | | | | |
| d) Result in inadequate em | ergency access? | | | \boxtimes | |
| | | | | | |

a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

Less Than Significant

The project is consistent with applicable plans, ordinances, and policies, and would not cause a significant impact by conflicting with adopted plans, ordinances, or policies addressing the safety and performance of the circulation system, including transit, roadways, bicycle lanes, and pedestrian paths (except for automobile level of service or other measures of vehicle delay which is no longer considered a CEQA impact per SB 743). Senate Bill 743 modified local environmental review processes by removing automobile delay, as described solely by level of service or similar measures of vehicular capacity or traffic congestion, as a significant impact on the environment pursuant to CEQA.¹⁰⁸

The project would encourage the use of non-automobile transportation modes by providing a mix of uses that include a research and development facility, art gallery, fabrication shop, artist studios and live/work units uses in a dense, walkable urban environment that is well-served by both local and regional transit.

There are currently existing sidewalks and crosswalks along the project site. The project would not modify the configuration of existing pedestrian sidewalks and crosswalks surrounding the project site. The project would provide 24 long-term bicycle parking spaces and 6 short-term spaces. In addition to these improvements for bicyclist parking, the project is located within two blocks of numerous designated bicycle boulevards and bike ways, is approximately 1.2

¹⁰⁸ Steinberg, 2013. (Senate Bill SB 743)

miles northwest of the North Berkeley BART Station, and is in close proximity to several AC Transit stops, which would encourage transit use. The addition of new residents and employees in a transit-rich environment would be consistent with Transportation Goal 1 in the West Berkeley Plan to "Improve traffic flow and air quality by reducing reliance on single occupant automobiles, by encouraging use of alternative means of transportation."

The project is consistent with the City's 2017 Bicycle Plan (City of Berkeley Bicycle Plan), and the Draft 2020 Pedestrian Plan (2020 Pedestrian Plan) as it would not make major modifications to existing bicycle or pedestrian facilities in the surrounding areas and would not adversely affect installation of future facilities.

Overall, the project would not conflict with adopted plans, ordinances, or policies addressing the safety and performance of the circulation system. This is a less-than-significant impact; no mitigation measures are required.

Therefore, the project would have less than significant impacts on pedestrian and bicycle circulation and transit capacity.

b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3 subdivision (b)?

As established in the Transportation Element of the City of Berkeley General Plan (Policy T-18, amended November 2020), the City uses vehicle miles traveled (VMT) as the metric to assess transportation impacts from a plan or project. A project would have a significant effect on the environment if it would cause substantial additional VMT, thereby conflicting with the General Plan Policy T-18. According to the City's VMT Criteria and Thresholds Report, Berkeley utilizes the Alameda CTC model to forecast VMT for proposed projects; projects with residential uses measure household VMT per capita, and employment-generating uses measure home-work VMT per worker. The project's transportation impact would be less than significant if the project VMT is 15 percent or more below either the average regional per capita or per worker VMT. If a project's VMT does not meet the established thresholds, mitigation measures would be required, where feasible.

Land use projects may result in substantial additional VMT. To determine whether a project would result in transportation impacts associated with VMT, the City has adopted thresholds of significance and screening criteria to determine if a land use project would result in significant impacts under the VMT metric.

Projects that include residential uses would create a significant impact in cases where the forecasted project-generated VMT exceeds the existing citywide household VMT per capita minus 15 percent. For mixed-use projects, each proposed land use is evaluated independently, per the significance criteria described below.

In accordance with the State Office of Planning and Research's (OPR's) Technical Advisory on Evaluating Transportation Impacts in CEQA (transportation impact guidelines), the City of

Berkeley has adopted several screening criteria to identify types, characteristics, or locations of projects that would not result in significant impacts to VMT. If a project meets one of the five screening criteria, then it is presumed that VMT impacts would be less than significant for the project and a detailed VMT analysis is not required. The screening criteria are the following:

- 1. Small infill projects (i.e., 20 residential units or up to 10,000 square feet of non-residential use).
- 2. Locally-serving public facilities (e.g., public schools, libraries, community centers).
- 3. Map-Based Screening. The City has developed maps depicting existing VMT levels in Berkeley based on the Alameda CTC model. The Land Use Planning Division uses these maps and associated VMT data to determine whether a proposed project is located in an area of the city that is below the VMT threshold (i.e., household and/or home-work VMT per capita 15% lower than regional average).
- 4. Projects with 100% deed-restricted affordable housing units (Low- and Very Low-Income households). 109
- 5. Projects located in a Transit Priority Area (TPA) (i.e., one half-mile walkshed around major transit stops¹¹⁰ or one-fourth mile around high-quality transit corridors¹¹¹).¹¹²

If a project is found to have a significant impact on VMT, the impact must be reduced by modifying the project to reduce its VMT to an acceptable level and/or mitigating the impact through modifying the project's characteristics or location so that it generates fewer vehicle trips or trips of shorter distance; options may include locating the project closer to public transit facilities, changing the project's characteristics to include a broader mix of complementary land uses, requiring that it provide amenities to support bicycling and walking, or adopting paid parking, among other possibilities.

The City's VMT Criteria and Thresholds Report identifies screening criteria that evaluates whether a project is presumed to have a less than significant VMT impact.

The mixed residential and employment-based uses of the project would meet the applicable VMT screening criteria as follows:

¹⁰⁹ As defined in Berkeley Municipal Code Section 22.20.065

¹¹⁰ Major transit stop" is defined in Public Resources Code 21064.3 as a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.

¹¹¹ High-quality transit corridor" is defined in Public Resources Code 21155 as a corridor with fixed-route bus service

¹¹² Exceptions include projects with the following characteristics: FAR of less than 0.75 for office uses, more than 200,000 square feet of office or commercial space, provides more parking than minimum required, inconsistent with the General Plan and Zoning Ordinance, replaces affordable units with market-rate units, or has project- or location-specific information indicating the project would generate significant levels of VMT.

- Map-Based. The project site is located in a TAZ where the current (2020) VMT per resident for the live/work units and is at least 15 percent below the regional average.¹¹³
- Transit Priority Area (TPA). The project site is located 0.2 miles from a high-quality transit corridor (bus stops located at San Pablo Avenue and Gilman Street). 114

Therefore, both the residential and light industrial land use components of the project are screened out and would have a less-than-significant VMT impact, and therefore would not conflict with General Plan Policy T-18. A detailed VMT analysis is not required.

Project-Level VMT Impact Analysis

As described above, the City's VMT Criteria and Thresholds Report identifies screening criteria that evaluates whether a project is presumed to have a less than significant VMT impact.

The mixed residential and employment-based uses of the project would meet the applicable VMT screening criteria. Therefore, both the residential and light industrial land use components of the project are screened out and would have a less than significant VMT impact. A detailed VMT analysis is not required. The project would, therefore, not result in a significant impact on the transportation system based on the City's VMT criteria.

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Less Than Significant. The project proposes a driveway on Tenth Street on the northern portion of the site. Pedestrian access between the garage and the lobby would be provided through a door on the ground floor building. Ten feet of red curb area is provided off of the project driveway to ensure adequate sight distance between vehicles exiting the project driveway and oncoming motorists and bicyclists on Tenth Street. The project site design in required to conform to City design standards and would not create significant impacts to pedestrians, bicyclist, or traffic operations.

d) Result in inadequate emergency access?

Less Than Significant. The project does not include on-site roadways. In addition, as is standard City practice, the Berkeley Fire Department and Berkeley Police Department would review project plans for access concerns. Because the project would not involve permanent physical changes to public streets that could impede emergency access, the project would have a less than significant impact to emergency access.

¹¹³ Metropolitan Transit Commission (MTC), 2020. Simulated VMT per population. Accessed January 15.

17. Tribal Cultural Resources

| | | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|--------------------------------|--|--------------------------------------|--|------------------------------------|--------------|
| Wo | ould the project: | | | | |
| sig Pu fea ica lar | use a substantial adverse change in the prificance of a tribal cultural resource, defined in blic Resources Code Section 21074 as either a site, ature, place, cultural landscape that is geographilly defined in terms of the size and scope of the adscape, sacred place, or object with cultural value a California Native American tribe, and that is: | | | | |
| a. | Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or | | | | |
| b. | A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe. | | | | |

a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?

Less Than Significant. The City of Berkeley referred the project to the Native American Heritage Commission as part of its compliance with AB 52. No California Native American tribes requested consultation with the City of Berkeley regarding the project. Therefore, the City has not been notified of any existing tribal cultural resources within the project site.

b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Less Than Significant. The City of Berkeley has not determined any resource within the project site to be significant pursuant to the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1.

18. Utilities and Service Systems

| | | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----------|--|--------------------------------------|--|------------------------------------|--------------|
| Wo a. | and the project: Require or result in the construction of new water or wastewater treatment facilities or storm water drainage, electric power, natural gas, or telecommunication facilities the construction of which could cause significant environmental effects? | | | | |
| b. | Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? | | | | |
| c. | Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? | | | | |
| d. | Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? | | | | |
| e. | Comply with federal, state, and local management and reduction statutes and regulations related to solid waste? | | | | |

a) Require or result in the construction of new water or wastewater treatment facilities or storm water drainage, electric power, natural gas, or telecommunication facilities the construction of which could cause significant environmental effects?

Less Than Significant. In Berkeley, sanitary sewage flows to the East Bay Municipal Utility District's (EBMUD) wastewater interceptors, which then directly flows to EBMUD's Main Wastewater Treatment Plant (MWWTP) in the City of Oakland. Berkeley's network of pipes begin with building connections at the upper laterals (which are privately-owned and maintained) and continue to the lower laterals and the sewer mains (which are City-owned and maintained). Within the City of Berkeley, there are approximately 254 miles of sanitary sewer mains, with an estimated 31,600 lateral connections. The sewer mains vary from 1 to 100 years old and vary in size from 6 to 48 inches in diameter.

¹¹⁵ City of Berkeley, 2019. Sewer System Management Plan, Revision 2, May.

¹¹⁶ City of Berkeley, 2001. General Plan Draft Environmental Impact Report, Chapter 4.E, Infrastructure, February.

The City's sewer system is connected to trunk lines that convey flows to the MWWTP. The MWWTP has a primary treatment capacity of 320 million gallons per day (mgd) and a secondary treatment capacity of 168 mgd. Storage basins provide plant capacity for a short-term hydraulic peak of 415 mgd. The average annual daily flow into the MWWTP is approximately 60 mgd, representing 36 percent of the plant's secondary treatment capacity. Treated effluent is disinfected, dechlorinated, and discharged through a deep-water outfall 1 mile off the East Bay shoreline into San Francisco Bay. 118

In compliance with the July 28, 2014 Consent Decree, the City has implemented a long-term mandated Sanitary Sewer Capital Improvement Program to eliminate Sanitary Sewer Overflows and reduce stormwater infiltration and inflow (I/I) into the sanitary sewer system. Under this program, the City utilizes a comprehensive asset management approach based on complex and evolving hydrologic and hydraulic modeling and condition assessments to repair, replace, or upgrade the City's portion of the sanitary sewer system, ultimately to aid EBMUD in eliminating discharges from their Wet Weather Facilities by the end of 2035.¹¹⁹

The project would generate domestic wastewater, which would be treated by the EBMUD treatment facilities. EBMUD is required to meet applicable Regional Water Board treatment requirements. In addition, the project would use an incremental portion of EBMUD's wet weather treatment capacity. Wastewater generated by the project is assumed to be 80 percent of water demand, or 0.0020 mgd, which represents less than 1 percent of the remaining capacity of the MWWTP; therefore, the project would not generate wastewater exceeding the wastewater treatment requirements of the Regional Water Board.

Wastewater discharges that may occur at the project site would be required to comply with the terms of the permit and may be subject to monitoring by EBMUD to ensure that the development's sewage discharge does not impair the ability of the MWWTP to meet wastewater treatment objectives and requirements. Therefore, the impact to wastewater treatment requirements would be less than significant.

112

¹¹⁷ East Bay Municipal Utility District (EBMUD). Wastewater Treatment. Accessed November 6, 2020. Website: www.ebmud.com/wastewater/collection-treatment/wastewater-treatment.

¹¹⁸ East Bay Municipal Utility District (EBMUD), 2009 (updated May 5, 2020). Sewer System Management Plan, February 10.

¹¹⁹ City of Berkeley, 2015. Mosto Construction for Sanitary Sewer Manhole Rehabilitation FY 2015 Project, Consent Calendar, February 14.

 $^{^{120}}$ Projected wastewater demand was calculated using the demand projections for residential and retail commercial uses identified in the Adeline Corridor Specific Plan Draft Environmental Impact Report, May 2019. Demand projections in this EIR indicate that wastewater demand for low-rise residential use (defined by CAL FIRE as up to 75 feet in height) would be 131.2 gallons per day (gpd) (131.2 x 2 live/work units=262.4 gpd) Commercial uses would generate a demand for 0.173 gpd square feet of retail commercial floor area (0.173 x 10,206 retail commercial =1,765.6). See page 4.13-10 of the Adeline Corridor Specific Plan Draft EIR.

EBMUD's Orinda Water Treatment Plant (Orinda WTP) and the MWWTP serve the project site and surrounding area. The Orinda WTP has the largest output of EBMUD's treatment plants with a peak capacity of 190 mgd.¹²¹ The project would represent less than 1 percent of the total capacity of the Orinda WTP (refer to subsection d below for projected water demand) and less than 1 percent of the remaining capacity of the MWWTP. As described above, development of the project on an infill site would not substantially increase water demand or wastewater generation at the project site such that new or expanded water or wastewater treatment facilities would be required to serve the project.

The project would connect to existing water delivery and sanitary sewer systems within the vicinity of the site, and it is anticipated that existing pipelines would have sufficient capacity to support project water and wastewater flows. However, as a condition of project approval, the project applicant would be required to coordinate with EBMUD, the City's Fire Department, and the City's Public Works Department to assess water, wastewater, and fire flow requirements.

The project would include new connections to existing stormwater infrastructure within the vicinity of the site. The existing project site is developed with one single-story building and several accessory structures and is entirely paved. The project would not increase the amount of impervious surfaces on the project site. The project would include stormwater control features that would enhance infiltration of stormwater to the subsurface (e.g., flow-through planters). Any runoff would be treated in accordance with the Alameda County Clean Water Program (ACCWP), including C.3 requirements, before flowing to the City's storm drain system.

The project would not require the construction of new stormwater drainage facilities or expansion of existing facilities, and therefore would have a less-than-significant impact.

The project would be conditioned to comply with existing requirements that reduce energy use from buildings and equipment, including renewable energy, energy-and water- efficient technologies, use of recycled materials, waste reduction, reuse and recycling of construction and demolition scraps, high efficiency lighting, and design standards that maximize use of natural lighting inside buildings It should also be noted that the City's General Plan, Community Design Guidelines, and Zoning Regulations include policies that reduce energy use from buildings and equipment, including incorporating renewable energy, energy- and water-efficient technologies, use of recycled materials, waste reduction, reuse and recycling of construction and demolition scraps, high efficiency lighting, and design standards that maximize passive ventilation and cooling systems and use of natural lighting inside buildings. The projects impacts related to energy use (gas, electricity, telecommunications) would be less than significant.

¹²¹ City of Berkeley, 2019. Adeline Corridor Specific Plan, Draft Environmental Impact Report, May 2019, Accessed November 6.

https://www.cityofberkeley.info/uploadedFiles/Planning_and_Development/Level_3_Land_Use_Division/Adeline%20Corridor%20Specific%20Plan%20Draft%20EIR.pdf.

b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less Than Significant. Water service at the project site and in the project area is provided by EBMUD. EBMUD obtains approximately 90 percent of its water from the Mokelumne River watershed, and transports it through pipe aqueducts to temporary storage reservoirs in the East Bay hills. EBMUD has water rights and facilities to divert up to a daily maximum of 325 mgd from the Mokelumne River. Average daily water demand within the entire EBMUD service area was 232 mgd in 2015 and is projected to reach 276 mgd in 2025.

The project would generate a water demand of 0.0025 mgd for new residential uses, artist studios, research and development facility, fabrication shop, and art gallery.¹²⁴ This amount accounts for less than 1 percent of EBMUD's projected service-wide daily water demand for 2015 and 2025. Furthermore, EBMUD's projected water demand accounts for projected growth within the region as identified by ABAG. Per the discussion in Section 13, Population and Housing, the project site is an appropriate location for residential and job growth and would meet the demand for growth.¹²⁵ EBMUD would not require new or expanded water entitlements to serve the project.

EBMUD completed development of a revised Water Supply Management Program (WSMP) 2040 in April of 2012, which is the District's plan for providing water to its customers over the next 30 years. ¹²⁶ According to the WSMP, EBMUD's water supplies are estimated to be sufficient during the planning period (2010-2040) in normal and single dry years. Therefore, new or expanded entitlements are not anticipated to be required to provide water service to the project and the impact related to sufficient water supplies would be less than significant.

The WSMP 2040 emphasizes maximum conservation and recycling strategies, with a total of 50 mgd of future supply to be provided from those two component categories. According to the WSMP, the combination of rationing, conservation, and raw and recycled water will satisfy

114

¹²² East Bay Municipal Utility District (EBMUD), 2016. Urban Water Management Plan 2015, July.

¹²³ The planning level of demand differs from actual 2015 demand, as the planning level does not reflect the effects of implementing measures to reduce water use. After a drought, a rebound effect is expected wherein demand rises back to projected levels, thus, the projected demand reflects the total planning level demand.

 $^{^{124}}$ Projected water demand was calculated using the demand projections for residential and retail commercial uses identified in the Adeline Corridor Specific Plan Draft Environmental Impact Report, May 2019. Demand projections in this EIR indicate that water demand for low-rise residential use (defined by CAL FIRE as up to 75 feet in height) would be 164 gpd (164 x 2 live/work units=328 gpd). Commercial uses would generate a demand for 0.216 gpd per square foot of retail commercial floor area (0.216 x 10,206 retail commercial = 2,204.5). See page 4.13-12 of the Adeline Corridor Specific Plan Draft EIR.

¹²⁵ Association of Bay Area Governments (ABAG) and Metropolitan Transportation Commission (MTC), 2017. Plan Bay Area 2040, July 26.

¹²⁶ East Bay Municipal Utility District (EBMUD), 2012. Water Supply Management Program 2040 Plan, April.

increased customer demand through 2040. 227 Supplemental supply will also be needed to keep rationing at a lower level and to meet the need for water in drought years.

In response to Governor's Executive Order B-29-15, issued on April 1, 2015, EBMUD implemented mandatory water restrictions on all customers within its service area, with the goal of reducing water demand by 20 percent. ¹²⁸ On May 10, 2016 EBMUD declared an end to the drought emergency in its service area, and eased the drought level to Stage 0, indicating normal water supplies. On April 7, 2017, the drought emergency was lifted in all counties except Fresno, Kings, Tulare and Tuolumne, with the signing of Governor's Executive Order B-40-17. ¹²⁹

Future users of the site (and all EBMUD customers) should plan for shortages in times of drought. Policy EM-26 in the City of Berkeley General Plan promotes water conservation through City programs and requirements, including cooperation with EBMUD to make recycled water available for irrigation and other uses. Compliance with standard City requirements for incorporating water conservation measures into the project design will ensure efficient use of water at the project site and minimize the project's potential water demand such that the project's impact would be less than significant. Furthermore, per Senate Bill 7, signed into law on September 26, 2016, new apartment buildings constructed after January 1, 2018, are required to include submeters for every rental unit and to bill tenants accordingly. This ensures future tenants know how much water they are using and have a direct financial incentive to conserve.

EBMUD also imposes a system capacity charge on new developments to fund system maintenance and the development of new water sources. The project applicant would be required to pay this fee and undertake water conservation measures to conserve water such as the installation of low-flow toilets. In addition, the project applicant would also be required to comply with the City's COA: *Water Efficient Landscaping*, which specifies that the applicant shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans.

Landscape improvements are required to be consistent with the current versions of the State's Water Efficient Landscape Ordinance as well as Section 31 of EBMUD's Water Service Regulations (Water Efficiency Requirements). Section 31 also specifies water-efficiency requirements for

¹²⁷ East Bay Municipal Utility District (EBMUD), 2012. Water Supply Management Program 2040 Plan, April.

¹²⁸ East Bay Municipal Utility District (EBMUD), 2016. Urban Water Management Plan 2015, July.

¹²⁹ California Water Boards, State Water Resources Control Board, 2017. Executive Order B-40-17: Governor Lifts Drought Emergency and Retains Prohibitions on Wasteful Practices. Accessed November 6, 2020.,

 $https://www.waterboards.ca.gov/water_issues/programs/conservation_portal/executive_orders.html \#: \sim :text = Executive \% 20 Order \% 20 B\% 2D 40\% 2D 17\% 20 (04\% 2F07\% 2F, to\% 20 address\% 20 diminished \% 20 groundwater \% 20 supplies.$

water-using equipment (i.e., toilets, showerheads, dishwashers, etc.) that are included as part of the project.

With the compliance with requirements of the State's Water Efficient Landscape Ordinance and Section 31 of EBMUD's Water Service Regulations, the project's impacts pertaining to water supplies would be less than significant.

c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Less Than Significant. Please refer to subsection a above; the project would not exceed the capacity of the wastewater treatment system. Therefore, the impact would be less than significant.

d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Less Than Significant. The project would entail the demolition of an existing single-story building on the project site, and accessory structures. Per the City's COA: Construction and Demolition, the applicant is required to submit a Waste Diversion Form and Waste Diversion Plan that meet the diversion requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste. This requirement would divert as much demolition debris as possible from the waste stream.

Prior to approval of large development projects, the City of Berkeley Zero Waste Management Division staff reviews proposed plans for the adequate design of trash and recycling facilities. The project would also comply with General Plan Policy EM-5, which promotes and encourages compliance with "green" building standards. These requirements would divert as much solid waste as possible from the waste stream.

The City of Berkeley operates its own refuse collection system. The City provides curbside recycling, greenwaste and refuse collection services to the project site. Solid waste would be transported from the Berkeley Transfer Station, located at 1021 Second Street, to the Altamont Landfill and Resource Recovery Facility, located near the Altamont Pass, northeast of the City of Livermore. As of June 30, 2016, the Altamont Landfill had 65,400,000 cubic yards of capacity remaining, approximately half of its maximum permitted capacity. As described above, the City's COA: *Construction and Demolition Diversion* and requirements for solid waste diversion would ensure the project generates as little landfill waste as possible. In 2018, the City of

¹³⁰ County of Alameda, 2020. Alameda County Integrated Waste Management Plan, Countywide Element, Countywide Siting Element, March 19.

¹³¹ California Department of Resources Recycling and Recovery (CalRecycle), 2019. SWIS Facility/Site Activity Details: Altamont Landfill & Resource Recovery (01-AA-0009). Accessed November 6, 2020. https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/7?siteID=7.

Berkeley diverted approximately 68 percent of its solid waste from landfills through recycling and/or composting efforts. The Altamont Landfill would have sufficient capacity to accommodate the solid waste generated by the project, and this impact would be less than significant.

e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Less Than Significant. Compliance with Berkeley's Municipal Code Title 11 is required of all businesses in the city. BMC Section 11.60.010 regulates solid waste and recycling and is consistent with the City of Berkeley's 1986 Solid Waste Management Plan, the County of Alameda Solid Waste Management Plan, and the legislative intent and findings of the State of California Solid Waste Management and Resource Recovery Act of 1972 (Government Code Section 66700 et seq.). Therefore, the project would comply with all applicable regulations related to solid waste and any impacts would be less than significant.

19. Wildfire

| | | Potentially Significant Impact | Less Than Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|--|--------------------------------------|--|------------------------------------|--------------|
| Wo | uld the project: | | | | |
| a. | Substantially impair an adopted emergency response plan or emergency evacuation plan? | | | | |
| b. | Due to slope, prevailing winds, and other factors, exacerbate wildfire risks and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? | | | | |
| c. | Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines, or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | | | | |
| d. | Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability or drainage changes? | | | | |

a-d) Substantially impair an adopted emergency response plan or emergency evacuation plan? Due to slope, prevailing winds, and other factors, exacerbate wildfire risks and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines, or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability or drainage changes?

No Impact.

The project site is not located in or near a state responsibility area or very high fire hazard severity zone for wildland fires 133. The closest very high hazard severity zone is approximately two miles east of the project site, and intervening areas are developed with urban uses. Therefore, there would be no impacts related to wildfire.

¹³³ California Department of Forestry and Fire Protection, 2008. Berkeley Very High Fire Hazard Severity Zones in LRA As Recommended by CAL FIRE. Fire and Resource Assessment Program. Accessed December 10, 2020. https://osfm.fire.ca.gov/media/5604/berkeley.pdf./

20. Mandatory Findings of Significance

| | | Potentially Significant Impact | Significant With Mitigation Incorporated | Less Than Significant Impact | No Impact |
|----|---|--------------------------------------|--|------------------------------------|--------------|
| a. | Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number, or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory? | | | | |
| b. | Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.) | | | | |
| C. | Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? | | | | |

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

Less Than Significant. The project site consists of an infill site in an urban area. The site does not support habitat for special-status plant or animal species. Therefore, development of the project would not: 1) degrade the quality of the environment; 2) substantially reduce the habitat of a fish or wildlife species; 3) cause a fish or wildlife species population to drop below self-sustaining levels, 4) threaten to eliminate a plant or animal community; 5) reduce the number or restrict the range of a rare of endangered plant or animal; or 6) eliminate important examples of the major periods of California history or prehistory. Therefore, the project would have a less-than-significant impact.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are

considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)

Less Than Significant. Implementation of the project would result in less-than-significant environmental impacts with implementation of the identified conditions of approval. Impacts associated with the project would generally be localized at the project site and would not combine with other projects to cause cumulatively considerable environmental impacts. The project would not result in impacts that are individually limited, but cumulatively considerable.

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Less Than Significant. In general, impacts to human beings are associated with air quality, hazards and hazardous materials, and noise impacts. As detailed in the preceding responses, the project would not result, either directly or indirectly, in substantial adverse impacts related to air quality, hazards and hazardous materials, or noise and vibration. Therefore, the project would not have substantial adverse effects on people.

Berkeley 1207 10th St Construction Emissions.v2 - Alameda County, Annual

Project Characteristics - PGE CO2 intensity factor updated to 2018 value

Land Use - Assume 40 percent of live-work is residential; regional shopping center is assigned to work portion of live-work, art studios and art gallery. general light industry is assigned to fab and lab.

Off-road Equipment - According to RFI, mini-piles would be included

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Grading - Assume that 3 feet maximu dept of proposed excavation would occur throughout project site. Therefore assume 1400 cubic yad of import and export.

Demolition - The existing building is 2,300 sqft

APPENDIX B: PHASE I ENVIRONMENTAL ASSESSMENT

Summary Report

Phase I Environmental Assessment at 1207 Tenth Street Berkeley, California

Prepared for:

Johnathan Bachrach

Prepared by:

INTERNATIONAL GEOLOGIC LLC 2831 Sylhowe Road Oakland, California 94602

IG Job # 4006-1

July 31, 2020

Mr. Johnathan Bachrach 1207 Tenth Street Berkeley, California 94710 July 31, 2020

Subject: Phase I assessment for the property at 1207 Tenth Street, Berkeley, California.

Johnathan:

The undersigned consultant, International Geologic has been retained by you to provide a Phase I Environmental Site Assessment Report ("Report") of the referenced Property. International Geologic understands that you are considering a purchase of the Property and are conducting this Phase I for due diligence purposes. Please be advised that you and your assigns can rely on the Report entitled "Phase I Environmental Site Assessment: 1207 Tenth Street, Berkeley, California," dated July 31, 2020, subject to the limitations and qualifications contained therein.

We declare that, to the best of our professional knowledge and belief, we meet the definition of a Environmental Professional as defined by 40 C.F.R. § 312.10 of 40 C.F.R. § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. § 312.22.

International Geologic has no present or contemplated future ownership interest nor financial interest in the real estate that is the subject of this Environmental Assessment Report; International Geologic has no personal interest with respect to the subject matter of the Environmental Assessment Report or the parties involved; and International Geologic has no relationship with the Property or the owners thereof which would prevent an independent analysis of the environmental or other conditions of the Property.

Sincerely, Steve Bittman

Project Manager

Steve Bithman

EXECUTIVE SUMMARY

International Geologic has performed a Phase I Environmental Site Assessment in accordance with ASTM E 1527-13 guidelines of 1207 Tenth Street, Berkeley, California, the Property.

The historical research presented in this report has established the use of the Property since approximately 1895. Sanborn fire insurance maps, historical aerial photographs, historical topographic maps, city directories, and interviews with informed persons associated with the Property, indicate that the Property was first developed at least as early as the md-1940's with two, eight-family apartment buildings that were part of the surrounding Codornices Village Federal Housing Project. The current main structure on the Property was constructed circa-1960 and may have originally been occupied by an irrigation/sprinkler business. By 1973, the Property was owned by Mr. Richard Christian who operated Chris's Payless Plumbing from the premises until about 2000. Several alterations have been made to the original metal structure after 1970 with the smaller building on the Property constructed sometime after 1990. After 2000, the Property was occupied by a landscaping business called "Shelterbelt Builders". Since approximately 2018 the Property has also been used as a research office and as artists studios.

The following findings are based on the information in this report and are presented in terms of whether they represent an ASTM defined current Recognized Environmental Condition (REC) an Historic REC (HREC) or a Controlled REC (CREC):

- 1) No RECs or CRECs were identified for the Property.
- 2) An Historic REC (HREC) is identified for the Property based on former underground fuel storage that took place in the northwest area of the Property from 1960 to 1991 when three gasoline USTs and one diesel UST were removed.
- 3) Soil confirmation samples were not collected during the 1991 tank pull as is normally required. Subsequent soil and groundwater sampling conducted in and around the former UST area in 1993 and 2004 respectively, revealed de-minimus concentrations of residual petroleum hydrocarbons in soil and a trace concentration of toluene in groundwater.
- 4) After the Berkeley Toxics Management Division (TMD) reviewed the 1993 and 2004 soil and groundwater data, TMD subsequently stated in an April 7, 2004 letter that "Residual gasoline and diesel constituents remain in soil and groundwater at the site. The TMD is satisfied that the known potential sources of contamination have been removed and that the residual soil and groundwater contamination resulting from leaks from the former underground tank systems

represents a low to insignificant potential to impact human health or the environment. The TMD will place a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag will consist of a notice requiring building permits to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property."

- More recent uses of the Property that include a gardening and landscaping business and the current R&D and artists use do not appear likely to have impacted the subsurface or buildings of the Property.
- Based on guidance outlined in the ASTM E2600-10 Tier I Vapor Encroachment Screening criteria, International Geologic considers the potential for the presence of vapors in the subsurface of the Property caused by contaminated soil and/or groundwater to create a vapor intrusion issue into occupied building space to be low.
- Plotted and orphan sites identified in the database report are not expected to present an environmental concern to the Property because: i) they only hold an operating permit (which does not imply a problem); ii) they are not required to perform further action; iii) the nature of the identified environmental concern does not suggest that contaminants would migrate to the Property, or iv) based upon International Geologic's review, are too distant and/or hydraulically downgradient or crossgradient relative to the Property to reasonably affect it.
- The Property is located near the San Pablo Avenue corridor and therefore is considered by the City of Berkeley TMD as being located in an "Environmental Management Area" for properties along the San Pablo Avenue corridor and areas west of San Pablo Avenue. The function of this designation is to require potential buyers and developers of properties within this "Area" to complete environmental due diligence, as the historical operations—particularly industrial and manufacturing ones—within the designated Environmental Management Area may have contaminated the subsurface environment. Thus, permit applicants owning properties located in this area could encounter potential health and environmental concerns during construction involving underground excavation or dewatering. For large developments or redevelopments, a review of potential environmental impacts by the TMD, at the applicant's expense, is required. This status would not affect the Property under circumstances where it would be continue in its current use. TMD involvement would only be expected in the case of plans for deep excavations or ones that would require de-watering.

9) The Property main building was constructed in 1960, which pre-dates 1990 Federal regulations prohibiting the use of asbestos-containing materials (ACMs) in buildings; therefore it is possible that building materials contain ACMs. While regulations were passed in the late 1970's prohibiting the manufacturing of ACMs, pre-produced ACMs were permitted to be used until approximately 1990. International Geologic did not note any suspect ACMs during the walk through, and was not supplied with documentation for any asbestos O&M Plans, asbestos surveys, and/or asbestos abatement records. No suspect ACMs were noted during the walk through, and the existing building materials appeared to be in very good condition.

In the professional opinion of International Geologic, an appropriate level of inquiry has been made into the current and previous uses of the Property consistent with good commercial and customary practice in an effort to minimize liability.

RECOMMENDATIONS

International Geologic has performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM Practice E 1527-13, of 1207 Tenth Street in Berkeley, California. There are no exceptions to, or deletions from, this practice described in this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property with the exception of an Historic REC associated with former fuel USTs in the northwest portion of the Property.

It is the understanding of International Geologic that the redevelopment plan for the Property is to involve removal of existing structures and pavement prior to construction of a new 3-story, 18,450 ft² mixed-use artist center housing artist studio spaces, a fabrication shop, an R&D space (product design and prototyping), a private art gallery, and two live/work units. At ground level, a 5,500 ft² private parking garage with 12 parking spaces and 14 bicycle hanging racks is to be built across the northern half of the site, creating a podium. The art center sits above and to the side of the parking podium.

Based on the available information and on the proposed redevelopment scenario, International Geologic identifies low potential vapor intrusion potential associated with the Property. Accordingly, International Geologic recommends no further investigation regarding the environmental condition of the Property.

The TMD stated in their April 2004 closure letter that the Property address will be "flagged" in the city of Berkeley building department permit system, so that any planned digging, excavation or de-watering activities that may expose workers to soil and/or groundwater would require a mitigation plan. This is also consistent with the Property being located in an "Environmental Management Area" for properties along the San Pablo Avenue corridor and areas west of San Pablo Avenue.

Based on the above, the following recommendations are presented;

- A Soil and Groundwater Management Plan (SGMP) should be developed to provide guidance should unexpected soil and/or groundwater impacts be encountered during the demolition and earthwork phase of the Property redevelopment. Although groundwater would not be expected to be encountered at this Property based on the on-grade and podium style construction that is planned, the SGMP would not only contain procedures and protocols for handing contaminated soil, but should groundwater be encountered, the plan would also contain contingencies for groundwater management as well. The SGMP would be submitted to City TMD and the Planning Department, and the document would be available on the job site during the demolition and earth working phases of construction.
- 2) Based on the original 1960 construction date of the main Property building, a demolition asbestos survey should be conducted by a qualified AHERA professional prior to demolition of the existing structures on the Property.

This report should be provided to potential property buyers, in accordance with real estate disclosure requirements.

We declare that, to the best of our professional knowledge and belief, we meet the definition of a Environmental Professional as defined by 40 C.F.R. § 312.10 of 40 C.F.R. § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. § 312.22.

Summary Report

Phase I Environmental Assessment at 1207 Tenth Street Berkeley, California

1.0 INTRODUCTION

International Geologic conducted a Phase I Environmental Assessment of 12207 Tenth Street, Berkeley, Alameda County, California (Property) for Mr. Johnathan Bachrach of Berkeley, California (User). The assessment evaluated the conditions of the Property with respect to historical use, current activities, and for site materials which may be subject to environmental regulations, and to identify potential sources of contamination onsite and within a one-mile radius. The purpose of the Phase I Assessment process is to provide for the innocent landowner defense to CERCLA liability. It is our understanding the Property is being evaluated for redevelopment and that due diligence in the form of environmental baseline documentation is required.

Customary practice in the Phase I assessment process identifies *recognized environmental conditions* (RECs), as defined by ASTM, associated with the Property. The newly revised (as of November 2013) definition of a REC is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to release to the environment; under conditions indicative of a release to the environment or under conditions that pose a material threat of future release. De minimis conditions are not recognized environmental conditions." "De minimis" conditions generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The newly revised standard ASTM E1527-13, although essentially congruent to the former 2005ASTM E1527-05 Phase I Environmental Assessment Standard, provides some clarifications and additional guidance for the environmental assessment of commercial properties and determining whether or not there are recognized environmental conditions at a property or conditions indicative of releases or threatened releases of hazardous substances at a property. This report also evaluates for the presence of *Controlled RECs and Historic RECs* which could be the source of future cleanup expenditures that may not cause an immediate threat to human health or the environment.

In addition to ASTM E1527-13 guidance, this assessment incorporates guidance and methodologies outlined in the ASTM E2600-10 Tier I Vapor Encroachment Screening criteria to determine if vapor migration/intrusion risk is identified for the Property (that is, the presence or likely presence of contaminant of concern vapors in the subsurface of the Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Property).

Scope of Work

This Phase I assessment was performed as outlined in the following document: American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13. The scope of work for this Phase I ESA therefore generally included: a records review; a site reconnaissance; evaluation of the site physical setting; interviews with personnel familiar with the Property as well as local governmental officials and preparation of this report. The conclusions presented in this report are professional opinions based on data described herein. These opinions are subject to the limitations described on page 23. The scope of the Phase I ESA, performed by International Geologic, did not include any deletions to, or deviations from the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-13.

We were not contracted to, nor did we, perform "non-scope considerations" delineated in the ASTM standard—including such tasks as evaluating the presence of or sampling for asbestos containing building materials, lead-based paint, or lead in drinking water; regulatory compliance; evaluating ecological resources and risks to wetlands, cultural/historical, and endangered species; industrial hygiene; health and safety; indoor air quality; and high-voltage power line assessments. However, when available, information available on these items is included in the body of the report.

2.0 PROPERTY DESCRIPTION

General Location

The Property is located at 1207 Tenth Street in Berkeley, California between Gilman Street to the south and Harrison Street to the north with Tenth Street adjoining to the west, The immediate surrounding area is comprised of a mixture of light industrial and commercial property. Major thoroughfares in the area include Gilman Street to the south, San Pablo Avenue one block to the east and Interstate 80 located about 3,000 feet to the west of the Property. There is no large scale heavy industry or agriculture in the vicinity. A Site Vicinity Map depicting the geographic location of the Property is shown in Figure 1.

Assessor's and Property Ownership Information

The Property is depicted by the Alameda County Assessor in its book 60, "Map of I.M. Wentworth Boot and Shoe Company's Tract", and is legally described by its Assessor's Parcel Number 60-2354-15-3. Copies of the Assessor's parcel map is in Attachment 2.

Configuration

The rectangular shaped Property measures approximately 12,800 ft² in area, is relatively level and contains two structures. The larger of the two structures is located in the southwest quadrant of the Property and contains five work spaces totaling 3,473 ft². The second building is located on the north side of the Property with 1,047 ft² of space divided over three work spaces. An enclosed 5,000 ft² asphalt paved yard is situated on the eastern half of the Property. Access to the Property is from 10th Street. The Property is served by the local public water and sewer districts. The layout of the Property is shown in Figure 2 and a floor plan depicting the Property is included in Attachment 2.

3.0 PHYSICAL SETTING

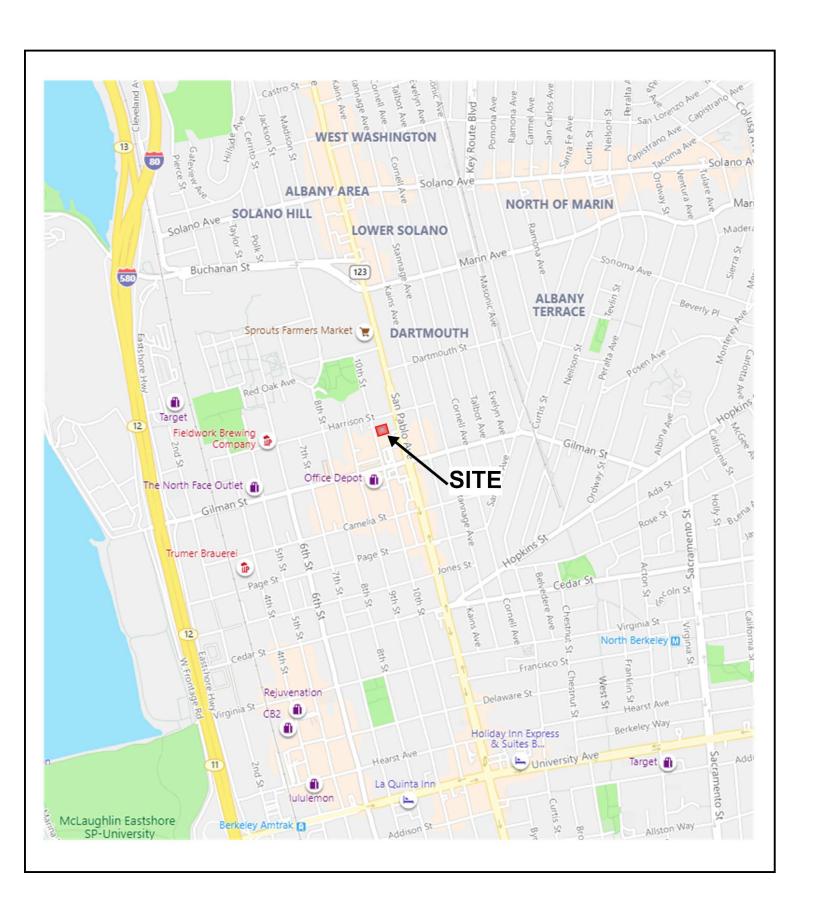

Geographic Location

According to Google Earth, the Property is located at 37.8816° North and -122.2970° West (WGS84). The Property lies on a gently southwest-sloping plain approximately 0.75 miles east from the San Francisco Bay, with the elevation at the Property at approximately 44 feet above mean sea level. Cordonices Creek is the closest water body to the Property and is located about 570 feet to the north. The Cordonices Creek watershed originates from the Berkeley hills about 2 miles to the northeast and discharges to the San Francisco Bay near the Golden Gate Fields horse track. According to the Fema Flood Panel Map 06001C0056G, the Property is located outside the limit of the 100-year flood zone.

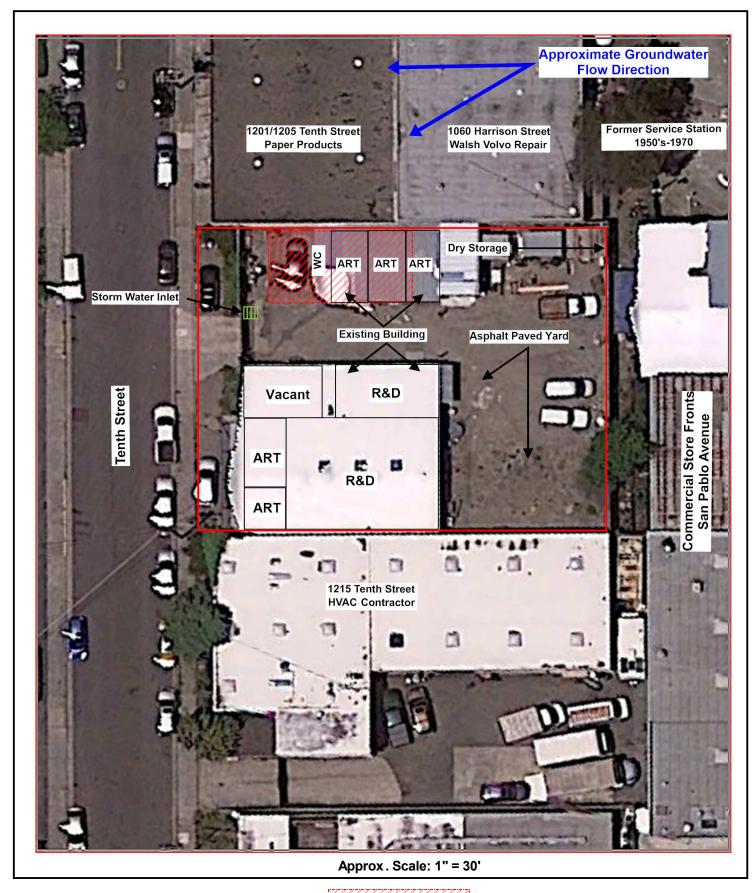

Geology

Surficial and near surface soils in the area of the Property are described as Urban Land (Ur). Artificial fill, buildings, pavement, and sidewalks cover almost all of the surface. Native stratigraphy beneath the Property is derived from erosion of Franciscan rocks; typical clastic material such as clays, silts, sand and gravel are expected at the Property, much of which is alluvium derived from the Berkeley Hills to the northeast. These sediment types are suggestive of channel deposits, a common depositional facies in this area.

The Alquist-Priolo Earthquake Fault Zoning Act was passed in 1972 to mitigate the hazard of surface faulting to structures for human occupancy. This act prohibits the location of structures designed for human occupancy across active faults and regulates construction within fault zones. The Property is not located within an Alquist-Priolo Earthquake Fault Zone and no known active faults traverse the Property. The closest active fault near the Property is the Hayward Fault about 2 miles to the east-northeast.

Approximate Location Four Fuel USTs 1960-1991

INTERNATIONAL GEOLOGIC Job # 4006-1

1207 Tenth Street Berkeley, California

Hydrogeology

Based on local geology and topography, the direction of groundwater flow beneath the Property and surrounding area would be expected to be approximately to the west/southwest towards San Francisco Bay. Based on our experience in the area of the Property, the depth to first encountered groundwater would be expected to be approximately 15-20 feet below the ground surface (bgs). Note that local groundwater depth and gradient under the Property may be influenced naturally by tides, zones of higher or lower permeability, or artificially by below street utilities, nearby pumping or recharge, and may deviate from the regional trend. Groundwater beneath the area of the Property is reportedly not used for municipal water supply or farm irrigation.

4.0 PAST AND PRESENT PROPERTY USAGE

Sanborn Fire Insurance Maps

Fire insurance maps (see Appendix 1) that include the Property and adjoining properties were requested from Environmental Data Resources (EDR®). Sanborn Maps depicting the Property revealed the following historical Property usage information:

1902/1911: The Property and adjoining sites to the south, west and north are shown as vacant with residential sites depicted to the east that front on San Pablo Avenue.

1950: The Property contains two, eight-family apartment buildings that were part of the surrounding Codornices Village federal housing project. Surrounding sites to the south, west and north contain similar multi-unit residential buildings. The adjoining sites to the east fronting on San Pablo Avenue are residential or vacant.

1970: The 1970 Sanborn map provided does not depict Property improvements.

1980: The Property is depicted to contain a structure in the southwest quadrant of the lot. The building has framed partitions, a concrete floor and is labeled "Plumbing". The remainder of the Property is shown as vacant. The site to the south at 1215 Tenth Street is shown as a garden supplies warehouse, with the adjoining sites to the north shown to be concrete block structures at 1201-1205 Tenth Street and 1060 Harrison Street. Commercial development is depicted to the east fronting on San Pablo Avenue.

Aerial Photo Review

Aerial photographs (see Appendix 1) that include the Property and adjoining properties were obtained from EDR[®], and revealed the following historical Property usage information:

• 1939; Scale: 1" = 500'

The Property is vacant, undeveloped land as are adjoining sites to the south, west and north. The area of the San Pablo Avenue corridor and sites further to the east are fully built out, primarily as residential property. The Cordonices Creek drainage is clearly visible to the north.

• 1946; Scale: 1" = 500'

The Property is located amid the Cordonices/University Village housing project which consisted of multi-family dwellings that are visible to the south, west and north. Sites that appear residential in nature are visible to the east fronting on San Pablo Avenue.

• 1958; Scale: 1" = 500'

The Property and adjoining sites to the south, west and north are vacant. Sites that appear residential in nature are visible to the east fronting on San Pablo Avenue.

• 1963; Scale: 1" = 300'

A structure is visible in the southwest quadrant of the Property. The remainder of the Property appears to be used as a paved yard or for parking. The sites at 1215 Tenth and 1201-1205 Tenth Street that adjoin the Property to the south and north respectively appear to contain the present day improvements. The area directly across Tenth Street is undeveloped, with warehouse structures visible to the north and south. Sites adjoining to the east along the San Pablo Avenue corridor appear commercial in nature with the site at the southwest corner of San Pablo at Hrrison Street appearing to be a service station.

• 1968; Scale: 1" = 300'

The same structure visible in the southwest quadrant of the Property in the 1963 aerial photo is visible in the 1968 photo. Outdoor storage appears to be occurring on the east side of the building, otherwise the remainder of the Property appears to be a paved yard or used for parking. The present day building at 1060 Harrison Street which adjoins the northeast portion of the Property is visible. A service station at the southwest corner of Harrison Street at San Pablo Avenue is visible. Sites to the west appears generally as today.

• 1974/1982; Scale: 1" = 500'

The Property layout appears similar to the 1968 aerial photo. The east side of the building is used for outdoor storage. A dump truck and backhoe are visible in the northeast corner of the Property in the 1974 aerial photograph. Cars are parked along the northern side. The service station site at the corner of Harrison Street and San Pablo Avenue is being redeveloped.

• 1993/1998; Scale: 1'' = 500'

Along with the building in the southwest corner of the Property, a small structure appears have been added to the north side of the yard. Otherwise, the Property appears similar to the 1982 aerial photograph. Adjoining sites appear similar to today.

• 2005-2016; Scale: 1" = 500'

The Property and surrounding area appear generally similar to today.

Topographic Maps

Topographic maps published by the United States Geological Survey (USGS) covering the Property and adjoining properties were obtained from EDR[®], and revealed the following Property and surrounding area information:

- 1895 15-Minute San Francisco, California Quadrangle Topographic Map; Scale: 1:62,500 The area of the Property is depicted as a semi-urban developed area, with the area west of the Property shown to contain an urban street grid.
- 1899 15-Minute San Francisco, California Quadrangle Topographic Map; Scale: 1:62,500 The area of the Property is depicted as a semi-urban developed area, with the area west of the Property shown to contain an urban street grid.
- 1915 15-Minute San Francisco, California Quadrangle Topographic Map; Scale: 1:62,500 Berkeley is depicted as a semi-urban developed area, with the area of the Property shown to be within an urban street grid.
- 1947 15-Minute San Francisco, California Quadrangle Topographic Map; Scale: 1:62,500 The area of the Property and its surroundings are shaded in pink indicating urban development.
- 1948 7.5-Minute Richmond, California Quadrangle Topographic Map; Scale: 1:24,000

 The area of Berkeley including the Property is shaded in pink indicating urban development, with the present day street network in place. No specific development is depicted in the area of the Property.

- 1949 7.5-Minute Richmond, California Quadrangle Topographic Map; Scale: 1:24,000

 The area of Berkeley including the Property is shaded in pink indicating urban development, with the present day street network in place. No specific development is depicted in the area of the Property.
- 1959 7.5-Minute Richmond, California Quadrangle Topographic Map; Scale: 1:24,000

 The area of Berkeley including the Property is shaded in pink indicating urban development, with the present day street network in place. No specific development is depicted in the area of the Property.
- 1968-1980 (Photorevised from 1959) 7.5 Minute Richmond, California Quadrangle Topographic Map; Scale: 1:24,000

 The Property and surrounding area are depicted generally as in the 1959 topographic map.
- 1996 7.5 Minute Richmond, California Quadrangle Topographic Map; Scale: 1:24,000 The Property and surrounding area are shaded in grey indicating urban development.
- 2012 7.5 Minute Richmond, California Quadrangle Topographic Map; Scale: 1:24,000 No development detail is shown.

Interviews/Questionnaires

Mr. Johnathan Bachrach, the Property owner representative, was interviewed on July 8, 2020. Mr. Bachrach stated that he has been associated with the Property since 2018, and has conducted his electronics related start-up business on the Property since that time. Mr. Bachrach provided a general overview of the Property and gave information reflecting uses and conditions of the Property. An ASTM E-1527-13 compliant Property information questionnaire completed by Mr. Bachrach revealed that the main Property building was constructed circa 1960 and was used by a plumbing supply business and a landscape contractor prior to his ownership. According to Mr. Bachrach, the recent superficial remodeling of the Property structures were conducted during his ownership and the work spaces created have been used as artists studios. The completed questionnaire is included in Appendix 2.

City Directory Review

Records of Criss-Cross and telephone directories that include the Property address of 1207 Tenth Street, and for the surrounding area were requested from EDR[®]. The following records were available for the period between 1920 and 2017.

Table 1
1207 Tenth Street, Berkeley, California
City Directory Summary

| Date | Address | Notes | |
|------|-------------------|--|--|
| 1962 | 1207 Tenth Street | Christner Plumbing Co. | |
| 1975 | 1207 Tenth Street | Pay Less Plumbing and Heating/Trenching & Excavating | |
| 1986 | 1207 Tenth Street | Chris's Pay Less Plumbing and Heating | |
| 1991 | 1207 Tenth Street | Pay Less Plumbing and Heating/Trenching & Excavating | |
| 1994 | 1207 Tenth Street | Chris's Pay Less Plumbing | |
| 1996 | 1207 Tenth Street | Chris's Pay Less Plumbing | |
| 1999 | 1207 Tenth Street | Chris's Pay Less Plumbing | |
| 2004 | 1207 Tenth Street | Payless Plumbing | |
| 2009 | 1207 Tenth Street | Shelterbelt Builders, Inc. | |
| 2014 | 1207 Tenth Street | Shelterbelt Builders, Inc. | |
| 2017 | 1207 Tenth Street | Shelterbelt Builders, Inc. | |

Historical Use Summary

The historical research presented in this report has established the use of the Property since approximately 1895. Sanborn fire insurance maps, historical aerial photographs, historical topographic maps, city directories, and interviews with informed persons associated with the Property, indicate that the Property was first developed at least as early as the md-1940's with two, eight-family apartment buildings that were part of the surrounding Codornices Village Federal Housing Project. The current main structure on the Property was constructed circa 1960 and may have originally been occupied by an irrigation/sprinkler business. By 1973, the Property was owned by Mr. Richard Christian who operated Chris's Payless Plumbing from the premises until about 2000. Several alterations have been made to the original metal structure after 1970 with the smaller building on the Property constructed sometime after 1990. After 2000, the Property was occupied by a landscaping business called "Shelterbelt Builders". Since approximately 2018 the Property has also been used as a research office and as artists studios.

Past and Present Adjacent Site Usage

The following information regarding adjacent site usage was obtained from historic aerial photographs, historic topographic maps, city directories and visual observation. Adjacent sites to the Property were vacant or residential during the early part of the 1900's. By circa 1940's, the surrounding area to the north,

south and west contained numerous, multiple family dwellings that were part of the Codornices Village federal housing project, while the area to the east contained a mix of commercial and residential structures fronting on San Pablo Avenue. The southwest corner of San Pablo Avenue and Harrison (1200 san Pablo avenue) was occupied by a service station between about 1960 and the early 1970's. By the early 1970's adjoining and surrounding sites contained an electronics warehouse and machine shop (1201-1203 Tenth Street), a stone works (1215 Tenth Street), with the former service station at 1200 San Pablo Avenue redeveloped into a restaurant by the mid-1970's. Currently, 1201-1203 Tenth Street is an ornamental paper warehouse and 1215 Tenth Street is occupied by a heating and air conditioning contractor. The adjoining area to the east is a parking lot for Walsh Brothers Volvo Repair at 1060 Harrison Street. Figure 3 depicts the Property and surrounding area sites.

5.0 PROPERTY WALK OVER

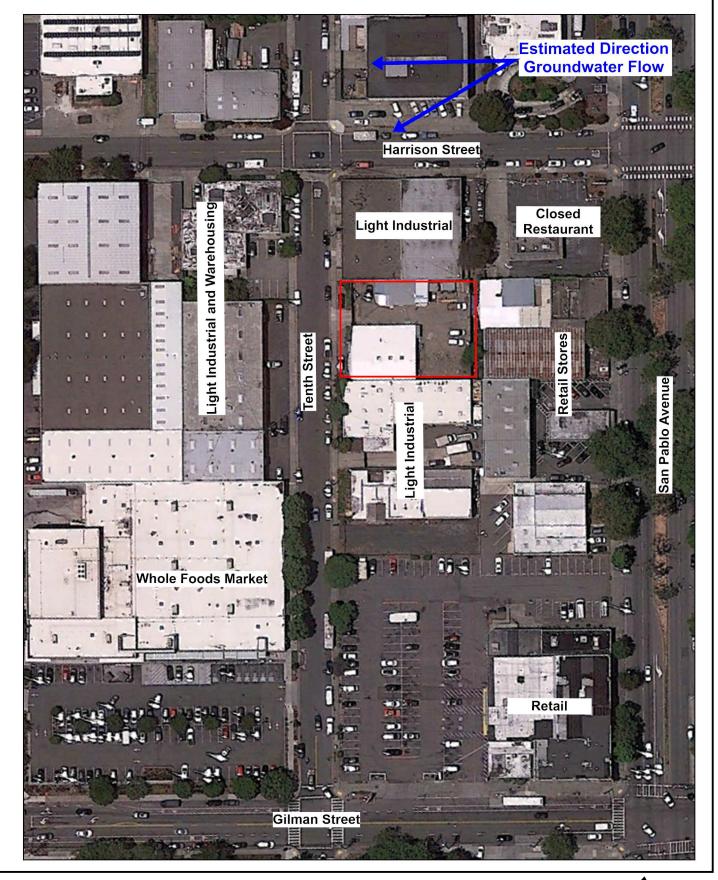

A walk through of the Property was performed by Steve Bittman of International Geologic on July 8, 2020 to observe for the presence of hazardous materials, note activities, materials, conditions or practices which are subject to environmental regulations, and to assess the potential for other environmental concerns. Photographs depicting selected features noted during the walk over are shown in Appendix 4.

General Observations

At the time of the walk through the entire Property was available for inspection. The six artist spaces contained furnishings, equipment and materials that would be expected for such use. No storage, use or generation of hazardous materials was observed in these spaces. The concrete slab-on-grade floor in the main building was generally in fair to good condition with some cracking in places. In general, building materials in the Property space appeared to be in good condition. No unusual staining or odors were noticed inside the ground floor areas of the space. The asphalt surface of the yard area appeared in good condition. Some wood storage was observed in the northeast corner of the yard, otherwise the yard was vacant. The landscaped area that is planted along the west side of the Property building and outside of the Property itself appeared healthy and well cared for. No sign of a release of hazardous substances was noted in the area of the roll-up door that provides access to the Property from Ninth Street.

Underground Storage Tanks (USTs)

The Property yard area and Property buildings were inspected for indications of USTs (*e.g.*, vent piping, dispensing equipment, surface variations). Physical evidence of current USTs was not observed during the assessment. In addition, no features were observed at the Property that would require USTs to be present. Furthermore, there are no USTs currently registered for the Property with the State of California (EDR®, 2020). Three historic fuel USTs are known to have existed at he Property. All USTs were reportedly removed from the Property in 1991. Details of UST use at the Property and subsequent associated environmental work is summarized in Section 7 of this report.

Approximate Scale: 1" = 100'

INTERNATIONAL GEOLOGIC Job # 4006-1

1207 Tenth Street Berkeley, California

Above Ground Storage Tanks (ASTs)

No ASTs were observed on the Property and no ASTs are registered for the Property with the State of California (EDR®, 2020). No records regarding ASTs for the Property were found as part of the local records research at the City of Berkeley.

Hazardous Material Storage

The Property was inspected for indications (e.g., drums, staining, stressed vegetation) of current or historic use, storage, or disposal of hazardous substances and petroleum products. No physical evidence suggesting the current storage of hazardous materials was noted on the Property. Historic storage of hazardous materials occurred at the Property based on the fuel USTs removed in 1991 (Section 7).

Solid Waste Disposal

The Property was inspected for indications of solid waste storage or disposal. Other than typical paper based waste, no solid waste is currently generated on the Property. Areas that are apparently filled or graded by non-natural causes, filled by material of unknown origin suggesting trash or other solid waste disposal, or mounds or depressions suggesting trash or other disposal, were not observed.

PCB's/Hydraulic Equipment/Electrical Power

The Property was inspected for indications of potential PCB sources, such as liquid-cooled electrical units (*e.g.*, transformers, capacitors), and major sources of hydraulic fluid (*e.g.*, elevators, lifts). No elevators or hydraulic equipment was observed. Power is delivered to the Property building via pole-mounted high voltage equipment owned and maintained by PG&E.

Asbestos Containing Materials/Lead Paint/Pipes

The main Property building was constructed circa 1960, with renovations completed post-dating 1990 Federal regulations prohibiting the use of asbestos-containing materials (ACMs) in buildings. Although recent renovations may have removed ACMs if they existed, it is possible that building materials may still contain ACMs. While regulations were passed in the late 1970's prohibiting the manufacturing of ACMs, pre-produced ACMs were permitted to be used until approximately 1990. International Geologic did not note any suspect ACMs during the walk through, and was not supplied with documentation for any asbestos O&M Plans, asbestos surveys, and/or asbestos abatement records. Based on the age of the Property buildings, it is possible that painted surfaces, particularly underlying ones contain lead. International Geologic was not supplied with documentation of paint removal from the Property. No loose or peeling paint was noted during the site visit. Lead-based paint is not considered a REC, and is unregulated in commercial buildings. Based on the age of the building, it is unlikely that pipes supplying drinking water contain lead.

Wells

The Property was inspected for indications of wells (*e.g.*, dry, irrigation, injection, monitor, abandoned). No wells were observed on the Property during this assessment.

Discharge Sources

The Property was inspected for indications of discharge sources (*e.g.*, sumps, drains, clarifiers). No below floor sumps or drains were noted except for one storm-water drain located in the west side of the Property. Conventional sink discharge source is present at the Property is associated with sanitary sewer services. Roof discharge of rain water is directed to down spouts which drain to the ground surface that ultimately conveys water to the local municipal storm sewers on Tenth Street.

6.0 NATURAL HAZARDS

Seismic

Based on available geologic literature, no active fault traces traverse the Property or surrounding areas. The nearest "active" fault to the Property is the Hayward Fault located about 2 miles to the east-northeast. The Property is not located within an Alquist-Priolo Special Study Zone for fault rupture hazard according to USGS. However, based on the Property location on unconsolidated fill and weak sediments, seismic shaking due to regional fault movement would be intensified.

Radon

Outgassing of radon has not been identified as a problem in the City of Berkeley in the area of the Property. International Geologic reviewed the *California Statewide Radon Survey – Interim Results* developed by the California Department of Health Services (DHS) in the early 1990s. This document shows Alameda County is in Radon Region 4 where 3.6 % of the homes are predicted to have radon concentrations above 4.0 picoCuries per liter (pCi/L). The level above which the U.S. EPA recommends action be taken to reduce radon gas levels is 4.0 pCi/L. No direct radon measurements were taken at the Property for this assessment.

Ecological Areas

Sensitive ecological areas include wetlands rivers or creeks, marsh areas, and land dedicated for open space. No federally protected wetlands exist in the area near the Property.

Flooding

(FEMA) Federal Emergency Management Agency) producees flood insurance maps for the Property area. The Property is located outside the limit of the 100-year flood zone. The Property is considered to have low flood potential.

7.0 PROPERTY ENVIRONMENTAL WORK

A Transaction Screen (Standard E-1528-Standard Practice for Environmental Site Assessments: Transaction Screen Process, 2000) of the Property was conducted by International Geologic in March 2004. An executive summary of that report is included in Appendix 5.

Berkeley Fire Department Records

As part of the 2004 Transaction Screen, a review of Property records kept by the Berkeley Fire Department was conducted. Records dating to 1960 documented the installation of a 550-gallon underground gasoline tank located 10 feet from the north Property line and 15 feet from Tenth Street. The file also contained tank tightness testing reports from 1987 and 1989 indicating the tank system, that by then included three gasoline tanks and one diesel tank, passed tightness testing both years.

UST Area Sampling History

The following chronologic description of past environmental work conducted at the Property associated with the former fuel USTs was included in the Transaction Screen report:

December 1991: Property owner Richard Christian removes four underground fuel storage tanks from beneath the Property: one 550-gallon gasoline, one 2,500-gallon regular gasoline, one 2,500-gallon unleaded gasoline, and one 2,000 gallon diesel fuel UST. The dispenser(s) and related product lines were removed at the same time. The tanks were located in the northwest portion of the yard area, and were reportedly in good condition with no visible holes, and the excavation appeared clean. The excavation was backfilled with soils generated from the tank removal and unspecified imported fill, then resurfaced with asphalt. No soil samples were collected during the tank removal, and no inspection was made by the City of Berkeley Toxics Management Division (TMD) or the Berkeley Fire Department.

January 1993: TMC Environmental Inc. of San Pablo, California (TMC) supervised the drilling of seven soil borings around the perimeter of the former tank locations. The total drilled depth of the borings ranged from 6 to 14 feet below the ground surface (bgs). Up to 280 parts per million (ppm) gasoline range hydrocarbons was detected in a sample collected from a depth of 9.5-10 feet bgs in boring B-3 and up to 15 ppm total xylenes were detected in the same sample. Soil samples collected from the other 6 borings contained much lower to non-detectable concentrations of gasoline range hydrocarbons. Up to 24 ppm diesel range hydrocarbons was detected from boring B-4 at a depth of 9.5-10 feet bgs. No groundwater samples were collected during this phase of work. TMC recommended additional subsurface investigation to further delineate the extent of the contamination.

March 1993: The TMD requests a work plan for a groundwater investigation to be conducted at the Property.

April 1993: TMC prepares a generalized work plan detailing work needed to install one groundwater monitoring well in a proposed location approximately 10 feet to the west of the former tank locations.

May 1993: The TMD requests a work plan that is signed by a certified or registered professional.

June 1993: TMC submits another work plan for the well installation, this one signed by a registered professional

August 1993: An application for well construction is completed by TMC and Property owner Mr. Christian. The permit was either not submitted or not approved.

March 1999: Stellar Environmental Solutions of Berkeley, California (SES) submits a work plan to the TMD detailing proposed work at the Property to drill four soil borings in the vicinity of the former tank locations. Two of the borings were proposed to extend deep enough to encounter groundwater for sample collection. An additional boring was proposed to be located at the northeast corner to evaluate possible impacts from offsite sources. A permit for the work was completed by SES, and subsequently approved by the TMD on March 19, 1999. No record was found that the proposed work by SES was conducted.

2004 Limited Subsurface Investigation

At the request of the 2004 Property owner (Eramsy), a limited subsurface investigation was conducted in 2004 concurrently with the International Geologic Transaction Screen of the Property for the specific purpose of collecting groundwater samples to evaluate the groundwater conditions beneath the Property in the area of the former UST locations. A permit was obtained from the TMD approving two borings on the Property for groundwater collection. Boring B1 was located approximately 10 feet to the west of the westward limit of the UST excavation area, and boring B2 was located within the former UST excavation area. The borings were advanced with a direct push drilling rig with the total depths being 18 feet bgs for boring B1 and 15 feet bgs for boring B2. Temporary pvc well casing was installed in each boring to allow groundwater sample collection using a pcv bailer. No soil samples were collected.

Groundwater samples were collected from the temporary wells and delivered under chain-of-custody protocol to McCampbell Analytical Inc. of Pacheco, California. The groundwater samples were analyzed for Total Petroleum Hydrocarbons as gasoline (TPHg), benzene, toluene, ethylbenzene and total xylenes (BTEX) and MTBE and for Total Petroleum Hydrocarbons as diesel (TPHd). After groundwater sample collection, the pvc casings were removed, and both borings were backfilled to the surface with neat cement. 2004 Analytical results for the groundwater samples are summarized in Table 1 below:

Table 2
Analytical Results For 2004 Groundwater Samples
1207 Tenth Street, Berkeley, California
Results in μg/l

| . 5 | | |
|----------------------|-------|-------|
| | B1 | B2 |

| Total Xylenes | < 0.5 | < 0.5 |
| MTBE | <0.5 | <0.5 |
| TPHd | 150 | 270 |

Regulatory Response

The TMD subsequently reviewed the Transaction Screen and groundwater sampling data as presented by International Geologic in March 2004. The TMD subsequently stated:

"Residual gasoline and diesel constituents remain in soil and groundwater at the site. The TMD is satisfied that the known potential sources of contamination have been removed and that the residual soil and groundwater contamination resulting from leaks from the former underground tank systems represents a low to insignificant potential to impact human health or the environment. The TMD will place a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag will consist of a notice requiring building permits to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property."

A copy of the TMD letter dated April 7, 2004 is included in Appendix 5.

8.0 RECORDS REVIEW

Database Report

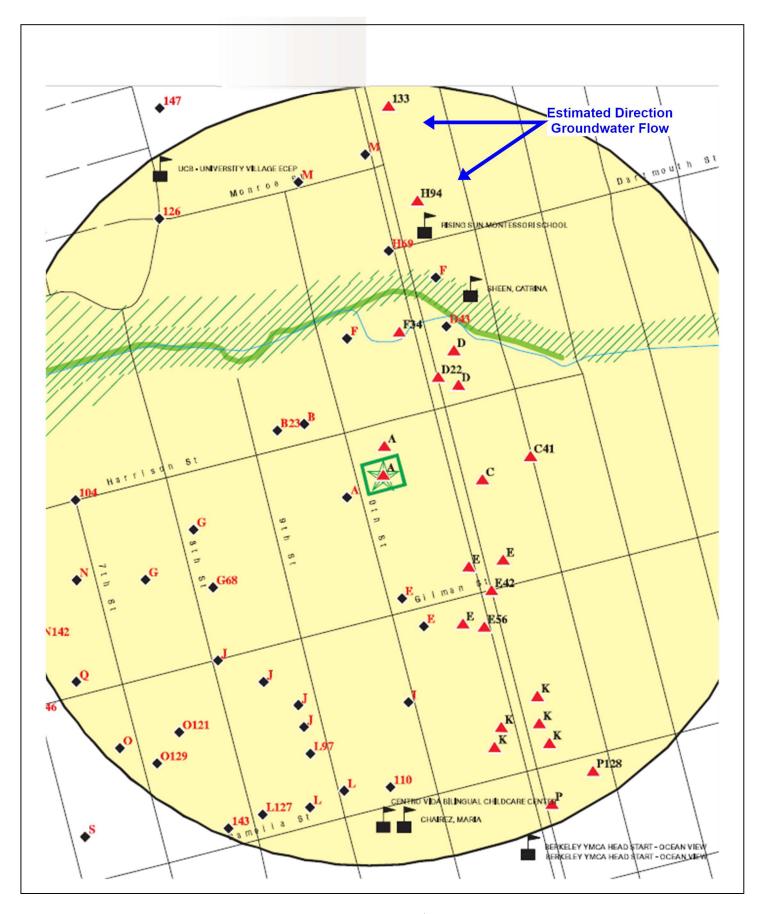

Environmental records were reviewed to determine whether releases of hazardous materials or petroleum product have been detected on-site, and to identify potential sources of contamination within an ASTM specified one-mile radius. International Geologic obtained an environmental database search report compiled by EDR® for the database information. The Property address 1207 Tenth Street, Berkeley, California used for the database records search location was accurately plotted on a map for use as the central point for the record data search radius. The EDR® report is included in Appendix 3.

In accordance with ASTM, the following standard environmental record sources were reviewed for sites within the ASTM-recommended minimum search distances. As allowed under the ASTM standard, generally only bordering or upgradient sites with releases were reviewed, as downgradient and crossgradient sites have low potential to adversely impact the Property. For purposes of identifying and evaluating RECs, the database findings can be categorized into the following categories:

- 1) Reported releases of hazardous materials and documented environmental contamination. These include sites listed as Federal NPL, RCRA TSD, and State Superfund Reported Releases.
- 2) Registered users of hazardous materials, including USTs, and generators of hazardous waste and petroleum releases including currently operational facilities; those listed in the commercially available database as large quantity users/generators; and/or those that showed evidence of improper chemical storage practices in our vicinity reconnaissance.
- 3) Other potential sources of environmental contamination (e.g., landfills). Federal CERCLIS, State Landfills, and Non-Petroleum Contamination Sites.

The following characteristics of the database report should be considered when evaluating the findings:

- Sites are listed as having a release of hazardous materials without regard to the magnitude or extent of contamination; hence, the contamination may be wholly confined to that site with no potential to impact offsite areas.
- Data can be outdated, and a site could be fully remediated, yet still be listed as having a reported release of hazardous materials, without reference to a "no further action" case status that may have been issued by the lead agency (the date of each database update is given at the end of the regulatory database report).

INTERNATIONAL GEOLOGIC Job # 4006-1
1207 Tenth Street
Berkeley, California

Regulatory Agency Listed Sites Within 1/3-Mile Radius

- Sites may be documented on multiple databases (i.e., a given site may be on LUST, CORTESE, RCRA, and UST); thus, the cumulative totals cited herein and in the database report are higher than the individual number of sites. The difference between the cumulative number of sites and the individual number of sites is a measure of the number of sites listed in multiple databases. An individual site may be listed more than once in a database category if the site name or address is different.
- Several of the database categories (e.g., RCRIS, HAZNET, and UST) list sites that use or store hazardous materials or generate hazardous waste, and do not necessarily have documented environmental contamination.
- Some sites (referred to in the database report as "orphans") are not shown on the radius maps due to incomplete address information.
- Sites are listed as "equal/higher elevation" or "lower elevation" relative to the Property. This is often not equivalent to hydraulically upgradient or downgradient (i.e., location relative to groundwater flow direction).

Envirostor Database

The DTSC's Site Mitigation and Brownfields Reuse Program's (SMBRPs) ENVIROSTOR database identifies sites that have known contamination or sites for which there may be reason for further investigation. The database includes the following site types: Federal Superfund sites NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. Envirostor provides similar information to the information that was formerly available in the CalSites database, and provides additional site information, including, but not limited to: identification of formerly contaminated properties that have been released for reuse, properties where environmental deed

restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. The Property and selected surrounding sites were researched on the Envirostor Database http://www.envirostor.dtsc.ca.gov/public/.

GeoTracker Database

GeoTracker is the State Water Resources Control Board's geographic information system, providing online access to environmental data and is the interface to the Geographic Environmental Information Management System, a data warehouse that tracks regulatory data about fuel USTs, fuel pipelines, and public drinking water supplies. The Property and selected surrounding sites were researched on the GeolTracker Database http://geotracker.swrcb.ca.gov/.

Alameda County Department of Environmental Health

The ACDEH is the Certified Unified Program Agency (CUPA) for sites in Alameda County and is the administrative agency that coordinates and enforces numerous local, state, and federal hazardous materials management and environmental protection programs in the county. The Property and selected sites were researched on the ACDEH Local Oversight Program database.

http://gis.acgov.org/DEH/InspectionResults/?SITE=LOP.

City of Berkeley Toxics Management Division (TMD)

A request for file review was submitted to the TMD for the Property on July 7, 2020. BTMD is the City agency that oversees the hazardous materials regulatory environment in Berkeley and provides a single point of contact for businesses to address inspection, permitting, billing, and enforcement issues.

Database Listing Summary

The State GeoTracker and DTSC Envirostor databases do not include the Property. The Property is not listed by EDR[®] as a site that currently handles, stores or generates hazardous materials or solid or liquid hazardous waste. The Property is listed by EDR[®] as a former leaking underground fuel tank site and as a site formerly used to store garden supplies considered to be hazardous. Based on these former uses, the Property appears on the following databases listed by EDR[®].

- Shelterbelt Builders, Inc., 1207 Tenth Street, Berkeley, CA (EDR® listings A1 and A3). Shelterbelt Builders appears in the CA HWTS, FINDS and ECHO databases. The CA HWTS and ECHO databases are maintained by the State of California Department of Toxic Substances Control and EPA and are used to track hazardous waste Identification (ID) numbers and manifest information. HWTS generates reports on hazardous waste shipments for generators, transporters, and TSDFs. The FINDS database tracks the notification, permits and compliance for facilities that treat, store, or dispose hazardous waste as required by RCRA. No violations were noted in the listings, and according to Property owner Johnathan Bachrach, Shelterbelt Builders used commonly available garden chemicals in the course of their day to day garden maintenance business, and that Shelterbelt practiced good handling practices with regard to the chemicals stored.
- Chris's Payless Plumbing, 1207 Tenth Street, Berkeley, CA (EDR® listings A2, A4, A5, A6, A8). The Property appears in the CA CERS, CA LUST, CA RGA LUST, CA Cortese and FINDS databases that identify the Property as a former leaking UST site overseen by the City of Berkeley. The status for these listings is "Completed- Case Closed" with a "No Further Action" letter.

• Shelterbelt Builders, Inc., 1207 Tenth Street, Berkeley, CA (EDR® listing A7). Shelterbelt Builders appears in the RCRA NonGen /NLR database. This database indicates that Shelterbelt Builders were classified as a "Handler" not a "generator" of hazardous waste. No violations were noted in the listing.

Local Agency File Summary

According to representatives for the DTSC, the agency does not maintain a file on the Property. The RWQCB is the local agency providing environmental oversight for the Property. According to a representative of the RWQCB, no file exists for the Property (Wong, 2020).

The Property is located near the San Pablo Avenue corridor and therefore is considered by the City of Berkeley as being located in an "Environmental Management Area" that includes properties along the San Pablo Avenue corridor and areas west of San Pablo Avenue. The function of this designation is to require potential buyers and developers of properties within this "Area" to complete environmental due diligence, as the historical operations—particularly industrial and manufacturing ones—within the designated Environmental Management Area may have contaminated the subsurface environment. Thus, permit applicants owning properties located in this area could encounter potential health and environmental concerns during construction involving underground excavation or dewatering. For large developments or redevelopments, a review of potential environmental impacts by the City of Berkeley, at the applicant's expense, is required. This status would not affect the Property under circumstances where it would be continue in its current use configuration. Involvement by the City would only be expected in the case of plans for deep excavations or ones that would require de-watering.

Nearby Sites Environmental Work and Status

The other sites listed in the database search conducted by EDR® are not expected to present an environmental concern to the Property because they only hold an operating permit (which does not imply a problem), require no further action, or based upon International Geologic's review, are too distant and/or topographically downgradient or crossgradient relative to the Property to reasonably affect it. Un-mapped or "orphan" sites, are sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, an unmapped site cannot be geocoded due to inaccurate or missing information in the environmental database record provided by its applicable agency. Cross referencing address(es) and site name(s), as well as a visual reconnaissance of surrounding properties, has been completed for the unmapped facility site(s) in the database report. The Property and adjacent sites were not identified on the unmapped listing in the environmental database report. Figure 4 depicts the Property location and listed sites with a 1/4 mile radius as plotted by EDR®.

9.0 FINDINGS

International Geologic has performed a Phase I Environmental Site Assessment in accordance with ASTM E 1527-13 guidelines of 1207 Tenth Street, Berkeley, California, the Property.

The historical research presented in this report has established the use of the Property since approximately 1895. Sanborn fire insurance maps, historical aerial photographs, historical topographic maps, city directories, and interviews with informed persons associated with the Property, indicate that the Property was first developed at least as early as the md-1940's with two, eight-family apartment buildings that were part of the surrounding Codornices Village Federal Housing Project. The current main structure on the Property was constructed circa-1960 and may have originally been occupied by an irrigation/sprinkler business. By 1973, the Property was owned by Mr. Richard Christian who operated Chris's Payless Plumbing from the premises until about 2000. Several alterations have been made to the original metal structure after 1970 with the smaller building on the Property constructed sometime after 1990. After 2000, the Property was occupied by a landscaping business called "Shelterbelt Builders". Since approximately 2018 the Property has also been used as a research office and as artists studios.

The following findings are based on the information in this report and are presented in terms of whether they represent an ASTM defined current Recognized Environmental Condition (REC) an Historic REC (HREC) or a Controlled REC (CREC):

- 1) No RECs or CRECs were identified for the Property.
- 2) An Historic REC (HREC) is identified for the Property based on former underground fuel storage that took place in the northwest area of the Property from 1960 to 1991 when three gasoline USTs and one diesel UST were removed.
- 3) Soil confirmation samples were not collected during the 1991 tank pull as is normally required. Subsequent soil and groundwater sampling conducted in and around the former UST area in 1993 and 2004 respectively, revealed de-minimus concentrations of residual petroleum hydrocarbons in soil and a trace concentration of toluene in groundwater.
- 4) After the Berkeley Toxics Management Division (TMD) reviewed the 1993 and 2004 soil and groundwater data, TMD subsequently stated in an April 7, 2004 letter that "Residual gasoline and diesel constituents remain in soil and groundwater at the site. The TMD is satisfied that the known potential sources of contamination have been removed and that the residual soil and groundwater contamination resulting from leaks from the former underground tank systems

represents a low to insignificant potential to impact human health or the environment. The TMD will place a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag will consist of a notice requiring building permits to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property."

- More recent uses of the Property that include a gardening and landscaping business and the current R&D and artists use do not appear likely to have impacted the subsurface or buildings of the Property.
- Based on guidance outlined in the ASTM E2600-10 Tier I Vapor Encroachment Screening criteria, International Geologic considers the potential for the presence of vapors in the subsurface of the Property caused by contaminated soil and/or groundwater to create a vapor intrusion issue into occupied building space to be low.
- Plotted and orphan sites identified in the database report are not expected to present an environmental concern to the Property because: i) they only hold an operating permit (which does not imply a problem); ii) they are not required to perform further action; iii) the nature of the identified environmental concern does not suggest that contaminants would migrate to the Property, or iv) based upon International Geologic's review, are too distant and/or hydraulically downgradient or crossgradient relative to the Property to reasonably affect it.
- The Property is located near the San Pablo Avenue corridor and therefore is considered by the City of Berkeley TMD as being located in an "Environmental Management Area" for properties along the San Pablo Avenue corridor and areas west of San Pablo Avenue. The function of this designation is to require potential buyers and developers of properties within this "Area" to complete environmental due diligence, as the historical operations—particularly industrial and manufacturing ones—within the designated Environmental Management Area may have contaminated the subsurface environment. Thus, permit applicants owning properties located in this area could encounter potential health and environmental concerns during construction involving underground excavation or dewatering. For large developments or redevelopments, a review of potential environmental impacts by the TMD, at the applicant's expense, is required. This status would not affect the Property under circumstances where it would be continue in its current use. TMD involvement would only be expected in the case of plans for deep excavations or ones that would require de-watering.

9) The Property main building was constructed in 1960, which pre-dates 1990 Federal regulations prohibiting the use of asbestos-containing materials (ACMs) in buildings; therefore it is possible that building materials contain ACMs. While regulations were passed in the late 1970's prohibiting the manufacturing of ACMs, pre-produced ACMs were permitted to be used until approximately 1990. International Geologic did not note any suspect ACMs during the walk through, and was not supplied with documentation for any asbestos O&M Plans, asbestos surveys, and/or asbestos abatement records. No suspect ACMs were noted during the walk through, and the existing building materials appeared to be in very good condition.

In the professional opinion of International Geologic, an appropriate level of inquiry has been made into the current and previous uses of the Property consistent with good commercial and customary practice in an effort to minimize liability.

RECOMMENDATIONS

International Geologic has performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM Practice E 1527-13, of 1207 Tenth Street in Berkeley, California. There are no exceptions to, or deletions from, this practice described in this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property with the exception of an Historic REC associated with former fuel USTs in the northwest portion of the Property.

It is the understanding of International Geologic that the redevelopment plan for the Property is to involve removal of existing structures and pavement prior to construction of a new 3-story, 18,450 ft² mixed-use artist center housing artist studio spaces, a fabrication shop, an R&D space (product design and prototyping), a private art gallery, and two live/work units. At ground level, a 5,500 ft² private parking garage with 12 parking spaces and 14 bicycle hanging racks is to be built across the northern half of the site, creating a podium. The art center sits above and to the side of the parking podium.

Based on the available information and on the proposed redevelopment scenario, International Geologic identifies low potential vapor intrusion potential associated with the Property. Accordingly, International Geologic recommends no further investigation regarding the environmental condition of the Property.

The TMD stated in their April 2004 closure letter that the Property address will be "flagged" in the city of Berkeley building department permit system, so that any planned digging, excavation or de-watering activities that may expose workers to soil and/or groundwater would require a mitigation plan. This is also consistent with the Property being located in an "Environmental Management Area" for properties along the San Pablo Avenue corridor and areas west of San Pablo Avenue.

Based on the above, the following recommendations are presented;

- A Soil and Groundwater Management Plan (SGMP) should be developed to provide guidance should unexpected soil and/or groundwater impacts be encountered during the demolition and earthwork phase of the Property redevelopment. Although groundwater would not be expected to be encountered at this Property based on the on-grade and podium style construction that is planned, the SGMP would not only contain procedures and protocols for handing contaminated soil, but should groundwater be encountered, the plan would also contain contingencies for groundwater management as well. The SGMP would be submitted to City TMD and the Planning Department, and the document would be available on the job site during the demolition and earth working phases of construction.
- 2) Based on the original 1960 construction date of the main Property building, a demolition asbestos survey should be conducted by a qualified AHERA professional prior to demolition of the existing structures on the Property.

This report should be provided to potential property buyers, in accordance with real estate disclosure requirements.

We declare that, to the best of our professional knowledge and belief, we meet the definition of a Environmental Professional as defined by 40 C.F.R. § 312.10 of 40 C.F.R. § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. § 312.22.

CERTIFICATION

Stone Bithman

I certify that the work presented in this report was performed under my supervision. To the best of my knowledge, the data contained herein is true and accurate, and the work was performed in accordance with professional standards.

Date

CA Registered Environmental Assessor No. 04991

LIMITATIONS

This report was prepared using guidelines established by the American Society for Testing and Materials (ASTM) Subcommittee on Environmental Assessments for Commercial Real Estate (Standard E-1527, Standard Practice for Environmental Site Assessments: Phase I Site Assessment Process, 2013) and with generally accepted standards of environmental practice in California. This assessment was conducted solely for the purpose of evaluating environmental conditions at 1207 Tenth Street, Berkeley, Alameda County, California (Alameda County Assessor parcel number 60-2354-15-3 and is intended to reduce but not eliminate uncertainty regarding the existence of recognized environmental conditions at the Property assessed.

Our professional judgment regarding the potential for environmental impacts is based on limited data and our investigation was not intended to be a definitive investigation of contamination at the site. Unless specifically set forth in our proposal, the scope of work did not include a strict compliance audit of the site, or a review of the procedures for hazardous material use, waste storage or handling prior to disposal, or for personnel safety and health training and monitoring procedures, analyzes of radon, formaldehyde, lead paint, asbestos and other hazardous materials or indoor air quality, occupational health and safety or wetlands surveys. Further investigation, including additional subsurface exploration and laboratory testing of soil and groundwater samples collected at the site, can aid in evaluating subsurface environmental conditions and reduce the inherent uncertainties associated with this type of limited environmental assessment. Accuracy or completeness of public and proprietary records used to conduct limited assessments of this type is not implied. No soil engineering references are implied nor should be inferred.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by International Geologic were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

File Review Request Form

Planning and Development Department Toxics Management Division A Certified Unified Program Agency

USE THE TAB KEY TO MOVE FROM ONE FIELD TO THE NEXT

| Applicant's Name: Steve Bittman | Phone: 510-612-8751 |
|--|--------------------------------|
| Company's Name: International Geologic | Fax: |
| Reason for Review: Phase I Assessment | E-mail: stevebittman@gmail.com |

Note: Upon request for a copy or inspection of records, the City shall, within 10 days from receipt of the request, determine whether the request in whole or in part, will be made available and shall promptly notify the person making the request of the determination and the reasons therefore.

Specific File(s) Requested:

| Facility Name: | Address: 1207 Tenth Street | | | |
|-------------------|-------------------------------|--|--|--|
| 2. Facility Name: | Address: | | | |
| 3. Facility Name: | Address: | | | |
| 4. Facility Name: | Address: | | | |
| 5. Facility Name: | Address: | | | |

Note: Facility addresses are required. Maps, trade secret information, and personal phone numbers will not be available for review. (Reference Hazardous Materials Code, BMC Section 15.12.110, and Health and Safety Code, BMC Section 25506)

File Review Guidelines:

Any person reviewing file(s) shall adhere to the following guidelines:

- a) Keep file documents in the order found:
- b) Do not mark, annotate, underline, or otherwise write on file documents;
- c) Removing documents from premises is prohibited.

Photocopying or other reproduction of documents:

Photocopying of a few documents is available upon request at the rate furnished in the Fee Resolution. Request for reproduction of large quantities will be completed offsite and arranged by Toxics Management staff. Applicants may bring their own reproduction equipment.

Applicant's Signature:

Date: 627-7-20

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are

15 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 13 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 47 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 11 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 46 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter

6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material

inventory information for all reportable hazardous materials on site

at or above reportable quantities.

Violation Notes: Returned to compliance on 06/06/2019. A small argon tank was observed

on-site. This was not reported on the inventory. Please revise the

inventory by June 30, 2019.

Violation Division: Berkeley City Toxics Management Division

Violation Program: HMRRP
Violation Source: CERS

Site ID: 84603

Site Name: Walsh Brothers Inc

Violation Date: 03-28-2016

Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter

1, Section(s) 265.173

Violation Description: Failure to properly close hazardous waste containers when not in

active use.

Violation Notes: Returned to compliance on 07/13/2016. Used antifreeze in 15 gallon

drums, open, next to large used antifreeze drum. jon indicates the used antifreeze is pumped into larger drum. Tray of used oil sitting on drum and not closed. Hazardous waste containers must be closed at

all times when not adding or removing waste to prevent spills. Corrective action: Transfer used oil and used antifreeze immediately

or store in closed containers.

Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95,

Section(s) 25508.2

Violation Description: Failure to annually review and electronically certify that the

business plan is complete, accurate, and up-to-date.

Violation Notes: Returned to compliance on 04/20/2016. Violation Division: Berkeley City Toxics Management Division

Violation Program: **HMRRP** Violation Source: **CERS**

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 04-22-2016

Violations Found: No

Eval Type: Routine done by local agency

Routine announced HMBP, Haz waste & Storm water inspection. One man **Eval Notes:**

shop that specializes in high end classic car repair. All vehicles

under repair are stored inside the building only. HMBP CERS submittal completed on 4.20/2016. Hazardous Waste disposal records available for review, oil changes are infrequent. Clean shop, no violations noted

during the inspection.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Violation Description: Failure to annually review and electronically certify that the

business plan is complete, accurate, and up-to-date.

Returned to compliance on 04/21/2016. Violation Notes: Violation Division: Berkeley City Toxics Management Division

HMRRP Violation Program: Violation Source: **CERS**

Evaluation:

Eval General Type: Other/Unknown Eval Date: 04-14-2016 Violations Found: Yes

Eval Type:

Other, not routine, done by local agency **Eval Notes:** Non-Inspection related violation: Failed to submit annual Hazardous

Materials Business Plan for FY17 (XD)

Eval Division: Berkeley City Toxics Management Division

Eval Program: **HMRRP Eval Source:** CERS

Eval General Type: Compliance Evaluation Inspection

06-20-2017 Eval Date:

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: Routine Hazardous Materials Business Plan, Hazardous Waste and Storm

water facility compliance inspection, scheduled with Patrick Ottis,

owner of company. The 2017 CERS submittal was done on 1.7.2017. Very

clean shop that does restorations for old high end sports car manufacture, ferrari. Hazardous waste manifests were available for review during the inspection. No violations were noted at the time of

inspection.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

FINDS:

Registry ID: 110002824169

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter

1, Section(s) 265.33

Violation Description: Failure to test and maintain as necessary all facility communications

or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time

of emergency.

Violation Notes: Returned to compliance on 12/15/2017. The fire extinguisher in the

roasting area was last serviced June 29, 2016. TMD confirmed that other fire extinguishers had been serviced within the last year. Corrected onsite. The fire extinguisher was replaced with one that has

been serviced.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: The site is an active Chevron-branded service station located on the

southwest corner of Gilman Street and San Pablo Avenue in Berkeley,

California. Current site facilities include three 12,000-gallon

gasoline underground storage tanks (USTs). A new station building is currently under construction along the western property boundary in the southwest corner of the site. The site is approximately 50 feet above mean sea level (MSL) with relatively flat topography sloping gently to the west. The surrounding land use is primarily commercial.

To determine current conditions at the site and evaluate site

conditions against the LTCP criteria, CRA advanced soil borings B-12

through B-16 to assess shallow soil and attempted to collect

grab-groundwater samples. CRA also rehabilitated monitoring well C-5, which had been damaged and paved over during construction activities

at the site.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Citation:

Section(s) 2715

Violation Description: Failure to comply with one or more of the designated operator monthly

inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the

containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and

maintenance has been completed and documented.

Violation Notes: Returned to compliance on 12/05/2013. Designated operator did not make

note of the December 23, 2012 alarm and the correction of the alarm on the monthly DO report. Corrected onsite. DO updated the report to indicate the action taken. DO indicates that the alarm cleared and then they investigated the date they completed the secondary

containment test.

HSC 6.7 25286(a) - California Health and Safety Code, Chapter 6.7, Citation:

Section(s) 25286(a)

Violation Description: Failure to submit an complete and accurate application for a permit to

operate an underground storage tank, or for renewal of the permit.

Violation Notes: Returned to compliance on 02/19/2016. UST Operating Permit Application

Tank information submitted 4/30/15 is inaccurate for Tanks 1, 2, and

3. Tanks 1 and 2 are listed as having ball floats as overfill

prevention and a single wall vent piping transition sump. Review of site and file show that the tanks have a flapper valve and no sump. The tank information does not reflect that the fill components include a spill bucket and containment sump. Tank 3 is listed with a date of UST permanently closed as 3/29/15 and it is still operating. The tank information does not reflect that the fill components include a spill bucket and containment sump. Corrective action: Update the information in CERS, at cers.calepa.ca.gov to reflect accurate tank information and submit for review by CUPA. 1/12/2016: UST Operating Permit Application Tank information is still inaccurate. Escalated violation.

S121750369

Site Name: DELTAN DIVERSIFIED INC.- CHEVRON STATION #91745

Violation Date: 12-05-2019

Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title

23, Chapter 16, Section(s) 2716(a) through (e)

Violation Description: For designated operator (DO) monthly inspections conducted before

October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of

liquid/debris in spill containers. Inspect for the presence of

liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30

days.

Violation Notes: The monthly DO inspections are not being conducted every 30 days (1/25

- 2/26 - 3/27, 5/22 - 6/25, 7/23 - 7/28), the DO is not responding to all items on the inspection report in that the DO did not respond to "are all sensors in under-dispenser containment located to detect a leak at the earliest opportunity?", and the DO did not document the June 4, 2019 alarm and the response to the alarm. Corrective action: Ensure that the DO completes the visual inspection at least once every 30 days and that all items are reviewed during the inspection. Correct the June 2019 DO inspection report to include the June 4 alarm and attach documentation verifying appropriate service to the alarm.

Provide a copy of the documentation to TMD.

the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months. Returned to compliance on 12/31/2018. The overfill prevention

equipment inspection was not completed by October 13, 2018. Corrective

action: Have a service technican complete an inspection on the

overfill prevention equipment.

EDR ID Number

The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 12/05/2019. Owner/Operator is a small

quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the

conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. The used oil filters and the waste antifreeze were not disposed of within 180 days. The last pickup observed was in February 2019 for each. Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has

been corrected.

HWEval Program: **CERS** Eval Source:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 11-15-2019 Violations Found: Yes

Eval Type: Routine done by local agency

FACILITY PERFORMS CAR REPAIR AND OIL CHANGES. HAZARDOUS MATERIALS ARE **Eval Notes:**

STORED IN DRUMS. NO TANKS ONSITE. ALSO NO WELDING GAS ABOVE THE

REPORTING LIMIT.

Eval Division: Alameda County Environmental Health

Eval Program: **HMRRP** Eval Source: **CERS**

Eval General Type: Compliance Evaluation Inspection

11-15-2019 Eval Date: Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Facility generates approximately 165 gallons of used oil every three

to four months. Used antifreeze is generated at 55 gallons in over a half year, as are the oil filters. Paper filters are just beginning to be separated as the waste hauler has been separating them out and recently provided a drum for these. There were no paper filters observed in the paper filter drum onsite. I provided a label for the

drum once they start adding filters.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 11-01-2019 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: On site to conduct routine, tri-annual Hazardous Waste inspection. Met

with Kirsten Jusewicz-Haidle, laboratory manager. She was able to provide employee training records for the last three years and three years worth of hazardous waste manifests - complete and correct - immediately upon request. Hazardous Waste containers are kept in secondary containent and/or lockers. Lygos now ships off waste about once per month and plans to expand the size of their facility, per operator. Kirsten conducts weekly inspections of hazardous waste areas and maintains a written log. Wastes stored in the same area are compatible. Waste profiles and land disposal restriction documents associated with Hazardous Waste Manifests were presented for review at the time of inspection. Universal waste, consisting mostly of

batteries and electronics, is marked and has been on site since 5/21/2019. Lygos ships waste over 200 miles and therefore can store

waste on site for up to 270 days.

Eval Type: Routine done by local agency

Eval Notes:

On-site to conduct routine HMBP inspection. Lygos is a start-up research and development laboratory which creates chemicals using yeast rather than petroleum. Per Lab Manager, Kirsten, Lygos has been

yeast rather than petroleum. Per Lab Manager, Kirsten, Lygos has been operating for approximately 9 years. Per Lab Manager, EH&S consultant advises Lygos of what container types are compatible with their

chemicals and how to segregate incompatible chemicals. Waste streams are segregated based on compatibility in the same manner. Solid chemical storage was segregated at the time of inspection. Liquids are stored in flammables, corrosives, bases, and acid cabinets throughout Lygos. Employees are trained by EH&S consultant Rene Ricks and employee training records were available for review. Malonic Acid - a controlled substance - was not inspected due to its' location in a locked Controlled Substance cabinet. Compressed gases on site are seismically braced. Per lab manager, hydrogen gas use at Lygos will be

discontinued once their hydrogen [Truncated]

Eval General Type: Compliance Evaluation Inspection

Eval Date: 11-30-2016

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Lygos is continuing to settle into new facility. Excess chemicals are

being disposed of through Stericycle. Note: Compressed gas is not used, will remove from inventory for FY17/18. Hazardous materials storage appeared compliant and consistent w/ inventory. Hazardous waste is kept in a proper container and kept closed when not in use. Container is properly labeled except for the accumulation start date. EPA ID number is active. Non RCRA solvent contaminated paper towels are kept in a flammable safety trash. The contaminated paper towels are not considered hazardous if there is no free liquid, which would otherwise exhibit the ignitable characteristic. The paper towels are not required to be shipped as hazardous waste. Waste records were available. Manifests are compliant. Training was completed and records were available. Property owner is aware of hazardous materials and waste but there is no written communication that informs him/her of

Violation Description: Failure to complete and electronically submit hazardous material

inventory information for all reportable hazardous materials on site

at or above reportable quantities.

Violation Notes: Businesss failed to maintain an accurate inventory. Corrective Action:

Update inventory to reflect the actual quantities of chemicals being

stored on site.

Violation Division: Berkeley City Toxics Management Division

Violation Program: HMRRP Violation Source: CERS

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 07-15-2016

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: Operations at site generate two waste streams:

acetonitrile/ethanol/wax and acetonitrile 70%/water 30%. The waste containers are labeled and closed. TMD to provide best practice for accumulation. EPA ID number request has been submitted to DTSC. Facility has eyewash/safety shower, spill kits and fire extinguishers available. TMD suggests documenting the regular checks of the equipment, such as a monthly checklist to confirm operation of eyewash/shower, that spill kits are complete and fire extinguishers

are in appropriate place and within range.

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection

Eval Date: 09-11-2019 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Bas Research is in the business of cannabis manufacturing. BAS

Research does not grow or sell to non-whole sale . Products and byproducts that are used to make other products were observed throughout the facility. Shipping and Receiving room: Carbon Dioxide 2 250- lbs containers. Liquid observed on the ground around the extraction unit is condensation from the unit itself. Empty Containers are disposed of as solid waste. Containers that previously held solvents are completely emptied by removing any free liquid. Containers that held cannabis derived materials are rinsed and then disposed of as solid waste. The rinse water is incorporated with other cannabis waste that has compatible properties and hazards. Containers

Grinding room: No hazardous materials stored. Room is solely purposed to grind cannabis flower. Area outside grinding room stores small

are emptied are emptied, containers that previously held solvents.

Eval General Type: Compliance Evaluation Inspection

Eval Date: 02-01-2017 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: EPA ID number is inactive. Hazardous material business plan was

submitted on CERS. Should be updated by next reporting period, which is 3/1/2017. Haz Mat: All materials are stored properly and are consistent with the inventory provided on CERS. Haz Waste: Oil filters are being drained and shipped off properly. Oil that is collected from the draining process is transfered to a 220-gal waste oil container. The waste oil and the waste coolant containers are properly labeled. The containers were left open when not in use. THe last accumulation start date on both containers was 5-16-2016, which is over 180-days.

An aqueous parts washer is used. The machine separates the water and

oil, the oil is then transfered to the waste oil container. The floor at the shop is ooccasionally washed using water, a broom, and a

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 10-09-2015 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Routine and unannounced HMBP, Hazardous waste and stormwater

inspection. Minor HW violation for failing to keep HW container closed except when adding or removing waste. The 55-gallon drum was sealed properly at the time of inspection, no further RTC needed. Alfredo Gonzalez had concerns over their bill. I recalculated, it was accurate for the reported chemicals and the calculations sheet was pdf'd and

emailed to him.

1, Section(s) 265.173

Failure to meet the following container management requirements: (a) A Violation Description:

container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to

leak.

Returned to compliance on 02/14/2019. The approximately 2 gallon Violation Notes:

plastic bin of hazardous waste medicines located in the storage area was observed open due to overfilling of container. Facility is transferring to a new haz waste hauler and they have not yet transferred the waste to the new containers. The waste overfilling the plastic bin was transferred into a 5 gallon plastic haz waste storage

bin and both containers were closed. Corrected onsite.

Site ID: 424355

Site Name: Sprouts Farmers Market #284

Violation Date: 09-26-2017

Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter

1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A

container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to

leak.

Violation Notes: Returned to compliance on 09/26/2017. OBSERVATION: The waste inside of

the toxic waste container was not in plastic bags as required by protocol. All hazardous should be individually bagged as required by protocol. CORRECTIVE ACTION: Immediately close this container and ensure all hazardous waste containers are closed when not adding or removing waste. Submit photo documentation to the CUPA by October 26,

2017

Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and

portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical

characteristics of the Hazardous Waste, and starting accumulation

Violation Notes: Returned to compliance on 09/25/2018. The used oil drums are labeled

> with a hazardous waste label, but the information on the label has faded away. The hazardous waste filters are labeled as drained used oil filters rather than hazardous waste. The used antifreeze drum does not have an accumulation start date. Used oil drums were labeled with all required information and an accumulation start date was added to the used antifreeze drum at the time of inspection. Corrective action: Label the paper/plastic drained used oil filters as hazardous waste with name and address of generator, physical and chemical

> characteristics of the hazardous waste and starting accumulation date. 9/25/2019 - Confirmed with Ken that the used oil filters have been

labeled with all required information.

S108212994

File Location: Local Agency

Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil,

Soil Vapor

Potential Contaminants of Concern: Tetrachloroethylene (PCE)

Site History:

The Site is developed with a rectangular brick building that covers more than half of a city block bounded by Camelia Street on the south, Ninth Street on the west, and Tenth Street on the east. A Canada Dry bottling plant occupied the site from its initial development until 1978. The southern half of the site building was occupied by Perc-Serv, Inc., a wholesale laundry and dry cleaning

supply business, from 1978 to 1983. In 1985, the site building was renovated to its current use as a multi-tenant retail, office, and warehouse. Permits for the 1955 installation and 1978 removal of a 7,500 gal underground gasoline storage tank (UST) have been found. Gasoline constituents associated with the former UST include benzene, a recognized carcinogen. Soil and groundwater samples from the loading dock area on the west side of the Site showed elevated levels of some halogenated volatile organic compounds (HVOCs), indicating, primarily, tetrachloroethylene (PCE), trichloroethylene (TCE) and cis-1,2-dichloroethylene (c-1,2-DCE). HVOC impacted groundwater is present out to approximately one block west-southwest from the Site

to Eighth Street and does not appear to extend south to a

predominantly a residential neighborhood.

Violation Description: Failure to maintain secondary containment (e.g., failure of secondary

containment testing).

Violation Notes: Returned to compliance on 03/22/2019. A diesel pipe or valve in

dispenser 3-4 is leaking outside of the UDC. All piping connected to an underground storage tank is required to have secondary containment. Corrective action: Immediately stop the leak and clean up the UDC. Provide TMD with a plan within 30 days for providing secondary containment for the piping and valves in all three dispensers. Original comply by date: 5/12/18 5/21/18 - left message for Keith regarding violation corrections 5/31/18 - issued NOV 6/25/2018 - Permit submitted to City of Berkeley Permit Service Center for installation of bravo conversion frames 7/16/2018 - PSC issued corrections list 7/16/2018 9/7/2018 - TMD visited site and observed the dispenser. The dispenser contains absorbent and the absorbent is clean. Contacted the contractor, Stroupe Petroleum, and spoke with Cathryn who indicates the corrections were going to be addressed by

Keith Simas, per their conversation 8/15/2018. Left message for Keith

Simas. 10/1/2018 - [Truncated]

23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct

Returned to compliance on 04/15/2019. The 10/26/2018, 11/28/2018, 12/21/2018, 1/25/2019, 2/26/2019 and 3/27/2019 all show a compliance issue of no overfill prevention equipment inspection performed. The owner/operator does not provide a description in Section V of the action taken or to be taken to correct the issue. The October 26, 2018 DO inspection did not document inspection of spill containers, and that UDC equipment is positioned correctly. The DO monthly inspection reports from July 2018 - present note that the secondary containment test was done 4/12/2018, when it was last done 4/12/2016. Corrective action: The owner/operator must provide a description in Section V of any action taken or to be taken to correct issues discovered during the monthly DO inspection. The DO shall complete all required information on the report, including whether all sensors in the UDC are located to detect leak at earliest opportunity. The Inspection must also be completed within 30 days from the last inspection.

File Location: Not reported Local Case Number: TT01-1685

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: The site is currently used as a gasoline station. The property was

purchased in 1983 from the Ashland Oil Company. In August 1989, four gasoline tanks (12,000, 8,000, 5,000 and 4,000 gallon capacity) and one diesel fuel tank (4,000 gallon capacity) were removed from the site. The tanks were replaced with three 12,000-gallon capacity gasoline tanks. A temporary extraction well, designated TEW4, was constructed in an excavated pit during installation of the new tanks. Western Geo-Engineers installed two monitoring wells, designated MW1

and MW2, at the site on February 13, 1990. (06/15/2015 Annual

Groundwater Monitoring and Sampling Report)

6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all

required content.

Violation Notes: Returned to compliance on 06/13/2016. OBSERVATION: The annotated site

map submitted to the CUPA does not include the hazardous materials storage area in the Gill Tract part of the property where Diesel and waste oil was found. CORRECTIVE ACTION: Include a map of the Gill Tract buildings on the property showing the hazardous materials storage locations in the tractor maintenance building observed during inspection in the California Environmental Reporting System (CERS)

submittal.

Violation Division: Alameda County Environmental Health

Violation Program: HMRRP
Violation Source: CERS

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter

6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material

inventory information for all reportable hazardous materials on site

at or above reportable quantities.

Violation Notes: The business failed to complete and electronically submit chemical

inventory information for all reportable hazardous materials on site at or above reportable quantities. The 55 gallon drums of sealer and wax in the janitorial supply room were not reported on the HMBP. Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. Add the two drums of wax and sealer to the HMBP.

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.40(c)

Violation Description: Failure to determine if the waste generated is a hazardous waste and

to maintain analysis results for three years.

Violation Notes: Returned to compliance on 06/13/2016. OBSERVATION: Facility has a "hot

bath" used for washing stove top grills. Facility employee mentioned that it is emptied out every 3 months into the sanitary sewer. Facility shall determine whether waste is a hazardous waste and retained waste analysis for 3 years. CORRECTIVE ACTION: Generator shall provide ACDEH with a copy of the protocols for disposing of this liquid and provide documentation on how the "hot bath" liquid was determined to be non-haz for the disposal into the sanitary sewer.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Citation:

Section(s) Multiple

Violation Description: Business Plan Program - Training - General

Violation Notes: Returned to compliance on 02/13/2014. Reviewed training records.

Miguel indicates the employees are provided a review of the topics on the training sheet and the employees sign the sign in sheet. the training covers many good topics, but does not cover all topics indicated on the training plan, including SDSs, PPE, use of emergency response equipment, and what to do if there is a spill, etc. In addition, the training states that the materials the business uses that are categorized as hazardous materials are ink and solvents for washing presses. Note that most all of the materials you use are considered hazardous materials. Corrective action: Update training

course to include topics listed in your training program.

The preferred method of management is reclamation or reuse. See www.calrecycle.ca.gov/reducewaste/Electronics/InkandToner.htm. Miguel indicates the spray dusters, which contain difluoroethane, are thrown in trash. Ensure these are empty before disposing. If not empty, they can be managed as universal wastes. See the "Aerosol cans as universal waste" DTSC fact Sheet. Indigo Room - business uses Handi-Kleen PL36, which holds up to 15 gallons of cleaning agent. Miguel indicates they use imaging oil as the cleaning fluid and the waste is removed to the small jugs. The jugs are not labeled. Miguel would like to get clarification on the process from the operator. Meeting to be

scheduled for next [Truncated]

Eval Division: Berkeley City Toxics Management Division

Eval Program: HW **Eval Source: CERS**

Eval General Type: Other/Unknown 11-21-2013 **Eval Date:**

Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: Met with Gordon Empey to review the processes in the Indigo Room. the

> Handi-Kleen washer uses imaging oil, not solvent, and they have had it for about 3 years and have not yet changed out the liquid or had to remove the solids. Gordon indicates they will transfer to hazardous waste drum if ever need to dispose of. The bottles to the right of the

washer are usable product, not waste. Berkeley City Toxics Management Division

Eval General Type: Compliance Evaluation Inspection

01-10-2017 Eval Date: Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Haz Mat: Business has hazardous material containers throughout

facility which contains diluted solutions of original chemical ex: 2 3-gal containers w/ water and Press Control EWM in the PRess Room. These containers with haz mat should be labeled. Hazardous Material storage locations are consistent w/ site map, the haz mat containers are in good condition and kept closed when not in use. Paints/inks are sometimes mixed, the excess mixtures are kept in dixie cups and covered with plastic wrap. Other Paints/inks are stores in original containers. SDS's are kept on site and are made available to

employees. Haz Waste: Hazardous waste drums are kept sealed when not in use and are properly labeled. 2 55-gal drums with paint cleaner, solvents; 2 55-drums with waste paint/ink. Rags are used for wiping excess ink from printers, they are disposed of in covered containers and picked up by a laundering service. Spray/Aerosol cans are used

throughout the facilift - they are tossedi n [Truncated]

Section(s) 25507

Violation Description: Failure to adequately establish and implement a business plan when

storing/handling a hazardous material at or above reportable

quantities.

Violation Notes: Returned to compliance on 02/13/2019. TMD has determined that your

facility is storing or using hazardous materials in quantities that require reporting under fire and hazardous materials regulations. For more information about the hazardous materials storage/Hazardous Materials Business Plan (HMBP) program, please see the following

guidance document:

https://www.cityofberkeley.info/uploadedFiles/Planning_and_Development

/Level_3_-_Toxics/HMBP%20Information%20and%20Instructions%20Rev%202016

.pdf. In order to register with the City of BerkeleyG s TMD, you must

create an account in the CERS Business Portal,

https://cers.calepa.ca.gov/, and complete a HMBP, including the disclosure of all hazardous materials onsite in accordance with BMC 15.12. 050, a site map that contains all required information in HSC 25505(a)(2), an emergency response plan which includes procedures for a release or threatened release of hazardous materials, in accordance with HSC 25505(a)(3) and 19 CCR section 2658, and training for all new

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 09-13-2018
Violations Found: Yes

Eval Type: Other, not routine, done by local agency

Eval Notes: Onsite to review operations and compliance with registration

requirements of the City of Berkeley's Toxics Management Division. A hazardous materials storage registration is required if a business handles aggregate quantities of 500 pounds or more of all solid hazardous materials and waste; 55 gallons or more of all liquid

hazardous materials and wastes; or 200 cubic feet or more, at standard temperature and pressure, of all gaseous hazardous materials. A hazardous waste generator registration is required if a business generates any quantity of hazardous waste. Met with Yogesh Maru. Forklifts are battery operated. There is an eyewash by the battery station. Trucks are maintained at the trucking company in Oakland. An electrician changes out the bulbs and removes them at the time of servicing. Observed warehouse storage of about 84 gallons of corn oil, 84 gallons of fry oil, 336 gallons of soybean oil, 252 gallons of

canola oil and 84 gallons of sesame oil in 16 L [Truncated]

Lead Agency Case Number: Not reported 37.88053
Longitude: -122.30131

Case Type: Cleanup Program Site

Case Worker: PF

Local Agency: Not reported RB Case Number: 01S0241 File Location: Regional Board

Potential Media Affected: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Not reported

Site History: WRE/Colortech is an active plating and engraving facility that

produces rotors for the printing industry. Chromate, nickel, and copper solutions--as well as degreasers, acids, and other chemicals including solvents-- have been used as part of the plating and

engraving process. All primary and secondary source areasincluding a chromium sump, a xylene sump, three chromate wastewater underground storage tanks (USTs), associated drain line piping, and contaminated soilwere remediated by excavation. The facility discontinued chemical engraving activity and onsite wastewater treatment in 1993. The facility had been investigated and remediated by 1999. Hexavalent chromium is present in groundwater offsite and is being mitigated by the injection of MRC and natural attenuation. A total of 16 onsite and offsite wells are available for monitoring the chromium plume. Additional groundwater injections occurred in 2018. Water board directive issued 2/26/2019 required a RAP to evaluate and design remedial actions to prevent skatepark user exposures and remediate the groundwater plume. The RAP submitted in April 2019 did not

adequately address the directive.

City: BERKELEY

Facility ID: San Francisco Bay 011009945

Facility Type: Industrial - Facility that treats and/or disposes of liquid or

semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water

pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is

under Waste Discharge Requirements.

NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7

are assigned by the Regional Board

Subregion: 2

Reclamation: Not reported POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Chapter 15, Section(s) 66265.195(a)

Violation Description: Failure of the owner or operator to conduct inspections and maintain

inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from

monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction

is being operated according to its design; 4) The construction materials and the area immediately surrounding the externally

accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance

with section 66265.194(b)(3).

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

File Location: All Files are on GeoTracker or in the Local Agency Database

Local Case Number: RO0000100

Potential Media Affect: Other Groundwater (uses other than drinking water) Potential Contaminants of Concern: Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates The site is an active retail gasoline station and mini-mart. In Site History:

> August 1989, Applied GeoSystems performed a limited environmental assessment at the site. Five borings (B-1 through B-5) were advanced in the vicinity of the existing gasoline USTs to evaluate potential hydrocarbon impacts to soil prior to removing and replacing the USTs. In June 1991, RESNA Environmental advanced two soil borings (B-6 and

B-7) in the area of a proposed new UST complex to evaluate for potential hydrocarbon impacts in soil. In July 1991, four USTs were removed from the site. Several of the tanks were reported to have visible holes. Based on elevated levels of total petroleum

hydrocarbons as gasoline (TPHg) in soil, 350 cubic yards of hydrocarbon impacted soil was over-excavated from the tank pit and

disposed of off-site. In October 1991, RESNA installed four

EDR ID Number

Elevation Site Database(s)

ARCO #02035 (Continued) U003299699

groundwater monitoring wells (RW-1, MW-1, MW-2, and MW-3) to further evaluate the extent of petroleum hydrocarbons in soil and groundwater. In November 1991, RESNA conducted a step-drawdown test in well RW-1. In August 1992, RESNA advanced eight soil borings (B-12 through B-19). Six of the borings (B-14 through B-19) were converted into soil vapor extration (SVE) wells. Borings B-12 and B-13 were advanced in the vicinity of the former waste oil tank to evalaute impacts to soil from waste oil. In August 1992 RESNA performe an SVE pilot test to evaluate the feasibility of SVE as a remedial option. In November 1992, RESNA installed two additional onsite groundwater monitoring wells (MW-4 and MW-5) and an offsite well MW-6 to evaluate dissolved phase gasoline constituents in the down-gradient groundwater flow direction. In June 1993, RESNA installed three SVE wells (VW-7 through VW-9) and two air sparge/SVE wells (AS-1 and AS-2). In August 1993, RESNA performed an AS/SVE pilot test to evaluate the feasibility of utilizing air sparging in conjunciton with SVE. In November 1993 a groundwater extration system (GWE) was installed using existing extraction well RW-1, and an AS/SVE remediation system was installed using existing SVE wells (VW-7 through VW-9) and six new SVE wells (VW-1 through VW-6) and existing AS well (AS-1 and AS-2). The AS/SVE system operated intermittently from December 1993 through February 2004 when it was shut down due to low influent concentrations. The GWE System reportedly never operated. In March 2009, Broadbent & Associates (BAI) installed three monitoring wells (MW-7 through MW-9) to evaluate the remedial effectiveness of the AS/SVE system. In March 2011, BAI conducted a soil vapor intrusion assessment in the vicinity of the onsite building to evaluate the potential for benzene vapr intrusion. The vapor intrusion assessment was conducted prior to implementation of the Low Threat UST Closure Policy in August 2012. Consequently, since the site is an active commerical fueling station it is exempt from the media specific criteria for vapor intrusion unless there are off-site impacts. The site was evaluated for case closure under the State Water Resources Control Board Low-Threat Underground Storage Tank Closure Policy and was closed on May 20, 2014. Based upon the information available in our files to date, no further investigation or cleanup for the fuel leak case is necessary at this time. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

generators, transporters, and treatment, storage, and disposal

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

File Location: All Files are on GeoTracker or in the Local Agency Database

Local Case Number: RO0000121

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: Fuel hydrocarbons were detected in soil and groundwater duing a site

investigation in 1990. Three USTs, 5 dispensers, and associated product piping were replaced in 1996. Groundwater monitoring has been conducted at the site since 1991. The fuel dispensers were replaced and soil overexcavation was performed in 2007. The site was evaluated for case closure under the State Water Resources Control Board

Low-Threat Underground Storage Tank Closure Policy and was closed on

July 11, 2014. Based upon the information available in our files to date, no further investigation or cleanup for the fuel leak case is necessary at this time. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Potential Media Affected: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Kerosene, Lead

Site History:

Flint Ink operated as a black ink manufacturing facility between 1900 through 2004. The area has been in heavy industrial use for over 100

years and other recognized sources of contamination are nearby. When operations ceased in 2004, the property contained buildings,

aboveground and underground storage tanks (ASTs and USTs), and related infrastructure. Surface spills of diesel, motor oil and kerosene were present near the ASTs, and at least 3 of the 7 identified USTs may have leaked or been overfilled. Primary source removal in 2005 and 2006 included demolition of all ASTs, associated pipes, and any affected infrastructure; closure in place by City of

Berkeley Toxics Management Department of two potentially leaking USTs which are under slabs and structural elements of historic buildings; removal of one leaking 300-gallon UST; removal of four intact USTs; and discovery and closure of two deep process water wells. Secondary source removal included excavation and removal of 19,000 tons of impacted soil and replacement with clean fill; and removal and disposal of approximately 370,000 gallons of groundwater. A ground water monitoring program with 13 wells was established that tests for total petroleum hydrocarbons (TPH) and volatile organic compound (VOCs). VOCs are currently present in groundwater in the northeast corner of the site. A No Further Action/Closure Letter for the ASTs and UST releases was issued for the property located at 1350 Fourth

Street, a portion of the former Flint Ink facility.

Case Worker: MD
RB Case Number: 01-2342

Local Agency: ALAMEDA COUNTY LOP

File Location: All Files are on GeoTracker or in the Local Agency Database

Local Case Number: RO0000297

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: Not all historic documents for the fuel leak case may be available on

GeoTracker. A complete case file for this site is located on the

Alameda County Environmental Health website at:

http://ehgis.acgov.org/dehpublic/dehpublic.jsp. Two USTs were removed in April 1998 (1,000-gallon diesel, and 10,000-gallon gasoline). UST removal confirmation samples contained trace concentrations of TPHd, TPHg, and BTEX/M compounds; however, groundwater contained concentrations of gasoline and BTEX/M compounds at levels of concern.

Two hand augured soil bores were installed in the presumed

downgradient direction from the gasoline UST in January 1999. Trace concentrations were encountered in soil; however, MTBE was detected in one grab groundwater sample. In March 1999 an additional bore was

proposed to be installed further downgradient (presumed) to investigate the extent of MTBE contamination; the work was also approved in March 1999. This work is not been documented to have occurred. In October 2013 two additional soil bores (IB-3 and IB-4) were installed to define the extent of gasoline groundwater contamination at the site. Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehqis.acqov.org/dehpublic/dehpublic.jsp.

Potential Media Affected: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Tetrachloroethylene (PCE), Stoddard solvent / Mineral Spriits /

Distillates

Site History: The Site is an approximately 0.16-acre property located within a

commercial business district at 1507-1511 San Pablo Avenue. A residential neighborhood adjoins the Site to the east. The Site includes three commercial/light industrial buildings constructed between about 1945 and 1955: (1) The main former Pullman Cleaner building at 1507 San Pablo Avenue on the northwest side of the Site; (2) A smaller building, 1507\\% San Pablo Avenu), on the northeast side of the Site associated with the former dry cleaner; and (3) a former storage building at 1509/1511 San Pablo Avenue on the south side of the Site. The Site is currently vacant except for an art studio in a second-floor suite within the 1509-1511 building. The Site was developed and operated as Pullman Cleaners around 1947. The dry cleaning facility apparently used Stoddard solvent initially, and began using tetrachloroethene (PCE) in 1954. Dry cleaning at the Site was discontinued sometime prior to 1979, and a woodworking facility occupied the Site from approximately 1979 to 2004. In 1993, three 1,300-gallon vertically-aligned underground storage tanks (USTs) were identified between 1507 and 1507\\% San Pablo Avenue buildings. In 1996, the three USTs were closed in-place. During UST closure activities, approximately 25 tons of overburden soil and 900 gallons of groundwater were disposed offsite. Prior to backfilling, extraction standpipes were placed in each of the three exposed tanks, and another 1,500 gallons of groundwater was removed for disposal. Moderate concentrations of gasoline, diesel, and Stoddard solvent were found in soil samples collected during these activities, but no halogenated volatile organic compounds (HVOCs) were found. Between

1997 and 2000, 18 soil borings were drilled and sampled and groundwater monitoring wells MW-1 through MW-5 were installed and

EDR ID Number

sampled at the Site. Groundwater samples from the borings and wells showed a localized Stoddard solvent hydrocarbon plume extending west from the location of the former Site USTs; and a more extensive HVOC plume extending at least 80 feet west-northwest from the southern dry cleaning machine. Indoor air samples contained elevated concentrations of HVOCs, and PCE levels exceeded the environmental screening levels for commercial land use. In July 2016 two new wells (MW-6 and MW-7) were installed on the west side of San Pablo Ave. A deed restriction and a site management plan will be submitted to aid in evaluating the site for case closure.

Potential Contaminants of Concern: Heating Oil / Fuel Oil, Kerosene, Other Petroleum

Site History:

Soil and groundwater primarily impacted by releases of kerosene and diesel-range petroleum hydrocarbons presumed released from above and underground storage tank systems. Residual impacts are inaccessible and proposed to remain in below landmarked buildings and structures. Land use convenant restricts residential use. Covenant requires implementation of soil management plan whenever excavation is performed at the site. Covenant requires remediation of soils when landmarked structures are removed or any other subsurface interruption. Annual report of any activation of the site management

plan (subsurface disruptions) is required to be maintained at the

facility.

Under Investigation

Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride,

Diesel, Gasoline, Kerosene, Waste Oil / Motor / Hydraulic /

Lubricating

Site History: The property is currently occupied by Terminal Manufacturing

(Terminal), a metal fabrication and machine shop facility for the design and manufacturing of vacuum and pressure vessels, truck tanks and food processing equipment. The property was purchased by Terminal in 1988 from a former trucking company that operated four underground storage tanks (USTs) along the western side of the property. The installation date of the USTs is unknown, however it was reported by the previous property owner that the USTs were emptied of their contents and decommissioned in the late 1970s, approximately 10 years before being purchased by Terminal. In 1999, the four USTs were removed from the Site. It included the removal of two 2,000-gallon waste oil tanks (USTs 3 and 4); one 4,000-gallon diesel (kerosene

range) fuel tank (UST 2) and one 2,000- gallon gasoline fuel tank (UST 1) along with the closure and sampling of waste water sumps and

associated piping.

Background Info: The site is in an industrial area and is still operated by Dover

> Sales. Dover Sales (DS) is a chemical distributor for paint and coating industries and is located at 1220 Fourth Street. DS had seven underground material storage tanks that contained petroleum naphtha, methyl ethyl ketone and toluene. Precision Technical Coatings (PTC) manufactures industrial coatings, water and solvent base paints and is located behind the DS site. In response to an employee's complaint, the Dover Sales and Precision Technical Coating (PTC) sites were inspected. Soil samples were taken. Soil samples taken from the Dover Sales site found 2-butanone, 1-butanol and various alkanes and aromatics.

Comments Date: 04171984

Completed RA. A total of about 26 cubic yards of contaminated Comments:

Comments Date: 04171984 Comments: soil was removed.

11221989 Comments Date:

Comments: Completed RA. Seven underground storage tanks (USTs) were

Comments Date: 11221989

removed from the site. The USTs contained toluene, methyl ethyl Comments:

Comments Date: 11221989

Comments: ketone (2-butanone), xylenes, mineral spirits (paint-related

Comments Date: 11221989

Comments: materials), lactol spirits (petroleum naptha), special

Comments Date:

Comments: naptholite 66/3, and a mixture of these chemicals. Hydrocarbons

Comments Date: 11221989

Comments: were discovered in soil and groundwater during tank removal, and

Comments Date: 11221989

three monitoring wells were installed on March 30, 1990. Comments:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 01-1806

Local Agency: ALAMEDA COUNTY LOP

File Location: All Files are on GeoTracker or in the Local Agency Database

Local Case Number: RO0000119

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE),

Trichloroethylene (TCE), Vinyl chloride, Benzene, Ethylbenzene,

Gasoline, Waste Oil / Motor / Hydraulic / Lubricating

Site History: Case closure is granted for the current commercial land use. Due to

residual subsurface contamination remaining at the site, if any redevelopment occurs, or if a change in land use to residential, or other conservative land use, Alameda County Department of Environmental Health (ACDEH) must be notified as required by Government Code Section 65850.2. Excavation or construction activities in areas of residual contamination require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities. This site is to be entered into the City of Albany Permit Tracking System due to the residual contamination on site. Current

Land-use at time of Closure The subject site consists of two commercial buildings occupied by Kelly Moore Paint store and Cosmo Prof in a commercial district at the intersection of San Pablo Avenue and Buchanan Street, in Albany California. The area to the north,

FIRESTONE #3655 (Continued)

1000223081

west, and south is commercial, while land to the east is residential. The offices of the City of Albany are across the street to the southwest of the site. Due to residual subsurface contamination remaining at the site, if any redevelopment occurs, or if a change in land use to residential, or other conservative land use, Alameda County Department of Environmental Health (ACDEH) must be notified as required by Government Code Section 65850.2. Excavation or construction activities in areas of residual contamination require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities. Adjacent Property(ies) Land-use at Time of Closure The area to the north, west, and south is commercial, while land to the east is residential. Groundwater with concentrations of chlorinated volatile organic compounds (VOCs) derived from the former waste oil UST at the subject site impact offsite groundwater to the southwest. Historic Land-use / Site Investigation The site was formerly a Firestone store, with a 500-gallon waste oil UST and five in-ground hydraulic lifts. The waste oil UST was removed in May 1990. Concentrations of Total Petroleum Hydrocarbons as diesel (TPHd), oil and grease, benzene, toluene, ethylbenzene, and total xylenes (BTEX), tetrachloroethene (PCE), 1,2-Dichloroetheane, and other chemicals of concern were detected. Four groundwater wells MW-1 to MW-4 were installed in September 1990. Well MW-1 was subsequently destroyed during a waste oil remedial overexcavation conducted in October 1990. The hydraulic lifts were removed in September 1998 with some additional overexcavation to reduce hydraulic oil concentrations at their former locations. Groundwater monitoring occurred intermittently between April 1998 and February 2015, and a soil vapor investigation was conducted in 2012. Potential Exposure to Chemicals of Concern Earlier in site investigations Chemicals of Concern (COCs) at the site included TPHd, TPH as gasoline (TPHg), BTEX, and oil and grease. These COCs were eliminated after approximately May 1999. Chlorinated VOCs, including PCE, Trichloroethene (TCE), 1,2-DCA, and vinyl chloride (VC) were identified early in site investigations, and remained as COCs at the site after the elimination of petroleum hydrocarbons as COC. Potential exposure routes for these chemicals included the potential for vapor intrusion and direct contact exposure. Remediation Activities A remedial overexcavation of the waste oil UST was conducted in October 1990, and the hydraulic lifts were removed and limited overexcavation was conducted in September 1998. Case Closure & Future Site Management Requirements This waste oil UST release case has been evaluated for closure consistent with the State Water Resource Control Board Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum related contaminants. In addition, the release included chlorinated solvents. Although the chemicals released at the site are predominately not chlorinated solvents the case has also been evaluated consistent with criteria described in the Regional Water Boards Assessment Tool for Closure of Low-Threat Chlorinated Solvents, as they are relevant and appropriate for evaluating closure. Due to residual contamination at the site, the site is closed as a commercial site with site management requirements. If there is a proposed change in land use to any residential, or conservative land use, or if any redevelopment occurs, ACDEH must be notified as required by Government Code Section 65850.2.2. ACDEH will re-evaluate the site relative to the proposed redevelopment. Excavation or construction activities in areas of

File Location: All Files are on GeoTracker or in the Local Agency Database

Local Case Number: RO0002974

Other Groundwater (uses other than drinking water) Potential Media Affect: Potential Contaminants of Concern: Tetrachloroethylene (PCE), Benzene, Diesel, Gasoline

Site History: Not all historic documents for the fuel leak case may be available on

GeoTracker. A complete case file for this site is located on the

Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.isp. A Phase II

environmental site assessment conducted in 2008 to assess the former

gasoline station that was present in this portion of the site,

detected 99,000 a%g/L TPHd in groundwater, 77,000 a%g/L TPHg and 1,500 a%g/l benzene in groundwater. Free product was also present in B-1. The maximum TPHd concentration in soil was 7,200 mg/kg from a depth of 10.5 feet bgs. Maximum TPHg concentration was 1,400 mg/kg and the maximum benzene concentration was 13 mg/kg from 10.5 feet bgs. Since 2008 nine groundwater monitoring wells have been installed at the site and an additional 18 soil bores have been drilled to

define the extent of groundwater, soil, soil vapor contamination at the site and vicinity. Seven vapor wells, and three sub-slab vapor points have been additionally been installed. After an FS and CAP were submitted and conditionally approved, an additional seven Soil Vapor Extraction (SVE) wells were installed for the purpose of remediating the site by SVE. The SVE system has been in continuous

operation since February 2018.

RB Case Number: 01-1332

Local Agency: BERKELEY, CITY OF

File Location: Not reported Local Case Number: Not reported

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: The subject property (Site) was used as a former Shell-branded

service station until Dec. 1985 when it was transferred ownership to an independent operator. In Aug. 1988 a 10,000-gal underground storage tank (UST) failed a leak test, and twice in April 1989 as well. A 550-gal waste-oil tank (WOT) was removed from the Site in July 1989. Soil samples taken from the over-excavation during the tank removal detected up to 13,000 mg/kg total oil and grease (TOG), 4,200 mg/kg total petroleum hydrocarbons as diesel (TPHd), and 1,200 mg/kg total petroleum hydrocarbons as gasoline (TPHg). In March, 1995 one 10,000-gal, one previously-undocumented 750-gal and two (2) 8,000-gal gasoline USTs were removed from the Site. Soils samples then taken after UST removal detected 1,300 and 1,800 mg/kg TPHg and 5.6 and 11 mg/kg benzene. Quarterly groundwater monitoring has been conducted since Nov. 1989. MTBE (methyl tert butyl ethylene) was

detected up to 16,700 ug/L in groundwater.

Diesel

Potential Media Affected: Soil
Site History: The commercial property is located on the western side of San Pablo

Ave in Berkeley, California. Surrounding the Site are other, similar commercial and some residential properties.. The parcel is nearly completely covered by the single, rectangular-shaped single-floored

structure. In July of 1989, an illegal discharge (release) was

reported when a 1,000-gal underground diesel tank (UST) was removed and contaminated soil discovered. Analyses of soil samples collected on Site indicated total petroleum hydrocarbon as diesel (TPH-d) as high as 630 mg/kg. Groundwater monitoring wells were planned to be advanced in 1991 under the direction of Aqua Terra Technologies,

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Background Info: K and S Management Company managed 32 units in a four-plex

building located between Hearst and Delaware Street. On June 1983, an inspection of the 32 units was conducted in response to a citizen complaint. Paint chips (lead-based) from water blasting operation prior to repainting had accumulated around the bases of the building. The blasting company removed from all areas where paint chips were present and a few inches of soil to

an appropriate landfill. All visible evidence of the blasting

was removed. 11301983

Comments Date: Comments:

Certified Site. In November 1983, post excavation samples were

EDR ID Number

Site History:

The site was used as a dry cleaning facility for more than 40 years until 2009, with the current structures (a laundry and residential unit on the ground floor, and several apartments on the second floor) built in the 1940s. The current laundry business does not perform any dry cleaning on-site. Planned redevelopment is slated to occur in 2019, pending permit issuance from the City of Berkeley. Based on assessments to date, the dry cleaning solvent perchloroethylene (PCE) is present in soil, soil gas, and groundwater at concentrations which could pose a risk of vapor intrusion into the site's current residential units, and future planned redevelopment of the site. PCE concentrations in indoor air are currently being mitigated by the use of air filtration systems installed in business and residential units. TCE detected in indoor air does not appear to be associated with the PCE releases at the site during dry cleaner operations since TCE concentrations detected in soil vapor or groundwater were very low relative to PCE in December 2018 data.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/27/2020

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date: 2012

South Map: 5641112 OAKLAND WEST, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

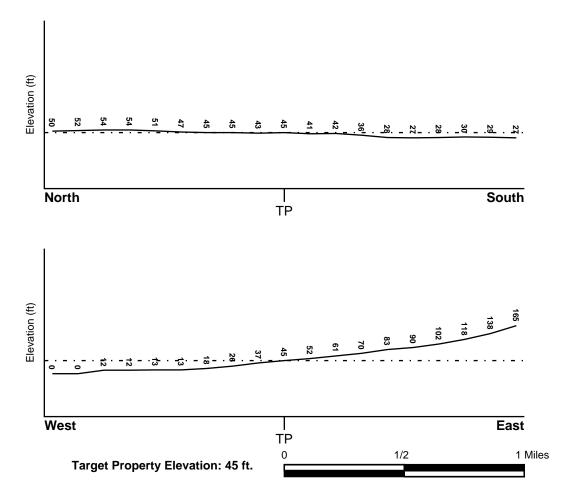

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

RICHMOND YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| | Soil Layer Information | | | | | | |
|-------|------------------------|-----------|--------------------|---|---|-----------------------------|----------------------|
| | Boundary | | | Classification | | Saturated hydraulic | |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | conductivity micro m/sec | Soil Reaction (pH) |
| 1 | 0 inches | 11 inches | loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 5.6 |
| 2 | 11 inches | 31 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 5.6 |
| 3 | 31 inches | 59 inches | sandy clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 1.4 Min: 0.42 | Max: 8.4 Min: 5.6 |

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX 5 PROPERTY ENVIRONMENTAL DOCUMENTATION

March 17, 2004 2402-1.TSP

Mr. Charlotte Erasmy P.O. Box 1153 Willits, CA 95490

Subject: Executive Summary of Transaction Screen and limited subsurface investigation conducted at

1207 Tenth Street, Berkeley, California.

Ms. Erasmy:

International Geologic is pleased to submit the attached summary report describing a Transaction Screen and limited subsurface investigation conducted at the above referenced site. The Transaction Screen was performed using guidelines established by the American Society for Testing and Materials (ASTM) Subcommittee on Environmental Assessments for Commercial Real Estate (Standard E 1528- Standard Practice for Environmental Site Assessments: Transaction Screen Process, 2000). This letter presents the findings of the assessment.

FINDINGS

- The Property was first developed at least as early as 1950 with an eight-family apartment building that was part of the surrounding Codornices Village Federal Housing Project. The current metal warehouse and office structure was constructed in 1959 and was originally occupied by an irrigation/sprinkler business. By 1973, the Property was owned by Mr. Richard Christian who operated Chris's Payless Plumbing from the premises. Several additions have been made to the original metal structure after 1970, and from 1999 until the present, the Property has been used to store ornamental paper products.
- A 550-gallon underground gasoline storage tank was installed beneath the west end of the yard area in 1959. Three additional underground fuel tanks (2,500 gallon regular, 2,500 gallon unleaded, 2,000 gallon diesel) were installed in this area in 1973. In 1991, the tanks, related product lines and the dispenser were removed from the Property. No soil samples were collected from beneath the tanks at the time of their removal.
- A 1993 subsurface investigation conducted at the Property, indicated that trace amounts of fuel range hydrocarbons existed in the soil around the former tank locations. Seven soil borings were drilled around the perimeter of the former tank locations. Up to 280 parts per million (ppm) gasoline range hydrocarbons was detected in a sample collected from a depth of 9.5-10 feet bgs and up to 15 ppm total xylenes were detected in the same sample. Soil samples collected from the other 6 borings contained much lower to non-detectable concentrations of gasoline range hydrocarbons. Up to 24 ppm diesel range hydrocarbons was detected from boring B-4 at a depth of 9.5-10 feet bgs.

- 4) Groundwater sampling conducted in March 2004 as part of this environmental assessment indicated residual amounts of primarily diesel range hydrocarbons to be present in the groundwater beneath the former tank locations (boring B2) and from a location approximately 10 feet to the west of the former tank locations (boring B1). 270 ppb TPHd (diesel range) was detected in a groundwater grab sample collected from boring B2, and 150 ppb TPHd was detected in a groundwater grab sample collected from boring B1. 80 ppb TPHg (gasoline range) and 1.1 ppb toluene was detected in the groundwater sample collected from boring B2. No MTBE was detected in any of the samples.
- Sites listed in the database report are not expected to pose an environmental concern to the Property because they only hold an operating permit (which does not imply a problem), require no further action, or based upon International Geologic's review, are too distant and/or topographically downgradient or crossgradient relative to the Property to reasonably affect it.

DISCUSSION

According to Mr. Geoff Fiedler of the City of Berkeley Toxic Management Division, the detected levels of hydrocarbons present in the subsurface beneath the Property do not represent a health risk if left in place and do not warrant further investigation at this time. Mr. Fiedler also stated that the Property address will be "flagged" in the city of Berkeley building department permit system, so that any planned digging, excavation or de-watering activities that may expose workers to soil and/or groundwater would require a mitigation plan.

So that future potential Property transfers will not be hindered, Mr. Fiedler will designate the Property as having experienced an "Unauthorized Release", and will then immediately close that case. This way, a records search conducted as part of any future environmental assessment for the Property will show "Case Closed" for the Property address with regard to the hydrocarbon spill. A letter to this effect will be forthcoming from Mr. Fiedler.

If you have any questions or concerns, please call me at (510) 530-8751.

Sincerely, INTERNATIONAL GEOLOGIC

Steve Bittman Project Manager

Summary Report

Transaction Screen/Limited Subsurface Investigation at 1207 Tenth Street Berkeley, California 94710

INTRODUCTION

A Transaction Screen (ASTM Standard E-1528) in conjunction with a limited subsurface investigation was conducted by International Geologic at 1207 Tenth Street, Berkeley, California (Property). The purpose of the Transaction Screen was to evaluate the conditions of the Property with respect to activities, materials, or practices which are subject to environmental regulations, and to identify potential sources of contamination on-site and within a one-mile radius of the Property. The ASTM Transaction Screen considers analysis for asbestos containing materials (ACM's) and lead paint to be beyond the scope of work. No evaluation was made for the presence of these materials on the Property.

The Transaction Screen consisted of:

- o Interviewing the current owner of the Property.
- o Conducting a Property walk over.
- o Completing an ASTM Transaction Screen Questionnaire.
- o Reviewing historical information for the Property dating back to 1929.
- o Reviewing Federal, State, and local agency records pertaining to the Property and surrounding area within a one-mile radius.

In conjunction with the Transaction Screen, a limited subsurface investigation was conducted at the Property which involved collecting two groundwater samples from an area that formerly contained underground fuel tanks.

The subsurface investigation consisted of:

- o Obtaining a permit from the City of Berkeley
- o Advancing two borings with a direct push drilling rig to obtain two groundwater samples
- o Analyzing the samples at a State certified laboratory for gasoline, BTEX, MTBE and diesel fuel

PROPERTY DESCRIPTION

Location

The Property is bounded by Tenth Street to the west, and adjoins a parking area for Walsh Brothers Volvo Repair (1060 Harrison Street) to the east. A paper goods warehouse (1203 Tenth Street) adjoins the Property to the north, and a heating and air conditioning business (1215 Tenth Street) adjoins the Property to the south. The immediate surrounding area is comprised of a mixture of light industrial, commercial and residential property.

Assessor's Information

The Property is depicted by the Alameda County Assessor in its book 60, "Map of I.M. Wentworth Boot and Shoe Company's Tract", and is legally described by its Assessor's Parcel Number 60-2354-15-3. A copy of the Assessor's parcel map for the area described above is presented in Attachment 1.

Property Configuration

The rectangular shaped Property measures approximately $12,500 \text{ ft}^2$ in area, is relatively level, and contains an approximately $4,500 \text{ ft}^2$ metal warehouse with three offices, and an attached $3,000 \text{ ft}^2$ wood framed shop and storage building. An enclosed, $5,000 \text{ ft}^2$ asphalt paved yard is situated on the north half of the Property with access from 10^{th} Street. The Property is served by the local public water and sewer districts.

PAST AND PRESENT PROPERTY USAGE

Sanborn Fire Insurance Maps

Review of Sanborn Fire Insurance Maps depicting the Property revealed the following information regarding past Property usage:

1929: The Property is shown as vacant land. The present day street layout is depicted.

1950: The Property contains an eight family apartment building that is part of the surrounding Codornices Village federal housing project.

1970: The Property is depicted to contain the present day structure and yard. The building is

labeled "Plumbing".

1980: The Property is depicted as in the 1970 Sanborn map.

The Sanborn Maps reviewed for this assessment are included in Attachment 1 to this report.

Building Permits

A review of building permits at the City of Berkeley Permit Center revealed the following information for the Property.

1959: Application for building permit on 120' by 100' lot. Steel building is to be 36' by 69'. Owner

indicated as "Christner Sprinkler".

1959: Zoning permit for plumbing warehouse.

1989: Permit to install water heater for Chris's Plumbing.

Interviews

International Geologic interviewed Property owner Ms. Charlotte Eramsy regarding Property history. According to Ms. Eramsy, the Property building was originally used by a sprinkler business until the 1970's when her father bought the Property and operated Chris's Payless Plumbing from there. Ms. Eramsy stated that the Property was used by the plumbing business until 1999, and that after December 1999 until the present, the building has been used to store ornamental paper products.

Property Usage Summary

The Property was first developed at least as early as 1950 with an eight-family apartment building that was part of the surrounding Codornices Village Federal Housing Project. The current metal warehouse and office structure was constructed in 1959 and was originally occupied by an irrigation/sprinkler business. By 1973, the Property was owned by Mr. Richard Christian who operated Chris's Payless Plumbing from the premises. Several additions have been made to the original metal structure after 1970, and from 1999 until the present, the Property has been used to store ornamental paper products.

PAST AND PRESENT ADJACENT SITE USAGE

Sanborn Fire Insurance Maps

Review of Sanborn Fire Insurance Maps of the area surrounding the Property revealed the following information regarding past adjacent site usage:

1929: Adjacent and surrounding areas to the Property are depicted as vacant or residential.

1950: The adjoining area to the north and south of the Property are shown to contain eight-family apartment buildings that was part of the surrounding Codornices Village federal housing project. The area to the east is depicted to contain single family dwellings and a stone works.

1970: An electronic equipment warehouse is shown adjoining the north side of the Property, with

a stone works adjoining the south side. An unidentified store adjoins the east side of the Property and a service station is depicted adjoining the northeast corner of the Property.

1980: Adjoining sites to the north and east are depicted as developed, however their use is not

indicated. The south side of the Property is adjoined by a stone works.

Summary

Sanborn Fire Insurance Maps, and an interview with Property owner Charlotte Erasmy, indicate adjacent sites to the Property were vacant or residential during the early part of the century. By circa 1950, the surrounding area to the north, south and west contained numerous, multiple family dwellings that were part of the Codornices Village federal housing project, while the area to the east contained a mix of commercial and residential structures fronting on San Pablo Avenue. By 1970 until the present, adjoining and surrounding areas contained an electronics warehouse and machine shop (1201-1203 Tenth Street), a stone works (1215 Tenth Street), and a service station at the southwest corner of Harrison and San Pablo Streets. Currently, 1201-1203 Tenth Street is an ornamental paper warehouse and 1215 Tenth Street is occupied by a heating and air conditioning contractor. The adjoining area to the east is a parking lot for Walsh Brothers Volvo Repair at 1060 Harrison Street.

PROPERTY WALK OVER

A walk over of the Property was performed by International Geologic on March 3rd, 2004, to observe the potential presence of hazardous materials, note activities, materials, conditions or practices which are subject to environmental regulations, and to assess the potential for other environmental concerns.

Building/Storage

At the time of the Property visit, the building contained numerous stacked cardboard boxes containing ornamental paper products. No significant staining, odors or obvious signs of contamination were observed in the building areas. Where visible, the concrete slab-on-grade or asphalt floor appeared to be in good condition, and no evidence of above or below ground tanks or fill ports suggesting the presence of an underground tank was observed. No staining, pools of liquid, odors or other obvious signs of contamination was noted in the building. No uses other than what would be expected for an office was observed in the office areas.

Yard Area

At the time of the Property visit, the asphalt surface of the yard appeared in fair condition with areas that were cracked and damaged. Some portions of the yard surface showed signs of surficial oil staining, however no significant stains or unusual odors were noted at the time of the site visit. No containers of hazardous substances were observed in the yard. No evidence of above or below ground tanks or fill ports suggesting the presence of an underground tank was observed.

The sidewalk surface on the Tenth Street side of the building appeared in good condition with no significant staining. No evidence suggesting the presence of an underground tank or unusual ground staining was observed during the walk through of the Property perimeter.

ASTM TRANSACTION SCREEN QUESTIONNAIRE

The ASTM Transaction Screen Questionnaire is intended to aid the process of gathering information used to evaluate the conditions of a property with respect to activities, materials, or practices which are subject to environmental regulations, and to identify potential sources of contamination on site as well as from adjacent properties. An affirmative answer to any of the questions may indicate the need for further on site investigation. The ASTM Transaction Screen Questionnaire was completed based upon a Property walk over conducted by International Geologic, and on responses given by the current Property owner Ms. Charlotte Erasmy. Listed below are the questions as they appear in the Transaction Screen Questionnaire that were answered in the affirmative. An explanation follows each question. The complete questionnaire is included in Attachment 2.

Question # 2b Did you observe evidence or do you have any prior knowledge that any adjoining property has been used for an industrial use in the past?

The adjoining property to the south at 1215 Tenth Street, was occupied by a stone works circa 1970's. 1203 Tenth Street to the north was reportedly a machine shop.

Question # 4a Did you observe evidence or do you have any prior knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility (if applicable, identify which)?

The Property contained three underground gasoline fuel tanks and one underground diesel fuel tank from 1960 to 1991.

Question #4b Did you observe evidence or do you have any prior knowledge that any adjoining property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility (if applicable, identify which)?

The site at the southwest corner of Harrison and San Pablo Streets, adjoins the Property on its northeast corner and was a service station circa 1970's.

Question #7b Did you notice evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is unknown in origin?

Fill dirt of unknown origin was used to partially backfill the excavation after the fuel tanks were removed in 1991.

Question # 10b Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the property?

The Property contained three underground gasoline fuel tanks and one underground diesel fuel tank from 1960 to 1991.

Question # 11b Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, or access ways indicating a fill pie protruding from the ground on the property or adjacent to any structure located on the property?

The underground fuel tanks that existed at the Property between 1960 and 1991 would have required vent and fill pipes.

Question #15a Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?

The owner of the Property is aware that underground fuel tanks formerly existed beneath the Property.

Question # 16 Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on or contamination of the property or recommended further assessment of the property?

The owner of the Property is aware of a site assessment conducted in 1993 that identified residual hydrocarbon contamination in the soil near the former underground fuel tank locations.

Questions #21 and 22 pertain to Federal and State agency records that may have environmental information about the subject property and surrounding area within a one-mile radius of the site. A summary of these records is presented in the Records Review Section presented below.

RECORDS REVIEW

Federal and State Records

Federal and State records were reviewed to determine whether hazardous materials are handled or stored onsite, releases of hazardous materials or petroleum product have occurred or been detected on-site, and to identify potential sources of contamination within a one-mile radius of the subject properties.

Details of the Federal and State records review are included in a map report in Attachment 3. The following summarizes the findings of the Federal and State records review.

Federal ASTM Standard

- o No (0) sites within a one-mile radius of the Property were listed on the Environmental Protection Agency's (EPA) National Priority List (NPL). The NPL identifies sites for priority cleanup under the Superfund Program.
- o No (0) sites within a one-mile radius of the Property were listed on the EPA's Proposed NPL database.
- o No (0) sites within a ½-mile radius of the Property were listed on the EPA's Comprehensive Environmental Response, Compensation, and Liability Act (CERCLIS) inventory. CERCLIS is a data base used by the EPA to track activities conducted under its Superfund program and to monitor sites with potential for hazardous releases, or sites that may require clean-up.
- o No (0) sites within 1/4-mile of the Property appear on the CERC-NFRAP database. NFRAP sites may be sites that following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or contamination was not serious enough to require Federal Superfund action or NPL consideration.
- One (1) site within a one-mile radius of the Property was listed on the EPA's Corrective Action Report (CORRACTS) list. CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
- o No (0) sites within a ½-mile radius of the Property were listed on the EPA's Resource Conservation and Recovery Information System (RCRIS-TSD). RCRIS-TSD is a data base tracking sites which generate, transport, store, treat or dispose of hazardous waste.
- o No (0) sites within 1/4-mile of the Property were listed on the EPA's RCRIS "Large Quantity Generator" (LQG) list. The list includes information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA.
- o Twelve (12) sites within 1/4-mile of the Property were listed on the EPA's RCRIS "Small Quantity Generator" (SQG) list. The list includes information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA.
- o The Property is not listed on the EPA and Coast Guard's Emergency Response Notification System (ERNS). ERNS records information on reported releases of oil and hazardous substances.

State ASTM Standard

o No (0) sites within a one-mile radius of the Property were listed on the California Department of Toxic Substance Control (DTSC) CAL-SITES AWP (Annual Work Plan) List. CAL-SITES AWP is a data base maintained by The State of California which identifies known hazardous substance sites targeted for cleanup.

- o Two (2) sites within a one-mile radius of the Property were listed on the California Department of Toxic Substance Control CAL-SITES List. CAL-SITES is a data base maintained by the State of California identifying known and potential hazardous substance sites targeted for cleanup.
- o The Property is not listed on the California Hazardous Material Incident Reporting System List (CHMIRS). CHMRIS contains information on accidental releases or spills of hazardous substances.
- o Thirty-seven (37) sites within a ½-mile radius of the Property were listed on the State of California Water Resources Board CORTESE database. CORTESE contains information on sites having experienced a reportable release of toxic substances.
- o Five (5) sites within a one-mile radius of the Property were listed on the Notify 65 List. Notify 65 is maintained by the California State Water Resources Control Board, and contains facility notifications about any release which could impact drinking water.
- o No (0) sites within a ½-mile radius of the Property were listed on the State of California Water Resources Control Board "Toxic Pits" list. "Toxic Pits" identifies sites suspected of containing hazardous substances where clean-up has not been completed.
- o No (0) sites within a ½-mile radius of the Property were listed on the State of California Solid Waste Information System (SWIS) database. SWIS contains information on active, inactive and closed landfills.
- No (0) sites within a ½-mile radius of the Property were listed on the State Water Resources Control Board Waste Management Unit Database System (WMUDS) or the State of California Solid Waste Activity Tracking (SWAT) database. The State maintains these lists for program tracking and inventory of waste management units and contains information on groundwater monitoring and landfills.
- o Thirty-nine (39) sites within a ½-mile radius of the Property were listed on the State of California Leaking Underground Storage Tanks (LUST) list. The State of California Water Resources Control Board maintains this list of leaking underground storage tanks (UST's).
- o No (0) sites within a ½-mile radius of the Property were listed on the State of California Department of Health Services Bond Expenditure Plan database.
- o Two (2) sites within a 1/4-mile radius of the Property were listed on the State of California Underground Storage Tanks (UST) list. The State of California Water Resources Control Board maintains this list of registered UST's.
- o One (1) site within a ½-mile radius of the Property was listed on the State of California Voluntary Cleanup Program (VCP) list. The State of California Department of Toxic Substance Control maintains this list of low threat level properties.

- o No (0) sites within a 1/4-mile radius of the Property were listed on the State of California leaking underground storage tanks on Indian land (Indian LUST) list.
- o No (0) sites within a 1/4-mile radius of the Property were listed on the State of California underground storage tanks on Indian land (Indian UST) list.
- o Three (3) sites within a 1/4-mile radius of the Property were listed on the California EPA Facility Inventory Database (CA FID) database. FID contains active and inactive underground storage tank locations from the State Water Resources Control Board.
- o Four (4) sites within a 1/4-mile radius of the Property was listed on the State of California Underground Storage Tanks (Historical) (UST) list. The State of California Water Resources Control Board maintains this list of registered UST's

Federal ASTM Supplemental

- o No (0) site within a one-mile radius of the Property was listed on the EPA's Resource Conservation and Recovery Information System "CONSENT" database. CONSENT tracks legal settlements that establish responsibility for local Superfund sites.
- o No (0) site within a one-mile radius of the Property was listed on the EPA's Records of Decision (ROD) database. ROD documents mandate a permanent remedy at an NPL site.
- o No (0) sites within a one-mile radius of the Property were listed on the EPA's De-listed NPL database. The De-listed NPL database tracks sites that the EPA no longer manages under its NPL program.
- o The Property is not listed on the EPA's Facility Index System (FINDS). Finds contains facility information and "pointers" to other sources that contain more information on the storage and transportation of hazardous materials or waste.
- o The Property is not listed on the Federal Hazardous Materials Incident Report System (HMIRS) database. The Department of Transportation maintains this list of hazardous material spill incidents.
- o The Property is not listed on the Nuclear Regulatory Commission's (NRC) Material Licensing Tracking System (MLTS) database. MLTS identifies sites that possess or use radioactive materials.
- o No (0) sites within a 1/4-mile radius of the Property were listed on the Department of Labor/ Mine Safety and Health Administration "MINES" list.
- o The Property is not listed on the EPA's National Priority List Liens list (NPL LIENS). NPL LIENS identifies property for which a lien has been filed through which the USEPA has the authority to recover remedial action expenditures.

- o The Property is not listed on the EPA's PCB Activity Database (PADS). PADS identifies generators, transporters and other handlers of PCB's.
- o No (0) sites within a 1-mile radius of the Property were listed on the Department of Defense (DOD) Database. The DOD data set identifies federally owned or administered lands, administrated by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.
- o No (0) site within a ½-mile radius of the Property was listed on the EPA's Brownfields list. The Brownfields program is designed to help states and local governments minimize the uncertainties of contamination associated with "brownfield" sites.
- o The Property is not listed on the EPA's Resource Conservation Recovery Act (RCRA) Administration Action Tracking System (RAATS) database. RAATS contains information on enforcement action pertaining to major violators under RCRA.
- o The Property is not listed on the EPA's Toxic Release Inventory System (TRIS). TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities.
- o The Property is not listed on the EPA's Toxic Substances Control Act (TSCA) database. TSCA identifies manufacturers and importers of chemical substances.
- o The Property is not listed on the EPA's Federal Insecticide, Fungicide, & Rodenticide Section 7 Tracking System (SSTS) list. The SSTS tracks reported types and amounts of pesticides being produced and distributed in the past year.
- o The Property is not listed on the EPA's Federal Insecticide, Fungicide, & Rodenticide (FTTS) list. FTTS tracks administrative cases and pesticide enforcement actions and compliance activities.

State or Local ASTM Supplemental

- o The Property was not listed on the State of California Above Ground Storage Tank (AST) database. The State of California Water Resources Control Board maintains this list of registered AST's.
- o No (0) sites within a 1/4-mile radius of the Property were listed on the CLEANERS database. The State of California DTSC maintains this list of dry cleaner related facilities
- o The Property is not listed on the State of California Waste Discharge System database (WDS). WDS sites have been issued waste discharge requirements.
- o The Property is not listed on the State of California DEED database. The DEED database is maintained by the State of California Department of Toxic Substance Control, and tracks sites that have DEED restrictions related to subsurface contamination.

- o No (0) sites within a 1/4-mile radius of the Property was listed on the State of California No Further Action Determination (NFA) list. The State of California Department of Toxic Substance Control maintains this list of properties that are suspected of being contaminated.
- o The Property is not listed on the State of California EMI database. The EMI database is maintained by the State of California Air Resources Board, and tracks sites that have pollutant emissions.
- o No (0) sites within a 1/4-mile radius of the Property was listed on the State of California Unconfirmed Properties Referred to Another Agency (REF) list. The State of California Department of Toxic Substance Control maintains this list of properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action.
- o No (0) sites within a 1/4-mile radius of the Property was listed on the State of California School Property Evaluation program (SCH) list. The State of California Department of Toxic Substance Control maintains this list of school sites being evaluated for possible hazardous materials contamination.
- o No (0) sites within a 1/4-mile radius of the Property was listed on the State of California Needing Further Evaluation (NFE) list. The State of California Department of Toxic Substance Control maintains this list of properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process.
- o Eight (8) sites within a ½-mile radius of the Property was listed on the California Department of Health Services Non-Fuel Leaks (SLIC) database.
- No (0) sites within a 1/4-mile radius of the Property were listed listed on the State of California Hazardous Waste Information System (HAZNET) list. The State of California Department of Toxic Substance Control maintains this list of hazardous waste generators and hazardous waste treatment, storage and disposal facilities.
- o No (0) sites within a one-mile radius of the Property were listed on Real Property Scan's Manufactured Gas (Coal Gas) Sites list.

Brownfield's Database

No (0) sites within a ½-mile radius of the Property were listed on the US Brownfields Sites list. Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields.

One (1) site within a ½-mile radius of the Property was listed on the Voluntary Cleanup Program (VCP). VCP contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Sites listed in the database report are not expected to pose an environmental concern to the Property because they only hold an operating permit (which does not imply a problem), require no further action, or based upon International Geologic's review, are too distant and/or topographically downgradient or crossgradient relative to the Property to reasonably affect it.

City of Berkeley Toxics Management Division (BTMD)

A file review was conducted at the BTMD for the Property on February 12, 2004. The BTMD keeps files on sites that store or generate hazardous chemicals, or sites that have current soil or groundwater contamination. Files kept at the BTMD contained records describing work conducted at the Property after the underground tanks were removed in 1991, specifically soil sampling conducted in 1993 and work plans for additional subsurface work. Details of the these records are described in the section **Past Property Environmental Work** below.

Berkeley Fire Department (BFD)

A file review was conducted at the BFD for the Property on March 4, 2004. Records dating back to 1960 documented the installation of a 550 gallon underground gasoline tank located 10 feet from the north Property line and 15 feet from Tenth Street. The file also contained tank tightness testing reports from 1987 and 1989 indicating the tank system, that by then included three gasoline tanks and one diesel tank, passed tightness testing both years.

PAST PROPERTY ENVIRONMENTAL WORK

The following chronologic description of past environmental work conducted at the Property was assembled from information contained in files from Property owner Ms. Charlotte Erasmy and from the BTMD. Pertinent documents are included in Attachment 4.

December 1991: Property owner Richard Christian removes four underground fuel storage tanks from beneath the Property: (1) 550 gallon gasoline, (1) 2,500 gallon regular, (1) 2,500 gallon unleaded, (1) 2,000 gallon diesel. The dispenser and related product lines were removed at the same time. The tanks were located in the northwest portion of the yard area, and were reportedly in good condition with no visible holes, and the excavation appeared clean. The excavation was backfilled with soils generated from the tank removal and unspecified imported fill, then resurfaced with asphalt. No soil samples were collected during the tank removal, and no inspection was made by the City of Berkeley TMD or Fire Department.

January 1993: TMC Environmental Inc. of San Pablo, California (TMC) supervised the drilling of seven soil borings around the perimeter of the former tank locations. The total drilled depth of the borings ranged from 6 to 14 feet below the ground surface (bgs). Up to 280 parts per million (ppm) gasoline range hydrocarbons was detected in a sample collected from a depth of 9.5-10 feet bgs in boring B-3 and up to 15

ppm total xylenes were detected in the same sample. Soil samples collected from the other 6 borings contained much lower to non-detectable concentrations of gasoline range hydrocarbons. Up to 24 ppm diesel range hydrocarbons was detected from boring B-4 at a depth of 9.5-10 feet bgs. No groundwater samples were collected during this phase of work. TMC recommended additional subsurface investigation to further delineate the extent of the contamination.

March 1993: The BTMD requests a work plan for a groundwater investigation to be conducted at the Property.

April 1993: TMC prepares a generalized work plan detailing work needed to install one groundwater monitoring well in a proposed location approximately 10 feet to the west of the former tank locations.

May 1993: The BTMD requests a work plan that is signed by a certified or registered professional.

June 1993: TMC submits another work plan for the well installation, this one signed by a registered professional

August 1993: An application for well construction is completed by TMC and Mr. Christian. The permit was either not submitted or not approved.

March 1999: Stellar Environmental Solutions of Berkeley, California (SES) submits a work plan to the BTMD detailing proposed work at the Property to drill four soil borings in the vicinity of the former tank locations. Two of the borings were proposed to extend deep enough to encounter groundwater for sample collection. An additional boring was proposed to be located at the northeast corner to evaluate possible impacts from offsite sources. A permit for the work was completed by SES, and subsequently approved by the BTMD on March 19, 1999.

No record of the proposed work by SES having been actually conducted was found during this assessment.

<u>LIMITED SUBSURFACE INVESTIGATION</u>

At the request of the Property owner, Ms. Charlotte Erasmy, a limited subsurface investigation was conducted at the Property with the specific purpose of collecting groundwater samples to evaluate the current groundwater conditions beneath the Property. A permit was obtained from the BTMD approving two borings on the Property for groundwater collection. On March 4, 2004, the borings were advanced by Precision Sampling Inc. of Richmond, California under the supervision of Steve Bittman of International Geologic. Boring B1 was located approximately 10 feet to the west of the westward limit of the excavation area, and boring B2 was located within the former tank excavation area. The borings were advanced with a direct push drilling rig with the total depths being 18 feet bgs for boring B1 and 15 feet bgs for boring B2. Temporary pvc well casing was installed in each boring to allow groundwater sample collection using a pcv bailer. No soil samples were collected. Figure 1 depicting the Property layout and boring locations is included in Attachment 1.

Groundwater samples were collected from the temporary wells and delivered under chain-of-custody protocol to McCampbell Analytical Inc. of Pacheco, California. The groundwater samples were analyzed for Total Petroleum Hydrocarbons as gasoline (TPHg), benzene, toluene, ethylbenzene and total xylenes (BTEX) and MTBE using EPA Test Method 8015c/8020a and for Total Petroleum Hydrocarbons as diesel (TPHd) using EPA Test method 8015c. After groundwater sample collection, the pvc casings were removed, and both borings were backfilled to the surface with neat cement. Laboratory analytical data sheets and chain of custody records are included in Attachment 4. Analytical results for the groundwater samples are summarized in Table 1 below:

Table 1
Analytical Results For Groundwater Samples
1207 Tenth Street, Berkeley, California
ppb = parts per billion

| | B1 | B2 |
|----------------------|----------|----------|
| ТРНд | <50 ppb | 80 ppb |
| Benzene | <0.5 ppb | <0.5 ppb |
| Toluene | <0.5 ppb | 1.1 ppb |
| Ethylbenzene | <0.5 ppb | <0.5 ppb |
| Total Xylenes | <0.5 ppb | <0.5 ppb |
| MTBE | <0.5 ppb | <0.5 ppb |
| TPHd | 150 ppb | 270 ppb |

FINDINGS

- The Property was first developed at least as early as 1950 with an eight-family apartment building that was part of the surrounding Codornices Village Federal Housing Project. The current metal warehouse and office structure was constructed in 1959 and was originally occupied by an irrigation/sprinkler business. By 1973, the Property was owned by Mr. Richard Christian who operated Chris's Payless Plumbing from the premises. Several additions have been made to the original metal structure after 1970, and from 1999 until the present, the Property has been used to store ornamental paper products.
- A 550-gallon underground gasoline storage tank was installed beneath the west end of the yard area in 1959. Three additional underground fuel tanks (2,500 gallon regular, 2,500 gallon unleaded, 2,000 gallon diesel) were installed in this area in 1973. In 1991, the tanks, related product lines and the dispenser were removed from the Property. No soil samples were collected from beneath the tanks at the time of their removal.

- A 1993 subsurface investigation conducted at the Property, indicated that trace amounts of fuel range hydrocarbons existed in the soil around the former tank locations. Seven soil borings were drilled around the perimeter of the former tank locations. Up to 280 parts per million (ppm) gasoline range hydrocarbons was detected in a sample collected from a depth of 9.5-10 feet bgs and up to 15 ppm total xylenes were detected in the same sample. Soil samples collected from the other 6 borings contained much lower to non-detectable concentrations of gasoline range hydrocarbons. Up to 24 ppm diesel range hydrocarbons was detected from boring B-4 at a depth of 9.5-10 feet bgs.
- 4) Groundwater sampling conducted in March 2004 as part of this environmental assessment indicated residual amounts of primarily diesel range hydrocarbons to be present in the groundwater beneath the former tank locations (boring B2) and from a location approximately 10 feet to the west of the former tank locations (boring B1). 270 ppb TPHd (diesel range) was detected in a groundwater grab sample collected from boring B2, and 150 ppb TPHd was detected in a groundwater grab sample collected from boring B1. 80 ppb TPHg (gasoline range) and 1.1 ppb toluene was detected in the groundwater sample collected from boring B2. No MTBE was detected in any of the samples.
- Sites listed in the database report are not expected to pose an environmental concern to the Property because they only hold an operating permit (which does not imply a problem), require no further action, or based upon International Geologic's review, are too distant and/or topographically downgradient or crossgradient relative to the Property to reasonably affect it.

DISCUSSION

According to Mr. Geoff Fiedler of the BTMD, the detected levels of hydrocarbons present in the subsurface beneath the Property do not represent a health risk if left in place and do not warrant further investigation at this time. Mr. Fiedler also stated that the Property address will be "flagged" in the city of Berkeley building department permit system, so that any planned digging, excavation or de-watering activities that may expose workers to soil and/or groundwater would require a mitigation plan.

So that future potential Property transfers will not be hindered, Mr. Fiedler will designate the Property as having experienced an "Unauthorized Release", and will then immediately close that case. This way, a records search conducted as part of any future environmental assessment for the Property will show "Case Closed" for the Property address with regard to the hydrocarbon spill. A letter to this effect will be forthcoming from Mr. Fiedler.

CERTIFICATION

I certify that the work presented in this report was performed under my supervision. To the best of my knowledge, the data contained herein is true and accurate, and the work was performed in accordance with professional standards.

Steve Bittman Date
California Registered Environmental Assessor No. 04991

LIMITATIONS

This report was prepared in accordance with guidelines established by the American Society for Testing and Materials (ASTM) Subcommittee on Environmental Assessments for Commercial Real Estate (Standard E-1528, Standard Practice for Environmental Site Assessments: Transaction Screen Process, 2000) and with generally accepted standards of environmental practice in California. This limited assessment was conducted solely for the purpose of evaluating environmental conditions at 1207 Tenth Street, Berkeley California, and is intended to reduce but not eliminate uncertainty regarding the existence of recognized environmental conditions at the property assessed. Evaluation of conditions at and near the site for the purpose of this investigation is made from a limited number of observation points. Environmental conditions may vary away from the observation points available. Further investigation, including additional subsurface exploration and laboratory testing of soil and groundwater samples collected at the site, can aid in evaluating subsurface environmental conditions and reduce the inherent uncertainties associated with this type of limited environmental assessment. Accuracy or completeness of public and proprietary records used to conduct limited assessments of this type is not implied. No soil engineering or geotechnical references are implied nor should be inferred. No evaluation was made for the presence of lead or asbestos on the subject property.

Subject: Request for No Further Action

1207 Tenth Street

Dear Ms. Erasmy,

The City of Berkeley, Toxics Management Division (TMD) has reviewed the "Letter Report Describing Groundwater Sampling..." report dated March 17, 2004 by International Geologic. This report summarizes a limited soil and groundwater quality investigations and provides information on the site environmental history including narrative descriptions of previous underground storage tank removals and summary of the results of soil and groundwater sampling efforts. The underground tank removals, soil and groundwater assessment activities conclude the site restoration activities and the TMD requires no further remedial or investigative action at the site.

Residual gasoline and diesel constituents remain in soil and groundwater at the site. The TMD is satisfied that the known potential sources of contamination have been removed and that the residual soil and groundwater contamination resulting from leaks from the former underground tank systems represents a low to insignificant potential to impact human health or the environment. The TMD will place a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag will consist of a notice requiring building permits to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property.

The applicant or owner may incur additional construction or other costs as a result of soil or water management requirements imposed by the TMD for future development of the site. Hourly charges for TMD's review and oversight of permits or construction activities may also be imposed.

The TMD determination of no further action is based on the subsurface conditions as presented in the reports characterizing the site conditions and on TMD's observations during site visits and inspections. The determination is further based on existing site use and an understanding that the site will be developed for use consistent with the present City of Berkeley zoning requirements. Significant changes in the site conditions, site development, or changes in zoning designation should be reported to the TMD to allow review of this no further action determination.

Page 2 of 2

We will forward an invoice for four hours of staff time, \$480.00. Staff time was used to review the referenced report and closure summary report, update the State Water Resources Control Board's database – GeoTracker, to enter the flag into the City's permit system, to prepare this letter, and to forward a request for no further action to the San Francisco Bay Regional Water Quality Control Board. If you have any questions, please contact me at (510) 981-7467.

Sincerely,

Geoffery A. Fiedler Hazardous Materials Specialist, II

Subject:

Request for No Further Action

1207 Tenth Street

01-3519

B1,

Dear Ms. Graham:

The City of Berkeley, Toxics Management Division (TMD) has reviewed the "Letter Report Describing Groundwater Sampling..." report dated March 17, 2004 by International Geologic. This report summarizes a limited soil and groundwater quality investigations and provides information on the site environmental history including narrative descriptions of previous underground storage tank removals and summary of the results of soil and groundwater sampling efforts. The underground tank removals, soil and groundwater assessment activities conclude the site restoration activities and the TMD requires no further remedial or investigative action at the site.

The TMD is satisfied that the known potential sources of contamination have been removed from the site. The residual soil and groundwater contamination identified in the site investigations represents a low to insignificant potential to impact human health or the environment. The TMD will place a notice (flag) in the City of Berkeley's building permit system to recognize the residual contamination in the subsurface. The permit system flag will require future building permits applications to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property.

Excerpted portions of the International Geologic report and closure summary forms are enclosed for your review. Please give me a call if you have any questions at (510) 981-7467.

Sincerely,

Geoffery A. Fiedler

Hazardous Materials Specialist, II

Request for No Further Action

1207 Tenth Street

Dear Ms. Erasmy,

The City of Berkeley, Toxics Management Division (TMD) has reviewed the "Letter Report Describing Groundwater Sampling..." report dated March 17, 2004 by International Geologic. This report summarizes a limited soil and groundwater quality investigations and provides information on the site environmental history including narrative descriptions of previous underground storage tank removals and summary of the results of soil and groundwater sampling efforts. The underground tank removals, soil and groundwater assessment activities conclude the site restoration activities and the TMD requires no further remedial or investigative action at the site.

Residual gasoline and diesel constituents remain in soil and groundwater at the site. The TMD is satisfied that the known potential sources of contamination have been removed and that the residual soil and groundwater contamination resulting from leaks from the former underground tank systems represents a low to insignificant potential to impact human health or the environment. The TMD will place a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag will consist of a notice requiring building permits to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property.

The applicant or owner may incur additional construction or other costs as a result of soil or water management requirements imposed by the TMD for future development of the site. Hourly charges for TMD's review and oversight of permits or construction activities may also be imposed.

The TMD determination of no further action is based on the subsurface conditions as presented in the reports characterizing the site conditions and on TMD's observations during site visits and inspections. The determination is further based on existing site use and an understanding that the site will be developed for use consistent with the present City of Berkeley zoning requirements. Significant changes in the site conditions, site development, or changes in zoning designation should be reported to the TMD to allow review of this no further action determination.

Site Management Requirements: The Toxics Management Division will place a note in the building permit application system. Building permit applications will be reviewed for underground work, excavation, and dewatering activities. Additional project costs for mitigations may be incurred as a result. Hourly fees for the Toxics Division review of plans will also apply.

V. ADDITIONAL COMMENTS, DATA, ETC.

Include/attach the following as appropriate:

- 1) Site Map indicating source area (tanks/spills) locations, monitoring wells, gradient, etc.
- 2) Site comments worthy of notice area of residual pollution, restrictions, etc.
- 3) For No Further Action, with residual soil or groundwater contamination, identify instrument(s) to manage potential health and environmental concerns.
