Dated: January 28, 2021

CALIFORNIA ENVIRONMENTAL QUALITY ACT ENVIRONMENTAL CHECKLIST FORM INITIAL STUDY (IS 19-25)

1. Project Title: Tiffany DeWitt

2. Permit Number: Major Use Permit, UP 19-13

Initial Study, IS 19-25 Variance, VR 19-02

3. Lead Agency Name and Address: County of Lake

Community Development Department Courthouse – 255 North Forbes Street

Lakeport CA 95453

4. Contact Person: Eric Porter, Associate Planner (707) 263-2221

5. Project Location(s): 2800 Manning Road, Lakeport, CA 95453

APN: 008-009-03

6. Project Sponsor's Name/Address: Tiffany DeWitt

2544 Cleveland Ave., Suite 204

Santa Rosa, CA 95403

7. General Plan Designation: Agriculture

8. Zoning: "A – WW – W - FF"; Agriculture – Waterway – Wetland

- Floodway Fringe

9. Supervisor District: District Four (4)

10. Flood Zone: A, AO

11. Slope: Flat

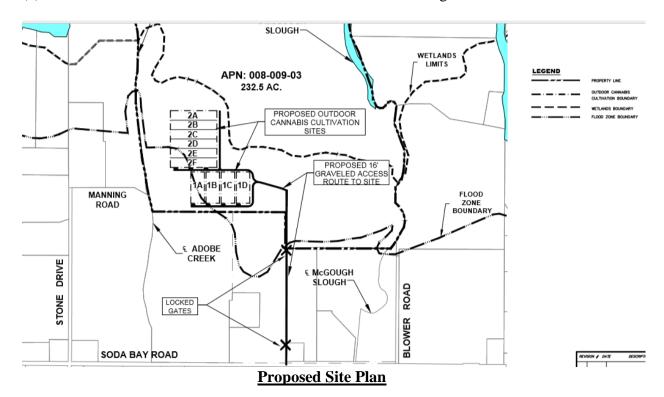

12. Fire Hazard Severity Zone: None

13. Earthquake Fault Zone: None

14. Dam Failure Inundation Area: Not located within Dam Failure Inundation Area

15. Parcel Size: 232 Acres

- 16. Description of Project: (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation. Attach additional sheets if necessary).
 - (10) A-Type 3: "outdoor" licenses: Outdoor cultivation for adult-use cannabis without the use of light deprivation and/or artificial lighting in the canopy area at any point in time from 10,001 square feet to one acre, inclusive, of total canopy size on one premises.
 - (1) A-Type 13 Self Distribution license
 - (1) Variance for consideration to allow outdoor cultivation on high-value farmland

Construction

According to the applicant, the following is in regards to the site preparation and construction:

- Ground disturbance activities will take place over a 1 to 2 month period.
- Materials and equipment will only be staged on previously disturbed areas (the site had been previously used for crop production). No areas will be disturbed for the purpose of staging materials or equipment.
- Proposed construction would occur Monday through Saturday from 9:00 AM to 7:00 PM, and Sunday from 12:00 to 5:00 pm.
- Water from the existing onsite well will be used to mitigate the generation of dust during construction.

All equipment will be maintained and operated to minimize spillage or leakage of hazardous materials. All equipment will be refueled in locations more than 100 feet from surface water bodies. Servicing of equipment will occur on an impermeable surface. In an event of a spill or leak, the contaminated soil will be stored, transported, and disposed of consistent with applicable local, state, and federal regulations.

Post - Construction

• Between 4 and 8 employees per day would occupy the site

- Trips per day estimated at 8 to 24 Average Daily Trips (ADT)
- No greenhouses are proposed
- Chemicals, fuel and fertilizer to be stored in the existing 2000 s.f. barn

17. Surrounding Land Uses and Setting: Briefly describe the project's surroundings:

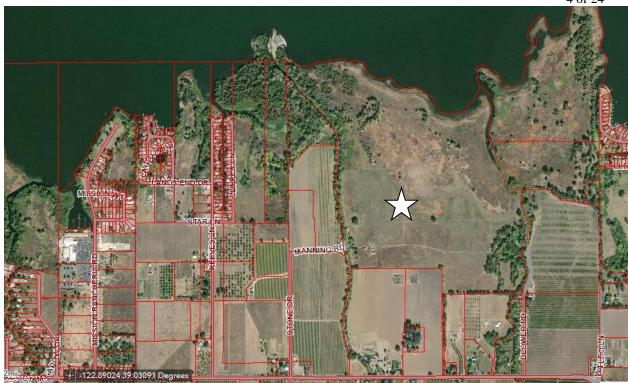

South, East and West: "A" Agriculture. Parcel sizes range from approximately 3.5 to over 100 acres in size. About half of the neighboring properties contain dwellings, and there is significant agricultural activity in this general vicinity. The property to the immediate south is also under review for a commercial cannabis permit.

North: Clear Lake

Zoning of Site and Surrounding Properties

4 of 24

Aerial Photo of Site and Surrounding Properties

Other public agencies whose approval may be required (e.g., Permits, financing approval, or participation agreement.)

Lake County Community Development Department

Lake County Department of Environmental Health

Lake County Air Quality Management District

Lake County Department of Public Works

Lake County Agricultural Commissioner

Lake County Sheriff Department

Lakeport Fire District

South Lake County Fire Protection District (CalFire)

Central Valley Water Resource Control

California Department of Forestry & Fire Protection (CalFire)

California Department of Food and Agriculture (CalCannabis)

California Department of Pesticides Regulations

California Department of Public Health

California Department of Consumers Affairs

18. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.? Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21080.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System

administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3 (c) contains provisions specific to confidentiality.

All 11 Tribes located in Lake County were notified of this proposal on July 26, 2019. No tribal comments were received as the result of the AB 52 notice that was sent out to the tribes.

19. Attachments:

- Property Management Plan
- Site Plan
- Supplemental Material

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

	<u>Aesthetics</u>		Greenhouse Gas Emissions		Population / Housing						
\boxtimes	Agriculture & Forestry		<u>Hazards & Hazardous Materials</u>		Public Services						
\boxtimes	Air Quality		Hydrology / Water Quality		Recreation						
\boxtimes	Biological Resources		Land Use / Planning		Transportation						
\boxtimes	Cultural Resources		Mineral Resources	\boxtimes	<u>Tribal Cultural Resources</u>						
	Geology / Soils		Noise		<u>Utilities / Service Systems</u>						
	Wildfire		Energy	\boxtimes	Mandatory Findings of Significance						
	TERMINATION: (To be the basis of this initial even		mpleted by the lead Agency) ion:

SECTION 1 - EVALUATION OF ENVIRONMENTAL IMPACTS:

Community Development Department

- A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, and then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance

KEY: 1 = Potentially Significant Impact

- 2 = Less Than Significant with Mitigation Incorporation
- 3 = Less Than Significant Impact
- 4 = No Impact

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
					I. AESTHETICS Would the project:	
a) Have a substantial adverse effect on a scenic vista?			X		There are no scenic vistas on or adjacent to the subject site. The project site is located on a property that is flat, and contains structures that will partially or largely obscure the view of the cannabis cultivation area. Manning Road is not a scenic road, and the commercial cannabis cultivation will not cause adverse visual impacts to a scenic vista. Less Than Significant Impact	1, 2, 3, 4, 6, 9
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?			X		There are no scenic resources on the site, such as trees, rock outcroppings or historic buildings. Less Than Significant Impact	1, 2, 3, 4, 6, 9
c) Substantially degrade the existing visual character or quality of public views the site and its surroundings? If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X		The site is accessible from Manning Road, a 20' wide gravel private road. As mentioned, Manning Road is not designated as a scenic road or corridor. The site is not located within an urbanized area. Less Than Significant Impact	1, 2, 3, 4, 6, 9
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X		The project has very little potential to have substantial light or glare impacts on persons enjoying a day or nighttime view in this area. Any security lighting contemplated would have to be downcast and shielded; this is a standard condition of approval for all cannabis cultivation licenses issued by the County. Less than Significant Impact	1, 2, 3, 4, 5, 6, 9

					correspondence.	
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?			X		There are some farming activities in this vicinity, however this site is large (over 230 acres), and has its own access to Manning Road. The site is flat, and the applicant has provided an engineered Stormwater and Erosion Control plan that will mitigate stormwater impacts and water migration onto other neighboring agriculturally productive lots. As proposed, this project would not induce changes to existing farmland that would result in its conversion to non-agricultural use. Less than Significant Impact	1, 2, 3, 4, 5, 7, 8, 11, 13
					III. AIR QUALITY	
Where available, the significance	crite				by the applicable air quality management or air pollution control	district may
		be r	elied	ироп	to make the following determinations.	
					Would the project:	
a) Conflict with or obstruct implementation of the applicable air quality plan?		X			The project has potential to result in air quality impacts by generating fugitive dust emissions through ground-disturbing activities, uncovered soil or compost piles, and vehicle or truck trips on unpaved roads. Fugitive dust will be controlled by wetting soils with a mobile water tank and hose, or by delaying ground disturbing activities until site conditions are not windy, and by eliminating soil stockpiles. Some minor site improvements will be necessary, however the amount of earth that needs to be moved is not significant enough to trigger a grading permit. The staging area for any construction equipment will take place on the portion of the site to be used for employee parking; this area is already disturbed and will not further be degraded by this portion of the site being used as a staging area. Smoke from the burning of brush removed during grading can have a substantial effect on air quality. Lake County Air Quality Management District (LCAQMD) recommends that removed vegetation be chipped and spread for ground cover and erosion control as an alternative to vegetation burning. Odors released as a result of the proposed cannabis growing operation have the potential to result in significant impacts to nearby residents. No significant odor impacts are anticipated from the proposed cultivation operation, due to cyclical flowering and harvesting, the limited population in the area, and the generous setbacks from public roads, property lines, and neighboring residences/outdoor activity areas. The ventilation system of the Processing Facility, in which the processing of raw cannabis plant material from the existing/proposed cultivation area(s) occurs, are equipped with carbon filters/air scrubbers to mitigate odors emanating from the building. The applicant plans on using fabric pots rather than in-ground planting to enable the applicant to provide higher quality soil. This will also result in less dust-related particulates. There is no mapped serpentine soil on the site, although some serpentine soil exi	1, 3, 4, 5, 10, 21, 24, 31, 36
					Less Than Significant with Mitigation Measures added:	
					AQ-1: Prior to obtaining the necessary permits and/or approvals for any phase, applicant shall contact the Lake County Air Quality Management	

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
					District and obtain an Authority to Construct (A/C) Permit for all diesel powered equipment and/or other equipment with potential for air emissions.	
					AQ-2: All mobile diesel equipment used must be in compliance with State registration requirements. Portable and stationary diesel powered equipment must meet the requirements of the State Air Toxic Control Measures for CI engines.	
					AQ-3: The applicant shall maintain records of all hazardous or toxic materials used, including a Material Safety Data Sheet (MSDS) for all volatile organic compounds utilized, including cleaning materials. Said information shall be made available upon request and/or the ability to provide the Lake County Air Quality Management District such information in order to complete an updated Air Toxic emission Inventory.	
					AQ-4: All vegetation during site development shall be chipped and spread for ground cover and/or erosion control. The burning of vegetation, construction debris, including waste material is prohibited.	
					AQ-5: The applicant shall have the primary access and parking areas surfaced with chip seal, asphalt or an equivalent all weather surfacing to reduce fugitive dust generation. The use of white rock as a road base or surface material for travel routes and/or parking areas is prohibited.	
					AO-6: All areas subject infrequent use of driveways, over flow parking, etc., shall be surfaced with gravel. Applicant shall regularly use and/or maintain graveled area to reduce fugitive dust generations.	
b) Violate any air quality standard or result in a cumulatively considerable net increase in an existing or projected air quality violation?			X		The County of Lake is in attainment of state and federal ambient air quality standards. Burning cannabis waste is prohibited within the commercial cannabis ordinance for Lake County, and use of generators is only allowed during a power outage. On-site construction is likely to occur over a relatively short period of time (estimated between 1 to 2 months), and minimal construction would be required to build a processing building. It is unlikely that this use would generate enough particulates during and after construction to violate any air quality standards.	1, 3, 4, 5, 10, 21, 24, 31, 36
					Less than Significant Impact	
c) Expose sensitive receptors to substantial pollutant concentrations?			X		The nearest residence appears to be located approximately 1800 feet to the northwest according to Lake County GIS parcel map measurements. This neighboring house is generally located upwind of the normal prevailing wind direction in this area; prevailing winds typically originate from the north / northwest and blow to the south / southeast. Also, the neighboring lot has applied for a different commercial cannabis cultivation license that is currently under review.	1, 3, 4, 5, 10, 21, 24, 31, 36
					Less than Significant Impact	

						11 of 24
IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
d) Result in substantial emissions (such as odors or dust) adversely affecting a substantial number of people?		X			Although the cultivation area is rather large at approximately 15 acres, the overall site is over 230 acres in size, and minimal site disturbance is needed to implement the project as proposed. The applicant will be required to submit an Odor Control Plan as a condition of approval, and will need to mitigate outdoor cultivation areas through the use of odormasking means such as fragrant plants around the perimeter of the outdoor growing area. Implementation of mitigation measures AQ-1 through AQ-6 will reduce impacts to less than significant.	1, 2, 3, 4, 5, 10, 21, 24, 31, 36
			IV	7.]	BIOLOGICAL RESOURCES Would the project:	
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		X			The applicant provided a Biological Assessment prepared by Jacobzoon and Associates, dated December 5, 2018. The Assessment concluded that there may be some potential for bat roosting areas in the eaves of the barn on site, and that there could by ground-nesting birds in the vicinity of the cultivation areas although no nests were discovered. The following mitigation measures are the result of the conclusions of the Biological Assessment. BIO-1: If project activities occur during the breeding season (March 1 through August 31), a qualified biologist shall conduct a breeding survey no more than 14 days prior to project activities to determine if any birds are nesting on the ground either on or adjacent to the study area. If nests are discovered, the biologist shall establish a buffer around the nests that shall remain an undisturbed area until the end of the nesting season. BIO-2: If initial ground disturbance occurs during the bat maternity roosting season (April 1 through September 1), a qualified biologist shall conduct a bat roost assessment of trees within 100 feet of the proposed construction. If bat maternity roosts are present, the biologist shall establish an appropriate exclusion zone around the maternity roost. BIO-3: All workers on crew shall be trained by a qualified biologist as to the sensitivity of the Foothill Yellow-Legged Frog, California Giant Salamander, and Red-Bellied Newt that can potentially be found on the property. No construction activities shall occur during rain events, defined as ½ inch of rain falling within a 72-hour period. Construction activities shall resume 72 hours after the end of the rain event. All work areas shall be checked daily prior to the start of work to ensure that no special-status species are within the proposed work zone. Less than Significant Impact with mitigation measures BIO-1 through BIO-3.	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34

12 of 24

b) Have a substantial adverse effect on any ripartan habitat or other emissive manural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Game or U.S. Fish and Middlife Service? 1) Have a substantial adverse effect on state or federally protected weltands, (including, but not limited to, marsh, vernal pool, coastal, etc.) brough direct removal, filling, hydrological interruption, or other means? 2) Interfere substantially with the movement of any mative resident or migratory fish or wildlife protected weltands and verse effect on state or other means? 3) Less than Significant Impact 1) Less than Significant Impact 2) Less than Significant Impact 3) 3, 3, 3 2) Less than Significant Impact 2) Less than Significant Impact 3) Less than Significant Impact 3) Less than Significant Impact 4) Less than Significant Impact 5) Conflict with the provisions of native wildlife nursery sites? 4) Conflict with the provisions of native wildlife nursery sites? 5) Conservation policy or ordinances protecting biological resources, such as a tree preservation policy or ordinances protecting biological resources. The trees on site of native wildlife nursery sites? 6) Conflict with the provisions of native wildlife nursery sites? 6) Conflict with the provisions of native wildlife nursery sites? 7) Conservation Plan, or other approved local, regional, or state habitat conservation plan? 8) A Calural Resource Evaluation was conducted for this site and no impacts are anticipated. 8) Calural Resource Evaluation concluded that no significant materials were encountered during to significant materials were encountered during to evaluate the find(s) and recommend m							12 of 24
D) Have a substantial adverse effect on any ripartan habitat or other sensitive natural community dendificid no load or regional plans, policies, and regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		1	2	3	4	Reference to documentation, sources, notes and	Source Number**
effect on state or federally protected wethands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory fish or wildlife species or with established native resident or migratory fish or wildlife species or with established native resident or migratory fish or wildlife species or with established native resident or migratory fish or wildlife species or with established native resident or migratory fish or wildlife species or with estably state? e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? This project does not conflict with any local policies or ordinances protecting biological resources. The trees on site biological resources, such as a tree preservation plane? East han Significant Impact The provided in the Biological Study submitted stated that there were no observed native resident or migratory fish or wildlife species or with the study area. Less than Significant Impact This project does not conflict with any local policies or ordinances protecting biological resources. The trees on site biological resources as a tree preservation plane as tree preservation plane. 1) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? V. CULTURAL RESOURCES Would the project: a) Cause a substantial adverse change in the significance of a historical resource pursuant to 8 \$15064.5? The Cultural Resources Evaluation was conducted for the subject January 26, 2019. The Cultural Resources Deviation measures to be added: CUL-1: Should any archaeological, paleontological, or cultural materials be discovered during site development, all activity shall be halted in the vic	effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Game or U.S. Fish and			X		The site contains no mapped riparian habitats or other mapped sensitive natural communities identified on local or state plans or mapping programs available to Lake County.	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 29, 30, 31, 32, 33, 34
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological			X		species on the subject site, which is consistent with the data provided in the Biological Study regarding wetlands.	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
e) Conflict with any local policies or ordinances protecting biological resources. Such as a tree preservation policy or ordinance? X	d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of			X		observed native resident or migratory fish or wildlife species within the study area.	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? V. CULTURAL RESOURCES Would the project: a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5? X A Cultural Resources Evaluation was conducted for the subject parcel involved with this proposal by Jay Flaherty dated January 26, 2019. The Cultural Resources Evaluation concluded that no significant historic or prehistoric cultural materials were encountered during the field inspection, and that it has been determined that no significant cultural sites exist on the parcel. The relatively large scope of the project warrants the following mitigation measures to be added: CUL-1: Should any archaeological, paleontological, or cultural materials be discovered during site development, all activity shall be halted in the vicinity of the find(s), the local overseeing Tribe shall be notified, and a qualified archaeologist retained to evaluate the find(s) and recommend mitigation procedures, if necessary, subject to the approval of the Community Development Director. Should any human remains be encountered, they shall be treated in accordance with Public Resources Code Section	e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or			X		ordinances protecting biological resources. The trees on site on and near the cultivation area are primarily introduced / non-native. There are no mapped sensitive species on the site.	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5? X A Cultural Resources Evaluation was conducted for the subject parcel involved with this proposal by Jay Flaherty dated January 26, 2019. The Cultural Resources Evaluation concluded that no significant historic or prehistoric cultural materials were encountered during the field inspection, and that it has been determined that no significant cultural sites exist on the parcel. The relatively large scope of the project warrants the following mitigation measures to be added: CUL-1: Should any archaeological, paleontological, or cultural materials be discovered during site development, all activity shall be halted in the vicinity of the find(s), the local overseeing Tribe shall be notified, and a qualified archaeologist retained to evaluate the find(s) and recommend mitigation procedures, if necessary, subject to the approval of the Community Development Director. Should any human remains be encountered, they shall be treated in accordance with Public Resources Code Section	an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state					and no impacts are anticipated. No Impact	1, 2, 3, 4, 5, 11, 12, 13, 16, 17, 21, 24, 29, 30, 31, 32, 33, 34
change in the significance of a historical resource pursuant to \$15064.5? Description of the proposal by Jay Flaherty dated January 26, 2019. The Cultural Resources Evaluation concluded that no significant historic or prehistoric cultural materials were encountered during the field inspection, and that it has been determined that no significant cultural sites exist on the parcel. The relatively large scope of the project warrants the following mitigation measures to be added: CUL-1: Should any archaeological, paleontological, or cultural materials be discovered during site development, all activity shall be halted in the vicinity of the find(s), the local overseeing Tribe shall be notified, and a qualified archaeologist retained to evaluate the find(s) and recommend mitigation procedures, if necessary, subject to the approval of the Community Development Director. Should any human remains be encountered, they shall be treated in accordance with Public Resources Code Section				,	V.		
5097.98 and Health and Safety Code 7050.5. CUL-2: All employees shall be trained in recognizing	change in the significance of a historical resource pursuant to			X		parcel involved with this proposal by Jay Flaherty dated January 26, 2019. The Cultural Resources Evaluation concluded that no significant historic or prehistoric cultural materials were encountered during the field inspection, and that it has been determined that no significant cultural sites exist on the parcel. The relatively large scope of the project warrants the following mitigation measures to be added: CUL-1: Should any archaeological, paleontological, or cultural materials be discovered during site development, all activity shall be halted in the vicinity of the find(s), the local overseeing Tribe shall be notified, and a qualified archaeologist retained to evaluate the find(s) and recommend mitigation procedures, if necessary, subject to the approval of the Community Development Director. Should any human remains be encountered, they shall be treated in accordance with Public Resources Code Section 5097.98 and Health and Safety Code 7050.5.	1, 3, 4, 5, 11, 14, 15

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
					potentially significant artifacts that may be discovered during ground disturbance. If any artifacts or remains are found, the local overseeing Tribe shall immediately be notified; a licensed archaeologist shall be notified, and the Lake County Community Development Director shall be notified of such finds.	
					Less than Significant Impacts with Mitigation Measures CUL-1 and CUL-2 added.	
b) Cause a substantial adverse change in the significance of an archeological resource pursuant			X		Please see response to Section V(a). The applicant is proposing minimal site disturbance.	1, 3, 4, 5, 11, 14, 15
to §15064.5?					Less than Significant Impact	
c) Disturb any human remains, including those interred outside of formal cemeteries?		X			Please see response to Section V(a). The Cultural Study stated that it was unlikely that any significant findings, including human remains, appear likely on this site. The amount of new site disturbance that would occur is minimal.	1, 3, 4, 5, 11, 14, 15
					Less than Significant Impact with mitigation measures CUL-1 and CUL-2 added	
					VI. ENERGY Would the project:	
a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?			X		The applicant states that she will use an on-grid power system as the primary energy source. The outdoor cultivation areas will have minimal need for power. The likely power sources include the security system, the well pump, and any outdoor security lighting that might be needed in the future. Less than Significant Impact	1, 3, 4, 5, 11, 14, 15
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X		There are no mandatory energy reductions for cultivation activities within Article 27 of the Lake County Zoning Ordinance unless the applicant proposes 'indoor cultivation' (not proposed with this application). Less than Significant Impact	1, 3, 4, 5, 11, 14, 15
			,	VII.	GEOLOGY AND SOILS Would the project:	
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: i) Rupture of a known earthquake fault, as delineated on the most recent Alquist- Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication			X		Earthquake Faults There are no mapped earthquake faults on or adjacent to the subject site. Seismic Ground Shaking and Seismic–Related Ground Failure, including liquefaction. The mapping of the site's soil indicates that the soil is stable and not prone to liquefaction. Landslides According to the Landslide Hazard Identification Map prepared by the California Department of Conservation, Division of Mines and Geology, the area is considered generally stable. Less Than Significant Impact	1, 3, 4, 5, 6, 7, 10, 17, 18, 19, 21, 24, 25
42. ii) Strong seismic ground						

				1		14 of 24		
IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**		
shaking?					Солгоромичес			
iii) Seismic-related ground failure, including liquefaction?								
iv) Landslides?								
b) Result in substantial soil erosion or the loss of topsoil?			X		Minimal grading and/or earth movement will result with this project. The applicant will need to import soil for the pots, however this will not have any effect on the potential for erosion or the loss of topsoil.	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 30		
					Less than Significant Impact			
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on-site or off- site landslide, lateral spreading,			X		The site is flat; there is little risk of landslides on this property. The applicant will use existing cultivation areas and aboveground pots. The soil on the site is mapped as 'stable' on the County GIS data base. Additionally, minimal construction will occur for the proposed infrastructure.	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 30		
subsidence, liquefaction or collapse?					Less Than Significant Impact			
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?			X		The mapped soil on the cultivation portion of the site has high shrink-swell potential. Surface runoff is slow, and the hazard of erosion is slight. This soil is subject to rare periods of flooding or ponding during prolonged, high-intensity storms, and the entire site is located in a flood plain.	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 30		
					Less Than Significant Impact			
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water?			X		The project site will be served through an existing on-site septic system. The +232 acre site is large enough to support the existing in-ground septic system. Less Than Significant Impact	1, 3, 4, 5, 6, 7, 10, 16, 17, 18, 19, 21, 24, 25, 29, 30		
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			X		There will be minimal ground disturbances occurring with this project to prepare the site for the complete cultivation area, which indicated that there are no unique paleontological or geologic features on the site.	1, 3, 4, 5, 11, 14, 15		
					Less Than Significant Impact			
VIII. GREENHOUSE GAS EMISSIONS Would the project:								
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X		In general, greenhouse gas emissions come from construction activities (vehicles) and from post-construction activities (vehicles primarily). Burning plant material is prohibited in Lake County, and projected trips generated will be between 8 and 24 per day during and after construction.	1, 3, 4, 5, 21, 24, 29, 30, 31, 32, 34, 36		
					Less than Significant Impact			
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X		This project will not conflict with any adopted plans or policies for the reduction of greenhouse gas emissions. Less than Significant Impact	1, 3, 4, 5, 21, 24, 29, 30, 31, 32, 34, 36

	X. HYDROLOGY AND WATER QUALITY										
Would the project:											
a) Violate any water quality		X			The project parcel is current served by an existing onsite septic	1, 3, 4, 5,					
standards or waste discharge					and well, and is located entirely within a flood zone. Staff has	13, 21, 23,					
requirements or otherwise					discussed this type of situation, and has required all planting	24, 25, 29,					
substantially degrade surface or					pots to be removed between November 1, and April 1 of each	31, 32, 33,					
ground water quality?					year in the event of Clear Lake flooding.	34					
					The following mitigation measure is needed to ensure that						
					safety precautions are put in place to minimize the transfer of						
					pesticides and fertilizers from the pots into Clear Lake, which						
					contains the 'hitch', an endangered fish:						
1											
					HYD-1: The applicant shall remove all pots from the						
					property no later than November 1 of each year, and will						
					return the pots no earlier than April 1 of each year for the						
					duration of the project.						
					Less Than Significant Impact with mitigation measure						
					HYD-1 added						
b) Substantially decrease			X		The cultivation site was previously disturbed by a legal	1, 3, 4, 5,					
groundwater supplies or interfere					medicinal marijuana cultivation that occurred during 2017 and	13, 21, 23,					
substantially with groundwater					2018 under former Article 72 of the Lake County Zoning	24, 25, 29,					
recharge such that the project					Ordinance (article 72 has since been removed). The project	31, 32, 33,					
may impede sustainable					would not alter a stream or river, nor would it substantially	34					
groundwater management of the					increase the amount of runoff that would result in flooding.						
basin?					There are no above-ground water sources near the cultivation						
					area.						
					Less than Significant Impact						
c) Substantially alter the existing			X		The applicant has stated that the total cultivation area is about	1, 3, 4, 5,					
drainage pattern of the site or					10 acres in size. The outdoor cultivation area will remain	13, 21, 23,					
area, including through the					permeable, since above-ground pots can act as water	24, 25, 29,					
alteration of the course of a					absorption, since water can pass through the above-ground pots	31, 32, 33,					
stream or river or through the					and be absorbed into the soil. The total non-permeable surface	34					
addition of impervious surfaces,					area is 4,400 s.f. (the existing barn and a new processing

sources of polluted runoff; iv) Impede or redirect flood flows?						
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?			X		The project site is located in an AE flood plain, so special consideration will be given to any structures that are established on the site, primarily regarding method of attachment to the ground. Engineered footings are required for any building proposed on this site. The project shall adhere to all Federal, State and Local agency flood-zone related requirements.	1, 3, 4, 5, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34
					Less than Significant Impact	
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X		The proposed use will not conflict with or obstruct the implementation of water quality control plan or ground water management plan as all hazardous materials including pesticides and fertilizers will be stored in a locked / secured shed, and will meet all Federal, State and Local agency requirements for hazardous material storage and handling.	1, 3, 4, 5, 10, 13, 21, 23, 24, 25, 29, 31, 32, 33, 34
					Less than Significant Impact	
			X	[. I	LAND USE AND PLANNING Would the project:	
a) Physically divide an established community?				X	The proposed project site would not physically divide an established community. The driveway leading to the site from Manning Road terminates on the site and does not divide any portion of the property.	1, 3, 4, 5, 6, 35
					No Impact	
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for			X		This project is consistent with the Lake County General Plan, the Lakeport Area Plan and the Lake County Zoning Ordinance.	1, 3, 4, 5, 20, 21, 22, 27, 28
the purpose of avoiding or mitigating an environmental					Less than Significant Impact	
effect?				XII.	MINERAL RESOURCES	
			•	A11.	Would the project:	
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the				X	The Aggregate Resource Management Plan (ARMP) does not identify this project as having an important source of aggregate.	1, 3, 4, 5, 26
state?					No Impact	
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use				X	The County of Lake's General Plan, the Lakeport Area Plan nor the Lake County Aggregate Resource Management Plan designates the project site as being a locally important mineral resource recovery site.	1, 3, 4, 5, 26
plan?					No Impact	
	l			W	XIII. NOISE 'ould the project result in:	
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of		X			Short-term increases in ambient noise levels to uncomfortable levels could be expected during project grading and/or construction. Mitigation measures will decrease these noise levels to an acceptable level.	1, 3, 4, 5, 13

						18 of 24		
IMPACT			_		All determinations need explanation.	Source		
CATEGORIES*	1	2	3	4	Reference to documentation, sources, notes and	Number**		
					correspondence.			
standards established in the local general plan or noise ordinance, or applicable standards of other agencies?					Less Than Significant with the following mitigation measures incorporated:			
					NOI-1: All construction activities including engine warm-up shall be limited Monday Through Friday, between the hours of 7:00am and 7:00pm to minimize noise impacts on nearby residents. Back-up beepers shall be adjusted to the lowest allowable levels. This mitigation does not apply to night work.			
					NOI -2: Maximum non-construction related sounds levels shall not exceed levels of 55 dBA between the hours of 7:00AM to 7:00PM and 45 dBA between the hours of 10:00PM to 7:00AM within residential areas as specified within Zoning Ordinance Section 21-41.11 (Table 11.1) at the property lines.			
					NOI-3: The operation of the Air Filtration System shall not exceed levels of 57 dBA between the hours of 7:00AM to 10:00PM and 50 dBA from 10:00PM to 7:00AM within residential areas as specified within Zoning Ordinance Section 21-41.11 (Table 11.2) measured at the property lines.			
					Less than Significant Impact with mitigation measures added			
b) Generation of excessive groundborne vibration or groundborne noise levels?			X		The project is not expected to create unusual groundborne vibration due to facility operation. The low level truck traffic during construction and for deliveries would create a minimal amount of groundborne vibration.	1, 3, 4, 5, 13		
					Less than Significant Impact			
			XIV	. Р	POPULATION AND HOUSING Would the project:			
a) Induce substantial unplanned				X	The project will not induce population growth.	1, 3, 4, 5		
population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?					No Impact			
b) Displace substantial numbers of existing people or housing, necessitating the construction of				X	No housing will be displaced as a result of the project.	1, 3, 4, 5		
replacement housing elsewhere?					No Impact			
representational research	XV. PUBLIC SERVICES Would the project:							
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios,				X	The project does not propose housing or other uses that would necessitate the need for new or altered government facilities. There will not be a need to increase fire or police protection, schools, parks or other public facilities as a result of the project's implementation. No Impact	1, 3, 4, 5, 13, 17, 20, 21, 22, 23, 24, 27, 28, 29, 30, 31, 32, 33, 34, 36, 37		

						19 of 24

response times or other performance objectives for any of the public services: - Fire Protection? - Police Protection? - Schools? - Parks? - Other Public Facilities?					- Correspondences			
				3	XVI. RECREATION Would the project:			
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				X	The project will not have any impacts on existing parks or other recreational facilities. No Impact	1, 3, 4, 5		
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X	This project will not necessitate the construction or expansion of any recreational facilities. No Impact	1, 3, 4, 5		
	XVII. TRANSPORTATION Would the project:							
a) Conflict with a plan, ordinance or policy addressing the circulation system, including transit, roadways, bicycle lanes and pedestrian paths?			X		The proposed project site is accessed from Manning Road, a 20' wide gravel private road, which leads to Soda Bay Road, a paved County maintained road with 10' travel lanes and 2' wide shoulders. A minimal increase in traffic is anticipated due to construction, maintenance and weekly and/or monthly incoming and outgoing deliveries through the use of van-type delivery vehicles. Daily employee trips are anticipated to be between 8 and 24 trips. There are no known capacity issues with Manning or Soda Bay Road.	1, 3, 4, 5, 9, 20, 22, 27, 28, 35		
					Less than Significant Impact			
b) For a land use project, would the project conflict with or be inconsistent with CEQA guidelines section 15064.3, subdivision (b)(1)?			X		CEQA chapter 15064.3, subdivision (b)(1) requires analysis for thresholds of significance for a land use project. Projects in Lake County that produce more than 50 average daily trips (ADT) are looked at more carefully than smaller land use projects such as this one, and projects that generate 200 or more ADT require a traffic impact study. The site will use Manning Road, a gravel private road which connects with Soda Bay Road, a paved County maintained road.	1, 3, 4, 5, 9, 20, 22, 27, 28, 35		
				37	Less than Significant Impact	12450		
c) For a transportation project, would the project conflict with or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(2)?				X	The project will not conflict with or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(2). No Impact	1, 3, 4, 5, 9, 20, 22, 27, 28, 35		
d) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X		No changes to Manning or Soda Bay Road are proposed, nor do any appear to be needed. Less than Significant Impact	1, 3, 4, 5, 9, 20, 22, 27, 28, 35

d) Generate solid waste in excess of State or local standards or in excess of the capacity of local infrastructure?			X		The existing landfill has sufficient capacity to accommodate the project's solid waste disposal needs for the next 5 years according to Lars Ewing, Manager of Public Services in Lake County. Less than Significant Impact	1, 3, 4, 5, 28, 29, 32, 33, 34, 36
e) Negatively impact the provision of solid waste services or impair the attainment of solid waste reduction goals?			X		The applicant will chip and spread the cannabis waste on site, and the estimated total amount of solid waste from this project is about 400 pounds annually. Less than Significant Impact	1, 3, 4, 5, 29, 32, 33, 34, 36
f) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			X		The County uses a standard condition of approval regarding compliance with all federal, state and local management for solid waste. The cultivator must chip and spread any vegetative waste on-site, and the estimated total amount of solid waste from this project is 400 to 800 pounds annually. Less than Significant Impact	1, 3, 4, 5, 29, 32, 33, 34, 36

					XX. WILDFIRE	
If located in or nea project:	r stai	te res	ponsi	ibility	areas or lands classified as very high fire hazard severity zones	, would the
a) Impair an adopted emergency response plan or emergency evacuation plan?			X		The subject site is in an area that has historically been used for crop production, and is largely devoid of natural landscape (and naturally growing fire fuel). The fire risk on the site is low. Should this site need to evacuate, Manning and Soda Bay Roads are County maintained paved roads with multiple outlets located near the subject site. Less than Significant Impact	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?			X		The site and surrounding lots are flat and generally devoid of vegetation other than some introduced trees. Approval of this project will not increase the fire risk in this area. Although pollutant impact from any wildfire is a serious risk, this site is located in an area that is unlikely to be affected by a wildfire. Less than Significant Impact	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?			X		The site is served primarily by Manning Road, a well maintained private gravel road. No other infrastructural improvements appear to be necessary for this project. Less than Significant Impact	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?			X		The site is flat; there is little chance of risks associated with post-fire slope runoff, instability or drainage changes based on the lack of site changes that would occur by this project. Less than Significant Impact	1, 2, 4, 5, 6, 20, 23, 31, 35, 37, 38
instance or an instan	X	XI.	N	IANI	DATORY FINDINGS OF SIGNIFICANCE	
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?		X			The project proposes cultivation of commercial cannabis in previously disturbed area. As proposed, this project is not anticipated to significantly impact habitat of fish and/or wildlife species or cultural resources with the incorporated mitigation measures described above.	All

IMPACT CATEGORIES*	1	2	3	4	All determinations need explanation. Reference to documentation, sources, notes and correspondence.	Source Number**
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?		X			Potentially significant impacts have been identified related to Agriculture, Air Quality, Biological Resources, Cultural / Tribal Resources, Hydrology and Noise. These impacts in combination with the impacts of other past, present and reasonably foreseeable future projects could cumulatively contribute to significant effects on the environment. Implementation of and compliance with mitigation measures identified in each section as project conditions of approval would avoid or reduce potential impacts to less than significant levels and would not result in cumulatively considerable environmental impacts.	All
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?		X			The proposed project has potential to result in adverse indirect or direct effects on human beings. In particular, to Agriculture, Air Quality, Biological Resources, Cultural / Tribal Resources, Hydrology and Noise have the potential to impact human beings. Implementation of and compliance with mitigation measures identified in each section as conditions of approval would not result in substantial adverse indirect or direct effects on human beings and impacts would be considered less than significant.	All
