Work Plan No.:	<u>5998-B</u>
Work Plan Title:	<u>City of Jackson Martell Reservoir Replacement Project</u>
Work Plan Submittal Date:	<u>4/3/2020</u>

Scope of Technical Assistance

The City of Jackson operates a water system with 2168 connections serving a population of 4686 customers. State inspections of the system concluded that the current storage reservoir, built in the 1970's, is in disrepair and is undersized. Currently the estimated 1.5-million-gallon reservoir is antiquated infrastructure that no longer meets today's design standards. The steel beams are rusted, and many holes exist through the sheet metal roof of this earth entrenched pit. Furthermore, the system needs additional storage capacity, particularly since it is potentially vulnerable to wildfire risks. Per recommendation by the Division of Drinking Water, RCAC will assist the City of Jackson with applying to construction funding to replace the existing reservoir with a larger, more modern design.

RCAC's primary role is to assist with preparation and submission of Drinking Water State Revolving Fund (DWSRF) planning application. RCAC will assist with the Request for Proposal/Qualifications (RFP/RFQ) to procure a subcontractor to provide a scope of the project during this planning phase. This subcontractor will also develop technical and environmental documents for the project moving forward.
