## **Summary Form for Electronic Document Submittal**

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Naticchioni Twin View Sewer Floodplain and Floodway En	croachment Project
_ead Agency: City of Redding	
Contact Name: Lily Toy	
Email: Itoy@cityofredding.org	Phone Number: <u>530-245-7231</u>
Project Location: Redding, Shasta County	
City	County
Project Description (Proposed actions, location, and/or consequences).	
Use Permit Application UP-2021-00190 to allow a sewer line, to support to Boulevard, to encroach within the 100-year floodplain and floodway of Boulevard, to encroach within the 100-year floodplain and floodway of Boulevard public 400 feet in length and is proposed within the Twin View Boulevard public	oulder Creek. The sewer line is approximately
dentify the project's significant or potentially significant effects and briefly would reduce or avoid that effect.	describe any proposed mitigation measures that
The project has a moderate potential to support pesting hirds. Tree remo	oval is not proposed with the installation of this

The project has a moderate potential to support nesting birds. Tree removal is not proposed with the installation of this sewer line project. Indirect effects such as increased noise levels and increased human activity could lead to nest abandonment by adults. Most birds expected to occur on the site nest between February 1 and August 31. If work must occur during the nesting season, a nesting survey should be conducted in advance of any construction. Therefore, if construction activities will occur during the nesting season for migratory birds (February 1 through August 31), preconstruction survey must be conducted and appropriate protocols shall be followed.

None.
