Executive Summary

Roux Associates, Inc. (Roux) has performed a Phase I Environmental Site Assessment (ESA) and a Focused Phase II environmental subsurface Investigation at 2740 Jones Road, Walnut Creek, California (Property). This Phase I ESA was performed on behalf of SummerHill Homes, Inc. (User). Roux understands that the User plans to redevelop the Property for residential use.

The Property is located at 2740 Jones Road in a mixed residential and commercial area to the east of Interstate 680 in Walnut Creek, California. The area of the Property is approximately 5.72 acres and is currently occupied by a private elementary school. The associated Assessor Parcel Numbers (APNs) are provided in the table below.

Parcel Number	Associated Address
172-012-001-1	No Address
172-012-007-8	2770 Jones Road
172-012-008-6	2747 Oak Road and 2740 Jones Road
172-012-020-1	2740 Jones Road
172-012-021-9	2731 Oak Road and 2740 Jones Road
172-012-023-5	2751 Oak Road and 2740 Jones Road
172-012-025-0	2776 Oak Road and 2740 Jones Road
172-012-026-8	2771 Oak Road

The Property was mostly utilized for orchards between at least 1939 and the 1960s, when several of the current buildings associated with Palmer School for Boys and Girls were developed. However, the school had been running in some form at the Property since the 1940s. The school was closed in June 2020.

The Property contains three irrigation wells. One of the wells is located in the school courtyard in the southern portion of the Property, reportedly set at a depth of approximately 60 feet below ground surface (bgs). The remaining two irrigation wells are located along the northern boundary of the Property behind the buildings at 2747 Oak Road and 2771 Oak Road and are reportedly not active and the depths are unknown. See Figure 2 for the location of the irrigation wells.

The Phase I ESA was performed to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and/or historical recognized environmental conditions (HRECs) at the Property, indicating past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Property's soil, groundwater, or surface water. The ESA was conducted by investigating past Property uses, reviewing the results of a search of environmental databases, reviewing records at relevant government agencies, and performing a Property reconnaissance.

One REC was identified at the Property:

- Approximately 25 years ago, a 50-gallon UST thought to have contained gasoline was reportedly removed behind the building at 2771 Oak Road. No staining or odors were observed in the underlying soil, but the UST was removed without proper oversight and no soil samples were collected below the UST. Although no indication of a release has been reported at the Property and the tank was relatively small, it is possible that releases from the gasoline UST could have historically occurred, which is considered a REC.

Two environmental concerns were identified at the Property that do not rise to the level of a REC but are considered business environmental risks (BER):

1. The Property was utilized for orchards between at least 1939 and the 1960s. Potential residual pesticide impacts in shallow soils are considered a BER; and
2. The Property contains three irrigation wells. Since these wells would need to be properly decommissioned prior to redevelopment, they are considered a BER.

Roux conducted environmental subsurface investigations to assess the REC and BER 1 identified in the Phase I ESA between August and December 2020. A total of nine borings (RB-1 through RB-9) were advanced at the Site and soil, soil vapor, and groundwater samples were collected. The sampling locations are shown on Figure 3. The sampling results were compared to San Francisco Bay Regional Water Quality Control Board Residential Environmental Screening Levels (ESLs) as well as the San Francisco Bay Area natural background concentrations in soil, specifically for arsenic.

The soil sampling results indicate that all detections were below the applicable Residential ESLs and natural background levels, including samples collected from RB-2, RB-6, and RB-9 based on elevated PID readings during logging.

Benzene in soil vapor from all five soil vapor probes (RB-2 and RB-6 through RB-9) exceeded the RWQCB Residential ESL of 3.2 micrograms per cubic meter (µg/m³)at concentrations ranging from 6.9 µg/m³ (RB - 9 SV) to 16 µg/m³ (RB-7-SV). However, these concentrations are relatively low and soil oxygen concentrations in soil vapor indicate that conditions in soil in the vicinity of RB-2 are favorable to the natural degradation of petroleum hydrocarbons. In addition, the groundwater investigation confirmed that no benzene source exists in groundwater in the vicinity of RB-2.

As a precautionary measure, soil aeration will be utilized as the mitigation measure to address the benzene detected in soil vapor. Soil aeration consists of spreading excavated soil on the ground in an approximately 18-inch-thick layer. Mixing of the soil (tilling) will be performed regularly to maintain aerobic conditions (presence of oxygen). The soil will be thoroughly tilled using equipment such as a Terex RS600 Reclaimer/Stabilizer. The proposed excavation area is approximately 30 feet long by 20 feet wide and 6 feet deep with a total volume of 135 cubic yards. A total of six tilling passes will be performed. Soil and soil vapor sampling will be performed at the end of tilling operations prior to backfill. Soil vapor samples will also be collected from compacted backfill to confirm no soil vapor impacts in the soils.

If soil vapor exceedances are identified after soil excavation and aeration, a Soil Management Plan will be prepared and forwarded to an appropriate environmental agency for disposition.

This Focused Phase II has adequately investigated the scope of the REC and BER-1. The sampling results for pesticides eliminates BER-1 as a potential risk at the Site. In addition, the mitigation measure will reduce the risk of benzene vapor to below a level of significance.

1. Introduction

At the request of SummerHill Homes, Inc. (User), Roux Associates, Inc. (Roux) performed a Phase I Environmental Site Assessment (ESA) and a Focused Phase II environmental subsurface investigation (Focused Phase II) at 2740 Jones Road, California (Property). The Property location is shown in Figure 1.

The Phase I ESA was conducted in accordance with the scope of work presented in the proposal submitted by Roux on July 20, 2020 and in general accordance with the American Society of Testing and Materials' (ASTM) International Standard Practice E1527-13 (Standard Practice for Environmental Site Assessments), consistent with the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) Rule (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule[1]). The preamble for the AAI Rule states:

> *In today's final rule, EPA is referencing the standards and practices developed by ASTM International and known as Standard E1527-05 (entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process") and recognizing the E1527-05 standard as consistent with today's final rule. The Agency determined that this voluntary consensus standard is consistent with today's final rule and is compliant with the statutory criteria for all appropriate inquiries. Persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-05 standard to comply with today's final rule.*[2]

This AAI Rule was subsequently amended in 2013, as indicated in the following "Background":

> *With today's action, EPA is establishing that parties seeking liability relief under CERCLA's landowner liability protections, as well as recipients of brownfields grants for conducting site assessments, will be considered to have met the standards and practices for all appropriate inquiries, as set forth in the Brownfields Amendments to CERCLA and 40 CFR Part 312, if such parties follow the procedures provided in the ASTM E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." EPA made this determination based upon the Agency's finding that the ASTM E1527-13 standard is compliant with the All Appropriate Inquiries Rule. Therefore, parties conducting all appropriate inquiries may use the procedures in the newly issued ASTM E1527-13 standard when conducting all appropriate inquiries.*[3]

The purpose of the Phase I ESA was to identify, to the extent feasible, Recognized Environmental Conditions (RECs) in connection with the Property. ASTM Standard Practice E1527-13 defines RECs as:

> *…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*

ASTM Standard Practice E1527-13 provides that identified RECs can be evaluated and classified into Controlled Recognized Environmental Conditions (CRECs) or Historical Recognized Environmental

1 Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and https://federalregister.gov/a/2013-31112.
2 Federal Register: November 1, 2005 (Volume 70, Number 210), page 66081.
3 Federal Register: December 30, 2013 (Volume 78, Number 250).

Conditions (HRECs) based on the following definitions. ASTM Standard Practice E1527-13 defines a CREC as:

> *…a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*

ASTM Standard Practice E1527-13 defines a HREC as:

> *…a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*

In order to assess the potential for RECs associated with the Property, Roux utilized a variety of information sources to perform the Phase I ESA, including a radial information search from federal, state, and local regulatory agency databases and readily available information from the following sources: Property owner, historical aerial photographs, historical topographic maps, and city directories. Also, Freedom of Information Act (FOIA)/public records request responses from federal, state, and local regulatory agencies were conducted. The historical research and questionnaire were conducted in order to develop an understanding of the following:

- Current and past uses of the Property;
- Current and past uses of hazardous substances and/or petroleum at the Property, if any;
- Waste management and disposal practices that might have potentially caused releases or threatened releases of hazardous substances and/or petroleum products at the Property;
- Current and past corrective actions and response activities undertaken to address past and ongoing releases of hazardous substances and/or petroleum products at the Property, if any;
- The existence of any engineering and/or institutional controls recorded for the Property; and,
- Current and past uses of adjoining properties that could have resulted in releases or threatened releases of hazardous substances and/or petroleum products to the Property.

Roux's Principal Engineer Angela Liang Cutting, Ph.D., P.E. and Staff Geologist Katherine Grellman served as the Environmental Professionals who conducted the Phase I ESA. Dr. Cutting possesses sufficient specific education, training, and experience to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases, as defined in 40 CFR §312.1(c) on, at, in, or to a Property, sufficient to meet the objectives and performance factors in 40 CFR §312.20(e) and (f).

2. Methods of Investigation

The methods of investigation used to conduct this Phase I ESA are outlined in the following sections.

2.1 General

The activities performed in conjunction with the Phase I ESA of the Property include:

- Review of federal, state, and local environmental regulatory agency databases provided by Environmental Data Resources, Inc. of Milford, Connecticut (EDR), indicating locations of environmental concern within specified radii from the Property;
- Submission of FOIA requests/public requests and inquiries to federal, state, and local regulatory agencies;
- Review of historical information for the Property and surrounding area;
- Review of User provided documents;
- Reconnaissance of the Property; and,
- Review of questionnaire filled out by the Property owner.

2.2 Review of Readily Available Information

The resources compiled and reviewed by Roux to date include the following:

- EDR Radius Map with GeoCheck, dated July 24, 2020 (Appendix A);
- EDR United States Geological Survey (USGS) Historical Topographic Maps, Walnut Creek 7.5-minute and Concord 15 minute, dated 1897, 1915, 1947, 1948, 1949, 1959, 1968, 1973, 1980, 1995, 1996, and 2012 (Appendix B);
- EDR aerial photographs dated 1939, 1946, 1949, 1950, 1958, 1968, 1974, 1979, 1982, 1993, 1998, 2006, 2009, 2012, and 2016 (Appendix C);
- EDR City Directory Abstract, dated July 28, 2020 (Appendix D);
- EDR Sanborn Map report dated July 24, 2020[4] (Appendix E); and,
- Public records from the agencies listed below (Appendix F).

Agency	Status
Department of Toxic Substances Control (DTSC), including Envirostor and Hazardous Waste Tracking System (HWTS)	Request submitted on July 29, 2020. Response received on August 20, 2020, stating no documents were available for the Property. Online databases queried on July 29, 2020. No Envirostor listings were identified for the Property or surrounding area. One HWTS listing was identified for the Property which is discussed in Section 5.2.
Regional Water Quality Control Board (RWQCB), including GeoTracker, and Storm Water Multiple Application and Report Tracking System (SMARTS)	Request submitted on July 29, 2020. Response received on August 5, 2020, stating no documents were available for the Property. Online databases queried on August 3, 2020. No listings were identified for the Property.

4 Sanborn maps were not available for the Property.

Agency	Status
Bay Area Air Quality Management District (BAAQMD)	Request submitted on July 29, 2020. Response was received on July 29, 2020 stating no documents were available for the Property.
Division of Oil, Gas, and Geothermal Resources (DOGGR)	Online database queried on August 3, 2020. No oil and gas wells were identified in the vicinity of the Property.
City of Walnut Creek	Request submitted on July 29, 2020. Response was received on August 3, 3030 stating the Property is located in unincorporated Walnut Creek and thus no documents were available for the Property.
Contra Costa County Fire Protection District (CCCFPD)	Request submitted on July 29, 2020. The CCCFPD informed Roux via email that they were unable to process file review requests until further notice due to the Contra Costa Health Order pertaining to COVID-19. Request was resubmitted on May 7, 2021. The CCCFPD identified documents associated with the Property. Roux performed a file review on May 18, 2021.
Contra Costa Health Services Hazardous Materials Program (CCHSMP)	Request submitted on July 29, 2020. Response was received on July 29, 2020, stating file review requests were unavailable until further notice due to the Contra Costa Health Order pertaining to COVID-19.
City of Walnut Creek Building Department	Request submitted on July 30, 2020. Response was received on August 4, 2020, stating that the Property is located in unincorporated Walnut Creek and that Contra Costa County should be contacted for records.
Contra Costa Environmental Health (CCEH) Department	Request submitted on July 30, 2020. Response was received on July 31, 2020, stating no documents were available for the Property.
Contra Costa County Department of Conservation and Development's Building Permit Database	Online database queried August 4, 2020. Four listings were identified for the Property which are discussed in Section 5.2.

2.3 Property and Surrounding Area Reconnaissance

Pursuant to ASTM Standard Practice E1527-13, Roux conducted a reconnaissance of the Property on July 31, 2020, to identify, investigate, and assess potential RECs and other potential environmental concerns. The reconnaissance included observation of the Property, including all structures and buildings, to determine the current use and condition of the Property, and indications of past uses of the Property. During the Property reconnaissance, Roux placed particular emphasis on identifying the following features, if present, in accordance with ASTM E1527-13:

- Hazardous substances and petroleum products in connection with identified uses;
- Storage tanks;
- Odors;
- Pools of liquid;
- Drums;

- Hazardous substances and petroleum products containers;
- Unidentified substance containers;
- Polychlorinated biphenyls (PCBs);
- Heating and cooling systems;
- Stains or corrosion;
- Drains and sumps;
- Pits, ponds, or lagoons;
- Stained soil or pavement;
- Stressed vegetation;
- Solid waste;
- Wastewater;
- Wells; and,
- Septic systems.

In addition, observation of the general topographic setting of the Property was made. Photographs from the Property reconnaissance are presented in Appendix G.

2.4 Interview with Property Owner

Sam Mendes, the facilities manager, was available to answer questions during the Property reconnaissance, discussed in Section 6. Additionally, Mr. Mendes filled out an owner questionnaire, which is discussed in Section 7.1 and provided in Appendix H.

3. Property Description

Descriptions of the Property and surrounding properties are included in the following sections.

3.1 Property Location and Description

The Property is located at 2740 Jones Road in Walnut Creek, California. The associated Assessor Parcel Numbers (APNs) are provided in the table below.

Parcel Number	Associated Address
172-012-001-1	No Address
172-012-007-8	2770 Jones Road
172-012-008-6	2747 Oak Road and 2740 Jones Road
172-012-020-1	2740 Jones Road
172-012-021-9	2731 Oak Road and 2740 Jones Road
172-012-023-5	2751 Oak Road and 2740 Jones Road
172-012-025-0	2776 Oak Road and 2740 Jones Road
172-012-026-8	2771 Oak Road

Figure 1 presents the location of the Property in the general context of the City of Walnut Creek. The area of the Property is approximately 5.72 acres and is currently occupied by a private elementary school (Figure 2). The private elementary school contains school building structures, a paved courtyard, a grass field, tennis and basketball courts, playgrounds, a swimming pool, parking lots and planters. Roux understands that the User plans to redevelop the Property for residential use (Figure 3).

3.2 Current Surrounding Property Usage

The Property is located in a mixed residential and commercial area to the east of Interstate 680 (I-680). Table A below lists the surrounding area uses.

Table A Surrounding Area Uses	
North	Directly north of the Property are several apartment complexes and Jones Road, beyond which are commercial buildings.
East	Directly east of the Property is Oak Road, beyond which and are apartment complexes.
West	Directly west of the Property is Jones Road, beyond which are a Bay Area Rapid Transit (BART) rail line and I-680.
South	Directly south of the Property are apartment complexes.

3.3 Topographic and Hydrogeologic Setting

As indicated by the EDR Radius Map Report (Appendix A) and the historical topographic maps (Appendix B), the Property is between 90 and 95 feet above mean sea level (MSL). The Property is relatively flat and the regional topographic gradient slopes gently to the northeast.

Based on groundwater monitoring data from nearby leaking underground storage tank (LUST) cases (all more than 1/8 mile from the Property), groundwater flow direction is generally to the north-northeast and

northeast with a relatively gentle gradient in the vicinity of the Property.[5,6,7] First encountered groundwater in the vicinity of the Property has been measured at varying depths and is generally encountered at depths ranging from approximately 23.5 feet below ground surface (bgs) and 56 feet bgs.[8,9,10,11]

The nearest surface water body is the Contra Costa Canal approximately 480 feet south of the Property.[12]

The Property is located within the Ygnacio Valley Groundwater Basin, which is bounded by Suisun Bay to the north, I-680 to the west, and the boundary of Walnut Creek city on the south. It is separated from the Clayton Valley Groundwater basin on the east by the Concord Fault. Bedrock material in the Ygnacio Valley Groundwater Basin is comprised of a consolidated and folded Cretaceous and Tertiary rock complex. Bedrock is overlain by unconsolidated and semi-consolidated alluvium deposits, which make up the water bearing units of the basin. The water-bearing units of alluvium generally consist of interbedded lenses of clays, sands, and gravels. The combined thickness of the bedrock and the water-bearing units is greater than 700 feet.[13]

4. Property History

The land use history of the Property was prepared by reviewing historical aerial photographs, historical topographical maps, and city directories. Historical research documentation is provided in Appendices B, C, and D. Based on the available sources, the chronology of the Property was developed and included in Table B.

Table B
Property History

Source	Year	Status
Topographic Map	1897	The Property is undeveloped. The nearest building is approximately 720 feet southwest of the Property and there is a north–to–south trending spur railroad track running approximately 300 feet to the east of the Property.
Topographic Map	1915	There is an unpaved road running east–to–west situated adjacent to the southwest boundary of the Property. A spur railroad track trending northeast–to–south runs adjacent to the western boundary of the Property.
Aerial Photograph	1939	The Property is utilized for orchards. There are two roads running north–to–south, one to the west of the Property and the other bounding the eastern side of the Property in the same configuration as the current Oak Road. There are several buildings located in the eastern portion of the Property and one in the southwest. The surrounding area is primarily agricultural, much of which is also orchards.
Aerial Photograph	1946	There are several more buildings constructed on the Property, primarily in the western portion where it appears that some of the fields have been cleared for construction. Additionally, a circular landmark is situated in the southern portion of the Property.
Topographic Map	1947	The 1947 topographic map depicts six buildings on the Property.
Topographic Map	1948	The symbol for orchards is now depicted on the Property in the 1948 topographic map.
Topographic Map	1949	The 1949 topographic map is consistent with the 1948 topographic map.
Aerial Photographs	1949 & 1950	The 1949 and 1950 aerial photographs are consistent with the 1949 topographic map.
Aerial Photograph	1958	The road approximately 180 feet to the west of the Property is now a two-lane highway in a similar configuration as the current I-680.
Topographic Map	1959	I-680 is depicted in the 1959 topographic map.
Topographic Map	1968	The road that is currently Jones Road has been developed which bounds the Property to the west and bends to the east just past the northern boundary of the Property.
Aerial Photograph	1968	Most of the Property is now developed and most, if not all, of the orchards appear to have been removed. A narrow rectangular building and a paved lot along with several other small- to medium-sized buildings have been constructed in the southern portion of the Property, which appear to be the same as the current buildings in this portion of the Property. The current athletic field along the western boundary of the Property is present as well, although it appears to contain a building in the 1968 aerial photograph. In the northern portion of the Property, a medium-sized

Table B Property History		
		rectangular building that is currently a residence has been constructed. There are three small square buildings within the northern portion, however most of the northern portion remains unpaved. Additional offsite buildings/structures have been constructed in the surrounding area, although many orchards still remain.
City Directory	1970s	Property listings include the following: • Residential listings at 2747, 2751, & 2771 Oak Road, and 2740 Jones Road in 1975 • 2731 Oak Road and 2770 Jones Road are listed without tenant information in 1975. • Palmer School for Boys & Girls is also listed at 2740 Jones Road in 1975. Offsite listings are generally for commercial facilities and residential properties.
Topographic Map	1973	The 1973 topographic map is consistent with the 1968 aerial photograph.
Aerial Photograph	1974	A large square building and a pool have been constructed along the western boundary of the Property, which are both still part of the current layout. More buildings have been developed in the surrounding area and the road running along the eastern boundary of the Property has been paved.
Aerial Photograph	1979	The 1979 aerial photograph is low-resolution but appears to be consistent with the 1974 aerial photograph.
City Directory	1980s	Property listings include the following: • Residential listings at 2731, 2747, 2751, & 2771 Oak Road, and 2740 Jones Road in 1980. • Residential listings at 2747 & 2751 Oak Road, and 2740 Jones Road in 1985. • 2731 and 2771 Oak Road are listed without tenant information in 1985. • Palmer School for Boys & Girls at 2740 Jones Road in 1980 and 1985.
Topographic Map	1980	The 1980 topographic map is consistent with the 1979 aerial photograph.
Aerial Photograph	1982	The 1982 aerial photograph is consistent with the 1980 topographic map.
City Directory	1990s	Property listings include the following: • Residential listings at 2747 & 2751 Oak Road, and 2740 Jones Road in 1990. • 2731 and 2771 Oak Road are listed without tenant information in 1990. • Residential listings at 2747 and 2771 Oak Road in 1994. • 2731 and 2751 Oak Road are listed without tenant information in 1994. • Palmer School for Boys & Girls at 2740 Jones Road in 1990 and 1994. Offsite listings are generally for commercial facilities and residential properties.
Aerial Photograph	1993	Several of the trees in the northern portion of the Property have been removed. There appear to be no remaining orchards in the surrounding area which is mostly developed with what appear to be residential and

5. Records Review

5.1 EDR Database Listings

Roux used a computerized environmental database and radius map report prepared by EDR to conduct a government records database search for sites of potential environmental concern within a maximum of a one-mile radius of the Property. Appendix A contains a complete copy of the EDR Radius Map Report with GeoCheck. Based on the Map Findings Summary, in the EDR Radius Report, Table C shows the results for all the database listings that resulted in potential environmental concerns for the Property and surrounding area.

Table C
Facilities of Potential Environmental Concern

Database[14]	Target Property	<1/8 mile	1/8 - 1/4 mile	1/4 - 1/2 mile	1/2 - 1 mile	Total
RCRA-SQG	0	1	10	NR	NR	11
RCRA-VSQG	0	0	1	NR	NR	1

TOTAL	1	19	162	28	3	213

*NR refers to “not requested” at search distance.

[14] Descriptions of the EDR databases can be found in the EDR Radius Report (Appendix A).

There are no National Priorities List (NPL) facilities within one mile of the Property. The remainder of the discussion concerning review of the environmental databases listed on the EDR Radius Report has been restricted to those properties adjacent or within 1/8 mile hydraulically upgradient of the Property. These sites of potential environmental concern can be found on Table D. As discussed in Section 3.3, groundwater in the vicinity of the Property flows to the north and northeast. Therefore, facilities to the south and southwest are considered hydraulically upgradient.

Table D
Facilities of Potential Environmental Concern

Database	Distance / Orientation from Property	Property Listing	Address	Years Listed
HWTS	TP	Palmer School	2740 Jones Road	2012
RCRA NONGEN / NLR	Across Oak Road to the East	Uwe Kleinhempel	2742 Oak Road, Unit #195	2019
RCRA NONGEN / NLR	Across Oak Road to the Southeast	Steadfast Construction	2712 Oak Road, Units #56 and #57	2019

TP = Target Property.

The listings in Table D are further discussed below.

5.1.1 Findings at the Property

Palmer School

HWTS: The facility had an active listing in the hazardous waste tracking system in 2012.

5.1.2 Findings at Nearby Facilities

Uwe Kleinhempel at 2742 Oak Road, Unit #195 (Across Oak Road to the East)

RCRA NONGEN / NLR: This facility is listed as no longer generating hazardous waste materials in 2019.

Steadfast Construction at 2712 Oak Road, Units #56 and #57 (Across Oak Road to the Southeast)

RCRA NonGen / NLR: This facility is listed as no longer generating hazardous waste materials in 2019.

Cole European at 1421 Lesnick Lane (440 feet West-Southwest)

HWTS: This facility had active listings in the hazardous waste tracking system between 2004 and 2019.

CERS HAZ WASTE and CERS TANKS: This facility is listed as having generated hazardous materials and contained an aboveground petroleum storage container. The year is unreported.

AST: This facility is listed as having or have had an above-ground storage tank (AST), likely related to the CERS TANKS listing described above. The tank size and listing year are unreported.

CERS: This facility received hazardous waste violations in 2016, 2017, and 2019 for having opened hazardous materials containers containing paper filters and drained metal filters, mishandling hazardous materials containers containing petroleum, insufficient testing and inspecting of ASTs containing used oil and antifreeze, insufficient training and documentation related to their Spill Prevention, Control, and Countermeasure (SPCC) Plan, and missing hazardous materials inventory information regarding a 55-gallon drum of diesel exhaust fluid (DEF).

HAZNET: This facility is listed as having generated small quantities of hazardous wastes in 2004, 2006, 2009, and between 2012 and 2019 in the form of waste oil, mixed oil, unspecified oil-containing waste, aqueous solution with total organic residues less than 10%, and other organic solids.

CONTRA COSTA CO. SITE LIST: This facility is listed for generating less than 50 tons of hazardous waste per year.

RCRA-SQG: This facility is listed as having generated small quantities of hazardous materials in 2004 in the form of benzene, lead, ignitable waste, and corrosive waste.

Classic Auto Body & Paint at 1401 Autocenter Drive (530 feet Southwest)

CONTRA COSTA CO. SITE LIST: This facility is listed for generating less than 50 tons of hazardous material per year.

Stacy Davis at 2650 Jones Road, Unit #7 (610 feet South)

RCRA NONGEN / NLR: This facility is listed for no longer generating hazardous waste materials in 2020.

Independent Volvo Service at 1403 Autocenter Drive (650 feet Southwest)

RCRA NONGEN / NLR: This facility is listed for no longer generating hazardous waste materials in 1997.

HWTS: This facility had active listings in the hazardous waste tracking system between 1997 and 2019.

CERS HAZ WASTE: This facility is listed as having generated hazardous waste.

CERS: This facility was evaluated in 2016 and 2018. No violations were cited.

HAZNET: This listed as having generated small quantities of hazardous wastes between 1998 and 2005 and between 2017 and 2019 in the form of other organic solids, aqueous solution with total organic residues less than 10%, and unspecified organic liquid mixture.

CONTRA COSTA CO SITE LIST: This facility is listed for generating less than 12 tons of hazardous material per year.

Desi Auto Repair at 1403 Autocenter Drive, Suite B (650 feet Southwest)

CERS HAZ WASTE: This facility is listed as having generated hazardous waste.

CERS: This facility received hazardous waste violations in 2014, 2016, and 2017 for insufficient hazardous material documentation.

CONTRA COSTA CO. SITE LIST: This facility is listed for generating less than 50 tons of hazardous material per year.

Nearby Facility Listings Summary: Although there are numerous listings for hazardous waste generating facilities within the vicinity of the Property, they are for small quantities. Cole European at 1421 Lesnick Lane is listed as generating petroleum products and having violations that could indicate the potential for a release including open hazardous material containers, mishandling of hazardous materials containers containing petroleum, and insufficient testing and inspection of ASTs. However, this facility is 440 feet from the Site and does not contain underground storage tanks (USTs). Therefore, it is unlikely that this facility has impacted the Property.

5.2 FOIA/Public Records Request Responses

FOIA/public records requests for the Property were submitted to federal, state, and local regulatory agencies (Section 2.2). Information obtained from all agency correspondence as well as their associated online databases is included in Appendix F and is summarized below.

Department of Toxic Substances Control (DTSC)

On August 20, 2020 the DTSC informed Roux via email there are no documents available for the Property.

Envirostor (DTSC's online database) was queried on July 29, 2020 and there were no listings in the vicinity of the Property.

Online records available through the DTSC Hazardous Waste Tracking System (HWTS) were searched for the Property on July 29, 2020. One listing 2740 Jones Road was active in 2012, which is consistent with the listing found in the EDR Radius Report in Section 5.1. As discussed in Section 7.1, Sam Mendes, the facility manager, did not know what the HWTS listing related to.

San Francisco Regional Water Quality Control Board (RWQCB)

On August 5, 2020 the RWQCB informed Roux via email there are no documents available for the Property.

On July 29, 2020, Roux searched the following databases as part of its records review:

- California GeoTracker Database; and
- California Storm Water Multiple Applications and Report Tracking System (SMARTS).

No documents for the Property were identified on either database and no cases on GeoTracker were identified within the vicinity of the Property.

Division of Oil, Gas, and Geothermal Resources (DOGGR) Database

On August 3, 2020, Roux searched the DOGGR database as part of its record review. No oil and gas wells were identified in the vicinity of the Property.

Bay Area Air Quality Management District (BAAQMD)

On July 30, 2020 the BAAQMD informed Roux via email there are no documents available for the Property.

City of Walnut Creek

On August 3, 2020, the City of Walnut Creek's clerk office informed Roux via email the Property is located in unincorporated Walnut Creek and thus no documents are available for the Property.

Contra Costa County Fire Protection District (CCCFPD)

On July 29, 2020 the CCCFPD informed Roux via email that they are unable to process file review requests until further notice due to the Contra Costa Health Order pertaining to COVID-19. Request was resubmitted on May 7, 2021. The CCCFPD identified documents associated with the Property. The CCFPD identified 12 files with 452 pages total for 2740 Jones Road and 2747, 2731, 2751, 2771, 2776 Oak Road and a general tank file for all Walnut Creek streets beginning with A-Z with 786 pages. Roux performed a file review on May 18, 2021 and did not find any pertinent environmental records associated with the Property. In addition, the 50-gallon gasoline tank was not included in the general tank file.

Contra Costa Health Services Hazardous Materials Program (CCHSMP)

On July 29, 2020 the CCHSMP informed Roux via email there are no documents available for the Property.

City of Walnut Creek Building Department

On August 4, 2020, the City of Walnut Creek's Building Department informed Roux that the Property is within an unincorporated area of Walnut Creek and records would be held by the County.

Contra Costa Environmental Health (CCEH) Department

On July 31, 2020 the CCEH informed Roux via email there are no documents available for the Property.

Contra Costa County Department of Conservation and Development

On August 4, 2020, Roux searched the Contra Costa County Department of Conservation and Development's Building Permit Database. Listings for the Property include the following:

- Three 2015 permits for general building work at 2747 Oak Road including plumbing, re-roofing, and a bathroom remodel; and
- A 2015 permit for plumbing work at 2751 Oak Road.

5.3 Documents Provided by the User

The following is a list of the relevant documents provided by the User (Appendix I):

2740 Jones Road Project Description dated July 30, 2020: Details the redevelopment plan, which includes three-story townhomes attached with two-car garages and a centrally located common open space area.

2740 Jones Road Preliminary Redevelopment Plan dated July 30, 2020: Depicts the redevelopment plan for the proposed three-story townhomes complex.

The User also provided a parcel map for the Property.

6. Property Reconnaissance

Roux conducted a Property reconnaissance on July 31, 2020 for most of the Property and returned on August 14, 2020 to observe two remaining buildings at 2747 Oak Road Units 1 and 2. The objective of the reconnaissance was to check for visual evidence of past or present use or storage of hazardous materials that could potentially affect the soil, groundwater quality, and soil vapor at the Property. Photographs taken during the Property reconnaissance are attached (Appendix G). Roux was accompanied during the Property reconnaissance by Sam Mendes, the facilities manager. Mr. Mendes was available to answer questions during the Property reconnaissance.

The Property consists of a former elementary school and several buildings. The former school includes classrooms, an auditorium, a front office, a paved courtyard, a grass field, tennis courts, basketball courts playgrounds, a swimming pool, and associated parking lots and landscaping areas. Multiple storage sheds were observed. The classrooms, located in the southern portion of the Property, are generally empty or used as storage rooms for conventional classroom materials including art supplies, desks, chairs, extension cords, books, etc. Situated outside of the classrooms are rows of lockers, bathrooms, and a janitorial closet with a boiler and conventional janitorial cleaning chemicals. A landscaping area behind the classrooms along the southern boundary of the Property includes planter boxes, storm drain lines, and power boxes, and a partially uncovered pipe, was observed, which appears to be related to storm drainage. In the southeast corner of the Property is a two-story auditorium used as a storage area containing a kitchen, stage, water heater, and empty storage rooms on the second floor.

The following was observed in the paved courtyard/parking area in the southeast portion of the Property: several maintenance sheds with spray-paint, conventional janitorial and gardening supplies, and small bottles of Home Defense insect killer and Roundup. Across the courtyard to the west is a two-story building utilized as an office and storage space similar to the other storage areas. Two small bottles of Spectracide insect killers were identified in a storage room upstairs.

Buildings are in the northern portion of the Property. Buildings at 2747 Oak Road Units 1 and 2 included several rooms and a garage. 2771 Oak Road and 2747 Oak Road Units 3, 4, and 5 are all utilized as storage space similar to other storage units on the Property. Observed chemicals were all small containers of conventional cleaning supplies. Several storage units are located outside of the buildings containing building materials, office supplies, furniture, etc. East of the buildings is an unpaved lot and the location of a former trash enclosure that was removed around June 2020. The trash enclosure was located on a paved driveway of the Property to the west of Jones Road.

Mr. Mendes pointed out the location of a former 50-gallon UST in the northern portion of the Property behind the building at 2771 Oak Road. See Figure 2 for the suspected location of the UST. The area had subsequently been repaved and therefore did not maintain any surface features. According to Mr. Mendes, the UST was removed approximately 25 years ago, and the age and original use of the UST was unknown. Based on the relatively small size of the UST, it had been removed without regulatory oversight. According to Mr. Mendes, no staining or odors were observed in the underlying soil once the UST was removed. Although the UST was small and no impacts were reportedly observed, the UST was removed without proper oversight and no soil samples were collected below the UST. This is considered a REC.

6.1 Utilities

Electrical and gas utilities are provided to the Property by Pacific Gas and Electric (PG&E). Water is provided by the City of Walnut Creek.

6.2 Hazardous Substances

Roux did not observe the presence of any hazardous substances other than small containers of conventional cleaning supplies and insecticides.

6.3 Polychlorinated Biphenyls

Several transformers were observed outside the Property on utility poles along Oak Road; however, they appeared to be in good condition and are too high to pose a leaking risk to the soil or groundwater.

6.4 Staining and Stressed Vegetation

No staining or stressed vegetation was observed at the Property.

6.5 Drains and Sumps

Several drains were located within bathroom spaces and outside in the paved courtyard area; however, no staining was observed around the drains.

6.6 Solid Waste

According to the facility manager, garbage collection services ceased at the Property around June 2020 following the closure of the school. Conventional waste is collected from the residences.

6.7 Wastewater

No wastewater processes were observed during Property reconnaissance.

6.8 Wells

Three irrigation wells were observed at the Property. One of the wells is located in the school courtyard in the southern portion of the Property, reportedly set at a depth of approximately 60 feet bgs, according to the facility manager. Accompanying the well is a filter and a pressure tank. The remaining two irrigation wells, are located along the northern boundary of the Property behind the buildings at 2747 Oak Road and 2771 Oak Road, and are reportedly not active and the depths are unknown. The well behind 2771 Oak Road is uncovered. These wells would need to be properly abandoned prior to redevelopment and are therefore considered a Business Environmental Risk. See Figure 2 for the location of the irrigation wells.

6.9 Out-of-Scope Services

No out-of-scope services were provided.

7. Interviews and User-Provided Information

To complete this Phase I ESA, Roux requested an interview and questionnaire from the User.

7.1 Interviews

During the Property reconnaissance activities on July 31, 2020, Roux was able to conduct an interview with Sam Mendes, the facility manager. Additionally, Mr. Mendes filled out an owner questionnaire, which is discussed here and provided in Appendix H. According to Mr. Mendes Palmer School, a private elementary school, operated at the Property for 80 years until its closure around June 2020. Since then, most of the buildings have been utilized as storage space for school supplies and equipment. Prior to school operations, the Property was used for orchards. According to Mr. Mendes, the 50-gallon UST was removed around 25 years ago without regulatory oversight or confirmation sampling. The age of the UST and its historical use were unknown but it is believed to have previously contained gasoline. According to Mr. Mendes it was empty when it was removed, and no staining or odors were observed in the underlying soil. Mr. Mendes does not know of any environmental concerns at the Property. Additionally, Mr. Mendes did not know what the 2012 HWTS listing for the Property, discussed in Sections 5.1.1 and 5.2, was related to.

7.2 User Questionnaire

Roux received a completed questionnaire from the User (Appendix H) on July 27, 2020. According to the questionnaire, the Property was initially developed in the 1940s. The User is unaware of any environmental liens, land use limitations, engineering controls, cleanups, or chemical releases at the Property. The User believes the purchase price for the Property reasonably reflects the fair market value and does not have specialized knowledge of the Property.

8. Phase I ESA Conclusions and Recommendations

Roux has performed a Phase I ESA at 2740 Jones Road, California. This ESA was performed on behalf of the User and is intended to define the historical uses of the Property and identify any potential RECs for the Property, as defined by ASTM International Standard Practice E1527-13.

This Phase I ESA was performed to identify RECs, CRECs, and/or HRECs at the Property, indicating past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Property's soil, groundwater, or surface water. The Phase I ESA was conducted by investigating past Property uses, reviewing the results of a search of environmental databases, reviewing records at relevant government agencies, and performing a Property reconnaissance.

One REC was identified at the Property:

1. Approximately 25 years ago, a 50-gallon UST thought to have contained gasoline was reportedly removed behind the building at 2771 Oak Road. No staining or odors were observed in the underlying soil, but the UST was removed without proper oversight and no soil samples were collected below the UST. Although no indication of a release has been reported at the Property and the tank was relatively small, it is possible that releases from the gasoline UST could have historically occurred, which is considered a REC.

Two environmental concerns were identified at the Property that do not rise to the level of a REC but are considered as a business environmental risk (BER):

1. The Property was utilized for orchards between at least 1939 and the 1960s. Potential residual pesticide impacts in shallow soils are considered a BER; and

2. The Property contains three irrigation wells. Since these wells would need to be properly decommissioned prior to redevelopment, they are considered a BER.

A Focused Phase II was conducted to assess the REC and BER 1.

9. Focused Phase II

Roux conducted environmental subsurface investigations to assess the REC and BER 1 identified in the Phase I ESA between August and December 2020. The details of these investigations are described below.

9.1 Pre-Field Activities

Prior to intrusive work at the Property, Roux prepared a Property-specific Health and Safety Plan. Drilling permits were obtained from Contra Costa County Environmental Health Division. Roux marked the proposed boring locations with white paint and notified Underground Service Alert of intended subsurface work at least two business days prior to drilling. Private geophysical services and utility locating firms, Subtronic Corporation, of Martinez, California for the first mobilization, and Ground Penetrating Radar Services Inc., of Manteca, California for the second mobilization were retained to assess the location and depth of utilities near each boring location at the Property.

9.2 Boring Advancement

On August 14, 2020, under the direction of Roux, PeneCore Drilling (PeneCore) of Woodland, California (C 57 License # 906899) advanced five soil borings (RB-1 through RB-5) to 3 feet below ground surface (bgs) using a hand auger in order to collect soil samples. RB-2 was additionally advanced from 3 to 5 feet bgs using a direct push technology rig and converted into a temporary 5-foot soil vapor probe. RB-2 was continuously logged to record lithological differences in accordance with the Unified Soil Classification System. All soils were field screened with a photoionization detector (PID).

Based on an elevated benzene concentration in the soil vapor sample collected from RB-2 in the first round of sampling, an additional mobilization occurred. On September 15, 2020, under the direction of Roux, Environmental Control Associates Drilling (ECA) of Aptos, California (C-57 License # 695970) advanced four soil borings (RB-6 through RB-9) as step-outs to RB-2. Each location was advanced to 5 feet bgs and converted into a 5-foot temporary soil vapor probe. Soil in each boring was logged and screened as discussed above.

Due to a laboratory malfunction resulting in a loss of the samples discussed above, another mobilization was needed. On October 7, 2020, under the direction of Roux, ECA over-drilled the abandoned RB-6 through RB-9 locations using a direct push technology rig and reinstalled temporary 5-foot soil vapor probes at each location. Since no new soil was removed, no soil logging occurred during the October mobilization.

Based on the soil vapor sampling results, groundwater sampling was conducted in the vicinity of boring RB -2. On December 15, 2020. Under the direction of Roux, ECA advanced one soil boring using a direct push technology rig for a grab groundwater sample.

Boring locations are presented in Figure 3 and boring logs are provided in Appendix J.

9.3 Soil Sampling

To assess if shallow soil has been impacted by historical agricultural use, soil samples were collected from borings RB-1 through RB-5. Samples were collected at 1 and 3 feet bgs from each boring location into laboratory-provided soil jars. During headspace analysis, elevated PID readings were observed at RB-2.

Therefore, an additional sample was collected at 5 feet bgs from RB 2, corresponding to the depth of the soil vapor sample collected from RB-2. Samples at 1 foot bgs were analyzed for the following:

- CAM 17 metals by United States Environmental Protection Agency (EPA) Method 6000/7000 series; and
- Organochlorinated pesticides (OCPs) by EPA Method 8081A.

Samples at 3 feet bgs were placed on hold, pending the results of the 1-foot samples. Additionally, the 5-foot sample from RB-2 (RB-2-5) was analyzed for the following:

- Volatile organic compounds (VOCs) and total petroleum hydrocarbons (TPH) as gasoline (TPH-g) by EPA Method 8260B; and
- TPH as diesel (TPH-d) and motor oil (TPH-mo) by EPA Method 8015B.

All soil samples were appropriately sealed, labelled, stored on ice, and transported by courier under chain of custody to McCampbell Analytical, Inc. of Pittsburg, California, a California-certified laboratory (McCampbell).

During the second mobilization, elevated PID readings were observed in multiple borings (Attachment 1). Therefore, RB-6 and RB-9 were selected for soil sampling and samples were collected from each location at 5 feet bgs, corresponding to the depth of the soil vapor probes (RB-6-5 and RB-9-5), and analyzed for the following analyses:

- VOCs and TPH-g by EPA Method 8260B; and
- TPH-d and TPH-mo by EPA Method 8015B.

These soil samples were transported to McCampbell with the same methods discussed above.

9.4 Temporary Soil Vapor Probe Installation

To determine if soil vapor beneath the Property has been impacted in the vicinity of the former 50-gallon gasoline UST, a temporary soil vapor probe was installed at 5 feet bgs at RB-2. During the second mobilization, temporary soil vapor probes were installed at 5 feet bgs in RB-6 through RB 9 to delineate a benzene exceedance at RB-2. During the third mobilization, RB-6 through RB-9, which had been abandoned, were overdrilled with a direct push technology rig and temporary soil vapor probes were reinstalled.

The temporary 5-foot soil vapor probes were installed as follows: A 12-inch sand pack was placed from 4 to 5 feet bgs, surrounding the probe tip (at 4.5 feet bgs) midway in the sand pack to minimize the disruption of airflow to the sampling tip. Twelve inches of dry granular bentonite was placed above the sand from 3 to 4 feet bgs. A final layer of hydrated bentonite was installed immediately above the dry granular bentonite to the surface. Each well's tubing was capped with a gas-tight fitting.

9.5 Soil Vapor Sampling

To assess if soil vapor beneath the Property has been impacted by either historic site use or impacts migrating onsite, soil vapor samples were collected from the 5-foot soil vapor probes RB-2 and RB-6 through RB-9. RB-2 was sampled on August 14, 2020, during the first mobilization, at least 2 hours following soil vapor probe installation. RB-6 through RB-9 were sampled on September 17, 2020, at least 48 hours following soil vapor probe installed. All samples were collected in laboratory-certified Summa canisters. Prior to sample collection, approximately three well volumes were purged from the sample tubing using a "purge"

Summa canister. Purging activities were conducted at the same flow rate used for soil vapor sample collection (approximately 150 milliliters per minute). During sampling, each Summa canister was enclosed in a shroud and helium introduced into the shroud at a minimum of 20 percent (%) by volume, to be used as a tracer gas to confirm the presence or absence of a significant leak during sampling. The collected soil vapor samples were analyzed for the following:

- VOCs by EPA Method TO-15;
- TPH-g by EPA Method TO-3; and
- Oxygen and helium (tracer gas) content by the American Society for Testing Materials (ASTM) D 1946.

All soil vapor samples were appropriately sealed, labelled, and transported by courier under chain of custody to California-certified laboratories. The sample from RB-2 was transported to Enthalpy Analytical of Berkeley, California (Enthalpy) and the samples from RB-6 through RB-9 were transported to K Prime Inc of Santa Rosa, California (K Prime).

Due to a nearby fire that caused power outages during analysis, K Prime was unable to retrieve data from the soil vapor samples collected from RB-6 through RB-9. Therefore, Roux's third mobilization to the Site was for the purpose of collecting an additional set of samples from RB-6 through RB-9. Soil vapor samples were collected from RB-6 through RB-9 on October 8, 2020, as discussed above and transported under chain of custody to Enthalpy.

9.6 Grab Groundwater Sampling

To assess if groundwater is a potential source for onsite vapor impacts, one boring was advanced to first encountered groundwater in the vicinity of RB-2. Temporary well casing with a slotted screen was inserted into the boring. A grab groundwater sample was collected using the low-flow method and analyzed for the following:

- TPH-g and VOCs by EPA Method 8260; and
- TPH as diesel (TPH-d) and motor oil (TPH-mo) by EPA Method 8015.

9.7 Boring Abandonment

Following sampling activities, all soil borings were backfilled with grout to just below the surface and patched at the surface to match the surrounding ground cover. The temporary soil vapor probes were abandoned by completely removing the tubing, removing some of the hydrated bentonite, backfilling the void space with neat cement grout, and patching the surface to match the surrounding ground cover.

9.8 Investigation-Derived Waste (IDW)

One 55-gallon Department of Transportation (DOT) steel drum was placed onsite for soil cuttings. The drum was properly sealed and labelled at the end of investigation activities. Following the results of the waste profiling analyses, the drum will be removed from the Property and transported to an appropriate disposal facility.

9.9 Results

Soil and soil vapor analytical results are presented in Tables 1 through 4. The complete analytical laboratory reports are included in Attachment 2.

9.9.1 Lithologic Results

Based on the results of this investigation, the Site is underlain predominantly by clay with varying amounts of silt, sand, and gravel to the total explored depth of 5 feet bgs. In the vicinity of RB-2 and RB-6 through RB -9, there is approximately 1 foot of silty sand from the surface, presumed to be fill material. Groundwater was not encountered during this investigation. Boring logs are provided in Attachment 1.

9.9.2 Soil Sampling Results

Concentrations detected in soil were compared to RWQCB February 2019 Residential Soil Direct Exposure Environmental Screening Levels (ESLs) as well as the San Francisco Bay Area natural background concentrations in soil , specifically for arsenic, with the following results:

- No pesticides detections exceeded their applicable Residential ESLs in any soil samples;
- All metals except arsenic were detected at concentrations below their applicable Residential ESLs. Arsenic concentrations were below the natural background concentration of 11 milligrams per kilogram (mg/kg); and
- No TPH or VOC detections exceeded their applicable Residential ESLs.

Soil analytical results were also compared to hazardous waste criteria. Based on the preliminary results chromium was additionally analyzed in RB-1-1, RB-3-1, and RB-5-1 for the Soluble Threshold Limit Concentration (STLC) hazardous waste criteria limit, and lead was analyzed for the STLC in RB-4-1. All samples were below the STLC of 5.0 milligrams per liter.

Soil analytical results are summarized in Tables 1 through 3.

9.9.3 Soil Vapor Analytical Results

Concentrations detected in soil vapor samples were compared to RWQCB February 2019 Residential Vapor Intrusion ESLs. The results are summarized below:

- Benzene was detected above the Residential ESL of 3.2 micrograms per cubic meter (µg/m³) in all soil vapor samples (RB-2-SV and RB-6-SV through RB-9-SV) at concentrations ranging from 6.9 µg/m³ (RB-9-SV) to 16 µg/m³ (RB-7-SV);
- No other VOCs were detected above their respective ESLs;
- Oxygen was detected at concentrations ranging from 17percent by volume (%v) to 19 %v, indicating that conditions in soil in the vicinity of RB-2 and RB-6 through RB-9 are favorable to the natural degradation of petroleum hydrocarbons; and
- Helium was not detected in any of the samples, indicating that there were no significant leaks during sample collection.

Soil vapor analytical results are summarized in Table 4.

9.9.4 Groundwater Sampling Results

Benzene was detected at an estimated concentration of 0.049 micrograms per liter (µg/L), below the RWQCB Vapor Intrusion ESL of 0.42 µg/L. No other VOCs were detected in the grab groundwater sample.

9.10 Focused Phase II Summary

The soil results indicate that all detections were below the applicable Residential ESLs and natural background levels, including samples collected from RB-2, RB-6, and RB-9 based on elevated PID readings during logging.

Based on the results of the additional investigation, benzene in soil vapor from all five soil vapor probes (RB-2 and RB-6 through RB-9) exceeded the RWQCB Residential ESL of 3.2 µg/m³ at concentrations ranging from 6.9 µg/m³ (RB-9-SV) to 16 µg/m³ (RB-7-SV). However, these concentrations are relatively low and oxygen concentrations in soil vapor indicate that conditions in soil in the vicinity of RB-2 are favorable to the natural degradation of petroleum hydrocarbons. In addition, the groundwater investigation confirmed that no benzene source exists in groundwater in the vicinity of RB-2.

9.11 Mitigation Measures

As a precautionary measure, soil aeration will be utilized as the mitigation measure to address the benzene detected in soil vapor. Soil aeration consists of spreading excavated soil on the ground in an approximately 18-inch-thick layer. Mixing of the soil (tilling) will be performed regularly to maintain aerobic conditions (presence of oxygen). The soil will be thoroughly tilled using equipment such as a Terex RS600 Reclaimer/Stabilizer.

The proposed excavation area is approximately 30 feet long by 20 feet wide and 6 feet deep with a total volume of 135 cubic yards. A total of six tilling passes will be performed. During the tilling operation, air quality monitoring will be performed 3 inches above the soils and also in the breathing zone with a PID. Dust control measures will be conducted, and dust monitoring will be performed in the perimeter of the Site boundary. In addition, stormwater Best Management Practices (BMPs) will be implemented, if applicable.

Soil and soil vapor sampling will be performed at the end of tilling operations prior to backfill. Soil vapor samples will also be collected from compacted backfill to confirm no soil vapor impacts in the soils.

If soil vapor exceedances are identified after soil excavation and aeration, a Soil Management Plan will be prepared and forwarded to an appropriate environmental agency for disposition.

9.12 Conclusions

This Focused Phase II has adequately investigated the scope of the REC and BER-1. The sampling results for pesticides eliminates BER-1 as a potential risk at the Site. The mitigation measure described in Section 9.11 will reduce the risk of benzene vapor to below a level of significance.

10. Report Assumptions and Limitations

The Phase I ESA described herein was conducted by Roux in accordance with ASTM Standard Practice E1527-13, which is consistent with the regulatory requirements for conducting all appropriate inquiries (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule[15]). The preamble for the AAI Rule states:

> *In today's final rule, EPA is referencing the standards and practices developed by ASTM International and known as Standard E1527-05 (entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process") and recognizing the E1527-05 standard as consistent with today's final rule. The Agency determined that this voluntary consensus standard is consistent with today's final rule and is compliant with the statutory criteria for all appropriate inquiries. Persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-05 standard to comply with today's final rule.*[16]

This AAI Rule was subsequently amended in 2013, as indicated in the following "Background":

> *With today's action, EPA is establishing that parties seeking liability relief under CERCLA's landowner liability protections, as well as recipients of brownfields grants for conducting site assessments, will be considered to have met the standards and practices for all appropriate inquiries, as set forth in the Brownfields Amendments to CERCLA and 40 CFR Part 312, if such parties follow the procedures provided in the ASTM E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." EPA made this determination based upon the Agency's finding that the ASTM E1527-13 standard is compliant with the All Appropriate Inquiries Rule. Therefore, parties conducting all appropriate inquiries may use the procedures in the newly issued ASTM E1527-13 standard when conducting all appropriate inquiries.*[17]

It is Roux understanding that this Phase I ESA was requested by the User so that the User may qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). One of the requirements that a person acquiring real property must meet in order to qualify for one of these limitations on liability under CERCLA is to perform all appropriate inquiries in conformance with the AAI Rule (or the ASTM Standard Practice E1527-13) prior to acquisition of the property. The User has acknowledged that, under the AAI Rule, Roux performance of the Phase I ESA described herein will not alone result in the User satisfying all of the requirements of the AAI Rule and provide a defense to CERCLA liability. Further, the User has acknowledged that the AAI Rule requires that certain additional inquiries be undertaken to satisfy the CERCLA AAI requirements. **ACCORDINGLY, ROUX MAKES NO GUARANTEES OR WARRANTIES, EXPRESSED OR IMPLIED, REGARDING THIS PHASE I ESA, INCLUDING WITHOUT LIMITATION, ANY WARRANTY THAT THIS PHASE I ESA WILL IN FACT QUALIFY USER FOR A DEFENSE TO CERCLA LIABILITY.**

Roux has performed this Phase I ESA in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Professional judgments expressed herein are based on the facts currently available to Roux.

---

[15] Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and https://federalregister.gov/a/2013-31112.
[16] Federal Register: November 1, 2005 (Volume 70, Number 210), page 66081.
[17] Federal Register: December 30, 2013 (Volume 78, Number 250).

The AAI Rule requires, and the conclusions stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the Property. As such, these conclusions are based on subjective interpretations and the exercise of discretion. Many of these facts and conditions are subject to change over time. Accordingly, the conclusions must be considered within this context.

The User has agreed that Roux shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time the Phase I ESA was performed. To the extent practicable, Roux has identified data gaps, and has evaluated the potential significance of such data gaps.

It should be noted that Roux has not collected any soil and/or groundwater samples on the Property and is relying on information presented by others, often in preliminary, draft, or verbal form. By referencing this information, Roux does not accept responsibility for the accuracy of the underlying data or documentation.

This Phase I ESA Report should not be considered a legal interpretation of existing environmental laws and regulations. The Phase I ESA was conducted with a reasonable degree of inquiry to identify RECs, but uncertainty is not eliminated. No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The Phase I ESA process is intended to reduce, but not eliminate, the uncertainty involved with identifying RECs.

This Phase I ESA Report is not an appraisal or value judgment of the Property. The User has agreed that Roux shall not be liable for any use of the Phase I ESA Report as an appraisal or value judgment of the Property.

The Phase I ESA Report has been prepared for the exclusive use of the User for specific application to the Property. The User has agreed that any third-party use of this Phase I ESA Report is the User's sole responsibility and at the User's sole liability.

We declare that, to the best of my professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312; and,

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Respectfully submitted,

ROUX ASSOCIATES, INC.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

2740 JONES ROAD
WALNUT CREEK, CA 94597

COORDINATES

Latitude (North):	37.9235510 - 37° 55' 24.78''
Longitude (West):	122.0596450 - 122° 3' 34.72''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	582649.2
UTM Y (Meters):	4197544.5
Elevation:	95 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 10 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 35 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EPA Id: CAL000450470

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 14 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Violation Description:	Business Plan Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 03/13/2018.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	435137
Site Name:	CENTURYLINK - WALNUT CREEK - WNCKCAGE
Violation Date:	06-17-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/31/2019. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. A 55 gallon drum of diesel product was seen in the generator fenced off area, Hazardous Waste Label present and dated 2015. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected. Submit proof of disposal via Hazardous Waste Manifest.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Name: COLE EUROPEAN
Address: 1421 LESNICK LN
City,State,Zip: WALNUT CREEK, CA 94597
Site ID: 390318
CERS ID: 10017706
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 390318
Site Name: COLE EUROPEAN
Violation Date: 10-01-2019
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to test or inspect each aboveground container for integrity

COLE EUROPEAN (Continued) **S113177549**

based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each containerG s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."

Violation Notes: Returned to compliance on 10/02/2019. OBSERVATION: The facility has provided a portion of monthly inspections of tanks storing petroleum, but the checklists provided were not complete. Because this violation was not corrected by the compliance due date of 9/18/2019, the violation is now elevated to a Class II - Notice of Violation. CORRECTIVE ACTION: By October 18, 2019, provide copies of the monthly inspections for all tanks storing petroleum for August and September2019 to CCHSHMP.
Violation Division: Contra Costa County Health Services Department
Violation Program: APSA
Violation Source: CERS

Site ID: 390318
Site Name: COLE EUROPEAN
Violation Date: 08-19-2019
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.
Violation Notes: Returned to compliance on 09/18/2019. OBSERVATION: The facility provided the 6/14/2010 SPCC Plan for the inspection. It was not clear if there was an updated SPCC Plan. The SPCC Plan provided did not include documentation of a 5-year review. CORRECTIVE ACTION: By September 18, 2019, provide documentation of a 5-year review of the SPCC Plan or a new SPCC Plan or schedule an inspection with CCHSHMP to return to the facility to review documentation that addresses the 5-year review requirement.
Violation Division: Contra Costa County Health Services Department

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to prepare an SPCC Plan that meets all applicable requirements.
Violation Notes: Returned to compliance on 10/30/2019. OBSERVATION: The facility provided a Tier I Spill Prevention, Control, and Countermeasure (SPCC) Plan template, but it was not signed by the facility and is therefore incomplete and does not correct the violation as cited. Because this violation was not corrected by the compliance due date of 9/18/2019, the violation is now elevated to a Class II - Notice of Violation. CORRECTIVE ACTION: By October 18, 2019, provide copies of the signed pages of the SPCC Plan to CCHSHMP demonstrating that the SPCC Plan is complete.
Violation Division: Contra Costa County Health Services Department

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 09/18/2019. OBSERVATION: The site map submitted in CERS does not show the location of the diesel exhaust fluid. CORRECTIVE ACTION: By September 18, 2019, update the site map to show locations of all reportable hazardous materials storage and submit in CERS.
Violation Division: Contra Costa County Health Services Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 390318
Site Name: COLE EUROPEAN
Violation Date: 08-19-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 09/18/2019. OBSERVATION: During the inspection, CCHSHMP observed 3 drums of drained filters (2 storing paper filters and 1 storing drained metal filters) that did not have lids on the drums. CORRECTIVE ACTION: By September 18, 2019, provide documentation, such as photos, to CCHSHMP that shows the containers storing hazardous waste are closed.

Violation Description: Failure to prepare an SPCC Plan that meets all applicable requirements.
Violation Notes: Returned to compliance on 10/30/2019. OBSERVATION: The SPCC Plan does not address the person accountable for "discharge prevention." The

COLE EUROPEAN (Continued) **S113177549**

SPCC Plan does not address general containment requirements for transfers of petroleum. Attachment C is an outdated response plan with inaccurate phone numbers. Therefore, the SPCC Plan does not meet all the applicable requirements. CORRECTIVE ACTION: By September 18, 2019, update the SPCC Plan to include all applicable requirements and provide to CCHSHMP for review or schedule an inspection to review the updated SPCC Plan.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes: Returned to compliance on 10/11/2019. OBSERVATION: The facility stores used oil in a double wall tank and waste antifreeze in a double wall tank. The facility was unable to provide the initial Professional Engineer (PE) assessment of the tank storing used oil, which is a new tank installed in 2018. The facility was unable to provide the 5 year PE assessment of the tank storing waste antifreeze. CORRECTIVE ACTION: By October 18, 2019, provide copies of the most recent PE assessments for the tank storing used oil and the tank storing waste antifreeze or schedule a follow up inspection for CCHSHMP to review the PE assessments.

Citation: 22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes: Returned to compliance on 09/18/2019. OBSERVATION: The facility was unable to provide documentation of completed daily inspections of the hazardous waste tank systems. The used oil and waste antifreeze are stored in tanks and require daily hazardous waste tank system inspections. CORRECTIVE ACTION: By September 2019, provide documentation of completed daily hazardous waste tank system inspections for the used oil and waste antifreeze.
Violation Division: Contra Costa County Health Services Department
Violation Program: HW
Violation Source: CERS

Site ID: 390318

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each containerG s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."
Violation Notes: Returned to compliance on 10/02/2019. OBSERVATION: The facility is not completing monthly inspections of the tanks storing petroleum. If the facility is complying with industry standard Steel Tank Institute (STI) SP001, an annual inspection is also required. The SPCC Plan states all tanks will receive an independent tank inspection and testing service. The facility was unable to provide documentation of these 5 year inspections. CORRECTIVE ACTION: By September 18, 2019, provide copies of monthly and 5-year independent inspections to CCHSHMP or schedule an inspection with CCHSHMP so the documentation can be reviewed.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.

DESI AUTO REPAIR (Continued) **S121754560**

Violation Notes:	OBSERVATION: The business failed to complete and electronically submit a site map with all required content. There is no site map currently submitted in CERS. The site map on site is missing north orientation, and an evacuation staging area. Inspector assisted the facility in updating the existing map during the inspection. CORRECTIVE ACTION: Upload the new site map in a new CERS submittal under the 'Hazardous Materials Inventory' element.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: OBSERVATION: The business failed to maintain on site and submit a complete consolidated emergency response plan in CERS. The current consolidated emergency response plan was observed missing phone numbers for both the nearest medical facility and the regional water quality control board. The plan was also observed missing a listed evacuation staging area. CCHS-HMP assisted the owner in added the missing elements to the existing emergency response plan. CORRECTIVE ACTION: Upload the updated consolidated emergency response plan in a new CERS submittal.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as

KAISER SAND & GRAVEL COMPANY (Continued) **S101580744**

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 01/14/2020. OBSERVATION: Owner/Operator

AT&T WALNUT CREEK TSP (Continued) **S101580719**

failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. Spill container not tested during the UST inspection. Spill container last tested on 8/8/2018. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verify [Truncated]

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: Un-Specified
Violation Description: UST Program - Design/Construction - For use of Local Ordinance only.
Violation Notes: Returned to compliance on 02/09/2015.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS

Site ID: 52555
Site Name: North Main Shell #33
Violation Date: 01-22-2019
Citation: HSC 6.7 25290.1(c)(3),25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3),25290.2(c)(3)
Violation Description: Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003.
Violation Notes: Returned to compliance on 07/09/2019. OBSERVATION: Liquid (approx <1 gallon) was observed in the 87, 89, and diesel fill sumps. Work order records indicate approximately 20 gallons of liquid was removed from the 87 fill sump on December 3 and 5, 2018. No mention of repair of the source of liquid was made. If water could enter into the secondary

NORTH MAIN SHELL #33 (Continued) **S121787330**

containment by precipitation or infiltration, it must be removed and disposed of properly. The source of this liquid should be investigated and repaired. CORRECTIVE ACTION: Immediately remove this liquid and investigate/repair the source of liquid. Ensure that the 87, 89, and diesel fill sumps are maintained free of liquid.

Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS

Site ID: 52555
Site Name: North Main Shell #33
Violation Date: 01-22-2019
Citation: HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(d)
Violation Description: Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes: Returned to compliance on 01/22/2019. OBSERVATION: The 89 STP 208 sensor failed when initially tested. The continuous monitoring system shall be maintained to detect the entry of the liquid or vapor phase of the hazardous substance stored in the primary containment into the secondary containment and to detect water intrusion into the secondary containment. CORRECTIVE ACTION: The 89 STP 208 sensor was cleared of debris and retested and passed. Violation corrected on site. No further action required.

. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 138

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 176

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 388

Waste code: D009
Waste name: MERCURY

WALGREENS #4026 (Continued) **1016954406**

Amount (Lbs): 8

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 388

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 9

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 6

Waste code: U165
Waste name: NAPHTHALENE
Amount (Lbs): 1

RB Case Number: 07-0290
Local Agency: CONTRA COSTA COUNTY
File Location: Regional Board
Local Case Number: 20190
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The subject property is located on the northeast corner of the intersection of North Main Street and Treat Boulevard in Walnut Creek, California . The site is an operating Shell-branded service station with four underground storage tanks (USTs) and two dispenser islands. The surrounding area is primarily of commercial use. Exploratory boring logs show that soil types beneath the site consist primarily of clay and silt, with varying amounts of sand. Thin beds or lenses of sand, clayey sand, and gravelly sand occur to the depth of approximately 38 feet below grade (fbg). Depth to groundwater has ranged from approximately 10.7 to 24.7 fbg. The groundwater flow direction is predominantly to the northeast.

RCRAInfo is a national information system that supports the Resource

BEST AUTO PAINTING (Continued) **1000391036**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CHEVRON STATION #94640 (Continued) **S121737776**

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 09/23/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. 91 Grade UST Drop Tube shut-off valve not installed at a maximum of 95% capacity. 12/12/2018 inspection reported valve set at 97.4%. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Worker:	KEB
RB Case Number:	07-0612
Local Agency:	CONTRA COSTA COUNTY
File Location:	Not reported
Local Case Number:	47675
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Gasoline
Site History:	The site is occupied by an automobile dealership and previously contained one 1,000-gallon gasoline underground storage tank (UST) and one 500-gallon waste oil UST. Subsurface Environmental Corp. (SEC) removed the USTs on October 15, 1993 and collected soil samples to assess the condition of soils surrounding the USTs. Laboratory analytical results indicated no significant releases relative to the waste oil UST; however, a soil sample collected at ten feet in depth at the west end of the gasoline UST excavation cavity contained 520 milligrams per kilogram of Total Petroleum Hydrocarbons as Gasoline (TPH-G) and 4.0 mg/kg of Benzene. Based on these results, SEC returned to the site on November 17, 1993 to over excavate hydrocarbon-impacted soils beneath the former gasoline UST. The excavation was terminated at a depth of approximately 14 feet below grade level. A confirmation soil sample collected from the bottom of the over excavation cavity at a depth of 14 feet contained only 1.8 mg/kg of TPH-G and a 0.23 Benzene, with no detectable Lead. A UST closure report summarizing the tank removal and over excavation activities was submitted by SEC to the SFRWQCB on April 15, 1994. (05/24/2002 Report of Soil Boring Investigation)

Case Worker:	KEB
RB Case Number:	07-0890
Local Agency:	Not reported
File Location:	Regional Board
Local Case Number:	Not reported
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Ethylbenzene, Gasoline, Other Petroleum, Toluene, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	A 500-gallon gasoline UST was installed on the north side of the 2645 North Main Street building, in or around 1974. By the mid-1980s the UST was no longer in use, so the Site owner (Willert & Henriksen) elected to remove the UST from service. Based on its proximity to the building, Contra Costa County Health Services Department (CCCHSD) agreed that the UST could be closed-in-place, rather than being removed, on condition that the tank be proven to have not caused significant soil contamination due to product leakage.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 397534
Site Name: PORSCHE WALNUT CREEK
Violation Date: 06-04-2018
Citation: 22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes: Returned to compliance on 07/03/2018. OBSERVATION: Daily inspections of the Hazwaste tank system have not been conducted and documented. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the Hazwaste tank system is being properly inspected and documented. Perform daily inspections of all Hazwaste Tanks every day that you are operational (Mon-Sat). Email proof within 30 days.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/27/2020
Date Data Arrived at EDR: 04/28/2020

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/30/2020
Date Data Arrived at EDR: 01/30/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

2740 JONES ROAD
2740 JONES ROAD
WALNUT CREEK, CA 94597

TARGET PROPERTY COORDINATES

Latitude (North):	37.923551 - 37° 55' 24.78''
Longitude (West):	122.059645 - 122° 3' 34.72''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	582649.2
UTM Y (Meters):	4197544.5
Elevation:	95 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641124 WALNUT CREEK, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

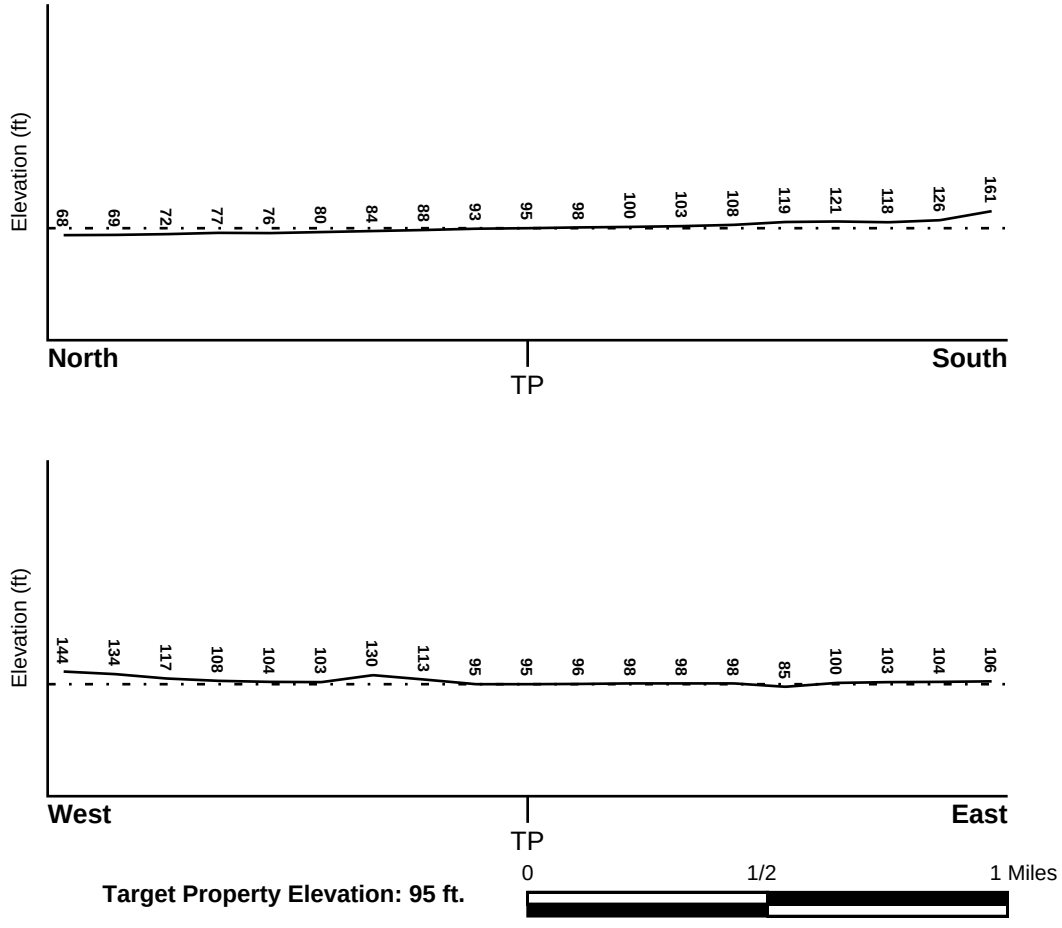
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 95 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06013C0291F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06013C0279F	FEMA FIRM Flood data
06013C0283F	FEMA FIRM Flood data
06013C0287F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
WALNUT CREEK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
A1	1/8 - 1/4 Mile NW	ENE
A2	1/8 - 1/4 Mile NW	NE
A3	1/4 - 1/2 Mile NW	Not Reported
4	1/2 - 1 Mile WSW	Not Reported
5	1/2 - 1 Mile SW	ENE
6	1/2 - 1 Mile SSW	Not Reported

4G	1/8 - 1/4 Mile NW	ENE
5G	1/2 - 1 Mile WSW	Not Reported
6G	1/2 - 1 Mile SW	ENE
7G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	29 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: TIERRA

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EXECUTIVE SUMMARY

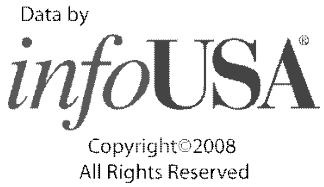
DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

07/24/20

Site Name:

2740 Jones Road
2740 Jones Road
Walnut Creek, CA 94597
EDR Inquiry # 6133154.3

Client Name:

Roux Associates Inc
555 12th Street Suite 250
Oakland, CA 94607
Contact: Josh Fox

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Roux Associates Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0408-4715-9530

PO # NA

Project 2740 Jones Road

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0408-4715-9530

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Roux Associates Inc (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Hi Katherine,

Glad we connected.
As I said the Environmental Health Division - Land Use Program does not have records for the address's listed above.
Nice to hear that you've also contacted HAZMAT.

Have a splendid day!

Good Morning:

We have no records for:
2740 Jones Road and 2747, 2731, 2751, 2771, 2776 Oak Road, Walnut Creek, California, with APNs 172-012-001, 172-012-007, 172-012-008, 172-012-020, 172-012-021, 172-012-023, 172-012-025, and 172-012-026

Our records go back to 1986, anything prior to this would be the jurisdiction of the local fire department.

FYI: CalEPA has a new website that combines data about environmentally regulated sites and facilities in California into a single, searchable database and interactive map. By combining data from a variety of state and federal databases, the portal provides an overview of regulated activities across the spectrum of environmental programs for any given location in California.

The link to the CalEPA Regulated Site Portal is: https://siteportal.calepa.ca.gov/nsite/

Hello,

Please see the attachment for a response to your Public Records Act request. A hard copy will not follow but may be available upon request.

If you have any questions, please feel free to send an e-mail to Berkeleyfileroom@dtsc.ca.gov or call the DTSC Berkeley Office at (510)-540-3800. Please continue to use this Regional File Room e-mail box for future communication as it allows us to respond more efficiently to your requests. Have a nice day and be well.

Thank you,

Christina de la Vega

Public Records Request Number: 2-072920-02
Location(s): 2740 Jones Rd. & 2747, 2731, 2751, 2771, 2776 Oak Rd., Walnut Creek, CA; APNs: 172-012-001, 172-012-007, 172-012-008, 172-012-020, 172-012-021, 172-012-023, 172-012-025, and 172-012-026

Dear Ms. Grellman:

We have received your Public Records Act Request at the Department of Toxic Substances Control (DTSC). Upon thorough review of our files, we found no records pertaining to the site(s) referenced above.

We were unable to locate an address in the county database using the APNs provided and we are unable to search our records using APNs as our databases do not include this information. If you have a specific address or cross streets, please let us know.

For information regarding public reports on hazardous waste shipments of generators, transporters, and TSDFs, you can access our Hazardous Waste Tracking System (HWTS) online at: https://hwts.dtsc.ca.gov/. Select the “Reports” tab for search options. If you are interested in retrieving detailed reports, please contact the HWTS unit via e-mail: hwtsreports@dtsc.ca.gov or phone: 1-800-618-6942. Customized reports may require a fee. For copies of manifests, please send an e-mail to mcr@dtsc.ca.gov.

In addition, the DTSC provides access to public records online via EnviroStor; another data management system that tracks our efforts in cleanup, permitting, enforcement, and investigation of known/suspected hazardous waste sites and facilities. The available data is updated in real-time. You can access Envirostor online at www.envirostor.dtsc.ca.gov. Navigate the website easily by clicking the "How to Use EnviroStor" tab, then selecting the option “Take a Tour”.

If you have any questions or would like further information regarding your request, please contact me via phone: 510-540-3800 or e-mail: Berkeleyfileroom@dtsc.ca.gov.

Sincerely,

Christina de la Vega
Regional Records Coordinator

RECORDS RESEARCH REQUEST FORM

	DATE: July 30, 2020
SITE ADDRESS FOR RESEARCH: 2740 Jones Road and 2747, 2731, 2751, 2771, and 2776 Oak Road, Walnut Creek, California, 94597	**APN:** *(if available)* 172-012-001, 172-012-007, 172-012-008, 172-012-020, 172-012-021, 172-012-023, 172-012-025, and 172-012-026

YOUR NAME: Katherine Grellman	**RELATIONSHIP TO ADDRESS:** ☐OWNER ☒CONSULTANT ☐POTENTIAL BUYER ☐OTHER _____
YOUR ADDRESS: *(w/ City, State & Zip)* Roux Associates, 555 12th Street, Suite 250, Oakland, CA	

PHONE NUMBER: 415-686-6824	**FAX NUMBER:**	**E-MAIL ADDRESS:** kgrellman@rouxinc.com
PREFERRED METHOD OF CONTACT: ☐ Phone ☒ E-Mail		

INFORMATION REQUESTED

☒ Entire Permit History	☐ Specific Permit History	☒ Environmental Assessment *(SEE #5 BELOW)*
Please give a description of what you are looking for: Roux Associates will be conducting a Phase I ESA for the property associated with 2740 Jones Road and multiple addresses at Oak Road, Walnut Creek, listed above. We are interested in all files for the property's entire history.		
COPIES OF: ☒ Permits	☐ Plans *(see note below item #3 & #4 below)*	☒ Summary of Permits
DELIVERY METHOD: ☐ Mail	☐ In-person ☐ Verbally	☒ E-mail

TERMS AND CONDITIONS:

1. Research is provided on a first-come-first-serve basis. During busy periods or staffing shortages, requests may not be completed on the same day. If we cannot assist you on the same day, a Permit Technician will contact you within three (3) to ten (10) working days, depending on available staffing, to let you know when the request will be completed.

2. Fees for services are payable by cash, check, VISA or MASTERCARD. A Permit Technician will notify applicant with estimate of charges prior to printing any documents. Costs for services are on page 37 without our Current Fees & Charges, located on our website.

3. When requesting copies of plans, current homeowner written permission is required. **The applicant must obtain the Owner's authorization PRIOR to submitting for research**.

NOTE: THE CITY OF WALNUT CREEK MAY NOT HAVE PLANS FOR PROJECTS PRIOR TO 1985.

4. If a licensed architect or engineer has stamped the plans, State Law requires the department to request permission before making the plans available to you. This process may take up to thirty (30) calendar days. Once permission is granted, the Permit Technician will print the documents. The printing process may take a few days, depending on the size of the project.

CONTINUED ON NEXT PAGE…

NOTE: THERE IS A $26.00 ADMINISTRATIVE FEE FOR PROCESSING EACH AFFIDAVIT. EACH LETTER OF RELEASE SENT OUT MUST BE SENT BY CERTIFIED MAIL. APPLICANT SHALL PAY ALL CERTIFIED MAILING FEES AND AFFIDAVIT PROCESSING FEE PRIOR TO MAILING LETTERS OF RELEASE.

5. For Environmental Assessments, the Permit Technicians can generate a report for history from 2001 to present. If the information that you are requesting is prior to 2001, the Permit Technician will pull the microfiche for that property for you to come view.

6. If there is no activity on your request for 30 days (unless have started the affidavit process), your request will be closed. In order to continue with your application process, you will need to resubmit a new application.

OWNER'S AUTHORIZATION TO RELEASE PLANS:

I CERTIFY THAT I AM THE LEGAL PROPERTY OWNER OF THE ABOVE MENTIONED ADDRESS AND THAT I AUTHORIZE THE RELEASE OF PLANS TO THE APPLICANT.

Signature of Owner	**Date**
Printed Name of Owner	**Daytime Phone Number**
Address	**City/State/Zip**

APPLICANT'S ACKNOWLEDGEMENT:

BY SIGNING THIS FORM, YOU, AS THE APPLICANT, ACKNOWLEDGE THAT ANY FEES THAT ARE ASSOCIATED WITH THIS RECORDS REQUEST ARE YOUR RESPONSIBILITY. AFTER NOTIFICATION FROM A PERMIT TECHNICIAN THAT THE RECORDS REQUEST IS COMPLETE, THE APPLICANT HAS THIRTY CALENDAR (30) DAYS TO PICK-UP AND PAY FOR YOUR REQUEST. AFTER THIRTY DAYS, THE REQUEST WILL BE SENT TO COLLECTIONS IF ANY BALANCE IS DUE.

Katherine Grellman	July 30, 2020
Signature of Applicant	**Date**

Good afternoon, Katherine!

Due to the Contra Costa Health Order, we are unable to process file review requests until further notice. This includes sending any files electronically.

We apologize for any inconvenience.

Please be sure to check with Contra Costa County Hazmat at cchazmat@cchealth.org or (925) 655-3200 for hazardous materials plans.

Thank you!

Per the Order of the Health Officer of Contra Costa County, effective April 22, 2020, it is required to wear a face covering when working at or visiting an essential business. For more information on the County developments of COVID-19, please visit https://www.coronavirus.cchealth.org/.

Administration Office hours are Monday through Friday 8:00 AM – 5:00 PM.

Best regards,

Lynette R.

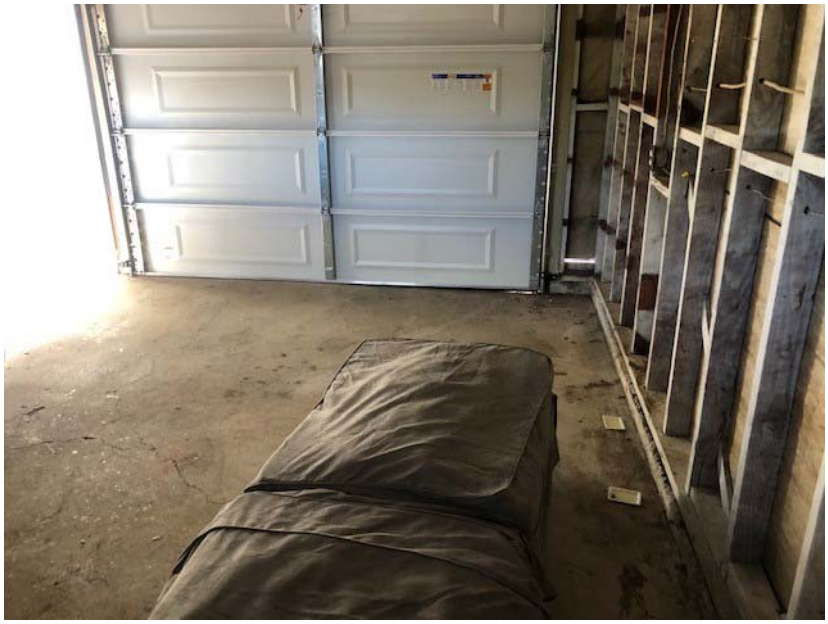

Photograph 31: View of garage at 2747 Oak Road residence.

APPENDIX H

User Questionnaire

ASTM E 1527-13 User Questionnaire

In order to qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the **User** (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: 2747 JONES RD

Person Interviewed/Title: MARSHALL TORRE SUMMERHILL HOMES Date: 7-27-20

If known, when was the property initially developed? 1940'S PER GOOGLE - PALMER SCHOOL

If different, when were the current building(s) on the property constructed? UNKNOWN

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

Yes ☐ No ☐ If you answer yes, please include an explanation in the space provided below:

UNKNOWN

2. Activity and land use limitations that are in place on the *property* or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of recorded *land title records* (or judicial records where appropriate, see note 1 below) identify AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed against the *property* under federal, tribal, state, or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes ☐ No ☐ If you answer yes, please include an explanation in the space provided below:

TITLE REPORT PROVIDED TO ROUX 7-2-20

Note 1 - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
Do you have any specialized knowledge or experience related to the *property* or nearby properties?
For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes [ ] No [X] If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes [X] No [ ] If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *property*?

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *property*?

Yes [ ] No [X] EXCEPT FOR GOOGLE PALMER SCHOOL OPERATED FOR 80 YEAR

b. Do you know of specific chemicals that are present or once were present at the *property*?

Yes [ ] No [X]

c. Do you know of spills or other chemical releases that have taken place at the *property*?

Yes [ ] No [X]

d. Do you know of any environmental cleanups that have taken place at the *property*?

Yes [ ] No [X]

If you answered yes to any of the questions above, please include an explanation in the space provided below:

6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes ☐ No ☒ If you answer yes, please include an explanation in the space provided below:

Phase I ESA Questionnaire
ASTM E1527-13

	Question	Seller/Tenant/Buyer			Observed During Site Walk		If "Yes" Please provide more details
1	Is the property used for an industrial use?	Yes	(No)	Unk	Yes	No	
2	Is any adjoining property used for an industrial use?	Yes	(No)	Unk	Yes	No	
3	Did you observe evidence or do you have any prior knowledge that the property has been used for an industrial use in the past?	Yes	(No)	Unk	Yes	No	
4	Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	(No)	Unk	Yes	No	
5	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	(No)	Unk	Yes	No	
6	Did you observe evidence or do you have any prior knowledge that the property was used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	(No)	Unk	Yes	No	
7	Did you observe evidence or do you have any prior knowledge that any adjoining property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	(No)	Unk	Yes	No	
8	Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	Yes	(No)	Unk	Yes	No	

Question	Seller/Tenant/Buyer	Observed During Site Walk	If "Yes" Please provide more details
9 Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	Yes (No) Unk	Yes No	
10 Did you observe evidence or do you have any prior knowledge that there have been previously any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes (No) Unk	Yes No	

Question	Seller/Tenant/Buyer	Observed During Site Walk	If "Yes" Please provide more details
11 Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site?	Yes **(No)** Unk	Yes No	
12 Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is of an unknown origin?	Yes **(No)** Unk	Yes No	
13 Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes **(No)** Unk	Yes No	
14 Did you observe evidence or do you have any prior knowledge that there have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes **(No)** Unk	Yes No	
15 Is there currently any stained soil on the property?	Yes **(No)** Unk	Yes No	
16 Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the property?	Yes **(No)** Unk	Yes No	
17 Are there currently any registered or unregistered storage tanks (above or underground) located on the property?	Yes **(No)** Unk	Yes No	
18 Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the property?	**(Yes)** No Unk	Yes No	±50 gal. tank removed 25 years ago 2771 Oak Road
19 Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes **(No)** Unk	Yes No	

Phase I ESA Questionnaire
ASTM E1527-13

Question	Seller/Tenant/Buyer	Observed During Site Walk	If "Yes" Please provide more details
20 Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	(Yes) No Unk	Yes No	See #18
21 Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	Yes (No) Unk	Yes No	
22 Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring drains, walls, ceilings or exposed grounds on the property ?	Yes (No) Unk	Yes No	
23 If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes (No) Unk	Yes No	
24 If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	Yes (No) Unk	Yes No	
25 Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes (No) Unk	Yes No	

Question	Seller/Tenant/Buyer	Observed During Site Walk	If "Yes" Please provide more details
26 Has the owner or occupant of the property been informed of the current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes (No) Unk	Yes No	
27 Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	Yes (No) Unk	Yes No	
28 Has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?	Yes (No) Unk	Yes No	
29 Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	Yes (No) Unk	Yes No	
30 Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	Yes (No) Unk	Yes No	
31 Does the property discharge waste-water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?	Yes (No) Unk	Yes No	
32 Does the property discharge waste water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a sanitary sewer system?	Yes (No) Unk	Yes No	

Question	Seller/Tenant/Buyer	Observed During Site Walk	If "Yes" Please provide more details
33 Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property ?	Yes (No) Unk	Yes No	
34 Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes (No) Unk	Yes No	
35 Were there any previous environmental assessments done at the Property? If "Yes", please make the documents available.	Yes (No) Unk	Yes No

Palmer Questions for County 7-29-20

1. Please confirm PD zoning is the appropriate process for this project considering the various zoning designations on the site and that the PD zoning will determine all zoning standards including guest parking at a ratio of less than .25 due to proximity of the BART Station. It is our belief that the current zoning designations are not conducive for the development of this assemblage of properties. Please confirm General Plan and Zoning conformance.
2. The M-29 zoning district is consistent with the General Plan, but the height limit of 30' is not consistent with the M-29 density range. We assume this can be modified through the PD process, please confirm.
3. How does Staff determine the efficacy of discretionary zoning related to the PD zoning process?
4. Does Preliminary Application review process include public or neighborhood noticing?
5. Explain Preliminary Application submittal process, minimum requirements and timing due to short 45-day feasibility period. Please identify any design, architectural issues and required design guidelines. Please advise the length of staff review process.
6. What are the steps needed including all applications necessary to secure entitlements including CEQA, zoning, design review, tree removal, grading, demolition permits and subdivision approval?
7. Typical timing for entitlements approval? What are timelines for staff review of submittals, 30 days for 1st submittal? 2nd and 3rd Subsequent submittals?
8. Do all entitlements go to Planning Commission only including CEQA or first Planning Commission and then Board of Supervisors.
9. Board or Planning Commission meeting vacations/interruptions?
10. CEQA requirements (MND or EIR)? How prepared. Accept info from applicant's tree report, AQ, noise, cultural/archeology, historical, geotech, phase 1 and 2 environmental and biological?
11. Walnut Creek sphere of influence (pre-zoned XX). Implications/limitations?
12. Tree Removal process? Part of entitlement process? How are Heritage Trees removal permits acquired?
13. Any historical resources identified on the site?
14. We understand that City of Walnut Creek will not formally be involved with this application? Please confirm. We are not anticipating this property will be annexed into the City of Walnut Creek.
15. The Inclusionary Housing Ordinance provides that project may pay in-lieu BMR fees rather than provide BMR units on site. Are there any other means of compliance?
16. Please provide contact persons responsible for Planning, Public Works, Building Dept and Fire Dept to assist in determining comprehensive entitlement and development fees including but not limited planning, building, subdivision, inclusionary, park-in-lieu and all applicable engineering and fire fees along with any other pertinent requirements i.e.: propane limitations on decks?
17. Please provide a list of fees/costs that are subject to T&M charges.
18. Any political or school closure issues with Walnut Creek, neighborhood groups, others?

19. Any recent changes to zoning or development regulations? Any pending?
20. What level of review would the City of Walnut Creek be involved with this application? We anticipate the County would be the lead agency from Pre-App thru entitlement, site improvements and building permit review process. We are not anticipating this property will be annexed into the City of Walnut Creek.
21. Any suggestions?

Civil Questions

1. We anticipate no right of way dedication is required on Oak Road or Jones Road.
2. We anticipate the internal fire access roadways will be 26' curb to curb and the alleyways (between buildings) would be 20' wide with rolled curb & gutters.
3. As a part of the Pre-App review, we assume the County would solicit comment/input from the County Fire Department. Would the applicant need to meet with the County Fire separately for their input on roadway widths and access requirements?
4. We anticipate all internal roadways and drainage facilities will be privately owned and maintained by HOA.
5. We anticipate the proposed location of driveways on Oak Road and Jones Road are acceptable.
6. We assume the existing overhead utility lines on Oak Road along the project frontage would be underground similar to the property to the north. We noticed there is no street trees along the property to the north. Will the County be looking for similar "open" appearance along the project frontage on Oak and Jones Roads? We assume the existing street trees on Oak Road are to remain.
7. Any known offsite drainage issues surrounding the project site. We will reach out to the County Public Works staff as well.
8. We understand this property is served by Central Sanitary District and CCCWD. Any known capacity issues we should be aware of. Likewise, we will and have reached out to the District.
9. We are not anticipating many retaining walls with the proposed development. But any maximum wall heights restriction and how are the heights of wall measured (from top of footing?).

Architectural Questions

1. Net site area is to be calculated as .8 x gross site area, please confirm.
2. Density is calculated as number of units / net site area, please confirm.
3. We are assuming that Oak Rd. is the project frontage and would be considered the front setback distance, please confirm.
4. These are the setback distances we have used in our site planning, please confirm:
    1. Front = 20'
    2. Sides = 15'
    3. Rear = 20'
    4. Between Buildings = 20'
    5. Architectural projections such as covered porches and decks are allowed to encroach into setbacks at least 5' – please confirm.
5. Open space requirements are 25% of the site area? Please confirm and provide any minimum dimensional requirements.

6. Building coverage is proposed to be 40% maximum, please confirm.
7. We are using a guest parking ratio of .25/unit, please confirm.
8. We understand that required parking can be satisfied with on-street parking along the project frontage, please confirm.
9. It is our understanding that EV stalls are not required for surface parking. Please confirm.
10. It is our understanding that 26’ main drive aisles and 20’ alleys per fire code are permitted. Please confirm.
11. Residential trash service is planned to be individual trash/recycling carts, picked up from the driveway aprons, and stored in designated locations within the individual unit garages. Please confirm.
12. The project will comply with current California Building Codes, and Energy Codes. Are there any other specific Green Energy Codes that would apply to the project?

SUMMERHILL HOMES℠

COMMUNITIES OF DISTINCTION

Project Description **7-30-20**

SummerHill Homes Townhomes at
2740 Jones Road
Contra Costa County
Walnut Creek, CA

Background

SummerHill Homes proposes to redevelop a 5.7-acre site with a vibrant new 3 story town home community at Jones and Oak Roads.
This Project Description accompanies the Preliminary Review Procedure Application to provide additional information to City staff of the project qualities and characteristics.

Location and Setting

The site is located at 2740 Jones Road and contains several existing buildings, homes, structures and was the site of the Palmer School until the advent of Covid 19 which resulted in a permanent closure.
The site is generally flat and extends between Jones and Oak Roads. The property is surrounded by offices, hotel/spa and two- and three-story rental apartments, townhouses and about a dozen small lot single family detached homes. Interstate 680 and the BART tracks are to the immediate west and the Pleasant Hill BART station is a short walk to the north.

Project Overview

- SummerHill Homes proposes to develop 114 three story for sale townhomes on the site consistent with the General Plan density of 22-29.9 du/ac. The proposed density is less than 25 du/acre. The massing and articulation of the four to nine-unit townhome buildings will be consistent with established neighborhood immediately to the north of the site.
- Three-unit types are proposed and range in size from 1,600 sf to 2,100 sf with attached two car garages, 3 to 4 bedrooms and 2.5 to 3.5 bathrooms.
- Building height ranges from 37' to 40' to the ridge line.
- Setbacks vary from 15' to 20' and will be remain flexible until the final site plan is designed.
- The preliminary programming of the project includes common landscaped open space and retention of the large oak near the Oak St frontage.
- A significant centrally located common open space area and other similar smaller gathering areas are included. Approximately 25% of the site is open space. Project arborist identified significant trees including the largest one on the site to be retained as shown on the Preliminary Conceptual Site Plan and tree map which are included in the Pre-Application materials. A tree report including all the trees will accompany the formal application.

- Parking is provided and includes approximately 264 spaces with an attached 2 car garage for each home. Approximately 34 surface parking spaces are provided not including adjacent offsite parking along Jones and Oak Roads which we understand can also be counted for required parking. 257 spaces are required.
- Primary vehicular access is provided from the main driveways on Jones and Oak Roads which also serve as emergency vehicle access.
- The project will benefit the County's affordable housing program by contributing an in-lieu fee in accordance with the County requirements.

Requested Approvals
The project will require PD zoning, Land Use Permit with Final Development Plan, Vesting Tentative Map, Tree Removal Permit, Demolition Permit, Grading Permit and CEQA approval.

Design and Construction
The residential units will be built to an R-2 Occupancy Classification and be fully sprinklered.

Sustainability
SummerHill Homes will construct the project in compliance with California Green Building Standards Code (Title 24) in effect at the time. The projects grading, drainage and storm water runoff plans will minimize changes to the grade, contain as much water on site, and appropriately filter runoff.

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.0013S000; 2740 Jones
WorkOrder: 2008735

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.0013S000; 2740 Jones
WorkOrder: 2008735

Analytical Qualifiers

B	Analyte detected in the associated Method Blank and in the sample.
J	Result is less than the RL/ML but greater than the MDL. The reported concentration is an estimated value.
P	Agreement between quantitative confirmation results exceed method recommended limits.
S	Surragote recovery outside accepted recovery limits.
a3	Sample diluted due to high organic content interfering with quantitative/or qualitative analysis.
c1	Surrogate recovery outside of the control limits due to the dilution of the sample.
e7	Oil range compounds are significant.

Quality Control Qualifiers

F2	LCS/LCSD recovery and/or RPD/RSD is out of acceptance criteria.
F3	The surrogate standard recovery and/or RPD is outside of acceptance limits.

The following SampID: 005A contains testgroup Gas8260_S.

Comments:

NOTE: Soil samples are discarded 60 days after results are reported unless other arrangements are made (Water samples are 30 days).
Hazardous samples will be returned to client or disposed of at client expense.

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Analytical Report

WorkOrder: 2008735 A

Report Created for: Roux Associates, Inc.

555 12th Street, Suite 250
Oakland, CA 94607

Project Contact: Charmayne Floyd
Project P.O.:
Project: 2965.0013S000; 2740 Jones

Project Received: 08/14/2020

Analytical Report reviewed & approved for release on 09/04/2020 by:

Yen Cao
Project Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.0013S000; 2740 Jones
WorkOrder: 2008735 A

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

2008735-010A	RB-5-1	Soil	SW6020 (Chromium) (STLC)	1	16OZ GJ, Unpres	8/14/2020 11:05	5 days*		☐	

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

"When Quality Counts"

Analytical Report

WorkOrder: 2009678

Report Created for: Roux Associates, Inc.

555 12th Street, Suite 250
Oakland, CA 94607

Project Contact: Charmayne Floyd
Project P.O.:
Project: 2965.0013 S000; 2740 Jones Rd.

Project Received: 09/15/2020

Analytical Report reviewed & approved for release on 09/22/2020 by:

Yen Cao
Project Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.0013 S000; 2740 Jones Rd.
WorkOrder: 2009678

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.0013 S000; 2740 Jones Rd.
WorkOrder: 2009678

Analytical Qualifiers

J	Result is less than the RL/ML but greater than the MDL. The reported concentration is an estimated value.
e2	Diesel range compounds are significant; no recognizable pattern.
e7	Oil range compounds are significant.

Quality Control Qualifiers

F2	LCS/LCSD recovery and/or RPD/RSD is out of acceptance criteria.

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Sample Receipt Checklist

Client Name: **Roux Associates, Inc.**
Project: **2965.0013 S000; 2740 Jones Rd.**

WorkOrder №: **2009678** Matrix: Soil
Carrier: Client Drop-In

Date and Time Received: **9/15/2020 11:59**
Date Logged: **9/15/2020**
Received by: Tina Perez
Logged by: Lilly Ortiz

Chain of Custody (COC) Information

Chain of custody present?	Yes	☑	No	☐		
Chain of custody signed when relinquished and received?	Yes	☑	No	☐		
Chain of custody agrees with sample labels?	Yes	☑	No	☐		
Sample IDs noted by Client on COC?	Yes	☑	No	☐		
Date and Time of collection noted by Client on COC?	Yes	☑	No	☐		
Sampler's name noted on COC?	Yes	☑	No	☐		
COC agrees with Quote?	Yes	☐	No	☐	NA	☑

Sample Receipt Information

Custody seals intact on shipping container/cooler?	Yes	☐	No	☐	NA	☑
Shipping container/cooler in good condition?	Yes	☑	No	☐		
Samples in proper containers/bottles?	Yes	☑	No	☐		
Sample containers intact?	Yes	☑	No	☐		
Sufficient sample volume for indicated test?	Yes	☑	No	☐		

Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	Yes	☑	No	☐	NA	☐
Samples Received on Ice?	Yes	☑	No	☐		
(Ice Type: WET ICE)						
Sample/Temp Blank temperature	Temp: 3.2°C				NA	☐
Water - VOA vials have zero headspace / no bubbles?	Yes	☐	No	☐	NA	☑
Sample labels checked for correct preservation?	Yes	☑	No	☐		
pH acceptable upon receipt (Metal: <2; Nitrate 353.2/4500NO3: <2; 522: <4; 218.7: >8)?	Yes	☐	No	☐	NA	☑
UCMR Samples:						
pH tested and acceptable upon receipt (200.8: ≤2; 525.3: ≤4; 530: ≤7; 541: <3; 544: <6.5 & 7.5)?	Yes	☐	No	☐	NA	☑
Free Chlorine tested and acceptable upon receipt (<0.1mg/L)?	Yes	☐	No	☐	NA	☑

"When Quality Counts"

Analytical Report

WorkOrder: 2012818

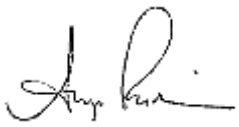
Report Created for: Roux Associates, Inc.

555 12th Street, Suite 250
Oakland, CA 94607

Project Contact: Charmayne Floyd
Project P.O.:
Project: 2965.00138000; 2740 Jones

Project Received: 12/15/2020

Analytical Report reviewed & approved for release on 12/23/2020 by:



Angela Rydelius
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in a case narrative.

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.00138000; 2740 Jones
WorkOrder: 2012818

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc.
Project: 2965.00138000; 2740 Jones
WorkOrder: 2012818

Analytical Qualifiers

J	Result is less than the RL/ML but greater than the MDL. The reported concentration is an estimated value.
S	Surrogate recovery outside accepted recovery limits.
c2	Surrogate recovery outside of the control limits due to matrix interference.

Quality Control Qualifiers

F3	The surrogate standard recovery and/or RPD is outside of acceptance limits.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Case Narrative

Roux Associates 555 12th Street Suite 250 Oakland, CA 94607 Charmayne Floyd	Lab Job Number: 432357 Project No: 2965.0013S000 Location: 2740 Jones Road, Walnut Creek Date Received: 08/14/20

This data package contains sample and QC results for one air sample, requested for the above referenced project on 08/17/20. The sample was received intact.

Volatile Organics in Air by MS (EPA TO-15):
No analytical problems were encountered.

Volatile Organics in Air GC (ASTM D1946):
No analytical problems were encountered.

Volatile Organics in Air GC - TO3 (EPA TO-3M):
High RPD was observed for TPH gasoline in the SDUP of RB-2-SV (lab # 432357-001). No other analytical problems were encountered.

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: Roux Associates Project: _____

Date Received: 8/18/20 Sampler's Name Present: ☑ Yes ☐ No

Section 2

Sample(s) received in a cooler? ☐ Yes, How many? _____ ☑ No (skip section 2) Sample Temp (°C) (No Cooler): ambient

Sample Temp (°C), One from each cooler: #1: _____ #2: _____ #3: _____ #4: _____

(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)

Shipping Information: GSO

Section 3

Was the cooler packed with: ☐ Ice ☐ Ice Packs ☐ Bubble Wrap ☐ Styrofoam ☐ Paper ☐ None ☐ Other _____

Cooler Temp (°C): #1: _____ #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

Section 5 Explanations/Comments

_____

_____

_____

Section 6

For discrepancies, how was the Project Manager notified? ☐ Verbal PM Initials: _____ Date/Time _____

☐ Email (email sent to/on): _____ / _____

Project Manager's response:

Completed By: _____ Date: 8/18/20

Case Narrative

Roux Associates 555 12th Street Suite 250 Oakland, CA 94607 J. Aguayo	Lab Job Number: 434672 Project No: 2965.0013S000 Location: 2740 Jones Road, Walnut Creek Date Received: 10/08/20

This data package contains sample and QC results for four air samples, requested for the above referenced project on 10/08/20. The samples were received intact.

Volatile Organics in Air by MS (EPA TO-15):
High response was observed for bromomethane in the CCV analyzed 10/09/20 09:25; affected data was qualified with "b". High recovery was observed for bromomethane in the LCS for batch 254066; this analyte was not detected at or above the RL in the associated samples. No other analytical problems were encountered.

Volatile Organics in Air GC (ASTM D1946):
No analytical problems were encountered.

Volatile Organics in Air GC - TO3 (EPA TO-3M):
No analytical problems were encountered.

AIR TESTING - CHAIN OF CUSTODY
& PURCHASE ORDER

Chain of Custody # : _____

C&T LOGIN # 434672

Project No: 2965.00135000
Project Name: 2740 Jones Road
EDD Format: _____ Rpt Level: II III IV
Turnaround Time: ☒ RUSH Quickest possible. ☐ Standard

Sampler: J. Aguayo / L. Howard
Report To: J. Aguayo / J. Fox / A. Cutting
Company: ROUX Associates
Telephone: (510) 569-2323
Email: jaguayo@rouxinc.com / jfox@rouxinc.com / acutting@rouxinc.com

Lab No.	Sample ID.	Sampling Information					TESTING REQUESTED				
		Date Collected	Time Collected	Canister ID (Bar Code #)	Flow Controller ID	Sample Volume (Gauge Reading)	VOCs by TO-15	TPHg by TO-3	He + O2 by ASTM-D1946		
	RB-6-SV	10/8/20	0830	100	A00473	-5	X	X	X		
	RB-8-SV	↓	0839	455	A00483	-6	X	X	X

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: Geologica Project: CBRE.001

Date Received: 10/8/20 Sampler's Name Present: ☑ Yes ☐ No

Section 2

Sample(s) received in a cooler? ☐ Yes, How many? _____ ☑ No (skip section 2) Sample Temp (°C) (No Cooler): ambient

Sample Temp (°C), One from each cooler: #1: _____ #2: _____ #3: _____ #4: _____

(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)

Shipping Information: _____

Section 3

Was the cooler packed with: ☐ Ice ☐ Ice Packs ☐ Bubble Wrap ☐ Styrofoam ☐ Paper ☐ None ☐ Other _____

Cooler Temp (°C): #1: _____ #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

Section 5 Explanations/Comments

Section 6

For discrepancies, how was the Project Manager notified? ☐ Verbal PM Initials: _____ Date/Time _____

☐ Email (email sent to/on): _____ / _____

Project Manager's response:

Completed By: _____ Date: 10/8/20
