# CALIFORNIA ENVIRONMENTAL QUALITY ACT ENVIRONMENTAL CHECKLIST FORM INITIAL STUDY (IS 20-112)

| 1. Project Title:                  | Flower Lady Farms, Inc.   |
|------------------------------------|---|
| 2. Permit Numbers:                 | Minor Use Permit (MUP 20-27)<br>Early Activation (EA 20-112)<br>Initial Study (IS 20-112)                   |
| 3. Lead Agency Name and Address:   | Lake County Community Development Department<br>255 N. Forbes Street; Lakeport, CA 95453                    |
| 4. Contact Person:                 | Eric Porter – Associate Planner<br>County of Lake – Community Development<br>Department – Planning Division |
| 5. Project Location(s):            | 12345 Siegler Canyon Road, Middletown, CA 95461   |
| 6. Assessor Parcel Number (APN):   | 012-024-43  |
| 7. Project Sponsor's Name/Address: | Flower Lady Farms, INC.<br>10336 Lock Lomond Road # 119<br>Middletown, CA 95461                             |
| 8. Property Owner(s) Name/Address: | Robert Malcolm Dunshee<br>PO Box 1126<br>Cobb, CA 95426   |
| 9. Zoning Designations:            | "RR-W - Rural Residential & Wetlands  |
| 10. General Plan Designation:      | Rural Lands   |
| 11. Supervisor District:           | District Five (5)   |
| 12. Slope:                         | The area where the cannabis cultivation will occur has an average cross slope of less than 10%.             |
| 13. Fire Hazard Severity Zone:     | SRA – High Fire Severity Zone   |

| 14. Earthquake Fault Zone:       | Not within a fault zone                  |
|----------------------------------|--|
| 15. Dam Failure Inundation Area: | Not within a Dam Failure Inundation Zone |
| 16. Flood Zone:                  | Not within a known flood zone.           |
| 17. Waste Management:            | On-site Waste Management System (Septic) |
| 18. Water Access:                | Permitted Existing on-site well          |

**19.** Description of Project: (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation. Attach additional sheets if necessary).

The applicant is proposing an "A-Type 2B - Small Mixed-Light" and a <u>Type 13 Distributor</u> <u>Transport Only, Self-Distribution licenses</u> (which allows the transportation of cannabis from their operation site to a licensed cannabis distribution and manufacturing facilities throughout the State of California) to allow a commercial cannabis cultivation operation on a parcel approximately 22.99 acres in size.

### **CONSTRUCTION:**

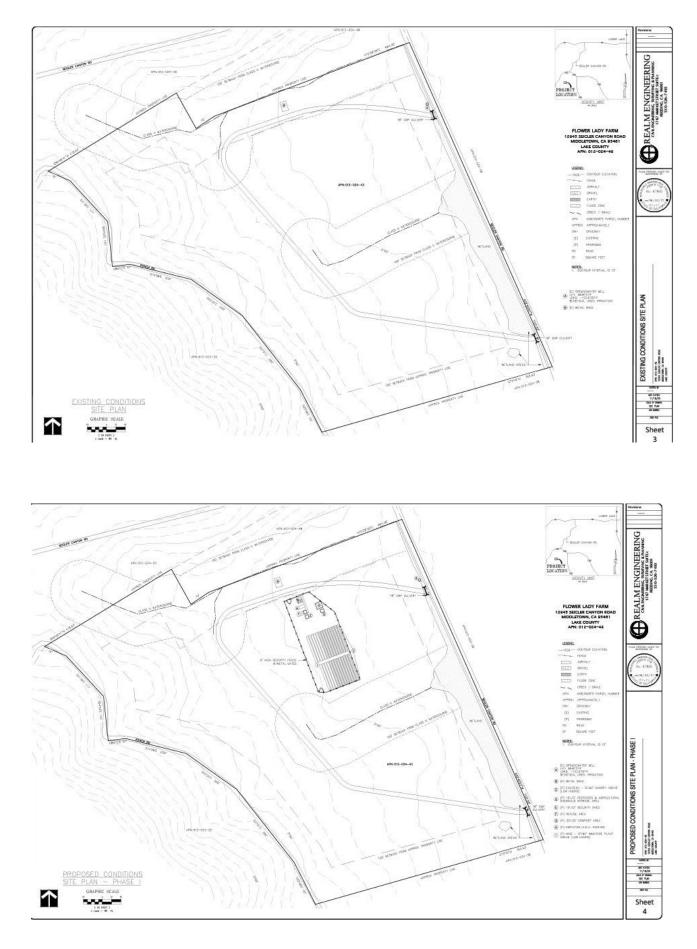

- The proposed commercial cannabis cultivation operation will be developed in three (3) phases, each with <10,000 ft<sup>2</sup> of Canopy area.
  - <u>Phase 1:</u> The total cultivation *area* (*as defined in Chapter 21, Article 27 of the Lake County Code*) of the proposed cannabis cultivation operation will be 14,820 ft<sup>2</sup>, composed of twenty-seven (27) 6'x90' "Low Hoops" (*mixed-light cultivation areas described below*), a 120 ft<sup>2</sup> Security Center/Shed, and a 120 ft<sup>2</sup> Pesticides & Agricultural Chemicals Storage Area.
  - Phase II: The total cultivation area of the proposed cannabis cultivation operation during of site/project development, will be 14,400 ft<sup>2</sup>, composed of eighteen (18) 6'x90' "Low Hoops", a 1,440 ft<sup>2</sup> Processing Building, a 3,000 ft<sup>2</sup> greenhouse, a 120 ft<sup>2</sup> Security Center/Shed, and a 120 ft<sup>2</sup> Pesticides & Agricultural Chemicals Storage Area.
  - **Phase III:** The total cultivation area of the proposed cannabis cultivation operation will be 16,680 ft<sup>2</sup>, composed of five 3,000 ft<sup>2</sup> greenhouses, a 1,440 ft<sup>2</sup> Processing Building, a 120 ft<sup>2</sup> Security Center/Shed, and a 120 ft<sup>2</sup> Pesticides & Agricultural Chemicals Storage Area.
- The entire cultivation area will be enclosed within a six (6) foot-tall wire fence, with a privacy mesh along its eastern side to screen the cultivation operation from public view.
- All construction activities, including engine warm-up, will occur from 9:00am to 6:00pm Monday through Saturday and is anticipated to take approximately three to five weeks (weather dependent). The applicant anticipates to generate the following trips (daily trips, delivery/pick-up, miscellaneous, etc.):
  - Anticipated to generate 50-80 trips over a two to three month period during each phase of project construction / site development

# POST CONSTRUCTION CULTIVATION ACTIVITIES:

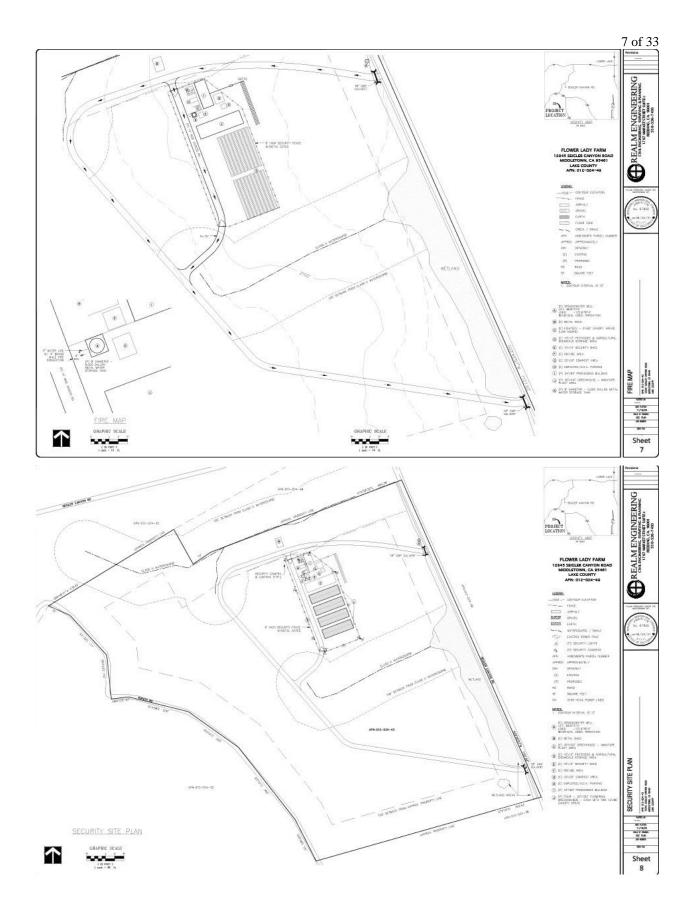

- On-site drying, trimming and packaging is proposed.
- The applicant and has provided well data showing the adequacy of the water table in this location.
- Fertilizer and Pesticides will be stored in their designated structure and in accordance with all applicable laws and regulations.
- The cannabis operations will occur from 8:00 AM to 6:00 PM, Monday through Saturday. All gates will be closed and locked during non-operational hours and/or when authorized personnel is not present. The operation is not open to the public.
- The operation anticipates on employee the following number of employees and trips generation.
  - $\circ\,$  Non-Harvest Season: Two (2) shifts with up to +/- 2 employees during peak shift.
  - $\circ$  Harvest Season: Three (3) shifts with up to +/- 3 employees during peak shift.
  - Anticipated Trips during Non-Harvest Season is 14-24 trips per day
  - Anticipated Trips during Harvest season +/- 24 trips per day
  - 1-2 deliveries/pickups per week from April 1<sup>st</sup> through November 15<sup>th</sup>
  - Approximately +/- 2 miscellaneous trips per week.
- The operation will implement and maintained Best Management Practices (BMPs) in accordance with all applicable Federal, State and local agency requirements, in Chapter 29 and 30 of the Lake County Code. All BMPs will be maintained for life of the project.

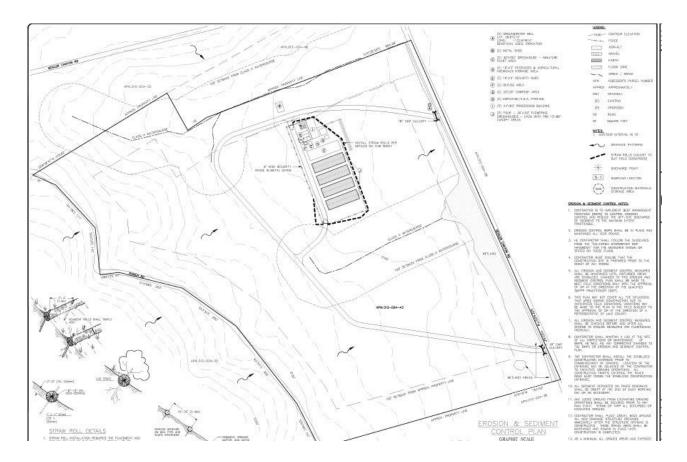

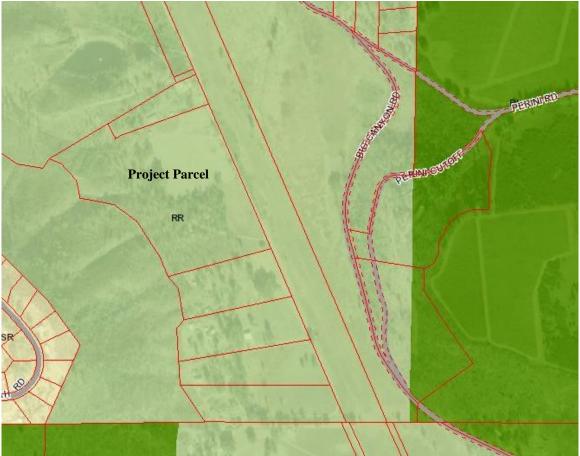

#### 20. Surrounding Land Uses and Setting: Briefly describe the project's surroundings:

- The parcels to the **North and South** have a Land Use Designation "RR" Rural Residential and are greater than ten (10) acres in size. These parcels are either undeveloped or developed with residential dwelling/accessory structures and agricultural uses.
- The parcels to the **West and East** have a Land Use Designation "RR" Rural Residential "RL", Rural Lands, and "SR" Suburban Reserve and are greater than one (1) acres in size. These parcels are either undeveloped or developed with residential dwelling/accessory structures and agricultural uses.
- NOTE: The nearest residential dwelling is greater than 1,000 feet away

21. Other public agencies whose approval is required (e.g., Permits, financing approval, or participation agreement.)

Lake County Community Development Department Lake County Department of Environmental Health Lake County Air Quality Management District Lake County Department of Public Works Lake County Agricultural Commissioner Lake County Sheriff Department Local Fire Protection District Central Valley Regional Water Quality Control Board California Water Resources Control Board California Department of Forestry & Fire Protection (Calfire) California Department of Fish & Wildlife (CDFW) California Department of Food and Agriculture (CDFA) California Department of Pesticides Regulations California Department of Public Health California Bureau of Cannabis Control California Department of Consumer Affairs

22. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for Tribal Consultation that includes, for example, the determination of potential significance of impacts to tribal cultural resources and procedures regarding confidentiality, etc.? Note: Conducting consultation early in the

CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21080.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3 (c) contains provisions specific to confidentiality.

Notification of the project was sent to local tribes on April 27, 2021 for "AB 52" Notification, which allows interested Tribes to request tribal consultation within 30 days of receipt of notice. The Community Development Department did not receive an AB 52 Tribal Consultation for this project nor did we receive controversial comments.

#### ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

| $\boxtimes$ | Aesthetics                       |             | Greenhouse Gas Emissions      |             | Public Services                       |
|-------------|----------------------------------|-------------|-------------------------------|-------------|---------------------------------------|
|             | Agriculture & Forestry Resources |             | Hazards & Hazardous Materials |             | Recreation                            |
| $\square$   | Air Quality                      | $\boxtimes$ | Hydrology / Water Quality     |             | Transportation                        |
| $\boxtimes$ | <b>Biological Resources</b>      |             | Land Use / Planning           | $\boxtimes$ | Tribal Cultural Resources             |
| $\square$   | Cultural Resources               |             | Mineral Resources             |             | Utilities / Service Systems           |
|             | Energy                           | $\boxtimes$ | Noise                         |             | Wildfire                              |
| $\square$   | Geology / Soils                  |             | Population / Housing          | $\boxtimes$ | Mandatory Findings of<br>Significance |

#### **DETERMINATION:** (To be completed by the lead Agency)

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☑ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE

Susan Parker – Interim Community Development Director Community Development Department

## SECTION 1 - EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, and then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

- 6) Lead agencies are encouraged to incorporate into the checklist reference to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a) the significance criteria or threshold, if any, used to evaluate each question; and
  - b) the mitigation measure identified, if any, to reduce the impact to less than significance

## **KEY:** 1 = Potentially Significant Impact

- **2** = Less Than Significant with Mitigation Incorporation
- **3** = Less Than Significant Impact
- 4 = No Impact

| IMPACT<br>CATEGORIES*   | 1  | 2 | 3 | 4 | All determinations need explanation.<br>Reference to documentation, sources, notes and correspondence.   | Source<br>Number**        |  |  |  |
|---|--|---|---|---|--|---------------------------|--|--|--|
| Except  | SECTION I. AESTHETICS<br>Except as provided in Public Resources Code Section 21099, would the project: |   |   |   |  |                           |  |  |  |
| a) Have a substantial adverse<br>effect on a scenic vista?  |  | X |   |   | The proposed cannabis operation <u>will not</u> have a substantial adverse effect on<br>the "Scenic Vista" as the project parcel is not located within a designated<br>scenic area and is located in a rural area of Lake County, CA. The entire<br>cultivation area will be enclosed within a six (6)-foot fence, covered with<br>privacy screen to screen the cultivation area from public view. However,<br>passing motorist and/or nearby parcels may have limited visibility of the<br>project parcels and/or may see minimal lighting during evening and/or night<br>operations. All lighting will be directed downwards, shielded and adhere to<br>all Federal, State and local agency requirements, including all dark-sky<br>requirements. Visual impacts can be brought to 'less than significant levels'<br>with the following mitigation measures added.<br><u>Mitigation Measures:</u><br>AES -1: All outdoor lighting shall be directed downwards and shielded<br>onto the project site and not onto adjacent properties. All lighting shall<br>comply and adhere to all federal, state and local agency requirements,<br>including all recommendations in darksky.org.<br>AES 2: All cannabis-related buildings shall be screened from view from<br>neighboring lots and public roads by a minimum 6' tall screening fence. | 1, 2, 3, 4, 5, 6,<br>7    |  |  |  |
| b) Substantially damage scenic<br>resources, including, but not<br>limited to, trees, rock<br>outcroppings, and historic<br>buildings within a state scenic<br>highway? |  |   | X |   | The proposed operation will not substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway as the project will be developed in an area once used for cattle and/or hay cultivation. Less than Significant Impact.  | 1, 2, 3, 4, 5, 6,<br>7, 8 |  |  |  |

|  |   |   |   |   | 13 of 3   | 33                     |
|--|---|---|---|---|---|------------------------|
| IMPACT<br>CATEGORIES*  | 1 | 2 | 3 | 4 | All determinations need explanation.<br>Reference to documentation, sources, notes and correspondence.  | Source<br>Number**     |
| c) In non-urbanized areas,<br>substantially degrade the existing<br>visual character or quality of<br>public views of the site and its<br>surroundings? (Public views are<br>those that are experienced from<br>publicly accessible vantage point).<br>If the project is in an urbanized<br>area, would the project conflict<br>with applicable zoning and other<br>regulations governing scenic<br>quality? |   |   | X |   | The project is not located in an urbanized area and will not impact a non-<br>urbanized area and/or substantially degrade the existing visual character or<br>quality of public views.<br>Less than Significant Impact  | 1, 2, 3, 4, 5, 6,<br>7 |
| d) Create a new source of<br>substantial light or glare which<br>would adversely affect day or<br>nighttime views in the area?   |   | X |   |   | The project has some potential to create additional light or glare during<br>evening and/or nighttime operations. All lighting will be directed downwards,<br>shielded and adhere to all Federal, State and local agency requirements,<br>including all dark-sky requirements.<br>Less Than Significant Impact with mitigation measures added AES 1<br>through AES 2. | 1, 2, 3, 4, 5, 6,<br>7 |

#### SECTION II. AGRICULTURE AND FORESTRY RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board.

| Would the project:  |  |  |   |   |  |                                 |  |  |  |
|---|--|--|---|---|--|---------------------------------|--|--|--|
| a) Convert Prime Farmland,<br>Unique Farmland, or Farmland of<br>Statewide Importance<br>(Farmland), as shown on the<br>maps prepared pursuant to the<br>Farmland Mapping and<br>Monitoring Program of the<br>California Resources Agency, to<br>non-agricultural use?  |  |  | X |   | The project parcels have approximately +/- 12.25 acres of "Grazing Land"<br>and +/- 8.00 acres of "Farmland of Local importance. The site is not located<br>within a mapped Farmland Protection area. The cultivation of commercial<br>cannabis is an allowable use upon securing a minor/major use permit<br>pursuant to Article 27 (Table B) of the Lake County Zoning Ordinance. All<br>cultivation will occur within greenhouses. No conversion of prime farmland<br>would occur as the result of this project.<br>Less than Significant Impact. | 1, 2, 3, 5, 6, 9,<br>10, 39     |  |  |  |
| b) Conflict with existing zoning<br>for agricultural use, or a<br>Williamson Act contract?  |  |  |   | X | The project parcels will not conflict with existing zoning for agricultural use, or<br>a Williamson Act contract.<br><b>No Impact</b>  | 1, 2, 3, 5, 6, 9,<br>10, 11, 39 |  |  |  |
| c) Conflict with existing zoning<br>for, or cause rezoning of, forest<br>land (as defined in Public<br>Resources Code section<br>12220(g)), timberland (as defined<br>by Public Resources Code section<br>4526), or timberland zoned<br>Timberland Production (as<br>defined by Government Code<br>section 51104(g))? |  |  |   | X | As proposed, the project will not conflict with existing zoning for, and/or cause rezoning of forest lands and/or timberlands or timberlands in production.<br>No Impact   | 1, 2, 3, 5, 6                   |  |  |  |
| d) Result in the loss of forest land<br>or conversion of forest land to<br>non-forest use?  |  |  |   | Х | The project would not result in the loss or conversion of forest land to a non-<br>forest use.<br><b>No Impact</b>   | 1, 2, 3, 5, 6, 7,<br>39         |  |  |  |

|   |      |      |        |     | 14 of 3   | 33                             |
|---|------|------|--------|-----|---|--------------------------------|
| IMPACT<br>CATEGORIES*   | 1    | 2    | 3      | 4   | All determinations need explanation.<br>Reference to documentation, sources, notes and correspondence.  | Source<br>Number**             |
| e) Involve other changes in the<br>existing environment which, due<br>to their location or nature, could<br>result in conversion of Farmland,<br>to non-agricultural use or<br>conversion of forest land to non-<br>forest use? |      |      |        | X   | The project will not involve other changes in the existing environment which,<br>due to their location or nature, could result in conversion of farmland, to non-<br>agricultural uses or the conversion of forest land to non-forest uses.<br><b>No Impact</b>   | 1, 2, 3, 5, 6, 7,<br>11, 39    |
|   | 1    | 1    | 1      | S   | ECTION III. AIR QUALITY   |                                |
|   |      |      |        |     | established by the applicable air quality management district or a  | ir pollution                   |
| con   | trol | dist | rict I | may | be relied upon to make the following determinations.  |                                |
|   | 1    |      | r      | 1   | Would the project:  |                                |
| a) Conflict with or obstruct<br>implementation of the applicable<br>air quality plan?   |      | X    |        |     | The project has little potential to result in air quality impacts. The cultivation of cannabis will occur within greenhouses. No generators are proposed. Lake County requires an "Odor Control Plan" which was provided by the applicant and adhere to all applicable requirements.<br>There is some potential for construction- and post-construction related noise to occur; consequently, several mitigation measures are needed to assure air quality suppression and mitigation as follows; | 1, 2,3, 5, 6, 9,<br>12, 13, 39 |
|   |      |      |        |     | Mitigation measures:<br>AQ-1: Prior to obtaining the necessary permits and/or approvals for<br>any phase, applicant shall contact the Lake County Air Quality<br>Management District and obtain an Authority to Construct (A/C)<br>Permit for all operations and for any diesel-powered equipment and/or<br>other equipment with potential for air emissions.   |                                |
|   |      |      |        |     |   |                                |
|   |      |      |        |     | AQ-3: The applicant shall maintain records of all hazardous or toxic<br>materials used, including a Material Safety Data Sheet (MSDS) for all<br>volatile organic compounds utilized, including cleaning materials. Said<br>information shall be made available upon request and/or the ability to<br>provide the Lake County Air Quality Management District such<br>information in order to complete an updated Air Toxic emission<br>Inventory.  |                                |
|   |      |      |        |     | AQ-4: All vegetation during site development shall be chipped and<br>spread for ground cover and/or erosion control. The burning of<br>vegetation, construction debris, including waste material is prohibited.   |                                |
|   |      |      |        |     | AQ-5: The applicant shall have the primary access and parking areas<br>surfaced with chip seal, asphalt or an equivalent all weather surfacing<br>to reduce fugitive dust generation. The use of white rock as a road base<br>or surface material for travel routes and/or parking areas is prohibited.   |                                |
|   |      |      |        |     | AQ-6: All areas subject infrequent use of driveways, over flow parking, etc., shall be surfaced with gravel. Applicant shall regularly use and/or maintain graveled area to reduce fugitive dust generations.   |                                |
|   |      |      |        |     | AQ-7: The applicant shall apply water to the ground during any and<br>all site preparation work that is required for the greenhouses and<br>drying building, as well as during any interior driveway improvements<br>to mitigate dust migration.  |                                |
|   |      |      |        |     | Less than Significant Impact with mitigation measures added.  |                                |

|   |   |    |     |     | 15 of 3   |                          |

|             |   |   |   |   | summers and mild but pronounced winters without severe winter cold or high<br>humidity (Sunset, 2020). The topography of the Study Area consists of gently<br>sloping hills to the west flattening to the valley floor to the east. The elevation<br>ranges from approximately 2,075 feet to 2,205 feet above mean sea level.<br>Drainage runs west then north into Seigler Canyon Creek, and eventually flows<br>into Cache Creek. Prior to the establishment of this cultivation operation, land<br>uses were open space and farming. The surrounding land uses are private<br>estates and open space.  |          |
|             |   |   |   |   | <u>Field Survey:</u><br>Consulting Biologist Tim Nosal, MS; conducted a reconnaissance-level field<br>survey on October 27, 2020, and two botanical surveys on March 16 <sup>th</sup> and May<br>18 <sup>th</sup> , 2021.   |          |
|             |   |   |   |   | All visible fauna and flora observed were recorded in a field notebook, and identified to the lowest possible taxon. The survey efforts emphasized the search for any special-status species that had documented occurrences in the CNDDB within the vicinity of the Study Area and those species on the USFWS species list (refer to attached Biological report for details). When a specimen could not be identified in the field, a photograph or voucher specimen (depending upon permit requirements) was taken and identified in the laboratory using a dissecting scope where necessary.   |          |
|             |   |   |   |   | The locations of any special-status species sighted were marked on aerial photographs and/or georeferenced with a geographic positioning system (GPS) receiver. The habitat types occurring in the study area were mapped on aerial photographs, and information on habitat conditions and the suitability of the habitats to support special-status species was also recorded.   |          |
|             |   |   |   |   | The study area was also informally assessed for the presence of potentially-<br>jurisdictional water features, including riparian zones, isolated wetlands and<br>vernal pools, and other biologically-sensitive aquatic habitats   |          |
|             |   |   |   |   | <ul> <li><u>Critical Habitat/Special Status Habitat:</u></li> <li>According to the report, <u>no critical habitat</u> for any federally-listed species occurs within the Project Area or the surrounding Study Area.</li> </ul>   |          |
|             |   |   |   |   | <ul> <li><u>Habitat Plan and Wildlife Corridors:</u></li> <li>According to the report, there are no known habitat/wildlife corridors.</li> </ul>  |          |
|             |   |   |   |   | <ul> <li>Summary and Finding of the Report:</li> <li>During the field survey, no special-status species were detected within the Project Area or the surrounding Study Area.</li> <li>There are no wetlands, channels or watercourses within the Study Area that can sustain aquatic special-status animals because these habitats do not hold water long enough.</li> <li>The USFWS National Wetland Inventory reported no water features within the Project Area, but the Inventory did report the following water features within the Study Area (see Exhibits): 5 Riverine Features.</li> <li>No special-status species were detected within the Study Area.</li> </ul> |          |
|             |   |   |   |   | • There are no perennial water resources within the Study Area that can sustain aquatic special-status species.   |          |
|             |   |   |   |   | Upon reviewing the Biological Resource Assessment all substantial adverse<br>impacts, either directly or through habitat modifications, on any species<br>identified as a candidate, sensitive, or special status species in local or regional<br>plans, policies, or regulations, or by the California Department of Fish and Game<br>or U.S. Fish and Wildlife Service have been reduced. <b>Therefore, to ensure</b>   |          |

| c) Disturb any human remains,<br>including those interred outside of<br>formal cemeteries?   |   | X |    |     | There would be minimal ground disturbance during the development of the commercial operations, including but not limited to construction of supporting infrastructure (fencing, sheds, water tanks, piping and the gravelling of the existing road/access way throughout the project parcels). Disturbance of human remains is not anticipated. The applicant shall halt all work and immediately contact the Lake County Sheriff's Department, the culturally affiliated Tribe, and the Community Development Department if any human remains are encountered.  | 1, 2, 3, 5, 6, 39                          |
|  |   |   |    |     | Less Than Significant with mitigation measures CUL-1 and CUL-2 added.  |  |
|  |   |   |    |     | SECTION VI. ENERGY   |  |
|  | 1 | 1 |    | 1   | Would the project:   |  |
| a) Result in potentially significant<br>environmental impact due to<br>wasteful, inefficient, or<br>unnecessary consumption of<br>energy resources, during project<br>construction or operation?   |   |   | X  |     | The proposed energy usage for this operation is minimal; energy use may<br>include but is not limited to the security system; well pump(s); septic pumps<br>(if necessary); lighting for structures, lighting fixtures and/or power as needed.<br>The proposed use would not result in potentially significant environmental<br>impacts due to wasteful, inefficient or unnecessary consumption of energy<br>resources during project development or operations. All energy usage will<br>adhere to all Federal, State and local agency requirements regarding energy<br>use. Additionally, the applicant will obtain and maintain all necessary permits.<br>Less Than Significant Impacts   | 1, 2, 3, 5, 6, 39                          |
| b) Conflict with or obstruct a state<br>or local plan for renewable energy<br>or energy efficiency?  |   |   | X  |     | The proposed cultivation operations would not conflict with or obstruct an energy plan. The proposed use would adhere to all Federal, State and local agency requirements.<br>Less Than Significant Impacts  | 1, 2, 3, 5, 6, 39                          |
|  |   |   | SE | CTI | ON VII. GEOLOGY AND SOILS  | •  |
|  |   |   |    | 1   | Would the project:   | 1  |
| <ul> <li>a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: <ol> <li>Rupture of a known earthquake fault, as delineated on the most recent Alquist- Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.</li> <li>Strong seismic ground shaking?</li> <li>Seismic-related ground failure, including liquefaction?</li> <li>Landslides?</li> </ol> </li> </ul> |   |   | X  |     | <ul> <li>i) Earthquake Faults There are no mapped earthquake faults on or adjacent to the subject site. <ul> <li>ii-iii) Seismic Ground Shaking and Seismic–Related Ground Failure, including liquefaction.</li> <li>The mapping of the site's soil indicates that the soil is stable and not prone to liquifaction.</li> <li>iv) Landslides <ul> <li>According to the Landslide Hazard Identification Map prepared by the California Department of Conservation, Division of Mines and Geology, the project parcel soil is considered "generally stable" and not located within and/or adjacent to an existing known "landslide area".</li> </ul> </li> <li>According to the Property Management Plan, minimal grading would occur on the property to accommodate the cannabis grow site; however, because the grow site is already established, the amount of grading needed is minimal given the lack of slope on the site.</li> <li>The applicant has submitted engineered drawings that show Best Management Practices (BMPs) in and adjacent to the cultivation areas. The mitigation measures will prevent or reduce discharge of all construction or post construction pollutants into the County storm drainage system. BMPs include scheduling of activities, erosion and sediment control (proposed is a one-foottall berm around the perimeter of the cultivation area), operation and maintenance procedures and other measures in accordance with Chapter 29 of the Lake County Code.</li> </ul> </li> </ul> | 1, 2, 3, 5, 6, 9,<br>17, 18, 19, 20,<br>39 |
| b) Result in substantial soil erosion or the loss of topsoil?  |   |   | X  |     | Less Than Significant Impact<br>The applicant has provided engineered Erosion Control Plans that incorporate<br>best management practices for erosion control on the site. Based on the plans<br>submitted and the mitigation measures proposed by the applicant, no erosion   | 1, 2, 3, 5, 6, 9,<br>39                    |

|  |    |     |     | 1  | 20 of 3  | 33                          |
|--|----|-----|-----|----|--|-----------------------------|
| IMPACT<br>CATEGORIES*  | 1  | 2   | 3   | 4  | All determinations need explanation.<br>Reference to documentation, sources, notes and correspondence.   | Source<br>Number**          |
|  |    |     |     |    | or loss of topsoil is anticipated. The cultivation area will be enclosed by a one-<br>foot-tall earth berm to retain stormwater within the cultivation area.   |                             |
|  |    |     |     |    | Regarding the new proposal, some minor grading needed for this major use<br>permit will be minimal and will be below the 500 cubic yard threshold for<br>requiring a grading permit. The applicant has also indicated that a one-foot-<br>tall berm will be placed on the outer boundary of the cultivation area to<br>further prevent soil erosion, and stormwater runoff will channel into the<br>existing on-site stormwater retention basin.   |                             |
|  |    |     |     |    | Less Than Significant Impact   |                             |
| c) Be located on a geologic unit or<br>soil that is unstable, or that would<br>become unstable as a result of the<br>project, and potentially result in<br>on-site or off-site landslide, lateral<br>spreading, subsidence,<br>liquefaction or collapse? |    |     | X   |    | According to the soil survey of Lake County, prepared by the U.S.D.A., the soil at the site is considered "generally stable" and there is little to no potential for landslide, subsidence, debris flows, liquefaction or collapse. Additionally, the operation will require minimal ground disturbance. The operation will occur within a previously disturbed area that has been continuously used for agricultural activities over years. Additionally, the applicant will incorporate Best Management Practices in accordance with Chapters 29 and 30 of the Lake County Code, including routinely maintained the cleared vegetation and defensible space on all project parcels. Less Than Significant Impact   | 1, 2, 3, 5, 6, 9,<br>20; 39 |
| d) Be located on expansive soil, as<br>defined in Table 18-1-B of the<br>Uniform Building Code (1994),<br>creating substantial direct or<br>indirect risks to life or property?  |    |     | X   |    | The soils of the Project Property are identified as Type 122 Speaker-Maymen-<br>Millsholm association and Clear Lake variant clay (drained) by the NRCS Web<br>Soil Survey and is generally stable. A small amount of grading (less than 100<br>cubic yards) will be necessary to create level pads on which the proposed<br>buildings/structures with be constructed. Approximately one acre of non-<br>native grasses will be removed/disturbed to develop the proposed cultivation<br>operation. No trees or shrubs will be removed as a result of site/project<br>development, nor will any disturbance occur within 100 feet of a surface water<br>body (including three ephemeral watercourses and freshwater marsh). The<br>operation will incorporate Best Management Practices (BMPs) in accordance<br>with all applicable regulations, including Chapter 29 and 30 of the Lake County<br>Code. | 1, 2, 3, 5, 6, 9,<br>39     |
|  |    |     |     |    | Less Than Significant Impact   |                             |
| e) Have soils incapable of<br>adequately supporting the use of<br>septic tanks or alternative<br>wastewater disposal systems<br>where sewers are not available for<br>the disposal of waste water?   |    |     | X   |    | The project site will be served through an existing onsite waste disposal system. Less Than Significant Impact   | 1, 2, 3, 5, 6, 9,<br>21     |
| <ul> <li>f) Directly or indirectly destroy a<br/>unique paleontological resource or<br/>site or unique geologic feature?</li> </ul>  |    | X   |     |    | Disturbance of paleontological resources or unique geologic features is not<br>anticipated, and mitigation measures are in place to assure that in the event<br>any artifacts are found, that the applicant will notify the culturally-<br>affiliated Tribe(s) and a licensed Archeologist - CUL-1 and CUL-2.<br>Less than Significant Impact with mitigation measures added.  | 1, 2, 3, 5, 6, 39           |
|  |    |     |     |    | Less than Significant Impact with intigation measures added.   |                             |
|  | SI | ECT | ΓΙΟ | NV | TIII. GREENHOUSE GAS EMISSIONS   |                             |
|  |    |     | r   | 1  | Would the project:   |                             |
| a) Generate greenhouse gas<br>emissions, either directly or<br>indirectly, that may have a<br>significant impact on the<br>environment?  |    |     | X   |    | In general, greenhouse gas emissions can come from construction activities (operation of equipment) and from post-construction activities (routine construction/maintenance, vehicle trips, etc.). The operation would not generate a significant number of vehicle trips. The project parcels are located greater than five (5) miles away from State Highway 29/20 and are located in a rural area of the County where it is not uncommon for individual to drive greater than +/- 20 miles per trip. According to the applicant the operation will occur from 8:00 AM to 6:00 PM, Monday through Saturday. All gates will be closed and locked during non-operational hours and/or when authorized personnel is not present.  | 1, 2, 3, 5, 6,<br>12, 39    |

|             |   |   |   |   | use for other agricultural crops, such as corn (20-25 inches per year), alfalfa (30-40 inches per year), tomatoes (15-25 inches per year), peaches (30-40 inches per year), and hops (20-30 inches per year). In a study of cannabis cultivation in Humboldt County, approximate water use for an outdoor cultivation site was 27,470 gallons (0.08 acre-feet) per year on average and ranged from approximately 1,220 to 462,000 gallons per year (0.004 to 1.4 acre-feet), with the size of the operation being a major factor in this range. Annual water uses for a greenhouse operation averaged approximately 52,300 gallons (0.16 acre-feet) and ranged from approximately 610 to 586,000 gallons (0.002 to 1.8 acre-feet) annually (Butsic and Brenner 2016). During a field visit conducted by technical staff to an outdoor cultivation site, one cultivator reported using approximately 75,000 gallons (0.23 acre-feet) for 1 year's entire cannabis crop (approximately 66 plants), or approximately 1,140 gallons per year." |          |
|             |   |   |   |   | The proposed cultivation practices are most similar to commercial tomato production with an estimated water use requirement of 25 inches per year. The maximum proposed cannabis cultivation area is 15,000 ft <sup>2</sup> , with an expected total annual water use requirement of 0.72 acre-feet or ~234,600 gallons. The cultivation season for the proposed cultivation operation will begin in March and end in December of each year. Refer to the table in the project description for the expected water use of the proposed cultivation operation by month during the cultivation season in gallons and acre-feet.   |          |
|             |   |   |   |   | All water for the proposed cultivation operation will come from an existing groundwater well located at Latitude 38.87274° and Longitude -122.67874°. HDPE water supply lines will provide water to the irrigation systems of the proposed cultivation areas. The water supply lines will be equipped with safety valves, capable of shutting off the flow of water so that waste of water and runoff is prevented/minimized when leaks occur and the system needs repair, and inline water meters compliant with California Code of Regulations, Title 23, Division 3, Chapter 2.7. The irrigation system of the proposed cultivation area(s) will be composed of PVC piping, black poly tubing, and drip tapes/lines.  |          |
|             |   |   |   |   | No cannabis cultivation activities nor agricultural chemicals storage will occur within 100 feet of any surface waterbody (including the three ephemeral watercourses and freshwater marsh). All water for the proposed cultivation operation will come from an existing onsite groundwater well located at Latitude 38.8727° and Longitude -122.6787°.  |          |
|             |   |   |   |   | Access roads and parking areas are/will be graveled to prevent the generation<br>of fugitive dust, and vegetative ground cover will be preserved and/or re-<br>established as soon as possible throughout the entire site to filter and infiltrate<br>stormwater runoff from the access roads, parking areas, and the proposed<br>cultivation operation.   |          |
|             |   |   |   |   | Each year, prior to March 1 <sup>st</sup> , an <u>Annual Monitoring Report</u> will be prepared<br>and submitted to the CVRWQCB, demonstrating measures taken over the<br>course of the previous year to comply with the Cannabis General Order. The<br>applicant will maintain compliance with the Cannabis General Order for the<br>protection of water resources for as long as the proposed cultivation operation<br>is operating.   |          |
|             |   |   |   |   | Staff will record daily water meter readings, and will maintain those records<br>on-site for a minimum of five years. The operation will make those records<br>available to Water Boards, CDFW, and Lake County staff upon request.  |          |
|             |   |   |   |   | All access roads and parking areas are/will be graveled to prevent the generation of fugitive dust, and vegetative ground cover will be preserved and/or re-established as soon as possible throughout the entire site to filter and infiltrate stormwater runoff from the access roads, parking areas, and the proposed cultivation operation. | <ul> <li>b) Substantially decrease<br/>groundwater supplies or interfere<br/>substantially with groundwater<br/>recharge such that the project may<br/>impede sustainable groundwater<br/>management of the basin?</li> </ul>  |   | X |   |   | The operation would not substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin. According to the Property Management Plan the operation has been designed to minimize adverse impacts on surface and groundwater resources and to help ensure that on-site water resources and management is in full compliance with applicable local, county and state regulations. All employees are required to follow the procedures outlined in this plan. The project will employ Best Management Practices ( <i>in accordance with Chapter 29 and 30 of the Lake County Code</i> ) related to erosion and water quality to reduce impacts related to storm water and water quality and adhere to all federal, state and local requirements, as applicable. <b>Less Than Significant Impact with BIO-1 through, BIO- 4; and HYD-1 through HYD-3.</b> | 1, 2, 3, 5, 6,<br>31, 39                   |
| <ul> <li>c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner that would:</li> <li>i) result in substantial erosion or siltation on-site or off-site;</li> <li>ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;</li> </ul> |   | X |   |   | The operations will not alter the existing drainage pattern of the site or the area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner that would in substantial erosion issues, increase the amount of runoff or create or contribute runoff which exceeds the capacity of the existing or planned storm water drainage system. The applicant will implement Best Management Practices (BMPs) in accordance with chapter 29 and 30 of the Lake County Code, which may include the placement of straw, mulch, seeding, straw wattles, and silt fencing and planting of native vegetation on all disturbed areas to prevent erosion. These measures shall be maintained for life of the project.<br>Less Than Significant Impact with BIO-1 through, BIO- 4 and HYD-1 through HYD-3.   | 1, 2, 3, 5, 6, 7,<br>15, 17, 29, 30,<br>39 |

| c) Result in a determination by the<br>wastewater treatment provider,<br>which serves or may serve the<br>project that it has adequate<br>capacity to serve the project's<br>projected demand in addition to<br>the provider's existing<br>commitments? |       |      |        | X     | The project site is situated in a rural area of the County which requires an on-site<br>Waste Management System (Septic). The installation of an on-site waste<br>management system, shall adhere to all current Federal, State and local agency<br>requirements.<br>No Impact  | 1, 2, 3, 5, 6,<br>21, 39     |
| d) Generate solid waste in excess<br>of State or local standards, or in<br>excess of the capacity of local<br>infrastructure, or otherwise impair<br>the attainment of solid waste<br>reduction goals?  |       |      | X      |       | The Local Lake County landfill(s) has sufficient capacity to accommodate the project's solid waste disposal needs. According to the <i>Property Management Plan</i> – <i>Waste Management Plan</i> has been developed to help minimize the generation of waste and for the proper disposal of waste produced during the cultivation and processing of cannabis at the project site. The goal is to prevent the release of hazardous waste into the environment, minimize the generation of cannabis vegetative waste and dispose of cannabis vegetative waste properly, and manage growing medium and dispose of growing medium properly. All employees are required to follow the procedures outlined in this plan. Any deviations from this plan must be immediately brought to the attention of the operations manager(s).   | 1, 2, 3, 5, 6,<br>36, 37, 39 |
|   |       |      |        |       | Less Than Significant Impact  |                              |
| e) Comply with federal, state, and<br>local management and reduction<br>statutes and regulations related to<br>solid waste?   |       |      | X      |       | The project parcels have and/or will have adequate services through an onsite well(s), power through PG&E and an on-site waste management system (septic system). All facilities shall adhere to all current Federal, State and local agency requirements. All vegetative waste will be composted on-site, including all soil from any ground disturbance (if necessary). All other waste, will be handled in accordance with all Federal, State and local agency requirements and brought to a proper facility that is able to process such waste.   | 1, 2, 3, 5, 6,<br>36, 37, 39 |
|   |       |      |        |       | Less Than Significant Impact  |                              |
| If located in or near stat  | e res | spon | sibili | ty ar | SECTION XX. WILDFIRE<br>eas or lands classified as very high fire hazard severity zones, would the p  | project:                     |
| a) Substantially impair an adopted<br>emergency response plan or<br>emergency evacuation plan?  |       | -    |        | -     | The Project Property is accessed via a shared gravel access road off of Seigler<br>Canyon Road. A private gravel access road loops through the Project Property,<br>connecting to the shared gravel access road at two locations. The project was<br>circulated to the Lake County Department of Public Works, the Lake County<br>Sheriff's Department, the Lake County Fire Protection District and Cal fire for<br>review and commenting. The County of Lake did not reverse any adverse<br>impacts. The property is located within the State Responsibility Area (SRA)<br>and is in a 'Moderate to High' Fire Hazard Severity Zone. The site has an<br>average cross slope less than 10% and has a moderate fuel load but the<br>cultivation area will be clear of vegetation. All vegetation on the property will<br>be routinely maintained in accordance to all Federal, State and local agency<br>requirements, including Chapter 13 of the Lake County Code. Prior to<br>operations, all existing and proposed accessway will be improved to all<br>Federal, State and local agency requirements. | •                            |
|   |       |      |        |       | Less Than Significant Impact  |                              |

|  |   |   |     |       | 31 of 3   | 33                                      |
|--|---|---|-----|-------|---|---|
| IMPACT<br>CATEGORIES*  | 1 | 2 | 3   | 4     | All determinations need explanation.<br>Reference to documentation, sources, notes and correspondence.  | Source<br>Number**                      |
| b) Due to slope, prevailing winds,<br>and other factors, exacerbate<br>wildfire risks, and thereby expose<br>project occupants to, pollutant<br>concentrations from a wildfire or<br>the uncontrolled spread of a<br>wildfire?   |   |   | X   |       | The immediate area contains some dense undergrowth and tree coverage;<br>however, the site is well maintained, and is largely devoid of manzanita and other<br>fast-burning fuels. The clusters of trees are wide spread and will remain<br>untouched. The proposed cultivation activity will not exacerbate wildfire risks<br>and expose persons to pollutant concentrations in the event of a wildfire in the<br>area. As stated above, the applicant will adhere to all Federal, State and local fire<br>requirements/regulations, including Chapter 13 of the Lake County Code.<br>Less than Significant Impact   | 1, 2, 3, 5, 6,<br>22, 27, 28, 38,<br>39 |
| c) Require the installation or<br>maintenance of associated<br>infrastructure (such as roads, fuel<br>breaks, emergency water sources,<br>power lines or other utilities) that<br>may exacerbate fire risk or that<br>may result in temporary or<br>ongoing impacts to the<br>environment?   |   |   | X   |       | The cultivation sites have been previously disturbed and has/will be routinely maintained to ensure all Federal, State and local agency requirements are being satisfied, including Chapter 13 of the Lake County code to reduce any potential fire risk. The cultivation area does not further exacerbate the risk of wildfire, or the overall effect of pollutant concentrations to area residents in the event of a wildfire. The project would improve fire access and the ability to fight fires at or from the subject site and other sites accessed from the same roads. <b>Less than Significant Impact</b>   | 1, 2, 3, 5, 6,<br>38, 39                |
| d) Expose people or structures to<br>significant risks, including<br>downslope or downstream<br>flooding or landslides, as a result<br>of runoff, post-fire slope<br>instability, or drainage changes?   |   |   | X   |       | The risk of flooding, landslides, slope instability, or drainage changes will not be increased due to this project based on the existing development and proposed development combined with the direction of slope, and the lack of slope in the cultivation areas as the project is not located within a known flood zone. The applicant will adhere to all Federal, State and local agency requirements.<br>Less Than Significant Impact  | 1, 2, 3, 5, 6,<br>20, 29, 32, 38,<br>39 |
|  |   | M | ANI | ) 4 1 | SECTION XXI.<br>FORY FINDINGS OF SIGNIFICANCE   |   |
| a) Does the project have the<br>potential to substantially degrade<br>the quality of the environment,<br>substantially reduce the habitat of<br>a fish or wildlife species, cause a<br>fish or wildlife population to drop<br>below self-sustaining levels,<br>threaten to eliminate a plant or<br>animal community, substantially<br>reduce the number or restrict the<br>range of a rare or endangered plant<br>or animal or eliminate important<br>examples of the major periods of |   | X |     |       | The project proposes the cultivation of commercial cannabis in a rural section of the County. There will be minimal to no vegetation removal and/or ground disturbance. As proposed, this project is not anticipated to significantly impact habitat of fish and/or wildlife species or cultural resources with the incorporated mitigation measures described above. Therefore, there is minimal risk of degradation, and mitigation measures are proposed that would alleviate most or all of the project-related impacts. With incorporation of Mitigation Measures, the project is not anticipated to significantly impact habitat of fish and/or wildlife species or cultural resources, nor will the project contribute to factors that would harm the environment, or add to any wildfire risk.  | ALL                                     |
| California history or prehistory?<br>b) Does the project have impacts<br>that are individually limited, but<br>cumulatively considerable?<br>("Cumulatively considerable"<br>means that the incremental effects<br>of a project are considerable when<br>viewed in connection with the<br>effects of past projects, the effects<br>of other current projects, and the<br>effects of probable future<br>projects)?  |   | X |     |       | All potentially significant impacts have been identified related to, Aesthetics,<br>Air Quality, Biology, Noise, and Hydrology and Water Quality, and<br>Cultural/Tribal/Geologic (prehistoric) Resources. These impacts in<br>combination with the impacts of other past, present and reasonably foreseeable<br>future projects in the vicinity could cumulatively contribute to significant<br>effects on the environment if proper mitigation measures are not put in place.<br>The implementation of and compliance with all mitigation measures identified<br>in each section as project conditions of approval would avoid or reduce all<br>potential impacts to less than significant levels and would not result in<br>cumulatively considerable environmental impacts.<br><b>Less Than Significant Impact with Mitigation Measures Incorporated.</b> | ALL                                     |

|   |   |   |   |   |  | 5                  |  |
