COUNTY CLERK'S USE

LOS ANGELES DEPARTMENT OF WATER AND POWER 111 N. HOPE STREET, ROOM 1044 LOS ANGELES, CALIFORNIA 90012

CITY CLERK'S USE

CALIFORNIA ENVIRONMENTAL QUALITY ACT

NOTICE OF EXEMPTION

(City CEQA Guidelines)

Submission of this form is optional. The form shall be filed with the County Clerk, 12400 Imperial Highway, Norwalk, CA 90650, pursuant to Public Resources Code Section 21152(b). Pursuant to Public Resources Code Section 21168(d), the filing of this notice starts a 35-day statute of limitations on Court challenges to the approval of the project. Failure to file the notice results in the statute of limitations being extended to 180 days.

Los Angeles Department of Water and Power (LADPW)	12		
111 N. Hope Street, Room 1044	•			
Los Angeles, CA 90012				
PROJECT TITLE		LOG REFERENCE		
Lower San Fernando Dam Low-Level Outlet Ma	aintenance	N/A		
PROJECT LOCATION				
15751 Rinaldi Street, Los Angeles, CA 91344				
DESCRIPTION OF NATURE, PURPOSE, AND BENEFICIARIES OF PROJECT:				
The Lower San Fernando Dam is located at the southern end of LADWP's Van Norman Complex. The dam has a low-				
level outlet that discharges into what LADWP refers to as the San Fernando Creek. The creek receives flow from the				
Lower San Fernando Detention Basin and discharges into the Bull Creek Extension Channel. The total length of San				
Fernando Creek is approximately 1,265 feet.				
The State of California, Department of Water Resources, Division of Safety of Dams (DSOD), regulates dams,				
including out-of-service reservoirs, to prevent failure, safeguard life, and protect property. DSOD regularly inspects the				
Lower San Fernando Dam and has requested a				
inspection reports, including the activity subject	to this Notification. Per DSOD	, vegetation is obstructing	g the low-level	
outlet and, thus, needs to be removed by November 1, 2021.				
	The vegetation obstructing the outlet is dominated by southern cattail with a few arroyo willow. LADWP proposes to			
trim the vegetation approximately 20 feet back from the outlet and 20 feet across the width of the creek, impacting				
approximately 0.006 of southern cattail and 0.0	04 acres of arroyo willow. The	cattail would be cut down	n to base using	
hand tools only. Water is present in the creek; h	nowever, maintenance activitie	s will avoid the wetted po	rtion of the creek.	
The cut vegetation would be transported offsite	for disposal. Work will take ap	proximately 2-4 days to c	complete.
