## APPENDICES

### **Appendix**

- A Air Quality and Greenhouse Gas Emissions Analyses
- B Biological Constraints Report
- C Cultural Resources
- D Energy Analysis
- E EDR Reports
- F Noise and Vibration Analysis

*This page intentionally left blank*

## **SECTION 1.0 INTRODUCTION**

### **1.1 PURPOSE OF THE INITIAL STUDY**

In accordance with the California Environmental Quality Act (CEQA) (*California Public Resources Code* §21000 et seq.) and its Guidelines (*California Code of Regulations*, Title 14, §15000 et seq.), this Initial Study (IS) has been prepared as documentation for a Mitigated Negative Declaration (MND) for the proposed Groundwater Treatment Plants Phase B and Groundwater Supply Wells (hereinafter referred to as the “Project”). This IS includes a description of the proposed Project; location of the Project sites; evaluation of the potential environmental impacts; findings from the environmental review; and proposed mitigation measures to lessen or avoid environmental impacts on the environment.

Pursuant to Section 15367 of the State CEQA Guidelines, the City of Anaheim (City) is the lead agency for the proposed Project. The lead agency is the public agency that has the principal responsibility for carrying out or approving a project. The City, as the lead agency, shall have the authority for project approval and adoption of the accompanying environmental documentation.

The purpose of this document is to evaluate the construction of ion-exchange groundwater treatment plants and ancillary facilities at five separate sites in the City of Anaheim.

### **1.2 PROJECT BACKGROUND**

Ion exchange treatment is commonly used to remove perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) from groundwater. Treatment vessels are filled with polymer-based ion exchange resin that removes the PFOS and PFOA as water passes over it. The resins are small plastic beads with affixed charges balanced by counter ions. The PFOS and PFOA is removed when the counter ion is exchanged for the changed contaminant ion. The rate of removal depends on initial concentration of the contaminant, the concentration of competing ions, loading rate, size and types of resin beads, and the water chemistry. Over time, the resin becomes loaded with PFOS and PFOA. When saturated, the resin is removed from the vessel and transported to a disposal or incineration facility. Fresh resin is added to the treatment vessels, and treatment continues.

The proposed Project would install water treatment facilities at five sites as described below. The number and size of vessels at each treatment site will depend on the volume of water that will require treatment at each location. While estimated dimensions are included in this IS/MND, exact sizes may vary to ensure the treatment systems can adequately supply the necessary volume of water. To ensure continuous availability of water, the treatment systems would operate up to 24 hours per day. Two new groundwater supply wells would be installed at the Santa Cruz Site, and additional wells would be rehabilitated to due to age and deterioration of the well casing.

### **1.3 SUMMARY OF FINDINGS**

Based on the environmental checklist form prepared for the proposed Project (included in Section 4.0, Environmental Checklist) and supporting environmental analysis (provided in Section 5.0, Environmental Evaluation) the proposed Project would have no impact or a less than significant impact on the environmental impact areas listed below.

- Aesthetics
- Agriculture and Forest Resources
- Air Quality
- Energy
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Population and Housing
- Public Services
- Recreation
- Transportation/Traffic
- Utilities and Service Systems
- Wildfire

The proposed Project has the potential to have significant impacts to the environmental impact areas listed below:

- Biological Resources
- Cultural Resources
- Geology and Soils
- Noise
- Tribal Cultural Resources

However, this IS identifies recommended mitigation measures that would reduce identified potential impacts, to less than significant, when incorporated into the proposed Project.

According to the State CEQA Guidelines, it is appropriate to prepare an MND for the proposed Project because implementation of the recommended mitigation measures would eliminate or reduce potentially significant environmental impacts of the proposed Project to a less than significant level.

### **1.4 PUBLIC REVIEW**

The public review period for the IS/MND in accordance with Section 15073(a) of the State CEQA Guidelines is August 2, 2021, to August 31, 2021. The City has mailed the Notice of Intent (NOI) to adopt a MND for the proposed Project by mail to property owners and occupants contiguous to the Project sites. In addition, the Anaheim Bulletin published the notice on July 29, 2021; and, City staff posted the NOI at the Project sites by August 2, 2021, and recorded the NOI at the Orange County Clerk/Recorder's Office by August 2, 2021. This noticing is in accordance with Section 15072 (a) and (b) of the CEQA Guidelines. The IS/MND is available for public review on the City of Anaheim website ([www.anaheim.net](http://www.anaheim.net)) and the Anaheim Public Utilities Department (201 South Anaheim Boulevard, 11<sup>th</sup> floor). In reviewing the IS/MND, the reviewer should focus on the sufficiency of the document in identifying and analyzing the potential impacts of the

proposed Project on the environment and the ways in which the potentially significant effects are avoided or mitigated. Comments on the analysis contained herein may be sent to:

Jonathan Sanks, Environmental Services and Safety Manager  
City of Anaheim, Public Utilities Department  
201 South Anaheim Boulevard, Suite 1101  
Anaheim, California 92805  
Phone: 714.765.4117  
Email: environmental@anaheim.net

Following receipt and evaluation of comments from agencies, organizations and/or individuals, the City will determine whether these comments have raised any substantial new environmental issues. If not, or if the new issues do not provide substantial evidence that the proposed Project will have a significant effect on the environment, the City Council will consider the approval of the proposed Project and environmental documentation.

## 1.5 **REPORT ORGANIZATION**

This document has the following sections:

- **Section 1 – Introduction.** This section provides an introduction and overview describing the conclusions of the IS.
- **Section 2 – Project Location and Environmental Setting.** This section provides an overview of the proposed Project locations and a description of existing on-site and surrounding land uses.
- **Section 3 – Project Description.** This section identifies key Project characteristics and includes a list of anticipated discretionary actions.
- **Section 4 – Environmental Checklist.** The completed City of Anaheim Environmental Checklist Form provides an overview of the potential impacts that may or may not result from Project implementation.
- **Section 5 – Environmental Evaluation.** This section contains an analysis of environmental impacts identified in the environmental checklist. As necessary, a mitigation program composed of mitigation measures (MMs) and regulatory requirements (RRs), follows the narrative responses. In certain instances, the IS developed these MMs based upon similar MMs that the City approved in conjunction with previously certified Environmental Impact Reports (EIRs) or previously approved MND for similar projects.
- **Section 6 – Report Preparers.** This section identifies those individuals responsible for preparing the IS/MND.
- **Section 7 – References.** The References section identifies resources used to prepare this document.

*This page intentionally left blank*

## SECTION 2.0 PROJECT LOCATION AND ENVIRONMENTAL SETTING

### 2.1 PROJECT LOCATIONS

The proposed Project would include the construction of ion-exchange groundwater treatment, production, and distribution facilities at five separate sites in the City of Anaheim. The Project site locations are shown on Exhibits 1a–e, *Vicinity Map* and are described in more detail below. Exhibits 2a–e, *Aerial Photograph*, represents an aerial view of the Project sites and their immediate surroundings.

Location	Address
Willow Park Site	1617 West Crone Avenue
Downtown Site	123 East Ellsworth Avenue
Katella Avenue Site	2204 East Katella Avenue
Brookhurst Site	1664 South Brookhurst Street
Santa Cruz Site	2035 South Santa Cruz Street

### 2.2 REGIONAL SETTING

The Project sites are located in Orange County and all work will be conducted within the City of Anaheim. The City is approximately seven miles northwest of Downtown Santa Ana and 23 miles southeast of Downtown Los Angeles. The cities of Yorba Linda, Placentia, Fullerton, Buena Park, Cypress, Stanton, Garden Grove, and Orange and unincorporated Orange County border the City. Interstate (I) 5 and State Routes (SR) 39, 55, 57, 90, 91, and 241 provide regional access to the City.

### 2.3 ENVIRONMENTAL SETTING

#### Willow Park Site

The Willow Park Site is an approximate 2.1-acre disturbed site occupied by an existing public restroom facility and an Anaheim Public Utilities (APU) building. The site is located within Willow Park, which contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. Single-family residential uses are located in the immediate area, across Crone Avenue and Loara Street from the park and immediately adjacent to the park to the west.

#### Downtown Site

The Downtown Site is located on the corner of Ellsworth Avenue and Claudina Street, in the vicinity of existing APU equipment. The site is approximately 0.4 acres in size and is currently occupied by an APU building and public surface parking lot that primarily serves the Anaheim Packing District, Farmer's Park, and Anaheim Brewery, as well as other dining and retail areas along Anaheim Boulevard. Other immediately adjacent uses include multi-family residences to the west as well as single-family residences across Ellsworth Avenue and Claudina Street.

### **Katella Avenue Site**

The Katella Avenue site, located south of Katella Avenue and west of the railroad tracks, is an approximately 0.7-acre site that is fully disturbed and paved and is located north and west of the Angel Stadium parking lot, and north and east of The Grove of Anaheim and associated existing tennis courts and proximate to other park uses.

### **Brookhurst Site**

The Brookhurst Site is an approximately 1.4-acre site located east of Brookhurst Street and north of railroad tracks. The site has been subject to historic disturbance and is currently occupied by a small utility building, gravel parking area, and ornamental landscaping, including palms and other ornamental trees.

### **Santa Cruz Site**

The Santa Cruz Site is located along Anaheim Way and Santa Cruz Street. The 3-acre site consists of bare ground and is located west of I-5. Additionally, there is an approximately 1.3-acre pipeline work area that extends along Anaheim Way and west along and within the right-of-way of Orangewood Avenue.

## **SECTION 3.0 PROJECT DESCRIPTION**

### **3.1 PROPOSED USES**

#### **Willow Park Site**

The proposed Project includes installation of a groundwater treatment plant at an existing APU groundwater supply well site, as shown on Exhibit 3, Willow Park Site Plan. The proposed resin truck turnaround area would infringe on the existing basketball court. Because a new walkway would be installed there, the basketball court would need to be relocated, and a second basketball court would be installed. In addition, minor renovations (i.e., new paint, stalls, sinks, etc.) would be made at the restroom facility that is attached to the well building.

#### **Downtown Site**

The proposed Project includes installation of a groundwater treatment plant, at an existing APU groundwater supply well site, as shown on Exhibit 4, Downtown Site Plan.

#### **Katella Avenue Site**

The proposed Project includes installation of a groundwater treatment plant at an existing APU groundwater supply well site and a perimeter 8-foot high fence, as shown on Exhibit 5, Katella Avenue Site Plan.

#### **Brookhurst Site**

The proposed Project includes installation of a groundwater treatment plant at an existing APU groundwater supply well site as shown on Exhibit 6, Brookhurst Site Plan.

#### **Santa Cruz Site**

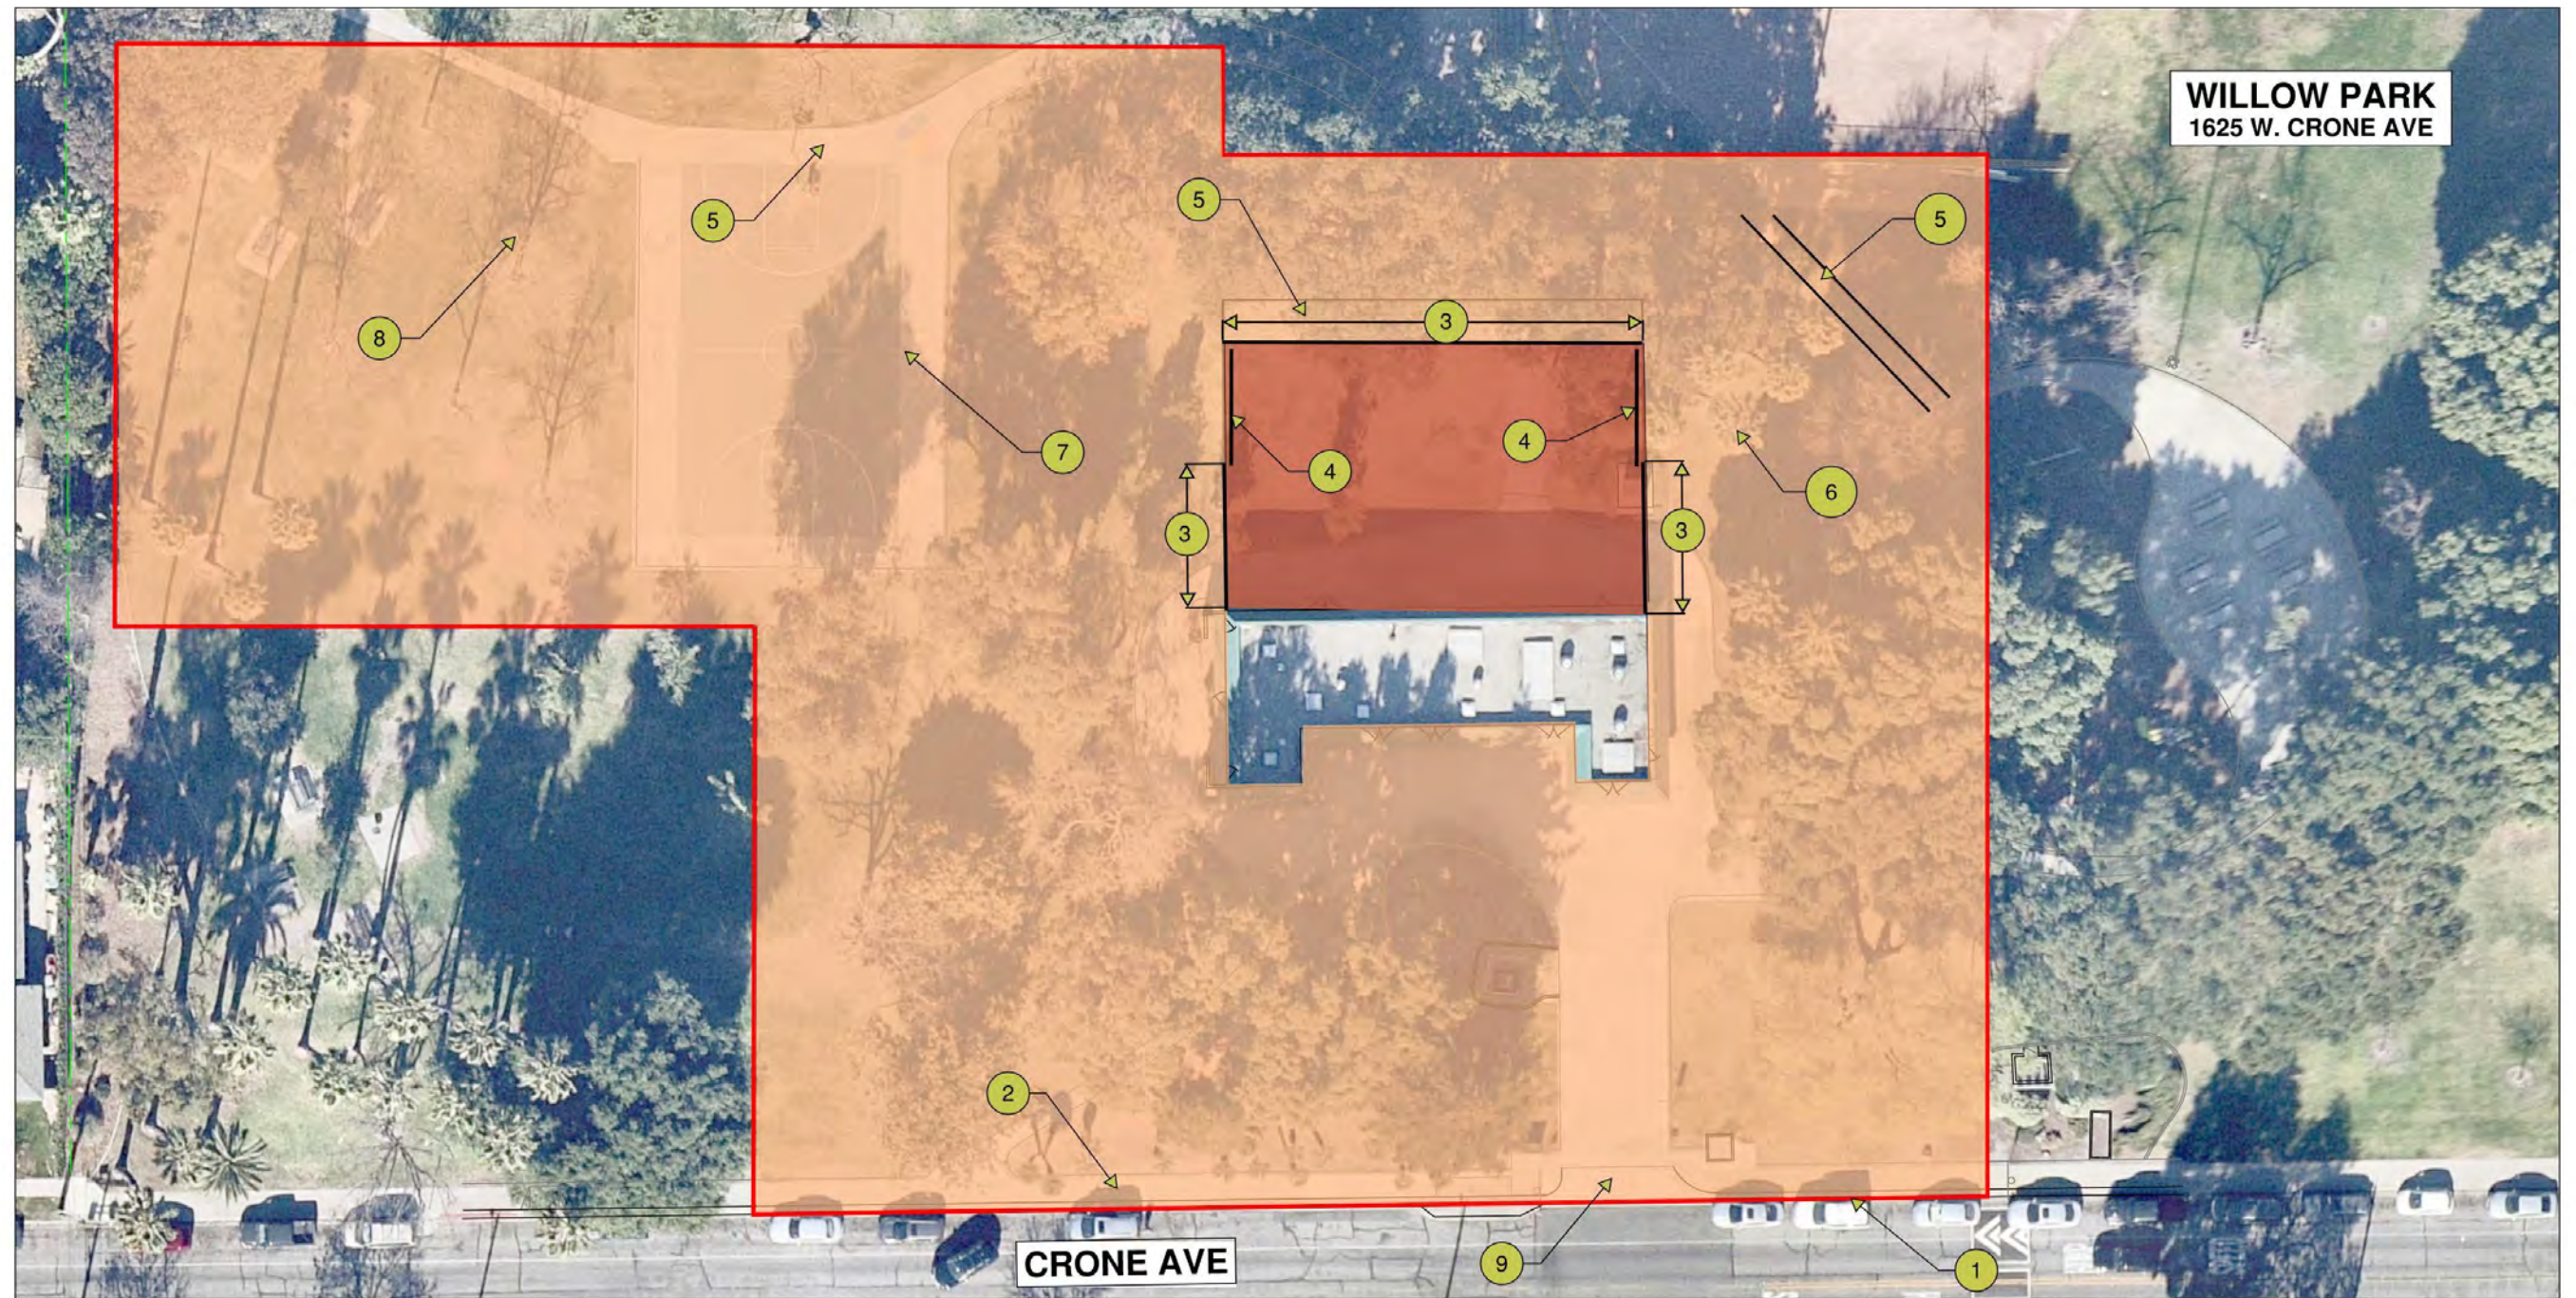

The proposed Project includes installation of a groundwater treatment plant and two new groundwater supply wells, and the replacement of approximately one mile of pipeline beneath Anaheim Way and Orangewood Avenue as shown on Exhibits 7a and 7b, Santa Cruz Site Plan and Pipeline. Additionally, a new emergency backup generator, and a new control building would be constructed at the site.

### **3.2 TREATMENT SYSTEM CONSTRUCTION**

At all five treatment system sites, minor grading activities would be necessary to prepare the location for vessel installation. This would involve ensuring the ground surface is level and properly compacted to support the vessels. A concrete foundation slab would be installed to accommodate the vessels. Equipment and materials would be transported to each site by truck and would be lifted in place by crane and anchored to the foundation. Piping would be installed to receive water from existing water wells, move it through the treatment process, and pump the treated water into the water distribution system. In most cases, excavation would be conducted at depths of 5 feet or less. However, deeper excavations (up to approximately 10 or more feet) may be necessary for activities such as installing valve vaults. It is anticipated that approximately 100 cubic yards of soil would be excavated from each site to facilitate construction. Work would generally be conducted from 7:00 AM to 7:00 PM, Monday through Friday. For impact generating equipment, work hours would be further restricted to between 9:00 AM and 4:00 PM, Monday through Friday. Any work in street right-of-way would be conducted from 8:30 AM to 3:30 PM. However, Project work may occasionally occur outside of these hours. Work outside these hours

(06/09/2021 MDM) R:\Projects\ANA\3ANA009305\Graphics\MND\ex\_SantaCruz\_Pipeline.pdf

would be subject to approval by APU. Typical construction equipment would be used during this Project. This would include pickup trucks, dump trucks, backhoes, excavators, air-driven equipment (such as jackhammers), cranes, soil compactors, cement mixers, and other similar equipment. Equipment would be rotated in and out as construction progresses. To expedite construction, multiple treatment sites may be constructed concurrently.

A drinking water permit amendment would be obtained from the Division of Drinking Water (DDW) prior to operating the treatment plants. All construction activities would be conducted in accordance with local, State, and federal requirements. All additives that come in contact with water would meet the requirements of NSF-61<sup>1</sup> to ensure they are compatible with drinking water.

### **3.3 GROUNDWATER WELL CONSTRUCTION**

Two new groundwater supply wells would be installed at the Santa Cruz Site. A well drilling permit would be obtained from APU prior to commencing drilling activities. AMC Section 10.20 requires that water wells be constructed in accordance with California Department of Water Resources Bulletin 74 (California Water Well Standards).

A drill rig would be used to drill a borehole and install a steel casing at the sites. When completed, the well would be constructed of steel and cement would be used to prevent contamination from entering the well. Construction and development of the well will be conducted 24 hours per day 7 days per week for several weeks. Because work will be conducted at night, sound walls up to approximately 24 feet high would be installed to reduce noise during drilling and development activities.

Groundwater and drilling fluid will be pumped from the borehole and well during construction. These fluids will be pumped through settling tanks to reduce sediment. Once the sediment has been reduced to an acceptable level and chlorine has been neutralized, the water would be discharged into the storm drain system in accordance with National Pollutant Discharge Elimination System (NPDES) permit requirements.

Some water treatment chemicals would be temporarily stored on site during well construction. This would include sodium hypochlorite (bleach) for well disinfecting, drilling fluid dispersants, and dechlorination agents.

Upon completion, the well would be equipped with a pump and connected to the water distribution system. The well water would be sampled and tested, and a drinking water permit amendment would be obtained from DDW prior to operating the well. All well construction activities would be conducted in accordance with local, State, and federal requirements.

Construction equipment used during this phase is expected to include a drill rig, backhoe, air compressor, diesel-powered test pump, cement mixers and pumps, flatbed trucks, and other similar equipment. Equipment would be rotated in and out as construction progresses.

### **3.4 GROUNDWATER WELL REHABILITATION**

Existing groundwater supply wells at the Katella Avenue and Brookhurst Sites would be rehabilitated. This would entail conducting a downhole video inspection to evaluate the well condition and a survey would be conducted to verify the well's vertical alignment. A brush would

---

<sup>1</sup> NSF/ANSI 61 is a set of national standards that relates to water treatment. It establishes stringent requirements for the control of equipment that comes into contact with either potable water or products that support the production of potable water. The tests vary from a basic cold water test at different pH levels to the more challenging chemical certification.

be lowered into the well casing to clean the screen. A steel liner would be lowered into the existing well casing and sealed in place with materials such as gravel, sand, bentonite, and/or cement.

Groundwater would be pumped from the well during rehabilitation. These fluids would be pumped through temporary onsite settling tanks to reduce sediment. Once the sediment has been reduced to an acceptable level and chlorine has been neutralized, the water would be discharged into the storm drain system, in accordance with NPDES permit requirements.

Some water treatment chemicals would be temporarily stored on site during well construction. This would include sodium hypochlorite (bleach) for well disinfecting, drilling fluid dispersants, de-chlorination agents, hydrochloric acid (to break down accumulated scale in the well), and other similar well rehabilitation products. All products used in the well would comply with NSF-61 to ensure they are safe for use in the water distribution system.

Upon completion, the well would be equipped with a pump and connected to the water distribution system. The well water would be sampled and tested, and a drinking water permit amendment would be obtained from DDW prior to operating the well. All well construction activities would be conducted in accordance with local, State, and federal requirements.

Construction equipment used during this phase is expected to include a well development rig (similar to a crane), backhoe, air compressor, diesel-powered test pump, cement mixers and pumps, flatbed trucks, and other similar equipment. Equipment would be rotated in and out as construction progresses.

### **3.5 TREATMENT SYSTEM AND WELL OPERATION**

Operation and maintenance activities will be conducted to ensure the treatment systems operate safely and efficiently. APU technicians would generally visit each treatment and well site daily to verify the system is operated as designed. The workers would typically be able to conduct their activities using an ordinary pickup truck or similar vehicle. In most cases, maintenance work would be conducted during daytime. However, it is possible that unplanned, emergency repairs would be conducted at night.

Resin change-out would need to be conducted at each treatment site. Change-outs would be scheduled when the resin becomes saturated and cannot effectively treat the water. This is expected to occur once per year at each treatment site. However, the exact frequency will vary based on the monitored flow through the treatment plants and the chemistry of the water. A water hose would be used to flush the spent resin from the treatment vessels into a tanker truck for transportation. The resin would be taken to an appropriately permitted facility for incineration or disposal. State, local, and federal laws pertaining to waste transportation and disposal would be followed.

### **3.6 CONSTRUCTION ACTIVITIES AND PROJECT PHASING**

Construction is expected to begin in late 2021 and is expected to be completed in 2024. Construction activities would generally occur during daytime hours in accordance with the City of Anaheim's Municipal Code (AMC). It is possible that multiple treatment sites would be constructed concurrently. Residents and businesses adjacent to the Project sites would be notified in writing at least one week prior to commencing construction.

### 3.7 **PERMITS AND APPROVALS**

APU would obtain all necessary permits prior to beginning the Project. Potential permits and approvals for the Project would be obtained from:

Agency	Approval
<p><b>City of Anaheim</b> Lead Agency</p>	<ul style="list-style-type: none"> <li>• Approval of the MND and the Project by the City Council.</li> <li>• Issuance of building, grading, right of way construction, storm drain, and well drilling permits.</li> <li>• Approval of Water Quality Management Plans (WQMP).</li> </ul>

## GENERAL PLAN DESIGNATION:

Willow Park Site	Open Space-Parks (OS-P)
Downtown Site	Public-Institutional (P-I)
Katella Avenue Site	Mixed Use Overlay (MU UC)
Brookhurst Site	Open Space (OS)
Santa Cruz Site	Low Intensity Office (O-L)

## **ZONING:**

Willow Park Site	Public Recreation (PR)
Downtown Site	Multi-Family Residential (RM-3)
Katella Avenue Site	Public Recreation Zone (PR)
Brookhurst Site	Transition Zone (T)
Santa Cruz Site	Low Intensity Office Zone (O-L)

## **PROJECT DESCRIPTION:**

The proposed Project would involve construction of ion-exchange groundwater treatment plants and ancillary facilities at five separate sites in the City of Anaheim.

## **PROJECT SETTING AND SURROUNDING LAND USES:**

The Willow Park Site is an approximately 2.1-acre disturbed site occupied by an existing public restroom facility and utility building. The site is located within Willow Park, which contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. Single-family residential uses are located in the immediate area, across Crone Avenue and Loara Street from the park and immediately adjacent to the park to the west.

The Downtown Site is located on the corner of Ellsworth Avenue and Claudina Street, in the vicinity of existing APU equipment. The site is 0.4 acres in size and is currently occupied by an APU building and public surface parking lot that primarily serves the Anaheim Packing District, Farmer's Park, and Anaheim Brewery, as well as other dining and retail areas along Anaheim Boulevard. Other immediately adjacent uses include multi-family residences to the west as well as single-family residences across Ellsworth Avenue and Claudina Street.

The Katella Avenue Site, located south of Katella Avenue and west of the railroad tracks, is an approximately 0.7-acre site that is fully disturbed and paved and is located north and west of the Angel Stadium parking lot, and north and east of The Grove of Anaheim and associated existing tennis courts and proximate to other park uses.

The Brookhurst Site is an approximately 1.4-acre site located within an electrical easement, east of Brookhurst Street and north of railroad tracks. The site has been subject to historic disturbance and is currently occupied by a small utility building, gravel parking area, and ornamental landscaping, including palms and other ornamental trees.

The Santa Cruz Site is located along Anaheim Way and Santa Cruz Street. The 3-acre site consists of bare ground and is located west of I-5. Additionally, there is an approximately 1.3-acre pipeline work area that extends along Anaheim Way and west along and within the right-of-way of Orangewood Avenue.

## **OTHER PUBLIC AGENCIES WHOSE APPROVAL IS REQUIRED:**

- South Coast Air Quality Management District
- State Water Resources Control Board

## ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- |   |   |
|---|---|
| <input type="checkbox"/> Aesthetic                          | <input type="checkbox"/> Land Use/Planning                    |
| <input type="checkbox"/> Agricultural & Forestry Resources  | <input type="checkbox"/> Mineral Resources                    |
| <input type="checkbox"/> Air Quality                        | <input checked="" type="checkbox"/> Noise                     |
| <input checked="" type="checkbox"/> Biological Resources    | <input type="checkbox"/> Population/Housing                   |

| <input type="checkbox"/> Mandatory Findings of Significance |   |

## DETERMINATION:

On the basis of this initial evaluation:

- ☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) All answers must take account of the whole action involved, including offsite as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 2) A list of “Supporting Information Sources” must be attached and other sources used or individuals contacted should be cited in the Narrative Summary for each section.
- 3) Response Column Heading Definitions:
  - a) **Potentially Significant Impact** is appropriate if there is substantial evidence that an effect may be significant. If there are one or more “Potentially Significant Impact” entries when the determination is made, an EIR is required.
  - b) **Potentially Significant Unless Mitigation Incorporated** applies where the incorporation of mitigation measures has reduced an effect from “Potentially Significant Impact” to a “Less Than Significant Impact”. The mitigation measures must be described, along with a brief explanation of how they reduce the effect to a less than significant level.
  - c) **Less Than Significant Impact** applies where the project creates no significant impacts, only Less Than Significant impacts.
  - d) **No Impact** applies where a project does not create an impact in that category. A “No Impact” answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one proposed (e.g., the project falls outside of a fault rupture zone). A “No Impact” answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 4) Earlier analyses may be used where, pursuant to a tiering, program EIR, Master EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration (Section 15062(c)(3)(D)). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are “Less than Significant with Mitigation Measures Incorporated”, describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 5) Incorporate into the checklist any references to information sources for potential impacts (e.g., the General Plan, zoning ordinance). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 6) The explanation of each issue should identify:
  - a) The significance criteria or threshold, if any, used to evaluate each question; and
  - b) The mitigation measure identified, if any, to reduce the impact to less than significant.

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
<b>I. AESTHETICS.</b> Except as provided in Public Resources Code Section 21099, would the project:				
a) Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway or local scenic expressway, scenic highway, or eligible scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Substantially degrade the existing visual character or quality of public views of the site and its surroundings?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>II. AGRICULTURE &amp; FOREST RESOURCES</b> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>III. AIR QUALITY</b> -- Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable Federal or State ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
<b>IV. BIOLOGICAL RESOURCES -- Would the project:</b>				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>V. CULTURAL RESOURCES -- Would the project:</b>				
a) Cause a substantial adverse change in the significance of a historical resource pursuant to in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>VI. ENERGY -- Would the project:</b>				
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>VII. GEOLOGY AND SOILS -- Would the project:</b>				
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
ii) Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii) Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv) Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be located on expansive soil, as defined in Section 1803.5.3 of the California Building Code (2010), creating substantial direct or indirect risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>VIII. GREENHOUSE GAS EMISSIONS – Would the project:</b>				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>IX. HAZARDS AND HAZARDOUS MATERIALS -- Would the project:</b>				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) For a Project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in a safety hazard or excessive noise for people residing or working in the Project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
<b>X. HYDROLOGY AND WATER QUALITY -- Would the project:</b>				
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
(i) result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(iv) impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>XI. LAND USE AND PLANNING -- Would the project:</b>				
a) Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>XII. MINERAL RESOURCES -- Would the project:</b>				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>XIII. NOISE -- Would the project result in:</b>				
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
c) For a project located within the vicinity of a private airstrip or an airport land use plan (Los Alamitos Armed Forces Reserve Center or Fullerton Municipal Airport), would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>XIV. POPULATION AND HOUSING --</b> Would the project:				
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>XV. PUBLIC SERVICES --</b> Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>XVI. RECREATION --</b>				
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>XVII. TRANSPORTATION --</b> Would the project:				
a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
<b>XVIII. TRIBAL CULTURAL RESOURCES -- Would the project:</b>				
Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section §21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section §5020.1(k), or	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section §5024.1. In applying criteria set forth in subdivision (c) of Public Resources Code Section §5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>XIX. UTILITIES AND SERVICE SYSTEMS -- Would the project:</b>				
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years (including large-scale developments as defined by Public Resources Code Section 21151.9 and described in Question No. 20 of the Environmental Information Form)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Comply with Federal, State, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Result in a need for new systems or supplies, or substantial alterations related to electricity?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g) Result in a need for new systems or supplies, or substantial alterations related to natural gas?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
h) Result in a need for new systems or supplies, or substantial alterations related to telephone service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i) Result in a need for new systems or supplies, or substantial alterations related to television service/reception?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
<b>XX. WILDFIRE</b> -- If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>XXI. MANDATORY FINDINGS OF SIGNIFICANCE</b>				
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Fish and Wildlife Determination

Per Section 21089(b) of the *Public Resources Code*, all project applicants and public agencies subject to CEQA shall pay a Fish and Wildlife filing fee for each proposed project that would adversely affect wildlife resources.\*

Based on the responses contained in this Environmental Checklist, there is no evidence that the project has a potential for a change that would adversely affect wildlife resources or the habitat upon which the wildlife depends. Has the presumption of adverse effect set forth in 14 CCR 753.5(d) been rebutted by substantial evidence?

- ☐ Yes (Certificate of Fee Exemption and County Administrative fee required)
- ☒ No (Pay fee)

**\*Note:** *California Fish and Wildlife Code* Section 711.4(c)(2)(A) states that projects that are Categorically Exempt from CEQA are also exempt from filing fee.

## SECTION 5.0 ENVIRONMENTAL EVALUATION

### I. AESTHETICS

**Question A:** *Would the project have a substantial adverse effect on a scenic vista?*

**Question B:** *Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway or local scenic expressway, scenic highway, or eligible scenic highway?*

**No Impact.** The proposed Project sites are located in heavily developed areas of the City. There are no large areas of open space or noted visual resources in proximity to the Project sites. According to the California Department of Transportation (Caltrans) and the *City of Anaheim General Plan*, none of the roadways in the vicinity of the Project sites are designated as scenic roadways, nor are the sites located within the City's Scenic Corridor Overlay Zone (Caltrans 2021a; Anaheim 2004a). There are no natural landscape features, visual resources, or vistas located on the sites or in the Project vicinity, nor are any visible from the Project sites. Therefore, although Project implementation would represent a change to the visual appearance of the sites, development of the proposed Project would not impact a scenic vista or damage scenic resources within a State scenic highway or local scenic expressway, or eligible scenic highway. No impact would occur, and no mitigation is required.

**Question C:** *Would the project substantially degrade the existing visual character or quality of the site and its surroundings?*

**Less Than Significant Impact.** The aerial photographs presented on Exhibits 2a–e, *Aerial Photograph*, show the Project sites' relationships to surrounding uses. Due to the developed nature and relatively flat topography of each of the Project sites and surrounding areas, views of the Project sites are limited to immediately adjacent vantage points, which are further described below.

#### **Existing Views and Visual Character**

##### ***Willow Park Site***

The Willow Park Site is an approximately 2.1-acre disturbed site occupied by an existing public restroom facility and utility building. The site is located within Willow Park, which contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. Single-family residential uses are located in the immediate area, across Crone Avenue and Loara Street from the park and immediately adjacent to the park to the west.

View 1 on Exhibit 8a, *Site Photographs*, illustrates the view from the southeast corner of the Project site facing east. This view depicts the existing public restroom facility, which is surrounded by turf and mature trees and vegetation. As shown in the right-hand side of the photograph, the sidewalk along West Crone Avenue is lined with cars. Single-family residences are located across this street and can be seen in the background of the photograph.

View 2 on Exhibit 8a, *Site Photographs*, depicts the view from the southeast corner of the Project site looking northwest. An APU truck can be seen parked in front of the existing restroom facility. The site is surrounded by turf and mature trees and vegetation. A basketball court and playing fields are visible in the distance.

Exhibit 8e

### ***Downtown Site***

The Downtown Site is located on the corner of Ellsworth Avenue and Claudina Street, in the vicinity of an existing APU facility. The site is 0.4-acre and is currently occupied by an APU building and public surface parking lot that primarily serves the Anaheim Packing District, Farmer's Park, and Anaheim Brewery, as well as other dining and retail areas along Anaheim Boulevard. Other immediately adjacent uses include multi-family residences to the west as well as single-family residences across Ellsworth Avenue and Claudina Street.

View 3 on Exhibit 8b, *Site Photographs*, illustrates the view from South Claudina Street looking southwest toward the Project site. This view shows the public surface parking lot, which contains ornamental trees and landscaping. Behind the parking lot is a large block wall and the existing APU facility. Single-family residences can be seen across East Ellsworth Avenue in the background of the photograph.

View 4 on Exhibit 8b, *Site Photographs*, illustrates the view from East Ellsworth Avenue looking northeast toward the Project site. As shown, this view depicts the existing APU facility. A vehicle can be seen parked in the main gated driveway. The Project site contains ornamental trees and landscaping. On the left-hand side of the photograph is another driveway and/or alleyway which leads out to East Santa Ana Street and is adjacent to multi-family residences and dining establishments.

### ***Katella Avenue Site***

The Katella Avenue site, located south of Katella Avenue and west of the railroad tracks, is an approximately 0.7-acre site that is fully disturbed and paved and is located north and west of the Angel Stadium parking lot, and north and east of The Grove of Anaheim and associated existing tennis courts and proximate to other park uses.

View 5 on Exhibit 8c, *Site Photographs*, depicts the view of the existing APU building. As shown, the entire site is paved. The Angels Stadium Parking lot contains pole-mounted lighting and can be seen in the right-hand side of the photograph. As shown, the site contains a blue dumpster and multiple City-owned storage containers. In the background on the photograph, commercial buildings and a billboard can be seen along East Katella Avenue.

View 6 on Exhibit 8c, *Site Photographs*, depicts the view from the eastern portion of the Project site looking west. As shown, The Grove of Anaheim is located adjacent to the Project site. The western portion of the site is surrounded by a chain link fence. A large billboard can be seen in this photograph. Additionally, multi-family residential and cars traveling along East Katella Avenue can be seen in the background.

### ***Brookhurst Site***

The Brookhurst Site is located within an electrical easement, east of Brookhurst Street and north of railroad tracks. The site has been subject to historic disturbance and is currently occupied by a small utility building, gravel parking area, and ornamental landscaping, including palms and other ornamental trees.

View 7 on Exhibit 8d, *Site Photographs*, depicts the view from the railroad tracks looking northwest toward the Project site. As shown, the site is surrounded by a chain link fence and contains a small utility building, existing groundwater supply equipment, utility lines, and a gravel parking area.

View 8 on Exhibit 8d, *Site Photographs*, depicts the view from the existing gate looking east into the Project site. As shown, the site contains a gravel parking area, ornamental trees and landscaping, and utility lines.

### **Santa Cruz Site**

The Santa Cruz Site is located along Anaheim Way and Santa Cruz Street. The approximate 3-acre site consists of bare ground and is located west of I-5. Additionally, there is an approximately 1.3-acre pipeline work area that extends along Anaheim Way and west along and within the right-of-way of Orangewood Avenue.

View 9 on Exhibit 8e, *Site Photographs*, depicts the view from East Stanford Court facing east toward the Project site. The site is currently surrounded by opaque fencing. Construction materials can be seen in the roadway including traffic cones and signage. As shown, the site contains large storage trailers and is located adjacent to the I-5 freeway. Commercial uses can be seen in the distance of the photograph.

View 10 on Exhibit 8e, *Site Photographs*, depicts the view from the cul-de-sac along South Santa Cruz Street facing northwest toward the Project site. Cars and construction vehicles can be seen parked along the street, which is also lined with pole mounted lighting. Large storage trailers can be seen on the site, which is surrounded by opaque fencing. The I-5 freeway can be seen in the background of this photograph.

### **Visual Changes from the Proposed Project**

A potentially significant impact would occur if the Project were to introduce visual elements that would be incompatible with the character of the area surrounding the Project sites. As stated previously, the Willow Park, Katella Avenue, Downtown, and Brookhurst Sites currently contain existing groundwater supply equipment such as wells, pumps, and water storage tanks. The Downtown Site is also occupied by an existing public surface parking lot. The Santa Cruz Site is located in a highly developed area of the City and currently consists of bare ground. While the installation of new groundwater treatment vessels may be visible, placement of these structures is consistent with the existing equipment in use at the Project sites. Therefore, impacts would be less than significant, and no mitigation is required.

**Question D: *Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?***

**Less Than Significant Impact.** The Project sites are located within areas currently subject to nighttime lighting from surrounding urban uses. With the exception of water well drilling at the Santa Cruz Site, construction is not anticipated outside of daylight hours. New utility lighting features would be installed at each site for security and safety purposes. The lighting features would be adjusted such that they would not point directly into neighboring buildings. The new lighting would match the character of existing surrounding uses. Thus, impacts would be less than significant.

Glare is caused by light reflections from pavement, vehicles, and building materials including glass and polished surfaces. During daylight hours, the amount of glare depends on intensity and direction of sunlight. Glare can create hazards to motorists and nuisances for pedestrians and other viewers. The proposed Project would not include the use of reflective materials and potential glare from sunlight would be virtually nonexistent. As such, glare would not pose a hazard to pedestrians and others in the Project vicinity, nor would it affect surrounding uses. No impact related to light or glare would occur, and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

## **II. AGRICULTURE AND FOREST LAND RESOURCES**

**Question A:** *Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?*

**Question B:** *Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?*

**Question C:** *Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined in Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?*

**Question D:** *Would the project result in the loss of forest land or conversion of forest land to non-forest use?*

**Question E:** *Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?*

**No Impact.** Data from the State of California Department of Conservation, Farmland Mapping and Monitoring Program (2016) indicates that the Project sites do not contain any land designated as Prime Farmland, Farmland of Statewide Importance, Unique Farmland or Farmland of Local Importance, nor are they zoned for agricultural use. The Project sites are designated as “Urban and Built Up Land”. No other designated farmland exists in the vicinity of the proposed Project, and the Project sites are not subject to any California Land Conservation Act (Williamson Act) contracts. No current agricultural operations exist in the vicinity of the Project sites.

The Project sites are not considered farmland of significance or land in agricultural use.

The Project sites are not defined as forest land according to Section 12220(g) of the *California Public Resources Code*, which defines forest land as “land that can support 10 percent native tree cover of any species, including hardwoods, under natural conditions, and that allows for management of one or more forest resources, including timber, aesthetics, fish and wildlife, biodiversity, water quality, recreation, and other public benefits”, nor are they zoned for Timberland Production as defined by Section 51104(g) of the *California Government Code*.

Since the Project sites are located in an urban and developed areas, Project-related changes would not result in conversion of farm or forest land to non-agricultural or non-forest uses. No impacts related to agricultural and forest land resources would occur, and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

### **III. AIR QUALITY**

Relevant elements of the proposed Project related to the analysis of potential air quality impacts include the construction and operation of water treatment facilities at five different site locations. This includes (1) well drilling; (2) grading; (3) building construction; and (4) well rehabilitation.

The Project site is located in the Orange County portion of the South Coast Air Basin (SoCAB), and, for air quality regulation and permitting, is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is a 6,600-square-mile area bound by the Pacific Ocean to the west; the San Gabriel, San Bernardino, and San Jacinto Mountains to the north and east; and the San Diego County line to the south. The SoCAB includes all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties, in addition to the San Geronio Pass area of Riverside County. The SoCAB's terrain and geographical location (i.e., a coastal plain with connecting broad valleys and low hills) determine its distinctive semi-arid climate, which is characterized by moderate temperatures, oceanic influence, and precipitation that is limited to a few storms during the winter (i.e., November through April).

#### **Existing Air Quality Conditions**

Air quality data for the Project site is represented by the Anaheim-Pampas Lane monitoring station located at 1630 West Pampas Lane, Anaheim. Pollutants measured at the Anaheim-Pampas Lane Monitoring Station include ozone (O<sub>3</sub>), respirable particulate matter with a diameter of 10 microns or less (PM<sub>10</sub>), fine particulate matter with a diameter of 2.5 microns or less (PM<sub>2.5</sub>), and nitrogen dioxide (NO<sub>2</sub>). The monitoring data presented in Table 1, Air Quality Levels Measured at the Anaheim-Pampas Lane Monitoring Station, were obtained from the California Air Resources Board (Psomas 2021a). Federal and State air quality standards are presented with the number of times those standards were exceeded.

**TABLE 1**  
**AIR QUALITY LEVELS MEASURED AT THE ANAHEIM-PAMPAS**  
**LANE MONITORING STATION**

Pollutant	California Standard	National Standard	Year	Max. Level	Days State Standard Exceeded	Days National Standard Exceeded
O <sub>3</sub> (1 hour)	0.09 ppm	None	2017	0.090	0	0
			2018	0.112	1	1
			2019	0.096	1	1
O <sub>3</sub> (8 hour)	0.070 ppm	0.070 ppm	2017	0.076	4	4
			2018	0.071	1	1
			2019	0.082	1	1
PM10 (24 hour)	50 µg/m <sup>3</sup>	150 µg/m <sup>3</sup>	2017	95.7	5	0
			2018	94.6	2	0
			2019	127.1	4	0

## Regulatory Background

### Pollutants and Standards

The U.S. Environmental Protection Agency (USEPA) defines seven criteria air pollutants: O<sub>3</sub>, carbon monoxide (CO), NO<sub>2</sub>, sulfur dioxide (SO<sub>2</sub>), PM10, PM2.5, and lead. These pollutants are called criteria pollutants because the USEPA has established National Ambient Air Quality Standards (NAAQS) for the concentrations of these pollutants (Psomas 2021a). California Air Resources Board (CARB) has also established standards for the criteria pollutants, known as California Ambient Air Quality Standards (CAAQS), and the State standards are generally more restrictive than the NAAQS. When a region has air quality that fails to meet the standards, the USEPA and the CARB designate the region as “nonattainment” and the regional air quality agency must develop plans to attain the standards. The following are the criteria pollutants and their health effects.

- O<sub>3</sub> is a nearly colorless gas that is formed by photochemical reaction (when nitrogen dioxide is broken down by sunlight). Ground-level O<sub>3</sub> exposure can cause a variety of health problems, including lung irritation, wheezing, coughing, pain when taking a deep

breath, and breathing difficulties during exercise or outdoor activities; permanent lung damage; aggravated asthma; and increased susceptibility to respiratory illnesses.

- CO is a colorless and odorless toxic gas which, in the urban environment, is associated primarily with the incomplete combustion of fossil fuels in motor vehicles. CO combines with hemoglobin in the bloodstream and reduces the amount of oxygen that can be circulated through the body. High CO concentrations can lead to headaches, aggravation of cardiovascular disease, and impairment of central nervous system functions.
- Nitrogen oxides (NO<sub>x</sub>) are yellowish-brown gases, which at high levels can cause breathing difficulties. NO<sub>x</sub> are formed when nitric oxide (a pollutant from internal combustion processes) combines with oxygen.
- Sulfur dioxide (SO<sub>2</sub>) is a colorless, pungent gas formed primarily by the combustion of sulfur-containing fossil fuels. Health effects include acute respiratory symptoms and difficulty in breathing for children.
- PM10 and PM2.5 refer to particulate matter less than ten microns and two and one-half microns in diameter, respectively. Particulates of this size cause a greater health risk than larger-sized particles since fine particles can more easily cause irritation. Particulate matter includes both aerosols and solid particles. An example of particulate matter is fugitive dust. Short-term exposure to high PM2.5 levels is associated with premature mortality and increased hospital admissions and emergency room visits. Long-term exposure to high PM2.5 levels is associated with premature mortality and development of chronic respiratory disease. Short-term exposure to high PM10 levels is associated with hospital admissions for cardiopulmonary diseases, increased respiratory symptoms, and possible premature mortality.

Based on monitored air pollutant concentrations, the USEPA and the CARB designate an area's status in attaining the NAAQS and the CAAQS, respectively, for selected criteria pollutants. These attainment designations are shown in Table 2. As identified in Table 2, Orange County is located in a nonattainment area for O<sub>3</sub>, PM10, and PM2.5.

**TABLE 2**  
**ATTAINMENT STATUS OF CRITERIA POLLUTANTS**  
**IN THE SOUTH COAST AIR BASIN**

Pollutant	State	Federal
O <sub>3</sub> (1 hour)	Nonattainment	No standards
O <sub>3</sub> (8 hour)	Nonattainment	Nonattainment
PM10	Nonattainment	Attainment/Maintenance
PM2.5	Nonattainment	Nonattainment
CO	Attainment	Attainment/Maintenance
NO <sub>2</sub>	Attainment	Attainment/Maintenance
SO <sub>2</sub>	Attainment	Attainment
Lead	Attainment	Attainment/Nonattainment*
All others	Attainment/Unclassified	No standards
<p>O<sub>3</sub>: ozone; PM10: respirable particulate matter 10 microns or less in diameter; PM2.5: fine particulate matter 2.5 microns or less in diameter; CO: carbon monoxide; NO<sub>2</sub>: nitrogen dioxide; SO<sub>2</sub>: sulfur dioxide; SoCAB: South Coast Air Basin.</p> <p>* Los Angeles County is classified nonattainment for lead; the remainder of the SoCAB is in attainment of the State and federal standards.</p> <p>Source: Psomas 2021b.</p>		

CARB, a part of the California Environmental Protection Agency, is responsible for coordinating and administering both the federal and State air pollution control programs in California. In this capacity, CARB conducts research, sets the CAAQS (as shown in Table 3), compiles emission inventories, develops suggested control measures, oversees local programs, and prepares the State Implementation Plan (SIP). For regions that do not attain the CAAQS, CARB requires the air districts to prepare plans for attaining the standards. These plans are then integrated into the SIP. CARB establishes emissions standards for (1) motor vehicles sold in California, (2) consumer products (e.g., hair spray, aerosol paints, barbecue lighter fluid), and (3) various types of commercial equipment. It also sets fuel specifications to further reduce vehicular emissions.

The SCAQMD was established in 1977 by merging the individual air pollution control districts of the four counties within the SoCAB: Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties. The SCAQMD and the Southern California Association of Governments (SCAG), in coordination with local governments and the private sector, develop the Air Quality Management Plan (AQMP) for the SoCAB to satisfy these requirements. The AQMP is the most important air management document for the SoCAB because it provides the blueprint for meeting State and federal ambient air quality standards.

On November 28, 2007, CARB submitted a SIP revision to the USEPA for O<sub>3</sub>, PM<sub>2.5</sub> (1997 Standard), CO, and NO<sub>2</sub> in the SoCAB. This revision is identified as the “2007 South Coast SIP”. The 2007 South Coast SIP demonstrates attainment of the federal PM<sub>2.5</sub> standard in the SoCAB by 2014, and attainment of the federal 8-hour O<sub>3</sub> standard by 2023. This SIP also includes a request to reclassify the O<sub>3</sub> attainment designation from “severe” to “extreme”. The USEPA approved the redesignation effective June 4, 2010. The “extreme” designation requires the attainment of the 8-hour O<sub>3</sub> standard in the SoCAB by June 2024. CARB approved PM<sub>2.5</sub> SIP revisions in April 2011, and the O<sub>3</sub> SIP revisions in July 2011. The USEPA approved the PM<sub>2.5</sub> SIP on September 25, 2013, and has approved 47 of the 62 1997 8-hour O<sub>3</sub> SIP requirements (Psomas 2021a). On November 30, 2014, the USEPA proposed a finding that the SoCAB has attained the 1997 PM<sub>2.5</sub> standards (Psomas 2021a). The comment period closed on January 22, 2015; no subsequent action has been taken.

On September 30, 2015, the USEPA proposed to approve elements of the South Coast 2012 PM<sub>2.5</sub> Plan and 2015 Supplement, which addresses Clean Air Act requirements for the 2006 PM<sub>2.5</sub> NAAQS, and proposed to reclassify the area as a “serious” nonattainment area for the 2006 PM<sub>2.5</sub> standard. The reclassification is based on the determination that the area cannot practicably attain the 2006 PM<sub>2.5</sub> NAAQS by the moderate area attainment date (December 31, 2015). On December 22, 2015, the EPA reclassified the South Coast area as a “Serious” nonattainment area for the 2006 PM<sub>2.5</sub> standard. The final reclassification requires the State to submit a “serious area” plan that provides for attainment of the 2006 PM<sub>2.5</sub> NAAQS as expeditiously as practicable as and no later than December 31, 2019 (Psomas 2021a). On December 4, 2020, the SCAQMD adopted the *South Coast Air Basin Attainment Plan for 2006 24-Hour PM<sub>2.5</sub> Standard* (Plan) to meet the Clean Air Act requirements. CARB was scheduled to consider adopting the Plan on December 10, 2020, for submittal into the California SIP. However, this item has been moved to the February 25, 2021 CARB meeting (Psomas 2021a).

**TABLE 3**  
**CALIFORNIA AND FEDERAL AMBIENT AIR QUALITY STANDARDS**

Pollutant	Averaging Time	California Standards	Federal Standards	
			Primary <sup>a</sup>	Secondary <sup>b</sup>
O <sub>3</sub>	1 Hour	0.09 ppm (180 µg/m <sup>3</sup> )	—	—
	8 Hour	0.070 ppm (137 µg/m <sup>3</sup> )	0.070 ppm (137 µg/m <sup>3</sup> )	Same as Primary

Vinyl Chloride	24 Hour	0.01 ppm (26 µg/m <sup>3</sup> )		
O <sub>3</sub> : ozone; ppm: parts per million; µg/m <sup>3</sup> : micrograms per cubic meter; PM10: respirable particulate matter 10 microns or less in diameter; AAM: Annual Arithmetic Mean; —: No Standard; PM2.5: fine particulate matter 2.5 microns or less in diameter; CO: carbon monoxide; NO <sub>2</sub> : nitrogen dioxide; SO <sub>2</sub> : sulfur dioxide; km: kilometer.				
<sup>a</sup> <i>National Primary Standards</i> : The levels of air quality necessary, within an adequate margin of safety, to protect the public health.				
<sup>b</sup> <i>National Secondary Standards</i> : The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.				
Note: More detailed information in the data presented in this table can be found at the CARB website ( <a href="http://www.arb.ca.gov">www.arb.ca.gov</a> ).				
Source: Psomas 2021b.				

On March 3, 2017, the SCAQMD adopted the 2016 AQMP, which is a regional and multi-agency effort (i.e., SCAQMD, CARB, SCAG, and USEPA). The 2016 AQMP incorporates the latest scientific and technical information and planning assumptions, including the SCAG 2016–2040 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS); updated emission inventory methodologies for various source categories; and SCAG's latest growth forecasts. The main purpose of an AQMP is to bring an area into compliance with the requirements of federal and State air quality standards. For a project to be consistent with the AQMP, the pollutants

emitted from the project should not (1) exceed the SCAQMD CEQA air quality significance thresholds or (2) conflict with or exceed the assumptions in the AQMP.

On October 1, 2015, the USEPA strengthened the NAAQS for ground-level ozone, lowering the primary and secondary ozone standard levels to 70 parts per billion. The South Coast Air Basin is classified as an “extreme” non-attainment area for the 2015 Ozone NAAQS. The 2022 AQMP will be developed to address the requirements for meeting this standard. The 2022 AQMP will represent a comprehensive analysis of emissions, meteorology, regional air quality modeling, regional growth projections, and the impact of existing and proposed control measures (Psomas 2021a).

### ***Sensitive Air Quality Receptors***

Sensitive receptors include, but are not limited to, children, the elderly, persons with preexisting respiratory or cardiovascular illness, and athletes and others who engage in frequent exercise. These sensitive receptors include, but are not limited to, schools, parks, hospitals, high-density residential areas, and convalescent homes.

The buildings and structures that immediately surround the five Project site locations include park and recreational uses, single- and multi-family residential uses, City buildings, among others.

### **Air Quality Impact Analysis**

#### ***Thresholds of Significance***

The SCAQMD’s Air Quality Analysis Handbook (CEQA Handbook) provides significance thresholds for both construction and operation of projects within the SCAQMD’s jurisdictional boundaries (Psomas 2021a). The SCAQMD recommends that projects be evaluated in terms of the quantitative thresholds established to assess both the regional and localized impacts of project-related air pollutant emissions. The City of Anaheim uses the current SCAQMD thresholds, identified in Table 4, to determine whether a proposed project would have a significant impact.

**TABLE 4**  
**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**AIR QUALITY SIGNIFICANCE THRESHOLDS**

Mass Daily Thresholds <sup>a</sup>		
Pollutant	Construction	Operation
NOx	100 lbs/day	55 lbs/day
VOC	75 lbs/day	55 lbs/day
PM10	150 lbs/day	150 lbs/day
PM2.5	55 lbs/day	55 lbs/day
SOx	150 lbs/day	150 lbs/day
CO	550 lbs/day	550 lbs/day
Lead	3 lbs/day	3 lbs/day
TACs, Odor, and GHG Thresholds		
TACs (including carcinogens and non-carcinogens)	Maximum Incremental Cancer Risk ≥ 10 in 1 million Cancer Burden > 0.5 excess cancer cases (in areas ≥ 1 in 1 million) Chronic & Acute Hazard Index ≥ 1.0 (project increment)	
Odor	Project creates an odor nuisance pursuant to SCAQMD Rule 402	
GHG	10,000 MT/yr CO <sub>2</sub> e for industrial facilities	
Ambient Air Quality Standards for Criteria Pollutants <sup>b, c</sup>		
NO <sub>2</sub>  1-hour average annual arithmetic mean	SCAQMD is in attainment; project is significant if it causes or contributes to an exceedance of the following attainment standards:  0.18 ppm (State) 0.03 ppm (State) and 0.0534 ppm (federal)	
PM10  24-hour average annual average	10.4 µg/m <sup>3</sup> (construction) <sup>c</sup> & 2.5 µg/m <sup>3</sup> (operation) 1.0 µg/m <sup>3</sup>	
PM2.5 24-hour average	10.4 µg/m <sup>3</sup> (construction) <sup>c</sup> & 2.5 µg/m <sup>3</sup> (operation)	
SO <sub>2</sub> 1-hour average 24-hour average	0.25 ppm (State) & 0.075 ppm (federal – 99 <sup>th</sup> percentile) 0.04 ppm (State)	
Sulfate 24-hour average	25 µg/m <sup>3</sup> (State)	
CO  1-hour average 8-hour average	SCAQMD is in attainment; project is significant if it causes or contributes to an exceedance of the following attainment standards:  20.0 ppm (State) and 35 ppm (federal) 9.0 ppm (State/federal)	
Lead 30-day average Rolling 3-month average	1.5 µg/m <sup>3</sup> (State) 0.15 µg/m <sup>3</sup> (federal)	
NOx: nitrogen oxides; lbs/day: pounds per day; VOC: volatile organic compound; PM10: respirable particulate matter with a diameter of 10 microns or less; PM2.5: fine particulate matter with a diameter of 2.5 microns or less; SOx: sulfur oxides; CO: carbon monoxide; TACs: toxic air contaminants; ; SCAQMD: South Coast Air Quality Management District; GHG: greenhouse gases; MT/yr CO <sub>2</sub> e: metric tons per year of carbon dioxide equivalents; NO <sub>2</sub> : nitrogen dioxide; ppm: parts per million; µg/m <sup>3</sup> : micrograms per cubic meter

<sup>c</sup> Ambient air quality threshold is based on SCAQMD Rule 403		
Source: Psomas 2021b.		

The following questions correspond to the questions in the Air Quality section of the Initial Study Checklist in Appendix G of the State CEQA Guidelines.

**Question A: *Would the Project conflict with or obstruct implementation of the applicable air quality plan?***

**Less Than Significant Impact.** The SCAQMD develops rules and regulations; establishes permitting requirements for stationary sources; inspects emissions sources; and enforces such measures through educational programs or fines, when necessary. The SCAQMD is directly responsible for reducing emissions from stationary (area and point), mobile, and indirect sources. It has responded to this requirement by preparing a sequence of AQMPs.

On March 3, 2017, the SCAQMD adopted the 2016 AQMP, which is a regional and multi-agency effort (i.e., SCAQMD, CARB, SCAG, and the USEPA). The 2016 AQMP incorporates the latest scientific and technical information and planning assumptions, including the 2016–2040 RTP/SCS; updated emission inventory methodologies for various source categories; and SCAG's latest growth forecasts. The main purpose of an AQMP is to bring an area into compliance with the requirements of federal and State air quality standards.

The two principal criteria for conformance to an AQMP are the following:

1. Whether the project would result in an increase in the frequency or severity of existing air quality violations; cause or contribute to new violations; or delay timely attainment of air quality standards and
2. Whether the project would exceed the assumptions in the AQMP.

With respect to the first criterion, the analysis and response to Question B below demonstrates that the Project would not (1) generate short-term or long-term emissions of volatile organic compounds (VOCs), oxides of nitrogen [NO<sub>x</sub>, which are O<sub>3</sub> precursors], or PM<sub>2.5</sub> that could potentially cause an increase in the frequency or severity of existing air quality violations; (2) cause or contribute to new violations; or (3) delay timely attainment of air quality standards.

With respect to the second criterion, the Project would not increase or modify SCAG's population, housing, or employment projections. The Project would accommodate the projected growth in population accounted for in the 2016 AQMP emissions forecast and would provide additional water conveyance capacity and water treatment to serve the potable water demands of local communities. Therefore, the Project would be consistent with the region's AQMP. There would be a less than significant impact.

**Question B: *Would the Project result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is in non-attainment under an applicable federal or State ambient air quality standard?***

**Less than Significant Impact.** A project may have a significant impact where project-related emissions would exceed federal, State, or regional standards or thresholds, or where project-related emissions would substantially contribute to an existing or projected air quality violation. As identified in Table 2, Orange County is a nonattainment area for O<sub>3</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>. The Project would generate PM<sub>10</sub>, PM<sub>2.5</sub>, NO<sub>2</sub>, and O<sub>3</sub> precursors (NO<sub>x</sub> and VOC) during short-term construction and long-term operations. The SCAQMD has developed construction and operations thresholds to determine whether projects would considerably contribute toward a violation of ambient air quality standards. A project with daily emission rates below the SCAQMD's established air quality significance thresholds (shown in Table 4) would have a less than significant effect on regional air quality. Project emissions were estimated using the California

Emissions Estimator Model (CalEEMod) version 2016.3.2 computer program (Psomas 2021a). CalEEMod is designed to model construction and operational emissions for land development projects and allows for the input of project- and county-specific information. CalEEMod modeling results can be found in Attachment A.

### **Construction Emissions**

Air pollutant emissions would occur from construction equipment exhaust, grading; exhaust and particulate emissions from trucks hauling building materials to and from the Project site; from automobiles and light trucks driven to and from the Project site by construction workers; and VOCs from minor painting and asphalt paving operations. The proposed Project would comply with applicable SCAQMD rules and regulations, including Rule 403 for fugitive dust control and Rule 1113 for architectural coatings. Rule 403 measures include regular watering of active grading areas and unpaved roads, limiting vehicle speeds on unpaved surfaces, stabilizing stockpiled earth, and curtailing grading operations during high wind conditions. Watering of active grading areas is included in the CalEEMod emissions analysis and results in reduced PM10 and PM2.5 emissions. It should be noted that some Project requirements and features (such as watering grading areas), although required Project elements, are input into CalEEMod as mitigation measures purely as a function of the format of the program. The emission reductions associated with compliance with this Rule have been included in the emissions calculations.

### **Regional Emissions Thresholds – Maximum Daily Regional Emissions**

The analysis examines the emissions from construction activities at the five Project locations that would contribute to the region's air pollutant burden. The equipment assumptions and timeframe were provided by APU and are included in the CalEEMod modeling results. The highest daily emissions for each site are presented in Table 5. The total emissions from all the daily construction activities for the five Project locations were summed and compared against the SCAQMD's regional emissions thresholds. As shown in Table 5, regional emissions for all criteria pollutants would be less than their daily regional thresholds. Therefore, Project related contributions to regional air quality impacts are less than significant.

**TABLE 5**  
**ESTIMATED MAXIMUM DAILY REGIONAL CONSTRUCTION EMISSIONS**  
**(LBS/DAY)**

Project Sites	VOC	NOx	CO	SOx	PM10	PM2.5
Santa Cruz	3	33	25	<1	3	2

lbs/day: pounds per day; VOC: volatile organic compound(s); NOx: nitrogen oxides; CO: carbon monoxide; SOx: sulfur oxides; PM10: inhalable particulate matter with a diameter of 10 microns or less; PM2.5: fine particulate matter with a diameter of 2.5 microns or less; SCAQMD: South Coast Air Quality Management District. Note: Numbers may not add due to rounding. Source: CalEEMod data in Attachment A.						

### **Construction-Phase Localized Significance Thresholds**

In addition to the mass daily emissions thresholds established by the SCAQMD, short-term local impacts to nearby sensitive receptors from on-site emissions of NO<sub>2</sub>, CO, PM10, and PM2.5 are examined based on SCAQMD's localized significance threshold (LST) methodology. To assess local air quality impacts for development projects without complex dispersion modeling, the SCAQMD developed screening (lookup) tables to assist lead agencies in evaluating impacts.

The LST method is recommended to be limited to projects that are five acres or less. For the purposes of an LST analysis, the SCAQMD considers receptors where it is possible that an individual could remain for 1 hour for NO<sub>2</sub> and CO exposure and 24 hours for PM10 and PM2.5 exposure. The emissions limits in the lookup tables are based on the SCAQMD's Ambient Air Quality Standards (Psomas 2021a). The emissions screening thresholds used in this analysis are for receptors within 25 meters (82 feet)<sup>2</sup> of the Project site; the thresholds for receptors farther away would be higher, and the Project emissions would be a smaller fraction of the thresholds.

Table 6, Construction-Phase Localized Significance Threshold Emissions shows the maximum daily on-site emissions for construction activities compared with the SCAQMD LST screening thresholds. The localized emissions at each Project site are assessed at each individual Project site to determine potential local air quality impacts for receptors near each respective Project site. The thresholds shown are from the lookup tables for a site disturbance area that is 1 acre, which is based upon the most intensive phase of construction that involves soil disturbance. The Project's maximum daily on-site emissions would occur during the excavation and site preparation phase for all pollutants. As shown in Table 6, localized emissions for all criteria pollutants would be less than their respective screening thresholds. Therefore, localized air quality impacts are less than significant.

<sup>2</sup> The SCAQMD recommends that, when sensitive receptors are located nearer than 25 meters (82 feet) from the Project site, the minimum 25-meter/82-foot distance threshold should be used.

**TABLE 6**  
**CONSTRUCTION-PHASE**  
**LOCALIZED SIGNIFICANCE THRESHOLD EMISSIONS**

Emissions and Thresholds	Emissions (lbs/day)			
	NOx	CO	PM10	PM2.5
Santa Cruz Site	32	25	3	2

Note: Data is for SCAQMD Source Receptor Area 17, Central Orange County Source: SCAQMD 2009 (thresholds); see Attachment A for CalEEMod model outputs.				

### **Operational Emissions**

Upon Project completion, there would be minimal operational trips for monitoring and maintenance of the well sites. At all Project locations, there would typically be one worker visit required per day to exchange resin associated with the treatment process; however, the number of trips would not increase beyond existing conditions at all sites, except for at the Santa Cruz Site. The added infrastructure at the Santa Cruz Site would also typically require one worker visit per day. A vacuum truck would be required at the five sites as part of the water treatment operation. The frequency will vary based on the water quality and total flow from each site, but is estimated to be approximately once per year. Equipment associated with the five Project sites is assumed to include four pumps (two at 50 horsepower and two at 400 horsepower). These pumps would operate on electricity. There would be no need for natural gas for heating. Emissions for the generation of electrical power are not a local emission source and are therefore not reported by CalEEMod in the daily inventory. However, these emissions are included in the annual calculation of greenhouse gas emissions. Because there would be one staff visit at each site, and no other direct emissions associated with the Project locations on a daily basis, Project emissions would be unsubstantial. Additionally, the Santa Cruz Site would include a new diesel emergency backup generator. APU would be required to obtain an Emergency Backup Generator Permit to Construct and Permit to Operate for the emergency backup generator from the SCAQMD prior to installation, per SCAQMD Rule 1470, Requirements for Stationary Diesel-Fueled Internal Combustion and Other Compression Ignition Engines. As shown in Table 7, Project-related emissions would be substantially below the SCAQMD's significance thresholds. Therefore, operational emissions would be less than significant.

**TABLE 7**  
**PEAK DAILY OPERATIONAL EMISSIONS**

Source	Emissions (lbs/day)					
	VOC	NOx	CO	SOx	PM10	PM2.5
Area sources	<1	<1	<1	<1	<1	<1
Energy sources	<1	<1	<1	<1	<1	<1
Mobile sources	<1	<1	<1	<1	<1	<1
Stationary sources	1	6	3	<1	<1	<1
<b>Total Operational Emissions*</b>	<b>1</b>	<b>6</b>	<b>3</b>	<b>&lt;1</b>	<b>&lt;1</b>	<b>&lt;1</b>
<b>SCAQMD Significance Thresholds (Table 4)</b>	<b>55</b>	<b>55</b>	<b>550</b>	<b>150</b>	<b>150</b>	<b>55</b>
<b>Significant Impact?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

lbs/day: pounds per day; VOC: volatile organic compounds; NOx: nitrogen oxides; CO: carbon monoxide; SOx: sulfur oxides; PM10: respirable particulate matter 10 microns or less in diameter; PM2.5: fine particulate matter 2.5 microns or less in diameter; SCAQMD: South Coast Air Quality Management District.

Note: CalEEMod model data sheets are included in Attachment A.

### **Cumulative Impacts**

The SCAQMD, in their White Paper on Regulatory Options for Addressing Cumulative Impacts from Air Pollution Emissions (presented to the Board on September 5, 2003), identifies that impacts that are less than significant on a Project level are also considered to be less than significant on a cumulative basis. The AQMD uses the same significance thresholds for project-specific and cumulative impacts analyzed in an Environmental Assessment or Environmental Impact Report, except for the Hazard Index for toxic air contaminant emissions (Psomas 2021a). Any projects that are found to result in less than significant impacts on a project level are not considered to be cumulatively considerable and consequently would not result in a considerable contribution to cumulative impacts. Using this rationale, since the Project impacts were identified as less than significant, as demonstrated in Tables 5 through 7, the cumulative impacts are also less than significant, and no mitigation is required.

### ***Question C: Would the Project result in exposure of sensitive receptors to substantial pollutant concentrations?***

**Less than Significant Impact.** Exposure of sensitive receptors is addressed for the following situations: CO hotspots; criteria pollutants from on-site construction; and Toxic Air Contaminants (TACs) from on-site construction.

### **Carbon Monoxide Hotspot**

A CO hotspot is an area of elevated CO concentrations that is caused by severe vehicle congestion on major roadways, typically near intersections. If a project substantially increases average delay at signalized intersections that are operating at Level of Service (LOS) E or F or causes an intersection that would operate at LOS D or better without the Project to operate at LOS E or F with the Project, there is a potential for a CO hotspot.

The proposed Project would generate vehicle traffic from daily worker trips associated with the monitoring and maintenance of Project facilities. This would amount to one worker trip per day to each of the five Project sites; however, the number of trips would not increase beyond existing conditions, except for an additional daily worker trip at the Santa Cruz Site. This volume of Project-related vehicle trips would not have the potential to substantially change the average LOS

at nearby intersections and consequently would not contribute to the potential for the formation of a CO hotspot.

### **Criteria Pollutants from On-Site Construction**

Exposure of persons to NO<sub>x</sub>, CO, PM<sub>10</sub>, and PM<sub>2.5</sub> emissions is discussed in the LST analysis in response to Question AQ-1 above, in Table 6. There would be a less than significant impact, and no mitigation is required.

### **Toxic Air Contaminant Emissions from On-Site Construction**

Construction activities would result in short-term, Project-generated emissions of diesel particulate matter (DPM) from the exhaust of off-road, heavy-duty diesel equipment used for site preparation (e.g., excavation and grading); paving; building construction; and other miscellaneous activities. CARB identified DPM as a TAC in 1998. The dose to which receptors are exposed is the primary factor used to determine health risk. Dose is a function of the concentration of a substance or substances in the environment and the duration of exposure to the substance. Thus, the risks estimated for a maximally exposed individual are higher if a fixed exposure occurs over a longer time period. According to the Office of Environmental Health Hazard Assessment, health risk assessments—which determine the exposure of sensitive receptors to TAC emissions—should be based on a 40-year exposure period; however, such assessments should be limited to the period/duration of activities associated with the Project.

There would be relatively few pieces of off-road, heavy-duty diesel equipment in operation, and the total construction period would be relatively short when compared to a 40-year exposure period. Combined with the highly dispersive properties of DPM and additional reductions in particulate emissions from newer construction equipment, as required by USEPA and CARB regulations, construction emissions of TACs would not expose sensitive receptors to substantial emissions of TACs. The impact would be less than significant, and no mitigation is required.

### ***Question D: Would the Project result in other emissions (such as those leading to odors) affecting a substantial number of people?***

**Less than Significant Impact.** According to the SCAQMD's *CEQA Air Quality Handbook*, land uses associated with odor complaints typically include agricultural uses, wastewater treatment plants, food processing plants, chemical plants, composting, refineries, landfills, dairies, and fiberglass molding (Psomas 2021a). The Project does not propose any of these land uses and would not otherwise produce objectionable long-term operational odors. The Project consists of groundwater treatment plants and groundwater supply wells and would not result in any onsite airborne emissions.

Short-term construction equipment and activities would generate odors, such as diesel exhaust emissions from construction equipment and paving activities. There may be situations where construction activity odors would have an olfactory presence, but these odors would not be unfamiliar or necessarily objectionable. The odors would be temporary and would dissipate rapidly from the source with an increase in distance. The Project use is also regulated from nuisance odors or other objectionable emissions by SCAQMD Rule 402. Rule 402 prohibits discharge from any source of air contaminants or other material, which would cause injury, detriment, nuisance, or annoyance to people or the public. The operation of the Project involves the water treatment processes that do not emit substantial levels of odors. Therefore, the impacts would be short-term during construction; would not be objectionable to a substantial number of people; and would be less than significant, and no mitigation is required. All Project-related odors are construction related and short term in nature; no long-term operational odors would result. As such, the

proposed Project would have less than significant impact in regard to other emissions, and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

## **IV. BIOLOGICAL RESOURCES**

The information in this section is derived from Appendix B, *Biological Resources Constraints at the Groundwater Treatment Plants Phase B and Groundwater Supply Wells Project, City of Anaheim, Orange County, California* prepared for the proposed Project by Psomas (Psomas 2021b).

**Question A: *Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?***

**Less Than Significant Impact with Mitigation.** No native vegetation types occur on any of the Projects sites. Planted, ornamental plant species are present on all the sites; however, the Katella Avenue and Santa Cruz Sites do not contain enough vegetation to support any wildlife species. The Downtown Site contains planted trees in the landscaped planters, including young, planted coast live oak (*Quercus agrifolia*), a native plant species. Despite being a native plant species, the coast live oak trees onsite are not associated with an onsite or adjacent native vegetation type nor are they considered to have any special status. All the trees present on this site are small but are likely of sufficient size to support urban-tolerant nesting bird species. The Brookhurst Site is predominantly bare ground beneath the overhead powerlines. Scattered stands of non-native grasses, such as brome grasses (*Bromus* spp.), occur throughout the portions of the site that are not covered in imported gravel or existing structures. A sparse windrow of mature Mexican fan palm trees (*Washingtonia robusta*) occur along the southern boundary of the site. These trees have potential to support nesting activities by urban-tolerant bird species. The Willow Park Site has a notably higher density of tree canopy cover and the majority of trees present are large and mature. These trees have potential to support nesting activities by urban tolerant bird and raptor species. Due to the lack of native vegetation and connectivity to natural open space areas and the lack of suitable habitat on the Project sites, no special status vegetation types; federally and/or State-listed Threatened, Endangered, Rare, or candidate species; or non-listed special status plant or wildlife species are expected to occur on the Project sites. Therefore, there would be no impact on these species and no mitigation would be required.

The Project sites contain ornamental shrubs and trees that have the potential for nesting birds and a limited potential for nesting raptors. The Migratory Bird Treaty Act protects nesting birds. In addition, the potential loss of an active raptor nest, including common raptor species, would be considered a violation of the *California Fish and Game Code* §3503, 3503.5, and 3513. Impacts on an active bird/raptor nests would be considered potentially significant. This potential impact would be reduced to a level considered less than significant with implementation of MM 4-1 which requires a survey for active bird/raptor nests.

**Question B: *Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?***

**Question C:** *Would the project have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?*

**No Impact.** As previously stated, planted, ornamental plant species are present on all the sites. No riparian habitat or sensitive communities identified in local or regional plans or policies by the California Department of Fish and Wildlife or by the U.S. Fish and Wildlife Service are located on the Project sites. Additionally, the Project sites do not support any federally protected wetlands as defined by Section 404 of the Clean Water Act; therefore, the proposed Project would not impact any marsh, vernal pool, or coastal habitats. No impact would occur, and no mitigation would be required.

**Question D:** *Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?*

**No Impact.** The Project sites are located within fully developed, urban areas and do not provide a linkage to undeveloped areas. Only urban-tolerant wildlife would be expected to use the sites for wildlife movement and development of these areas are not likely to affect wildlife movement. Therefore, the Project site does not function as a wildlife movement corridor or a wildlife nursery site. No impact would occur, and no mitigation would be required.

**Question E:** *Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?*

**Less Than Significant Impact.** Ornamental trees may be removed as part of the proposed Project and none of these trees are special status. The proposed Project would comply with Section 13.12.060 of the AMC related to replacement of removed street trees which states that “any street tree removed shall be replaced if a replacement is deemed possible. The replacement species shall be selected in accordance with the Official Tree Species List and Tree Master Plan”. The Project sites are not located within a scenic corridor overlay area and would not be subject to any additional applicable policies or ordinances related to the protection of biological resources on the Project sites. Therefore, a less than significant impact would occur, and no mitigation is required.

**Question F:** *Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan?*

**No Impact.** According to the *City of Anaheim General Plan*, the Project sites are not located within a designated or proposed Natural Community Conservation Plan area. Additionally, development of the proposed Project would not conflict with the provisions of any local, regional, or State habitat conservation plan. No impact would occur, and no mitigation is required.

### **Mitigation Program**

The following mitigation measure is required for the Willow Park, Downtown, Katella Avenue, Brookhurst, and Santa Cruz Sites to reduce impacts to less than significant levels and will be incorporated into the Mitigation Program for this IS/MND.

**MM 4-1** To avoid impacts to nesting birds and raptors, all vegetation removal should be scheduled between September 1 and February 14, which is outside the peak nesting season. If vegetation removal must occur during the peak nesting season (i.e., February 15–August 31), a pre-construction nesting bird survey should be conducted by a qualified Biologist within 7 days prior to vegetation removal activities.

If the Biologist finds an active nest within or adjacent to the construction area, the Biologist will identify an appropriate protective buffer zone around the nest depending on the sensitivity of the species, the nature of the construction activity, and the amount of existing disturbance in the vicinity. In general, the Biologist should designate a buffer between 10 to 300 feet for common nesting birds and between 200 to 500 feet for nesting raptors. No construction activities will be allowed within the buffer until the nest is deemed to be no longer active by the Biologist to ensure compliance with *California Fish and Game Code*.

## **V. CULTURAL RESOURCES**

Information in this section is based on the 2021 results from records searches and literature reviews of information available from the California Historical Resources Information Center (CHRIS) South-Central Coastal Information Center (SCCIC) and the Native American Heritage Commission (NAHC). All documentation is compiled as Appendix C to this IS/MND. Additionally, due to the disturbed nature of the Project sites, field surveys were not warranted.

### **EXISTING CONDITIONS**

#### **South-Central Coastal Information Center Cultural Resources Records and Literature Review**

A cultural resources records search was conducted by the SCCIC on May 27, 2021, at California State University, Fullerton. The SCCIC is a designated branch of the CHRIS and houses records regarding archaeological and historic resources recorded in San Bernardino, Los Angeles, Orange, and Ventura Counties. The 2021 review consisted of an examination of the U.S. Geological Survey's 7.5-minute Anaheim Quadrangle to determine if any sites are recorded or if any cultural resources studies have been conducted on or within a ½-mile radius of the Project sites. Data sources consulted at the SCCIC include archaeological records, Archaeological Determinations of Eligibility, historic maps, and the Historic Property Data File (HPDF) maintained by the Office of Historic Preservation. The HPDF contains listings for the California Register of Historical Resources (CRHR) and/or the National Register of Historic Places (NRHP), California Historical Landmarks, and California Points of Historical Interest.

The records search and literature review conducted for the proposed Project revealed that 54 cultural resource studies have been conducted within ½-mile of the Project sites; four of which are within combined project areas. The first study (OR-00814) included an Archaeological Survey Report for I-5 and I-405 in Orange County to I-605 in Los Angeles County. The second study (OR-01898) included a Finding of Effect for the Widening of I-5 and Reconstruction of Interchanges Between SR-22/57 and 91 in the Cities of Santa Ana, Orange, Anaheim, Fullerton, and Buena Park. The third study (OR-04156) was a Phase I Archaeological Resources Survey Report for the Anaheim Regional Transportation Intermodal Center Project. The last study (OR-04211) included a Historic Resources Assessment Report for the Brookhurst Street Widening Project.

One cultural resource was identified within the ½-mile search radius of the Proposed Project; no archaeological resources were located within combined Project areas. The resource

(P-30-001768) was identified as a historic-era archaeological site consisting of structural remains (e.g. building foundation), historic trash (e.g. glass, bottle fragments, ceramics), and a well and/or cistern. It should be noted that the location of this resource is confidential. No prehistoric archaeological sites were identified by the SCCIC records and literature review.

### **Native American Heritage Commission Sacred Lands File Search**

Psomas submitted a request to the NAHC on April 21, 2021, to review the Sacred Lands File database regarding the possibility of Native American cultural resources and/or sacred places in the Project vicinity that are not documented on other databases. The results from the NAHC were received on May 5, 2021. The Sacred Lands File (SLF) search did not identify any known resources or sacred lands within the Project sites (SCCIC 2021). However, the NAHC recommends that the lead agency contact tribes that are traditionally and culturally affiliated with the geographic area to comply with both Section 106 of the NRHP of 1966 and Assembly Bill (AB) 52. Therefore, the City contacted the tribes listed on the NAHC contact list in addition to the tribes listed on the City's AB 52 consultation list on May 24, 2021. The consultation results are discussed in Section XVIII, Tribal Cultural Resources.

## **IMPACT ANALYSIS**

### ***Question A: Would the project cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?***

**No Impact.** A significant impact and/or adverse effect could occur if the Project were to disturb historic resources that presently exist within the Project sites. Section 15064.5 of the CEQA Guidelines generally defines a historic resource as a resource that is (1) listed in or determined to be eligible for listing in the California Register of Historical Resources (California Register); (2) included in a local register of historical resources (pursuant to Section 5020.1(k) of the Public Resources Code); or (3) identified as significant in an historical resources survey (meeting the criteria in Section 5024.1(g) of the Public Resources Code). Additionally, any object, building, structure, site, area, place, record, or manuscript that a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to be an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record. Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register. The California Register automatically includes all properties listed in the NRHP and those formally determined to be eligible for listing in the National Register.

The SCCIC record search and literature review identified one cultural resource within the ½-mile search radius of the proposed Project. The resource (P-30-001768) was identified as a historic site. No other historic resources were identified within ½ mile of the Project site, and no on-site structures meet the 50-year construction age criterion for evaluation. Therefore, no impact would occur, and no mitigation is required.

### ***Question B: Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?***

**Less than Significant Impact with Mitigation.** A significant impact and/or adverse effect could occur if grading or excavation activities associated with the Project were to disturb archaeological resources that presently exist within the Project site. There are no known archaeological sites on the Project sites. The SCCIC record search and literature review identified one cultural resource within the ½-mile search radius of the Proposed Project. The resource (P-30-001768) was

identified as a historic archaeological site. Therefore, the Project will not have a significant impact or adverse effect on an archaeological resource eligible or potentially eligible for either the CRHR or the NRHP. However, there is the possibility that undiscovered intact archaeological resources may be present below the surface in native (alluvial) sediments. These potential effects would be mitigated to a less than significant level with the implementation of MM 5-1, which requires archaeological monitoring when excavating in native sediment.

**Question C: *Would the project disturb any human remains, including those interred outside of formal cemeteries?***

**Less than Significant Impact with Mitigation.** A Project-related significant adverse effect could occur if grading or excavation activities associated with the Project were to disturb previously interred human remains. The Project sites are located within a developed area that has been subject to earth-moving activities in the past, and no known burial sites are located on or adjacent to the Project sites. In the unlikely event of an unanticipated encounter with human remains in Project sites, the *California Health and Safety Code* and the *California Public Resources Code* require that any activity in the area of a potential find be halted and the Orange County Coroner be notified, as described in RR 5-1. Implementation of MM 5-1 would reduce this impact to a less than significant level.

### **Mitigation Program**

#### ***Regulatory Requirement***

The following regulatory requirement is required to be implemented by existing federal, State, or local laws and regulations and will be incorporated into the Mitigation Program for this IS/MND.

**RR 5-1** If human remains are found during ground-disturbing activities, no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur, in accordance with Section 7050.5 of the *California Health and Safety Code*. The County Coroner shall be notified of the discovery immediately. If the County Coroner determines that the remains are or believed to be Native American, s/he shall notify the NAHC in Sacramento within 24 hours of the discovery. In accordance with Section 5097.98 of the *California Public Resources Code*, the NAHC must immediately notify those persons it believes to be the most likely descended from the deceased Native American. The descendants shall complete their inspection within 48 hours of being granted access to the site by the City. The City would meet and confer with the most likely descendant regarding their recommendations prior to disturbing the site by further construction activity.

#### ***Mitigation Measure***

The following mitigation measure is required for the Willow Park, Downtown, Katella Avenue, Brookhurst, and Santa Cruz Sites to reduce impacts to less than significant levels and will be incorporated into the Mitigation Program for this IS/MND.

**MM 5-1** Prior to the issuance of the grading permit, the Contractor shall provide written evidence to the City, the Contractor has retained an Orange County-certified archaeologist. The archaeologist shall be present at the pre-grade conference, shall establish procedures for archaeological resource surveillance, and shall establish, in cooperation with the Contractor, procedures for temporarily halting or redirecting work to permit the sampling, identification, and evaluation of the

artifacts as appropriate. If archaeological resources are inadvertently unearthed during excavation activities, the contractor shall immediately cease all earth-disturbing activities within a 100-foot radius of the area of discovery and the archaeologist and City shall be notified immediately. If the archaeological resources are found to be significant, the archeologist, in consultation with the City, shall determine appropriate actions for exploration and salvage. After the find has been appropriately avoided or mitigated, work in the area may resume.

## **VI. ENERGY**

***Question A: Would the project result in potentially significant environmental impacts due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?***

### **Less than Significant Impact.**

#### ***Construction Energy Use***

Project construction would require the use of construction equipment for site preparation, drilling, hauling, and improvement activities for the proposed water treatment and water conveyance infrastructure. Construction would also include the vehicles of construction workers to and from the Project site and on-road haul trucks for the export of materials from site clearing and the export of sediment from excavation.

Off-road construction equipment use was calculated from the equipment data (vehicle types, hours per day, horsepower, load factor) provided in the CalEEMod construction output files included in Appendix D of this IS/MND. The total horsepower hours for construction equipment used for the Project was then multiplied by fuel usage rates to obtain the total fuel usage for off-road equipment.

Fuel consumption from construction worker, vendor, and delivery/haul trucks was calculated using the trip rates and distances provided in the CalEEMod construction output files. Total vehicle miles traveled (VMT) was then calculated for each type of construction-related trip and divided by the fuel consumption factor from CARB's Emission FACTors (EMFAC) 2017 model. EMFAC provides the total annual VMT and fuel consumed for each vehicle type. Construction vendor and delivery/haul trucks were assumed to be heavy-duty diesel trucks. As shown in Table 8, the development of the five Project sites would consume varying quantities of gasoline and diesel fuel during construction based on the requirements for each site.

**TABLE 8  
ENERGY USE DURING CONSTRUCTION**

Source	Gasoline Fuel (gallons)	Diesel Fuel - (gallons)
<b>Brookhurst Site</b>		
Off-road Construction Equipment	305	3,948
Worker commute	599	3
On-road haul	134	2
<b>Total</b>	<b>1,038</b>	<b>3,953</b>
<b>Katella Avenue Site</b>		
Off-road Construction Equipment	0	3,460
Worker commute	390	2
On-road haul	115	2
<b>Total</b>	<b>505</b>	<b>3,464</b>
<b>Downtown Site</b>		
Off-road Construction Equipment	342	4,181
Worker commute	679	3
On-road haul	14	0
<b>Total</b>	<b>1,035</b>	<b>4,184</b>
<b>Willow Park Site</b>		
Off-road Construction Equipment	266	3,072
Worker commute	189	1
On-road haul	101	2
<b>Total</b>	<b>556</b>	<b>3,075</b>
<b>Santa Cruz Site</b>		
Off-road Construction Equipment	305	14,161
Worker commute	15,470	62
On-road haul	661	9
<b>Total</b>	<b>16,436</b>	<b>14,232</b>
<b>Grand Total</b>	<b>19,570</b>	<b>28,908</b>
Sources: Psomas 2021b based on data from CalEEMod (Appendix B), Offroad and EMFAC 2017 (Appendix D).		

Fuel energy consumed during construction would be temporary in nature and would not represent a significant demand on energy resources. Furthermore, there are no unusual characteristics that would necessitate the use of construction equipment that would be less energy-efficient than comparable equipment at construction sites in other parts of the State. Energy used in the construction of the Project sites would enable the treatment and delivery of local water resources that would reduce the need to use more energy intensive imported water. Therefore, the proposed construction activities would not result in inefficient, wasteful, or unnecessary fuel consumption.

### **Operational Energy Use**

Sources of new energy demands resulting from Project implementation include pumps, treatment processes, and a standby generator. It is anticipated that a total consumption of 5.9 million kilowatt-hours per year would be necessary to operate the pumps used for water treatment and conveyance infrastructure. This is not a substantial amount of energy and is necessary to ensure groundwater is treated to reduce PFOS concentrations to below the applicable response levels. No demand for natural gas would be created by the Project. There would also be limited use of a standby generator during monthly testing as well as during unplanned power outages.

After construction, each site would generally be visited daily for routine operation and maintenance activities and trips to the site would be largely unchanged from the existing operations; therefore, no new or additional vehicle trips are anticipated beyond existing conditions. For these reasons, construction and operational energy use would not be considered wasteful or inefficient because it would ensure that safe drinking water supplies are provided for City residents. There would be a less than significant impact related to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation and no mitigation is required.

**Question B: *Would the project conflict with or obstruct a state or local plan for renewable energy or energy efficiency?***

**No Impact.**

The City of Anaheim' Greenhouse Gas Reduction Plan Sustainable Electric & Water Initiatives (APU 2020) provides policies that promote the conservation of natural and energy resources to assure their continued viability and availability. This Plan establishes goals of energy efficiency, water efficiency, and the reduction in greenhouse gas (GHG) emissions. As part of the Renewable Portfolio Standards, the power generators of the State of California would increase the amount of renewable energy production to 60 percent in 2030 and 100 percent by 2045. The increased use of renewable energy corresponds to a rapid reduction in GHG emissions over time.

Though the Project would result in an increase in electrical use for the treatment of water to remove PFOS, this would be offset because the treatment of locally sourced water would minimize the need for imported water from more energy intensive water sources such as from the Colorado River Aqueduct and State Water Project. Imported water would require more energy related to pumping water across longer distances as well as evaporative losses of water during transport. As such, reducing the need for imported water by pumping and treating groundwater locally would reduce the energy and water loss necessary for supplying potable water to the City. In addition, future emissions associated with electricity use from the Project would decrease with the GHG reduction requirements established for utilities under the Renewable Portfolio Standards until the year 2045, when electricity-related emissions would be carbon neutral. This would be consistent with increasing conservation, efficiency, and sustainability consistent with the goals of the Greenhouse Gas Reduction Plan Sustainable Electric & Water Initiatives. As such, there would be no impact related to obstruction of State or City plans for energy and water efficiency and no mitigation is required.

**Mitigation Program**

No mitigation is required.

## VII. GEOLOGY AND SOILS

**Question A:** *Would the project expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:*

(i) *Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.*

(ii) *Strong seismic ground shaking?*

**Less Than Significant Impact.** According to the City's General Plan Safety Element, Anaheim is located in an area considered to be seismically active, similar to most Southern California cities. Active and potentially active faults are located adjacent to Anaheim; however, there are no Alquist-Priolo Earthquake Fault Zones within the City limits. Anaheim is in close proximity to two major faults: the Newport-Inglewood Fault Zone and the Whittier-Elsinore Fault Zone. The Newport-Inglewood fault zone passes within approximately seven miles of the western limits of the City. The Whittier-Elsinore fault zone is the closest major fault system to the City and one of the largest in Southern California. The Whittier-Elsinore fault zone does not extend inside the City boundaries, but approaches within less than one mile of the northeastern corner of the City (Anaheim 2004a).

The potential for ground rupture due to fault movement is commonly related to the seismic activity of known fault zones. Recognized active fault zones are located outside of the City of Anaheim. Potentially active faults in close proximity to the City are the El Modeno, Peralta Hills, and Norwalk faults, which have a low possibility of ground rupture within the City. The majority of the El Modeno and Peralta Hills faults are located south of the Peralta Hills area and outside the boundaries of the City of Anaheim. The El Modeno fault zone is a concealed fault and the exact location of the fault is, therefore, uncertain. The California Department of Mines and Geology has determined that the El Modeno, Peralta Hills, and Norwalk faults are not "sufficiently active" or "well defined" enough to be subject to the provisions of the Alquist-Priolo Earthquake Fault Zoning Act. Compared with the more active and recognized fault zones, the potential for ground rupture due to seismic activity in the City is considered low (Anaheim 2004a).

Adherence to standard engineering practices and design criteria as contained in the *California Building Code* relative to seismic and geological hazards would ensure that impacts related to seismic ground shaking would be less than significant. Therefore, impacts would be less than significant, and no mitigation is required.

(iii) *Seismic-related ground failure, including liquefaction?*

**Less Than Significant Impact.** Liquefaction takes place when granular materials that are saturated by water lose strength and transform from a solid to a liquid state. Liquefaction generally occurs during significant earthquake activity, and structures located on soils such as silt or sand may experience significant damage during an earthquake due to the instability of structural foundations and the moving earth. Liquefaction has the potential to impact properties within the City that are located along the Santa Ana River as well as western portions of the City (Figure S-3 of the Safety Element). The Project sites are not located within areas identified as having the potential for liquefaction (Anaheim 2004a). Therefore, impacts related to the potential for liquefaction, lateral spreading, and seismic compaction are considered less than significant, and no mitigation is required.

**(iv) Landslides?**

**No Impact.** None of the sites contains major landforms. All Project areas are relatively flat with the exception of the Katella Avenue Site, which contains an off-site slope down to Katella Avenue. A review of the California Geological Survey Seismic Hazards Zones maps (CGS 1998a, 1998b) indicates that the Project sites are not located in “Earthquake-Induced Landslides” zones, which is defined as an area where previous occurrence of landslide movement or local topographic, geological, geotechnical, and subsurface water conditions indicate a potential for permanent ground displacement such that mitigation as defined in *Public Resources Code* Section 2693(c) would be required. Because topography conducive to landslides is not present, there would be no impact and no mitigation is required.

**Question B: *Would the project result in substantial soil erosion or the loss of topsoil?***

**Less Than Significant Impact.** As discussed in Section IX, Hydrology and Water Quality, the proposed Project would comply with the State’s requirements for the development and implementation of a local SWPPP, which must include erosion- and sediment-control Best Management Practices (BMPs). The erosion-control BMPs are designed to prevent erosion, whereas sediment controls are designed to trap sediment once it has been mobilized. The SWPPP would include BMPs to be selected and implemented based on the phase of construction and weather conditions. Impacts would be less than significant, and no mitigation is required.

**Question C: *Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?***

**Question D: *Would the project be located on expansive soil, as defined in Section 1803.5.3 of the California Building Code (2010), creating substantial risks to life or property?***

**Less Than Significant Impact.** Seismic hazards, including liquefaction, lateral spreading, and landslides are addressed in Question VI.a (iii–iv). Subsidence is the gradual, local settling or sinking of the earth’s surface with little or no horizontal motion. Subsidence is usually the result of gas, oil, or water extraction, hydro compaction, or peat oxidation, and not the result of a landslide or slope failure. Soils in portions of the City along the Santa Ana River may be subject to settling since most of these areas contain unconsolidated and recent alluvium. Subsidence and swelling, and ground settlement are generally due to the withdrawal of fluids from the earth such as oil or water. Groundwater pumping may also lead to land subsidence. The Project sites are not located within areas subject to subsidence (Anaheim 2004a). Impacts would be less than significant, and no mitigation is required.

**Question E: *Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?***

**No Impact.** The proposed Project would not involve the use of septic tanks or an alternative wastewater disposal system. No impacts would occur, and no mitigation is required.

**Question F: Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?**

**Less than Significant Impact with Mitigation.** A paleontological records search was requested from the Natural History Museum of Los Angeles County, Vertebrate Paleontology Department and results were received on April 27, 2021. The results indicate that there are no fossil localities that lie directly within the proposed Project site; however, there are fossil localities nearby from the same sedimentary deposits that occur in the proposed Project site, either at the surface or at depth. Therefore, the Project would not impact known paleontological resources; however, surface sediments at and surrounding the Project sites consist of Alluvium (Pleistocene) to unknown formations (Pleistocene, sands; silty fine-grained & massive sandstone). Deep excavation that involves disturbance of native soils could result in the disturbance and/or destruction of paleontological resources that may be present in deeper Pleistocene alluvial deposits that underlie the Project site. Implementation of MM 6-1 related to paleontological resources would reduce this impact to a less than significant level.

**Mitigation Program**

The following mitigation measure is required for the Willow Park, Downtown, Katella Avenue, Brookhurst, and Santa Cruz Sites to reduce impacts to less than significant levels and will be incorporated into the Mitigation Program for this IS/MND.

**MM 6-1** In the event that paleontological resources are inadvertently unearthed during excavation activities, the contractor shall immediately cease all earth-disturbing activities within a 100-foot radius of the area of discovery and the contractor shall contact the City immediately. The contractor shall retain a qualified professional paleontologist to evaluate the significance of the find, and in consultation with the City, determine an appropriate course of action. If the paleontological resources are found to be significant, the paleontologist, in consultation with the City, shall determine appropriate actions for exploration and salvage. After the find has been appropriately avoided or mitigated, work in the area may resume.

**VIII. GREENHOUSE GAS EMISSIONS**

Climate change refers to any significant change in measures of climate (e.g., average temperature, precipitation, or wind patterns) over a period of time. Climate change may result from natural factors, natural processes, and human activities that change the composition of the atmosphere and alter the surface and features of the land. Significant changes in global climate patterns have recently been associated with global warming, which is an average increase in the temperature of the atmosphere near the Earth's surface; this is attributed to an accumulation of GHG emissions in the atmosphere. GHGs trap heat in the atmosphere which, in turn, increases the Earth's surface temperature. Some GHGs occur naturally and are emitted to the atmosphere through natural processes, while others are created and emitted solely through human activities. The emissions of GHGs through fossil fuel combustion in conjunction with other human activities are associated with global warming.

GHGs, as defined under California's AB 32, include carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF<sub>6</sub>). General discussions on climate change often include water vapor, atmospheric ozone, and aerosols in the GHG category. Water vapor and atmospheric ozone are not gases that are formed directly in the construction or operation of development projects, nor can they be controlled in these projects. Aerosols are not gases. While these elements have a role in climate change, they are not considered by either regulatory bodies, such as CARB, or climate change groups, such

as the California Climate Action Registry, as gases to be reported or analyzed for control. Therefore, no further discussion of water vapor, atmospheric ozone, or aerosols is provided.

### **Regulatory Background**

On June 1, 2005, Governor Arnold Schwarzenegger signed Executive Order (EO) S-3-05, which calls for a reduction in GHG emissions to the year 2000 level by 2010, to year 1990 levels by 2020, and to 80 percent below 1990 levels by 2050.

The principal overall State plan and policy adopted for the purpose of reducing GHG emissions is AB 32 (California Global Warming Solutions Act of 2006). AB 32 establishes regulatory, reporting, and market mechanisms to achieve quantifiable reductions in GHG emissions and establishes a cap on statewide GHG emissions. AB 32 recognizes that California is the source of substantial amounts of GHG emissions. The statute states the following:

Global warming poses a serious threat to the economic well-being, public health, natural resources, and the environment of California. The potential adverse impacts of global warming include the exacerbation of air quality problems, a reduction in the quality and supply of water to the state from the Sierra snowpack, a rise in sea levels resulting in the displacement of thousands of coastal businesses and residences, damage to marine ecosystems and the natural environment, and an increase in the incidences of infectious diseases, asthma, and other human health-related problems.

In order to avert these consequences, AB 32 establishes a State goal of reducing GHG emissions to 1990 levels by the year 2020, codifying the goal of EO S-3-05.

CARB approved a Climate Change Scoping Plan as required by AB 32 in 2008; this plan is required to be updated every five years. The Climate Change Scoping Plan proposes a “comprehensive set of actions designed to reduce overall carbon GHG emissions in California, improve our environment, reduce our dependence on oil, diversify our energy sources, save energy, create new jobs, and enhance public health” (CARB 2008). The Climate Change Scoping Plan has a range of GHG-reduction actions which include direct regulations, alternative compliance mechanisms, monetary and non-monetary incentives, voluntary actions, market-based mechanisms such as a cap-and-trade system, and an AB 32 implementation regulation to fund the program. On February 10, 2014, CARB released the Draft Proposed First Update to the Climate Change Scoping Plan (Psomas 2021a). The board approved the final First Update to the Climate Change Scoping Plan on May 22, 2014. The first update describes California’s progress towards AB 32 goals, stating that “California is on track to meet the near-term 2020 greenhouse gas limit and is well positioned to maintain and continue reductions beyond 2020 as required by AB 32” (Psomas 2021a). The latest update occurred in January 2017 and incorporates the 40 percent reduction to 1990 emissions levels by 2030.

The Sustainable Communities and Climate Protection Act of 2008, Senate Bill (SB) 375, established a process to coordinate land use planning, regional transportation plans, and funding priorities in order to help California meet the GHG reduction goals established in AB 32. SB 375 required SCAG to incorporate an SCS into its RTPs that will achieve GHG emission reduction targets through several measures, including land use decisions. SCAG’s SCS is included in the SCAG 2020–2045 RTP/SCS (Psomas 2021a). The goals and policies of the RTP/SCS that reduce vehicle miles traveled focus on transportation and land use planning that include building infill projects; locating residents closer to where they work and play; and designing communities so there is access to high quality transit service.

On April 29, 2015, Governor Brown signed EO B-30-15, which ordered an interim statewide GHG emission reduction target to reduce GHG emissions to 40 percent below 1990 levels by 2030 to ensure California meets its target of reducing GHG emissions to 80 percent below 1990 levels by 2050. Five key goals for reducing GHG emissions through 2030 include (1) increasing renewable electricity to 50 percent; (2) doubling the energy efficiency savings achieved in existing buildings and making heating fuels cleaner; (3) reducing petroleum use in cars and trucks by up to 50 percent; (4) reducing emissions of short-lived climate pollutants; and (5) managing farms, rangelands, forests, and wetlands to increasingly store carbon. EO B-30-15 also directs CARB to update the Climate Change Scoping Plan to express the 2030 target in terms of million metric tons of carbon dioxide equivalent.

On September 8, 2016, the Governor signed SB 32 to codify the GHG reduction goals of EO B-30-15, requiring the State to reduce GHG emissions by 40 percent below 1990 levels by 2030 (*Health and Safety Code* Section 38566). As stated above, this goal is expected to keep the State on track to meeting the goal set by EO S-3-05 of reducing GHG emissions by 80 percent below 1990 levels by 2050.

AB 197 was signed at the same time to ensure that the SB 32 goals are met by requiring CARB to provide annual reports of GHGs, criteria pollutants, and TACs by facility, City and sub-county level, and sector for stationary sources and at the County level for mobile sources. It also requires the CARB to prioritize specified emission reduction rules and regulations and to identify specified information for emission reduction measures (e.g., alternative compliance mechanism, market-based compliance mechanism, and potential monetary and nonmonetary incentive) when updating the Scoping Plan.

SB 350, signed October 7, 2015, is the Clean Energy and Pollution Reduction Act of 2015. SB 350 is the implementation of some of the goals of EO B-30-15. The objectives of SB 350 are as follows:

1. To increase from 33 percent to 50 percent, the procurement of our electricity from renewable sources; and
2. To double the energy efficiency savings in electricity and natural gas final-end uses of retail customers through energy efficiency and conservation.

The text of SB 350 sets a December 31, 2030, target for 50 percent of electricity to be generated from renewable sources. SB 350 also requires the State to double statewide energy efficiency savings in electricity and natural gas end uses by 2030. Additionally, SB 350 sets requirements for large utilities to develop and submit integrated resources plans (IRPs), which detail how utilities would meet their customers' resource needs, reduce GHG emissions, and integrate clean energy resources (Psomas 2021a).

On September 10, 2018, Governor Brown signed SB 100, the 100 Percent Clean Energy Act of 2018. SB 100 requires renewable energy and zero-carbon resources to supply 100 percent of electric retail sales to end-use customers and 100 percent of electricity procured to serve state agencies by December 31, 2045. This policy requires the transition to zero-carbon electric systems that do not cause contributions to increase of GHG emissions elsewhere in the western electricity grid (Psomas 2021a). SB 100 also creates new standards for the Renewable Portfolio Standard (RPS) goals established by SB 350 in 2015. Specifically, the bill increases required energy from renewable sources for both investor-owned utilities and publicly owned utilities from 50 percent to 60 percent by 2030.

Further, on September 10, 2018, Governor Brown also signed California EO B-55-18, which sets a new statewide goal of carbon neutrality as soon as possible, and no later than 2045 and achieve

net negative emissions thereafter. EO B-55-18 was added to the existing Statewide targets of reducing GHG emissions, including the targets previously established by Governor Brown of reducing emissions to 40 percent below 1990 levels by 2030 (EO B-30-15 and SB 32), and by Governor Schwarzenegger of reducing emissions to 80 percent below 1990 levels by 2040 (EO S-3-05).

APU's Greenhouse Gas Reduction Plan (GHG Reduction Plan), approved in 2015, and updated in 2020, identifies renewable energy and energy conservation targets for APU for the years 2020, 2030, and 2045. The GHG Reduction Plan identifies renewables portfolio targets for increasing APU's power supply generated from renewable sources up to 33 percent by year 2020, 60 percent by year 2030, and 100 percent by 2045. In 2020, 34,000 kilowatt (kW) of photovoltaic systems were installed; in 2030, 50,000 kW of photovoltaic systems will be installed, and 75,000 kW by 2045. The GHG Reduction Plan also establishes transportation-related goals for APU to convert its fleet vehicles to result in emissions reductions of 500 metric tons of carbon dioxide equivalent (MTCO<sub>2e</sub>) in 2020, 1,200 MTCO<sub>2e</sub> in 2030, and 32,000 in 2045 (Psomas 2021a).

### **Thresholds of Significance**

On December 5, 2008, the SCAQMD Governing Board presented the staff proposal for a tiered threshold approach wherein Tier 1 determines if a project qualifies for an applicable CEQA exemption, Tier 2 determines consistency with GHG reduction plans, and Tier 3 proposes a numerical screening value as a threshold. At their September 28, 2010, meeting, the Working Group suggested a Tier 3 threshold of 3,000 MTCO<sub>2e</sub> per year for all land use types (Psomas 2021a). Tier 4 determines if the Project meets performance standards. Tier 4 has three options: Option 1—percent emission reduction target; Option 2—early implementation of applicable measures; and Option 3—sector-based standard. Tier 5 determines mitigation for CEQA offsets.

In the absence of adopted thresholds, the Tier 3 standard is used for this analysis (Psomas 2021a). The development of project-level thresholds in accordance with CEQA is an ongoing effort at the State, regional, and county levels, and significance thresholds may differ for future projects based on new or additional data and information that may be available at that time for consideration. The City of Anaheim has not officially adopted any GHG CEQA significance threshold. The City defers to assessment methods and significance thresholds developed by the SCAQMD. This impact analysis evaluates consistency with regulatory programs designed to reduce GHG emissions and that contribute to the achievement of AB 32's and SB 32's goals as the primary significance criterion. In addition, this impact analysis also evaluates the Project's estimated emissions compared to the Tier 3 threshold (as discussed above) for impacts related to GHG emissions proposed by staff of the SCAQMD, but not adopted by the SCAQMD Board. On December 5, 2008, the SCAQMD Governing Board adopted its staff proposal for an interim CEQA GHG significance threshold of 10,000 metric tons of CO<sub>2</sub> equivalent per year (MTCO<sub>2e</sub>/year) for industrial projects where the SCAQMD is the lead agency. In September 2010, the Working Group proposed extending the 10,000 MTCO<sub>2e</sub>/year screening threshold currently applicable to industrial projects where the SCAQMD is the lead agency, described above, to other lead agency industrial projects. Because a substantial amount of GHG emissions related to industrial uses are from energy consumption and the Project's primary source of GHG emissions is related to electricity use, the significance threshold developed for industrial uses will be used for the evaluation of potential GHG impacts.

## **Greenhouse Gas Emissions Analysis**

**Question A: Would the Project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?**

**Less than Significant Impact.** In developing methods for GHG impact analysis, there have been suggestions from local air pollution control districts of quantitative thresholds, often referred to as screening levels, which define an emissions level below which it may be presumed that climate change impacts would be less than significant. Neither the SCAQMD, the City of Anaheim, nor the County of Orange has adopted a significance threshold for GHG emissions from non-industrial development projects. Consequently, pursuant to the discretion afforded by Sections 15064.4(a) and 15064.4(b) of the State CEQA Guidelines, the impact of the proposed Project's GHG emissions is assessed based on the methodologies proposed by SCAQMD's GHG CEQA Significance Threshold Working Group, as described above.

Based on the proposed construction activities described above, the principal source of construction GHG emissions would be internal combustion engines of construction equipment, on-road construction vehicles, and workers' commuting vehicles. GHG emissions from construction activities were obtained from the CalEEMod model, described above. The estimated construction GHG emissions for the proposed Project would be 1,473 MTCO<sub>2</sub>e, as shown in Table 9, Estimated Greenhouse Gas Emissions from Construction.

**TABLE 9  
ESTIMATED GREENHOUSE GAS EMISSIONS  
FROM CONSTRUCTION**

<b>Year</b>	<b>Emissions (MTCO<sub>2</sub>e)</b>
2021	235
2022	433
2023	652
2024	153
<b>Total</b>	<b>1,473</b>
MTCO <sub>2</sub> e: metric tons of carbon dioxide equivalent Notes: <ul style="list-style-type: none"> <li>Totals may not add due to rounding variances.</li> <li>Detailed calculations in Attachment A.</li> </ul>	

Operational GHG emissions would come primarily from vehicle trips; other sources include electricity and an emergency generator (stationary source). Table 10, Estimated Annual Greenhouse Gas Emissions from Project Operation, shows the annual GHG emissions from proposed Project's operations.

**TABLE 10**  
**ESTIMATED ANNUAL GREENHOUSE GAS**  
**EMISSIONS FROM PROJECT OPERATION**

Source	Emissions (MTCO <sub>2</sub> e/yr)
Area	0
Energy	2,793
Mobile	8
Stationary	3
Waste	0
Water	0
<b>Total Operational Emissions</b>	<b>2,804</b>
MTCO <sub>2</sub> e/yr: metric tons of carbon dioxide equivalent per year	
Notes:	
<ul style="list-style-type: none"> <li>Totals may not add due to rounding variances.</li> <li>Detailed calculations in Attachment A.</li> </ul>	

Because impacts from construction activities occur over a relatively short period of time, they contribute a relatively small portion of the overall lifetime Project GHG emissions. In addition, GHG emission reduction measures for construction equipment are relatively limited. The SCAQMD recommends that construction emissions be amortized over a 30-year Project lifetime so that GHG reduction measures address construction GHG emissions as part of the operational GHG reduction strategies (Psomas 2021a). Therefore, construction and operational emissions are combined by amortizing the construction and operations over an assumed 30-year Project lifetime. This combination is shown in Table 11, Estimated Total Project Annual Greenhouse Gas Emissions, using the proposed Project's amortized construction and operational emissions.

**TABLE 11**  
**ESTIMATED TOTAL PROJECT ANNUAL**  
**GREENHOUSE GAS EMISSIONS**

Source	Emissions (MTCO <sub>2</sub> e/yr <sup>a</sup> )
Construction (Amortized)	49 <sup>a</sup>
Operations (Table 10)	2,805
<b>Total<sup>b</sup></b>	<b>2,854</b>
<b>SCAQMD-Recommended Threshold</b>	<b>10,000</b>
<b>Exceeds Threshold?</b>	<b>No</b>
MTCO <sub>2</sub> e/yr: metric tons of carbon dioxide equivalent per year; SCAQMD: South Coast Air Quality Management District.	
<sup>a</sup> Total derived by dividing construction emissions (see Table 9) by 30.	
<sup>b</sup> Total annual emissions are the sum of amortized construction emissions and operational emissions.	

It is noted that there are no established applicable quantitative federal, State, regional, or local CEQA significance criteria for GHG emissions for non-industrial projects in the SoCAB. The SCAQMD has adopted a threshold of 10,000 MTCO<sub>2</sub>e per year for industrial land use projects. As shown, the estimated GHG emissions from the proposed Project would be less than this suggested threshold. In addition, future emissions associated with electricity use from the Project would decrease with the GHG reduction requirements established for utilities under the

Renewable Portfolio Standards until the year 2045, when electricity-related emissions would be carbon neutral. The impact would be less than significant, and no mitigation is required.

***Question B: Would the Project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?***

**Less than Significant Impact.** The City of Anaheim has not adopted a Climate Action Plan, and the SCAQMD has not adopted standards for the purpose of reducing GHG emissions. There are a number of GHG reduction plans that have been adopted on the State and regional level. SCAG adopted this 2016–2040 RTP/SCS for the six-county region including Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties. The RTP/SCS seeks to improve the mobility, sustainability, and economies of this region. This Plan demonstrates how the region would reduce transportation emissions to comply with SB 375. This is achieved by numerous transportation related programs and projects which seek to improve the operational efficiency of the transportation network, promote mass transit and non-automobile forms of transportation, and fulfill the requirements for the SCS to reduce GHG emissions.

APU has also outlined a plan to transition their RPS to clean energy resources and has increased the procurement of renewable resources since 2003 through its IRP, approved by City Council and the California Energy Commission in 2018. The IRP established goals such as a 50 percent RPS by 2030, which is consistent with the requirements of SB 350, which requires all California electric utilities to increase the use of renewable resources to serve customer load to 50 percent by 2030 (Psomas 2021a). Additionally, as stated above, APU prepared a GHG Reduction Plan in 2020 to update the City's 2015 GHG Reduction Plan and outline new GHG reduction targets (Psomas 2021a). The 2020 GHG Reduction Plan set targets for 2020, 2030, and 2045, which are consistent with the targets of SB 350 and SB 100 for increased RPS standards. The Project would be consistent with the targets for the 2020 GHG Reduction Plan, as the Project's electrical components would be powered through APU. Therefore, the Project would have less than significant impacts regarding conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing GHG emissions, and no mitigation measures are required.

## **IX. HAZARDS AND HAZARDOUS MATERIALS**

***Question A: Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?***

**Less Than Significant Impact.**

### **Construction**

Minor amounts of hazardous materials such as fuels, oils, lubricants, paints, and solvents may be used during construction of the proposed Project. Exposure to these materials could result from the improper handling or use of hazardous substances or an inadvertent release resulting from an unforeseen event (e.g., fire, flood, or earthquake). The small quantities of hazardous materials that would be transported, used, or disposed of would likely be well below reportable quantities. Construction activities would be conducted with standard construction practices and in accordance with all applicable California Division of Occupational Safety and Health (Cal/OSHA) and other safety regulations to minimize the risk to the public. Compliance with federal, State, and local hazardous materials laws and regulations would minimize the risk to the public presented by these potential hazards during construction of the proposed Project.

## **Operation**

Sodium hypochlorite (bleach) is used to disinfect water at each of the sites. Sodium hypochlorite would continue to be used at each of the sites, and tanks and pumping equipment would be expanded at the Brookhurst and Santa Cruz sites to disinfect the increased flow of treated water. New storage tanks would be located in areas with secondary containment, and compatible for storing the sodium hypochlorite. The pumping equipment would be installed in an equipment room, and tanks would be equipped with berms to capture spills. Resin containing PFOS and PFOA would be generated. However, because the PFOS and PFOA would be bound to the resin, any spills of resin material could be cleaned and removed without creating a significant hazard to the public or the environment. Spent resin would be transported by truck to an appropriately permitted facility for regeneration or disposal in accordance with California Department of Toxic Substances Control (DTSC) and USEPA requirements. Operation activities would be conducted with standard construction practices and in accordance with all applicable Cal/OSHA and other safety regulations to minimize the risk to the public. Compliance with federal, State, and local hazardous materials laws and regulations would minimize the risk to the public presented by these potential hazards during construction of the proposed Project. A *Hazardous Materials Business Plan* would be filed with the Anaheim Fire and Rescue Department (AFD) in accordance with Certified Unified Program Agencies requirements.

Compliance with existing law, regulations, and widely-accepted industry standards would minimize the hazard to the public and the environment. Therefore, potential impacts associated with the transport, use, storage, handling, and disposal of hazardous materials during operation of the proposed Project would be less than significant.

**Question B: *Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?***

**Less Than Significant Impact.** As noted above, minor amounts of hazardous materials may be used during construction. However, they would not pose a threat to the public. During operation, resin containing PFOS and PFOA would be generated. However, because the PFOS and PFOA would be bound to the resin, any spills of resin material could be cleaned and removed without creating a significant hazard to the public or the environment. Any hazardous materials stored at the sites would be described in a *Hazardous Materials Business Plan* and submitted to AFD as required by existing regulations. These plans would ensure that the locations, quantities, and cleanup procedures are available to emergency personnel. A search of APU records revealed a diesel spill at Well 40 (Brookhurst Site) in 2001, which was subsequently cleaned up. According to the City, there are currently no open cases (Sanks 2021a). Complying with existing environmental and safety regulations and industry standards would minimize the hazard to the public and the environment.

Therefore, the proposed Project would not result in a significant hazard to the public or the environment through a reasonably foreseeable upset or accident condition related to the release of hazardous materials. Impacts would be less than significant.

**Question C: *Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?***

**No Impact.** Schools are not located within one-quarter mile of the Willow Park, Katella Avenue, Brookhurst, or Santa Cruz Sites. Thomas Jefferson Elementary School is located approximately 0.25 mile southeast of the Downtown Site. However, none of the sites would emit hazardous

emissions, or handle acutely hazardous substances or wastes. Complying with existing environmental and safety regulations and industry standards would ensure that the Project would not emit hazardous emissions. No impacts to nearby schools are anticipated, and no mitigation is required.

**Question D:** *Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?*

**No Impact.** An EDR Radius Map™ with Geocheck® Report was prepared for each of the Project sites by Environmental Data Resources, Inc. (EDR 2021a–e). Search parameters were based on a one-mile radius of the Project sites and consisted of a search of federal, State, local, tribal, and other databases. The complete list of databases and additional information regarding the identified sites can be found in Appendix E. According to the EDR Radius Map, the Willow Park Site was identified as Anaheim Public Utilities Well 56 (1617 West Crone Avenue) and listed in the aboveground storage tanks (AST), California Environmental Reporting System (CERS) Tanks, and CERS databases. The site is described as chemical storage facility. A compliance evaluation was completed, and no violations were observed during the inspection. Additionally, the Downtown Site was identified as Anaheim Public Utilities Well 54 (123 East Ellsworth Avenue) and listed in the AST, CERS TANKS, and CERS databases. The site is described as chemical storage facility. A compliance evaluation was completed, and no violations were observed during the inspection. According to the EDR Radius Map, no hazardous material sites were identified within the boundaries of the Katella Avenue, Brookhurst, or Santa Cruz Sites (EDR 2021a–e). Of the hazardous material sites identified in the Project vicinity, none of the identified sites pose a hazard to the Project sites. Furthermore, the Project sites are not identified on a list of hazardous material sites compiled pursuant to *Government Code* Section 65962.5 (Cortese List). No impacts would occur, and no mitigation is required.

**Question E:** *For a Project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in a safety hazard or excessive noise for people residing or working in the Project area?*

**No Impact.** Fullerton Municipal Airport is the closest public airport, and is located approximately four miles northwest of the Willow Park Site, and further from the other Project sites. None of the Project sites are located within two miles of a public airport and are not located within an airport land use plan. This condition precludes the possibility of the Project exposing persons residing or working in the Project vicinity to aviation hazards. No impacts would occur, and no mitigation is required.

**Question F:** *Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?*

**Less Than Significant Impact.** Most Project activities would be conducted within the limits of the existing treatment sites. Work in these areas would have no impact on emergency response or evacuation plans. Construction activities would be conducted in public roadways which would cause temporary traffic impacts, such as lane closures. Traffic control devices would be installed in accordance with the California Manual for Uniform Traffic Control Devices (MUTCD) and would be conducted in accordance with City Public Works Department requirements which would include obtaining a City Right-of-Way Construction Permit. Therefore, these temporary impacts would result in a less than significant impact.

**Question G: *Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?***

**No Impact.** The Project sites are located in highly urbanized areas of the City, and there are no large, undeveloped areas and/or steep slopes on or near the sites that may pose wildfire hazards. The sites and the surrounding areas are not located in designated Very High Fire Hazard Severity Zones (VHFHSZ), as identified by the California Department of Forestry and Fire Prevention (CalFire) or Special Protection Areas designated in the City General Plan (Anaheim 2004a; CalFire 2011). Rather, the sites are within a Non-VHFHSZ area. Implementation of the proposed Project would not expose people or structures directly or indirectly to a significant risk of loss or death associated wildland fires. No impact would occur, and no mitigation is required.

**Mitigation Program**

No mitigation is required.

**X. HYDROLOGY AND WATER QUALITY**

**Question A: *Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?***

**Question D: *Would the project in flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?***

**Less Than Significant Impact.** The City has adopted a Local Implementation Plan (LIP) based on Orange County's Drainage Area Management Plan. Using the LIP as a guide, the City approves project-specific Water Quality Management Plans (WQMPs) as part of the Project approval process prior to the issuance of permits. WQMPs are required for new development or significant redevelopment projects in the City. A WQMP must address the following:

- Regional or watershed programs,
- Source control BMPs,
- Site design BMPs,
- Low impact development BMPs,
- Treatment control BMPs, and
- Mechanism by which long-term operation and maintenance of all structural BMPs would be maintained.

A new WQMP will be developed for the Willow Park, Downtown, Katella Avenue, Brookhurst, and Santa Cruz Sites.

To comply with the Clean Water Act, the State Water Resources Control Board (SWRCB) issued the statewide NPDES Construction General Permit (Order 2009-0009-DWQ). Under this permit, construction sites with a disturbed area of one or more acres are required to submit a Notice of Intent, risk assessment, site map, SWPPP, and signed certification statement to the SWRCB. The SWPPP must list BMPs that will be implemented to prevent stormwater from carrying pollutants to receiving waters. It must also describe a visual monitoring program; a chemical monitoring program for "non-visible" pollutants to be implemented based on the risk level of the site; and inspection, reporting, training, and recordkeeping requirements. The City requires projects that disturb less than one acre to include an Erosion and Sediment Control Plan (ESCP) with the

grading or building plan submittal. The exact area of disturbance will be calculated prior to development as grading plans are finalized. If the total ground disturbance areas exceed one acre, a SWPPP would be prepared to comply with the existing state requirements. If the total ground disturbance area is less than one acre, an ESCP would be prepared. BMPs required by either plan will be implemented as required.

Occasionally, water might need to be flushed from each of the new treatment sites, and from the new groundwater supply wells during construction and routine operation. These discharges might need to occur during startup, shutdown, testing, and water quality sampling. The City is allowed to conduct discharges from the drinking water system pursuant to the NPDES Permit for Drinking Water system Discharges to Waters of the United States (Order 2014-0194-DWQ). Compliance with this existing permit would ensure that discharged waters are free of sediment and chlorine, and do not pose a threat to Waters of the United States. The sites would discharge into the existing City storm drain system or into flood control channels.

Compliance with existing requirements would result in less than significant impacts to water quality. No mitigation is required.

**Question B:** *Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?*

**Less Than Significant Impact.** The Project would result in construction of two new wells at the Santa Cruz Site, which would be capable of extracting groundwater at approximately 4,000 gallons per minute (GPM). The wells would extract groundwater from the Orange County Groundwater Basin (the Basin). Sustainability of the Basin is managed by the Orange County Water District (OCWD). OCWD manages the total pumping establishing a Basin Production Percentage (BPP). The BPP determines the sustainable amount of water a water supplier may obtain from groundwater, as opposed to imported water. Because the APU pumping rates are established system-wide using the BPP established by OCWD, operation of the new wells would cause minimal increases in groundwater extraction from the basin and the impacts would be less than significant. No mitigation is required.

**Question C:** *Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:*

*(i) result in substantial erosion or siltation on- or off-site?*

*(ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;*

*(iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or*

*(iv) impede or redirect flood flows?*

**Less Than Significant Impact.** Minor grading would be necessary for construction of the treatment plants and associated piping. The Project sites have existing storm drain connections and catch basins that would continue to accept runoff, and the Project would not result in additional surface runoff flooding on or off-site. If needed, the catch basins and piping would be resized or relocated to ensure each site would drain properly. Some impervious material, such as

concrete foundations, would be installed. Complying with the BMP requirements in the Construction General Permit would ensure that erosion and sediment controls would be in place during construction. Complying with building permit requirements would ensure that storm drains and catch basins can accommodate the runoff at each Project site, and would ensure that there would be no significant impacts after construction. Therefore, impacts would be less than significant, and no mitigation is required.

**Question E: *Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?***

**Less Than Significant Impact.** The Santa Ana RWQCB and its Basin Plan regulate water quality in the City and at the Project sites. The Basin Plan contains water quality goals and policies and identifies beneficial uses for receiving waters, along with water quality criteria and standards consistent with federal and State water quality laws. The Project would not violate any water quality standards and would therefore not obstruct the implementation of the Basin Plan. The proposed Project would comply with the NPDES Construction General Permit and SWPPP requirements and implement necessary BMPs. Any water discharges would be in conformance with the NPDES Permit for Drinking Water system Discharges to Waters of the United States (Order 2014-0194-DWQ). Therefore, impacts would be less than significant.

The proposed Project would result in construction of two new wells at the Santa Cruz Site, which would be capable of extracting groundwater at approximately 4,000 GPM. The wells would extract groundwater from the Orange County Groundwater Basin (the Basin). Sustainability of the Basin is managed by the OCWD. OCWD manages the total pumping establishing a BPP. The BPP determines the sustainable amount of water a water supplier may obtain from groundwater, as opposed to imported water. Because the APU pumping rates are established system-wide using the BPP established by the OCWD, operation of the new wells would cause minimal increases in groundwater extraction from the basin and the impacts would be less than significant.

**Mitigation Program**

No mitigation is required.

**XI. LAND USE AND PLANNING**

**Question A: *Would the project physically divide an established community?***

**No Impact.** As described in Section 3.0, Project Description, the proposed Project would involve constructing groundwater treatment facilities in existing City properties. The Project would not physically divide an established community and there would be no impact.

**Question B: *Would the project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?***

**No Impact.** The Project sites are existing City properties. With the exception of the Santa Cruz Site, these properties contain existing groundwater production and distribution infrastructure, and the Project is consistent with the existing land uses. The Project does not propose to change any existing land use designations in the City and, pursuant to Section 53091(e) of the *California Government Code*, the proposed Project would be exempt from City zoning ordinances because it involves the construction of facilities for the production, generation, storage, treatment, or transmission of water, wastewater, or electric energy by a local agency. Implementation of the

proposed Project would not conflict with applicable plans, policies, and regulations. Therefore, there would be no impact, and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

## **XII. MINERAL RESOURCES**

***Question A: Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?***

**No Impact.** The Project sites are located in developed areas, limiting the potential for mineral resource conservation or extraction. No mineral resource extraction, recovery, or processing activities underway on or adjacent to the Project sites. The sites are not designated in the City's General Plan (Anaheim 2004a) or Zoning Code (Anaheim 2004b) for any extractive use. Implementation of the Project would have no impact on the availability of known mineral resources. No mitigation is required.

***Question B: Would the project result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?***

**No Impact.** The Project sites are located in developed areas, limiting its potential for mineral resource conservation or extraction. The Project sites are not classified as areas of locally important mineral resource recovery and are not zoned for mineral use (Anaheim 2004a). Therefore, no impact would occur, and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

## **XIII. NOISE**

### **Existing Conditions**

#### ***Noise Measurements***

The existing noise environment at the Project sites are primarily influenced by traffic noise on nearby roads. For the purpose of this noise analysis, the study area includes the Project sites, the areas immediately adjacent to the Project sites, and the land uses adjacent to the roadway segments where the Project adds vehicular trips to the roadway system.

Psomas conducted ambient noise surveys on May 11, 2021, at each of the Project sites. Short term noise level measurements (20 minutes) were taken using a Larson Davis Laboratories Model 831 integrating sound level meter. This sound level meter was placed at each Project site at a height of approximately 5 feet above the ground and equipped with a windscreen. The locations of the noise monitoring locations at the different Project sites are shown in Exhibits 9a through 9e, Noise Monitoring Locations.

Noise levels of existing conditions at each of the Project sites are shown in Table 12. Noise levels are due primarily to background traffic noise, with the exception of the Downtown Site which was

### **Noise-Sensitive Receptors**

The State of California defines noise-sensitive receptors as those land uses that require serenity or are otherwise adversely affected by noise events or conditions (Psomas 2021c). Noise-sensitive land uses typically include residences, hospitals, churches, schools, and libraries, which could all be adversely affected by an increase in noise levels. Noise sensitive receptors in the vicinity of each proposed Project site include the following:

#### ***Willow Park Site***

The nearest noise sensitive uses to this site are residential uses located west of the proposed relocated basketball courts and south of West Crone Avenue, located approximately 60 feet away from the southern boundary of the Willow Park Site and 200 feet from the proposed pumps. Single-family residences are located to the north, west, and east of the site at boundaries of Willow Park. The nearest non-residential noise sensitive use is Ball Junior High School located approximately 1,700 feet away.

#### ***Katella Avenue Site***

This site is located away from noise sensitive uses with existing multi-residential uses located approximately 400 feet to the west of the Project site. An event auditorium (City National Grove) is located immediately adjacent to the Project site (west), while a commercial building resides approximately 170 feet to the northwest. Angels Stadium and parking are located to the south and southeast of the Project site.

#### ***Santa Cruz Site***

This site is adjacent to the I-5 freeway to the west. There are commercial land-uses to the north and east at approximately 50 feet away. The nearest residential receptor is a multi-family complex located approximately 410 feet to the northeast.

As part of the development of the Santa Cruz Site, pipelines would be installed in the right-of-way (ROW) along the East Orangewood Avenue to Mountain View Avenue and within the ROW along South Anaheim Way to Gene Autry Way. The pipeline work would be located near single- and multi-family residential uses along East Orangewood Avenue. The pipeline work would be adjacent to a commercial land use along Anaheim Way. Additionally, two wells would be drilled

at the Santa Cruz Site. The noise generated during well drilling activities would not occur near noise sensitive residential uses, with the nearest residences located approximately 500 feet away from the Project site.

### **Brookhurst Site**

This site is located east of Brookhurst Street and north of railroad tracks. The easement continues eastward and there are no sensitive receptors along the easement which is also bounded to the south by railroad tracks. To the north and south are single-family residences with the nearest receptors located 55 feet and 60 feet away, respectively.

### **Downtown Site**

This site is located near noise sensitive uses with the nearest existing residential uses located approximately 25 feet west of the site, with additional residential land uses 35 and 45 feet away to the south and east, respectively. There is a commercial property to the north of the Project site, approximately 110 feet away with surface parking in between.

### **Regulatory Setting**

Public agencies have established noise guidelines and standards to protect citizens from potential hearing damage and various other adverse physiological and social effects associated with noise. For the evaluation of potential noise impacts, this analysis assumes compliance with the City of Anaheim's Noise Section (Anaheim General Plan) and the City of Anaheim's Municipal Code (AMC).

### **City of Anaheim Municipal Code**

The following sections of the AMC apply to the Project:

#### **Chapter 6.70 Sound Pressure Levels**

##### **6.70.010 Established.**

Sound produced in excess of the sound pressure levels permitted herein are hereby determined to be objectionable and constitute an infringement upon the right and quiet enjoyment of property in this City.

No person shall within the City create any sound radiated for extended periods from any premises which produces a sound pressure level at any point on the property line in excess of sixty decibels (Re 0.0002 Microbar) read on the A-scale of a sound level meter. Readings shall be taken in accordance with the instrument manufacturer's instructions, using the slowest meter response.

The sound level measuring microphone shall be placed at any point on the property line, but not closer than three (3) feet from any wall and not less than three (3) feet above the ground, where the above listed maximum sound pressure level shall apply. At any point the measured level shall be the average of not less than three (3) readings taken at two (2) minute intervals. To have valid readings, the levels must be five (5) decibels or more above the levels prevailing at the same point when the sources of the alleged objectionable sound are not operating.

Sound pressure levels shall be measured with a sound level meter manufactured according to American Standard S1.4-1961 published by the American Standards Association, Inc., New York City, New York.

Traffic sounds sound created by emergency activities and sound created by governmental units or their contractors shall be exempt from the applications of this chapter. Sound created by construction or building repair of any premises within the City shall be exempt from the applications of this chapter during the hours of 7:00 a.m. to 7:00 p.m. Additional work hours may be permitted if deemed necessary by the Director of Public Works or Building Official. (Ord. 2526 § 1 (part); June 18, 1968; Ord. 3400 § 1; February 11, 1975: Ord. 6020 § 1; April 25, 2006.)

### ***City of Anaheim General Plan***

In the *City of Anaheim General Plan* Noise Element, the City adopted land use-noise compatibility standards shown in Table 13, *Land Use Compatibility for Noise Exposure*. The land use compatibility standards are typically used to identify “normally acceptable”, “conditionally acceptable”, “normally unacceptable”, and “clearly unacceptable” noise levels for varying land uses and may be used to ascertain construction noise impacts to the surrounding land uses.

**TABLE 13**  
**LAND USE COMPATIBILITY FOR NOISE EXPOSURE**

Land Use Category	Community Noise Exposure L <sub>dn</sub> or CNEL, dB					
	55	60	65	70	75	85
Residential – Low-Density Single-Family, Duplex, Mobile Homes						
Residential – Multiple-Family Homes						
Transient Lodging – Motels, Hotels						
Schools, Libraries, Churches, Hospitals, Nursing Homes						
Auditoriums, Concert Halls, Amphitheaters						
Sports Arena, Outdoor Spectator Sports						
Playgrounds, Neighborhood Parks						
Golf Courses, Riding Stables, Water Recreation, Cemeteries						
Office Buildings, Business, Commercial and Professional						
Industrial, Manufacturing, Utilities, Agriculture						
	Normally Acceptable	Conditionally Acceptable	Normally Unacceptable	Clearly Unacceptable		
Specified land use is satisfactory based upon the assumption that any buildings involved are of normal, conventional construction, without any special noise insulation requirements.	New construction or development should be undertaken only after a detailed analysis of the noise reduction requirement is made and needed noise insulation features are included in the design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning, will normally suffice.	New construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design. Outdoor areas must be shielded.	New construction or development should generally not be undertaken. Construction costs to make the indoor environment acceptable would be prohibitive, and the outdoor environment would not be acceptable.			
L <sub>dn</sub> : day-night noise level; CNEL: Community Noise Equivalent Level; dB: decibels						
Source: City of Anaheim 2020.						

For single-family residential land uses impacted by construction, the “normally acceptable” and “conditionally acceptable” community noise levels according to the compatibility matrix would be 60 A-weighted decibels (dBA) and 70 dBA Community Noise Equivalent Level (CNEL), respectively. If the noise levels from construction are below 65 dBA CNEL then no changes to the intended construction plans are required; however, if the levels are above 65 dBA CNEL then noise reduction measures may need to be considered to reduce the noise impact to the surrounding land uses.

Additionally, the Noise Element has established goals/policies to manage the noise impact throughout the City of Anaheim. The pertinent goals are as follows:

### ***Land Use Planning and Design***

- Goal 1.1, Policy 1: Update City regulations to adopt Land Use Compatibility for Community Noise Exposure and California Interior and Exterior Noise Standards as appropriate.
- Goal 1.1, Policy 2: Continue to enforce acceptable noise standards consistent with health and quality of life goals and employ effective techniques of noise abatement through such means as noise ordinance, building codes, and subdivision and zoning regulations.

### ***Non-Transportation Related Noise Sources***

- Goal 3.1, Policy 1: Discourage new projects located in commercial or entertainment areas from exceeding stationary-source noise standards at the property line of proximate residential or commercial uses, as appropriate.
- Goal 3.1, Policy 2: Prohibit new industrial uses from exceeding commercial or residential stationary-source noise standards at the most proximate land uses, as appropriate. (Industrial noise may spill over to proximate industrial uses so long as the combined noise does not exceed the appropriate industrial standards.)
- Goal 3.1, Policy 3: Enforce standards to regulate noise from construction activities. Particular emphasis shall be placed on the restriction of the hours in which work other than emergency work may occur. Discourage construction work on weekends or holidays except in the case of construction proximate to schools where these operations could disturb the classroom environment.
- Goal 3.1, Policy 4: Require that construction equipment operate with mufflers and intake silencers no less effective than originally equipped.
- Goal 3.1, Policy 5: Encourage the use of portable noise barriers for heavy equipment operations performed within 100 feet of existing residences or make applicant provide evidence to why the use of such barriers is infeasible.

## **Noise Impact Analysis**

The following questions correspond to the questions in the Noise section of the Initial Study Checklist in Appendix G of the State CEQA Guidelines.

**Question A: *Would the Project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?***

**Less than Significant with Mitigation.**

### **Construction Noise**

The Project involves construction of a groundwater treatment plant and ancillary water distribution at five distinct sites. The Santa Cruz Site would also include the construction of two new groundwater supply wells. Local land uses proximate to the Project sites would be subject to elevated noise levels due to the operation of construction equipment. Construction activities are carried out in discrete steps, each of which has its own mix of equipment and, consequently, its own noise characteristics. Construction phases may include pavement cutting and removal, trenching, pipeline construction, backfilling, and water treatment infrastructure construction. Construction of the Project would generally be limited to weekdays for an eight-hour period between 7:00 AM to 7:00 PM, with no activity at night or on weekends or federal holidays, except for during well drilling activities at the Santa Cruz Site, which would require overnight construction activities. The Project would be exempt from the requirements of Section 6.70, as the Project would result in sound created by governmental units or their contractors and is deemed necessary by the Director of Public Works or Building Official. This would allow for Project construction to exceed 60 decibels at the property line, and to allow for construction to occur from 7:00 PM to 7:00 AM (i.e., overnight). Although the AMC has no restrictions on the magnitude of construction noise generated between 7:00 AM to 7:00 PM during weekdays, and the Project is exempt from the requirements of this ordinance, the Noise Element requires the land use compatibility matrix to be satisfied for community noise.

Construction noise levels reported in the USEPA's *Noise from Construction Equipment and Operations, Building Equipment, and Home Appliances* were used to estimate future construction noise levels for the Project (Psomas 2021c). Typically, the estimated construction noise levels are governed primarily by equipment that produces the highest noise levels. Construction noise levels for each generalized construction phase (i.e., ground clearing/demolition, excavation, foundation/building construction, paving, and site cleanup) are based on a typical construction equipment mix for a public works project and do not include use of atypical and/or vibration-intensive equipment (e.g., impact pile drivers). All construction equipment is anticipated to be fitted with the original equipment manufacturer or manufacturer approved equivalent mufflers or intake silencers to maintain, at minimum, published noise emission levels. The construction phases for each of the distinct Project sites vary due to the anticipated construction needs. In addition, well drilling construction would occur at the Santa Cruz Site, and well rehabilitation activities would occur at the Katella Avenue and Brookhurst Sites.

The degree to which noise-sensitive receptors are affected by construction activities depends heavily on their proximity. Estimated noise levels at the nearest noise sensitive uses attributable to the development of the Project Sites are shown in Table 14.

**TABLE 14**

dBA: A-weighted decibels; L <sub>eq</sub> : Equivalent Noise Level; ft: feet Source: Noise calculations in Appendix E.		

For construction of each Project sites' groundwater treatment system (i.e., not including pipelines), Table 14 shows both the maximum and average distance construction noise levels. While individual pieces of construction equipment may operate at the closest distance, the projected noise created from construction is a composite of heavy equipment pieces working together and the physical limitations of proximity due to the size of the equipment would preclude all pieces working at the most proximate location. Maximum noise levels represent the noise levels from construction occurring at the closest point of the Project site to the closest point of the property line of the nearest land use/receptor. These maximum noise levels would occur only intermittently because construction equipment moves around the site and is at the site boundary for only short periods of time. The average distance noise levels represent the noise exposure to sensitive uses based on the distance from the center of the on-site area to the closest property line of a noise sensitive use/receptor. Because noise exposure at average distances constitute the majority of noise exposure during construction activities, this condition will be used for the evaluation to determine whether mitigation measures are required.

Noise levels at the receptor sites would be reduced as the listener moves away from the Project boundary or is shielded by structures in the receptor area. Noise levels from anticipated Project-related construction activities for the five distinct Project sites vary at the following locations:

#### ***Willow Park Site***

- Maximum Noise Levels 88 to 94 dBA  $L_{eq}$
- Average Noise Levels 64 to 70 dBA  $L_{eq}$

The Willow Park Site is surrounded by single-family residences land uses. Although the AMC has no restrictions on the magnitude of construction noise generated between 7:00 AM to 7:00 PM during weekdays, the Noise Element requires the land use compatibility matrix to be satisfied for community noise. For the site to be "conditionally acceptable" (i.e., 70 dBA CNEL) under noise exposures at an average distance, the Equivalent Continuous Noise Levels (dBA  $L_{eq}$ ) due to construction need to be 75 dBA or less for an 8-hour workday. The average noise levels satisfies this requirement. Therefore, this site does not require mitigation measures to reduce Project-related construction measures.

#### ***Katella Avenue Site***

- Maximum Noise Levels 88 to 94 dBA  $L_{eq}$
- Average Noise Levels 67 to 73 dBA  $L_{eq}$

The Katella Avenue Site is adjacent to an auditorium and commercial land uses. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site, while the Noise Element's community noise compatibility matrix of "conditionally acceptable" (i.e., 77 dBA CNEL) for commercial land uses, the  $L_{eq}$  due to construction needs to be 81 dBA or less for an 8 hour work day. The average noise levels satisfies this requirement. Therefore, this site does not require mitigation measures to reduce Project-related construction measures.

Multi-family residential land uses located approximately 400 feet away are represented by the average distance noise level. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site, while the Noise Element's community noise compatibility matrix of "conditionally acceptable" (i.e., 70 dBA CNEL) for residential land uses, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8 hour work days. The anticipated construction noise levels at the multi-family residential land uses satisfy the Noise Element's compatibility matrix requirements.

### **Santa Cruz Site**

- Maximum Noise Levels 77 to 86 dBA  $L_{eq}$
- Average Noise Levels 62 to 71 dBA  $L_{eq}$

The Santa Cruz Site is adjacent to the I-5 freeway and commercial and industrial land uses. Per Section 6.70 of the AMC, there are no restrictions on construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, the Noise Element's community noise compatibility matrix of "conditionally acceptable" (i.e., 77 dBA CNEL) for commercial land uses require the construction noise to be 81 dBA or less for an 8-hour workday. The average noise levels satisfies this requirement.

Multi-family residential land uses located approximately 500 feet away are represented by the average distance noise level. Per Section 6.70 of the AMC, there are no restrictions to construction noise between 7:00 AM to 7:00 PM during weekdays for this site; however, due to the Noise Element's community noise compatibility matrix of "conditionally acceptable" (i.e., 70 dBA CNEL) for residential land uses. Nighttime construction activities are penalized under the CNEL noise metric to account for people's sensitivity to noise during sleeping hours. The 24-hour noise level for well drilling construction activities is 78 dBA CNEL would exceed the conditionally acceptable noise level of 70 dBA CNEL. The anticipated construction noise levels at the multi-family residential land uses exceed the Noise Element's compatibility matrix requirements prior to the implementation of mitigation measures.

Although the Project would be exempt from the noise limits and construction timing constraints of Section 6.70 of the AMC, 24-hour well drilling activities would result in noise levels which exceed the City's noise limits. MM 13-1 would reduce noise from well drilling activities during nighttime hours. MM 13-1 requires that 24-foot tall sound barriers, with a minimum sound transmission class (STC) of 25, shall be erected along all sides of the construction areas where continuous construction activities would occur. As such, with implementation of MM 13-1, noise levels would be reduced by 15-20 dBA CNEL and would result in noise levels of 63 dBA CNEL, which is below the construction noise level limit of 70 dBA CNEL. As such, there would be a less than significant impact with mitigation.

### **Pipeline Installation (Santa Cruz Site)**

- Maximum Noise Levels 84 to 90 dBA  $L_{eq}$
- Average Noise Levels 54 to 60 dBA  $L_{eq}$  at East Orangewood Avenue
- Average Noise Levels 60 to 66 dBA  $L_{eq}$  at South Anaheim Way

The development of pipelines along East Orangewood Avenue would involve approximately 3,900 lineal feet of pipeline construction. Approximately 800 lineal feet of pipelines would be developed along South Anaheim Way. Pipeline construction would occur in a linear manner and result in a relatively brief noise exposure at an individual receptor location. This activity would occur proximate to residences and commercial land uses along East Orangewood Avenue and commercial land use along South Anaheim Way. The AMC has no construction noise restrictions between 7:00 AM to 7:00 PM during weekdays for this site, while the Noise Element's community noise compatibility matrix has a designation of "conditionally acceptable" (i.e., 70 dBA CNEL) for residential land uses. As such, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8-hour workday. While noise levels would be high when equipment are working directly in front of a specific location at nearby residential uses (i.e., during maximum noise level conditions), the duration of exposure would be relatively minimal and noise levels under the condition of an average distance would result in noise levels that would be below the City's community noise compatibility matrix.

The land use to the east of the site is a commercial land use with a compatibility matrix of “conditionally acceptable” (i.e., 77 dBA CNEL) requirement of 81 dBA  $L_{eq}$  or less for an 8-hour workday. While maximum noise levels would be high during construction equipment placed directly in front of a specific location at local commercial uses, the duration of exposure would be relatively minimal, and average noise levels would be below the City’s community noise compatibility matrix. As such, there would be less than significant impacts and no mitigation measures are required.

### **Brookhurst Site**

- Maximum Noise Levels 92 to 98 dBA  $L_{eq}$
- Average Noise Levels 70 to 76 dBA  $L_{eq}$

The Brookhurst Site is adjacent to single-family residences land uses at the northern and southern Project site boundaries. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, due to the Noise Element’s community noise compatibility matrix of “conditionally acceptable” (i.e., 70 dBA CNEL) for residential land uses, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8-hour workday. The average noise levels do not satisfy this requirement. Therefore, MM 13-2 requires implementation of the following to reduce construction noise from the Brookhurst site to a less than significant level: construction of 10-foot-tall plywood barriers along the northern and southern boundaries of the Project site to shield the construction equipment from nearby residential receptors. The barriers shall reduce the estimated average construction noise levels to below 70 dBA  $L_{eq}$ . With implementation of MM 13-2, impacts to sensitive receptors near the Brookhurst Site would be reduced to less than significant.

The land use to the west is commercial with a compatibility matrix of “conditionally acceptable” (i.e., 77 dBA CNEL) requirement of 81 dBA  $L_{eq}$  or less for an 8-hour workday. The average noise levels satisfy this requirement. Therefore, this site does not require additional mitigation measures.

### **Downtown Site**

- Maximum Noise Levels 82 to 88 dBA  $L_{eq}$
- Average Noise Levels 76 to 82 dBA  $L_{eq}$

The Downtown Site is adjacent to residential land uses to the western, eastern, and southern boundaries. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, the Noise Element’s community noise compatibility matrix of “conditionally acceptable” (i.e., 70 dBA CNEL) applies for residential land uses. As such, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8-hour workday. The maximum and average noise levels do not satisfy this requirement. The land use to the north is commercial with a compatibility matrix of “conditionally acceptable” (i.e., 77 dBA CNEL) requirement of 81 dBA  $L_{eq}$  or less for an 8-hour workday. The average noise levels do not satisfy this requirement. Therefore, MM 13-3 requires implementation of the following to reduce to construction noise from the Downtown site to a less than significant level: construction of 10-foot-tall plywood barriers along the northern, southern, and eastern Project boundary lines and 20-foot-tall plywood barriers along the western boundary line of the Project site to shield construction equipment from the residential receptors. The residential land uses along the west Project boundary are three stories tall and will have direct-line-of sight to the Project site without a tall barrier. The barriers shall reduce the estimated average construction noise levels to the surrounding land uses below 75 dBA  $L_{eq}$ . With implementation of MM 13-3, impacts to nearby residential receptors would be less than significant.

## **Operational Noise**

The Project sites would generate noise during the operations phase of the Project. Noise produced during the operations phase include both traffic-related noise from worker trips as well as stationary sources of noise from pumps and generators. In terms of traffic noise, an existing employee would visit the Project sites to monitor and maintain the facilities and would generate nominal new vehicle trips related to these activities. As such, the Project would not generate a substantial increase in traffic-related noise. For stationary sources of noise, the use of the emergency generator would be very limited during testing and maintenance and the infrequent occurrence of power outages. The generator would be properly muffled and enclosed in protective shrouds/housing for security reasons and to minimize noise transmission. The well and booster pump equipment would be the primary sources of long-term noise due to the constant use for water treatment and conveyance. The pumps for the Project sites are rated at 50 horsepower (HP) with the exception of two 400 HP pumps at the Santa Cruz Site.

Table 15 presents the estimated noise levels for plant operations at each of the Project sites with respect to the nearest land uses. Noise is attenuated by the distance of the noise source to noise receptors. Note that any structures that obstruct the view of the pumps to noise receptors would also further attenuate noise levels; however, no acoustical reductions were accounted in this analysis.

As discussed previously, the AMC, under Section 6.70.010, has set forth allowable noise levels of no greater than 60 decibels at any point at the property line. However, as described above, the Project would be exempt from the requirements of Section 6.70, as the Project would result in sound created by governmental units or their contractors and is deemed necessary by the Director of Public Works or Building Official. Regardless, for best practices, the following analysis ensures that operational noise levels from the Project would be 60 or less at the property line. Table 15 shows that all the Project Sites, with the exception of the Downtown Site, would not exceed Section 6.70 provisions with noise levels being below the AMC noise limit of 60 dB at the property line. The Downtown Site would result in noise levels that exceed the 60 dB noise limit at the nearest land uses. The Downtown Site would exceed the noise limit at the elevated balconies for the multifamily residential use across the alleyway to the west of the Project site because it does not have the noise attenuation benefit of the existing 8-foot perimeter wall at the Project site. Therefore, MM 13-4 is required at this Site, which lists alternatives to reduce to operational noise from pumps to a less than significant level. Impacts would be less than significant with mitigation.

**TABLE 15**  
**ESTIMATED OPERATION NOISE LEVELS AT NEARBY RECEPTORS**

Project Site	Receptor	Distance (ft)	Noise Limit (dBA L <sub>eq</sub> )	Anticipated Pump Noise Levels without Mitigation (dBA L <sub>eq</sub> )	Exceeds Limit Pre-Mitigation?	Anticipated Maximum Pump Noise Levels With Mitigation (dBA L <sub>eq</sub> )	Exceeds Limit Post-Mitigation?
Willow Park Site	Residences	180	60	53	No	N/A	N/A
Katella Avenue Site	Commercial	170	60	54	No	N/A	N/A
Santa Cruz Site	Commercial	80	60	59	No	NA	NA
Brookhurst Site	Residences	60	60	58	No	N/A	N/A
Downtown Site – Ground Level	Residence	50	60	56	No	N/A	N/A

ft: feet; dBA: A-weighted decibels; L<sub>eq</sub>: Equivalent Noise Level; N/A: not applicable

Source: Noise calculations in Appendix E.

**Question B: Would the project result in generation of excessive groundborne vibration or groundborne noise levels?**

**Less than Significant Impact.** As is typical of most cities and counties in California, there are no applicable City standards for vibration-induced annoyance or structural damage from vibration. Caltrans has adopted vibration damage thresholds, which are shown in Table 16, to assess the potential for structural damage from vibration. The structural damage threshold for “older residential structures” of 0.3 peak particle velocity (ppv) inch per second (in/sec) for continuous/frequent (i.e., intermittent) sources is most applicable to this analysis. For commercial and industrial buildings proximate to the Project sites, 0.5 ppv is applicable to this analysis.

**TABLE 16**  
**VIBRATION DAMAGE THRESHOLD CRITERIA**

Structure and Condition	Maximum ppv (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.2	0.1
Historic and some old buildings	0.5	0.25
Older residential structures	0.5	0.3
New residential structures	1.0	0.5
Modern industrial/commercial buildings	2.0	0.5

ppv: peak particle velocity; in/sec: inch(es) per second

Note: Transient sources create a single isolated vibration event, such as blasting or drop balls. Continuous/frequent intermittent sources include impact pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment.

Source: Caltrans 2013.

The Caltrans vibration annoyance thresholds are shown in Table 17. These thresholds are used to assess the potential for a significant vibration impact for human annoyance; and annoyance is evaluated within occupied buildings. The vibration annoyance response of “distinctly perceptible” of 0.24 ppv is most applicable to this analysis.

**TABLE 17**  
**VIBRATION ANNOYANCE THRESHOLDS**

Average Human Response	ppv
Severe	2.0
Strongly perceptible	0.9
Distinctly perceptible	0.24
Barely perceptible	0.035
ppv: peak particle velocity Source: Psomas 2021a.	

Site development, asphalt removal, excavation, and repaving would occur at each Project site and along East Orangewood Avenue and Anaheim Way. These construction activities would generate vibration. These activities involve the use of typical off-road vehicles and stationary equipment. Pile driving and blasting are generally the sources of the most severe vibration during construction. Neither pile driving nor blasting would be used during Project construction. Table 18 summarizes typical vibration levels associated with construction activities for various vibration-inducing pieces of equipment, not all of which would be required for the Project.

**TABLE 18**  
**VIBRATION LEVELS FOR**  
**CONSTRUCTION EQUIPMENT**

Equipment		ppv at 25 ft (in/sec)
Pile driver (impact)	upper range	1.518
	typical	0.644
Pile driver (sonic)	upper range	0.734
	typical	0.170
Vibratory roller		0.210
Large bulldozer		0.089
Caisson drilling		0.089
Loaded trucks		0.076
Jackhammer		0.035
Small bulldozer		0.003
ppv: peak particle velocity; ft: feet; in/sec: inches per second Source: Psomas 2021a.		

Table 19 summarizes the anticipated vibration levels (measured in ppv) at each Project site and for pipeline construction associated with the Santa Cruz Site. It should be noted that, although it is not anticipated that the Project would use small or large bulldozers, the equipment is included to represent vibration from similar vibration-generating equipment such as a crane or an excavator. Vibration levels are based at the nearest land use and structure to each of the construction areas.

**TABLE 19**  
**ESTIMATED VIBRATION LEVELS AT NEAREST RECEPTORS**

Construction Phase	Vibration Level (ppv)	Vibration Threshold (Building Damage/Annoyance ppv)	Exceeds
Willow Park Site Assessed at 60 feet from Building			
Vibratory roller	0.056	0.3/0.24	No
Large bulldozer	0.024		
Small bulldozer	0.001		
Jackhammer	0.009		
Loaded trucks	0.020

Large bulldozer	0.089		
Small bulldozer	0.003		
Jackhammer	0.035		
Loaded trucks	0.076		
ppv: peak particle velocity			
Vibration calculations can be found in Appendix E.			

As shown in Table 19, vibration levels would not exceed the building damage and annoyance thresholds when construction activities occur closest to the nearest offsite building at the Project sites. Buildings located further from these analyzed locations would be exposed to lower levels of

project-related vibration. There would be a less than significant impact, and no mitigation is required.

**Question C:** *For a project located within the vicinity of a private airstrip or an airport land use plan or, where such plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in exposure of people residing or working in the Project area to excessive noise levels?*

**No Impact.** The Project sites are located to the east of Seal Beach VORTAC SLI and southeast of Fullerton Municipal Airports. The Willow Park Site is the most proximate to the airfield at approximately 3.75 miles from the Fullerton Municipal runway while the Katella site is most distant at approximately 8 miles from the Seal Beach VORTAC SLI runway.

Since the Project sites are not in the vicinity of an airstrip or airport land use, the Project site would have no impact onto the land uses impacted by aircraft noise.

### **Mitigation Program**

#### ***Mitigation Measures***

- MM 13-1** During nighttime construction activity (i.e., from 7 PM to 7 AM), the Construction Contractor shall ensure that the following best management practices for sound barriers are implemented at the wells at the Santa Cruz Site. During nighttime construction activities, 24-foot tall sound barriers, with a minimum sound transmission class (STC) rating of 25, must be erected along all sides of the construction area where continuous construction activities would occur.
- MM 13-2** During construction activities at the Brookhurst Site, sound barriers shall be erected to a height of at least 10 feet along the Project site's north and south boundary lines to shield construction noise to the nearby residential land uses. The sound barriers would consist of either plywood with a thickness of  $\frac{3}{4}$  inch or greater or sound blankets with a minimum Sound Transmission Class (STC) of 25 with no gaps along the barrier with no gaps along the barrier.
- MM 13-3** During construction activities at the Downtown Site, sound barriers shall be erected to a height of at least 10 foot tall plywood barriers shall be constructed along the Project site's south and east boundary lines and 20 foot tall barriers along the west boundary line to shield construction noise to the nearby residential land uses. The sound barriers would consist of either plywood with a thickness of  $\frac{3}{4}$  inch or greater or sound blankets with a minimum STC of 25 with no gaps along the barrier.
- MM 13-4** For the Downtown Site, one of the following alternatives shall be implemented for proposed on-site pumps to minimize pump noise during operation of the Project:
- Pump equipment require acoustic lagging with a minimum STC of 20.
  - Enclose the pump equipment to shield noise to the nearest receptors. The enclosure shall consist of either masonry or be buried underground.
  - Develop a sound wall between the pump equipment and receptors. The height of the sound wall shall be designed so there is no line-of-sight between the pump equipment and receptors.

- Place the booster pump near a building or existing wall that provides a complete obstruction in the line of sight between the pump and nearby residential uses.
- Site booster pump at least 100 feet away from the property line of any residential uses.

#### **XIV. POPULATION AND HOUSING**

**Question A:** *Would the project induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?*

**No Impact.** The proposed Project involves construction of water infrastructure equipment on existing City properties, and would not result in the construction of any new residences or businesses. The Project would not result in the generation of additional population or provide additional long-term employment opportunities. Therefore, the Project would not generate additional population or cumulatively exceed official regional or local population projections, nor would it induce substantial growth in the area either directly or indirectly. Therefore, there would be no impact to population growth, and no mitigation is required.

**Question B:** *Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?*

**No Impact.** The proposed Project would not result in the removal or demolition of any existing residential units because there are no existing residential uses on the properties. Therefore, no impact would occur, and no mitigation is required.

#### **Mitigation Program**

No mitigation is required.

#### **XV. PUBLIC SERVICES**

**Question A:** *Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:*

##### ***Fire Protection?***

**No Impact.** The proposed Project would not adversely impact fire protection because no population increase or shifts in population would occur and no new structures would be built as a result of the Project. The proposed Project would not include any residential population or increase the number of employees at the facilities. Therefore, the Project would have no impact on fire protection services, and no mitigation is required.

##### ***Police Protection?***

**No Impact.** The proposed Project would not adversely impact police protection because no population increase or shifts in population would occur and no new structures would be built as a result of the Project. The proposed Project would not include any residential population or

increase the number of employees at the facilities. Therefore, the Project would have no impact on police protection services, and no mitigation is required.

### ***Schools?***

**No Impact.** The proposed Project would not adversely impact schools because no population increase or shifts in population would occur and no new structures would be built as a result of the Project. The proposed Project would not include any residential population or increase the number of employees at the facilities. Therefore, the Project would have no impact on schools and no mitigation is required.

### ***Parks?***

**Less Than Significant Impact.** The Downtown, Katella Avenue, Brookhurst, and Santa Cruz Sites are not located near parks and would have no impact. The Willow Park Site is an approximately 2.1-acre disturbed site occupied by an existing public restroom facility and utility building. The site is located within the park, which contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. The proposed Project involves installation of a groundwater treatment plant north of an existing APU groundwater supply well site within the existing park. The treatment system would be fenced and would not interfere with park uses after construction is complete. As part of the Project, an electrical transformer would be moved into the treatment plant. A minimum of 8 trees would be removed including several trees to the west of the existing building. However, the work would not change the overall character or use of the park. During construction, the park would remain open, but temporary fencing would be set around the work area for public safety. Therefore, impacts related to parks would be less than significant.

### ***Other Public Facilities?***

**No Impact.** The proposed Project would not adversely impact other public facilities, such as libraries and community centers, because no population increase or shifts in population would occur and no new structures would be built as a result of the Project. The proposed Project would not include any residential population or increase the number of employees at the facilities. Therefore, the Project would have no impact on other public facilities and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

## **XVI. RECREATION**

**Question A:** *Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?*

**Less Than Significant Impact.** The proposed Project would not increase the use of parks because no population increase or shifts in population would occur and no occupied structures would be built as a result of the Project. The proposed Project would not include any residential population or increase the number of employees at the facilities. Therefore, impacts would be less than significant, and no mitigation is required.

**Question B: Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?**

**Less Than Significant Impact.** The proposed Project would not require the construction or expansion of recreational facilities because no population increase or shifts in population would occur and no new structures would be built as a result of the Project. The proposed Project would not include any residential population or increase the number of employees at the facilities. Therefore, impacts would be less than significant, and no mitigation is required.

**Mitigation Program**

No mitigation is required.

**XVII. TRANSPORTATION/TRAFFIC**

**Question A: Would the project conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian?**

**Less Than Significant Impact.** Project construction could temporarily increase vehicular traffic on the surrounding street system due to worker trips, off-site staging areas, as well as haul truck and delivery trips. However, these impacts would be short in duration and temporary in nature. Truck routes are defined in the City General Plan and AMC Chapter 14.48 (Anaheim 2004a). The Project would comply with these existing requirements. The following temporary construction activities would take place on the sites to allow construction equipment to safely enter and exit the properties during construction.

- **Brookhurst Site:** Temporary lane closure on Brookhurst for piping and tie into water main. Work would require coordination with Southern California Edison (SCE) as they have power lines above site.
- **Katella Avenue Site:** None.
- **Downtown Site:** Temporary lane impacts on Ellsworth Avenue and Claudina Street. Temporary parking impacts to the parking lot to the north while restriping occurs.
- **Willow Park Site:** The park will remain open, but temporary fencing would be set around the work area for public safety.
- **Santa Cruz Site:** Temporary impacts while constructing new site entrances, sidewalks, and piping near Santa Cruz Street, Stanford Court, Anaheim Way, and Orangewood Ave.

If lane closures are necessary, a Right-of-Way Construction Permit would be obtained from the City Public Works Department and temporary traffic control devices would be implemented in accordance with the MUTCD to minimize traffic disruptions.

After construction, each site would generally be visited daily for routine operation and maintenance activities and trips to the site would be largely unchanged from the existing operations. Each site would require the resin to be extracted and replaced periodically; however, most of this work would occur on site, and would only result in a few trucks driving to and from each site up to a few times per year.

The Orange County Transportation Authority (OCTA) operates public busses in the City. Bus stops nearest to the sites are located:

Site	Location/Route
Willow Park Site	Intersection of Euclid Street and Crone Avenue (Route 37)
Downtown Site	Intersection of Anaheim Boulevard and Santa Ana Street (Route 47)
Katella Avenue Site	Intersection of Katella Avenue and Howell Avenue (Routes 50 and 757)
Brookhurst Site	Intersection of Brookhurst Street and Crestwood Lane (Route 35)
Santa Cruz Site	Intersection Anaheim Boulevard Orangewood Avenue (Route 83)
Source: OCTA 2021.	

The Project is not expected to conflict with bus operations. Additionally, a standard condition of the City's Right-of-Way Construction Permit requires permittees to notify OCTA prior to implementing any lane closure. This existing requirement would ensure impacts to bus routes would be minimized.

The traffic impacts from these activities would be minimal, and disruptions to bus operations would be minimized by routine compliance with Right-of-Way Construction Permits and coordination with OCTA. Therefore, impacts would be less than significant, and no mitigation is required.

**Question B: *Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?***

**Less Than Significant Impact.** CEQA Guidelines Section 15064.3 allows the lead agency to establish appropriate methodologies to evaluate the significance of VMT caused by a project. The City developed and adopted Traffic Impact Analysis Guidelines (Anaheim 2020). These guidelines establish threshold of significance for projects conducted within the City. The adopted guidelines define "Public Services" and "Projects generating less than 110 daily vehicle trips" as activities that are presumed to have a less than significant transportation impact. The proposed Project would be implemented to benefit the municipal water system, a public service. In addition, it is estimated that during construction, approximately 15 workers would be on site on a given day, which would result in far fewer than 110 daily vehicle trips. During operation, each site would be visited by one vehicle per day, on average. Therefore, the transportation impacts would be less than significant, and no mitigation is required.

**Question C: *Would the project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses?***

**No Impact.** The proposed Project would require no new roadway construction. Any work conducted in the roadway (e.g., pipeline installation) would return the road to its existing condition upon completion. There would be no impact related to geometric design feature or incompatible uses, and no mitigation is required.

**Question D: *Would the project result in inadequate emergency access?***

**Less Than Significant Impact.** The proposed Project would result in the construction and operation of groundwater treatment equipment and water wells at existing City properties. Lane closures might be necessary to facilitate pipeline construction in adjacent City streets. A City Right of Way Construction Permit would be obtained prior to installing any temporary traffic control devices, and work would be conducted in accordance with the MUTCD (Caltrans 2021b). The

proposed Project would not result in any population increase that would affect emergency access. Therefore, impacts would be less than significant, and no mitigation is required.

### **Mitigation Program**

No mitigation is required.

## **XVIII. TRIBAL CULTURAL RESOURCES**

As discussed in Section V of this IS/MND, other cultural resources, including historical resources, archaeological resources, and human remains, were addressed, the impact analysis concluded that impacts on these resources would be less than significant. For historic resources, the existing Project site is not listed in the CRHR, the NRHP, California Historical Landmarks, or California Points of Historical Interests lists. Additionally, the Project site is not included in a Local Register of Historical Resources; on a map of Historical Resources; or on a map of Historic Districts. For archaeological resources, the Impact Analysis concluded the Project could result in unanticipated discovery of previously unknown archaeological resources. To reduce this impact, the analysis required implementation of MM 5-1, which includes retaining a professional archaeologist to evaluate the significance of archaeological resources and determine an appropriate course of action as necessary. For human remains, the regulatory requirements that address the handling of human remains if previously unknown human remains are encountered, as well as if the remains are determined to be Native American. Compliance with the State-required regulations would ensure such impacts are reduced to a less than significant level. It is worth noting that past archaeological research and studies may have been conducted without the involvement of Native American communities from this area. In those cases, the oral tradition and firsthand knowledge of tribal cultural resources (TCR) passed down to their descendants of those communities may not have been included in the research and studies, specifically from the Juaneño and Gabrieleño communities that consider the City of Anaheim to fall within their ancestral territory.

The following analysis is based on these consultation efforts and addresses the potential for the discovery of TCRs and the implementation of mitigation measures to reduce impacts to such discoveries to a less than significant level.

### **METHODOLOGY**

As discussed in Section V of this IS/MND, the NAHC conducted a SLF search for the project. The search results are negative. Consistent with requirements of Section 106 of the National Historic Preservation Act (NHPA) and AB 52 (required for projects subject to CEQA analyses), the City has sent letters to tribes that have expressed an interest in being consulted regarding Native American resources for the projects being undertaken by City. Letters were sent to interested tribal organizations on May 11 and May 24, 2021.

### **IMPACT ANALYSIS**

**Question A:** *Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:*

- a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k).**

**No Impact.** For purposes of impact analysis, a tribal cultural resource is considered a site, feature, place, cultural landscape, sacred place, or object which is of cultural value to a California Native American Tribe and is either eligible for the CRHR or a local register. As indicated in Section V of this IS/MND, based on a 2021 SCCIC record search results there are no resources on the Project site that are currently listed on the CRHR. Therefore, the proposed Project would not have an impact on a tribal cultural resource that is listed or eligible for listing on the CRHR or a local register. No significant impacts were identified, and mitigation is not required.

***b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.***

**Less Than Significant Impact With Mitigation.** The second component of this threshold is if the proposed Project would impact a tribal cultural resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a Native American tribe. Subdivision (c) states:

A resource may be listed as an historical resource in the California Register if it meets any of the following CRHR criteria:

- (1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
- (2) Is associated with the lives of persons important in our past.
- (3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.
- (4) Has yielded, or may be likely to yield, information important in prehistory or history.

Based on information available through the record searches at the SCCIC and the NAHC, and the long-term past use of the Project sites, there is no information available that indicates there are significant tribal resources within the Project area that would be significant pursuant to criteria set forth in subdivision (c) of Public Resource Code Section 5024.1. However, as noted in Section above, the City requested consultation with tribes that notified the City of a desire to be consulted with regarding the Project.

Certified letters were sent to tribal organizations on May 24, 2021. The City received two responses from interested tribal representatives:

- **On June 10, 2021, Joyce Perry of Belardes/Juaneño Band of Mission Indians, Acjachemen Nation:** Belardes requested consultation and copies of the CHRIS records search and literature review results. Psomas provided copies of the CHRIS results to Ms. Perry on June 11, 2021. Consultation between the City and Belardes/Juaneño Band of Mission Indians, Acjachemen Nation was conducted by email.
- **On June 11, 2021, Andy Salas (the Tribal Chair), for the Gabrieleño Band of Mission Indians – Kizh Nation:** Mr. Salas requested consultation his organization and the City.

Consultation between the City and the Gabrieleño Band of Mission Indians – Kizh Nation was conducted by email.

Consultation between the City and the tribal representatives of both Belardes/Juaneño Band of Mission Indians, Acjachemen Nation, and the Gabrieleño Band of Mission Indians – Kizh Nation, did not identify tribal cultural resources within the proposed Project sites. Though, as indicated above, this area of Orange County was settled by the ancestors of the Juaneño and Gabrieleño/Tongva and continues to be inhabited by their descendants today. Therefore, there is always the possibility that undiscovered intact cultural resources, including tribal cultural resources eligible for the CRHR or a local register, may be present below the surface in native sediments.

Given the lack of evidence of known resources at the proposed Project sites, the City's assessment is that the impacts would be less than significant, however, the City will implement MM 18-1, MM 18-2, and MM 18-3 to address the Tribe's concerns during construction activities.

### **Mitigation Program**

The following mitigation measure is required for the Willow Park, Downtown, Katella Avenue, Brookhurst, and Santa Cruz Sites to reduce impacts to less than significant levels and they will be incorporated into the Mitigation Program for this IS/MND.

**MM 18-1** Prior to the commencement of any grading and/or construction activity, the Contractor shall retain a qualified Native American Monitor (Tribal Monitor) acceptable to the Juaneño Band of Mission Indians, Acjachemen Nation-Belardes (the Tribe). The Contractor shall invite representatives from the Tribe to attend a construction kickoff meeting. The Tribal representatives may use this meeting to present information to the Contractor about identifying and protecting any tribal cultural resources that may be encountered when monitoring is not required. The Tribal Monitor will only be present on-site during the construction phases that involve ground-disturbing activities within undisturbed native sediments during activities subject to the grading plans associated with the Project's grading permit. Ground disturbing activities may include, activities such as potholing or auguring, boring, grading, excavation, and trenching, within the Project site. Monitoring shall not be required while drilling the water wells at the Santa Cruz Site. The Tribal Monitor will complete daily monitoring logs that will provide descriptions of the day's activities, including construction activities, locations, soil, and any cultural materials identified. The on-site monitoring shall end when the Project site grading and excavation activities are completed, or when the Tribal Representatives or Tribal Monitor have indicated that the Project site has a low potential for impacting archaeological or tribal cultural resources. Construction may proceed without monitoring if the Tribe fails to commit a tribal monitor/consultant that can accommodate the project schedule within fourteen (14) days of the notice to proceed.

**MM 18-2** Prior to the commencement of any grading and/or construction activity, the Contractor shall retain a qualified Native American Monitor (Tribal Monitor) acceptable to the Gabrieleno Band of Mission Indians – Kizh Nation (the Tribe). The Contractor shall invite representatives from the Tribe to attend a construction kickoff meeting. The Tribal representatives may use this meeting to present information to the Contractor about identifying and protecting any tribal cultural resources that may be encountered when monitoring is not required. The Tribal Monitor will only be present on-site during the construction phases that involve

ground-disturbing activities within undisturbed native sediments during activities subject to the grading plans associated with the Project's grading permit. Ground disturbing activities may include activities such as potholing or auguring, boring, grading, excavation, and trenching, within the Project site. Monitoring shall not be required while drilling the water wells at the Santa Cruz Site. The Tribal Monitor will complete daily monitoring logs that will provide descriptions of the day's activities, including construction activities, locations, soil, and any cultural materials identified. The on-site monitoring shall end when the Project site grading and excavation activities are completed, or when the Tribal Representatives or Tribal Monitor have indicated that the Project site has a low potential for impacting archaeological or tribal cultural resources. Construction may proceed without monitoring if the Tribe fails to commit a tribal monitor/consultant that can accommodate the project schedule within fourteen (14) days of the notice to proceed.

**MM 18-3** Upon discovery of any Tribal Cultural Resources, construction activities shall cease in the immediate vicinity of the find (not less than the surrounding 100 feet) until the find can be assessed. All Tribal Cultural Resources unearthed by project construction activities shall be evaluated by a qualified archaeologist meeting the Secretary of Interior standards and the Tribal Monitor. If the resources are Native American in origin, the Project Archaeologist and the Tribal Monitor shall notify the City and any other Tribes participating in monitoring that has been identified by the NAHC as being affiliated with the area, regarding treatment and curation of these resources.

Typically, the Tribes will retain it/them in the form and/or manner the Tribe deems appropriate for educational, cultural, and/or historic purposes. If human remains and/or grave goods are discovered or recognized at the Project site, all ground disturbance shall immediately cease, and the county coroner shall be notified per Public Resources Code Section 5097.98, and Health & Safety Code Section 7050.5. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2). Work may continue on other parts of the Project Site while evaluation and, if necessary, mitigation takes place (CEQA Guidelines Section 15064.5[f]).

If a non-Native American resource is determined by the Project Archaeologist to constitute a "historical resource" or "unique archaeological resource", time and funding sufficient to allow for implementation of avoidance measures, or appropriate mitigation, must be available. The treatment plan established for the resources, shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and PRC Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. Any historic archaeological material that is not Native American in origin shall be curated at a public, non-profit institution with a research interest in the materials, such as the Cooper Center, Natural History Museum of Los Angeles County, or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the archaeological material, it shall be offered to a local school or historical society in the area for educational purposes.

## **XIX. UTILITIES AND SERVICE SYSTEMS**

**Question A:** *Would the project require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?*

**Less Than Significant Impact.** Proposed Project activities include minor electrical upgrades, such as installing new transformers, switchgear, and larger-capacity electrical cabinets to accommodate the new pumping equipment. However, the proposed Project would access existing electrical lines and would not require upgrading distribution electrical equipment or other utility services. Impacts would be less than significant, and no mitigation is required.

**Question B:** *Would the project have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years (including large-scale developments as defined by Public Resources Code Section 21151.9 and described in Question No. 20 of the Environmental Information Form)?*

**Less Than Significant Impact.** The proposed Project would be implemented to return existing groundwater wells to active use and install two new water wells. The groundwater basin is actively managed by OCWD (OCWD 2015). Groundwater extraction rates are reported to OCWD to ensure the groundwater basin is not over-extracted. The proposed Project would be implemented for improved reliability of the water system and to serve existing customers. The Project would reduce reliance on distant water sources supplied by Metropolitan Water District. Impacts would be less than significant, and no mitigation is required.

**Question C:** *Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?*

**Less Than Significant Impact.** It is anticipated that most stormwater and other discharges permitted to flow to the storm drain system from the Project sites would be conveyed to existing storm drains and flood control channels as allowed by an existing NPDES permit (Order 2014-0194-DWQ). The volume of wastewater would be consistent with the existing conditions. Additionally, the onsite sewer system connections will be built in accordance with State and local building and plumbing codes and impacts would be less than significant. No mitigation is required.

**Question D:** *Would the project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?*

**Less Than Significant Impact.** The proposed Project would generate temporary construction debris such as concrete, asphalt, and other miscellaneous materials. These materials would be recycled and salvaged to the extent practicable, but some material will require transportation and disposal at landfills or other disposal sites. Daily operation of the sites would result in minor amount of generated waste. Impacts would be less than significant, and no mitigation is required.

**Question E: *Would the project comply with Federal, State, and local management and reduction statutes and regulations related to solid waste?***

**Less Than Significant Impact.** The proposed Project would generate temporary construction debris such as concrete, asphalt, and other miscellaneous materials. The Project would be required to follow all federal, State, and local management and reduction statutes and regulations. Spent resin waste would be characterized and handled and transported in accordance with USEPA and DTSC requirements. Complying with existing laws and regulations would result in the impacts being less than significant and no mitigation is required.

**Question F: *Would the project result in a need for new systems or supplies, or substantial alterations related to electricity?***

**Less Than Significant Impact.** Electricity for the proposed Project would be provided by the APU's Electric Services Division. The APU's distribution system consists of aboveground and underground transmission and distribution lines and several substations located throughout the City. APU has confirmed that it is capable of meeting the future demands generated by the proposed Project (Sanks 2021b). Although a significant impact would not occur, adherence to RR 19-1 would ensure that no impacts would occur.

**Question G: *Would the project result in a need for new systems or supplies, or substantial alterations related to natural gas?***

**Less Than Significant Impact.** The Southern California Gas Company (SCGC) currently provides natural gas service to the City of Anaheim, including the Project sites (SCGC 2021). The service would be provided in accordance with SCGC's policies and extension rules on file with the California Public Utilities Commission. Therefore, a significant impact related to the need for new systems or supplies or substantial alterations related to natural gas would not occur. Although a significant impact would not occur, adherence to PDF 19-1 would ensure that no impacts would occur.

**Question H: *Result in a need for new systems or supplies, or substantial alterations related to telephone service?***

**No Impact.** The proposed Project involves construction of groundwater treatment plants and ancillary facilities at five separate sites throughout the City. Development of the Project would not create an increase in the demand on the telephone service system. No impact would occur, and no mitigation is required.

**Question I: *Would the project result in a need for new systems or supplies, or substantial alterations related to television service/reception?***

**No Impact.** The proposed Project involves construction of groundwater treatment plants and ancillary facilities at five separate sites throughout the City. Development of the Project would not create an increase in the demand on television service/reception. No impact would occur, and no mitigation is required.

## **Mitigation Program**

### ***Regulatory Requirement***

The following regulatory requirement will be incorporated into the Mitigation Program for this IS/MND.

- RR 19-1** Prior to approval of the grading permit and throughout the construction process, the Contractor shall coordinate with all utility providers to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services.

### **Mitigation Measures**

No mitigation is required.

## **XX. WILDFIRE**

***If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:***

***Question A: Would the project Substantially impair an adopted emergency response plan or emergency evacuation plan?***

***Question B: Would the project due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?***

***Question C: Would the project require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?***

***Question D: Would the project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?***

**No Impact.** The Project sites are located in highly urbanized areas of the City, and there are no large, undeveloped areas and/or steep slopes on or near the sites that may pose wildfire hazards. The sites and the surrounding areas are not located in designated VHFHSZ, as identified by CalFire or Special Protection Areas designated in the City General Plan (Anaheim 2004a; CalFire 2011). Rather, the sites are within a Non-VHFHSZ area. Implementation of the proposed Project would not expose people or structures directly or indirectly to a significant risk of loss or death associated wildland fires. No impact would occur, and no mitigation is required.

## **Mitigation Program**

No mitigation is required.

## XXI. MANDATORY FINDINGS OF SIGNIFICANCE

**Question A:** *Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?*

**Less Than Significant Impact with Mitigation.** There are no sensitive biological resources, habitats, or species on the Project sites that would be affected by the proposed Project. Migratory birds that may nest on the Project sites would be protected by compliance with MM 4-1. Impacts on migratory birds would be less than significant after mitigation.

Due to the location of the Project sites in a developed, urban area that has been subjected to previous disturbance related to urban development, the potential for discovery of archaeological resources, disturbances of human resources, or paleontological resources is low and development of the proposed Project is not expected to uncover any archaeological resources, human resources, or paleontological. However, mitigation is incorporated into the proposed Project and outlines steps to take if archaeological resources (MM 5-1) or paleontological resources (MM 6-3) are discovered during construction. In addition, a Native American monitor will be retained to observe grading activities in native sediment and to recover and catalogue tribal cultural resources as necessary (MM 18-1). Implementation of MM 5-1 (archaeological resources), MM 6-3 (paleontological resources), and MM 18-1 (tribal cultural resources) would reduce potential impacts to less than significant.

**Question B:** *Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?*

**Less Than Significant Impact with Mitigation.** As identified in the preceding analysis provided in Section 5 of this IS/MND, all project-level impacts have been determined to be less than significant or mitigated to a level considered less than significant. Specifically, the following mitigation measures as previously identified throughout this document would apply to reduce the proposed Project's impacts to less than significant levels: MM 4-1 previously identified in Section IV, Biological Resources; MM 5-1 previously identified in Section V, Cultural Resources; MM 6-1 previously identified in Section VII, Geology and Soils; MMs 13-1 through 13-5 previously identified in Section XIII, Noise; and MMs 18-1 through 18-3 previously identified in Section XVIII, Tribal Cultural Resources. Thus, the proposed Project's impacts would be limited and its contribution to cumulative impacts would not be cumulatively considerable.

**Question C:** *Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?*

**Less Than Significant Impact With Mitigation.** Based on the preceding analysis provided in Section 5.0, Environmental Evaluation, of this IS, implementation of the proposed Project, as described in Section 3.0, Project Description, with adherence to applicable regulatory requirements, would have no impact or less than significant impacts for the following environmental issue areas: aesthetics; agriculture and forestry resources; air quality; energy; greenhouse gas emissions; hazards and hazardous materials; hydrology and water quality; land

use and planning; mineral resources; population and housing; public services; recreation; transportation/traffic; utilities and service systems; and wildfire.

The proposed Project's impacts on the following issue areas would be less than significant with the implementation of project-specific mitigation measures: biological resources; cultural resources; geology and soils; noise; and tribal cultural resources. All impacts would be less than significant after mitigation.

Thus, the proposed Project would not result in environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly, with the implementation of mitigation measures. All impacts would be less than significant after mitigation.

## SECTION 6.0 PREPARERS

### City of Anaheim, Public Utilities Department

Environmental Services and Safety Manager ..... Jonathan Sanks  
Water Capital Projects Manager ..... Jacob Hester  
Principal Engineer ..... Divya Agrawalla

### Psomas (Environmental Document Preparation)

### **AIR QUALITY AND GREENHOUSE GAS EMISSIONS ANALYSES**

July 22, 2021

Jonathan Sanks  
Environmental Services and Safety Manager  
City of Anaheim, Public Utilities Department  
201 South Anaheim Boulevard, Suite 1101  
Anaheim, California 92805

**VIA EMAIL**  
**JSanks@anaheim.net**

**Subject:** Revised Air Quality and Greenhouse Gas Emissions Analyses Technical Memorandum for the Groundwater Treatment Plants Phase B and Groundwater Supply Wells

Dear Mr. Sanks:

This Letter Report presents the results of the air quality and greenhouse gas (GHG) emissions analyses for the proposed Groundwater Treatment Plants Phase B and Groundwater Supply Wells in the City of Anaheim, California (hereinafter referred to as the “Project”). This analysis addresses the potential air quality impacts associated with the Project in accordance with the California Environmental Quality Act (CEQA) (California Public Resources Code §21000 et seq.) and the State CEQA Guidelines (California Code of Regulations, Title 14, §15000 et seq.).

## **PROJECT SETTING AND DESCRIPTION**

The proposed Project would include the construction of ion-exchange groundwater treatment, production, and distribution facilities at five separate sites in the City of Anaheim. The Project site locations are shown on Exhibits 1a through 1e, Regional Location and Local Vicinity, and are described in more detail below. The proposed Project would install water treatment facilities at five sites. The number and size of vessels at each treatment site will depend on the volume of water requiring treatment at each location. While estimated dimensions are included in this technical report, exact sizes may vary to ensure the treatment systems can adequately supply the necessary volume of water. To ensure continuous availability of water, the treatment systems would operate up to 24 hours per day. To most efficiently distribute the treated water, two new water supply wells would be installed at the Santa Cruz Site, and additional wells would be rehabilitated to improve their water production capacity.

### **Environmental Setting and Descriptions**

#### ***Willow Park Site***

The Willow Park Site is an approximate one-acre disturbed site occupied by an existing public restroom facility and utility building. The site is located within Willow Park, which contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. Single-family residential uses are located in the immediate area, across Crone Avenue and Loara Street from the park and immediately adjacent to the park to the west. The Project includes installation of a groundwater treatment plant north of an existing Anaheim Public Utilities (APU) water supply well site at the Willow Park Site.

Jonathan Sanks  
July 22, 2021  
Page 2

***Downtown Site***

The Downtown Site is located on the corner of Ellsworth Avenue and Claudina Street, in the vicinity of an existing APU substation. The site is 0.7 acres in size and is currently occupied by an APU building and public surface parking lot that primarily serves the Anaheim Packing District, Farmer's Park, and Anaheim Brewery, as well as other dining and retail areas along Anaheim Boulevard. Other immediately adjacent uses include multi-family residences to the west as well as single-family residences across Ellsworth Avenue and Claudina Street. The Project includes installation of a groundwater treatment plant at the Downtown site.

***Katella Avenue Site***

The Katella Avenue Site, located south of Katella Avenue and west of the railroad tracks, is an approximately 0.6-acre site that is fully disturbed and paved, and is located north and west of the Angel Stadium parking lot, and north and east of The Grove of Anaheim and associated existing tennis courts and proximate to other park uses. The Project includes installation of a groundwater treatment plant at the Katella Avenue Site.

***Brookhurst Site***

The Brookhurst Site is located within an electrical easement, east of Brookhurst Street and north of railroad tracks. The site has been subject to historic disturbance and is currently occupied by a small utility building, gravel parking area, and ornamental landscaping, including palms and other ornamental trees. The Project includes installation of a groundwater treatment plant at an existing well site.

***Santa Cruz Site***

The Santa Cruz Site is located along Anaheim Way and Santa Cruz Street. The 3.3-acre site consists of bare ground and is located west of Interstate 5. The site also extends along Anaheim Way and west along and within the right-of-way of Orangewood Avenue. The Project includes installation of a groundwater treatment plant and two new water supply wells, and the extension of approximately one mile of pipeline beneath Anaheim Way and Orangewood Avenue at the Santa Cruz site.

**AIR QUALITY ANALYSIS**

Relevant elements of the proposed Project related to the analysis of potential air quality impacts include the construction and operation of water treatment facilities at five different site locations. This includes (1) well drilling; (2) grading; (3) building construction; and (4) well rehabilitation.

The Project site is located in the Orange County portion of the South Coast Air Basin (SoCAB), and, for air quality regulation and permitting, is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is a 6,600-square-mile area bound by the Pacific Ocean to the west; the San Gabriel, San Bernardino, and San Jacinto Mountains to the north and east; and the San Diego County line to the south. The SoCAB includes all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties, in addition to the San Geronimo Pass area of Riverside County. The SoCAB's terrain and geographical location (i.e., a coastal plain with connecting broad valleys and low hills) determine its distinctive semi-arid climate, which is characterized by moderate temperatures, oceanic influence, and precipitation that is limited to a few storms during the winter (i.e., November through April).

Air quality data for the Project site is represented by the Anaheim-Pampas Lane monitoring station located at 1630 West Pampas Lane, Anaheim. Pollutants measured at the Anaheim-Pampas Lane Monitoring Station include ozone (O<sub>3</sub>), respirable particulate matter with a diameter of 10 microns or less (PM<sub>10</sub>), fine particulate matter with a diameter of 2.5 microns or less (PM<sub>2.5</sub>), and nitrogen dioxide (NO<sub>2</sub>). The monitoring data presented in Table 1, Air Quality Levels Measured at the Anaheim-Pampas Lane Monitoring Station, were obtained from the California Air Resources Board (CARB; CARB 2021a). Federal and State air quality standards are presented with the number of times those standards were exceeded.

Pollutant	California Standard	National Standard	Year	Max. Level	Days State Standard Exceeded	Days National Standard Exceeded
O <sub>3</sub> (1 hour)	0.09 ppm	None	2017	0.090	0	0
			2018	0.112	1	1
			2019	0.096	1	1
O <sub>3</sub> (8 hour)	0.070 ppm	0.070 ppm	2017	0.076	4	4
			2018	0.071	1	1
			2019	0.082	1	1
PM10 (24 hour)	50 µg/m <sup>3</sup>	150 µg/m <sup>3</sup>	2017	95.7	5	0
			2018	94.6	2	0
			2019	127.1	4	0
PM10 (AAM)	20 µg/m <sup>3</sup>	None	2017	—	—	—
			2018	—	—	—
			2019	—	—	—
NO <sub>2</sub> (1 Hour)	0.18 ppm	0.100 ppm	2017	0.081	0	0
			2018	0.066	0	0
			2019	0.059	0	0
PM2.5 (24 Hour)	None	35 µg/m <sup>3</sup>	2017	56.2	N/A	7
			2018	68.0	N/A	7
			2019	37.1	N/A	4

—: Data Not Reported or insufficient data available to determine the value; O<sub>3</sub>: ozone; ppm: parts per million; PM10: respirable particulate matter with a diameter of 10 microns or less; µg/m<sup>3</sup>: micrograms per cubic meter; AAM: Annual Arithmetic Mean; NO<sub>2</sub>: nitrogen dioxide; PM2.5: fine particulate matter with a diameter of 2.5 microns or less. N/A indicates that there is no applicable standard.

<sup>a</sup> California maximum levels were used.

## **Regulatory Background**

### ***Pollutants and Standards***

The U.S. Environmental Protection Agency (USEPA) defines seven criteria air pollutants: O<sub>3</sub>, carbon monoxide (CO), NO<sub>2</sub>, sulfur dioxide (SO<sub>2</sub>), PM<sub>10</sub>, PM<sub>2.5</sub>, and lead. These pollutants are called criteria pollutants because the USEPA has established National Ambient Air Quality Standards (NAAQS) for the concentrations of these pollutants (USEPA 2021a). CARB has also established standards for the criteria pollutants, known as California Ambient Air Quality Standards (CAAQS), and the State standards are generally more restrictive than the NAAQS. When a region has air quality that fails to meet the standards, the USEPA and the CARB designate the region as “nonattainment” and the regional air quality agency must develop plans to attain the standards. The following are the criteria pollutants and their health effects.

- O<sub>3</sub> is a nearly colorless gas that is formed by photochemical reaction (when nitrogen dioxide is broken down by sunlight). Ground-level O<sub>3</sub> exposure can cause a variety of health problems, including lung irritation, wheezing, coughing, pain when taking a deep breath, and breathing difficulties during exercise or outdoor activities; permanent lung damage; aggravated asthma; and increased susceptibility to respiratory illnesses.
- CO is a colorless and odorless toxic gas which, in the urban environment, is associated primarily with the incomplete combustion of fossil fuels in motor vehicles. CO combines with hemoglobin in the bloodstream and reduces the amount of oxygen that can be circulated through the body. High CO concentrations can lead to headaches, aggravation of cardiovascular disease, and impairment of central nervous system functions.
- Nitrogen oxides (NO<sub>x</sub>) are yellowish-brown gases, which at high levels can cause breathing difficulties. NO<sub>x</sub> are formed when nitric oxide (a pollutant from internal combustion processes) combines with oxygen.
- Sulfur dioxide (SO<sub>2</sub>) is a colorless, pungent gas formed primarily by the combustion of sulfur-containing fossil fuels. Health effects include acute respiratory symptoms and difficulty in breathing for children.
- PM<sub>10</sub> and PM<sub>2.5</sub> refer to particulate matter less than ten microns and two and one-half microns in diameter, respectively. Particulates of this size cause a greater health risk than larger-sized particles since fine particles can more easily cause irritation. Particulate matter includes both aerosols and solid particles. An example of particulate matter is fugitive dust. Short-term exposure to high PM<sub>2.5</sub> levels is associated with premature mortality and increased hospital admissions and emergency room visits. Long-term exposure to high PM<sub>2.5</sub> levels is associated with premature mortality and development of chronic respiratory disease. Short-term exposure to high PM<sub>10</sub> levels is associated with hospital admissions for cardiopulmonary diseases, increased respiratory symptoms, and possible premature mortality.

Jonathan Sanks  
July 22, 2021  
Page 5

Based on monitored air pollutant concentrations, the USEPA and the CARB designate an area's status in attaining the NAAQS and the CAAQS, respectively, for selected criteria pollutants. These attainment designations are shown in Table 2. As identified in Table 2, Orange County is located in a nonattainment area for O<sub>3</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>.

**TABLE 2**  
**ATTAINMENT STATUS OF CRITERIA POLLUTANTS**  
**IN THE SOUTH COAST AIR BASIN**

Pollutant	State	Federal
O <sub>3</sub> (1 hour)	Nonattainment	No standards
O <sub>3</sub> (8 hour)	Nonattainment	Nonattainment
PM <sub>10</sub>	Nonattainment	Attainment/Maintenance
PM <sub>2.5</sub>	Nonattainment	Nonattainment
CO	Attainment	Attainment/Maintenance
NO <sub>2</sub>	Attainment	Attainment/Maintenance
SO <sub>2</sub>	Attainment	Attainment
Lead	Attainment	Attainment/Nonattainment*
All others	Attainment/Unclassified	No standards
<p>O<sub>3</sub>: ozone; PM<sub>10</sub>: respirable particulate matter 10 microns or less in diameter; PM<sub>2.5</sub>: fine particulate matter 2.5 microns or less in diameter; CO: carbon monoxide; NO<sub>2</sub>: nitrogen dioxide; SO<sub>2</sub>: sulfur dioxide; SoCAB: South Coast Air Basin.</p> <p>* Los Angeles County is classified nonattainment for lead; the remainder of the SoCAB is in attainment of the State and federal standards.</p> <p>Source: SCAQMD 2016</p>		

CARB, a part of the California Environmental Protection Agency, is responsible for coordinating and administering both the federal and State air pollution control programs in California. In this capacity, CARB conducts research, sets the CAAQS (as shown in Table 3), compiles emission inventories, develops suggested control measures, oversees local programs, and prepares the State Implementation Plan (SIP). For regions that do not attain the CAAQS, CARB requires the air districts to prepare plans for attaining the standards. These plans are then integrated into the SIP. CARB establishes emissions standards for (1) motor vehicles sold in California, (2) consumer products (e.g., hair spray, aerosol paints, barbecue lighter fluid), and (3) various types of commercial equipment. It also sets fuel specifications to further reduce vehicular emissions.

The SCAQMD was established in 1977 by merging the individual air pollution control districts of the four counties within the SoCAB: Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties. The SCAQMD and the Southern California Association of Governments (SCAG), in coordination with local governments and the private sector, develop the Air Quality Management Plan (AQMP) for the SoCAB to satisfy these requirements. The AQMP is the most important air management document for the SoCAB because it provides the blueprint for meeting State and federal ambient air quality standards.

On November 28, 2007, CARB submitted a SIP revision to the USEPA for O<sub>3</sub>, PM<sub>2.5</sub> (1997 Standard), CO, and NO<sub>2</sub> in the SoCAB. This revision is identified as the "2007 South Coast SIP". The 2007 South Coast SIP demonstrates attainment of the federal PM<sub>2.5</sub> standard in the SoCAB by 2014, and attainment of the federal 8-hour O<sub>3</sub> standard by 2023. This SIP also includes a request to reclassify the O<sub>3</sub> attainment designation from "severe" to "extreme". The USEPA approved the redesignation effective June 4, 2010.

Jonathan Sanks  
July 22, 2021  
Page 6

The “extreme” designation requires the attainment of the 8-hour O<sub>3</sub> standard in the SoCAB by June 2024. CARB approved PM<sub>2.5</sub> SIP revisions in April 2011, and the O<sub>3</sub> SIP revisions in July 2011. The USEPA approved the PM<sub>2.5</sub> SIP on September 25, 2013, and has approved 47 of the 62 1997 8-hour O<sub>3</sub> SIP requirements (USEPA 2016). On November 30, 2014, the USEPA proposed a finding that the SoCAB has attained the 1997 PM<sub>2.5</sub> standards (USEPA 2014). The comment period closed on January 22, 2015; no subsequent action has been taken.

On September 30, 2015, the USEPA proposed to approve elements of the South Coast 2012 PM<sub>2.5</sub> Plan and 2015 Supplement, which addresses Clean Air Act requirements for the 2006 PM<sub>2.5</sub> NAAQS, and proposed to reclassify the area as a “serious” nonattainment area for the 2006 PM<sub>2.5</sub> standard. The reclassification is based on the determination that the area cannot practicably attain the 2006 PM<sub>2.5</sub> NAAQS by the moderate area attainment date (December 31, 2015). On December 22, 2015, the EPA reclassified the South Coast area as a “Serious” nonattainment area for the 2006 PM<sub>2.5</sub> standard. The final reclassification requires the State to submit a “serious area” plan that provides for attainment of the 2006 PM<sub>2.5</sub> NAAQS as expeditiously as practicable as and no later than December 31, 2019 (USEPA 2016). On December 4, 2020, the SCAQMD adopted the *South Coast Air Basin Attainment Plan for 2006 24-Hour PM<sub>2.5</sub> Standard* (Plan) to meet the Clean Air Act requirements. CARB was scheduled to consider adopting the Plan on December 10, 2020, for submittal into the California SIP. However, this item has been moved to the February 25, 2021 CARB meeting (CARB 2021b).

<sup>a</sup> <i>National Primary Standards</i> : The levels of air quality necessary, within an adequate margin of safety, to protect the public health.				
<sup>b</sup> <i>National Secondary Standards</i> : The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.				
Note: More detailed information in the data presented in this table can be found at the CARB website ( <a href="http://www.arb.ca.gov">www.arb.ca.gov</a> ).				
Source: CARB 2016				

On March 3, 2017, the SCAQMD adopted the 2016 AQMP, which is a regional and multi-agency effort (SCAQMD, CARB, SCAG, and USEPA). The 2016 AQMP incorporates the latest scientific and technical information and planning assumptions, including the SCAG 2016–2040 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS); updated emission inventory methodologies for various source categories; and SCAG’s latest growth forecasts. The main purpose of an AQMP is to bring an area into compliance with the requirements of federal and State air quality standards. For a project to be consistent with the AQMP, the pollutants emitted from the project should not (1) exceed the SCAQMD CEQA air quality significance thresholds or (2) conflict with or exceed the assumptions in the AQMP.

On October 1, 2015, the USEPA strengthened the NAAQS for ground-level ozone, lowering the primary and secondary ozone standard levels to 70 parts per billion. The South Coast Air Basin is classified as an “extreme” non-attainment area for the 2015 Ozone NAAQS. The 2022 AQMP will be developed to address the requirements for meeting this standard. The 2022 AQMP will represent a comprehensive analysis of emissions, meteorology, regional air quality modeling, regional growth projections, and the impact of existing and proposed control measures (SCAQMD 2021).

### ***Sensitive Air Quality Receptors***

Sensitive receptors include, but are not limited to, children, the elderly, persons with preexisting respiratory or cardiovascular illness, and athletes and others who engage in frequent exercise. These sensitive receptors include, but are not limited to, schools, parks, hospitals, high-density residential areas, and convalescent homes.

The buildings and structures that immediately surround the five Project site locations include park and recreational uses, single- and multi-family residential uses, City buildings, among others.

### **Air Quality Impact Analysis**

#### ***Thresholds of Significance***

The SCAQMD's Air Quality Analysis Handbook (CEQA Handbook) provides significance thresholds for both construction and operation of projects within the SCAQMD's jurisdictional boundaries (SCAQMD 2019). The SCAQMD recommends that projects be evaluated in terms of the quantitative thresholds established to assess both the regional and localized impacts of project-related air pollutant emissions. The City of Anaheim uses the current SCAQMD thresholds to determine whether a proposed project would have a significant impact. These SCAQMD thresholds are identified in Table 4.

**TABLE 4**  
**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**AIR QUALITY SIGNIFICANCE THRESHOLDS**

Mass Daily Thresholds <sup>a</sup>		
Pollutant	Construction	Operation
NOx	100 lbs/day	55 lbs/day
VOC	75 lbs/day	55 lbs/day
PM10	150 lbs/day	150 lbs/day
PM2.5	55 lbs/day	55 lbs/day
SOx	150 lbs/day	150 lbs/day
CO	550 lbs/day	550 lbs/day
Lead	3 lbs/day	3 lbs/day
TACs, Odor, and GHG Thresholds		
TACs (including carcinogens and non-carcinogens)	Maximum Incremental Cancer Risk ≥ 10 in 1 million Cancer Burden > 0.5 excess cancer cases (in areas ≥ 1 in 1 million) Chronic & Acute Hazard Index ≥ 1.0 (project increment)	
Odor	Project creates an odor nuisance pursuant to SCAQMD Rule 402	
GHG	10,000 MT/yr CO <sub>2</sub> e for industrial facilities	
Ambient Air Quality Standards for Criteria Pollutants <sup>b, c</sup>		
NO <sub>2</sub>  1-hour average annual arithmetic mean	SCAQMD is in attainment; project is significant if it causes or contributes to an exceedance of the following attainment standards:  0.18 ppm (State) 0.03 ppm (State) and 0.0534 ppm (federal)	
PM10  24-hour average annual average	10.4 µg/m <sup>3</sup> (construction) <sup>c</sup> & 2.5 µg/m <sup>3</sup> (operation) 1.0 µg/m <sup>3</sup>	
PM2.5 24-hour average	10.4 µg/m <sup>3</sup> (construction) <sup>c</sup> & 2.5 µg/m <sup>3</sup> (operation)	
SO <sub>2</sub> 1-hour average 24-hour average	0.25 ppm (State) & 0.075 ppm (federal – 99 <sup>th</sup> percentile) 0.04 ppm (State)	
Sulfate 24-hour average	25 µg/m <sup>3</sup> (State)	
CO  1-hour average 8-hour average	SCAQMD is in attainment; project is significant if it causes or contributes to an exceedance of the following attainment standards:  20.0 ppm (State) and 35 ppm (federal) 9.0 ppm (State/federal)	
Lead 30-day average Rolling 3-month average	1.5 µg/m <sup>3</sup> (State) 0.15 µg/m <sup>3</sup> (federal)	
NOx: nitrogen oxides; lbs/day: pounds per day; VOC: volatile organic compound; PM10: respirable particulate matter with a diameter of 10 microns or less; PM2.5: fine particulate matter with a diameter of 2.5 microns or less; SOx: sulfur oxides; CO: carbon monoxide; TACs: toxic air contaminants; GHG: greenhouse gases; MT/yr CO <sub>2</sub> e: metric tons per year of carbon dioxide equivalents; NO <sub>2</sub> : nitrogen dioxide; ppm: parts per million; µg/m <sup>3</sup> : micrograms per cubic meter; SCAQMD: South Coast Air Quality Management District.

Page 10

The following questions correspond to the questions in the Air Quality section of the Initial Study Checklist in Appendix G of the State CEQA Guidelines.

**Question AQ-1      Would the Project conflict with or obstruct implementation of the applicable air quality plan?**

**Less Than Significant Impact.** The SCAQMD develops rules and regulations; establishes permitting requirements for stationary sources; inspects emissions sources; and enforces such measures through educational programs or fines, when necessary. The SCAQMD is directly responsible for reducing emissions from stationary (area and point), mobile, and indirect sources. It has responded to this requirement by preparing a sequence of AQMPs.

On March 3, 2017, the SCAQMD adopted the 2016 AQMP, which is a regional and multi-agency effort (SCAQMD, CARB, Southern California Association of Governments [SCAG], and the USEPA. The 2016 AQMP incorporates the latest scientific and technical information and planning assumptions, including the 2016–2040 RTP/SCS; updated emission inventory methodologies for various source categories; and SCAG’s latest growth forecasts. The main purpose of an AQMP is to bring an area into compliance with the requirements of federal and State air quality standards.

The two principal criteria for conformance to an AQMP are the following:

1. Whether the project would result in an increase in the frequency or severity of existing air quality violations; cause or contribute to new violations; or delay timely attainment of air quality standards and
2. Whether the project would exceed the assumptions in the AQMP.

With respect to the first criterion, the analysis and response to Question AQ-2 below demonstrates that the Project would not (1) generate short-term or long-term emissions of volatile organic compounds (VOCs), oxides of nitrogen [NO<sub>x</sub>, which are O<sub>3</sub> precursors], or PM<sub>2.5</sub> that could potentially cause an increase in the frequency or severity of existing air quality violations; (2) cause or contribute to new violations; or (3) delay timely attainment of air quality standards.

With respect to the second criterion, the Project would not increase or modify SCAG’s population, housing, or employment projections. The Project would accommodate the projected growth in population accounted for in the 2016 AQMP emissions forecast and would provide additional water conveyance capacity and water treatment to serve the potable water demands of local communities. Therefore, the Project would be consistent with the region’s AQMP. There would be a less than significant impact.

**Question AQ-2      Would the Project result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is in non-attainment under an applicable federal or State ambient air quality standard?**

**Less than Significant Impact.** A project may have a significant impact where project-related emissions would exceed federal, State, or regional standards or thresholds, or where project-related emissions would substantially contribute to an existing or projected air quality violation. As identified in Table 2, Orange County is a nonattainment area for O<sub>3</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>. The Project would generate PM<sub>10</sub>, PM<sub>2.5</sub>, NO<sub>2</sub>, and O<sub>3</sub> precursors (NO<sub>x</sub> and VOC) during short-term construction and long-term operations. The SCAQMD has developed construction and operations thresholds to determine whether projects would considerably contribute toward a violation of ambient air quality standards. A project with daily emission rates below the SCAQMD’s established air quality significance thresholds (shown in Table 4) would have

Jonathan Sanks  
July 22, 2021  
Page 11

a less than significant effect on regional air quality. Project emissions were estimated using the California Emissions Estimator Model (CalEEMod) version 2016.3.2 computer program (CAPCOA 2017). CalEEMod is designed to model construction and operational emissions for land development projects and allows for the input of project- and county-specific information. CalEEMod modeling results can be found in Attachment A.

#### Construction Emissions

Air pollutant emissions would occur from construction equipment exhaust, grading; exhaust and particulate emissions from trucks hauling building materials to and from the Project site; from automobiles and light trucks driven to and from the Project site by construction workers; and VOCs from minor painting and asphalt paving operations. The proposed Project would comply with applicable SCAQMD rules and regulations, including Rule 403 for fugitive dust control and Rule 1113 for architectural coatings. Rule 403 measures include regular watering of active grading areas and unpaved roads, limiting vehicle speeds on unpaved surfaces, stabilizing stockpiled earth, and curtailing grading operations during high wind conditions. Watering of active grading areas is included in the CalEEMod emissions analysis and results in reduced PM10 and PM2.5 emissions. It should be noted that some Project requirements and features (such as watering grading areas), although required Project elements, are input into CalEEMod as mitigation measures purely as a function of the format of the program. The emission reductions associated with compliance with this Rule have been included in the emissions calculations.

#### Regional Emissions Thresholds – Maximum Daily Regional Emissions

The analysis examines the emissions from construction activities at the five Project locations that would contribute to the region's air pollutant burden. The equipment assumptions and timeframe were provided by Anaheim Public Utilities Department (APUD) and are included in the CalEEMod modeling results. The highest daily emissions for each site are presented in Table 5. The total emissions from all the daily construction activities for the five Project locations were summed and compared against the SCAQMD's regional emissions thresholds. As shown in Table 5, regional emissions for all criteria pollutants would be less than their daily regional thresholds. Therefore, Project related contributions to regional air quality impacts are less than significant.

**TABLE 5**  
**ESTIMATED MAXIMUM DAILY REGIONAL CONSTRUCTION EMISSIONS**

Note: Numbers may not add due to rounding. Source: CalEEMod data in Attachment A.						

#### Construction-Phase Localized Significance Thresholds

In addition to the mass daily emissions thresholds established by the SCAQMD, short-term local impacts to nearby sensitive receptors from on-site emissions of NO<sub>2</sub>, CO, PM10, and PM2.5 are examined based on SCAQMD's localized significance threshold (LST) methodology. To assess local air quality impacts for development projects without complex dispersion modeling, the SCAQMD developed screening (lookup) tables to assist lead agencies in evaluating impacts.

The LST method is recommended to be limited to projects that are five acres or less. For the purposes of an LST analysis, the SCAQMD considers receptors where it is possible that an individual could remain for 1 hour for NO<sub>2</sub> and CO exposure and 24 hours for PM10 and PM2.5 exposure. The emissions limits in the lookup tables are based on the SCAQMD's Ambient Air Quality Standards (SCAQMD 2016). The emissions screening thresholds used in this analysis are for receptors within 25 meters (82 feet)<sup>1</sup> of the Project site; the thresholds for receptors farther away would be higher, and the Project emissions would be a smaller fraction of the thresholds.

Table 6, Construction-Phase Localized Significance Threshold Emissions shows the maximum daily on-site emissions for construction activities compared with the SCAQMD LST screening thresholds. The localized emissions at each Project site are assessed at each individual Project site to determine potential local air quality impacts for receptors near each respective Project site. The thresholds shown are from the lookup tables for a site disturbance area that is 1 acre, which is based upon the most intensive phase of construction that involves soil disturbance. The Project's maximum daily on-site emissions would occur during the excavation and site preparation phase for all pollutants. As shown in Table 6, localized

<sup>1</sup> The SCAQMD recommends that, when sensitive receptors are located nearer than 25 meters (82 feet) from the Project site, the minimum 25-meter/82-foot distance threshold should be used.

Jonathan Sanks  
July 22, 2021  
Page 13

emissions for all criteria pollutants would be less than their respective screening thresholds. Therefore, localized air quality impacts are less than significant.

**TABLE 6**

#### Operational Emissions

Upon Project completion, there would be minimal operational trips for monitoring and maintenance of the well sites. At all Project locations, there would typically be one worker visit required per day to exchange resin associated with the treatment process; however, the number of trips would not increase beyond existing conditions at all sites, except for at the Santa Cruz Site. The added infrastructure at the Santa Cruz Site would also require one worker visit per day. A vacuum truck would be required at the five sites as part of the water treatment operation. The frequency will vary based on the water quality and total flow from each site, but is estimated to be approximately once per year. Equipment associated with the five Project sites is assumed to include four pumps (two at 50 horsepower and two at 400 horsepower). These pumps would operate on electricity. There would be no need for natural gas for heating. Emissions for the generation of electrical power are not a local emission source and are therefore not reported by CalEEMod in the daily inventory. However, these emissions are included in the annual calculation of greenhouse gas emissions. Because there would be one staff visit at each site, and no other direct emissions associated with the Project locations on a daily basis, Project emissions would be unsubstantial. Additionally, the Santa Cruz Site would include a new diesel emergency backup generator. APU would be required to obtain an Emergency Backup Generator Permit to Construct and Permit to Operate for the emergency backup generator from the SCAQMD prior to installation, per SCAQMD Rule 1470, Requirements for Stationary Diesel-Fueled Internal Combustion and Other Compression Ignition Engines. As shown in Table 7, Project-related emissions would be substantially below the SCAQMD's significance thresholds. Therefore, operational emissions would be less than significant.

**TABLE 7**  
**PEAK DAILY OPERATIONAL EMISSIONS**

Source	Emissions (lbs/day)					
	VOC	NOx	CO	SOx	PM10	PM2.5
Area sources	<1	<1	<1	<1	<1	<1
Energy sources	<1	<1	<1	<1	<1	<1

Note: CalEEMod model data sheets are included in Attachment A.						

### Cumulative Impacts

The SCAQMD, in their White Paper on Regulatory Options for Addressing Cumulative Impacts from Air Pollution Emissions (presented to the Board on September 5, 2003), identifies that impacts that are less than significant on a Project level are also considered to be less than significant on a cumulative basis. The AQMD uses the same significance thresholds for project-specific and cumulative impacts analyzed in an Environmental Assessment or Environmental Impact Report, except for the Hazard Index for toxic air contaminant emissions (SCAQMD 2003). Any projects that are found to result in less than significant impacts on a project level are not considered to be cumulatively considerable and consequently would not result in a considerable contribution to cumulative impacts. Using this rationale, since the Project impacts were identified as less than significant, as demonstrated in Tables 5 through 7, the cumulative impacts are also less than significant, and no mitigation is required.

### **Question AQ-3      Would the Project result in exposure of sensitive receptors to substantial pollutant concentrations?**

**Less than Significant Impact.** Exposure of sensitive receptors is addressed for the following situations: CO hotspots; criteria pollutants from on-site construction; and TACs from on-site construction.

### Carbon Monoxide Hotspot

A CO hotspot is an area of elevated CO concentrations that is caused by severe vehicle congestion on major roadways, typically near intersections. If a project substantially increases average delay at signalized intersections that are operating at Level of Service (LOS) E or F or causes an intersection that would operate at LOS D or better without the Project to operate at LOS E or F with the Project, there is a potential for a CO hotspot.

Jonathan Sanks  
 July 22, 2021  
 Page 15

The proposed Project would generate vehicle traffic from daily worker trips associated with the monitoring and maintenance of Project facilities. This would amount to one worker trip per day to each of the five Project sites; however, the number of trips would not increase beyond existing conditions, except for an additional daily worker trip at the Santa Cruz Site. This volume of Project-related vehicle trips would not have the potential to substantially change the average LOS at nearby intersections and consequently would not contribute to the potential for the formation of a CO hotspot.

#### Criteria Pollutants from On-Site Construction

Exposure of persons to NO<sub>x</sub>, CO, PM<sub>10</sub>, and PM<sub>2.5</sub> emissions is discussed in the LST analysis in response to Question AQ-1 above, in Table 6. There would be a less than significant impact, and no mitigation is required.

#### Toxic Air Contaminant Emissions from On-Site Construction

Construction activities would result in short-term, Project-generated emissions of diesel particulate matter (DPM) from the exhaust of off-road, heavy-duty diesel equipment used for site preparation (e.g., excavation and grading); paving; building construction; and other miscellaneous activities. CARB identified DPM as a TAC in 1998. The dose to which receptors are exposed is the primary factor used to determine health risk. Dose is a function of the concentration of a substance or substances in the environment and the duration of exposure to the substance. Thus, the risks estimated for a maximally exposed individual are higher if a fixed exposure occurs over a longer time period. According to the Office of Environmental Health Hazard Assessment, health risk assessments—which determine the exposure of sensitive receptors to TAC emissions—should be based on a 40-year exposure period; however, such assessments should be limited to the period/duration of activities associated with the Project.

There would be relatively few pieces of off-road, heavy-duty diesel equipment in operation, and the total construction period would be relatively short when compared to a 40-year exposure period. Combined with the highly dispersive properties of DPM and additional reductions in particulate emissions from newer construction equipment, as required by USEPA and CARB regulations, construction emissions of TACs would not expose sensitive receptors to substantial emissions of TACs. The impact would be less than significant, and no mitigation is required.

#### **Question AQ-4      Would the Project result in other emissions (such as those leading to odors) affecting a substantial number of people?**

**Less than Significant Impact.** According to the SCAQMD's *CEQA Air Quality Handbook*, land uses associated with odor complaints typically include agricultural uses, wastewater treatment plants, food processing plants, chemical plants, composting, refineries, landfills, dairies, and fiberglass molding (SCAQMD 1993). The Project does not propose any of these land uses and would not otherwise produce objectionable long-term operational odors. The Project consists of groundwater treatment plants and water supply wells and would not result in any onsite airborne emissions.

Short-term construction equipment and activities would generate odors, such as diesel exhaust emissions from construction equipment and paving activities. There may be situations where construction activity odors would have an olfactory presence, but these odors would not be unfamiliar or necessarily objectionable. The odors would be temporary and would dissipate rapidly from the source with an increase in distance. The Project use is also regulated from nuisance odors or other objectionable emissions by SCAQMD Rule 402. Rule 402 prohibits discharge from any source of air contaminants or other material, which would cause injury, detriment, nuisance, or annoyance to people or the public. The

Jonathan Sanks  
July 22, 2021  
Page 16

operation of the Project involves the water treatment processes that do not emit substantial levels of odors. Therefore, the impacts would be short-term during construction; would not be objectionable to a substantial number of people; and would be less than significant, and no mitigation is required. All Project-related odors are construction related and short term in nature; no long-term operational odors would result. As such, the proposed Project would have less than significant impact in regard to other emissions, and no mitigation is required.

## CONCLUSION

The Project was analyzed for potential air quality emissions from both the construction and operational phases. The Project would not conflict with or obstruct implementation of the SCAQMD 2016 AQMP. As previously shown in Tables 5 through 7, air quality impacts from construction and operation of the Project would be under SCAQMD air quality thresholds. Project-related construction emissions would not be cumulatively considerable, and the impact would be less than significant. Sensitive receptors near the Project site would not be exposed to substantial pollutant concentrations, and the impact would be less than significant. The Project would not produce other emissions that would affect a substantial number of people. In conclusion, the Project would have no impacts or less than significant impacts for all Project-related air quality emissions.

## GREENHOUSE GAS EMISSIONS ANALYSIS

Climate change refers to any significant change in measures of climate (e.g., average temperature, precipitation, or wind patterns) over a period of time. Climate change may result from natural factors, natural processes, and human activities that change the composition of the atmosphere and alter the surface and features of the land. Significant changes in global climate patterns have recently been associated with global warming, which is an average increase in the temperature of the atmosphere near the Earth's surface; this is attributed to an accumulation of GHG emissions in the atmosphere. GHGs trap heat in the atmosphere which, in turn, increases the Earth's surface temperature. Some GHGs occur naturally and are emitted to the atmosphere through natural processes, while others are created and emitted solely through human activities. The emissions of GHGs through fossil fuel combustion in conjunction with other human activities are associated with global warming.

GHGs, as defined under California's Assembly Bill (AB) 32, include carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF<sub>6</sub>). General discussions on climate change often include water vapor, atmospheric ozone, and aerosols in the GHG category. Water vapor and atmospheric ozone are not gases that are formed directly in the construction or operation of development projects, nor can they be controlled in these projects. Aerosols are not gases. While these elements have a role in climate change, they are not considered by either regulatory bodies, such as CARB, or climate change groups, such as the California Climate Action Registry, as gases to be reported or analyzed for control. Therefore, no further discussion of water vapor, atmospheric ozone, or aerosols is provided.

### **Regulatory Background**

On June 1, 2005, Governor Arnold Schwarzenegger signed Executive Order (EO) S-3-05, which calls for a reduction in GHG emissions to the year 2000 level by 2010, to year 1990 levels by 2020, and to 80 percent below 1990 levels by 2050.

The principal overall State plan and policy adopted for the purpose of reducing GHG emissions is AB 32 (California Global Warming Solutions Act of 2006). AB 32 establishes regulatory, reporting, and market mechanisms to achieve quantifiable reductions in GHG emissions and establishes a cap on statewide

Jonathan Sanks  
July 22, 2021  
Page 17

GHG emissions. AB 32 recognizes that California is the source of substantial amounts of GHG emissions. The statute states the following:

Global warming poses a serious threat to the economic well-being, public health, natural resources, and the environment of California. The potential adverse impacts of global warming include the exacerbation of air quality problems, a reduction in the quality and supply of water to the state from the Sierra snowpack, a rise in sea levels resulting in the displacement of thousands of coastal businesses and residences, damage to marine ecosystems and the natural environment, and an increase in the incidences of infectious diseases, asthma, and other human health-related problems.

In order to avert these consequences, AB 32 establishes a State goal of reducing GHG emissions to 1990 levels by the year 2020, codifying the goal of EO S-3-05.

CARB approved a Climate Change Scoping Plan as required by AB 32 in 2008; this plan is required to be updated every five years. The Climate Change Scoping Plan proposes a “comprehensive set of actions designed to reduce overall carbon GHG emissions in California, improve our environment, reduce our dependence on oil, diversify our energy sources, save energy, create new jobs, and enhance public health” (CARB 2008). The Climate Change Scoping Plan has a range of GHG-reduction actions which include direct regulations, alternative compliance mechanisms, monetary and non-monetary incentives, voluntary actions, market-based mechanisms such as a cap-and-trade system, and an AB 32 implementation regulation to fund the program. On February 10, 2014, CARB released the Draft Proposed First Update to the Climate Change Scoping Plan (CARB 2014). The board approved the final First Update to the Climate Change Scoping Plan on May 22, 2014. The first update describes California’s progress towards AB 32 goals, stating that “California is on track to meet the near-term 2020 greenhouse gas limit and is well positioned to maintain and continue reductions beyond 2020 as required by AB 32” (CARB 2014). The latest update occurred in January 2017 and incorporates the 40 percent reduction to 1990 emissions levels by 2030.

The Sustainable Communities and Climate Protection Act of 2008, Senate Bill (SB) 375, established a process to coordinate land use planning, regional transportation plans, and funding priorities in order to help California meet the GHG reduction goals established in AB 32. SB 375 required SCAG to incorporate an SCS into its RTPs that will achieve GHG emission reduction targets through several measures, including land use decisions. SCAG’s SCS is included in the SCAG 2020–2045 RTP/SCS (SCAG 2020). The goals and policies of the RTP/SCS that reduce vehicle miles traveled focus on transportation and land use planning that include building infill projects; locating residents closer to where they work and play; and designing communities so there is access to high quality transit service.

On April 29, 2015, Governor Brown signed EO B-30-15, which ordered an interim statewide GHG emission reduction target to reduce GHG emissions to 40 percent below 1990 levels by 2030 to ensure California meets its target of reducing GHG emissions to 80 percent below 1990 levels by 2050. Five key goals for reducing GHG emissions through 2030 include (1) increasing renewable electricity to 50 percent; (2) doubling the energy efficiency savings achieved in existing buildings and making heating fuels cleaner; (3) reducing petroleum use in cars and trucks by up to 50 percent; (4) reducing emissions of short-lived climate pollutants; and (5) managing farms, rangelands, forests, and wetlands to increasingly store carbon. EO B-30-15 also directs CARB to update the Climate Change Scoping Plan to express the 2030 target in terms of million metric tons of carbon dioxide equivalent.

On September 8, 2016, the Governor signed SB 32 to codify the GHG reduction goals of EO B-30-15, requiring the State to reduce GHG emissions by 40 percent below 1990 levels by 2030 (Health and Safety

Jonathan Sanks  
July 22, 2021  
Page 18

Code Section 38566). As stated above, this goal is expected to keep the State on track to meeting the goal set by EO S-3-05 of reducing GHG emissions by 80 percent below 1990 levels by 2050.

AB 197 was signed at the same time to ensure that the SB 32 goals are met by requiring CARB to provide annual reports of GHGs, criteria pollutants, and TACs by facility, City and sub-county level, and sector for stationary sources and at the County level for mobile sources. It also requires the CARB to prioritize specified emission reduction rules and regulations and to identify specified information for emission reduction measures (e.g., alternative compliance mechanism, market-based compliance mechanism, and potential monetary and nonmonetary incentive) when updating the Scoping Plan.

SB 350, signed October 7, 2015, is the Clean Energy and Pollution Reduction Act of 2015. SB 350 is the implementation of some of the goals of EO B-30-15. The objectives of SB 350 are as follows:

1. To increase from 33 percent to 50 percent, the procurement of our electricity from renewable sources
2. To double the energy efficiency savings in electricity and natural gas final end uses of retail customers through energy efficiency and conservation.

The text of SB 350 sets a December 31, 2030, target for 50 percent of electricity to be generated from renewable sources. SB 350 also requires the State to double statewide energy efficiency savings in electricity and natural gas end uses by 2030. Additionally, SB 350 sets requirements for large utilities to develop and submit integrated resources plans (IRPs), which detail how utilities would meet their customers' resource needs, reduce GHG emissions, and integrate clean energy resources (CEC 2021a).

On September 10, 2018, Governor Brown signed SB 100, the 100 Percent Clean Energy Act of 2018. SB 100 requires renewable energy and zero-carbon resources to supply 100 percent of electric retail sales to end-use customers and 100 percent of electricity procured to serve state agencies by December 31, 2045. This policy requires the transition to zero-carbon electric systems that do not cause contributions to increase of GHG emissions elsewhere in the western electricity grid (CEC 2021b). SB 100 also creates new standards for the Renewable Portfolio Standard (RPS) goals established by SB 350 in 2015. Specifically, the bill increases required energy from renewable sources for both investor-owned utilities and publicly owned utilities from 50 percent to 60 percent by 2030.

Further, on September 10, 2018, Governor Brown also signed California EO B-55-18, which sets a new statewide goal of carbon neutrality as soon as possible, and no later than 2045 and achieve net negative emissions thereafter. EO B-55-18 was added to the existing Statewide targets of reducing GHG emissions, including the targets previously established by Governor Brown of reducing emissions to 40 percent below 1990 levels by 2030 (EO B-30-15 and SB 32), and by Governor Schwarzenegger of reducing emissions to 80 percent below 1990 levels by 2040 (EO S-3-05).

APUD's Greenhouse Gas Reduction Plan (GHG Reduction Plan), approved in 2015, and updated in 2020, identifies renewable energy and energy conservation targets for APUD for the years 2020, 2030, and 2045. The GHG Reduction Plan identifies renewables portfolio targets for increasing the APUD power supply generated from renewable sources up to 33 percent by year 2020, 60 percent by year 2030 and 100 percent by 2045. In 2020, 34,000 kilowatt (kW) of photovoltaic systems were installed, and 50,000 kW of photovoltaic systems will be installed by 2030, and 75,000 kW by 2045. The GHG Reduction Plan also establishes transportation-related goals for APUD to convert its fleet vehicles to result in emissions reductions of 500 metric tons of carbon dioxide equivalent (MTCO<sub>2</sub>e) in 2020, 1,200 MTCO<sub>2</sub>e in 2030, and 32,000 in 2045 (APUD 2020).

### **Thresholds of Significance**

On December 5, 2008, the SCAQMD Governing Board presented the staff proposal for a tiered threshold approach wherein Tier 1 determines if a project qualifies for an applicable CEQA exemption, Tier 2 determines consistency with GHG reduction plans, and Tier 3 proposes a numerical screening value as a threshold. At their September 28, 2010, meeting, the Working Group suggested a Tier 3 threshold of 3,000 MTCO<sub>2</sub>e per year for all land use types (SCAQMD 2010). Tier 4 determines if the Project meets performance standards. Tier 4 has three options: Option 1—percent emission reduction target; Option 2—early implementation of applicable measures, and Option 3—sector-based standard. Tier 5 determines mitigation for CEQA offsets.

In the absence of adopted thresholds, the Tier 3 standard is used for this analysis (SCAQMD 2008). The development of project-level thresholds in accordance with CEQA is an ongoing effort at the State, Regional, and County levels, and significance thresholds may differ for future projects based on new or additional data and information that may be available at that time for consideration. The City of Anaheim has not officially adopted any GHG CEQA significance threshold. The City defers to assessment methods and significance thresholds developed by the SCAQMD. This impact analysis evaluates consistency with regulatory programs designed to reduce GHG emissions and that contribute to the achievement of AB 32's and SB 32's goals as the primary significance criterion. In addition, this impact analysis also evaluates the Project's estimated emissions compared to the Tier 3 threshold (as discussed above) for impacts related to GHG emissions proposed by staff of the SCAQMD, but not adopted by the SCAQMD Board. On December 5, 2008, the SCAQMD Governing Board adopted its staff proposal for an interim CEQA GHG significance threshold of 10,000 metric tons of CO<sub>2</sub> equivalent per year (MTCO<sub>2</sub>e/year) for industrial projects where the SCAQMD is the lead agency. In September 2010, the Working Group proposed extending the 10,000 MTCO<sub>2</sub>e/year screening threshold currently applicable to industrial projects where the SCAQMD is the lead agency, described above, to other lead agency industrial projects. Because a substantial amount of GHG emissions related to industrial uses are from energy consumption and the Project's primary source of GHG emissions is related to electricity use, the significance threshold developed for industrial uses will be used for the evaluation of potential GHG impacts.

### **GREENHOUSE GAS EMISSIONS ANALYSIS**

The following questions correspond to the questions in the GHG Emissions section of the Initial Study Checklist in Appendix G of the State CEQA Guidelines.

#### **Question GHG-1 Would the Project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?**

**Less than Significant Impact.** In developing methods for GHG impact analysis, there have been suggestions from local air pollution control districts of quantitative thresholds, often referred to as screening levels, which define an emissions level below which it may be presumed that climate change impacts would be less than significant. Neither the SCAQMD, the City of Anaheim, nor the County of Orange has adopted a significance threshold for GHG emissions from non-industrial development projects. Consequently, pursuant to the discretion afforded by Sections 15064.4(a) and 15064.4(b) of the State CEQA Guidelines, the impact of the proposed Project's GHG emissions is assessed based on the methodologies proposed by SCAQMD's GHG CEQA Significance Threshold Working Group, as described above.

Based on the proposed construction activities described above, the principal source of construction GHG emissions would be internal combustion engines of construction equipment, on-road construction vehicles, and workers' commuting vehicles. GHG emissions from construction activities were obtained

Jonathan Sanks  
July 22, 2021  
Page 20

from the CalEEMod model, described above. The estimated construction GHG emissions for the proposed Project would be 1,473 MTCO<sub>2</sub>e, as shown in Table 8, Estimated Greenhouse Gas Emissions from Construction.

**TABLE 8**  
**ESTIMATED GREENHOUSE GAS EMISSIONS**  
**FROM CONSTRUCTION**

Year	Emissions (MTCO <sub>2</sub> e)
2021	235
2022	433
2023	652
2024	153
<b>Total</b>	<b>1,473</b>
MTCO <sub>2</sub> e: metric tons of carbon dioxide equivalent	
Notes:	
<ul style="list-style-type: none"> <li>Totals may not add due to rounding variances.</li> <li>Detailed calculations in Attachment A.</li> </ul>	

Operational GHG emissions would come primarily from vehicle trips; other sources include electricity and an emergency generator (stationary source). Table 9, Estimated Annual Greenhouse Gas Emissions from Project Operation, shows the annual GHG emissions from proposed Project's operations.

**TABLE 9**  
**ESTIMATED ANNUAL GREENHOUSE GAS**  
**EMISSIONS FROM PROJECT OPERATION**

Source	Emissions (MTCO <sub>2</sub> e/yr)
Area	0
Energy	2,793
Mobile	8
Stationary	3
Waste	0
Water	0
<b>Total Operational Emissions</b>	<b>2,805</b>
MTCO <sub>2</sub> e/yr: metric tons of carbon dioxide equivalent per year	
Notes:	
<ul style="list-style-type: none"> <li>Totals may not add due to rounding variances.</li> <li>Detailed calculations in Attachment A.</li> </ul>	

Because impacts from construction activities occur over a relatively short period of time, they contribute a relatively small portion of the overall lifetime Project GHG emissions. In addition, GHG emission reduction measures for construction equipment are relatively limited. The SCAQMD recommends that construction emissions be amortized over a 30-year Project lifetime so that GHG reduction measures address construction GHG emissions as part of the operational GHG reduction strategies (SCAQMD 2008). Therefore, construction and operational emissions are combined by amortizing the construction and operations over an assumed 30-year Project lifetime. This combination is shown in Table 10,

Jonathan Sanks  
July 22, 2021  
Page 21

Estimated Total Project Annual Greenhouse Gas Emissions, using the proposed Project's amortized construction and operational emissions.

Source	Emissions (MTCO <sub>2</sub> e/yr <sup>a</sup> )
Construction (Amortized)	49 <sup>a</sup>
Operations (Table 9)	2,805
<b>Total<sup>b</sup></b>	<b>2,854</b>
<b>SCAQMD-Recommended Threshold</b>	<b>10,000</b>
<b>Exceeds Threshold?</b>	<b>No</b>
MTCO <sub>2</sub> e/yr: metric tons of carbon dioxide equivalent per year; SCAQMD: South Coast Air Quality Management District.	
<sup>a</sup> Total derived by dividing construction emissions (see Table 8) by 30.	
<sup>b</sup> Total annual emissions are the sum of amortized construction emissions and operational emissions.	

It is noted that there are no established applicable quantitative federal, State, regional, or local CEQA significance criteria for GHG emissions for non-industrial projects in the SoCAB. The SCAQMD has adopted, a threshold of 10,000 MTCO<sub>2</sub>e per year for industrial land use projects. As shown, the estimated GHG emissions from the proposed Project would be less than this suggested threshold. In addition, future emissions associated with electricity use from the Project would decrease with the GHG reduction requirements established for utilities under the Renewable Portfolio Standards until the year 2045, when electricity-related emissions would be carbon neutral. The impact would be less than significant, and no mitigation is required.

**Question GHG-2 Would the Project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?**

**Less than Significant Impact.** The City of Anaheim has not adopted a Climate Action Plan, and the SCAQMD has not adopted standards for the purpose of reducing GHG emissions. There are a number of GHG reduction plans that have been adopted on the State and regional level. SCAG adopted this 2016–2040 RTP/SCS for the six-county region including Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties. The RTP/SCS seeks to improve the mobility, sustainability, and economies of this region. This Plan demonstrates how the region would reduce transportation emissions to comply with SB 375. This is achieved by numerous transportation related programs and projects which seek to improve the operational efficiency of the transportation network, promote mass transit and non-automobile forms of transportation, and fulfill the requirements for the SCS to reduce GHG emissions.

The APUD has also outlined a plan to transition their RPS to clean energy resources and has increased the procurement of renewable resources since 2003 through its IRP, approved by City Council and the California Energy Commission in 2018. The IRP established goals such as a 50 percent RPS by 2030, which is consistent with the requirements of SB 350, which requires all California electric utilities to increase the use of renewable resources to serve customer load to 50 percent by 2030 (APUD 2017). Additionally, as stated above, APUD prepared a GHG Reduction Plan in 2020 to update the City's 2015 GHG Reduction Plan and outline new GHG reduction targets (APUD 2020). The 2020 GHG Reduction Plan set targets for 2020, 2030, and 2045, which are consistent with the targets of SB 350 and SB 100 for

Jonathan Sanks  
July 22, 2021  
Page 22

increased RPS standards. The Project would be consistent with the targets for the 2020 GHG Reduction Plan, as the Project's electrical components would be powered through APUD. Therefore, the Project would have less than significant impacts regarding conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing GHG emissions, and no mitigation measures are required.

## **CONCLUSION**

The Project was analyzed for potential GHG emissions from both the construction and operational phases. GHG emissions would be less than the SCAQMD-recommended threshold of 10,000 MTCO<sub>2</sub>e per year. The Project would have less than significant impacts regarding generation of GHG emissions that may have a significant impact on the environment. Additionally, the Project would have less than significant impacts regarding conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of GHGs. In conclusion, the Project would have less than significant impacts for all Project-related GHG emissions.

Thank you for the opportunity to assist on this Project. If you have any questions or comments, please contact me at 626.351.2000.

Sincerely,

**P S O M A S**

**BIOLOGICAL CONSTRAINTS REPORT**

July 22, 2021

Jonathan Sanks  
Environmental Services and Safety Manager  
Anaheim Public Utilities  
201 S. Anaheim Blvd., Suite 107  
Anaheim, CA 92805

**VIA EMAIL**  
**JSanks@anaheim.net**

**Subject:** Biological Resources Constraints at the Groundwater Treatment Plants Phase B and Groundwater Supply Wells Project in the City of Anaheim, Orange County, California

Mr. Sanks:

This Letter Report presents the findings of a desktop biological resources constraints analysis for the Groundwater Treatment Plants Phase B and Groundwater Supply Wells Project (hereinafter referred to as the “proposed project”). The purpose of the survey was to evaluate potential biological constraints on the proposed project development.

## **PROJECT DESCRIPTION AND LOCATION**

The proposed project would install water treatment facilities at five sites across the City of Anaheim: Willow Park, Downtown, Katella Avenue, Brookhurst, and Santa Cruz (Exhibits 1a–1e). The number and size of vessels at each treatment site will depend on the volume of water that will require treatment at each location. Two new water supply wells would be installed at the Santa Cruz site, and additional wells would be rehabilitated due to age and deterioration of the well casing.

The Willow Park site is located within Willow Park at 1625 West Crone Avenue. The Downtown site is located on the corner of Ellsworth Avenue and Claudina Street, in the vicinity of existing Anaheim Public Utility (APU) equipment. The Katella Avenue site is located south of Katella Avenue and west of the railroad tracks. The Brookhurst site is located within an electrical easement, east of Brookhurst Street and north of railroad tracks. The Santa Cruz site is located along Anaheim Way and Santa Cruz Street.

## **SURVEY METHODS**

Psomas Senior Biologist Steve Norton conducted a desktop assessment of the five sites. The desktop survey consists of reviewing site photographs, aerial photographs, street-view databases, and other map collections to identify the likely habitat present on the sites. Relevant scientific literature and natural resource databases were also reviewed to identify special status plants, wildlife, and habitats that have been reported to occur in the vicinity of the sites. Resources reviewed included the California Native Plant Society’s (CNPS’) Inventory of Rare and Endangered Plants (CNPS 2021) and the California Department of Fish and Wildlife’s (CDFW’s) California Natural Diversity Database (CDFW 2021a). Database searches included the USGS’ Anaheim and Orange 7.5-minute quadrangles.

 Page 2

Nomenclature of plant taxa conform to the *Special Vascular Plants, Bryophytes, and Lichens List* (CDFW 2021b) for special status species and the Jepson eFlora (Jepson Flora Project 2021) for all other taxa. Taxonomy and nomenclature for wildlife generally follows the *Special Animals List* (CDFW 2021c) for special status species and, for other species, Crother (2017) for amphibians and reptiles, the American Ornithological Society (AOS 2020) for birds, and the Revised Checklist of North American Mammals North of Mexico (Bradley, et al. 2014).

## ASSESSMENT RESULTS

The five sites are depicted on the USGS Anaheim 7.5-minute topographic quadrangle. All the sites are located in urban portions of the City of Anaheim and have been subject to significant development (Exhibits 2a–2e). The existing conditions at each of the sites are listed as follows.

The Willow Park site is an approximately 2.1-acre site located entirely within a City Park (Willow Park). The park contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. The portions of the park that do not contain structures are landscaped with sod grass and large ornamental trees. The Willow Park site is occupied by an existing public restroom facility, utility building, landscaped sod grass, and some of the large ornamental trees. Single-family residential uses are located in the immediate area, across McCrone Avenue and Loara Street from the park and immediately adjacent to the park to the west.

The Downtown site is 0.4 acres and is currently occupied by a building and a paved parking lot with ornamental trees and shrubs located in the parking lot medians. Immediately adjacent uses include multi-family residences to the west as well as single-family residences across Ellsworth Avenue and Claudina Street.

The Katella Avenue site, located south of Katella Avenue and west of the railroad tracks, is an approximately 0.7-acre site that is fully disturbed and paved and is located north and west of the Angel Stadium parking lot, and north and east of The Grove of Anaheim and associated existing tennis courts and proximate to other park uses.

The Brookhurst site is an approximately 1.4-acre site located within an overhead electrical utility easement, east of Brookhurst Street and north of railroad tracks. The site has been subject to historic disturbance and is currently occupied by a small utility building and a gravel parking area.

The Santa Cruz site is a 3-acre site consisting of bare ground along west side of Interstate 5. The site also extends along Anaheim Way and west along and within the right-of-way of Orangewood Avenue. The pipeline work area is approximately 1.3-acres.

### Existing Conditions Summary

No native vegetation types occur on any of the five sites. Planted, ornamental plant species are present on all the sites, however, the Katella Avenue and Santa Cruz sites do not contain enough vegetation to support any wildlife species. The Downtown site contains planted trees in the landscaped medians, including young, planted coast live oak (*Quercus agrifolia*), a native plant species. Despite being a native plant species, the coast live oak trees onsite are not associated with an onsite or adjacent native vegetation type nor are they considered to have any special status. The trees present on this site are small but are likely of sufficient size to support urban-tolerant nesting bird species. The Brookhurst site is predominantly bare ground beneath the overhead powerlines. Scattered stands of non-native grasses, such as brome grasses (*Bromus* spp.), occur throughout the portions of the site that are not covered in imported gravel or existing structures. A sparse windrow of mature Mexican fan palm trees (*Washingtonia robusta*)

Jonathan Sanks  
July 22, 2021  
Page 3

occur along the southern boundary of the site. These trees have potential to support nesting activities by urban-tolerant bird species. The Willow Park site has a notably higher density of tree canopy cover and the majority of trees present are large and mature. These trees have potential to support nesting activities by urban tolerant bird and raptor species.

### **Jurisdictional Resources**

No wetlands, riparian vegetation, or evidence of natural drainage features are likely to occur on or adjacent to any of the five sites per the review of the aerial photography and topographic imagery.

### **Wildlife Habitat**

The five sites are predominantly developed and the wildlife habitat present is suitable only to urban-tolerant wildlife species.

No fish or amphibian species are anticipated to occur on the five sites. Common reptile species, such as western fence lizard (*Sceloporus occidentalis*) and common side-blotched lizard (*Uta stansburiana*) are expected to occur.

Common bird species expected to occur include rock pigeon (*Columba livia*), house sparrow (*Passer domesticus*), mourning dove (*Zenaida macroura*), Anna's humming bird (*Calypte anna*), black phoebe (*Sayornis nigricans*), northern mockingbird (*Mimus polyglottos*), American crow (*Corvus brachyrhynchos*), lesser goldfinch (*Spinus psaltria*), and house finch (*Haemorhous mexicanus*).

Common mammal species that are likely to occur on the five sites include coyote (*Canis latrans*), striped skunk (*Mephitis mephitis*), Virginia opossum (*Didelphis virginiana*), northern raccoon (*Procyon lotor*), and house mouse (*Mus musculus*).

### **Wildlife Movement**

Within large, open space areas where few or no man-made or naturally occurring physical constraints to wildlife movement are present, wildlife corridors may not yet exist. However, once open space areas become constrained and/or fragmented as a result of urban development or the construction of physical obstacles (e.g., roads and highways), the remaining landscape features or travel routes that connect the larger open space areas become corridors as long as they provide adequate space, cover, food, and water and do not contain obstacles or distractions (e.g., man-made noise, lighting) that would generally hinder wildlife movement. Alternatively, redevelopment and in-fill projects within fully developed landscapes, such as those in urban and suburban environments, may not be located adjacent to any open space areas and local wildlife movement is limited only to urban-tolerant wildlife species (e.g., raccoon [*Procyon lotor*], opossum, and coyote) and urban-adapted bird species.

The five sites are located within fully developed, urban areas and do not provide a linkage to undeveloped areas. Only urban-tolerant wildlife would be expected to use the sites for wildlife movement and development of these areas are not likely to affect wildlife movement.

### **Special Status Vegetation Types**

The CDFW provides a list of vegetation Alliances, Associations, and Special Stands that are considered "sensitive natural communities" based on their rarity and threat (CDFW 2020d). No sensitive natural communities are located on any of the five sites.

Jonathan Sanks  
July 22, 2021  
Page 4

### **Special Status Plant and Wildlife Species**

In the absence of California Environmental Quality Act (CEQA) thresholds formally approved by the Lead Agency, analysis of special status plant and wildlife species are based upon the thresholds discussed in Appendix G of the CEQA Guidelines. With regards to plants and animals, Section 15380 of the CEQA Guidelines independently defines “Endangered” and “Rare” species separately from the definitions of the California Endangered Species Act (CESA). Under CEQA, Endangered species of plants or animals are defined as those whose survival and reproduction in the wild are in immediate jeopardy, while Rare species are defined as those that (1) have such low numbers that they could become Endangered if their environment worsens or (2) are likely to become endangered within the foreseeable future (i.e., “threatened” as used in the FESA). In addition, a Lead Agency can consider a non-listed species (e.g., species with a California Rare Plant Rank [CRPR] and California Species of Special Concern [SSC]) to be treated as if it were Endangered, Rare, or Threatened for the purposes of CEQA if the species can be shown to meet the criteria in the definition of “Rare” or “Endangered” in the project region.

#### ***Special Status Plants***

Plants may be considered “special status” due to declining populations, vulnerability to habitat change, or restricted distributions. Several special status plant species have been reported in the vicinity of the project based on the results of the literature review (see Attachment B).

Despite special status plant species being reported in the greater vicinity, none of the sites contain habitat suitable for any of these species and none have potential to occur on the sites.

#### ***Special Status Wildlife***

Wildlife may be considered “special status” due to declining populations, vulnerability to habitat change, or restricted distributions. Several special status wildlife species have been reported in the vicinity of the sites based on the results of the literature review (see Attachment B).

Despite special status wildlife species being reported in the greater vicinity, none of the five sites contain habitat suitable for any special status wildlife species.

### **Other Potential Biological Constraints**

#### ***Local Ordinances***

None of the five sites are located in a Specific Plan area of the City that have a tree preservation ordinance or other ordinance protecting biological resources.

#### ***Critical Habitat***

Critical Habitat is designated by the USFWS for the survival and recovery of species listed as Threatened or Endangered under the Federal Endangered Species Act (FESA). The sites are not located within any areas mapped as Critical Habitat.

#### ***Nesting Birds and Raptors***

The Migratory Bird Treaty Act (MBTA) protects migratory birds and their nests and eggs, both common and special status. Bird species protected under the provisions of the MBTA are identified by the List of Migratory Birds (50 *Code of Federal Regulations* [CFR] §10.13, as amended). Since the 1970s, the MBTA has been interpreted to prohibit the accidental or “incidental” take of migratory birds. However, in

Jonathan Sanks  
July 22, 2021  
Page 5

December 2017, the acting Solicitor of the Department of the Interior issued a new memorandum disclaiming the interpretation of the MBTA as prohibiting incidental take of migratory birds (DOI 2017). In response to the federal changes in interpretation of the MBTA, the CDFW and the California Attorney General have issued an advisory affirming California's protections for migratory birds (CDFW and Attorney General 2018).

Multiple sections of *California Fish and Game Code* provide protection for nesting birds and raptors unless the *California Fish and Game Code* or its implementing regulations provide otherwise. Section 3503 makes it unlawful to take, possess, or needlessly destroy the nest or eggs of any bird. Section 3503.5 specifically addresses raptors (i.e., birds of prey in the orders *Falconiformes* and *Strigiformes*) and makes it unlawful to take, possess, or destroy these birds or their nest or eggs. Section 3513 prohibits the take or possession of migratory non-game birds as designated by the MBTA or any part of such bird.

Migratory birds have the potential to nest in the vegetation on all five sites and raptors have potential to nest in the vegetation on the Willow Park site. They could also nest on nearby structures. Take of active bird nests would be a violation of *California Fish and Game Code*.

## RECOMMENDATIONS

The following measures are recommended to avoid, minimize, or mitigate for impacts on biological resources or to comply with federal, state, and/or local regulations:

1. To avoid impacts to nesting birds and raptors, all vegetation removal should be scheduled between September 1 and February 14, which is outside the peak nesting season. If vegetation removal must occur during the peak nesting season (i.e., February 15–August 31), a pre-construction nesting bird survey should be conducted by a qualified Biologist within 7 days prior to vegetation removal activities.

If the Biologist finds an active nest within or adjacent to the construction area, the Biologist will identify an appropriate protective buffer zone around the nest depending on the sensitivity of the species, the nature of the construction activity, and the amount of existing disturbance in the vicinity. In general, the Biologist should designate a buffer between 10 to 300 feet for common nesting birds and between 200 to 500 feet for nesting raptors. No construction activities will be allowed within the buffer until the nest is deemed to be no longer active by the Biologist to ensure compliance with *California Fish and Game Code*.

If you have any questions or comments, please contact Steve Norton at (714) 751-7373.

Sincerely,

P S O M A S

Steve Norton  
Senior Biologist

**Re: Native American Tribal Consultation, Pursuant to the Assembly Bill 52 (AB 52), Amendments to the California Environmental Quality Act (CEQA) (Chapter 532, Statutes of 2014), Public Resources Code Sections 5097.94 (m), 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2 and 21084.3, 3ANA009305 Project, Orange County**

Dear Mr. Cisneros:

Pursuant to Public Resources Code section 21080.3.1 (c), attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Please note that the intent of the AB 52 amendments to CEQA is to avoid and/or mitigate impacts to tribal cultural resources, (Pub. Resources Code §21084.3 (a)) ("Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource.")

Public Resources Code sections 21080.3.1 and 21084.3(c) require CEQA lead agencies to consult with California Native American tribes that have requested notice from such agencies of proposed projects in the geographic area that are traditionally and culturally affiliated with the tribes on projects for which a Notice of Preparation or Notice of Negative Declaration or Mitigated Negative Declaration has been filed on or after July 1, 2015. Specifically, Public Resources Code section 21080.3.1 (d) provides:

*Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.*

The AB 52 amendments to CEQA law does not preclude initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction prior to receiving requests for notification of projects in the tribe's areas of traditional and cultural affiliation. The Native American Heritage Commission (NAHC) recommends, but does not require, early consultation as a best practice to ensure that lead agencies receive sufficient information about cultural resources in a project area to avoid damaging effects to tribal cultural resources.

The NAHC also recommends, but does not require that agencies should also include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of any Sacred Lands File (SLF) check conducted through the Native American Heritage Commission was negative.

4. Any ethnographic studies conducted for any area including all or part of the APE; and

5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions, please contact me at my email address: [Andrew.Green@nahc.ca.gov](mailto:Andrew.Green@nahc.ca.gov).

Sincerely,

Andrew Green  
Cultural Resources Analyst

Psomas  
Attn: Charles Cisneros

re: Paleontological resources for Project 3ANA009305

Dear Charles:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for proposed development at the Project 3ANA009305 project area as outlined on the portion of the Anaheim and Orange USGS topographic quadrangles map that you sent to me via e-mail on April 21, 2021. We do not have any fossil localities that lie directly within the proposed project area, but we do have fossil localities nearby from the same sedimentary deposits that occur in the proposed project area, either at the surface or at depth.

The following table shows the closest known localities in the collection of the Natural History Museum of Los Angeles County.

Locality Number	Location	Formation	Taxa	Depth
LACM VP 1652	Rio Vista Avenue south of Lincoln Avenue	Alluvium (Pleistocene)	Sheep ( <i>Ovis</i> )	Unknown (excavations for housing project)

*VP, Vertebrate Paleontology; IP, Invertebrate Paleontology; bgs, below ground surface*

This records search covers only the records of the Natural History Museum of Los Angeles County (“NHMLA”). It is not intended as a paleontological assessment of the project area for the purposes of CEQA or NEPA. Potentially fossil-bearing units are present in the project area, either at the surface or in the subsurface. As such, NHMLA recommends that a full paleontological assessment of the project area be conducted by a paleontologist meeting Bureau of Land Management or Society of Vertebrate Paleontology standards.

Sincerely,

Alyssa Bell, Ph.D.  
Natural History Museum of Los Angeles County

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

## EXECUTIVE SUMMARY

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

#### ***Federal Delisted NPL site list***

Delisted NPL..... National Priority List Deletions

#### ***Federal CERCLIS list***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS..... Corrective Action Report

#### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

#### ***Federal RCRA generators list***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

#### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System  
US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

#### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

## EXECUTIVE SUMMARY

RGA LUST.....	Recovered Government Archive Leaking Underground Storage Tank

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 31 LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal voluntary cleanup sites***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 01/25/2021 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

#### ***Local Lists of Registered Storage Tanks***

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 13 HIST CORTESE sites within approximately 0.5 miles of the target property.

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 01/05/2021 has revealed that there is 1 HWT site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Technical Workplan  
Completed Date: 07/03/2009  
Comments: Via email on 07/03/2009, DTSC noted that the site sampling plan appeared consistent with discussions with the District's consultant and provided comments on the site sampling plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 07/10/2009  
Comments: On July 10, 2009, fieldwork was completed per District's consultant.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Notice  
Completed Date: 07/07/2009  
Comments: Via email on July 7, 2009, DTSC received a final copy of the Field Work Notice and was informed that the Notice was posted at the 1010 and 1016 E. Katella properties and delivered to properties within the line of sight of the proposed school property.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 10/22/2009  
Comments: DTSC did not review the Environmental Assessment Summary Report since the District terminated the EOA (August 2009) prior to receipt of the Report. The report summarized the soil and soil vapor sampling results from fieldwork conducted in July 2009. Maximum concentrations in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5 x 10-5 and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Completed Document Type: Technical Workplan  
Completed Date: 07/03/2009  
Comments: Via email on 07/03/2009, DTSC noted that the site sampling plan appeared consistent with discussions with the District's consultant and provided comments on the site sampling plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 07/10/2009  
Comments: On July 10, 2009, fieldwork was completed per District's consultant.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Notice  
Completed Date: 07/07/2009  
Comments: Via email on July 7, 2009, DTSC received a final copy of the Field Work Notice and was informed that the Notice was posted at the 1010 and 1016 E. Katella properties and delivered to properties within the line of sight of the proposed school property.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 10/22/2009  
Comments: DTSC did not review the Environmental Assessment Summary Report since the District terminated the EOA (August 2009) prior to receipt of the Report. The report summarized the soil and soil vapor sampling results from fieldwork conducted in July 2009. Maximum concentrations in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5 x 10<sup>-5</sup> and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Global Id: T10000004434  
Lead Agency: SANTA ANA RWQCB (REGION 8)  
Lead Agency Case Number: Not reported  
Latitude: 33.8028819  
Longitude: -117.8967556  
Case Type: Cleanup Program Site  
Case Worker: JML  
Local Agency: Not reported  
RB Case Number: 2080098  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor  
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)  
Site History: The first report "Environmental Assessment Summary Report" was prepared by LFR, Inc. on September 3, 2009, for the Anaheim City School District, for the purpose of evaluating the Site's suitability as the location for a school facility. LFR found that tetrachloroethylene (PCE) exists in soil vapor at a maximum concentration of 580 micrograms per liter ("g/L) at the Site (Enclosure 1). Trichloroethylene (TCE) and 1,1,1-trichloroethane (TCA) were also detected in soil gas at concentrations of 20 and 17 I "g /L, respectively. The PCE concentration in soil vapor was significantly aboveV% the California Human Health Screening Levels (CHHSLs) for shallow soil vapor for commercial and industrial land

**BROWNCO CONSTRUCTION COMPANY (Continued)**

**S112274197**

use. Based on the results from the first round of sampling at the Site by LFR, the owner of the Site then decided to conduct further investigation of soil and soil vapor at the Site. Tait Environmental Services (Tait) conducted the sampling on November 16 through 19, 2009. A total of 30 soil vapor borings and 6 soil borings were completed on the northwest side of the Site, adjacent to the Brownco facility. Soil vapor samples were collected from 5, 15 and 30 feet below ground surface (bgs). Soil borings were advanced to depths ranging from 48 to 80 feet bgs. Tait issued the "Soil Vapor Screening and Soil Sampling Report" for the Site on January 13, 2010. The report indicates that high concentrations of PCE and TCE were detected in soil and soil vapor. The PCE concentrations in soil vapor ranged from 43 to 4,200 "g /L. PCE concentrations in soil ranged from non-detect to 4.4 micrograms per kilogram ("g /kg). The reported maximum PCE concentration in soil vapor at the Site is 4 orders of magnitude higher than the CHHSLs and as such can indicate a threat to human health through vapor intrusion into a nearby facility. The maximum concentration of PCE in soil is approximately twice the Regional Screening Level (RSL) for soil at the industrial sites. The highest concentrations of PCE in both soil and soil vapor samples were detected in sampling points that were located immediately on the east side of the Site boundary with the Brownco property. Additionally, the iso-concentration contours for soil vapor that were presented in the report for the depths of 5, 15 and 30 feet bgs consistently show a pattern that indicates a source of PCE in soil on the west side of the Jaycox/Brownco boundary. The isoconcentration contours provided for PCE in soil at the depths of 5, 15, 35, and 45 feet bgs (Enclosure X) show a similar pattern. Tait has made the observation that PCE and TCE were present in higher concentrations in the finer grade silt units and in lower concentrations in the intervening sand units. This observation may indicate that the subsurface soil contamination was caused by an older release of solvents at the surface, in the vicinity of former operations at 1000 East Katella facility. After our review of the information provided by Mr. Van Vlear, Brownco authorized PRWE, Inc. to perform a SVS to confirm if there was merit to the claims made by Mr. Van Vlear in his letter. The SVS was performed at this site on April 23, 2010 under the direct supervision of a Professional Geologist properly licensed in California. The results of the SVS indicate elevated soil vapor concentrations at five foot depths of Perchloroethylene (PCE), Tetrachloroethylene (TCE), and 1,1,1-Trichloroethane (1,1,1-TCA) on the Brownco site. 1,1-Dichloroethene (1,1-DCE) a breakdown product of TCE and 1,1,1-TCA, was also present in two samples. Two soil borings were advanced to groundwater and subsequently converted to triplensted SVE wells. An undisturbed soil sample was collected every 5 feet to groundwater using stainless steel rings and via EPA Method 5035 and analyzed per EPA Method 8260B per the request of the RWQCB. Each soil boring was continuously cored for lithological description. Images recorded during the soil borings and SVE well installation at SB1 are presented on Figure 5. Groundwater was encountered at approximately 81 feet below ground surface (bgs) based only on field measurement. The well elevations have not been surveyed. A groundwater grab sample (along with a split for the RWQCB and a duplicate sample for quality assurance reasons) was collected from each soil boring location after a temporary well casing was installed to allow sufficient groundwater to be collected. Each soil Boring was completed as triple-completed SVE wells with 20 feet of

slotted screen at the bottom of each casing. Soil Boring and Well Completion Logs are included in Appendix A. Soil samples from SB1 were collected at 5 foot intervals during advancement to groundwater and a temporary well casing was installed to collect a grab groundwater sample on June 1, 2011. As the groundwater infiltration rate was very slow, the temporary well was left in the secured borehole until June 2, 2011 when the groundwater grab samples were collected. The borehole was subsequently converted to triple-nested SVE wells. On June 3, 2011, soil samples from SB2 were collected at 5 foot intervals during advancement to groundwater and a temporary well casing was installed to collect a grab groundwater sample. As the groundwater infiltration rate was very slow, the temporary well casing was left in the secured borehole until June 6, 2011 when the groundwater grab samples were collected. The borehole was subsequently converted to triple-nested SVE wells, as shown on the well construction diagrams on the boring logs in Appendix A, on Jun 6, 2011. The laboratory analytical results for soil collected from SB1 and SB2 indicated that there was PCE present in all samples to groundwater. The highest concentrations of PCE detected in SB1 and SB2 were both at 10 ft bgs. The PCE concentrations were detected at 2,760 and 1,490 "g/kg, for SB1 and SB2, respectively. The laboratory analytical results for soil collected from SB1 and SB2 indicated that TCE was not present in all samples in either boring. The highest concentrations of TCE detected in SB1 and SB2 was 119 "g/kg at 30 ft bgs, and 70 "g/kg at 70 ft bgs, respectively. 1,1-DCE was only detected in one sample (SB1 at 70 feet) above the laboratory reporting limit. The concentration of 1,1-DCE detected in SB1-70 was 6.6 "g/kg. 1,1,1-TCA was detected only in one sample (SB2 at 45 feet) above the laboratory reporting limit. The concentration of 1,1,1-TCA detected in SB2-45 was 12 "g/kg. The laboratory analytical results for grab groundwater samples collected from SB1 and SB2 indicated that only PCE and TCE were detected above laboratory practical quantification limits. Results of analysis of the grab groundwater sample collected from SB1 indicated that there was a detectable concentration of 1,500 "g/L of PCE and 140 "g/L of TCE in the groundwater sample. Results of analysis of the grab groundwater sample collected from SB2 indicated that there was an approx average concentration of 700 "g/L of PCE and 195 "g/L of TCE in the groundwater sample. Three groundwater monitoring wells (MW-1, MW-2 and MW-3) were installed at the site on November 2 and 3, 2011, according to the plan presented in the SVE well installation letterreport (PRWE, 2011b). The wells were installed after being permitted by the City of Anaheim, whose inspector visited the site on the morning of November 2, 2011. All work was performed under the direct supervision of a Professional Geologist currently registered in the State of California. The three groundwater monitoring wells were constructed with 4-inch Sch. 40 PVC slotted with 0.010 inch screen from 70 to 90 feet bgs and blank well casing from 70 feet bgs to the well vault at grade. The concentrations of PCE and TCE detected in the groundwater samples collected from MW-1 during this monitoring event were considerably lower than the concentrations detected in the groundwater grab sample collected through the temporary well installed in soil boring SB-1 (subsequently converted to VE-1) in June 201. MW-1 is located within 10 feet of the location where soil boring SB-1 (subsequently converted to VE-1) was advanced to groundwater and the concentrations of PCE and TCE can be compared. The concentrations of PCE and TCE in MW-1 are 63 and 22 "g/L,

**Environmental Interest/Information System:**

AIR EMISSIONS CLASSIFICATION UNKNOWN  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)  
provides California with information on hazardous waste shipments for  
generators, transporters, and treatment, storage, and disposal  
facilities.  
RCRAInfo is a national information system that supports the Resource  
Conservation and Recovery Act (RCRA) program through the tracking of  
events and activities related to facilities that generate, transport,  
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA  
program staff to track the notification, permit, compliance, and  
corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \*Site Inspection (SI) Report  
Completed Date: 09/26/1989  
Comments: Site Inspection Done: EPA recommends Listing Site Inspection; DHS recommends hazard ranking. Reasons for recommendation of further work at the site: Soil samples collected during cleanup in 1983 were either surface samples or samples collected at a maximum of 8 ft. depth. No sampling was done below the 8 feet that was excavated and backfilled with clean soil. It is not reasonable to believe that 1200ppm of TCE would remain within 8 feet of the surface in an unlined sump.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Assessment Report  
Completed Date: 01/08/1988  
Comments: Preliminary Assessment Done: Twenty yards, three of waste, removed to BKK (04/15/83). Samples (05/11/83) show solvent contamination. Site excavated to depth of eight feet; 409 tons of soil removed to BKK. Soil sample levels (11/04/83) below TTLC and TLC.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 05/06/1987  
Comments: Site Screening Done: CERCLA grant Preliminary Assessment required.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/08/1983  
Comments: RA Soil. Site has been hazard mitigated. Clean-up complete. 294 tons

Hazardous Waste Summary:

Waste Code:	D002
Waste Description:	CORROSIVE WASTE

Waste Code:	D003
Waste Description:	REACTIVE WASTE

Waste Code:	D006
Waste Description:	CADMIUM

Waste Code:	D007
Waste Description:	CHROMIUM

Waste Code:	F006
Waste Description:	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code:	F007
Waste Description:	SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code:	F008
Waste Description:	PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code:	F009
Waste Description:	SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

Last EDR Contact: 03/30/2021  
Next Scheduled EDR Contact: 07/12/2021  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021  
Date Made Active in Reports: 02/18/2021  
Number of Days to Update: 35

Source: EPA  
Telephone: 800-424-9346  
Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 07/26/2021  
Data Release Frequency: Quarterly

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 800-424-9346
Date Made Active in Reports: 02/18/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 35	Next Scheduled EDR Contact: 07/26/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/09/2021	Source: Department of the Navy
Date Data Arrived at EDR: 02/11/2021	Telephone: 843-820-7326
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 02/08/2021
Number of Days to Update: 39	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 02/23/2021
Number of Days to Update: 13	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 02/23/2021
Number of Days to Update: 13	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/14/2020

Date Data Arrived at EDR: 12/15/2020

Date Made Active in Reports: 12/22/2020

Number of Days to Update: 7

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 12/15/2020

Next Scheduled EDR Contact: 07/05/2021

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent NPL***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/25/2021

Date Data Arrived at EDR: 01/26/2021

Date Made Active in Reports: 04/13/2021

Number of Days to Update: 77

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 04/23/2021

Next Scheduled EDR Contact: 08/09/2021

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/25/2021

Date Data Arrived at EDR: 01/26/2021

Date Made Active in Reports: 04/13/2021

Number of Days to Update: 77

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 04/23/2021

Next Scheduled EDR Contact: 08/09/2021

Data Release Frequency: Quarterly

## ***State and tribal landfill and/or solid waste disposal site lists***

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/09/2020

Date Data Arrived at EDR: 11/10/2020

Date Made Active in Reports: 01/14/2021

Number of Days to Update: 65

Source: Department of Resources Recycling and Recovery

Telephone: 916-341-6320

Data Release Frequency: Quarterly

### **State and tribal Brownfields sites**

#### BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/17/2020  
Date Data Arrived at EDR: 12/17/2020  
Date Made Active in Reports: 03/09/2021  
Number of Days to Update: 82

Source: State Water Resources Control Board  
Telephone: 916-323-7905  
Last EDR Contact: 03/23/2021  
Next Scheduled EDR Contact: 07/05/2021  
Data Release Frequency: Quarterly

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/11/2020

Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/07/2020  
Date Data Arrived at EDR: 12/09/2020  
Date Made Active in Reports: 03/02/2021

Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 07/12/2021  
Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 11/30/2020	Source: DTSC and SWRCB
Date Data Arrived at EDR: 12/01/2020	Telephone: 916-323-3400

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014  
Date Made Active in Reports: 06/17/2014

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017  
Date Data Arrived at EDR: 05/08/2018

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 01/20/2021  
Date Data Arrived at EDR: 01/21/2021

Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 06/14/2021  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2020  
Date Data Arrived at EDR: 11/12/2020  
Date Made Active in Reports: 01/25/2021

Next Scheduled EDR Contact: 08/02/2021  
Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 202-564-6023
Date Made Active in Reports: 03/05/2021	Last EDR Contact: 03/11/2021
Number of Days to Update: 50	Next Scheduled EDR Contact: 05/17/2021
	Data Release Frequency: Quarterly

### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/19/2020	Source: EPA
Date Data Arrived at EDR: 01/08/2021	Telephone: 202-566-0500
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 04/09/2021
Number of Days to Update: 73	Next Scheduled EDR Contact: 07/19/2021
	Data Release Frequency: Annually

### ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 11/18/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/23/2016	Telephone: 202-564-2501
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/31/2021
Number of Days to Update: 79	Next Scheduled EDR Contact: 07/19/2021
	Data Release Frequency: Quarterly

### FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

### FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

### MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 08/05/2020	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 08/10/2020	Telephone: 301-415-7169
Date Made Active in Reports: 10/08/2020	Last EDR Contact: 04/16/2021
Number of Days to Update: 59	Next Scheduled EDR Contact: 08/02/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2019	Source: Department of Energy
Date Data Arrived at EDR: 12/01/2020	Telephone: 202-586-8719
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 03/05/2021
Number of Days to Update: 70	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/05/2019	Telephone: N/A
Date Made Active in Reports: 11/11/2019	Last EDR Contact: 03/02/2021
Number of Days to Update: 251	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 02/05/2021
Number of Days to Update: 96	Next Scheduled EDR Contact: 05/17/2021
	Data Release Frequency: Varies

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 03/25/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ECHO: Enforcement & Compliance History Information

ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 01/02/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/08/2021	Telephone: 202-564-2280
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 04/06/2021
Number of Days to Update: 73	Next Scheduled EDR Contact: 07/19/2021
	Data Release Frequency: Quarterly

### DOCKET HWC: Hazardous Waste Compliance Docket Listing

A complete list of the Federal Agency Hazardous Waste Compliance Docket Facilities.

Date of Government Version: 11/03/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/17/2020	Telephone: 202-564-0527
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 02/26/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: Varies

### FUELS PROGRAM: EPA Fuels Program Registered Listing

This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

Date of Government Version: 02/17/2021	Source: EPA
Date Data Arrived at EDR: 02/17/2021	Telephone: 800-385-6164
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 02/17/2021
Number of Days to Update: 33	Next Scheduled EDR Contact: 05/31/2021
	Data Release Frequency: Quarterly

### CA BOND EXP. PLAN: Bond Expenditure Plan

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989	Source: Department of Health Services
Date Data Arrived at EDR: 07/27/1994	Telephone: 916-255-2118
Date Made Active in Reports: 08/02/1994	Last EDR Contact: 05/31/1994
Number of Days to Update: 6	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### CORTESE: "Cortese" Hazardous Waste & Substances Sites List

The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

Date of Government Version: 12/17/2020	Source: CAL EPA/Office of Emergency Information
Date Data Arrived at EDR: 12/17/2020	Telephone: 916-323-3400
Date Made Active in Reports: 03/09/2021	Last EDR Contact: 03/23/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### CUPA LIVERMORE-PLEASANTON: CUPA Facility Listing

list of facilities associated with the various CUPA programs in Livermore-Pleasanton

Date of Government Version: 05/01/2019	Source: Livermore-Pleasanton Fire Department
Date Data Arrived at EDR: 05/14/2019	Telephone: 925-454-2361
Date Made Active in Reports: 07/17/2019	Last EDR Contact: 02/12/2021
Number of Days to Update: 64	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Varies

### DRYCLEAN AVAQMD: Antelope Valley Air Quality Management District Drycleaner Listing

A listing of dry cleaners in the Antelope Valley Air Quality Management District.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 11/23/2020  
Date Data Arrived at EDR: 11/24/2020  
Date Made Active in Reports: 02/10/2021  
Number of Days to Update: 78

Next Scheduled EDR Contact: 06/14/2021  
Data Release Frequency: Varies

### DRYCLEAN SOUTH COAST: South Coast Air Quality Management District Drycleaner Listing

A listing of dry cleaners in the South Coast Air Quality Management District

Date of Government Version: 11/17/2020  
Date Data Arrived at EDR: 11/18/2020  
Date Made Active in Reports: 02/04/2021  
Number of Days to Update: 78

Source: South Coast Air Quality Management District  
Telephone: 909-396-3211  
Last EDR Contact: 02/22/2021  
Next Scheduled EDR Contact: 06/06/2021  
Data Release Frequency: Varies

### DRYCLEANERS: Cleaner Facilities

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner's agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

Date of Government Version: 11/23/2020  
Date Data Arrived at EDR: 11/25/2020  
Date Made Active in Reports: 02/10/2021  
Number of Days to Update: 77

Source: Department of Toxic Substance Control  
Telephone: 916-327-4498  
Last EDR Contact: 02/26/2021  
Next Scheduled EDR Contact: 06/14/2021  
Data Release Frequency: Annually

### EMI: Emissions Inventory Data

Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

Date of Government Version: 12/31/2018  
Date Data Arrived at EDR: 06/16/2020  
Date Made Active in Reports: 08/28/2020  
Number of Days to Update: 73

Source: California Air Resources Board  
Telephone: 916-322-2990  
Last EDR Contact: 03/19/2021  
Next Scheduled EDR Contact: 06/28/2021  
Data Release Frequency: Varies

### ENF: Enforcement Action Listing

A listing of Water Board Enforcement Actions. Formal is everything except Oral/Verbal Communication, Notice of Violation, Expedited Payment Letter, and Staff Enforcement Letter.

Date of Government Version: 12/31/2020  
Date Data Arrived at EDR: 01/20/2021  
Date Made Active in Reports: 04/09/2021  
Number of Days to Update: 79

Source: State Water Resources Control Board  
Telephone: 916-445-9379  
Last EDR Contact: 04/20/2021  
Next Scheduled EDR Contact: 08/02/2021  
Data Release Frequency: Varies

### Financial Assurance 1: Financial Assurance Information Listing

Financial Assurance information

Date of Government Version: 01/25/2021  
Date Data Arrived at EDR: 01/26/2021  
Date Made Active in Reports: 04/13/2021  
Number of Days to Update: 77

Source: Department of Toxic Substances Control  
Telephone: 916-255-3628  
Last EDR Contact: 04/14/2021  
Next Scheduled EDR Contact: 08/02/2021  
Data Release Frequency: Varies

### Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 11/12/2020  
Date Data Arrived at EDR: 11/13/2020  
Date Made Active in Reports: 01/29/2021  
Number of Days to Update: 77

Source: California Integrated Waste Management Board  
Telephone: 916-341-6066

Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019  
Date Data Arrived at EDR: 04/15/2020  
Date Made Active in Reports: 07/02/2020  
Number of Days to Update: 78

Source: California Environmental Protection Agency  
Telephone: 916-255-1136  
Last EDR Contact: 04/09/2021  
Next Scheduled EDR Contact: 07/19/2021  
Data Release Frequency: Annually

### ICE: ICE

Contains data pertaining to the Permitted Facilities with Inspections / Enforcements sites tracked in Envirostor.

Date of Government Version: 11/13/2020  
Date Data Arrived at EDR: 11/13/2020  
Date Made Active in Reports: 02/01/2021  
Number of Days to Update: 80

Source: Department of Toxic Substances Control  
Telephone: 877-786-9427  
Last EDR Contact: 02/17/2021  
Next Scheduled EDR Contact: 05/31/2021  
Data Release Frequency: Quarterly

### HIST CORTESE: Hazardous Waste & Substance Site List

The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

Date of Government Version: 04/01/2001  
Date Data Arrived at EDR: 01/22/2009  
Date Made Active in Reports: 04/08/2009  
Number of Days to Update: 76

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 01/22/2009  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### HWP: EnviroStor Permitted Facilities Listing

Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Date of Government Version: 11/13/2020  
Date Data Arrived at EDR: 11/13/2020  
Date Made Active in Reports: 02/01/2021  
Number of Days to Update: 80

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 02/17/2021  
Next Scheduled EDR Contact: 05/31/2021  
Data Release Frequency: Quarterly

### HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 01/05/2021  
Date Data Arrived at EDR: 01/05/2021  
Date Made Active in Reports: 03/18/2021  
Number of Days to Update: 72

Source: Department of Toxic Substances Control  
Telephone: 916-440-7145  
Last EDR Contact: 04/06/2021

Number of Days to Update: 73	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### NPDES: NPDES Permits Listing

A listing of NPDES permits, including stormwater.

Date of Government Version: 11/09/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 11/10/2020	Telephone: 916-445-9379
Date Made Active in Reports: 01/27/2021	Last EDR Contact: 02/09/2021
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Quarterly

### PEST LIC: Pesticide Regulation Licenses Listing

A listing of licenses and certificates issued by the Department of Pesticide Regulation. The DPR issues licenses and/or certificates to: Persons and businesses that apply or sell pesticides; Pest control dealers and brokers; Persons who advise on agricultural pesticide applications.

Date of Government Version: 11/30/2020	Source: Department of Pesticide Regulation
Date Data Arrived at EDR: 12/01/2020	Telephone: 916-445-4038
Date Made Active in Reports: 02/12/2021	Last EDR Contact: 03/03/2021
Number of Days to Update: 73	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Quarterly

### PROC: Certified Processors Database

A listing of certified processors.

Date of Government Version: 03/09/2021	Source: Department of Conservation
Date Data Arrived at EDR: 03/09/2021	Telephone: 916-323-3836
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Quarterly

### NOTIFY 65: Proposition 65 Records

Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

Date of Government Version: 12/07/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/09/2020	Telephone: 916-445-3846
Date Made Active in Reports: 12/10/2020	Last EDR Contact: 03/12/2021
Number of Days to Update: 1	Next Scheduled EDR Contact: 06/28/2021
	Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### UIC: UIC Listing

A listing of wells identified as underground injection wells, in the California Oil and Gas Wells database.

Date of Government Version: 03/08/2021	Source: Department of Conservation
Date Data Arrived at EDR: 03/09/2021	Telephone: 916-445-2408
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Varies

### UIC GEO: Underground Injection Control Sites (GEOTRACKER)

Underground control injection sites

Date of Government Version: 03/08/2021	Source: State Water Resource Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/30/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 21	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Varies

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 11/19/2019	Source: RWQCB, Central Valley Region
Date Data Arrived at EDR: 01/07/2020	Telephone: 559-445-5577
Date Made Active in Reports: 03/09/2020	Last EDR Contact: 04/09/2021
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/19/2021
	Data Release Frequency: Varies

### WDS: Waste Discharge System

Sites which have been issued waste discharge requirements.

Date of Government Version: 06/19/2007	Source: State Water Resources Control Board
Date Data Arrived at EDR: 06/20/2007	Telephone: 916-341-5227

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 03/09/2021

Next Scheduled EDR Contact: 07/19/2021  
Data Release Frequency: Semi-Annually

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

Data Release Frequency: Varies

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### VENTURA COUNTY:

#### BWT VENTURA: Business Plan, Hazardous Waste Producers, and Operating Underground Tanks

The BWT list indicates by site address whether the Environmental Health Division has Business Plan (B), Waste Producer (W), and/or Underground Tank (T) information.

Date of Government Version: 12/28/2020

Date Data Arrived at EDR: 01/29/2021

Date Made Active in Reports: 04/22/2021

Number of Days to Update: 83

Source: Ventura County Environmental Health Division

Telephone: 805-654-2813

Last EDR Contact: 04/19/2021

Next Scheduled EDR Contact: 08/02/2021

Data Release Frequency: Quarterly

#### LF VENTURA: Inventory of Illegal Abandoned and Inactive Sites

Ventura County Inventory of Closed, Illegal Abandoned, and Inactive Sites.

Date of Government Version: 12/01/2011

Date Data Arrived at EDR: 12/01/2011

Date Made Active in Reports: 01/19/2012

Number of Days to Update: 49

Source: Environmental Health Division

Telephone: 805-654-2813

Last EDR Contact: 03/25/2021

Next Scheduled EDR Contact: 07/12/2021

Data Release Frequency: No Update Planned

#### LUST VENTURA: Listing of Underground Tank Cleanup Sites

Ventura County Underground Storage Tank Cleanup Sites (LUST).

Date of Government Version: 05/29/2008

Date Data Arrived at EDR: 06/24/2008

Date Made Active in Reports: 07/31/2008

Number of Days to Update: 37

Source: Environmental Health Division

Telephone: 805-654-2813

Last EDR Contact: 02/08/2021

Next Scheduled EDR Contact: 05/24/2021

Data Release Frequency: No Update Planned

#### MED WASTE VENTURA: Medical Waste Program List

To protect public health and safety and the environment from potential exposure to disease causing agents, the Environmental Health Division Medical Waste Program regulates the generation, handling, storage, treatment and disposal of medical waste throughout the County.

Date of Government Version: 03/29/2021

Date Data Arrived at EDR: 04/21/2021

Date Made Active in Reports: 04/23/2021

Number of Days to Update: 2

Source: Ventura County Resource Management Agency

Telephone: 805-654-2813

Last EDR Contact: 04/19/2021

Next Scheduled EDR Contact: 08/02/2021

Data Release Frequency: Quarterly

#### UST VENTURA: Underground Tank Closed Sites List

Ventura County Operating Underground Storage Tank Sites (UST)/Underground Tank Closed Sites List.

Date of Government Version: 03/01/2021

Date Data Arrived at EDR: 03/09/2021

Date Made Active in Reports: 03/31/2021

Number of Days to Update: 22

Source: Environmental Health Division

Telephone: 805-654-2813

Last EDR Contact: 03/09/2021

Next Scheduled EDR Contact: 06/21/2021

Data Release Frequency: Quarterly

### YOLO COUNTY:

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UST YOLO: Underground Storage Tank Comprehensive Facility Report  
Underground storage tank sites located in Yolo county.

Date of Government Version: 12/21/2020  
Date Data Arrived at EDR: 12/23/2020  
Date Made Active in Reports: 01/04/2021  
Number of Days to Update: 12

Next Scheduled EDR Contact: 08/09/2021  
Data Release Frequency: Varies

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020  
Date Data Arrived at EDR: 10/20/2020  
Date Made Active in Reports: 11/02/2020

This information is provided on a best effort basis and Endeavor Business Media does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of Endeavor Business Media.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

PHASE B-WATER TREATMENT PLANTS AND WATER SUPPLY  
SOUTH SANTA CRUZ STREET  
ANAHEIM, CA 92805

### **TARGET PROPERTY COORDINATES**

Latitude (North):	33.797281 - 33° 47' 50.21"
Longitude (West):	117.894686 - 117° 53' 40.87"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	417178.8
UTM Y (Meters):	3739845.2
Elevation:	144 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	5641294 ANAHEIM, CA
Version Date:	2012
East Map:	5641308 ORANGE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06059C0142J	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06059C0141J	FEMA FIRM Flood data

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ANAHEIM	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile North
Site Name:	ITASCO
Site EPA ID Number:	CAD982359879
Groundwater Flow Direction:	S IN THE TALBERT AQUIFER.
Inferred Depth to Water:	approximately 100 feet.
Hydraulic Connection:	The site area is characterized by discontinuous clay layers within the upper 100 feet of the subsurface. The Talbert aquifer underlies these clay layers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

8G	1/2 - 1 Mile SE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Cenozoic
System:	Quaternary

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
2	16 inches	40 inches	stratified sand to sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
3	40 inches	46 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
4	46 inches	59 inches	stratified sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

#### Soil Map ID: 2

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

### Soil Map ID: 3

Soil Component Name: HUENEME

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	27 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	27 inches	59 inches	stratified sand to silt loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basement	Not Reported	Not Reported	Not Reported	Not Reported

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

RGA LF.....	Recovered Government Archive Solid Waste Facilities List
RGA LUST.....	Recovered Government Archive Leaking Underground Storage Tank

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ANAHEIM HOUSE OF HOR Site ID: 0905384 EPA Id: CA0001896661	10651 BROOKHURST ST.	NW 0 - 1/8 (0.111 mi.)	6	19

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 6 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Lists of Landfill / Solid Waste Disposal Sites**

SWRCY: A listing of recycling facilities in California.

A review of the SWRCY list, as provided by EDR, and dated 03/09/2021 has revealed that there is 1 SWRCY site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Project Type: Cleanup Program Site  
Status: Completed - Case Closed  
Status Date: 04/01/2008  
Lead Agency: SANTA ANA RWQCB (REGION 8)  
Last Correspondence Date: 04/01/2008  
Release Type: Unknown  
Contaminant(s) of Concern: Tetrachloroethylene (PCE)  
Media of Concern: Other Groundwater (uses other than drinking water)  
Past Use(s) that Caused Contamination: Not reported  
Human Health Exposure Controlled: Not reported  
Human Health Exposure Controlled Date: Not reported  
Groundwater Migration Controlled: Not reported  
Groundwater Migration Controlled Date: Not reported

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

##### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

##### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

##### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Next Scheduled EDR Contact: 11/28/2011  
Data Release Frequency: No Update Planned

### ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021  
Date Made Active in Reports: 02/09/2021  
Number of Days to Update: 26

Next Scheduled EDR Contact: 07/12/2021  
Data Release Frequency: Quarterly

### ***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019  
Date Data Arrived at EDR: 04/05/2019  
Date Made Active in Reports: 05/14/2019  
Number of Days to Update: 39

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 03/30/2021  
Next Scheduled EDR Contact: 07/12/2021  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021  
Date Made Active in Reports: 02/18/2021  
Number of Days to Update: 35

Telephone: 800-424-9346  
Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 07/26/2021  
Data Release Frequency: Quarterly

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 800-424-9346
Date Made Active in Reports: 02/18/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 35	Next Scheduled EDR Contact: 07/26/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/09/2021	Source: Department of the Navy
Date Data Arrived at EDR: 02/11/2021	Telephone: 843-820-7326
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 02/08/2021
Number of Days to Update: 39	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/14/2020

Date Data Arrived at EDR: 12/15/2020

Date Made Active in Reports: 12/22/2020

Number of Days to Update: 7

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 12/15/2020

Next Scheduled EDR Contact: 07/05/2021

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent NPL***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/25/2021

Date Data Arrived at EDR: 01/26/2021

Date Made Active in Reports: 04/13/2021

Number of Days to Update: 77

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 04/23/2021

Next Scheduled EDR Contact: 08/09/2021

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/25/2021

Date Data Arrived at EDR: 01/26/2021

Date Made Active in Reports: 04/13/2021

Last EDR Contact: 03/23/2021  
Next Scheduled EDR Contact: 07/05/2021  
Data Release Frequency: Quarterly

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/11/2020  
Date Data Arrived at EDR: 12/11/2020  
Date Made Active in Reports: 03/02/2021  
Number of Days to Update: 81

Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/07/2020  
Date Data Arrived at EDR: 12/09/2020  
Date Made Active in Reports: 03/02/2021

Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 07/12/2021  
Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 11/30/2020	Source: DTSC and SWRCB
Date Data Arrived at EDR: 12/01/2020	Telephone: 916-323-3400

	Data Release Frequency: Semi-Annually

#### **LDS: Land Disposal Sites Listing (GEOTRACKER)**

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/08/2021	Source: State Water Quality Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Quarterly

#### **MCS: Military Cleanup Sites Listing (GEOTRACKER)**

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/08/2021	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012

Date Data Arrived at EDR: 01/03/2013

Date Made Active in Reports: 02/22/2013

Number of Days to Update: 50

Source: FirstSearch

Telephone: N/A

Last EDR Contact: 01/03/2013

Next Scheduled EDR Contact: N/A

Data Release Frequency: No Update Planned

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020

Date Data Arrived at EDR: 12/17/2020

Date Made Active in Reports: 12/22/2020

Number of Days to Update: 5

Source: Environmental Protection Agency

Telephone: (415) 495-8895

Last EDR Contact: 03/23/2021

Next Scheduled EDR Contact: 07/05/2021

Data Release Frequency: Quarterly

#### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 02/11/2021

Date Data Arrived at EDR: 02/17/2021

Date Made Active in Reports: 04/05/2021

Number of Days to Update: 47

Source: U.S. Army Corps of Engineers

Telephone: 202-528-4285

Last EDR Contact: 02/17/2021

Next Scheduled EDR Contact: 05/31/2021

Data Release Frequency: Varies

#### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005

Date Data Arrived at EDR: 11/10/2006

Date Made Active in Reports: 01/11/2007

Number of Days to Update: 62

Source: USGS

Telephone: 888-275-8747

Last EDR Contact: 04/16/2021

Next Scheduled EDR Contact: 07/26/2021

Data Release Frequency: Semi-Annually

#### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018

Date Data Arrived at EDR: 04/11/2018

Date Made Active in Reports: 11/06/2019

Number of Days to Update: 574

Source: U.S. Geological Survey

Telephone: 888-275-8747

Last EDR Contact: 04/05/2021

Next Scheduled EDR Contact: 07/19/2021

Data Release Frequency: N/A

#### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014  
Date Made Active in Reports: 06/17/2014

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017  
Date Data Arrived at EDR: 05/08/2018

Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 06/14/2021  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2020  
Date Data Arrived at EDR: 11/12/2020  
Date Made Active in Reports: 01/25/2021

Last EDR Contact: 04/19/2021  
Next Scheduled EDR Contact: 08/02/2021  
Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995

Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

### MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 08/05/2020	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 08/10/2020	Telephone: 301-415-7169
Date Made Active in Reports: 10/08/2020	Last EDR Contact: 04/16/2021
Number of Days to Update: 59	Next Scheduled EDR Contact: 08/02/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2019	Source: Department of Energy
Date Data Arrived at EDR: 12/01/2020	Telephone: 202-586-8719
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 03/05/2021
Number of Days to Update: 70	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/05/2019	Telephone: N/A
Date Made Active in Reports: 11/11/2019	Last EDR Contact: 03/02/2021
Number of Days to Update: 251	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 02/05/2021
Number of Days to Update: 96	Next Scheduled EDR Contact: 05/17/2021
	Data Release Frequency: Varies

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 03/25/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Data Release Frequency: Varies

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

	Data Release Frequency: Quarterly

### DOCKET HWC: Hazardous Waste Compliance Docket Listing

A complete list of the Federal Agency Hazardous Waste Compliance Docket Facilities.

Date of Government Version: 11/03/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/17/2020	Telephone: 202-564-0527
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 02/26/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: Varies

### FUELS PROGRAM: EPA Fuels Program Registered Listing

This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

Date of Government Version: 02/17/2021	Source: EPA
Date Data Arrived at EDR: 02/17/2021	Telephone: 800-385-6164
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 02/17/2021
Number of Days to Update: 33	Next Scheduled EDR Contact: 05/31/2021
	Data Release Frequency: Quarterly

### CA BOND EXP. PLAN: Bond Expenditure Plan

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989	Source: Department of Health Services
Date Data Arrived at EDR: 07/27/1994	Telephone: 916-255-2118
Date Made Active in Reports: 08/02/1994	Last EDR Contact: 05/31/1994
Number of Days to Update: 6	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### CORTESE: "Cortese" Hazardous Waste & Substances Sites List

The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

Date of Government Version: 12/17/2020	Source: CAL EPA/Office of Emergency Information
Date Data Arrived at EDR: 12/17/2020	Telephone: 916-323-3400
Date Made Active in Reports: 03/09/2021	Last EDR Contact: 03/23/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### CUPA LIVERMORE-PLEASANTON: CUPA Facility Listing

list of facilities associated with the various CUPA programs in Livermore-Pleasanton

Date of Government Version: 05/01/2019	Source: Livermore-Pleasanton Fire Department
Date Data Arrived at EDR: 05/14/2019	Telephone: 925-454-2361
Date Made Active in Reports: 07/17/2019	Last EDR Contact: 02/12/2021
Number of Days to Update: 64	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Varies

### DRYCLEAN AVAQMD: Antelope Valley Air Quality Management District Drycleaner Listing

A listing of dry cleaners in the Antelope Valley Air Quality Management District.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 11/23/2020  
Date Data Arrived at EDR: 11/24/2020  
Date Made Active in Reports: 02/10/2021

Next Scheduled EDR Contact: 05/24/2021  
Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019  
Date Data Arrived at EDR: 04/15/2020  
Date Made Active in Reports: 07/02/2020  
Number of Days to Update: 78

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 11/19/2019	Source: RWQCB, Central Valley Region
Date Data Arrived at EDR: 01/07/2020	Telephone: 559-445-5577

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 03/09/2021

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A  
Date Data Arrived at EDR: N/A

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
