### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020  
Date Data Arrived at EDR: 10/20/2020  
Date Made Active in Reports: 11/02/2020

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

PHASE B-WATER TREATMENT PLANTS AND WATER SUPPLY  
EAST ELLSWORTH AVENUE  
ANAHEIM, CA 92805

### **TARGET PROPERTY COORDINATES**

Latitude (North):	33.830192 - 33° 49' 48.69"
Longitude (West):	117.911129 - 117° 54' 40.06"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	415688.9
UTM Y (Meters):	3743507.5
Elevation:	157 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	5641294 ANAHEIM, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ANAHEIM	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

For additional site information, refer to Physical Setting Source Map Findings.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

#### Soil Map ID: 2

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

### Soil Map ID: 3

Soil Component Name: HUENEME

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	27 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	27 inches	59 inches	stratified sand to silt loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## **TOPOGRAPHIC INFORMATION**

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## **HYDROLOGIC INFORMATION**

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## **HYDROGEOLOGIC INFORMATION**

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## **GEOLOGIC INFORMATION**

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RGA LUST.....	Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ITASCO Site ID: 0903198 EPA Id: CAD982359879	2211 E HOWELL ST	N 1/4 - 1/2 (0.272 mi.)	H53	185

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

#### ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State

## EXECUTIVE SUMMARY

Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 21 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/25/2021 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

**RCRA NonGen / NLR:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Completed Document Type: Environmental Oversight Agreement Application  
Completed Date: 06/16/2017  
Comments: Alan Klein, Consultant for the District, submitted application for DTSC oversight of a PEA via email on 6/16/17.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 05/23/2017  
Comments: Phase I ESA 05/23/17

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Workplan  
Completed Date: 01/23/2018  
Comments: DTSC approved PEA Workplan

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Voluntary Cleanup Agreement Termination Notification  
Completed Date: 01/17/2019  
Comments: Letter from Anaheim Elementary School District terminating the voluntary oversight agreement for the project.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Environmental Oversight Agreement  
Completed Date: 09/08/2017  
Comments: Fully executed EOA sent to District on 9/8/17.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 07/10/2017  
Comments: DTSC prepared a cost estimate for the 2017-2018 fiscal year

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Inactive Status Letter  
Completed Date: 07/27/2018  
Comments: Inactive Status Letter

**Violations:**

Site ID: 74528  
Site Name: TESORO (SHELL) 68888  
Violation Date: 02-12-2020  
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7,  
Section(s) 25292.1(a)  
Violation Description: Failure to operate the UST system to prevent unauthorized releases  
including leaks, spills, and/or overfills.  
Violation Notes: Returned to compliance on 02/12/2020. W/O 420 sensor in use as  
overflow device. sensor was inop when tested  
Violation Division: Anaheim City Fire Department  
Violation Program: UST  
Violation Source: CERS

Site ID: 74528  
Site Name: TESORO (SHELL) 68888  
Violation Date: 02-07-2019  
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23,  
Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill  
prevention equipment requirements: Alert the transfer operator when  
the tank is 90 percent full by restricting the flow into the tank or  
triggering an audible and visual alarm; or Restrict delivery of flow  
to the tank at least 30 minutes before the tank overfills, provided  
the restriction occurs when the tank is filled to no more than 95  
percent of capacity; and activate an audible alarm at least five  
minutes before the tank overfills; or Provide positive shut-off of  
flow to the tank when the tank is filled to no more than 95 percent of  
capacity; or Provide positive shut-off of flow to the tank so that  
none of the fittings located on the top of the tank are exposed to  
product due to overfilling. Install/retrofit overfill prevention

Violation Date: 02-11-2015  
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665  
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 04/17/2019. Paper Filters

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \*Site Inspection (SI) Report  
Completed Date: 09/26/1989  
Comments: Site Inspection Done: EPA recommends Listing Site Inspection; DHS recommends hazard ranking. Reasons for recommendation of further work at the site: Soil samples collected during cleanup in 1983 were either surface samples or samples collected at a maximum of 8 ft.

depth. No sampling was done below the 8 feet that was excavated and backfilled with clean soil. It is not reasonable to believe that 1200ppm of TCE would remain within 8 feet of the surface in an unlined sump.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Assessment Report  
Completed Date: 01/08/1988  
Comments: Preliminary Assessment Done: Twenty yards, three of waste, removed to BKK (04/15/83). Samples (05/11/83) show solvent contamination. Site excavated to depth of eight feet; 409 tons of soil removed to BKK. Soil sample levels (11/04/83) below TTLC and TLC.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 05/06/1987  
Comments: Site Screening Done: CERCLA grant Preliminary Assessment required.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/08/1983  
Comments: RA Soil. Site has been hazard mitigated. Clean-up complete. 294 tons of contaminated soil was removed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \* Discovery  
Completed Date: 05/28/1981  
Comments: Facility identified via tip from Orange County Sanitary District - firm acid rinse goes into manhole.

**Environmental Interest/Information System:**

AIR EMISSIONS CLASSIFICATION UNKNOWN  
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**WDS:**

Name: CALIFORNIA CUSTOM SHAPES INC  
Address: 1800 TALBOT WY  
City: ANAHEIM  
Facility ID: Santa Ana River 30I014758  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 8  
Facility Telephone: 7149399640  
Facility Contact: TED LEBLANC  
Agency Name: CALIFORNIA CUSTOM SHAPES INC  
Agency Address: 1800 E TALBOT WAY  
Agency City,St,Zip: ANAHEIM 92805  
Agency Contact: TED LEBLANC  
Agency Telephone: 7149399640

POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

used for leaded gasoline, and later for unleaded gasoline. The 6,000-gallon UST was removed from the Site in August 1988, and the 10,000-gallon UST was removed from the Site in February 1998. Wayne Perry Construction conducted a preliminary site assessment in October 1986. One slant boring (B-1) was drilled to a total depth of 55 feet below ground surface (bgs). The boring was angled underneath a 6,000-gallon fiberglass fuel UST (installed in 1976). Hydrocarbon contamination was detected in soil samples collected between 25 and 55 feet bgs. Reports show that the 25-foot sample contained 22,000 milligrams per kilogram (mg/kg) of total petroleum hydrocarbons (TPH) and the 55-foot sample contained 12 mg/kg of TPH. The 6,000-gallon UST was removed in August 1988. Aqua Science Engineers, Inc. (ASE) conducted an additional site assessment in March 1989. Boring N-1 was drilled in the center of the former location of the removed 6,000-gallon UST to a total depth of approximately 65 feet bgs. Two other soil borings (N-2 and N-3) were drilled on opposite sides of the initial boring to depths of approximately 35 feet bgs. Laboratory analyses indicated the presence of hydrocarbon-impacted soil underlying the former UST pit between 15 and 65 feet bgs. TPH as gasoline (TPHg) was detected in soil sample N-2-25' at a concentration of 12,000 mg/kg and in soil sample N-1-65' at 730 mg/kg. TPH as diesel (TPHd) was detected in soil sample N-1-25' at 12,000 mg/kg. According to ASE, the 6,000-gallon UST contained unleaded gasoline from 1976 to the early 1980's, and then diesel fuel until 1986 or 1987. Based on results of the previous assessments, the Orange County Health Care Agency (OCHCA) directed Norco to conduct an additional site assessment to determine the vertical and lateral extents of hydrocarbon-impacted soil and groundwater. In August 1989, five soil borings were drilled and sampled as part of the assessment. Borings NT-1 and NT-5 were drilled to depths of approximately 90 feet bgs; boring NT-4 was to 85 feet bgs; and borings NT-2 and NT3 were drilled to 80 feet bgs. Groundwater was encountered at 75 to 85 feet bgs during drilling. Laboratory analyses indicated the presence of impacted soil underlying the Site from 30 to 75 feet bgs. TPHg concentrations remained below detection limits in all but one sample (2,600. mg/kg in soil sample NT1-40'). The soil sample with the highest benzene concentration (11,000 parts per billion [ppb]) was NT1-40'. Groundwater grab samples were collected from the boreholes prior to backfilling. Aromatic hydrocarbons were detected in groundwater samples collected from all five boreholes. Benzene-in-groundwater concentrations ranged from 2,200 ppb in sample NT-5 to 69,000 ppb in sample NT-1. A soil vapor extraction/heat injection system was installed and put into operation in June 1990 by ASE. The system operated until October 1994. Throughout its operational history, ASE estimated that approximately 45,000 gallons of gasoline was removed from the subsurface soil. ASE conducted another subsurface assessment in February 1990 based on an OCHCA directive. Three groundwater monitoring wells (GMW-1 through GMW-3) were installed at the Site. Two soil samples from each boring (one from the capillary fringe zone and one from the saturated zone) were collected during drilling and analyzed for TPHg and for benzene, toluene, ethylbenzene, and xylenes (BTEX). All results were below detection limits. A groundwater pumping and treatment system was installed in November and December 1990. The system was started in February 1991. Groundwater from GMW-1 was extracted and treated using air stripping and carbon filtration. The system was stopped in May 1991 due to decreased benzene concentrations in groundwater. The

**S101299244**

system was restarted in April 1993 following an increase of benzene concentrations. Alternating between wells GMW-1 and GMW-2, groundwater was pumped and treated until October 1994. Throughout its operational history, ASE estimated that approximately 400,000 gallons of groundwater was pumped and treated. ASE conducted an additional site assessment in May 1994 to evaluate if there was a release from an existing 10,000-gallon gasoline UST. Two angle soil borings were advanced beneath the UST to linear depths of approximately 30 and 40 feet bgs B-1 and B-2, respectively. TPHg in soil concentrations were observed at low levels, primarily between 30 and 35 feet bgs. The maximum TPHg concentration was 11 mg/kg in sample B2-35'. The maximum detected benzene concentration in soil was 410 micrograms per kilogram (a%g/kg) in sample B2-35'. The integrity of the UST was also tested at that time, with results showing it was "tight;" as a result, ASA asserted that it likely did not contribute to any subsurface release. The 10,000-gallon UST was removed in February 1999. A subsurface assessment was conducted by Levine-Fricke (LFR) in June and July 1995 under contract with the SARWQCB. The purpose of the assessment was to determine if the contamination found underlying the Site was due to an up-gradient source. Two soil borings (LF-1 and LF-2) were drilled to 110 feet bgs. Both boreholes were subsequently converted to groundwater monitoring wells (MWLF-1 and MWLF-2). Concentrations of TPHd remained below detection limits in all soil samples. There were two detectable TPHg concentrations, both from boring LF-1. The 75-foot sample contained 0.18 mg/kg TPHg and the 83 foot sample contained 0.14 mg/kg TPHg. Periodic groundwater sampling conducted over a one-month period showed benzene concentrations in groundwater ranging from below the detection limit (0.3 micrograms per liter [a%g/L]) to 300 a%g/L (MWLF-1). On January 16 and 17, 2001 and on June 4, 5, and 6, 2001, SGI conducted site assessment and well installation activities. Two new upgradient wells (TSG-MW-4 and TSG-MW-5) were installed in January 2001 to further investigate the upgradient extent of dissolved hydrocarbons. The three new downgradient, off-site monitoring wells (TSG-MW-6, TSG-MW-7, and TSG-MW-8) were installed in June 2001 to investigate the downgradient extent of dissolved hydrocarbons. Beginning in the Second Quarter 2002, a quarterly groundwater monitoring and sampling (M&S) program was initiated by SGI under the direction of the SARWQCB. The M&S program initially included biweekly liquid-phase hydrocarbon (LPH) removal from select wells. Additional assessment activities were conducted in June and July 2003, including drilling and sampling of five boreholes to depths ranging from 100 to 110 feet bgs and one borehole to a depth of 75 feet bgs. All five 100-foot boreholes were then converted to dual-nested groundwater monitoring wells, and the 75-foot borehole was converted to a single-casing groundwater monitoring well. Monitoring well GMW-2 was drilled out and abandoned due to its screened interval being entirely below top of groundwater. Between February and December 2006, SGI conducted additional assessment activities as directed by the SARWQCB following their review of SGI's January 9, 2004 assessment report. These activities included drilling and sampling of five soil borings (SGI-B-1 through SGI-B-5) to approximately 85 feet bgs. Groundwater grab samples were collected from four of these borings (SGI-B-1 through SGI-B-4). Borings SGI-MW-13 through SGI-MW-17 were also drilled, and sampled during this assessment. The boreholes were advanced to depths between 100 and 105 feet bgs. Crossgradient boreholes SGI-MW-13 and SGI-MW-16 and downgradient borehole SGI-MW-15 were converted to dual-nested

groundwater monitoring wells. A second, shallower borehole was drilled adjacent to upgradient borehole SGI-MW-17, and these two boreholes were converted to dual-completed well cluster. Downgradient borehole SGI-MW-14 was converted to a single-casing groundwater monitoring well. Further assessment was conducted to adequately define the extent of hydrocarbon-affected groundwater at the Site and site vicinity, as well as further assess the shallow soil vapor plume to the north of the former USTs. Groundwater monitoring well SGI-MW-18S/D was installed within the 1547 South State College Boulevard building, situated between TSG-MW-4 and SGI-MW-17S/D. Two discretely zoned soil vapor probes (SGI-VP-1S and SGI-VP-1D) were also installed within the borehole for SGI-MW-18S. Also, a linear transect of ten shallow soil vapor probes (SGI-VP-2 through SGI-VP-11) were installed at an approximate 50-foot spacing along the northern boundary of the property (adjacent to the railroad right-of-way), in the vicinity of well SGI-MW17S/D. An additional groundwater monitoring well was installed southwest of well SGI-MW-15S/D. Well SGI-MW-19S/D was installed on the southeast corner of the Westside property, (located at 1111 East Howell Avenue, Anaheim, California). Groundwater samples collected from well SGI-MW-19S/D provide general downgradient plume delineation. A soil vapor survey was conducted using the vapor probes, and select soil samples were analyzed from the soil borings advanced for the monitoring well installations. Between 2002 and 2015, various free product removal technologies were employed at the Site and a reported 61 gallons of free product were removed. From May 2013 to May 2014 another SVE system was operated at the Site. The results of this SVE operation suggested a more powerful SVE system was necessary, and a new SVE system was installed and full scale operation started in July 2015. As of June 2016, the new SVE system had reportedly removed 60,878 pounds of hydrocarbons. The SVE system operation ceased on June 29, 2016 per AQMD Rule 1147 requirements for nitrogen oxides (NOx) testing. The SVE System was restarted in April 2020.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Environmental Oversight Agreement  
Completed Date: 06/10/2009  
Comments: Signed agreement sent (FedEx) to District.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Agreement Terminated Notification  
Completed Date: 08/17/2009  
Comments: On August 17, 2009, DTSC received a letter from the District, dated August 12, 2009, with notification that the District is terminating the Agreement effective immediately. The letter also indicates, however, that a summary data report will be submitted to DTSC when ready.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Cost Recovery Closeout Memo  
Completed Date: 10/23/2009  
Comments: On 10/23/2009, DTSC prepared & transmitted the project close out Cost Recovery Unit Memorandum.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Workplan  
Completed Date: 07/03/2009  
Comments: Via email on 07/03/2009, DTSC noted that the site sampling plan appeared consistent with discussions with the District's consultant and provided comments on the site sampling plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 07/10/2009  
Comments: On July 10, 2009, fieldwork was completed per District's consultant.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Notice  
Completed Date: 07/07/2009  
Comments: Via email on July 7, 2009, DTSC received a final copy of the Field Work Notice and was informed that the Notice was posted at the 1010 and 1016 E. Katella properties and delivered to properties within the line of sight of the proposed school property.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report  
Completed Date: 10/22/2009  
Comments: DTSC did not review the Environmental Assessment Summary Report since the District terminated the EOA (August 2009) prior to receipt of the Report. The report summarized the soil and soil vapor sampling results from fieldwork conducted in July 2009. Maximum concentrations

in soil gas include the following: 0.15 ug/l of naphthalene; 580 ug/l of PCE; 20 ug/l of TCE. The risk evaluation estimated the cancer risk due to chlorinated compounds via the vapor intrusion pathway as 1.5 x 10-5 and the total hazard index as 17. PCE is the primary contributor to risk and hazard.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

### ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021  
Date Made Active in Reports: 02/09/2021

Telephone: 703-603-8704  
Last EDR Contact: 03/30/2021  
Next Scheduled EDR Contact: 07/12/2021  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020  
Date Data Arrived at EDR: 01/14/2021  
Date Made Active in Reports: 02/18/2021  
Number of Days to Update: 35

Telephone: 800-424-9346  
Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 07/26/2021  
Data Release Frequency: Quarterly

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 800-424-9346
Date Made Active in Reports: 02/18/2021	Last EDR Contact: 04/01/2021
Number of Days to Update: 35	Next Scheduled EDR Contact: 07/26/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 03/23/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/09/2021	Source: Department of the Navy
Date Data Arrived at EDR: 02/11/2021	Telephone: 843-820-7326
Date Made Active in Reports: 03/22/2021	Last EDR Contact: 02/08/2021
Number of Days to Update: 39	Next Scheduled EDR Contact: 05/24/2021
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 02/23/2021
Number of Days to Update: 13	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 02/23/2021
Number of Days to Update: 13	Next Scheduled EDR Contact: 06/06/2021
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/14/2020

Date Data Arrived at EDR: 12/15/2020

Date Made Active in Reports: 12/22/2020

Number of Days to Update: 7

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 12/15/2020

Next Scheduled EDR Contact: 07/05/2021

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent NPL***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/25/2021

Date Data Arrived at EDR: 01/26/2021

Date Made Active in Reports: 04/13/2021

Number of Days to Update: 77

Telephone: 916-323-3400

Last EDR Contact: 04/23/2021

Next Scheduled EDR Contact: 08/09/2021

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/25/2021

#### UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

Data Release Frequency: Quarterly

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/11/2020  
Date Data Arrived at EDR: 12/11/2020

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/07/2020

Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

	Data Release Frequency: Semi-Annually

### **Records of Emergency Release Reports**

#### **HMIRS: Hazardous Materials Information Reporting System**

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/16/2020	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 12/17/2020	Telephone: 202-366-4555
Date Made Active in Reports: 03/12/2021	Last EDR Contact: 03/24/2021
Number of Days to Update: 85	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Quarterly

#### **CHMIRS: California Hazardous Material Incident Report System**

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 12/31/2020	Source: Office of Emergency Services
Date Data Arrived at EDR: 01/20/2021	Telephone: 916-845-8400
Date Made Active in Reports: 04/08/2021	Last EDR Contact: 04/20/2021
Number of Days to Update: 78	Next Scheduled EDR Contact: 08/02/2021
	Data Release Frequency: Semi-Annually

#### **LDS: Land Disposal Sites Listing (GEOTRACKER)**

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/08/2021	Source: State Water Quality Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Quarterly

#### **MCS: Military Cleanup Sites Listing (GEOTRACKER)**

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/08/2021	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 03/09/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/21/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012

Source: FirstSearch

Date Data Arrived at EDR: 01/03/2013

Telephone: N/A

Date Made Active in Reports: 02/22/2013

Last EDR Contact: 01/03/2013

Number of Days to Update: 50

Next Scheduled EDR Contact: N/A

Data Release Frequency: No Update Planned

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020

Date Data Arrived at EDR: 12/17/2020

Telephone: (415) 495-8895

Date Made Active in Reports: 12/22/2020

Last EDR Contact: 03/23/2021

Number of Days to Update: 5

Next Scheduled EDR Contact: 07/05/2021

Data Release Frequency: Quarterly

#### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 02/11/2021

Source: U.S. Army Corps of Engineers

Date Data Arrived at EDR: 02/17/2021

Telephone: 202-528-4285

Date Made Active in Reports: 04/05/2021

Last EDR Contact: 02/17/2021

Number of Days to Update: 47

Next Scheduled EDR Contact: 05/31/2021

Data Release Frequency: Varies

#### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005

Source: USGS

Date Data Arrived at EDR: 11/10/2006

Telephone: 888-275-8747

Date Made Active in Reports: 01/11/2007

Last EDR Contact: 04/16/2021

Number of Days to Update: 62

Next Scheduled EDR Contact: 07/26/2021

Data Release Frequency: Semi-Annually

#### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018

Date Data Arrived at EDR: 04/11/2018

Telephone: 888-275-8747

Date Made Active in Reports: 11/06/2019

Last EDR Contact: 04/05/2021

Number of Days to Update: 574

Next Scheduled EDR Contact: 07/19/2021

Data Release Frequency: N/A

#### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014  
Date Made Active in Reports: 06/17/2014

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Last EDR Contact: 04/01/2021  
Next Scheduled EDR Contact: 06/14/2021  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2020

Last EDR Contact: 04/19/2021  
Next Scheduled EDR Contact: 08/02/2021  
Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995

	Data Release Frequency: Quarterly

### FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

### FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

### MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 08/05/2020	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 08/10/2020	Telephone: 301-415-7169
Date Made Active in Reports: 10/08/2020	Last EDR Contact: 04/16/2021
Number of Days to Update: 59	Next Scheduled EDR Contact: 08/02/2021
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2019	Source: Department of Energy
Date Data Arrived at EDR: 12/01/2020	Telephone: 202-586-8719
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 03/05/2021
Number of Days to Update: 70	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/05/2019	Telephone: N/A
Date Made Active in Reports: 11/11/2019	Last EDR Contact: 03/02/2021
Number of Days to Update: 251	Next Scheduled EDR Contact: 06/14/2021
	Data Release Frequency: Varies

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 02/05/2021
Number of Days to Update: 96	Next Scheduled EDR Contact: 05/17/2021
	Data Release Frequency: Varies

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 03/25/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016  
Date Data Arrived at EDR: 10/26/2016  
Date Made Active in Reports: 02/03/2017

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Data Release Frequency: Varies

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### LOS ANGELES AST: Active & Inactive AST Inventory

A listing of active & inactive above ground petroleum storage tank site locations, located in the City of Los Angeles.

Date of Government Version: 06/01/2019	Source: Los Angeles Fire Department
Date Data Arrived at EDR: 06/25/2019	Telephone: 213-978-3800
Date Made Active in Reports: 08/22/2019	Last EDR Contact: 03/26/2021
Number of Days to Update: 58	Next Scheduled EDR Contact: 07/05/2021
	Data Release Frequency: Varies

### LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 02/04/2021	Source: Los Angeles County Department of Public Works
Date Data Arrived at EDR: 04/16/2021	Telephone: 626-458-6973
Date Made Active in Reports: 04/21/2021	Last EDR Contact: 04/16/2021
Number of Days to Update: 5	Next Scheduled EDR Contact: 07/26/2021
	Data Release Frequency: No Update Planned

### LOS ANGELES HM: Active & Inactive Hazardous Materials Inventory

A listing of active & inactive hazardous materials facility locations, located in the City of Los Angeles.

Date of Government Version: 06/01/2019	Source: Los Angeles Fire Department
Date Data Arrived at EDR: 06/25/2019	Telephone: 213-978-3800

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020  
Date Data Arrived at EDR: 10/20/2020  
Date Made Active in Reports: 11/02/2020

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Version Date:	2012
East Map:	5641308 ORANGE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06059C0142J	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06059C0014E	FEMA Q3 Flood data
06059C0153J	FEMA FIRM Flood data
06059C0021E	FEMA Q3 Flood data
06059C0161J	FEMA FIRM Flood data

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ANAHEIM	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile North
Site Name:	Neville Chem Co
Site EPA ID Number:	CAD008364150
Groundwater Flow Direction:	South
Inferred Depth to Water:	75 feet to 90 feet.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

7G	0 - 1/8 Mile NNE	SW
8G	1/8 - 1/4 Mile West	Not Reported
9G	1/2 - 1 Mile West	Not Reported
10G	1/2 - 1 Mile West	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Cenozoic

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: HUENEME

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	27 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	27 inches	59 inches	stratified sand to silt loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

#### Soil Map ID: 2

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

### Soil Map ID: 3

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
2	16 inches	40 inches	stratified sand to sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
3	40 inches	46 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
4	46 inches	59 inches	stratified sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

## **TOPOGRAPHIC INFORMATION**

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## **HYDROLOGIC INFORMATION**

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Telephone: 916-445-0411

## **HYDROGEOLOGIC INFORMATION**

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## **GEOLOGIC INFORMATION**

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

**APPENDIX F**  
**NOISE AND VIBRATION ANALYSIS**

July 22, 2021

Jonathan Sanks  
Environmental Services and Safety Manager  
City of Anaheim, Public Utilities Department  
201 South Anaheim Boulevard, Suite 1101  
Anaheim, California 92805

**VIA EMAIL**  
**JSanks@anaheim.net**

**Subject:** Noise and Vibration Analysis Technical Memorandum for the Groundwater Treatment Plants Phase B and Groundwater Supply Wells

Dear Mr. Sanks:

This Letter Report presents the results of the noise and vibration analysis for the proposed Groundwater Treatment Plants Phase B and Groundwater Supply Wells in the City of Anaheim, California (hereinafter referred to as the “Project”). This analysis addresses the potential noise and vibration impacts associated with the Project in accordance with the California Environmental Quality Act (CEQA) (*California Public Resources Code* §21000 et seq.) and the State CEQA Guidelines (*California Code of Regulations*, Title 14, §15000 et seq.).

## **PROJECT SETTING AND DESCRIPTION**

The Anaheim Public Utilities (APU) proposes construction of ion-exchange groundwater treatment, production, and distribution facilities at five separate sites in the City of Anaheim. The Project site locations are shown on Exhibits 1a–e, Regional Location and Local Vicinity, and are described in more detail below. The proposed Project would install water treatment facilities at five sites. The number and size of vessels at each treatment site will depend on the volume of water requiring treatment at each location. While estimated dimensions are included in this technical memorandum, exact sizes may vary to ensure the treatment systems can adequately supply the necessary volume of water. To ensure continuous availability of water, the treatment systems would operate up to 24 hours per day. Two new water supply wells would be installed at the Santa Cruz Site, and additional wells would be rehabilitated to improve their water production capacity.

### **Project Locations and Descriptions**

#### ***Willow Park Site***

The Willow Park Site is an approximate 2.1-acre disturbed site occupied by an existing public restroom facility and APU building. The site is located within Willow Park, which contains both active and passive uses, including a basketball court, play structure, baseball diamond, and seating areas. Single-family residential uses are located in the immediate area, across Crone Avenue and Loara Street from the park and immediately adjacent to the park to the west. The Project includes installation of a groundwater treatment plant at an existing APU groundwater supply well site at the Willow Park site. The proposed resin truck turnaround area would infringe on

225 South Lake Avenue

Page 2

the existing basketball court. Because a new walkway would be installed there, the basketball court would need to be relocated, and a second basketball court would be installed. In addition, minor renovations (i.e., new paint, stalls, sinks, etc.) would be made at the restroom facility that is attached to the well building.

### ***Katella Avenue Site***

The Katella Avenue Site is located south of Katella Avenue and west of the railroad tracks, is an approximately 0.7-acre site that is fully disturbed and paved, and is located north and west of the Angel Stadium parking lot, and north and east of The Grove of Anaheim. The Project includes installation of a groundwater treatment plant at an existing APU groundwater supply well site and a perimeter 8-foot high masonry wall.

### ***Santa Cruz Site***

The Santa Cruz Site is located along Anaheim Way and Santa Cruz Street. The 3-acre site consists of bare ground and is located west of I-5. Additionally, there is an approximately 1.3-acre pipeline work area that extends along Anaheim Way and west along and within the right-of-way of Orangewood Avenue.. The Project includes installation of a groundwater treatment plant and two new groundwater supply wells, and the replacement of approximately one mile of pipeline beneath Anaheim Way and Orangewood Avenue at the Santa Cruz site. Additionally, a new emergency backup generator, and a new control building would be constructed at the site.

### ***Brookhurst Site***

The Brookhurst Site is an approximately 1.4-acre site located east of Brookhurst Street and north of railroad tracks. The site has been subject to historic disturbance and is currently occupied by a small utility building, gravel parking area, and ornamental landscaping, including palms and other ornamental trees. The Project includes installation of a groundwater treatment plant at an existing APU groundwater supply well site.

### ***Downtown Site***

The Downtown Site is located on the corner of Ellsworth Avenue and Claudina Street, in the vicinity of an existing APU equipment. The site is approximately 0.4 acres in size and is currently occupied by an APU building and public surface parking lot that primarily serves the Anaheim Packing District, Farmer's Park, and Anaheim Brewery, as well as other dining and retail areas along Anaheim Boulevard. Other immediately adjacent uses include multi-family residences to the west as well as single-family residences across Ellsworth Avenue and Claudina Street. The Project includes installation of a groundwater treatment plant, at an existing APU groundwater supply well site.

## **Noise and Vibration Basics and Terminology**

### ***Noise***

“Sound” is a vibratory disturbance created by a moving or vibrating source and is capable of being detected. “Noise” is defined as sound that is loud, unpleasant, unexpected, or undesired and may therefore be classified as a more specific group of sounds. The effects of noise on people can include general annoyance; interference with speech communication; sleep disturbance; and, in the extreme, hearing impairment (Caltrans 2013).

Jonathan Sanks  
July 22, 2021  
Page 3

Sound pressure levels are described in units called the decibel (dB). Decibels are measured on a logarithmic scale. A doubling of the energy of a noise source (such as doubling of traffic volume) would increase the noise level by 3 dB. The human ear is not equally sensitive to all frequencies within the sound spectrum. To accommodate this phenomenon, the A-scale was devised; the A-weighted decibel scale (dBA) approximates the frequency response of the average healthy ear when listening to most ordinary everyday sounds and is used in this analysis.

Human perception of noise has no simple correlation with acoustical energy. Due to subjective thresholds of tolerance, the annoyance of a given noise source is perceived very differently from person to person. The most common sounds vary between 40 dBA (very quiet) to 100 dBA (very loud). Normal conversation at 3 feet is approximately 60 dBA, while loud jet engine noises at 1,000 feet equate to 100 dBA, which can cause serious discomfort. Table 1 shows the relationship of various noise levels in dBA to commonly experienced noise events.

**TABLE 1**  
**NOISE LEVELS FOR COMMON EVENTS**

Common Outdoor Activities	Noise Level (dBA)	Common Indoor Activities
	110	Rock Band
Jet fly-over at 300 m (1,000 ft)	100	
Gas lawn mower at 1 m (3 ft)	90	
Diesel truck at 15 m (50 ft) at 80 km/hr (50 mph)	80	Food blender at 1 m (3 ft); garbage disposal at 1 m (3 ft)
Noisy urban area, daytime gas lawn mower at 30 m (100 ft)	70	Vacuum cleaner at 3 m (10 ft)
Commercial area, heavy traffic at 90 m (300 ft)	60	Normal speech at 1 m (3 ft)
Quiet urban daytime	50	Large business office, dishwasher in next room
Quiet urban nighttime	40	Theater, large conference room (background)
Quiet suburban nighttime	30	Library
Quiet rural nighttime	20	Bedroom at night, concert hall (background)
	10	Broadcast/recording studio
Lowest threshold of human hearing	0	Lowest threshold of human hearing
dBA: A-weighted decibels; m: meter; ft: feet; km/hr: kilometers per hour; mph: miles per hour		
Source: Caltrans 2013.		

Two noise sources do not “sound twice as loud” as one source. As stated above, a doubling of noise sources results in a noise level increase of 3 dBA. It is widely accepted that (1) the average healthy ear can barely perceive changes of a 3 dBA increase or decrease, (2) a change of 5 dBA is readily perceptible, and (3) an increase (decrease) of 10 dBA sounds twice (half) as loud (Caltrans 2013).

Jonathan Sanks  
July 22, 2021  
Page 4

From the source to the receiver, noise changes both in the level and frequency spectrum. The most obvious change is the decrease in noise level as the distance from the source increases. Sound from a small localized source (approximating a “point” source) radiates uniformly outward as it travels away from the source in a spherical pattern. For point sources, such as heating, ventilation, and air conditioning (HVAC) units or construction equipment, the sound level attenuates (or drops off) at a rate of 6 dBA for each doubling of distance (i.e., if the noise level is 70 dBA at 25 feet, it is 64 dBA at 50 feet). Vehicle movement on a road makes the source of the sound appear to emanate from a line (line source) rather than a point when viewed over some time interval. The sound level attenuates or drops off at a rate of 3 dBA per doubling of distance for line sources.

A large object in the path between a noise source and a receiver can significantly attenuate noise levels at that receiver location. The amount of attenuation provided by this “shielding” depends on the size of the object and the frequencies of the noise levels. Natural terrain or landform features as well as man-made features (e.g., buildings and walls) can significantly alter noise exposure levels. For a noise barrier to work, it must be high enough and long enough to block the view from the receiver to a road or to the noise source. Effective noise barriers can reduce outdoor noise levels at the receptor by up to 15 dBA.

Several rating scales (or noise “metrics”) exist to analyze effects of noise on a community. These scales include the equivalent noise level ( $L_{eq}$ ), including  $L_{max}$  and  $L_{min}$ , which are respectively the highest and lowest A-weighted sound levels that occur during a noise event, and the Community Noise Equivalent Level (CNEL). Average noise levels over a period of minutes or hours are usually expressed as dBA  $L_{eq}$ , which is the equivalent noise level for that period of time. The period of time averaging may be specified; for example,  $L_{eq(3)}$  would be a three-hour average. Noise of short duration (i.e., substantially less than the averaging period) is averaged into ambient noise during the period of interest. Thus, a loud noise lasting many seconds or a few minutes may have minimal effect on the measured sound level averaged over a one-hour period.

To evaluate community noise impacts, CNEL was developed to account for human sensitivity to nighttime noise. CNEL represents the 24-hour average sound level with a penalty for noise occurring at night. The CNEL computation divides a 24-hour day into three periods: daytime (7:00 AM to 7:00 PM), evening (7:00 PM to 10:00 PM), and nighttime (10:00 PM to 7:00 AM). The evening sound levels are assigned a 5-dBA penalty, and the nighttime sound levels are assigned a 10-dBA penalty prior to averaging with daytime hourly sound levels.

### ***Vibration***

Vibration is an oscillatory motion through a solid medium in which the motion’s amplitude can be described in terms of displacement, velocity, or acceleration. Vibration is normally associated with activities such as railroads or vibration-intensive stationary sources, but can also be associated with construction equipment such as jackhammers, pile drivers, and hydraulic hammers. Vibration displacement is the distance that a point on a surface moves away from its original static position. The instantaneous speed that a point on a surface moves is described as the velocity, and the rate of change of the speed is described as the acceleration. Each of these descriptors can be used to correlate vibration to human response, building damage, and acceptable equipment vibration levels. During construction of a project, the operation of construction equipment can cause groundborne vibration. During the operational phase of a project, receptors may be subject to levels of vibration that can cause annoyance due to noise generated from vibration of a structure or items within a structure. Analysis of this type of vibration is best measured in velocity and acceleration.

Jonathan Sanks  
July 22, 2021  
Page 5

The three main wave types of concern in the propagation of groundborne vibrations are surface or Rayleigh waves, compression or P-waves, and shear or S-waves.

- Surface or Rayleigh waves travel along the ground surface. They carry most of their energy along an expanding cylindrical wave front, similar to the ripples produced by throwing a rock into a lake. The particle motion is more or less perpendicular to the direction of propagation (known as retrograde elliptical).
- Compression or P-waves are body waves that carry their energy along an expanding spherical wave front. The particle motion in these waves is longitudinal, in a push-pull motion. P-waves are analogous to airborne sound waves.
- Shear or S-waves are also body waves, carrying their energy along an expanding spherical wave front. Unlike P-waves, however, the particle motion is transverse, or perpendicular to the direction of propagation.

The peak particle velocity (ppv) or the root mean square (rms) velocity is usually used to describe vibration amplitudes. The ppv is defined as the maximum instantaneous peak of the vibration signal and the rms is defined as the square root of the average of the squared amplitude of the signal. The ppv is more appropriate for evaluating potential building damage and also used for evaluating human response.

The units for ppv velocity are normally inches per second (in/sec). Often, vibration is presented and discussed in dB units in order to compress the range of numbers required to describe the vibration. In this study, all ppv velocity levels are in in/sec and all vibration levels are in dB relative to one microinch per second. The threshold of perception is approximately 0.3 ppv. Typically, groundborne vibration generated by human activities attenuates rapidly with distance from the source of the vibration. Even the more persistent Rayleigh waves decrease relatively quickly as they move away from the source of the vibration. Manmade vibration problems are, therefore, usually confined to short distances (500 feet or less) from the source.

Construction generally includes a wide range of activities that can generate groundborne vibration. In general, blasting and demolition of structures generate the highest vibrations. Heavy trucks can also generate groundborne vibrations, which vary depending on vehicle type, weight, and pavement conditions. Potholes, pavement joints, discontinuities, differential settlement of pavement, and other anomalies all increase the vibration levels from vehicles passing over a road surface. Construction vibration is normally of greater concern than vibration of normal traffic on streets and freeways with smooth pavement conditions. Trains generate substantial quantities of vibration due to their engines, steel wheels, and heavy loads.

## **EXISTING CONDITIONS**

### **Noise Measurements**

The existing noise environment at the Project Sites are primarily influenced by traffic noise on nearby roads. For the purpose of this noise analysis, the study area includes the Project Sites, the areas immediately adjacent to the Project Sites, and the land uses adjacent to the roadway segments where the Project adds vehicular trips to the roadway system.

Psomas conducted ambient noise surveys on May 11, 2021 at each of the Project Sites. Short-term noise level measurements (20 minutes) were taken using a Larson Davis Laboratories Model 831 integrating sound level meter. This sound level meter was placed at each Project site at a height of approximately 5 feet above the ground and equipped with a windscreen. The locations of the noise monitoring locations

Jonathan Sanks  
July 22, 2021  
Page 6

at the different Project Sites are shown in Exhibits 2a through 2e, Noise Monitoring Locations, of this memorandum.

Noise levels of existing conditions at each of the Project Sites are shown in Table 2. Noise levels are due primarily to background traffic noise, with the exception of the Downtown site which was affected by nearby industrial uses. Noise levels at the Santa Cruz site was dominated by traffic noise along the I-5 freeway.

**TABLE 2  
NOISE MEASUREMENTS OF EXISTING CONDITIONS**

<b>Location</b>	<b>Minimum (dBA)</b>	<b>L<sub>eq</sub> (Average) (dBA)</b>	<b>Maximum (dBA)</b>
Willow Park Site	47	66	85
Katella Avenue Site	52	56	68
Santa Cruz Site	66	70	78
Brookhurst Site	37	50	64
Downtown Site	57	62	84
Noise measurement data can be found in Attachment A of this memorandum.			

### **Noise-Sensitive Receptors**

The State of California defines noise-sensitive receptors as those land uses that require serenity or are otherwise adversely affected by noise events or conditions (State of California 2015). Noise-sensitive land uses typically include residences, hospitals, churches, schools, and libraries, which could all be adversely affected by an increase in noise levels. Noise sensitive receptors in the vicinity of each proposed Project Site include the following:

#### ***Willow Park Site***

The nearest noise sensitive uses to this site are residential uses located west of the proposed relocated basketball courts and south of West Crone Avenue, located approximately 60 feet away from the southern boundary of the Willow Park Site and 200 feet from the proposed pumps. Single-family residences are located to the north, west, and east of the site at boundaries of Willow Park. The nearest non-residential noise sensitive use is Ball Junior High School located approximately 1,700 feet away.

#### ***Katella Avenue Site***

This site is located away from noise sensitive uses with existing multi-residential uses located approximately 400 feet to the west of the Project site. An event auditorium (City National Grove) is located immediately adjacent to the Project Site (west), while a commercial building resides approximately 170 feet to the northwest. Angels' Stadium and parking are located to the south and southeast of the Project site.

Jonathan Sanks  
July 22, 2021  
Page 7

### ***Santa Cruz Site***

This site is adjacent to the Interstate 5 (I-5) Freeway to the west. There are commercial land-uses to the north and east at approximately 50 feet away. The nearest residential receptor is a multi-family complex located approximately 410 feet to the northeast.

As part of the development of the Santa Cruz site, pipelines would be installed in the right-of-way (ROW) along the East Orangewood Avenue to Mountain View Avenue and within the ROW along South Anaheim Way to Gene Autry Way. The pipeline work would be located near single- and multifamily residential uses East Orangewood Avenue. The pipeline work would be adjacent a commercial land use along Anaheim Way. Additionally, two wells would be drilled at the Santa Cruz Site. The noise generated during well drilling activities would not occur near noise sensitive residential uses, with the nearest residences located approximately 500 feet away from the Project Site.

### ***Brookhurst Site***

This Site is located east of Brookhurst Street and north of railroad tracks. The easement continues eastward and there are no sensitive receptors along the easement which is also bounded to the south by railroad tracks. To the north and south are single-family residences with the nearest receptors located approximately 5 feet and 60 feet away, respectively.

### ***Downtown Site***

This Site is located near noise sensitive uses with the nearest existing residential uses located approximately 25 feet west of the site, with additional residential land uses 35 and 45 feet away to the south and east, respectively. There is a commercial property to the north of the Project site, approximately 110 feet away with surface parking in between.

### **Regulatory Setting**

Public agencies have established noise guidelines and standards to protect citizens from potential hearing damage and various other adverse physiological and social effects associated with noise. For the evaluation of potential noise impacts, this analysis assumes compliance with the City of Anaheim's Noise Section (Anaheim General Plan) and the City of Anaheim's Municipal Code (AMC).

### ***City of Anaheim Municipal Code***

The following sections of the AMC apply to the Project:

#### **Chapter 6.70 Sound Pressure Levels**

##### **6.70.010 Established.**

Sound produced in excess of the sound pressure levels permitted herein are hereby determined to be objectionable and constitute an infringement upon the right and quiet enjoyment of property in this City.

No person shall within the City create any sound radiated for extended periods from any premises which produces a sound pressure level at any point on the property line in excess of sixty decibels (Re 0.0002 Microbar) read on the A-scale of a sound level meter. Readings shall be taken in accordance with the instrument manufacturer's instructions, using the slowest meter response.

Jonathan Sanks  
July 22, 2021  
Page 8

The sound level measuring microphone shall be placed at any point on the property line, but not closer than three (3) feet from any wall and not less than three (3) feet above the ground, where the above listed maximum sound pressure level shall apply. At any point the measured level shall be the average of not less than three (3) readings taken at two (2) minute intervals. To have valid readings, the levels must be five (5) decibels or more above the levels prevailing at the same point when the sources of the alleged objectionable sound are not operating.

Sound pressure levels shall be measured with a sound level meter manufactured according to American Standard S1.4-1961 published by the American Standards Association, Inc., New York City, New York.

Traffic sounds sound created by emergency activities and sound created by governmental units or their contractors shall be exempt from the applications of this chapter. Sound created by construction or building repair of any premises within the City shall be exempt from the applications of this chapter during the hours of 7:00 a.m. to 7:00 p.m. Additional work hours may be permitted if deemed necessary by the Director of Public Works or Building Official. (Ord. 2526 § 1 (part); June 18, 1968; Ord. 3400 § 1; February 11, 1975: Ord. 6020 § 1; April 25, 2006.)

### ***City of Anaheim General Plan***

In the *City of Anaheim General Plan* Noise Element, the City adopted land use-noise compatibility standards shown in Table 3, *Land Use Compatibility for Noise Exposure*. The land use compatibility standards are typically used to identify “normally acceptable”, conditionally acceptable”, ‘normally unacceptable’ and ‘clearly unacceptable’ noise levels for varying land uses and may be used to ascertain construction noise impacts to the surrounding land uses.

**TABLE 3**

Land Use Category	Community Noise Exposure L <sub>dn</sub> or CNEL, dB						
	55	60	65	70	75	80	85
Residential – Low-Density Single-Family, Duplex, Mobile Homes							
Residential – Multiple-Family Homes							
Transient Lodging - Motels, Hotels							
Schools, Libraries, Churches, Hospitals, Nursing Homes							
Auditoriums, Concert Halls, Amphitheaters							
Sports Arena, Outdoor Spectator Sports							
Playgrounds, Neighborhood Parks							
Golf Courses, Riding Stables, Water Recreation, Cemeteries							
Office Buildings, Business, Commercial and Professional							
Industrial, Manufacturing, Utilities, Agriculture							
Normally Acceptable	Conditionally Acceptable	Normally Unacceptable	Clearly Unacceptable				
Specified land use is satisfactory based upon the assumption that any buildings involved are of normal, conventional construction, without any special noise insulation requirements.	New construction or development should be undertaken only after a detailed analysis of the noise reduction requirement is made and needed noise insulation features are included in the design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning, will normally suffice.	New construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design. Outdoor areas must be shielded.	New construction or development should generally not be undertaken. Construction costs to make the indoor environment acceptable would be prohibitive, and the outdoor environment would not be acceptable.				

L<sub>dn</sub>: day-night noise level; CNEL: Community Noise Equivalent Level; dB: decibels

Source: City of Anaheim 2004

Jonathan Sanks  
July 22, 2021  
Page 10

For single-family residential land uses impacted by construction, the ‘normally acceptable’ and ‘conditionally acceptable’ community noise levels according to the compatibility matrix would be 60 dBA and 70 dBA CNEL, respectively. If the noise levels from construction are below 65 dBA CNEL then no changes to the intended construction plans are required, however, if the levels are above 65 dBA CNEL then noise reduction measures may need to be considered to reduce the noise impact to the surrounding land uses.

Additionally, the Noise Element has established goals/policies to manage the noise impact throughout the City of Anaheim. The pertinent goals are:

***Land Use Planning and Design***

- Goal 1.1, Policy 1: Update City regulations to adopt Land Use Compatibility for Community Noise Exposure and California Interior and Exterior Noise Standards as appropriate.
- Goal 1.1, Policy 2: Continue to enforce acceptable noise standards consistent with health and quality of life goals and employ effective techniques of noise abatement through such means as noise ordinance, building codes, and subdivision and zoning regulations.

***Non-Transportation Related Noise Sources***

- Goal 3.1, Policy 1: Discourage new projects located in commercial or entertainment areas from exceeding stationary-source noise standards at the property line of proximate residential or commercial uses, as appropriate.
- Goal 3.1, Policy 2: Prohibit new industrial uses from exceeding commercial or residential stationary-source noise standards at the most proximate land uses, as appropriate. (Industrial noise may spill over to proximate industrial uses so long as the combined noise does not exceed the appropriate industrial standards.)
- Goal 3.1, Policy 3: Enforce standards to regulate noise from construction activities. Particular emphasis shall be placed on the restriction of the hours in which work other than emergency work may occur. Discourage construction work on weekends or holidays except in the case of construction proximate to schools where these operations could disturb the classroom environment.
- Goal 3.1, Policy 4: Require that construction equipment operate with mufflers and intake silencers no less effective than originally equipped.
- Goal 3.1, Policy 5: Encourage the use of portable noise barriers for heavy equipment operations performed within 100 feet of existing residences or make applicant provide evidence to why the use of such barriers is infeasible.

Jonathan Sanks

Page 11

## NOISE IMPACT ANALYSIS

The following questions correspond to the questions in the Noise section of the Initial Study Checklist in Appendix G of the State CEQA Guidelines.

**Question NOI-1**      **Would the Project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?**

### Construction Noise

The Project involves construction of a groundwater treatment plant and ancillary water distribution at five (5) distinct sites. The Santa Cruz Site would also include the construction of two (2) new water supply wells. Local land uses proximate to the Project Sites would be subject to elevated noise levels due to the operation of construction equipment. Construction activities are carried out in discrete steps, each of which has its own mix of equipment and, consequently, its own noise characteristics. Construction phases may include pavement cutting and removal, trenching, pipeline construction, backfilling, and water treatment infrastructure construction. Construction of the Project would be limited to weekdays for an eight-hour period between 7:00 AM to 7:00 PM, with no activity at night or on weekends or federal holidays, except for during well drilling activities at the Santa Cruz Site, which would require overnight construction activities. The Project would be exempt from the requirements of Section 6.70, as the Project would result in sound created by governmental units or their contractors and is deemed necessary by the Director of Public Works or Building Official. This would allow for Project construction to exceed 60 decibels at the property line, and to allow for construction to occur from 7 PM to 7 AM (i.e., overnight). Although the AMC has no restrictions on the magnitude of construction noise generated between 7:00 AM to 7:00 PM during weekdays, and the Project is exempt from the requirements of this ordinance, the Noise Element requires the land use compatibility matrix to be satisfied for community noise.

Construction noise levels reported in the USEPA's *Noise from Construction Equipment and Operations, Building Equipment, and Home Appliances* were used to estimate future construction noise levels for the Project (USEPA 1971). Typically, the estimated construction noise levels are governed primarily by equipment that produces the highest noise levels. Construction noise levels for each generalized construction phase (i.e., ground clearing/demolition, excavation, foundation/building construction, paving, and site cleanup) are based on a typical construction equipment mix for a public works project and do not include use of atypical and/or vibration-intensive equipment (e.g., impact pile drivers). All construction equipment is anticipated to be fitted with the original equipment manufacturer or manufacturer approved equivalent mufflers or intake silencers to maintain, at minimum, published noise emission levels. The construction phases for each of the distinct Project Sites vary due to the anticipated construction needs. In addition, well drilling construction would occur at the Santa Cruz Site, and well rehabilitation activities would occur at the Katella Avenue and Brookhurst Sites.

The degree to which noise-sensitive receptors are affected by construction activities depends heavily on their proximity. Estimated noise levels at the nearest noise sensitive uses attributable to the development of the Project Sites are shown in Table 4.

Jonathan Sanks  
 July 22, 2021  
 Page 13

For construction of each Project Sites' groundwater treatment system (i.e., not including pipelines), Table 4 shows both the maximum and average distance construction noise levels. While individual pieces of construction equipment may operate at the closest distance, the projected noise created from construction is a composite of heavy equipment pieces working together and the physical limitations of proximity due to the size of the equipment would preclude all pieces working at the most proximate location. Maximum noise levels represent the noise levels from construction occurring at the closest point of the Project site to the closest point of the property line of the nearest land use/receptor. These maximum noise levels would occur only intermittently because construction equipment moves around the site and is at the site boundary for only short periods of time. The average distance noise levels represent the noise exposure to sensitive uses based on the distance from the center of the on-site area to the closest property line of a noise sensitive use/receptor. Because noise exposure at average distances constitute the majority of noise exposure during construction activities, this condition will be used for the evaluation to determine whether mitigation measures are required.

Noise levels at the receptor sites would be reduced as the listener moves away from the Project boundary or is shielded by structures in the receptor area. Noise levels from anticipated Project-related construction activities for the five distinct Project Sites vary at the following locations:

#### ***Willow Park Site***

- Maximum Noise Levels 88 to 94 dBA  $L_{eq}$
- Average Noise Levels 64 to 70 dBA  $L_{eq}$

The Willow Park Site is surrounded by single-family residences land uses. Although the AMC has no restrictions on the magnitude of construction noise generated between 7:00 AM to 7:00 PM during weekdays, the Noise Element requires the land use compatibility matrix to be satisfied for community noise. For the site to be 'conditionally acceptable' (70 dBA CNEL) under noise exposures at an average distance, the Equivalent Continuous Noise Levels (dBA  $L_{eq}$ ) due to construction need to be 75 dBA or less for an 8 hour work day. The average noise levels satisfies this requirement. Therefore, this site does not require mitigation measures to reduce Project-related construction measures.

#### ***Katella Avenue Site***

- Maximum Noise Levels 88 to 94 dBA  $L_{eq}$
- Average Noise Levels 67 to 73 dBA  $L_{eq}$

The Katella Avenue Site is adjacent to an auditorium and commercial land uses. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site, while the Noise Element's community noise compatibility matrix of 'conditionally acceptable' (77 dBA CNEL) for commercial land uses, the  $L_{eq}$  due to construction needs to be 81 dBA or less for an 8 hour work day. The average noise levels satisfies this requirement. Therefore, this site does not require mitigation measures to reduce Project related construction measures.

Multi-family residential land uses located 400 feet away are represented by the average distance noise level. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site, while the Noise Element's community noise compatibility matrix of 'conditionally acceptable' (70 dBA CNEL) for residential land uses, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8 hour work days. The anticipated construction noise levels at the multi-family residential land uses satisfy the Noise Element's compatibility matrix requirements.

Jonathan Sanks  
 July 22, 2021  
 Page 14

### ***Santa Cruz Site***

- Maximum Noise Levels 77 to 86 dBA  $L_{eq}$
- Average Noise Levels 62 to 71 dBA  $L_{eq}$

The Santa Cruz Site is adjacent to the I-5 thoroughfare and commercial and industrial land uses. Per Section 6.70 of the AMC, there are no restrictions on construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, the Noise Element's community noise compatibility matrix of 'conditionally acceptable' (77 dBA CNEL) for commercial land uses require the construction noise to be 81 dBA or less for an 8-hour workday. The average noise levels satisfies this requirement.

Multi-family residential land uses located 500 feet away are represented by the average distance noise level. Per Section 6.70 of the AMC, there are no restrictions to construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, due to the Noise Element's community noise compatibility matrix of 'conditionally acceptable' (70 dBA CNEL) for residential land uses. Nighttime construction activities are penalized under the CNEL noise metric to account for people's sensitivity to noise during sleeping hours. The 24-hour noise level for well drilling construction activities is 78 dBA CNEL would exceed the conditionally acceptable noise level of 70 dBA CNEL. The anticipated construction noise levels at the multi-family residential land uses exceed the Noise Element's compatibility matrix requirements prior to the implementation of mitigation measures.

Although the Project would be exempt from the noise limits and construction timing constraints of Section 6.70 of the AMC, 24-hour well drilling activities would result in noise levels which exceed the City's noise limits. Mitigation measure (MM) NOI-1 would reduce noise from well drilling activities during nighttime hours. MM NOI-1 requires that 24-foot tall sound barriers, with a minimum sound transmission class (STC) of 25, shall be erected along all sides of the construction areas where continuous construction activities would occur. As such, with implementation of MM NOI-1 noise levels would be reduced by 15-20 dBA CNEL and would result in noise levels of 63 dBA CNEL which is below the construction noise level limit of 70 dBA CNEL. As such, there would be a less than significant impact with mitigation.

### ***Pipeline Installation (Santa Cruz Site)***

- Maximum Noise Levels 84 to 90 dBA  $L_{eq}$
- Average Noise Levels 54 to 60 dBA  $L_{eq}$  at East Orangewood Avenue
- Average Noise Levels 60 to 66 dBA  $L_{eq}$  at South Anaheim Way

The development of pipelines along East Orangewood Avenue would involve approximately 3,900 lineal feet of pipeline construction. Approximately 800 lineal feet of pipelines would be developed along South Anaheim Way. Pipeline construction would occur in a linear manner and result in a relatively brief noise exposure at an individual receptor location. This activity would occur proximate to residences and commercial land uses along East Orangewood Avenue and commercial land use along South Anaheim Way. The AMC has no construction noise restrictions between 7:00 AM to 7:00 PM during weekdays for this site, while the Noise Element's community noise compatibility matrix has a designation of 'conditionally acceptable' (70 dBA CNEL) for residential land uses. As such, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8-hour workday. While noise levels would be high when equipment are working directly in front of a specific location at nearby residential uses (i.e., during maximum noise level conditions), the duration of exposure would be relatively minimal and noise levels under the condition of an average distance would result in noise levels that would be below the City's community noise compatibility matrix.

Jonathan Sanks  
 July 22, 2021  
 Page 15

The land use to the east of the site is a commercial land use with a compatibility matrix of ‘conditionally acceptable’ (77 dBA CNEL) requirement of 81 dBA ( $L_{eq}$ ) or less for an 8-hour workday. While maximum noise levels would be high during construction equipment placed directly in front of a specific location at local commercial uses, the duration of exposure would be relatively minimal, and average noise levels would be below the City’s community noise compatibility matrix. As such, there would be less than significant impacts and no mitigation measures are required.

### ***Brookhurst Site***

- Maximum Noise Levels 92 to 98 dBA  $L_{eq}$
- Average Noise Levels 70 to 76 dBA  $L_{eq}$

The Brookhurst Site is adjacent to single-family residences land uses at the northern and southern Project site boundaries. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, due to the Noise Element’s community noise compatibility matrix of ‘conditionally acceptable’ (70 dBA CNEL) for residential land uses, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8-hour work day. The average noise levels do not satisfy this requirement. Therefore, MM NOI-2 requires implementation of the following to reduce to construction noise from the Brookhurst site to a less than significant level: construction of 10-foot-tall plywood barriers along the northern and southern boundaries of the Project site to shield the construction equipment from nearby residential receptors. The barriers shall reduce the estimated average construction noise levels to below 70 dBA ( $L_{eq}$ ). With implementation of MM NOI-2, impacts to sensitive receptors near the Brookhurst Site would be reduced to less than significant.

The land use to the west is commercial with a compatibility matrix of ‘conditionally acceptable’ (77 dBA CNEL) requirement of 81 dBA ( $L_{eq}$ ) or less for an 8-hour workday. The average noise levels satisfy this requirement. Therefore, this site does not require additional mitigation measures.

### ***Downtown Site***

- Maximum Noise Levels 82 to 88 dBA  $L_{eq}$
- Average Noise Levels 76 to 82 dBA  $L_{eq}$

The Downtown Site is adjacent to residential land uses to the western, eastern, and southern boundaries. The AMC has no restrictions of construction noise between 7:00 AM to 7:00 PM during weekdays for this site. However, the Noise Element’s community noise compatibility matrix of ‘conditionally acceptable’ (70 dBA CNEL) applies for residential land uses. As such, the  $L_{eq}$  due to construction needs to be 75 dBA or less for an 8-hour workday. The maximum and average noise levels do not satisfy this requirement. The land use to the north is commercial with a compatibility matrix of ‘conditionally acceptable’ (77 dBA CNEL) requirement of 81 dBA ( $L_{eq}$ ) or less for an 8-hour workday. The average noise levels do not satisfy this requirement. Therefore, MM NOI-3 requires implementation of the following to reduce to construction noise from the Downtown site to a less than significant level: construction of 10-foot-tall plywood barriers along the northern, southern, and eastern Project boundary lines and 20-foot-tall plywood barriers along the western boundary line of the Project site to shield construction equipment from the residential receptors. The residential land uses along the west Project boundary are three stories tall and will have direct-line-of sight to the Project site without a tall barrier. The barriers shall reduce the estimated average construction noise levels to the surrounding land uses below 75 dBA ( $L_{eq}$ ). With implementation of MM NOI-3, impacts to nearby residential receptors would be less than significant.

Jonathan Sanks  
July 22, 2021  
Page 16

### **Operational Noise**

The Project Sites would generate noise during the operations phase of the Project. Noise produced during the operations phase include both traffic-related noise from worker trips as well as stationary sources of noise from pumps and generators. In terms of traffic noise, an existing employee would visit the Project Sites to monitor and maintain the facilities and would generate nominal new vehicle trips related to these activities. As such, the Project would not generate a substantial increase in traffic-related noise. For stationary sources of noise, the use of the emergency generator would be very limited during testing and maintenance and the infrequent occurrence of power outages. The generator would be properly muffled and enclosed in protective shrouds/housing for security reasons and to minimize noise transmission. The well and booster pump equipment would be the primary sources of long-term noise due to the constant use for water treatment and conveyance. The pumps for the Project Sites are rated at 50 horsepower (HP) with the exception of two 400 HP pumps at the Santa Cruz site.

Table 5 presents the estimated noise levels for plant operations at each of the Project Sites with respect to the nearest land uses. Noise is attenuated by the distance of the noise source to noise receptors. Note that any structures that obstruct the view of the pumps to noise receptors would also further attenuate noise levels, however no acoustical reductions were accounted in this analysis.

As discussed previously, the AMC, under Section 6.70.010, has set forth allowable noise levels of no greater than 60 decibels at any point at the property line. However, as described above, the Project would be exempt from the requirements of Section 6.70, as the Project would result in sound created by governmental units or their contractors and is deemed necessary by the Director of Public Works or Building Official. Regardless, for best practices, the following analysis ensures that operational noise levels from the Project would be 60 or less at the property line. Table 5 shows that all the Project Sites, with the exception of the Downtown site, would not exceed Section 6.70 provisions with noise levels being below the AMC noise limit of 60 dB at the property line. The Downtown Site would result in noise levels that exceed the 60 dB noise limit at the nearest land uses. The Downtown Site would exceed the noise limit at the elevated balconies for the multifamily residential use across the alleyway to the west of the Project site because it does not have the noise attenuation benefit of the existing 8-foot perimeter wall at the Project site. Therefore, MM NOI-4 is required at this Site, which lists alternatives to reduce to operational noise from pumps to a less than significant level. Impacts would be less than significant with mitigation.

**TABLE 5**  
**ESTIMATED OPERATION NOISE LEVELS AT NEARBY RECEPTORS**

Project Site	Receptor	Distance (ft)	Noise Limit (dBA L <sub>eq</sub> )	Anticipated Pump Noise Levels without Mitigation (dBA L <sub>eq</sub> )	Exceeds Limit Pre-Mitigation?	Anticipated Maximum Pump Noise Levels With Mitigation (dBA L <sub>eq</sub> )	Exceeds Limit Post-Mitigation?
Willow Park Site	Residences	180	60	53	No	NA	NA
Katella Avenue Site	Commercial	170	60	54	No	NA	NA
Santa Cruz Site	Commercial	80	60	59	No	NA	NA
Brookhurst Site	Residences	60	60	58	No	NA	NA
Downtown Site – Ground Level	Residence	50	60	56	No	NA	NA
Downtown Site – Elevated Balcony	Residence	50	60	65	Yes	60	No

dBA: A-weighted decibels; L<sub>eq</sub>: Equivalent Noise Level; ft: feet; N/A: not applicable  
Source: Noise calculations in Attachment B.

**Question NOI-2 Would the project result in generation of excessive groundborne vibration or groundborne noise levels?**

**Less than Significant Impact.** As is typical of most cities and counties in California, there are no applicable City standards for vibration-induced annoyance or structural damage from vibration. The California Department of Transportation (Caltrans) has adopted vibration damage thresholds, which are shown in Table 6, to assess the potential for structural damage from vibration. The structural damage threshold for “older residential structures” of 0.3 peak particle velocity (ppv) inch per second (in/sec) for continuous/frequent (i.e., intermittent) sources is most applicable to this analysis. For commercial and industrial buildings proximate to the Project Sites, 0.5 ppv is applicable to this analysis.

**TABLE 6**  
**VIBRATION DAMAGE THRESHOLD CRITERIA**

Structure and Condition	Maximum ppv (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.2	0.1
Historic and some old buildings	0.5	0.25
Older residential structures	0.5	0.3
New residential structures	1.0	0.5
Modern industrial/commercial buildings	2.0	0.5

ppv: peak particle velocity; in/sec: inch(es) per second  
Note: Transient sources create a single isolated vibration event, such as blasting or drop balls. Continuous/frequent intermittent sources include impact pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment.  
Source: Caltrans 2013.

Jonathan Sanks

Page 18

The Caltrans vibration annoyance thresholds are shown in Table 7. These thresholds are used to assess the potential for a significant vibration impact for human annoyance; and annoyance is evaluated within occupied buildings. The vibration annoyance response of “distinctly perceptible” of 0.24 ppv is most applicable to this analysis.

**TABLE 7**  
**VIBRATION ANNOYANCE THRESHOLDS**

Average Human Response	ppv
Severe	2.0
Strongly perceptible	0.9
Distinctly perceptible	0.24
Barely perceptible	0.035
ppv: peak particle velocity; in/sec: inch(es) per second	
Source: Caltrans 2013.	

Site development, asphalt removal, excavation, and repaving would occur at each Project site and along East Orangewood Avenue and Anaheim Way. These construction activities would generate vibration. These activities involve the use of typical off-road vehicles and stationary equipment. Pile driving and blasting are generally the sources of the most severe vibration during construction. Neither pile driving nor blasting would be used during Project construction. Table 8 summarizes typical vibration levels associated with construction activities for various vibration-inducing pieces of equipment, not all of which would be required for the Project.

**TABLE 8**  
**VIBRATION LEVELS FOR**  
**CONSTRUCTION EQUIPMENT**

Equipment		ppv at 25 ft (in/sec)
Pile driver (impact)	upper range	1.518
	typical	0.644

	typical	0.170
Vibratory roller		0.210
Large bulldozer		0.089
Caisson drilling		0.089
Loaded trucks		0.076
Jackhammer		0.035
Small bulldozer		0.003
ppv: peak particle velocity; ft: feet; in/sec: inches per second.		
Source: Caltrans 2013; FTA 2006.		

Table 9 summarizes the anticipated vibration levels (measured in ppv) at each Project Site and for pipeline construction associated with the Santa Cruz Site. It should be noted that, although it is not anticipated that the Project would use small or large bulldozers, the equipment is included to represent vibration from similar vibration-generating equipment such as a crane or an excavator. Vibration levels are based at the nearest land use and structure to each of the construction areas.

Jonathan Sanks  
July 22, 2021  
Page 20

As shown in Table 9, vibration levels would not exceed the building damage and annoyance thresholds when construction activities occur closest to the nearest offsite building at the Project Sites. Buildings located further from these analyzed locations would be exposed to lower levels of Project-related vibration. There would be a less than significant impact, and no mitigation is required.

**Question NOI-3** For a project located within the vicinity of a private airstrip or an airport land use plan or, where such plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in exposure of people residing or working in the Project area to excessive noise levels?

**No Impact.** The Project Sites are located to the east of Seal Beach VORTAC SLI and southeast of Fullerton Municipal Airports. The Willow Park site is the most proximate to the airfield at approximately 3.75 miles from the Fullerton Municipal runway while the Katella site is most distant at approximately 8 miles from the Seal Beach VORTAC SLI runway.

Since the Project Sites are not in the vicinity of an airstrip or airport land use, the Project site will have no impact onto the land uses impacted by aircraft noise.

## MITIGATION MEASURES

- MM NOI-1** During nighttime construction activity (i.e., from 7 PM to 7 AM), the Construction Contractor shall ensure that the following best management practices for sound barriers are implemented at the wells at the Santa Cruz Site. During nighttime construction activities, 24-foot tall sound barriers, with a minimum sound transmission class (STC) rating of 25, must be erected along all sides of the construction area where continuous construction activities would occur.
- MM NOI-2** During construction activities at the Brookhurst Site, sound barriers shall be erected to a height of at least 10 feet along the Project Site's north and south boundary lines to shield construction noise to the nearby residential land uses. The sound barriers would consist of either plywood with a thickness of  $\frac{3}{4}$  inch or greater or sound blankets with a minimum Sound Transmission Class (STC) of 25 with no gaps along the barrier with no gaps along the barrier.
- MM NOI-3** During construction activities at the Downtown Site, sound barriers shall be erected to a height of at least 10 foot tall plywood barriers shall be constructed along the Project Site's south and east boundary lines and 20 foot tall barriers along the west boundary line to shield construction noise to the nearby residential land uses. The sound barriers would consist of either plywood with a thickness of  $\frac{3}{4}$  inch or greater or sound blankets with a minimum STC of 25 with no gaps along the barrier.
- MM NOI-4** For the Downtown Site, one of the following alternatives shall be implemented for proposed on-site pumps to minimize pump noise during operation of the Project:
- Pump equipment require acoustic lagging with a minimum STC of 20.
  - Enclose the pump equipment to shield noise to the nearest receptors. The enclosure shall consist of either masonry or be buried underground.
  - Develop a sound wall between the pump equipment and receptors. The height of the sound wall shall be designed so there is no line-of-sight between the pump equipment and receptors.

Jonathan Sanks  
July 22, 2021  
Page 21

- Place the booster pump near a building or existing wall that provides a complete obstruction in the line of sight between the pump and nearby residential uses.
- Site booster pump at least 100 feet away from the property line of any residential uses.

## **CUMULATIVE NOISE AND VIBRATION IMPACTS**

### **Cumulative Short Term (Construction) Noise and Vibration Impact**

Adverse noise and vibration impacts during construction of the proposed Project would be localized and would occur intermittently for varying periods of time throughout the construction period. Short-term cumulative impacts related to ambient noise and vibration levels could occur if construction associated with the proposed Project as well as surrounding current and future development were to occur simultaneously. Noise or vibration associated with construction of the proposed Project in combination with another project within approximately 500 feet of the Project site boundaries could adversely impact sensitive receptors in the vicinity of the site with a cumulative noise level greater than the noise generated solely at the Project site.

The nearest project anticipated to be constructed concurrently with the proposed Project is a mixed-use development at South State College Boulevard. This project is more than 600 feet away from the proposed Orangewood Site. This distance from the Project Site would result in a substantial attenuation of cumulative noise. Because construction noise would be substantially attenuated prior to reaching land uses proximate to the Project site, cumulative noise from both construction projects would not be substantially different than that generated by the Project. As such, cumulative noise impacts related to construction activities would result in less than significant noise impacts.

### **Cumulative Long-Term Noise Impact**

Cumulative traffic noise impacts would not occur due to the minimal vehicle trips required for maintenance of Project facilities and equipment.

Individual stationary sources of noise are regulated by the AMC. The stringent noise limitations established for each of these noise sources, the infrequency of occurrence, and the separation distance for the Project's noise sources limits cumulative noise exposure to less than significant levels. As such, less than significant cumulative noise impacts are associated with stationary noise sources.

## **CONCLUSION**

The proposed Project was analyzed for potential noise and vibration impacts from both the construction and operational phases. The Project would not result in a substantial permanent or temporary increase in ambient noise levels in the Project vicinity above levels existing without the Project after the implementation of mitigation measures, and impacts would be less than significant. The Project would result in less than significant impacts from groundborne vibration and groundborne noise levels generated during construction. The Project would also not result in the exposure of people residing or working in the Project area to excessive noise levels from private or public airports. In conclusion, the Project would have no significant noise or vibration impacts.

Loaded trucks	0.076	0.076		
Criteria		0.300		

Based on distance to nearest structure

<sup>1</sup> Determined based on use of jackhammers or pneumatic hammers that may be used for pavement demolition at a distance of 25 feet

Notes: RMS velocity calculated from vibration level (VdB) using the reference of one microinch/second.

Source: Based on methodology from the United States Department of Transportation Federal Transit Administration, *Transit Noise and Vibration Impact*
