Project Title: Reservoir 4602-2 Construction Project

Project Location: The site is located on a developed CVWD-owned parcel located at 29527 Via Las Palmas, in the unincorporated community of Thousand Palms, within Riverside County.

Description of Nature, Purpose and Beneficiaries of Project:

The Coachella Valley Water District (CVWD) will construct a second 2.0 million gallon welded steel domestic water tank on a developed parcel, referred to as Reservoir 4602 site. This project will construct and operate a second water tank at an existing reservoir site in order to meet the water demands and provide domestic water storage for approximately 38,600 existing CVWD customers and future customers within the area known as the Valley Production Zone.

Construction at the site will include placement of an earthen berm to protect the tank from scour, a graded road along the berm perimeter, connectivity to the existing water pipeline, and a water retention basin. Various drainage pipe, vaults, domestic water pipe and electrical conduits will be installed. Additionally, the reservoir foundation pad will be over-excavated to five feet and under drains installed. The new tank will sit approximately 37 feet in height from the exiting grade with a diameter of approximately 130 feet. Once constructed the tank will be painted to blend in with the surrounding landscape in a neutral tone. Minor clearing and grubbing of the site is required, along with excavation up to eight-feet for the placement of new pipeline. All disturbed soil will remain on site and any excess soil will be spread on site. All staging will occur on site. Construction is anticipated for the duration of ten months.

This parcel is located within the Thousand Palms Conservation Area associated with the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP). CVWD has confirmed with the Coachella Valley Association of Governments that although this parcel is located in a conservation area, the site is an existing, developed CVWD-infrastructure site, and that the construction of a second reservoir is considered a covered activity under the CVMSHCP and no mitigation or agency consultation is required. CVWD will provide a biological monitor for the project to secure the parcel perimeter with temporary fencing and to ensure land use adjacency guidelines are met during construction. No Coachella Valley Conservation Commission local development fee is required for this project.

NOTICE OF EXEMPTION (Continued)

Lead Agency Approving Project and Contact: Coachella Valley Water District; Elizabeth Meyerhoff, Environmental Specialist, Phone: (760) 398-2651

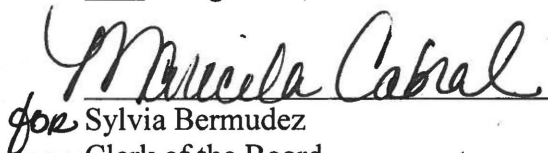

Exempt Status:

- ☐ **Not a project:** State CEQA Guidelines §15378
- ☐ **Review for Exemption/Common Sense Exemption:** State CEQA Guideline §15061(b)(3)
- ☐ **Ministerial:** (Pub. Res. Code §21080(b)(1); State CEQA Guideline §15268)
- ☐ **Declared Emergency:** (Pub. Res. Code §21080(b)(3); State CEQA Guideline §15269(a))
- ☐ **Emergency Project:** (Pub. Res. Code §21080(b)(4); State CEQA Guideline §15269(b)(c))
- ☐ **Statutory Exempt:** State CEQA Guidelines §
- ☒ **Categorically Exempt:** State CEQA Guidelines §15303

Reasons why project is exempt:

State CEQA Guidelines §15303 (New Construction and Conversion of Small Structures) consists of construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. The numbers of structures described in this section are the maximum allowable on any legal parcel. This water tank project is exempt from further environmental review because it consists of limited construction and operation of one domestic water reservoir and accessory structures on a previously developed parcel.

Date: August 10, 2021

for Sylvia Bermudez
Clerk of the Board
