Rincon Project No: 19-08792

Rosalyn Prickett, Senior Water Resources Planner
Woodard & Curran

9665 Chesapeake Drive, Suite 320

San Diego, California 92123

Via email: rprickett@woodardcurran.com

Subject: Cultural Resources Study for Booster Station 5513/Tank 5514 Project, Rancho Mirage, Riverside County, California

Dear Ms. Prickett:

Woodard & Curran retained Rincon Consultants, Inc. (Rincon) on behalf of the Coachella Valley Water District (CVWD) to conduct a cultural resources study for the Booster Station 5513/Tank 5514 Project, located in Rancho Mirage, Riverside County, California. The proposed undertaking consists of upgrades to the water supply system serving the Thunderbird Heights community. A Notice of Exemption (NOE) has been submitted by CVWD for the undertaking for the Drinking Water State Revolving Fund, which is partially funded through a capitalization grant from the United States Environmental Protection Agency. As such, this study was prepared to support the NOE in accordance with the California State Water Resources Control Board's California Environmental Quality Act-Plus (CEQA-Plus) guidelines. The purpose of this technical memorandum is to document the tasks conducted by Rincon which include the following: delineation of an area of Potential Effects (APE), search of the California Historical Resource Information System (CHRIS), outreach to local interested parties and Native American contacts, historical map and imagery review, field survey of the APE, and the historical evaluation of two properties containing historic-period infrastructure.

Project Description

The proposed undertaking is situated in Thunderbird Heights, a residential community located in the southwestern portion of Rancho Mirage, in Riverside County, California. More specifically, it is in Township 5 south, Range 5 east, and Section 11 of the United States Geological Survey (USGS) *Cathedral City* 7.5-minute topographic quadrangle (Attachment A, Figure 1). The undertaking consists of upgrades to the water supply system currently serving Thunderbird Heights. Upgrades would take place at two discontinuous sites within the community, at Booster Station 5513 located at 40860 Thunderbird Road, and at tank 5514-1 located at 70165 Thunderbird Road.

The undertaking would implement the following at the Booster Station 5513 site: construction of a second domestic water pump station, rehabilitation and upgrade of the existing Booster Station 5513, and necessary above and underground appurtenances. In addition, a 600-foot section of pipeline would be installed and extend from the Booster Station 5513 site, in the Thunderbird Road right-of-way (ROW) southwest to roughly Thunderbird Mesa Drive. Booster Station 5513 upgrades would involve excavation

to a depth of approximately 15 feet for booster suction cans. Associated piping would be installed predominantly via approximately 3-foot wide trenches excavated to a depth of approximately 4 feet.

The undertaking would implement the following at the Tank 5514-1 site: construction of an additional partially buried tank (Tank 5514-2) and associated piping at apparatuses, and the demolition of the currently extant Booster Station 5514. Tank 5514-2 would be buried approximately nine feet below grade and set on a foundation roughly three feet deep. Piping associated with the upgrades would extend within the Thunderbird Road ROW from the location of Tank 5514-1 to near the intersection of Thunderbird and Tonopah Road, and would be installed via approximately three-foot wide trenches, excavated to a depth of up to 4 feet.

The construction schedule for the undertaking is dependent on funding availability, but is currently expected to begin in September 2021, and last for approximately 11 months.

Area of Potential Effects

36 Code of Federal Regulations (CFR) 800.16(d) defines a project APE as the “geographic area or areas within which a project may directly or indirectly cause changes in the character or use of historic properties if any such property exists.” The APE generally depicts all areas expected to be affected by a proposed undertaking, including construction staging areas. The APE for the current undertaking is discontinuous and includes the Riverside County Assessor’s parcels that comprise the Tank 5514-1 (Assessor’s Parcel Number [APN]: 690-070-008) and Booster Station 5513 (APN: 690-190-001 and 690-190-002) sites. In areas outside of these parcels, the APE encompasses only the direct footprint of disturbance associated with the components described above and the ROWs in which associated piping would be installed (Attachment A, Figure 2).

The APE must also be considered three-dimensionally and for the current undertaking is various, as dictated by project components. At the Tank 5514-1 site, the vertical depth of the APE is 15 feet to accommodate the installation of suction cans and is five feet to enable the installation of piping in the associated road ROW. At the Booster Station 5513 site, the vertical depth of the APE is 12 feet to accommodate the construction of the Tank 5514-2 foundation and is five feet to accommodate for the installation of piping in the associated road ROW.

Many of the project elements described above are subterranean, and those that would be installed above grade would be consistent with the existing environment, which includes above-grade infrastructure associated with the water system. Therefore, no indirect effects (i.e., visual, auditory, or atmospheric) are anticipated for the undertaking.

Personnel

Rincon Archaeologist and Principal Investigator Hannah Haas, MA, Registered Professional Archaeologist (RPA) and Rincon Senior Architectural Historian Steven Treffers, MHP, provided management oversight for this cultural resources study. The CHRIS records search was performed by in-house staff at the Eastern Information Center (EIC). Cultural Resources Specialist and Architectural Historian Rachel Perzel, MA, performed the Native American and local interested party outreach, the built environment historical evaluations and contributed to this memorandum. Archeologist Mark Strother, MA, RPA, performed the site visit described in this study. Ms. Haas and Mr. Strother meet the Secretary of the Interior’s Professional Qualifications Standards (PQS) for prehistoric and historic archaeology (National Park Service 1983). Mr. Treffers and Ms. Perzel meet the PQS for history and architectural history. This

memorandum was reviewed by Supervising Environmental Planner Christine Donoghue and Principal Architectural Historian Shannon Carmack for quality control. Corresponding resumes for all preparers of this study are included in Attachment G.

Regulatory Setting

CEQA-Plus Studies

A CEQA-Plus study includes compliance with federal and state regulations, in the event a federal nexus is established during the course of project execution. A federal nexus may be established if federal funding and/or permitting is, obtained or required, for the project. Compliance with both regulations allows the lead agency to apply the results of this technical study to both levels of regulation should a nexus be established later.

Federal

National Historic Preservation Act

The proposed project is considered a federal undertaking due to the potential for federal funding; it is, therefore, subject to Section 106 of National Historic Preservation Act (NHPA), which applies when a project, activity, or program is funded in whole or in part under the direct or indirect jurisdiction of a federal agency, including projects carried out by or on behalf of a federal agency; those carried out with federal financial assistance; and those requiring a federal permit, license, or approval. Cultural resources are considered during federal undertakings chiefly under Section 106 of NHPA of 1966 (as amended) and through one of its implementing regulations, 36 CFR 800 (Protection of Historic Properties), and the National Environmental Policy Act. Properties of traditional, religious, and cultural importance to Native Americans are considered under Section 101 (d)(6)(A) and Section 106 (36 CFR 800.3-800.10) of NHPA. Other federal laws governing cultural resources include the Archaeological Data Preservation Act of 1974, the American Indian Religious Freedom Act of 1978, the Archaeological Resources Protection Act of 1979, and the Native American Graves Protection and Repatriation Act of 1989, among others.

Section 106 of NHPA (16 United States Code 470f) requires federal agencies to take into account the effects of their undertakings on historic properties and to afford the Advisory Council on Historic Preservation a reasonable opportunity to comment on such undertakings (36 CFR 800.1). Under Section 106, the significance is assessed of any adversely affected historic property and mitigation measures are proposed to resolve the adverse effects to an acceptable level. Historic properties are those significant cultural resources listed in or are eligible for listing in the National Register of Historic Properties (NRHP). Generally, districts, sites, buildings, structures, and object that possess integrity are eligible for inclusion on the NRHP if they meet the following the criteria (36 CFR 60.4):

- a. Are associated with events that have made a significant contribution to the broad patterns of our history
- b. Are associated with the lives of persons significant in our past
- c. Embody the distinctive characteristics of a type, period, or method of installation, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction
- d. Have yielded, or may be likely to yield, information important in prehistory or history

Ordinarily, cemeteries, birthplaces, or graves of historic figures; properties owned by religious institutions or used for religious purposes; structures that have been moved from their original locations; reconstructed historic buildings; and properties that are primarily commemorative in nature are not considered eligible for NRHP listing, unless they satisfy certain conditions. In general, a resource must be 50 years of age to be considered for the NRHP, unless it satisfies a standard of exceptional importance.

State

California Environmental Quality Act

CEQA requires a lead agency to determine whether a project may have a significant effect on historical resources (Public Resources Code [PRC], Section 21084.1) or tribal cultural resources (PRC Section 21074[a][1][A]-[B]). A historical resource is a resource listed, or determined to be eligible for listing in the California Register of Historical Resources (CRHR); a resource included in a local register of historical resources; or an object, building, structure, site, area, place, record, or manuscript that a lead agency determines to be *historically significant* (State CEQA Guidelines, Section 15064.5[a][1-3]).

A resource shall be considered *historically significant* if it meets any of the following criteria:

- 1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage
- 2) Is associated with the lives of persons important to our past
- 3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values
- 4) Has yielded, or may be likely to yield, information important in prehistory or history

Generally, a cultural resource must be at least 50 years of age to be considered for listing on the CRHR. Resources that have achieved significance within the past 50 years may also be eligible for inclusion in the CRHR, provided that enough time has lapsed to obtain a scholarly perspective on the events or individuals associated with the resource (OHP 1995:3).

If it can be demonstrated that a project will cause damage to a *unique archaeological resource*, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. To the extent that resources cannot be left undisturbed, mitigation measures are required (PRC Section 21083.2[a], [b]).

PRC Section 21083.2(g) defines a *unique archaeological resource* as an artifact, object, or site about which it can be demonstrated clearly that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

- 1) Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information
- 2) Has a special and particular quality such as being the oldest of its type or the best available example of its type
- 3) Is directly associated with a scientifically recognized important prehistoric or historic event or person

California Assembly Bill 52 (AB 52) was enacted July 1, 2015; it expands CEQA by defining a new resource category called *tribal cultural resources* (TCR). AB 52 establishes "a project with an effect that may cause

a substantial adverse change in the significance of a TCR is a project that may have a significant effect on the environment” (PRC Section 21084.2). It further states the lead agency shall establish measures to avoid impacts that would alter the significant characteristics of a TCR, when feasible (PRC Section 21084.3).

PRC Section 21074(a)(1)(A) and (B) defines TCRs as “sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe” and meets either of the following criteria:

- 1) Listed or eligible for listing in the CRHR, or in a local register of historical resources, as defined in PRC Section 5020.1(k)
- 2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of PRC 5024.1. In applying these criteria, the lead agency shall consider the significance of the resource to a California Native American tribe

AB 52 also establishes a formal consultation process for California tribes regarding TCRs. Under AB 52, lead agencies are required to “begin consultation with a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project.” Native American tribes to be included in the process are those requesting notice of projects proposed within the jurisdiction of the lead agency. The consultation process for a project must take place prior to the adoption of a negative declaration or mitigation negative declaration or the certification of an environmental impact report.

Cultural Resources Records Search

Due to circumstances surrounding the COVID-19 pandemic, Rincon was not permitted to perform an in-person CHRIS search for this study; the search summarized below was performed in-house by EIC administrative coordinator, Eulices Lopez. Results of the search were received on May 12, 2020. The purpose of the records search was to identify previously completed cultural resources studies, as well as previously recorded cultural resources within the APE and a one-mile radius surrounding it to assess the regional sensitivity for cultural resources. As part of EIC policy related to COVID-19, the EIC was able to provide copies of all resource records and previous studies within the search radius but detailed maps depicting the locations of all previously conducted cultural resources studies and previously recorded cultural resources were not made available. Rincon therefore reviewed location information included within each individual resource record and previous study received from the EIC to determine if they are located within or outside the APE.

The EIC records search identified 20 cultural resources studies that have been previously conducted within a 1-mile radius of the APE (Table 1). Rincon’s review of these previously conducted studies indicates that one of them (RI-10406) includes the current APE; RI-10406 is further described following Table 1). The CHRIS search additionally identified seven previously recorded cultural resources within one mile of the current APE (Table 2). Rincon’s review of the resource records associated with these previously recorded cultural resources indicated that none are located within the current APE. The CHRIS search results summary sheets provided by the EIC are included in Attachment B for reference. To supplement the CHRIS search, Rincon reviewed the following inventories: NRHP (NPS 2020), CRHR (OHP 2020a), lists of California Historical Landmarks (OHP 2020a) and Points of Historical Interest (OHP 2020a), and the Built Environment Resources Directory for Riverside County. This review was negative for the APE.

RI-10406

RI-10406 (*Archaeological Sensitivity Model for the Whitewater River Stormwater Channel Riverside County, California*) is a study conducted by Applied Earthworks, Inc. in 2012. The study generated an archaeological sensitivity model for an area consisting of a quarter mile radius around the Whitewater River. It breaks the River into four Zones with the current APE located in the southern extent of Zone 2. The study concluded that Zone 2 has low sensitivity for the discovery of prehistoric and historical cultural resources on the surface, and low sensitivity for buried cultural resources, with the exception of the southern extent, which has a low to moderately low sensitivity. The study did not result in the identification of any cultural resources.

Native American Outreach

Rincon contacted the Native American Heritage Commission (NAHC) on November 1, 2019, to request a Sacred Lands File (SLF) search of the APE and a 0.5-mile radius surrounding it. Rincon additionally requested that the NAHC provide a list of Native American groups, and/or individuals culturally affiliated with the project vicinity, who may have knowledge of cultural resources in the APE. The NAHC responded on November 12, 2019, stating that the results of the SLF search were negative. A list of 23 Native American contacts who may have knowledge of cultural resources of Native American origin within the APE was also provided (Attachment C).

Rincon prepared outreach letters to each of the contacts on the NAHC-provided list on May 22, 2020; due COVID-19 considerations, letters were sent via email. The letters provided a project description and location map and requested that individuals or entities with knowledge of cultural resources in the area of the APE contact Rincon. Follow-up telephone calls were conducted on June 12, 2020. Rincon received two formal responses to the outreach effort. On May 23, 2020 Erica Pinto emailed Rincon on behalf of

the Jamul Indian Village. She stated that the Tribe defers to Riverside County Tribes for comment on the Project. On July 10, 2020, Rincon received a formal letter response from the Agua Caliente Band of Cahuilla Indians (ACBCI) which requested the following: a copy of records search with associated survey reports and site records from the information center, a cultural resources inventory of the project area by a qualified archaeologist prior to any development activities in the area and copies of any cultural resource documentation (report and site records) generated in connection with this project. CVWD plans to follow up directly with the ACBCI on their request. Documentation of the Native American outreach efforts performed by Rincon are included in Attachment D.

Local Interested Party Outreach

As part of Section 106 consultation, Rincon prepared and emailed letters to local interested parties, on May 22, 2020, to request information on known or potential historic or other cultural resources located in, or near, the APE. The local parties included the Coachella Valley Historical Society, Inc. (CVHS), the Historical Society of Palm Desert (HSPD), and the City of Rancho Mirage. Due to COVID-19 considerations, no hard copy letters were mailed. Follow-up outreach was conducted in late June-early July 2020. Rincon received two responses to this effort, described below.

Rincon received an email from the HSPD, on May 23, 2020, noting that the proposed undertaking is located on an alluvial fan developed at the mouth of Bradley Canyon. The response further stated the following: "While this canyon may have furnished seasonal water, it is not big enough to have supplied a year-round water source. Therefore, both are given a low potential for a village site but a moderate potential for a gathering camp site. The present development in the area probably predates the present environmental laws, so monitoring of earlier development was probably not conducted. Based on the locations, limited monitoring is recommended." Rincon received an additional email response from the City of Rancho Mirage on June 28, 2020. On behalf of the City, Ben Torres noted two designated historical resources in the area of the APE. He stated further that since the APE is outside of the designated resources, he did not anticipate a potential impact to cultural resources. Documentation of the outreach effort summarized here is included in Attachment E.

Historical Imagery Review

Rincon completed a review of historic-period maps and aerial images to gain understanding of the developmental history of the APE. An aerial image dated 1953 indicates that at that time, the Thunderbird Heights community was in the very beginning stages of development. Many, but not all, of its streets has been paved, and only a few homes had been constructed. By 1959, the 5514-1 tank site had been established. The next available aerial is from 1972. By that time, the community had been further developed with residential lots, but was still not complete; the Booster Station 5513 site appears to not yet have been established. By the time an aerial image was taken in 1975, the tank at Booster Station 5513 was in place, although the associated structure housing the booster station itself had not been constructed. In the decades that followed, the neighborhood continued to densify. The two extant buildings were added to the Booster Station 5513 site following 1978 (NETR Online var.; UCSB var.).

Field Survey

Rincon Archaeologist Mark Strother conducted a survey of the APE, on April 30, 2020. Mr. Strother inspected exposed ground surfaces within the APE for artifacts (e.g., flaked stone tools, tool-making debris, stone milling tools, fire-affected rock), ecofacts (marine shell and bone), soil discoloration that

might indicate the presence of a cultural midden, soil depressions and features indicative of the former presence of structures or buildings (e.g., standing exterior walls, postholes, foundations) or historic debris (e.g., metal, glass, ceramics). Paved areas, including the existing roadways and sidewalks, were not fully surveyed due to a lack of ground visibility.

Mr. Strother inspected all built environment features located in the APE. He noted the historic-period water tanks and associated buildings and equipment. Mr. Strother documented the integrity and potential character-defining features of the water tanks and buildings. He took digital photographs and field notes to support observations. No cultural resources were identified on the project site during the survey.

Findings and Recommendations

The historical imagery review and field survey conducted for this study indicated the presence of historic-period infrastructure within both portions of the APE. The Office of Historic Preservation recommends a 45-year threshold for the evaluation of historical resources (OHP 1995: 2). The Booster Station 5513 and Tank 5514-1 Sites were therefore recorded on California Department of Parks and Recreation (DPR) Forms, which are included in Attachment F, and evaluated for listing in the NRHP, CRHR and in the City of Rancho Mirage Register of Historic Resources. As a result of the current study, the Booster Station 5513 site and the Tank 5514-1 Site are recommended ineligible for listing in the NRHP, CRHR and the City of Rancho Mirage Register of Historic Resources. They are therefore not considered historic properties for the purposes of Section 106 or historical resources for the purposes of CEQA.

The results of the cultural resources records search, Native American and local interested party outreach, historical imagery review, and field survey identified no archeological resources within the APE. The lack of surface evidence of archaeological remains does not preclude their subsurface existence. The APE has been previously disturbed by construction of the roadways and tanks and by the placement of existing subsurface utilities. These results indicate that the APE is not highly sensitive for buried archaeological remains.

Based on this information, Rincon recommends a finding of ***no impact to historical resources under CEQA and no effect to historic properties under Section 106 of the NHPA*** and does not recommend any additional cultural resources work at this time. Rincon presents the following recommendation in case of unanticipated discovery of cultural resources during project development. The project is also required to adhere to regulations regarding the unanticipated discovery of human remains, detailed below.

Please do not hesitate to contact Rincon with any questions regarding this cultural resources study.

Unanticipated Discovery of Archaeological Resources

If cultural resources are encountered during ground-disturbing activities, work in the immediate area must halt and an archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (National Park Service 1983) should be contacted immediately to evaluate the find. If the discovery proves to be eligible for listing in the NRHP and/or CRHR, additional work such as data recovery excavation and Native American consultation may be warranted.

Unanticipated Discovery of Human Remains

If human remains are found, regulations outlined in the State of California Health and Safety Code Section 7050.5 state no further disturbance shall occur until the County Coroner has made a

determination of origin and disposition pursuant to Public Resources Code Section 5097.98. In the event of an unanticipated discovery of human remains, the County Coroner must be notified immediately. If the human remains are determined to be prehistoric, the Coroner will notify the Native American Heritage Commission, which will determine and notify a most likely descendant (MLD). The MLD shall complete the inspection of the site within 48 hours of being granted access and provide recommendations as to the treatment of the remains to the landowner.

Sincerely,
Rincon Consultants, Inc.

RE: Native American Tribal Consultation, Pursuant to the Assembly Bill 52 (AB 52), Amendments to the California Environmental Quality Act (CEQA) (Chapter 532, Statutes of 2014), Public Resources Code Sections 5097.94 (m), 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2 and 21084.3, Booster Station 5513 Phase I Project, Riverside County

Dear Ms. Perzel:

Pursuant to Public Resources Code section 21080.3.1 (c), attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Please note that the intent of the AB 52 amendments to CEQA is to avoid and/or mitigate impacts to tribal cultural resources, (Pub. Resources Code §21084.3 (a)) ("Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource.")

Public Resources Code sections 21080.3.1 and 21084.3(c) require CEQA lead agencies to consult with California Native American tribes that have requested notice from such agencies of proposed projects in the geographic area that are traditionally and culturally affiliated with the tribes on projects for which a Notice of Preparation or Notice of Negative Declaration or Mitigated Negative Declaration has been filed on or after July 1, 2015. Specifically, Public Resources Code section 21080.3.1 (d) provides:

Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.

The AB 52 amendments to CEQA law does not preclude initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction prior to receiving requests for notification of projects in the tribe's areas of traditional and cultural affiliation. The Native American Heritage Commission (NAHC) recommends, but does not require, early consultation as a best practice to ensure that lead agencies receive sufficient information about cultural resources in a project area to avoid damaging effects to tribal cultural resources.

The NAHC also recommends, but does not require that agencies should also include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of any Sacred Lands File (SLF) check conducted through the Native American Heritage Commission was negative.
4. Any ethnographic studies conducted for any area including all or part of the APE; and
5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green
Staff Services Analyst

Via email: laviles@aguacaliente.net

**Subject: Cultural Resources Study for the Booster Station 5513 Project, Unincorporated
Riverside County, California**

Dear Chairperson Grubbe:

Rincon Consultants, Inc. (Rincon) was retained by Woodard & Curran to conduct a cultural resources study for the Booster Station 5513 Project, located in an unincorporated portion of Riverside County near the community of Mecca (proposed undertaking). The proposed undertaking consists of infrastructural improvements to a small portion of the Coachella Valley Water District system. The undertaking will replace all necessary above and belowground appurtenances associated with Booster Station 5513 to improve efficiency and will rehabilitate Tank 5514-1 and construct a new tank (Tank 5514-2). The undertaking will additionally design a second domestic water pump station on the Booster Station 5513 site. The attached map depicts the Area of Potential Effect (APE) that has been defined for the undertaking.

The purpose of this letter is to inquire about your knowledge of potential cultural resources within the vicinity that may be impacted by implementation of the proposed undertaking. On November 1, 2019, Rincon contacted the Native American Heritage Commission (NAHC) to request a Sacred Lands File (SLF) search of the area of the undertaking. Rincon received a response from the NAHC on November 10, 2019 stating the results of the SLF search were negative. Rincon recently submitted a request to the EIC for a records search of the APE and surrounding area, however due to circumstances surrounding COVID-19, the receipt of results has been indefinitely delayed.

If you or your organization has any knowledge or specific concerns regarding cultural resources in the project area, please respond by telephone at (805) 644-4455 x 138, or by email at rperzel@rinconconsultants.com. Please note, due to the circumstances surrounding COVID-19, we are submitting this letter digitally and will not be sending hard copies via U.S. mail. Thank you for your assistance.

Sincerely,

Rincon Consultants, Inc.

Re: Booster Station 5513

Dear Ms. Rachel Perzel,

The Agua Caliente Band of Cahuilla Indians (ACBCI) appreciates your efforts to include the Tribal Historic Preservation Office (THPO) in the Booster Station 5513 project. The project area is not located within the boundaries of the ACBCI Reservation. However, it is within the Tribe's Traditional Use Area. For this reason, the ACBCI THPO requests the following:

- *A copy of the records search with associated survey reports and site records from the information center.

- *A cultural resources inventory of the project area by a qualified archaeologist prior to any development activities in this area.

- *Copies of any cultural resource documentation (report and site records) generated in connection with this project.

- *The presence of an approved Agua Caliente Native American Cultural Resource Monitor(s) during any ground disturbing activities (including archaeological testing and surveys). Should buried cultural deposits be encountered, the Monitor may request that destructive construction halt and the Monitor shall notify a Qualified Archaeologist (Secretary of the Interior's Standards and Guidelines) to investigate and, if necessary, prepare a mitigation plan for submission to the State Historic Preservation Officer and the Agua Caliente Tribal Historic Preservation Office.

Again, the Agua Caliente appreciates your interest in our cultural heritage. If you have questions or require additional information, please call me at (760)699-6907. You may also email me at ACBCI-THPO@aguacaliente.net.

Cordially,

Patricia Green-Peterson

Good morning Rachel,

Thank you for the information. Since the proposed project is located in Riverside County, we respectfully defer to those tribes to comment on any known cultural sites.

Thanks again.

**Subject: Cultural Resources Study for the Booster Station 5513 Project, Unincorporated
Riverside County, California**

Dear Tribal Administrator Miller:

Rincon Consultants, Inc. (Rincon) was retained by Woodard & Curran to conduct a cultural resources study for the Booster Station 5513 Project, located in an unincorporated portion of Riverside County near the community of Mecca (proposed undertaking). The proposed undertaking consists of infrastructural improvements to a small portion of the Coachella Valley Water District system. The undertaking will replace all necessary above and belowground appurtenances associated with Booster Station 5513 to improve efficiency as well as rehabilitate Tank 5514-1 and construct a new tank (Tank 5514-2). The undertaking will additionally design a second domestic water pump station on the Booster Station 5513 site. The attached map depicts the Area of Potential Effect (APE) that has been defined for the undertaking.

The purpose of this letter is to inquire about your knowledge of potential cultural resources within the vicinity that may be impacted by implementation of the proposed undertaking. On November 1, 2019, Rincon contacted the Native American Heritage Commission (NAHC) to request a Sacred Lands File (SLF) search of the area of the undertaking. Rincon received a response from the NAHC on November 10, 2019 stating the results of the SLF search were negative. Rincon recently submitted a request to the EIC for a records search of the APE and surrounding area, however due to circumstances surrounding COVID-19, the receipt of results has been indefinitely delayed.

If you or your organization has any knowledge or specific concerns regarding cultural resources in the project area, please respond by telephone at (805) 644-4455 x 138, or by email at rperzel@rinconconsultants.com. Please note, due to the circumstances surrounding COVID-19, we are submitting this letter digitally and will not be sending hard copies via U.S. mail. Thank you for your assistance.

Sincerely,

**Subject: Cultural Resources Study for the Booster Station 5513 Project, Unincorporated
Riverside County, California**

Dear Chairperson Torte:

Rincon Consultants, Inc. (Rincon) was retained by Woodard & Curran to conduct a cultural resources study for the Booster Station 5513 Project, located in an unincorporated portion of Riverside County near the community of Mecca (proposed undertaking). The proposed undertaking consists of infrastructural improvements to a small portion of the Coachella Valley Water District system. The undertaking will replace all necessary above and belowground appurtenances associated with Booster Station 5513 to improve efficiency as well as rehabilitate Tank 5514-1 and construct a new tank (Tank 5514-2). The undertaking will additionally design a second domestic water pump station on the Booster Station 5513 site. The attached map depicts the Area of Potential Effect (APE) that has been defined for the undertaking.

The purpose of this letter is to inquire about your knowledge of potential cultural resources within the vicinity that may be impacted by implementation of the proposed undertaking. On November 1, 2019, Rincon contacted the Native American Heritage Commission (NAHC) to request a Sacred Lands File (SLF) search of the area of the undertaking. Rincon received a response from the NAHC on November 10, 2019 stating the results of the SLF search were negative. Rincon recently submitted a request to the EIC for a records search of the APE and surrounding area, however due to circumstances surrounding COVID-19, the receipt of results has been indefinitely delayed.

If you or your organization has any knowledge or specific concerns regarding cultural resources in the project area, please respond by telephone at (805) 644-4455 x 138, or by email at rperzel@rinconconsultants.com. Please note, due to the circumstances surrounding COVID-19, we are submitting this letter digitally and will not be sending hard copies via U.S. mail. Thank you for your assistance.

Sincerely,

Rincon Consultants, Inc.

Rancho Mirage, Riverside County, California**

Dear Mr. Torres:

Rincon Consultants, Inc. (Rincon) has been retained to perform a Cultural Resources Study for the Booster Station 5513 and Tank 5514-2 Project, located in Rancho Mirage, Riverside County, California (proposed undertaking). The proposed undertaking consists of infrastructural improvements to a small portion of the Coachella Valley Water District system. The undertaking will upgrade Booster Station 5513, located at 40860 Thunderbird Road and will construct an additional tank (Tank 5514-2) at the 5514 Tank Site, located at 706165 Thunderbird Road.

As a component of the Cultural Resources Study, in compliance with Section 106 of the National Historic Preservation Act (Section 106), Rincon is consulting interested parties to request input on potential or known historic resources or other cultural resources in the vicinity of the undertaking. In conformance with Section 106, we are in the initial phase, "identify[ing] historic properties potentially affected by the undertaking" ¹ and are writing to provide you with an opportunity to be involved in the Section 106 process as a consulting party. A project location map is enclosed with this letter for your reference. Note, due to the circumstances surrounding COVID-19, we are submitting this letter digitally and will not be sending hard copies via U.S. mail. If you or your organization/agency has any knowledge of, or specific concerns regarding cultural resources in the area of the undertaking, please respond by telephone at 805-644-4455 ext. 138 or by email to rperzel@rinconconsultants.com. Thank you for your assistance.

**SITE REVIEWS
FOR
RINCON CONSULTANTS, INC.**

**By
Harry M. Quinn
For
The Historical Society of Palm Desert (HSPD)**

Ms. Rachel Perzel

One of the most important things controlling the location and size of a Desert Cahuilla village was a usable water source. Water sources in this area appear to have been limited to two types, springs, and creeks.

I am not aware of any major villages between Kavinish in Indian Wells and those in Palm Canyon near Palm Springs. The site near the mouth of Deep Canyon was at one time thought to be a village site but excavations showed it be a gathering camp. Deep Canyon is larger and has a much greater drainage area than Bradley Canyon but apparently did not have enough water to support a village.

PROJECTS

Booster Station 5513 Rincon and Tank 5514-2

Both projects are located on an alluvial fan developed at the mouth of Bradley Canyon. While this canyon may have furnished seasonal water, it is not big enough to have supplied a year-round water source. Therefore, both are given a low potential for a village site but a moderate potential for a gathering camp site. The present development in the area probably predates the present environmental laws, so monitoring of earlier development was probably not conducted. Based on the locations, limited monitoring is recommended.

PALEONTOLOGY

The projects are located on a recent alluvial fan so have no Paleontological value.

Hello Rachel,

There are properties that are designated as Historic Resources and others that are identified in the City's 2003 Historic Resources Survey within the vicinity of your two project sites. The closest property designated as a Historic Resource is located at 40780 Thunderbird Road. There is another property that is identified in our Historic Resources Survey but has not been officially designated located at 41915 Tonopah Road. Since the project site is outside of these properties I see no impacts to these cultural resources.

You can use the following link to access our Historic Preservation material: <https://ranchomirageca.gov/our-city/city-boards-commissions/historic-preservation-commission/>

Let me know if you still want to discuss this over the phone.

d. UTM: Zone: mE/ mN (G.P.S.)

e. Other Locational Data: Located in Thunderbird Heights

***P3a. Description:**

The subject property is the Coachella Valley Water District's (CVWD) Booster Station 5513 site, which is composed of two contiguously located, irregularly shaped Riverside County Assessor's parcels that function as a single property. Established in the early 1970s, the site is located within the residential community of Thunderbird Heights and is surrounded with residential development. The site is primarily paved although mature palm trees and other plantings line its northern boundary, along Thunderbird Road. The site consists of one large water tank and two small buildings housing associated equipment. The tank features a circular plan and is clad in metal panels and topped with a flat roof. A metal ladder is mounted on its west side to provide roof access. Several large pipes of varying diameter extend from the tank into the surrounding ground. The tank is a simple utilitarian structure with no apparent architectural style or unique engineering features.

To the west of the tank described above are two small utilitarian buildings that house associated equipment and were added to the site following 1978 (UCSB var. USGS var.). The larger of the two, at east, is a single story and features a rectangular footprint. The concrete block constructed building includes no window openings and a single door is located at east on its south elevation. The building is topped with a side gabled roof that appears in aerial imagery to be clad in asphalt shingles. The smaller of the two buildings, at west, is a single-story, wood framed building that may be described as open-air structure; it only features only partial walls that appear to be plywood. The building is topped with a side gabled roof clad in asphalt shingles. It features no windows and a door opening with two chain link fencing constructed doors occupies much of its south elevation. Neither of the above-described buildings features an architectural style. Both appear to house equipment/piping associated with the property's water distribution related use.

***B6. Construction History:**

The Booster Station 5513 site is located within the Thunderbird Heights community. According to aerial images, the community was in the very beginning stages of development in 1959 with many streets paved and a few houses constructed at that time. It appears that the community continued to densify steadily throughout the following several decades. Booster Station 5513 appears to have been established between 1972 and 1975, with construction of the current water tank. The two associated buildings were added to the property following 1978. (NETR Online var.; UCSB var.; USGS var.).

*B10. Significance: Theme N/A

Area N/A

Period of Significance N/A

Property Type N/A

Applicable Criteria N/A

The community of Thunderbird Heights appears to have been constructed gradually beginning in the 1950s during what is described in the *City of Rancho Mirage Historic Resources Survey* as the city's Country Club Era: 1951-1973 (Heumann et. al. 2003). During this period, Rancho Mirage expanded with an emphasis on resort culture and many Hollywood personalities invested in the area. Thunderbird Heights is filled with upscale, estate-like properties of various architectural styles. A review of historic-period newspaper articles and advertisements indicated that in its early development, the community was associated with Hollywood personalities such as Bing Crosby, Dezi Arnaz and Lucille Ball (*The Desert Sun* var.). A review of historic-period aerial images indicates that the Booster Station 5513 Site was established in the early 1970s as part of the water delivery system serving the then-growing community. The extant tank is not part of the community's initial development. In addition to the tank there are two small, utilitarian buildings on the tank site were constructed following 1978 (UCSB var.). see continuation sheet.

CONTINUATION SHEET

***B10 (continued):**

The subject property is recommended ineligible for listing in the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), and the City of Rancho Mirage Register of Historic Resources (RMRHR) under any applicable significance Criteria.

The community of Thunderbird Heights was developed gradually beginning in the 1950s during the period in which Rancho Mirage greatly expanded to accommodate country clubs and associated resort-style residential development. The Booster Station 5513 Site was constructed in the early-to-mid 1970s to support the water needs of this growing community. However, while Thunderbird Heights may possess some potential significance, these associations would be more directly and clearly related to the residential buildings themselves and not ubiquitous support infrastructure such as the Booster Station 5513 Site. There is no information to suggest the subject property played a notable role in the history of Thunderbird Heights or within any other context such as the history of water distribution. As a result of the information presented above, the subject property does not appear associated with any event significant in the history of Rancho Mirage, the region, state or nation; nor does it appear associated with any significant event in the history of Thunderbird Heights itself. The subject property is therefore ineligible for historic designation under NRHP Criterion A/CRHR Criterion 1/ RMRHR Criteria 3 and 5.

While many of the properties within the community of Thunderbird Heights are known or suspected to have associations with famous individuals, including Hollywood personalities and design professionals, the subject property does not have any direct association with any of these individuals. As a ubiquitous water infrastructure feature, the property does not appear associated with any individuals significant in the history of Ranch Mirage, the state, nation, or the community of Thunderbird Heights. It is therefore ineligible for historic designation under NRHP Criterion B/CRHR Criterion 2/RMRHR Criteria 5.

The subject property is a ubiquitous property type, which is utilitarian in design and does not represent a particular architectural style. It is not known to be the work of a master of any kind. As a component of a simple water distribution system, the property does not embody elements of outstanding or innovation attention to detail or design. The subject property is therefore ineligible for historic designation under NRHP Criterion C/CRHR Criterion 3/RMRHR Criteria 1, 4 and 7.

The California Historical Resources Information System search and field survey conducted for this study did not indicate that the subject property is likely to yield information important to history or prehistory or that it may be of archaeological interest. The field survey also did not identify any unusual natural features on the property. As a result, the subject property is ineligible for historic designation under NRHP Criterion D/CRHR Criterion 4/RMRHR Criteria 6 and 8. The subject property is associated with the provision of domestic water, a business not rare within the city of Rancho Mirage. It is therefore ineligible for historic designation under RMRHR Criterion 2.

***P3a. Description:**

The subject property is the Coachella Valley Water District's (CVWD) Tank 5514-1 Site. The site is composed of one irregularly shaped Riverside County Assessor's parcel enclosed with metal chain link fencing. Established in the early 1950s, the site is located within the residential community of Thunderbird Heights and is surrounded with residential development. The site features a small paved area where its primary feature, Tank 5514-1, is sited. The green tank features a circular plan and is clad in metal panels and topped with a flat roof. It is a simple utilitarian structure with no apparent architectural style or unique engineering features. Extending from the tank on its east side, a small single-story, rectangular-planned, flat roofed addition extends to provide shelter for associated piping.

To the immediate south and west of Tank 5514-1, two relatively small-scale above grade cylindrical storage tanks are sited. These tanks sit horizontally on concrete foundations. They are also utilitarian with no architectural style or unique engineering features. Aside from the paved area where Tank 5514-1 is located, the site is unpaved. Mature vegetation is scattered throughout, particularly surrounding Tank 5514-1.

The community of Thunderbird Heights appears to have been constructed gradually beginning in the 1950s during what is described in the *City of Rancho Mirage Historic Resources Survey* as the city's Country Club Era: 1951-1973 (Heumann et. al. 2003). During this period, Rancho Mirage expanded with an emphasis on resort culture and many Hollywood personalities invested in the area. Thunderbird Heights is filled with upscale, estate-like properties of various architectural style. A review of historic-period newspaper articles and advertisements indicated that in its early development, the community was associated with Hollywood personalities such as Bing Crosby, Dezi Arnaz and Lucille Ball (*The Desert Sun* var.). A review of historic-period aerial images indicates that the Tank Site 5514-1 was established between 1953 and 1959 as part of the community's water delivery system (UCSB var.).

***B10 (continued):**

The subject property is recommended ineligible for listing in the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), and the City of Rancho Mirage Register of Historic Resources (RMRHR) under any applicable significance Criteria.

The community of Thunderbird Heights was developed gradually beginning in the 1950s during the period in which Rancho Mirage greatly expanded to accommodate country clubs and associated resort-style residential development. The Tank 5514-1 Site was constructed concurrently to support the water needs of this growing community. While Thunderbird Heights may possess some potential significance, these associations would be more directly and clearly related to the residential buildings within the community and not to ubiquitous support infrastructure such as the Tank 5514-1 Site. There is no information to suggest the subject property played a notable role in the history of Thunderbird Heights or within any other context such as the history of water distribution. As a result of the information presented above, the subject property does not appear associated with any event significant in the history of Rancho Mirage, the region, state or nation; nor does it appear associated with any significant event in the history of Thunderbird Heights itself. The subject property is therefore ineligible for historic designation under NRHP Criterion A/CRHR Criterion 1/ RMRHR Criteria 3 and 5.

While many of the properties within the community of Thunderbird Heights are known or suspected to have associations with famous individuals, including Hollywood personalities and design professionals, the subject property does not have any direct association with any of these individuals. As a ubiquitous water infrastructure feature, the property does not appear associated with any individuals significant in the history of Ranch Mirage, the state, nation, or the community of Thunderbird Heights. It is therefore ineligible for historic designation under NRHP Criterion B/CRHR Criterion 2/RMRHR Criteria 5.

The subject property is a ubiquitous property type, which is utilitarian in design and does not represent a particular architectural style. It is not known to be the work of a master of any kind. As a component of a simple water distribution system, the property does not embody elements of outstanding or innovation attention to detail or design. The subject property is therefore ineligible for historic designation under NRHP Criterion C/CRHR Criterion 3/RMRHR Criteria 1, 4 and 7.

The California Historical Resources Information System search and field survey conducted for this study did not indicate that the subject property is likely to yield information important to history or prehistory or that it may be of archaeological interest. The field survey also did not identify any unusual natural features on the property. As a result, the subject property is ineligible for historic designation under NRHP Criterion D/CRHR Criterion 4/RMRHR Criteria 6 and 8. The subject property is associated with the provision of domestic water, a business not rare within the city of Rancho Mirage. It is therefore ineligible for historic designation under RMRHR Criterion 2.

Preparer Qualifications

Shannon Carmack

PRINCIPAL ARCHITECTURAL HISTORIAN

Ms. Carmack has more than 20 years of professional experience providing cultural resources management and historic preservation planning for large-scale and high-profile projects. She has worked throughout California in numerous sectors including local planning, development/construction, public utilities, Department of Defense, transportation, recreation, and education. Ms. Carmack prepares documentation to satisfy CEQA, NEPA, Section 106 of the National Historic Preservation Act, and Local Historic Preservation Ordinances. She also provides reports and studies that comply with the Secretary of the Interior's Standards for the Treatment of Historic Properties and the California Historic Building Code. She has developed and implemented successful mitigation for countless projects that included Historic American Building Survey documentation, oral histories, and interpretive programs. Ms. Carmack meets and exceeds requirements in the Secretary of the Interior's Professional Qualification Standards in Architectural History and History.

SELECT PROJECT EXPERIENCE

Senior Architectural Historian, Metropolitan Water District of Southern California – On-Call Environmental Services, Various Counties, California

Ms. Carmack has served as Senior Architectural Historian for multiple historic building documentation packages for Metropolitan. These documents were completed as part of the cultural resources mitigation adopted for various site and facilities improvements projects and documented significant properties such as filter buildings and wastewater reclamation plants. For these efforts, Mr. Carmack served in a senior oversight capacity, coordinating with staff to gather historical photographs, documents, and other materials on behalf of Metropolitan. Reports were subsequently prepared presenting the as-built and existing conditions of the properties, narrative statements of significance, and compiled historical documentation.

F.E. Weymouth Treatment Plant Various Projects. Ms. Carmack has completed historic building documentation packages for the Filter Rehabilitation and Chemical Upgrades projects at the F.E. Weymouth Water Treatment Plant. Most recently, Ms. Carmack has led the preparation of a Preliminary Historic Design Review of the Plant Administration and Control Buildings Seismic Upgrades to help inform the appropriate CEQA documentation for the project.

Senior Architectural Historian, West Basin Municipal Water District – Palos Verdes Recycled Water Pipeline Project, Torrance and Palos Verdes Estates, Los Angeles County, California

Ms. Carmack served as Senior Architectural Historian for this project on behalf of the West Basin Municipal Water District. Ms. Carmack assisted with conducting a cultural resources technical study for the project to deliver recycled water from the existing Anza Lateral pipeline in the City of Torrance to the Palos Verdes Golf Club in the City of Palos Verdes Estates. Rincon conducted a cultural resources technical study in accordance with CEQA Plus which included compliance with Section 106 of the National Historic Preservation Act. Specifically, Ms. Carmack led the built environment component of the analysis which included historic group consultation and the evaluation of several historic-period resources,

SELECT PROJECT EXPERIENCE, CONT'D

including the Palos Verdes Golf Club property, which was determined to be ineligible for historic designation.

Architectural Historian, South San Luis Obispo Sanitation District – Wastewater Treatment Facility Redundancy Project, San Luis Obispo County, California

Ms. Carmack served as Architectural Historian for the District, assisting with conducting a Cultural Resources Assessment for the Project, located in the unincorporated community of Oceano. The project was subject to Section 106 of the National Historic Preservation Act due to federal funding through the United States Department of Agriculture. Specifically, Ms. Carmack identified one built environment resource was identified within the Area of Potential Effects; the project site was recorded and evaluated for listing in the National Register of Historic Places and found ineligible for designation.

Architectural Historian, City of Merced Public Works Department – Merced Tank Well No. 3 Historic American Engineering Record, Merced, California

Ms. Carmack served as Architectural Historian for the City of Merced Public Works Department demolition of its existing water tank due to its structural failing. The tank was previously determined eligible for the National Register of Historic Places and was listed in the California Register of Historical Resources. To mitigate the demolition of the historical resource in accordance with CEQA, Rincon was retained to complete a historic documentation package that included photographs and a written history of the structure, in accordance with National Park Service Guidance. Specifically, Ms. Carmack served as project manager and reviewed the documentation for quality assurance and quality control.

Senior Architectural Historian, San Lorenzo Valley Water District – Five Waters Pipelines Project, Santa Cruz County, California

Ms. Carmack served as Senior Architectural Historian, assisting with conducting a cultural resources study of the Project on behalf of the San Lorenzo Valley Water District. The project site is generally located in the vicinity of the communities of Ben Lomond, Boulder Creek, and Felton in Santa Cruz County. One historic property was identified within the Area of Potential Effect—a segment of California State Route 236, which is significant for its role in facilitating early and ongoing tourism in Big Basin Redwoods State Park, California's oldest state park. Ms. Carmack conducted an analysis of the resource and potential project effects and concluded that no historic properties would be affected by the project.

Senior Architectural Historian, City of San Diego – Pacific Beach Pipeline Project, City and County of San Diego, California

Ms. Carmack served as Senior Architectural Historian for water pipeline improvement project located within the San Diego community of Pacific Beach. One built environment resource, a semi-subterranean water reservoir constructed in 1908, was found ineligible for listing at the national, state, and local level of historic significance. The analysis included archival research, a site visit, preparation of documentation forms, and development of a historic context for the report.

ADDITIONAL PROJECT EXPERIENCE

TECHNICAL STUDIES

- City of Oceanside (subconsultant to Prime contractor) – San Luis Rey Water Reclamation Facility Expansion Project, San Diego County, California
- City of Paso Robles – Paso Robles Wastewater Treatment Plant Project, Paso Robles, California
- City of Pasadena (subconsultant to Prime contractor) – Secretary of Interior Standards Compliance Review for the Pasadena Non-Potable Water Project, Pasadena, California
- City of Los Angeles Bureau of Engineering – South Los Angeles Wetlands Park Project, Los Angeles, California
- City of Shell Beach – Bello Bridge Replacement Project, San Luis Obispo County, California
- Community of Whitley Gardens – Rivergrove Drive Bridge Rehabilitation, San Luis Obispo County, California

Christine Donoghue

SENIOR ENVIRONMENTAL PLANNER

Christine Jacobs-Donoghue has over 20 years of professional experience in environmental impact analysis, project management and public involvement. She has managed the preparation of environmental documents to satisfy CEQA, NEPA, and other federal, state, and local requirements, assisting clients with all aspects of environmental review from CEQA notices and tech reports, to Initial Studies, and complex Environmental Impact Reports. She typically serves as project manager, task leader, or senior reviewer for the applicable CEQA/NEPA or technical document. She serves in an on-call environmental capacity for a number of agencies; her on-call experience includes Inland Empire Utilities Agency, Southern California Gas Company, Rainbow Municipal Water District, County of San Bernardino Planning Department, and various Cities. Her diverse project experience includes water supply, wastewater, utilities, energy, flood control, petroleum pipelines and tanks, transportation, recreation, ports-of-entry and other municipal projects.

Steven Treffers, MHP

SENIOR ARCHITECTURAL HISTORIAN

Mr. Treffers is a senior architectural historian with Rincon's Cultural Resources Group with eight years of experience. A native of the San Francisco Bay Area, he received his Bachelor of Arts in History at the University of California, Santa Cruz prior to pursuing a Master's in historic preservation from the University of Southern California, School of Architecture. He meets and exceeds the Secretary of the Interior's Professional Qualification Standards for History and Architectural History and has a wide range of experience with projects requiring historic resources compliance with Section 106 of the National Historic Preservation Act, California Environmental Quality Act, and local ordinances. Mr. Treffers has been involved in a number of projects in the San Francisco and Monterey Bay areas, including recent efforts such as the North Coast Rail Trail and U.C. Santa Cruz Kresge College Renewal project. For these efforts, Mr. Treffers has managed and conducted historic resource surveys, and coordinated directly with state and local agencies. Both professionally and as a former commissioner on the South Pasadena Cultural Heritage Commission, Mr. Treffers has also worked closely with design teams on projects involving alterations to historic resources to ensure compliance with SOI Standards and applicable design guidelines. As a result, he has extensive experience identifying character-defining features, reviewing architectural drawings, and collaborating with local governments, stakeholders, architects, and engineers to meet project objectives while retaining those elements that convey the reason for a historic resource's significance.

SELECT PROJECT EXPERIENCE

Palo Corona Regional Park General Development IS-MND, Monterey Peninsula Regional Park District

Rincon is preparing an IS-MND for the Palo Corona Regional Park. The facility measures approximately 4,500 acres and includes mainly open space extending south from the Carmel River toward Big Sur and connecting to existing open space and park areas including Point Lobos Ranch and State Reserve, Garrapata State Park, Santa Lucia Preserve, Mitteldorf Preserve, and Joshua Creek Ecological Preserve. Mr. Treffers coordinated and prepared the historical technical studies in support of the IS-MND.

Historic Resources Survey Report, Monterey Regional Airport

Drawing on archival research, site investigations, and survey for the Monterey Regional Airport, Mr. Treffers authored the survey report and led documentation efforts in support of CEQA environmental review.

North Coast Rail Trail EIR, Santa Cruz County Regional Transportation Commission

The North Coast Rail Trail Project is a 7.5-mile Class 1 multi-use trail proposed to extend along an existing railroad corridor from Wilder Ranch State Park on the south to Davenport on the north in unincorporated Santa Cruz County. Rincon teamed with Harris + Associates to prepare an EIR that analyzed two alternatives at an equal level of detail: the Proposed Project, which would place the trail on the coastal side of the railroad tracks; and Alternative 1 (Trail Only), which would remove the railroad tracks and replace them with a trail. Mr. Treffers oversaw and contributed

SELECT PROJECT EXPERIENCE, CONT'D

to the historical technical studies portion of the EIR and responded to comments to the EIR.

Kresge College Renewal and Expansion Project EIR, UC Santa Cruz

Rincon's architectural historians completed a peer review of a historical resources evaluation of Kresge College, which identified the campus a CRHR-eligible historic district. Mr. Treffers oversaw review of the preliminary project plans provided guidance to the design team through a series of meetings to avoid impacts as feasible. Using the historical resources evaluation and an independently prepared archaeological resources assessment, Rincon's cultural resources team subsequently assessed the project for impacts in accordance with the CEQA Guidelines and the Secretary's Standards. Measures to mitigate impacts were also identified and included in the EIR, which was recently distributed for public comment.

Rail Trail Segment 8 RR Trestle Bridge, City of Santa Cruz

Rincon prepared environmental review for the Rail Trail Segment 8 Trestle Bridge Project in located in the City of Santa Cruz. In addition to providing technical support for the Initial Study-Mitigated Negative Declaration (IS-MND) for geology, hazards, traffic, and tribal cultural resources. Mr. Treffers prepared a historic design review of the Monterey Bay Sanctuary Scenic Trail (MBSST) Rail Trail Segment 8 San Lorenzo River Railroad Trestle Bridge for a Trail Widening Project located in Santa Cruz, California.

Hannah G. Haas MA, RPA

ARCHAEOLOGIST

Ms. Haas is an Archaeologist at Rincon Consultants. Her responsibilities include performing archaeological and cultural resources survey, archaeological testing and monitoring, and the preparation of technical reports. Ms. Haas received her Masters of Liberal Arts and Sciences in Anthropology from San Diego State in 2017. Her research focused on California's Northern Channel Islands and historical ecology. Ms. Haas has over five years of experience working in cultural resources management conducting projects in compliance with the California Environmental Quality Act (CEQA), Section 106 of the National Historic Preservation Act (NHPA), and the National Environmental Policy Act (NEPA). She has worked on more than 130 projects and served as lead author of more than 90 cultural resources technical reports. Ms. Haas uses her academic training and professional experience to ensure that all cultural resources components of projects are satisfactorily conducted.

Rachel Beth Perzel

ARCHITECTURAL HISTORIAN

Rachel Perzel is an Architectural Historian with Rincon Consultants. With over 9 years of experience, she conducts historic resource surveys, archival research and reviews projects for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (SOI Standards). Her professional experience includes the preparation of historic structures reports and impacts assessments in support of the National Environmental Protection Act (NEPA), Section 106, California Environmental Quality Act (CEQA), and local ordinances. Ms. Perzel has conducted historic assessments of character-defining features and SOI Standards compliance for dozens of projects, including historic districts and large multi-parcel properties. Ms. Perzel also has demonstrated experience researching, assessing, and evaluating the integrity of historic resources. She is well versed with the National Register Bulletin technical series, which covers various aspects of historic preservation. Her well-rounded experience and interests make her well-suited to efficiently and thoroughly assist with historic resource concerns in any environment. Ms. Perzel meets the Secretary of the Interior's Professional Qualifications Standards for Architectural History and History.

Palm Desert, CA 92211

Re: Booster Station 5513

Dear Ms. Elizabeth Meyerhoff,

The Agua Caliente Band of Cahuilla Indians (ACBCI) appreciates your efforts to include the Tribal Historic Preservation Office (THPO) in the Booster Station 5513 project. The project area is not located within the boundaries of the ACBCI Reservation. However, it is within the Tribe's Traditional Use Area. For this reason, the ACBCI THPO requests the following:

*At this time the concerns of the ACBCI THPO have been addressed and proper mitigation measures have been proposed to ensure the protection of tribal cultural resources. This letter shall conclude our AB52 consultation efforts.

Again, the Agua Caliente appreciates your interest in our cultural heritage. If you have questions or require additional information, please call me at (760)699-6907. You may also email me at ACBCI-THPO@aguacaliente.net.

Cordially,

Pattie Garcia-Plotkin
Director
Tribal Historic Preservation Office
